At one of the country's largest cement plants the price now is 48½% higher than in the pre-war year 1913. The latest report of the United States Department of Labor shows the aver- age price of "all commodities" as 51% higher than 1913. Some of the items whose prices enter into this figure of 51% have undergone radical decreases, while others are very much higher than the average of 51%. Few, if any, items of the former class enter into cement manufacturing costs, but several items of the latter class do affect the cement costs. In fact, the principal elements in these costs are labor, freight rates, coal and lime- stone.

In February, 1922, the cement plant ferred to paid for its coal at mines 203% more than in 1913, for limestone at quarries 60% more and for labor 54% more. Freight rate on coal was 107% greater and on limestone 52% greater. A comparison of these in- creases with the increase of 48½% in cement price and 51% in the price of " all commodities" is enlightening.

Cement is so widely used that users themselves have standardized it. To- day every cement maker, regardless of his brand, meets the specifications set jointly by the Uni'ed States gov- ernment and the country's leading en- gineering societies. All brands of ce- ment, therefore, are alike.

Jevon's Economic Law.

Because of this, the prices of various brands of cement in any given market usually are the same. The reason for this puzzles many. But the answer is simple and well stated by W. Stanley Jevons, L. L. D., M. A., F. R. S., in his standard work "The Theory of Polit- ical Economy," which says:

"If in selling a quantity of perfectly equal and uniform barrels of flour, a merchant arbitrarily fixed different prices on them, a purchaser would, of course, select the cheaper ones. Hence follows what is undoubtedly true * * that in the same open market, at any one moment, there cannot be two prices for the same article."

Applying Jevon's economic law, a simple illustration of cement competi- tion may be cited thus: A, B and C are cement makers. Each seeks business at M, a town with a 30-cent freight rate from A, 35 cents from B and 40 cents from C. This gives A a 5-cent advantage over B and 10 cents over C. A figures he can sell at, say, a mill price of $1.50, so adds the 30 cents freight and quotes $1.80 at M. Then if B and C want to do business at M they must meet A's price, requir- ing B to go 5 cents below A in his mill price and C to go 10 cents below A in his mill price. Unless B and C can make the mill price sacrifices re- quired by the market at M as made by A's $1.80 price, then A will monopo- lize the market at M.

Similar principles apply to other materials. Prices are not arbitrarily made. They are based upon supply and demand and upon the cost of transpor- tation, raw materials and labor. Sup- ply of labor and materials now is plentiful. We cannot afford longer to delay needed building improvements. This is particularly true because building is so entwined with the na- tion's prosperity that a full revival of building will hasten a revival of other lines of business.

ENGLISH AND FRENCH

"France must tax herself as Eng- land and America are doing. Silence on this great matter is no longer pos- sible. If the oppressively taxed British subjects are willing to make furthur sacrifices for a European settlement, France must bare her share. She was enriched by enorm- ous spending of millions by British and American troops in France dur- ing and did not suffer like England from a breakdown of her world trade Since the war her people have been employed and are prosperous. Her failure to tax herself like other na- tions is indefensible."—A. C. Gard- iner, formerly editor of London Daily News.

The English are beginning to speak plainly about the European sit- uation. (They have gone about as far towards ruin on the continent as they care to go.

What Mr. Gardiner says about the French is true in this that our Amer- ican soldiers, and the English mea- surably left a lot of money incircul- lation in trade, and that money not having been collected in taxes is doing business for France. It would be interesting how many mil- lions of dollars America alone paid to the French during the American oc- cupation.

The Evening Tribune is informed by a military officer who served there that the French claim for dam- ages against the Americans amount- ing to more than the assessed value of France.

Anybody can see that if Europe is not to go through universal bankrupt- cy the French must come to the English way of thinking about post- war adjustmentts. The English are much further sighted than the Fren- ch when it comes to world adjust- ments.—Des Moines Register.

WILL HOG DOWN 7 PER CENT

700,000 Acres of Corn Will Be Har- vested By Swine, Says Evvard

More than 700,000 acres of Iowa corn will be hogged down this fall with an immense saving of man and horse labor and of time that can be put to other farm operations, says John M. Evvard, chief of swine and beef cattle production with the Agri- cultural Experiment Station.

Mr. Evvard estimates, on the basis of figures for past years. that be- tween 7 and 8 per cent of Iowa's corn will be harvested by swine. From farm statistics he calculates that the saving per bushel of corn effected by hogging down is approximately 10 cents.

One of the big advantages of hog- ging down, says Mr. Evvard, is the fact that it saves time for the farmer at the season when he can use it to advantage in fall plowing. The hog- ging down of 20 acres of corn means the saving of about 20 days of man labor and 40 days of horse labor.

Fall plowing of the corn land is often made possible because of the early removal of the grain from the field, says Mr. Evvard. By taking ad- vantage of the early varieties of good yielding corn and turning the hogs in as early as the dents are formed one can fall plow and follow with a win- ter crop.

Hogging down offers a good way of conserving manure. The leaching loss is reduced to a low point and the hog carries away ver ylittle of the total nitrogen, phosphorus, pot- assium and calcium of the crop. Or- ganikc matter is added to the soil if good supplementary crops are used.

The husking process is started earlier with pigs than when cribbing is resorted to. When the corn is well dented is the best time to turn them in. If the corn is to be cribbed the farmer must wait until the ripening is well along.

That portion of the crop that the hogs consume in the field does not need crib space, which is often a big asset of hogging down, especially in years of large yields.

IOWA STANDS SECOND ON TOUR- IST PARKS

Iowa leads all other states ex- cept California in the number of tour ists parks maintained for cross- country travelers according to a list just compiled by the Iowa State Chamber of Commerce. There are now some 150 free tourists camps in the state maintained by commercial clubs and municipalities. Boards of health are enforcing strict sanitary regulations at all camps.

FORD BUILDS OWN WINDSHIELD GLASS

The Ford Motor Company, Detro , has begun to manufacture its own plate glass, and already has in oper- ation the first modern glass house ever equiped especially to make glass for automobiles.

As is customary when taking over the manufacture of a new product, Ford has applied his own principles of production. and, as a conquence, the methods and machinery used in making Ford glass are a radical de- parture from established practice. The Ford continuous conveyor sys- tem features the operations so that from the time the glass leaves the furnace until it becomes a polished windshield it is always moving.

Glass making, when viewed in the Ford plant, looks to be very simple. The raw materials are introduced in- to the furnace where they become a molten mass. Drawn from the fur- nace in a semi-liquid state, the glass passes under a roller, which gives it width and thickness, and to a mov- ing conveyor. This carries it for 464 feet thru a gradually cooling fur- nace. At the end, it is cut and placed on another conveyor which carries it thru the grinding and polishing, after which it is ready for use.

This adds a new link to the fast growing chain of Ford industries which are being established and ex- panded from time to time to line with the Ford policy to achieve com- plete independence of outside mater- ial sources in manufacturing Ford products, and at the same time are the means by which Ford is enabled to use in the production of motor cars, trucks and tractors material of unusually high quality and sell them at the famous Ford prices.

COW GIVES MILK ONLY WHEN PIANO IS PLAYED

The tempermental cow which has been trained to be milked only when the household player piano was go- ing perplexed Mr. and Mrs. Adolph Eisenburg, of Jerseyville, Ill., when they decided to separate. They di- vided everything until they came to the question of the musical cow and the musical instrument. Adolph spoke for the cow and his spouse sought the player piano. Then they considered the cow's prima donna temperment and took the problem to State Attorney Hamilton for set- tlement. He ordered a new deal and handed Mrs. Eisenberg the house and everything that was there except the player piano. This he gave to Adolph along with the cow to furnish milk and the automobile with which he can peddle the milk which the player piano induces the cow to produce.

TIMES FORCE WILL BURN MORE OF JOHN D.'s DOPE

Hanover, Ill., Are Destination Friday

Ye Editor, wife and "Buster" plan to leave early Friday morning (about the time the roosters begin to crow) for a trip to Hanover, Illinois. which is in the vicinity of Galena.

Relatives of Mrs. Jorgenson will hold a week's re-union and general good time at Hanover, beginning on Saturday. But as this is quite a busy time around the print shop, we will return Monday or Tuesday—un- less Ye Editor strikes a good place to fish, in which case the re-union will be shy of one editor from Iowa.

SCHLEI SAYS CROPS AT FENTON ARE GOOD

In a letter from Mr. E. R. Schlei, of Fenton, Iowa, he tells that crops are good in that locality. He says that oats run from 40 to 70 bushels to the acre.

What caught our eye first was a check he enclosed to renew his sub- scription to the Times for another couple years. Thanks.

NOTICE OF APPOINTMENT OF EXECUTOR

Notice is Hereby Given, That the undersigned has been duly appoint- ed and qualified as Executor of the Estate of JOHN ALBERS, late of Hancock County, State of Iowa, de- ceased. All persons indebted to the estate are requestd to make immedi- ate payment; and those having claims against the same will present them, duly authenticated, to the un- dersigned, for allowance.

Dated, Garner, Ia., Aug. 14, A. D. 1922.

LUBBE ALBERS,
(Aug-17-24-31) Executor.

Navy Has New Combat Plane

Meets Every Requirement of Fighting in Connection With Fleet Operations.

CAN LAND ON DECK OR WATER

TS Type Tested Out, Winning High Praise From Government Experts—Equals Any Combat Plane Now in Use.

Washington.—A shipplane designed to meet every requirement of combat and pursuit in connection with fleet operations, of navy design and built at the naval aircraft factory, Philadelphia, is undergoing final tests at the Anacostia air station here under the supervision of the bureau of aeronautics, navy department.

Another plane of the same type was recently completed by the Curtiss company at Garden City, L. I., and will shortly be flown to Anacostia for further tests.

The tests on the new plane of navy design, called a TS, have been uniformly satisfactory, and naval aviation experts consider it as good a combat plane as any in use by military services from land bases. In addition to operating from a land base, this plane can be quickly converted into the sea type by substituting pontoons for the wheel landing gear.

A statement prepared by the bureau of aeronautics concerning the need for such a plane describes the TS as follows:

Analysis of the Design.

The function of the combat plane is to protect our own aircraft by destroying or dispersing the enemy aircraft. With the development of aircraft carriers to a point where they are now recognized as an essential arm of the naval force, it has been necessary to tackle the problem to be solved in producing suitable designs of aircraft to operate from the carriers. These problems in a few words included the following questions:

How to evolve aircraft of the various types and possessing the following qualities: (a) Best performance, (b) greatest radius of action, (c) smallest dimensions, (d) best adapted to handling and stowage on board ship, and operating from a ship or airdrome.

It must be speedy and have superior qualities of maneuverability and stability; it must be lightly constructed but rugged.

The TS, which the new plane has been designated, in recent tests, has demonstrated all of the above qualities in a manner extremely satisfactory to government experts, and it is expected that quantity production on this type will go ahead within the near future.

The plane is equipped with a Lawrence 200 h. p. air-cooled motor, which is the highest-powered air-cooled motor built in the country. The construction of the wings is such as to permit of rapid assembly.

Lands on Deck or Water.

A standard equipment of two types of landing gear is provided, viz., wheels for landing on the deck of carriers or on land and pontoons for landing on the water. Both types of landing gear will be supplied so that the rapid conversion from landplane to seaplane may be effected. This is one of the most noteworthy features of the craft in that it will double its usefulness and make possible land operations by combat planes based on the fleet as well as providing a swift fighting seaplane equipped for making landings on the water.

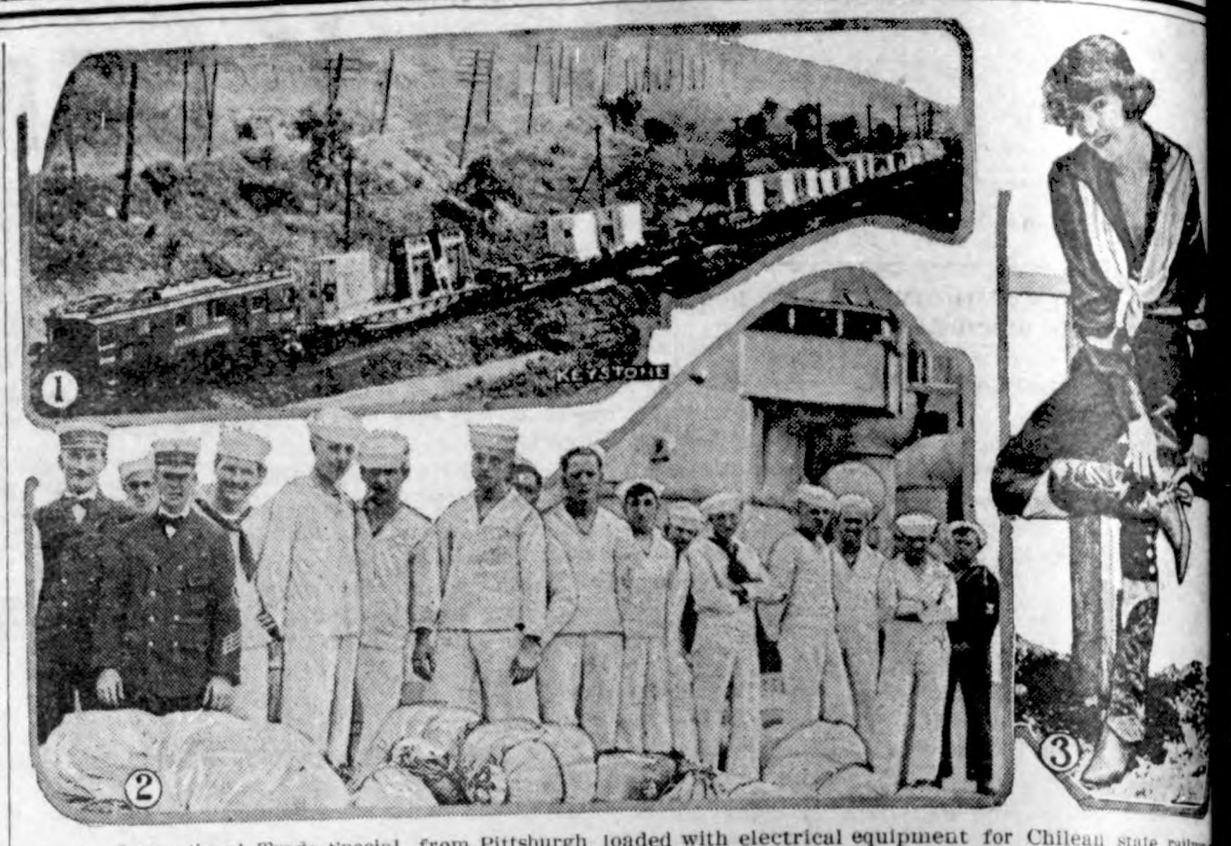
The naval battles of the future will depend largely on gaining and maintaining control of the air. Spotting, scouting and observation from aircraft will give to that fleet possessing these facilities an advantage that will be practically decisive. The torpedo plane has also entered into naval problems within the past two years to an extent that places an entirely new complexion on this method of attack. But all of these invaluable aids to the successful outcome of the naval battle are dependent on the combat plane that is able to take the air in sufficient numbers and with sufficiently superior fighting qualities to sweep enemy aircraft before it.

The new TS combat plane gives every prospect of fulfilling these exacting conditions.

Sun Hatches Chicks on Ship Becalmed at Sea

Tacoma, Wash.—A small flock of chickens and ducks was hatched out of the cook's eight cases of Australian eggs while the ship Matzalan lay helpless in the doldrums with the thermometer averaging 102.

The flippers of a giant sea turtle were cooked for food for the baby chicks. When a few ducklings appeared, a tub of sea water was kept on deck for these youngsters to bathe in.



1—International Trade Special, from Pittsburgh, loaded with electrical equipment for Chilean state railways, the first train ever started by radio. 2—A draft of new men just arrived on board U. S. S. Wyoming at New York. 3—Mabel Strickland, winner of McAlpine trophy as world's championcow girl, at Cheyenne Frontier Day.

Air Heroes to Rest at Verdun

Members of Lafayette Escadrille Who Fell in War to Lie Together.

SIXTY-FOUR NAMES ON LIST

With Approval of Their Relatives Bodies Will Be Gathered and Will Rest Beneath Mausoleum Worthy of Their Valor.

Verdun.—Verdun will be the final resting place of the American heroes who fell while fighting with the Lafayette Escadrille.

Scattered along the line of death from the sand dunes of Nieuport to the swamps of Salonika, their bodies—with the approval of their relatives—will be gathered, and beneath a mausoleum worthy of their valor on a shell-torn hill of the shrine of heroism, they will await the final call, a symbol of the purest sacrifice ever made by man.

Sixty-four names will adorn the monument, but only 62 bodies will be there, that future generations may revere their memory indelibly engraved in the hearts of the living. Nothing was found of the mortal remains of Sergt. Victor Chapman of New York and Lieut. Carter Ovington. They met their fate while soaring high above the clouds, and like Guynemer, they vanished into space, leaving no trace.

A small urn will suffice to contain all that is left of Maj. Raoul Lufbery, cremated alive in his burning plane. Their bodies may have gone to dust, but for each one of these 64 men a place will be set apart as an individual memorial which either now or at any time can be used as a place of interment. In any case, the name of each will appear among the names of his comrades.

A Burial Garden.

This is the program of the Lafayette Escadrille Memorial association. Born of the initiative of Lieut. E. G. Hamilton, it has undertaken to create and maintain in France a burial garden for the heroes of the Lafayette Flying corps who enlisted under the flag of France and gave their lives for the cause they defended.

President Millerand, Premier Poincare and Minister of War Maginot have accepted the patronage of the association, whose president is Marshal Foch and its vice president Ambassador Herrick.

The plan for the memorial garden, designed by Alexandre Marcel, chief architect of the French government, has been mailed to every relative of the dead aviators. The garden will occupy a site about two miles from Verdun, the ground having been donated by the French government for this purpose. In the letter which accompanies the plan the committee says:

"We feel that these men who were actuated by the same noble motives, who together underwent the arduous life of training and faced the dangers of the front; who in many instances had been close comrades in life, should in death lie together in this memorial garden, which for all time shall be a testimonial to their devotion to an ideal which was stronger than their love of life. It is for their relatives themselves to decide whether or no the body shall be moved to the place reserved for it. The committee pledges itself that the removals will be done with the utmost care and reverence."

War Memorial for Nashville, Tenn.

This beautiful statue cast in bronze, standing over nine feet high, was recently completed by George Julian Zolnay, a Washington artist, in memory of the mothers and sons who gave their best during the World war, with the words "I gave my best to make a better world." It will be mounted on a granite pedestal in Centennial park, Nashville, Tenn., by the Nashville Kiwanis club.

Montreal is planning a new hotel, to cost $9,000,000.

CROWS HUMBLE GOLDEN EAGLE

Beat Huge King Bird of Air to Earth in Bitter Fight.

Defeated Bird, Its Feathers Broken, Picked Up and Sent to Cincinnati Zoo—Distress Signal Brings Hundreds of Crows.

Cincinnati.—A golden eagle sat morosely in the eagle house at the zoo, doing his best to straighten and preen the broken feathers of his once proud coat. No wonder. The huge eagle had been humbled by members of the crow clan.

The eagle arrived from Williamsburg, crated and riding on top of an automobile truck driven by Harry Hall. Mr. Hall said he captured the huge bird several days ago on his farm after the eagle had alighted near a crow's nest containing young birds.

Mr. and Mrs. Crow were standing guard over the brood, and when the eagle dropped out of the sky they let out frantic squawks for help. Instantly, from all points of the horizon, there began to materialize a fleet of angry crows. In a few moments the air was black with crows and blue with crow epithets.

The haughty eagle glared defiance at the threatening cloud of feathered warriors wheeling past and clung to his limb. Bolder and bolder became the crows; closer and closer they swept to the enemy, their wing feathers brushing his face, their beaks snapping defiance and hatred. More than a hundred of the ebony fighters assembled at last, and finally the bolder spirits began delivering blows along with the threats and oaths.

The finish came swiftly. The eagle and the nest which the crows were trying to defend were both knocked from the limb and went tumbling to earth in a pecking, clawing, cursing mass. Even after they had their enemy on the ground the victorious crows gave no mercy, and but for the timely arrival of Mr. Hall and other farmers who were plowing corn in the fields near by the affair might have ended in a tragedy.

The men drove the crows away and were going to pick up the fallen eagle when his ready talons and waiting beak warned them away. Mr. Hall found a solution by procuring a horse blanket and throwing it over the vanquished eagle. Then he carried him to his house and put him in a cage, the crows following as a triumphant escort to see that the thing was done properly and without deceit.

Sol Stephan, manager of the zoo, says the eagle is a fine specimen, measuring nine feet from tip to tip of his dull bronze wings. Except for broken feathers, the big bird is none the worse for his terrible mauling, Mr. Stephan says.

The United States lighthouse service maintains lights and other aids to navigation along 46,838 miles of coast line and river channels, a length equal to nearly twice the circumference of the earth.

NEWS REVIEW OF CURRENT EVENTS

Prospect Considered Bright for Early Settlement of the Coal Miners' Strike.

PROPOSALS FOR COMPROMISE

President Harding's Final Suggestion for Ending Railway Strike Under Consideration—Brotherhood Men Are Restless—French Plans Concerning Germany Opposed by Other Allies.

By EDWARD W. PICKARD

UNLESS the coal operators, the officials of the miners' union and the authorities in Washington are badly off in their guessing, the coal strike is almost over. The four-state conference called by President Lewis in Cleveland was considering favorably this agreement:

1. A "four state" basic contract, perhaps expanded to include northern West Virginia, under which the old wages and working conditions in the contract which expired last March 31 will be continued until next April 1.

2. A fact finding body to be set up under approval or by appointment of President Harding to find out what is the matter with the coal industry and what can be done to straighten it out.

Definite action is being delayed in hope that the Illinois and Indiana operators will change their minds and participate. Hitherto the operators have sought to break away from the idea of a central competitive district on which the miners insist. By getting some producers from each of the four states into the agreement, irrespective of how small a minority of production they may represent, the United Mine Workers argue they carry their contention by getting a settlement on a four state basis. But the contract will be binding only upon those who sign up, and Illinois, which produces about twice as much as any other state in the central field, will have only a few individual signers, the big associations standing pat on their own proposals. However, the theory most generally expressed at the conference was that once mines in the East begin to open up, there will be a rush on the part of Illinois and Indiana producers to sign up.

In Washington the government officials were predicting the early settlement of the bituminous strike through the adoption of a compromise agreement embracing these features:

Restoration of last year's wage scale until next March, with continuation of the check-off system.

Creation of a coal commission to investigate the situation and to recommend a new agreement.

Postponement of further controversy until next spring, by which time the proposed investigation will be completed.

It was reported that President A. M. Ogle of the National Coal association was favorable to this plan and that Senator McKinley had advices that the Illinois operators were inclined to enter such an agreement.

Governor McCray's effort to reopen Indiana mines under military guard proved more of a gesture than an accomplishment. Very little coal was produced during the week and most of the men employed deserted, fearing for their lives. The governor intimated that if all other plans for averting a fuel famine in the state failed, convict labor would be employed to get out coal under martial law. On the other hand, the impeachment of McCray for sending troops into the coal field was demanded by a mass meeting of strikers and union labor men at Terre Haute.

It was the general belief that if present negotiations fail to end the strike, President Harding will seize the mines and operate them under guard of federal troops. That he might await the sanction of congress for such a course was indicated by the fact that he suggested to the Republican leaders of the house the desirability of maintaining full membership attendance when the house should reassemble this week, instead of the taking of the usual three-day recess. Democratic Leader Garrett wired all Democratic members to be in their seats Tuesday, but the Republican leaders took no such action.

PRESIDENT HARDING'S desire for congressional help applies equally to the railroad strike, which if anything is becoming more serious. His latest and, in his own words, last suggestion for peaceful settlement of this controversy was that the shopmen return to work and that both sides submit the question of seniority to the railroad labor board. This was instantly rejected, informally, by the leaders of the shop crafts, who called for a general conference of all the railroad labor organizations in Washington on Friday, to consider a formal reply and to adopt measures to make the strike more effective. Mr. Jewell said the answer to the President might not be ready for several days.

The shopmen are trying in various ways to obtain the active support of the brotherhoods, and in a measure are getting it. Engineers, firemen and trainmen are ordered by their chiefs to take no chances with defective equipment. Despite the denials of railway officials, the union leaders declare that engines and cars are deteriorating rapidly, and more than intimate that this is the cause of recent bad wrecks.

Another serious threat by the brotherhoods developed from a clash in Joliet, Ill., between strikers and a sheriff's posse, in which a striker and a railway detective were killed and the sheriff dangerously wounded. State troops from Chicago were hurried to the scene and some of them, being stoned from ambush, fired at their tormentors. Brotherhood men on the Elgin, Joliet & Eastern railroad to the number of 1,300 promptly quit work, saying their lives were endangered by the bullets of the troopers. Their action was approved by the brotherhood heads and President Stone of the engineers said: "There will be 100 such cases soon if conditions are not changed. We are not going to have our men shot up or beaten up or threatened by armed guards at railroad shops and yards. When the men cannot go to work without having irresponsible armed guards endangering their lives, they may go home and stay there until the condition is removed."

If these remarks were aimed at the private forces of guards maintained by railways they may be to some extent justified. If Stone meant to imply that brotherhood men are abused by state troops, in Illinois or elsewhere, the best information obtainable is that his implication is false.

CHICAGO'S street cars and elevated trains were running again Monday after the six-day strike which cost the employees and companies some $1,200,000 and the business industries of the city many millions more. The compromise reached provides for a reduction of 12½ per cent in wages.

SEVERAL important changes were made in the McCumber tariff bill by the senate last week. After listening to charges by Senator Smoot that American sugar refiners, who control the bulk of the Cuban sugar production, are trying to destroy American producers, the senate adopted his amendment by which the duty is raised to 2.30 cents a pound on full duty sugar, and to 1.84 cents on Cuban sugars. The McCumber bill rates were 2 cents and 1.66 cents, respectively. At the demand of the agricultural spokesmen, the senators almost unanimously voted to restore potash to the free list. Next the senate, despite the arguments of western agriculturists, voted to keep hides on the free list and placed in the dutyfree column boots and shoes, leather of cattle hides, harness and saddlery and gloves of cattle hides. The duty on satchels, belts and boxes and cases of leather was made 30 per cent instead of 40, as in the McCumber bill.

IN THE Ohio primaries the Republicans nominated Carmi A. Thompson, choice of the Harding administration and the Anti-Saloon league, for governor. The Democratic nominee is A. V. Donahey of New Philadelphia.

Democrats of Arkansas renomi Governor McRae, who was supp by organized labor and the Ku Klan, defeating Judge Toney. In bama Judge W. W. Brandon wo Democratic gubernatorial nomin by a large majority.

TO THE allied premiers and statesmen assembled in Lo Premier Poincare submitted Fr plan to compel Germany to pay arations or to get the money fro country in other ways. He dec France was in a desperate fina condition, and threatened to act against Germany if the allies fail support her just claims. Poinc demands, briefly, were for contr the following: First, licenses o ports; second, financial exploita of mines; third, state forests; fo participation in German indu companies.

Lloyd George, with the suppo the Belgians, Italians and Jap forced the submission of the F plan to a committee of experts. ing: "It is all a question o method of getting everything Germany, whether the method trouble or cash, and every sa should be submitted to a test."

THE experts fulfilled expectati rejecting the French propos all but the Frnech members agreed in opposition to them on major point. The situation beca acute that both the British and F cabinets were called together, and gave full support to the stand by its premier. As neither side sh any signs of yielding, it appear If the entente were soon to brea leaving France isolated. The B position may be summarized Germany is unable to pay; s ruined, and an effort to squeeze sums from her would merely a her difficulties without profiting allies and, besides, would dela economic reconstruction of Eur The French contention is that many still is economically po and able to pay a great deal, but partly by design and partly by cumstances, she has assumed a pearance of weakness which in does not exist. Poincaire is w to grant Germany a brief morat to see whether she is willing t mote financial reforms and appli ductive measures that would some money for reparations. B has no confidence in the good of Germany.

IRISH rebels, still on the ru doing as much damage as the Before abandoning Queenstown set that city afire, blew up a ra bridge, and blocked the entran Cork harbor by sinking barges narrow channel. They thus hop head off the attack of the nat on Cork, to which they retreated Free Staters, however, landed a eral points and the fight for Cor under way at last reports. T regulars also seriously interr cable communication between A ca and Europe by seizing the coast landing places of ten o seventeen lines between the nents. It was feared they woul stroy these plants.

Joseph O'Sullivan and Re Dunn, the murderers of Field shal Sir Henry Wilson, were h in London, all pleas in their b having been denied by the E courts and officials.

PORTUGAL is having a g strike caused by the rising of food. Martial law has bee clared, constitutional guarantee pended, and the government moved to Fort Cascaes.

AMONG the train wrecks ment in the discussion of the men's strike, the worst was nea Louis, Mo., when a steel coach senger train on the Missouri P running past the block signals, lided with the rear of a local Thirty-seven persons were kille 138 injured.

LATER reports from Swatow, China coast, show that the ty which struck that city recently one of the worst in history. Estim of the number of dead have risen 5,000 to 50,000, and it is said 100,000 are homeless.

THE AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

AKES MOVIE PICTURE NOW

oger Sullivan, Former Engineer, Disabled in World War, Successful In Camera Work.

The fact that he was an engineer efore the war may help him to unerstand the mechanism of a motion icture camera, but the knowledge of roper lighting effects and other ings incident to the successful proction of motion pictures had to be arned by Roger Sullivan, after he as seriously disabled in the World ar.

Sullivan was wounded while operatg with the United Naval forces in rance. After the war, young Sullian found that his injuries were such at he could not successfully "carry " as an engineer. Under the superision of the U. S. Veterans' bureau, e entered a school of photography New York and has completed a ourse in motion picture making and till" photography.

Sullivan and His Camera.

Together with James E. Pelkey, anther disabled veteran who took the ame course, Sullivan is producing a icture entitled "Another Chance." he picture depicts every stage hrough which a disabled veteran asses from the time he leaves the ospital until he has been completely habilitated in some school of vocaional training.

The film closes with the picture of resident Harding. The photograph of ullivan "shooting" the President was aken by Pelkey.

Sullivan and Pelkey spend their pare hours in the club rooms of the Washington Heights post of the Amerian Legion in New York City.

ANTS BEST COOKIE RECIPE

American Legion Auxiliary Plans to Have "Cookie Jar" for the Sick Ex-Soldiers.

The best, top-hole, A-1 cookie recipe America is wanted by the American Legion auxiliary for use in its welfare work with veterans in hospitals.

This recipe may be a modern, cooking school's latest piece de resistance, or it may be a family heirloom — but it must be good. The more it resembles the cookes that mother used to bake, the happier it is going to make a lot of sick oldiers.

The auxiliary's plan is to establish each hospital, where there are eterans receiving treatment, a "cookie ar," which will be kept filled with a resh supply of delectable cakes, made y auxiliary members. The plan is hat of Mrs. W. H. Cudworth, of Milwaukee, Wis., chairman of the hospial and welfare committee. The recipe hould be sent to the national auxilary headquarters, Indianapolis, Ind. widely known baker will be asked o judge them and select the best.

ERMAN CROOK DUPES YANKS

nconfirmed Report Is That Escaped Prisoner Donned Belgian Uniform and Obtained Money.

The story is carried by a Brussels ewspaper of the duping of the Amerian army in the Rhine area by a lever German crook. The story was ot confirmed by Americans at Coblenz.

A German prisoner of war effected is release from a prison camp, donned e uniform of a Belgian army major nd the name of Otto Debeny, accordg to the report. He presented orged credentials at Coblenz where he is said to have been royally received y the American army.

Before the assembled American oops, he pinned the medaille milire of Belgium on Major General llen's breast and after getting umerous loans of considerable mounts from Major General Allen's aff, departed for Paris.

GIVES LIFE SAVING OTHERS

W. C. Gentry Escaped Injury in World War, Dies Rescuing Texas Flood Victims.

After serving with the colors in the infantry, field artillery, motor transport corps and the navy, W. C. Gentry returned from the World war to his home at Fort Worth, Tex., without having been injured. During the flood at Fort Worth in April, 1922, the American Legion called upon its members to do rescue work. Young Gentry was one of the first to present himself at the Legion office.

During the first few hours he was in the flood district Gentry rescued six persons. While swimming toward the levee, after carrying a woman to safety, he became entangled in a barbed-wire fence which had come to the surface of the water. He called to a companion for help, but the companion was too nearly exhausted to save him. The surging waters from which he had saved others soon engulfed him.

Mayor E. R. Cockrell of Fort Worth urged his fellow citizens to erect a fitting memorial to the young man who had unselfishly given his life for his fellow men.

WHEN ONLY FOUR HOURS OLD

Miss Rosalie Carol Larson of Worthington, Minn., Probably Youngest Auxiliary Member.

Fortunately, there are no age requirements for membership in the American Legion Auxiliary. A number of grandmothers were among the charter members of the organization in Minnesota. On the other hand, there are several young women who may say that they have belonged to the Auxiliary all their lives. Little Rosalie Carol Larson of Worthington, Minn., was admitted to membership when she was exactly four hours old. No, she didn't apply for the honor, it was just conferred upon her.

Rosalie's father, Warner Larson, served with the Twenty-ninth division, and her mother received her diploma as a graduate nurse after volunteering for service with the American Red Cross.

THE FLOWERS OF THE LEGION

American Daisy and French Poppy Official Posies of Both Branches of the Organization.

There has been some confusion in the minds of Americans in general as to the status of the daisy and the poppy in connection with the American Legion and the American Legion Auxiliary.

The daisy is the Legion's official flower; the poppy is the Auxiliary's memorial flower. The misunderstanding arose in the first place, because in its early days the Legion did adopt the poppy of France as its flower. But at its Kansas City convention the American Legion adopted the daisy as its official flower on the grounds that the daisy is an American flower and the poppy of Flanders is available for use only in artificial form.

The Legion Auxiliary has taken advantage of the very fact that the poppy is not available as a real flower to buy artificial flowers made by disabled soldiers in hospitals. The Massachusetts Legion and Auxiliary netted something over $46,000 from the sale of artificial poppies, last winter. This money was used to better the conditions of sick and needy veterans of the World war.

The Legion is making every effort to interest the children of America in the cultivation of flowers by appealing to their patriotism and to their natural affection for such a flower as the American Legion's American daisy.

Carrying On With the American Legion

Former service men in Pennsylvania received $40,000 in claims from the government in one month through the efforts of the Pennsylvania American Legion.

* * *

A giant new bridge will span the historic Charles river at Boston, Mass., serving as a memorial to the Massachusetts dead who lost their lives in the World war.

* * *

Australia's heroes of the World war were honored on Anzac day, when religious services, soldiers' reunions and public meetings were held throughout the commonwealth.

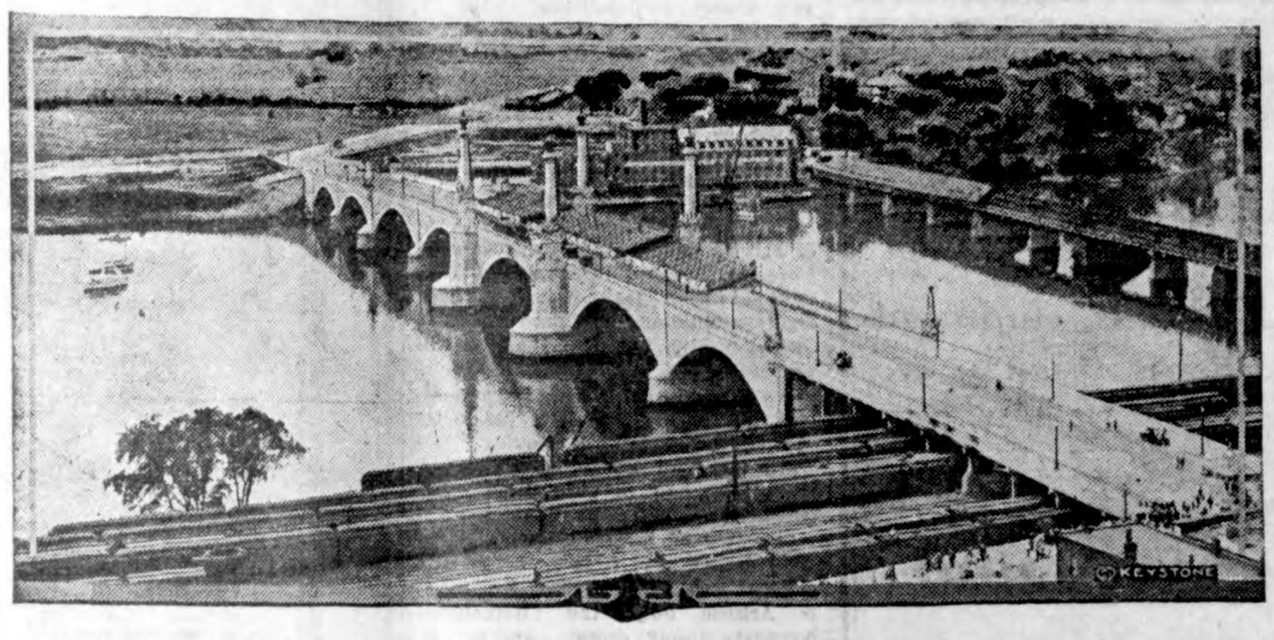
* * *

A freak pretending to be half baboon and half woman, giving America as her home and declaring that there are many more like her in this country, attracted considerable attention in a Constantinople (Turkey) street carnival, until American Legion members had the act suppressed.

Fatal Strike Clash Brings Troops to Joliet, Ill.

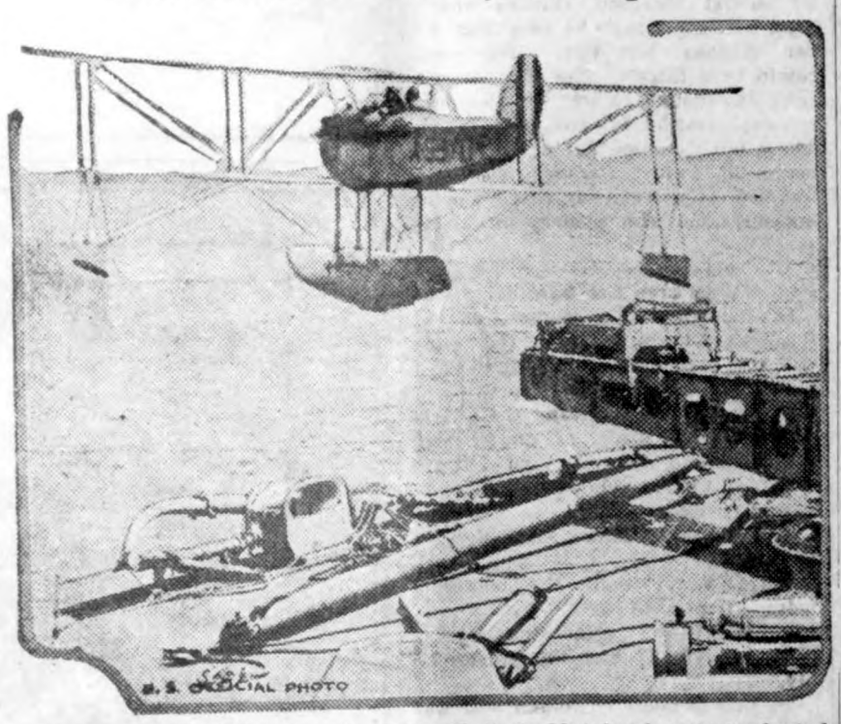
Illinois state troops from Chicago were hurried to Joliet because of a clash between railway strikers and a posse in which a railway detective and a striker were killed and the sheriff of Will county was seriously wounded. The photograph shows a machine-gun section marching through the town, where the guardsmen were jeered at and stoned by strikers.

Bridge Is Memorial to Massachusetts Soldiers



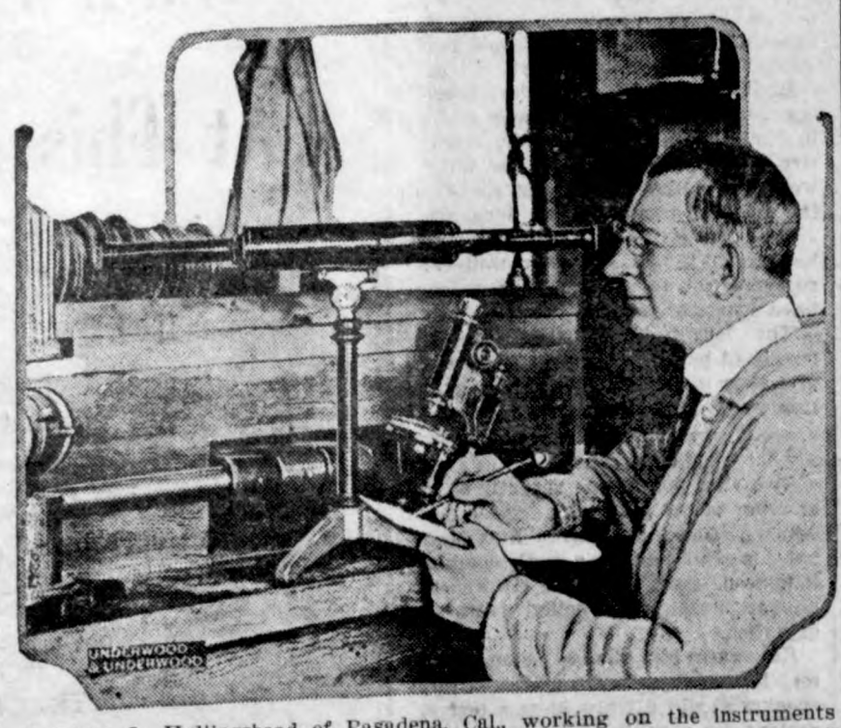
This handsome bridge across the Connecticut river at Springfield, Mass., built as a memorial to Hampden county's soldiers in the World war, was dedicated recently with impressive ceremonies. Governor Cox delivered the address. The bridge, which replaces an ancient wooden structure, cost $4,000,000.

Plane Launched by Catapult



Further tests of the catapult on the U. S. S. Maryland were conducted at Hampton Roads, Va., in the presence of Admiral Jones, commander of the U. S. Atlantic fleet, and Admiral Moffett, chief of the bureau of aeronautics, who says: "The catapult is no longer in the experimental stage. It is as practical and workable as is the torpedo tube used for launching torpedoes from the deck of a destroyer. Furthermore its development by the navy is a boon to aeronautical activities in the commercial field. The day is not far distant when commercial planes will be shot into the air from the deck of fast mail ships when they are still many miles at sea."

Discoverer of a New Light Ray



Edgar L. Hollingshead of Pasadena, Cal., working on the instruments with which he produces a new light ray that is said to be much more powerful than the X-ray. According to reports, the ray gives off no heat, is a powerful anesthetic agent, and is capable of producing startling changes in metals.

YOUNGSTERS MAY WED

Recent protraits of Prince Umberto, son of the king and queen of Italy, and Princess Beatrice, second daughter of the king and queen of Spain, whose betrothal is reported in Madrid. The prince is seventeen years old and the princess is only thirteen.

DECORATED FOR SERVICE

Miss Margherita Travascio, daughter of Frank A. Travascio of Philadelphia, with the bronze medal of the Italian Red Cross society, just presented to her for her distinguished service during the war.

International Diet.

Two Tommies, turned punsters, went into a restaurant over on the eastern front and said to the waiter: "We want Turkey with Greece."

The waiter replied: "Sorry, sirs, but we can't Servia."

"Well, then, get the Bosphorus."

The boss came in and heard their order and then said: "I don't want to Russia, but you can't Rumania." So the two Tommies went away Hungary. —Commerce and Finance.

Current Wit and Humor

BARGAINS IN BABIES

Little Jane had long desired a baby sister, and one day she came rushing home in high excitement.

"Oh, mother; come downtown quickly!" she exclaimed. "There are splendid bargains in babies and you can get one while they are cheap."

"What in the world are you talking about, my dear?" the mother asked in astonishment. "Somebody must have been playing a joke on you."

"Truly, truly!" the little girl declared, jumping up and down in eagerness. "Great big sign about it, on the top of the skating rink. It says, 'This Week Only, Children Half Price.'"

ABSENT MORE NOW

He: Do you think as much of your hubby as you used to before you were married?

She: More. I don't see him so much now, so I have to think of him.

Parley Prescriptions.

The agitation riseth high
And various ills endure.
Still patiently the world doth try
The conversation cure.

What He Bought.

Smith bought a business through an agent as a going concern. After six months he failed, but took his trouble very lightly. Meeting the agent some time later, he said:

"Do you remember selling me a business—a going concern?"

"Yes, of course I do," replied the agent.

"Well," said Smith, "it's gone."

Practice Makes Perfect.

"I've been in the penitentiary 20 years, mum. What good would it do me to get out?"

"You could begin life over again," said the sympathetic prison visitor.

"Could a piano player quit tickling the ivories for 20 years and begin right where he left off, mum?"

"I suppose not."

"Neither could a burglar.

Peace at Any Price.

"So you bought that hat for your wife. Well, believe me, it makes her look fierce."

"That may be, but she would have looked a good deal fiercer if I hadn't."

The Honor.

Bilton—Well, they've put a tablet on Scribbler's birthplace.

Tilton—Well! What does it say?

Bilton—"For sale. Inquire within."

Not in Tune.

"Mabel didn't seem to have a very good color yesterday."

"No she didn't seem to be quite in tune with the cosmetic at all."

Question.

"Here's another knotty legal question." "Say on." "Should a lady who shoots her husband get the insurance?"

A HUSBAND'S RECIPE

"My wife and I used to quarrel all the time, but now we have the most peaceful home you ever saw."

"Indeed! How do you manage it?"

"I simply make my wife so mad she refuses to speak to me."

The Groom.

Here comes the bride,
Into the room,
That shivering mortal
Is the groom.

Observant Child.

"Well, darling, how do you like your new nurse?"

"Well enough, mamma, but she's so untidy. She doesn't even take off her hair when she goes to bed, like you do."

Fat Bequests.

Heinrich—Vot vos you doing, Hans?

Hans—I vos my vill making. To mein vife everything I give—to mein sister the remainder I leave—to mein brudder the residue shall have—und all that vost after that left over to you, Heinrich, is.

It Was Really Heavy.

Young Wife—I made this cake all by myself, darling.

Young Husband—Well done, love! But—er—who helped to lift it out of the oven?

ROAD OF THRILLS

San Diego Short Line Traverses Wild Country.

For Real Beauty Travelers Have Declared There Is Nothing on Earth Surpassing It.

"Travelers are urged, and properly so, to see America first, but no person can claim to have fulfilled the admonition," says Editor Howe of the Atchison (Kansas) Globe in a recent issue, "unless he has made a trip over the San Diego Short Line from Yuma, Arizona, to the coast city, the thrill road of this continent. While the road known as the San Diego & Arizona is 220 miles long, only 11 miles is thrill territory. During that 11 miles, it passes through Carriso mountain gorge, dodging through 17 tunnels which alone were driven at a cost of nearly two millions of dollars, and clinging, when out in the open, to a roadbed chiseled from the sides of mountains, with gaping canyons almost straight below you to a distance in places as great as 900 feet. Above the track are sheer and almost perpendicular walls of granite. As the train slips slowly around sharp mountain curves on its shelf, which from a distance looks like a burro trail, one gets as many thrills as are experienced in aviation, but with confidence inspired by the knowledge that he is secured and upon a firm footing through modern railroad construction. The San Diego & Arizona was the only railroad completed during the late war. It was opened in 1919. Its total cost was over eighteen millions of dollars and it is owned jointly by J. D. and A. B. Spreckles and the Southern Pacific. It was built to give San Diego a direct line to the east and before its completion everything moving westward into San Diego or going east from there had to pass through Los Angeles.

"Because of its enormous cost the road doesn't pay, it is said, but it is a great scenic route. The San Diego & Arizona hugs the international boundary closely, crossing and recrossing it a number of times. In fact for 44 miles it is in Old Mexico, but in the peaceful section of Lower California. No passports are required of passengers, and there is no inspection of through baggage. The train stops at several Mexican villages where lager beer signs may be seen from the car windows, but the thirsty must retain their thirst. The train doesn't stop long enough to wet whistles, and, anyway, vestibules are not opened. There is no chance for passengers to leave the train. Persons who have traveled extensively say there is nothing surpassing the scenery in Carrizo gorge."

Long Live the Sardine!

In Portugalete, a seaport of the Basque provinces of Spain, the people still talk of a certain amusing incident that took place at one time when a large crowd was watching the arrival of the popular king and queen. Suddenly someone shouted "Viva el Rey!"

"Viva! Viva!" echoed the crowd in a mighty voice.

Then the same fellow shouted, "Viva la Reina!"

"Viva! Viva!" came the answering volume from a thousand throats.

"Viva Espana!" cried the fellow.

"Viva! Viva!" was the prompt reply.

At that moment a woman who was selling sardines turned the corner.

"Sardinas, vivas sardines!" she shouted. And before the excited throng could restrain itself it had roared forth approvingly, Viva! Viva!"—Youth's Companion.

Forty Years—Or More.

Mr. T—— is past seventy and getting so absent-minded that sometimes he passes his best friends and even members of his family. His daughter in the early forties, who is a very progressive business woman, will not permit the family to keep him at home, saying that sensible people don't mind what an old man says.

But the other day she almost changed her mind. She was sitting in her office talking to a very attractive young bachelor when her father walked into the office. He spoke to the man and turned to his daughter.

"Your face looks very familiar?" he began. "Let's see—now wait—I'll recognize you in a minute. How long have I known you, my dear?"

The daughter said that her embarrassed pause was even more of a give-away than an answer to the question would have been.

Last Shot.

Two rival politicians recently spoke at the same gathering of women voters. One had desired first place but his rival having a pull, obtained it instead. And while the rival spoke he sat and simply "boiled" with indignation.

But when his chance came to retort he made good use of it. "Every speaker should always have a text or pretext for speaking," he said. "My opponent having had the latter for his speech I will how choose the former and give my text."

Out in the Wagon.

It happened in southern Indiana. The sleek-haired, surefooted, suave drug clerk approached one of the "country lassies, pure and sweet."

"Is any one waiting on you, madam?"

"Why—er—yes; my feller is waitin' for me out in the wagon."

Fair Prices and Better Tires

Stock in all Sizes

School House

WILL BE SOLD AT

Public Auction

The Ell Township School House Building, located 2 miles north of Klemme, Iowa, will be sold at Public Sale on the grounds, to the highest bidder, on—

Monday, August 21

Sale Will Begin Promptly at 2:00 P. M.

This building is in good condition and will make a good building which can be used for any purpose. A new school has been built so the old building is no longer of any use.

Ell Township School Board

J. A. Young. Auctioneer.

Get This

One of our sales ladies was telling a next door neighbor what made her salad a success "Then I add vinegar--" "But", interrupted the neighbor, "when does your Nine Cent Sale begin at Killian's?"

Our advertising man was being shaved, "Let a fellow in on something" said the barber. "When does your Nine Cent Sale start?"

Coming out from the Palace Theatre the other night-- "Did you notice the perfectly ravishing dress that Norma wore?" "Yes, nice looking", her spouse replied. Then---"Know when the Nine Cent Sale starts at Killian's?"

A youngster caught a ride down town in our delivery car. "Say" to the delivery boy as he got out, "when does the Nine Cent Sale start? I want to tell my mother".

All of which will not seem overdrawn to those who have attended Nine Cent Sales in the past and know how radically prices are reduced.

Well, here is the good news for everybody! The sale begins when the doors open at 8:30, Thursday, August 24th--and continues the customary nine days.

Sale bulletins are now in the mails. See the Mason City Globe Gazette for furthur details.

MASON CITY'S SHOPPING CENTER

NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Supervisors of Hancock County, Iowa, will meet at the Court House in Garner, Iowa, on the 29th day of August A. D. 1922, at 1:30 P. M., to let to the lowest responsible bidder the contract for the work and material for constuction of the drains in the Drainage Improvement known and designated as Drainage District No. 125 of Hancock County, Iowa, said work to be let in sections specifying the work to be done and the time fixed for the commencement and completion of the same. to-wit:

Ditch	Length	Size	Av. Depth
Main	540	16	5.50
Main	6700	12	5.50
Main	900	10	4.70
Main	637	6	4.80
	60 feet of Cor. Pipe 18"—2 bands.		
	1 Bulkhead— Estimated—12 cubic yards. Reinforced 500 lbs. steel.		
Lat. 71.50	836	6	4.60
Lat. 73	650	8	4.20
Lat. 80	188	6	4.30
Lat. 81.50	138	6	4.00
	1 10" Sewer Pipe Intake.		

Average haul about two miles from Ventura, Iowa.

All tile must pass the specifications for standard drain tile of the American Society for Testing Material, tile in sizes 8" and above to be not less than 2' long.

Cement tile will be allowed only in sizes 12" and above.

Work to be commenced thirty days from date of letting contract. Contract will be completed by April, 1st, 1923.

All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

Whenever the tile improvement is laid in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to backfill the tenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

All ditches and drains to be constructed in all respects in accordance with the plat, profile and specifications of the District filed by the Engineer in the Auditor's office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 10 o'clock A. M. on day of letting.

The price must be stated in the bid in figures and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including outlet pipe and must also include the schedule of overdepth or underdepth beyond the average depth specified.

Bids will be received on any or all sections for the tile alone, for construction work alone, or for both tile and construction.

The Board will at their discretion let the work as a whole or in sections to the lowest responsible bidder, reserving the right to reject any or all bids, and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in the sum equal to ten per cent of the total amount of bid as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMANCE TO THE ABOVE REQUIREMENT WILL BE REJECTED.

CHRIS JACOBS. Auditor,
Hancock County, Iowa.

The Biggest Fence Post Value Ever Oifered

ANY Way you look at it, this new RED TOP Double Strength Studded Tee gives you the greatest value ever offered in a fence post.

Greater strength—there isn't a single hole punched in this post either for staples or anchor plate.
Firmer in the ground—the RED TOP anchor plate is sturdier than ever.
Longer service—kthe new aluminum finish and solid post make it longer lived.
More efficient stapling—the RED TOP Perfection Staple holds fencing tighter and is easier to apply.
Better Looking—the aluminum finish gives it a neat, trim appearance.

Come in and see this new RED TOP before you start work on your fences. It's as good for repairing old fences as for building new ones You can get a better idea of the big value in this post by seeing it than we could give you in a full page advertiemsent.

It's cost? Less than the better grade wood posts and last twice as long. Remember, too, that it costs one-tenth as much to set a RED TOP. It's by far the cheapest in the fence line.

WE HAVE A GOOD STOCK OF "RED TOPS" ON HAND AND CAN TAKE CARE OF YOUR NEEDS WITHOUT DELAY.

Northern Lumber Co.

Ain't it Hot?

But Cold Weather Will Soon Be Here

Pretty warm weather to be talking furnaces this week, but we want to warn you that the Fall Season is practically here. In a few more weeks we will have chilly nights and then you will realize that winter is but a very short time ahead.

Be Prepared for those long cold winter days and colder nights when you will want a—"house-full of clean warm heat," which you can enjoy if you instoll a

Globe Furnace

IN PIPE OR PIPELESS

and every room in your house will be cozy and winter will be enjoyable.

A GLOBE FURNACE is economical to run. Will burn anything, uses little fuel for the heat produced.

Hot as the weather may be, we are now installing furnaces. Come in today and let us figure with you and tell you why you should buy a Globe Furnace.

Order your repairs, grates, pipes, etc. for your furnace or heating stove now!

Something to Think About

By F. A. WALKER

CHARACTER BUILDERS

YOU may be filled with wonder at the number of disappointments that come into your life, frequently, too, at a time when you are least able to bear the shock.

Being afflicted with the common inferiorities of mankind, you fail to consider that others are as repeatedly beset by discomfitures as you.

Some, it is true, run aground and are wrecked, swallowed up by the sea of despondency and swept away.

Others, more courageous by reason of their faith in a higher power, possessing a better judgment than their own, summon up new strength and sail bravely on, refusing to lose heart or to become discouraged because they have temporarily lost sight of their friendly star.

And this is what we all ought to do, quite irrespective of our many slips and stumbles, else in rebellion we lose hope.

An artist who imagines he has at last found the right color for what he decides shall be his masterpiece of tone and composition, is unspeakably disappointed when at the final stroke of the brush he is confronted with the palpable miscarriage of his plan.

And so is the singer with a pleasing voice who, after years of hard work, discovers a defect which cannot be overcome.

A disappointed child dries his tears and turns his attention to a new quest. In the novel surroundings he quickly forgets his old dismay and rises gayly to sunnier heights.

We older children, much harder to please and decidedly less inclined to change our course, do not bear the chastisement with similar grace, being disposed to violent rebellion and shameful outbursts of passion which in our cooler moments, let it be stated charitably and with due regard to the various frailties of human nature, we occasionally regret.

To turn squarely about when defeated on the very threshold of success, though exceedingly difficult and humiliating, is the noblest thing to do.

In this one sublime act we unconsciously uncover the true base of character, and exhibit our unsuspected virtues.

The storms of ages may beat against such character, but they can neither move nor destroy it, built as it was by disappointments for an eternity of sweet content such as mortal tongues cannot describe or imaginations picture.

KIDDIES SIX

By Will M. Maupin

SONGS O' CHEER

WHAT'S the use o' weepin'?
Better days are comin' soon.
Don't be cryin', but be tryin'
For t' lilt a merry tune.

What's th' use o' moanin'
If th' day is dark an' drear?
Clouds don't matter—they will scatter
If you sing a song o' cheer.

What's th' use o' grumblin'
If your plans go all awry?
Keep on smilin' all th' while on'
You will git there by an' by.

What's th' use o' kickin'
At your tough, untimely fate?
On tomorrow shove your sorrow
An' keep hustlin' while you wait.

What's th' use o' cryin'
'Cause all days ain't days o' June?
Prick the bubble you call trouble
An' strike up a merry tune.

(Copyright by Will M. Maupin.)

ALITA IS STOPPED

By LOUISE M. ADDELSON

(©, 1922, by McClure Newspaper Syndicate.)

Tall and thin and swarthy was Miss Alita Vandervelde, with an intense love of art and an intense hatred of clothes as other people wore them.

Miss Alita was temperamental. She played the piano with much force and vigor. Other Vandervelde also performed, thereby, however, displeasing Miss Alita, who had a consuming desire to be known as the musical wonder of the family; and she was very, very bitter against anyone who interfered with that desire. Cousin Chopin Beethoven Vandervelde did interfere with it. A fickle and unjust world, overlooking the merits of Miss Alita, had hailed a couple of Chopin's musical compositions with delight; and the director of a famous opera company had signed a contract with him at a highly remunerative figure.

Miss Alita was deeply pained as, on a certain evening, she fingered the tickets sent to her and her mother for the first opera at which Cousin Chopin was to conduct.

"Shall we go?" asked her mother.

"We shall go," answered Miss Alita. "Otherwise they will think me jealous."

'And of course you are not?" asserted the mother.

"Of course not!" said Miss Alita.

They went. Miss Alita didn't think much of the way her cousin led the music. Nevertheless, at the end of the first act she rose and walked to the orchestra railing, saying, in a voice loud enough to be heard in the greater part of the house, "Chopin, we congratulate you. We are proud of you."

Chopin flushed to the roots of his hair. "Thanks," he said, crisply. "You had better go back to your seat. It is nearly time for the second act."

"What a pity," said Miss Alita, seated once more, "that Chopin is so ill-mannered."

"Maybe," said the mother, hesitatingly, "maybe you should have waited with your congratulations."

"No!" said Miss Alita, emphatically. "He might think me jealous."

Somehow or other Chopin resented the felicitations of his cousin Alita. Nor did his resentment abate when, the next evening, she again publicly bestowed her congratulations. At his home the following day she repeated the performance before a houseful of guests. Thereafter Miss Alita congratulated Chopin every time she saw him. He commented on this inelegantly but explicitly.

"I won't have that old crow spoil what fun I get out of life with her fool talk. I won't have her claim relationship to me in such a manner—and in such a costume!"

"What will you do to prevent it?" asked Mary, his pert and pretty sister.

"Something desperate—and soon."

"Some chance," laughed Mary.

"Wait and see. But never mind that now. I've invited some friends for dinner tonight—Straumm, Freeland and a few others. I suppose our precious cousin will pop in just in time to spoil things."

Ferdinand Straumm, a friend of Chopin's from a distant town, arrived late in the afternoon and, true to Chopin's prediction, Miss Alita also was announced shortly afterward. Chopin became thoughtful, but as he gazed meditatively at his good friend Straumm his expression brightened. He greeted Miss Alita with a gayety and enthusiasm that astonished her.

"Allow me," said Chopin, "to introduce Mr. Straumm. Mr. Straumm, my highly giften cousin, Miss Vandervelde."

"How fortunate I am," said Miss Alita, quite flustered, "to meet the composer of the Straumm waltzes!"

Chopin smiled. His friend looked dazed, but Miss Alita was unconscious of it. There was another Straumm among Chopin's acquaintances, a much more notable Straumm, whom for years Miss Alita had been anxious to meet. And she was very happy in the thought of having met him at last. But her happiness lasted only until George Freeland arrived, in time for dinner.

"Let me," said Miss Alita, sweetly, "give you the inestimable privilege of meeting the composer of the Straumm waltzes."

"What are you talking about?" asked George, rudely. "This isn't the composer of the Straumm waltzes. In his wildest dreams he never associated himself with the real Straumm."

Miss Alita's eyes flashed from face to face.

"I leave this house forever," said she. "I loathe it, and its inmates. I wash my hands of you. I leave you forever."

And she did.

"I acknowledge," said Chopin, after a moment's silence, "that I have been guilty of deception. It was cowardly, but I had to do something to divert her attention from me. She was getting on my nerves."

"Well," said Straumm, "though I would even have married her to please you, I'm awfully glad I don't have to."

"I didn't know," interposed George Freeland, "that I was upsetting things, but I'm positive I can enjoy myself a whole lot better now that our sweet Alita has gone."

"Dinner is ready," said Mary. "Suppose we go and eat?"

Depends.

Edith—Isn't it disgusting to hear men flattering women?

Marie—Yes, other women.

SCHOOL DAYS

WHY?

IS THE SPILLING OF SALT UNLUCKY

THE superstition connected with the spilling of salt during a meal has had the same origin as that concerning 13 people at a table—the Last Supper. But, unlike the latter belief, there is no foundation for it in history. None of the accounts of the Last Supper records any spilling of the salt by Judas and it is doubtful whether Leonardo da Vinci, in his famous fresco of Christ and His apostles, intended to attach any significance to the overturned saltcellar beyond indicating nervousness on the part of Judas. Da Vinci's painting having been accepted as an historic replica of the Supper, it is only natural that the incident of the overturned salt should have been implanted in the public's mind as an integral part of the meal and that it should have been connected with Judas and his subsequent ill fortune.

The custom of throwing salt over the left shoulder in order to dissipate any evil influence has an origin which antedates Da Vinci by many hundreds of years. The pagan Romans considered that salt was sacred to the Penates, the household gods, and that to spill it during a meal would incur the wrath of these gods—not upon the spiller, but upon the person toward whom it was spilled. Casting a pinch of salt over the left shoulder—the shoulder of evil—was therefore an act of politeness, for it was supposed to lift the curse from the person toward whom the salt fell and to fasten it upon the spiller himself. It was doubtless this ancient Latin belief which caused Leonardo da Vinci to include the overturned salt in his painting of the Last Supper.

The Only Place He Missed.

Bystander (to boasting old salt)—You ought to feel at home in geography when you've been about so much.

Old Salt—Wall, I've run past the ol' place a couple times, but I never planted me foot there.

Use Oil in Steam Tractor.

A steam-driven tractor of the endless tread type has been developed in which oil is the fuel used for its two engines mounted on opposite sides.

Mother's Cook Book

For palates that must have inventions to delight their taste.

THESE ARE GOOD

SUCH vegetables as the delicate pea are best served in the liquor in which they were cooked.

Deviled Herring.

Take two cupfuls of smoked boneless herring, half cupful of diced celery, one-fourth of a teaspoonful of mustard, two tablespoonfuls of minced green peppers, one-fourth of a teaspoonful of curry, one tablespoonful of minced onion, a fourth of a teaspoonful of Worcestershire sauce, two tablespoonfuls of butter, three tablespoonfuls of flour, two cupfuls of tomato juice and one cupful of buttered crumbs. Cut the herring into dice and let stand in a warm water for forty-five minutes. Melt the butter; fry the celery, onion and pepper until softened. Add the fish, flour and seasonings, mix well and add to the tomato gradually. Let boil. Turn into buttered ramekins, cover with crumbs and bake until brown.

Bulgarian Dressing.

Take three-fourths of a cupful of mayonnaise dressing, add one-half cupful of chili sauce, one teaspoonful of walnut catsup, one teaspoonful of Worcestershire sauce, one teaspoonful of vinegar, one-half teaspoonful each of salt and paprika and one tablespoonful each of chopped red and green pepper. Mix well and chill before serving.

Nellie Maxwell

(©, 1922, by Western Newspaper Union.)

School Frocks Are Simple;

Among the New Fall Hats

DRESSING with propriety, and therefore with some measure of charm, is one of the things that the best schools require of their attendants. It seems that this is a matter that cannot be left to the judgment of the girls themselves and mothers are sometimes more indulgent than sensible, so that many schools dictate as to what shall be worn to school.

Simplicity and neatness are two essentials of the school dress, quiet color and durability are others. Navy blue is the favorite color and deserves to be, and strong woolens, like serge or twill, the fabrics chosen by most schools. Mothers who govern themselves by these restrictions are certain to be credited with good taste.

"Off to school" is written in the lines of the dark frock of poiret twill at the left of the frocks shown here and it is to be imagined in navy and gray, brown and tan or navy with green or red. Vestees, with collar and cuffs to match, are usually made of a wash material and detachable so that they can be kept always fresh and crisp. Various kinds of ties, of cord or ribbon, write "finis," with a pretty little flourish, on the school dress.

The pretty model for leisure afternoons, at the right, presents some new style points. It is made of one of those velvety wool fabrics much like duvetyn, and has a semi-fitted bodice with full skirt gathered and set on with a piping of covered cord. The bodice is covered by parallel rows of silk stitches and has a novel drapery, ending in points that support tassels. Little silver buttons twinkle along one edge of the drapery and the flaring sleeves repeat the decoration on the bodice in a graceful band.

When the young and gentle maiden isn't thinking of the Einstein theory, ten to one her thoughts are occupied with clothes—of which her hats are the most engaging item. Now that the time has come for school or college, the matter of her headwear must be disposed of; once it is off her mind there will be a chance for other things to occupy it.

Fortunately for the younger women and girls, there are no displays better than the first ones, where we find the genius of designers, under the inspiration of new styles, materials and trimmings, inspired to unusual efforts. See what has been accomplished by them

Two Pretty "Off-to-School" Frocks.

in the group of new dress hats for young women, as pictured.

At the top of the group a pretty roguish hat is simple enough to please exacting mothers and smart enough to captivate their more daring daughters. It is made of panne velvet, has a mitred crown and a collar and bow of georgette ribbon.

The new, and much admired, shade of green called "mignonette," appears in the handsome hat of Lyons velvet at the right and affords the best of backgrounds for the last word in flower trimming. These blossoms are formed of aluminum and silk and will bloom on cheerfully in the snow. They nestle cozily against the shirred crown.

Lyons velvet and two-toned georgette ribbon, shown in many color combinations, make the charming hat at the right. It is a rich and quiet affair with graceful and well-balanced line

Group of New Fall Hats.

suited to girls of the dignified type. Finally a soft and elegant hat of dark velvet displays hand-crocheted lea of chenille and metal, posed about brim in a way to make everyone to look at it. It is a lovely exponent of the glory of autumn and quite versally becoming.

COPYRIGHT BY WESTERN NEWSPAPER UNION.

Uncommon Sense . . .

By JOHN BLAKE

HERITAGE OF HONESTY

"I KNEW from a child that it was wrong to steal," said a very successful man who has made a fortune without being a crook.

"That is what saves the world," replied an editor to whom he was talking. "Thank Heaven, all boys are honest. They never become crooks till they are men."

That statement is in a large measure true. While children, if trained by scoundrels, will steal, they know instinctively that stealing is wrong. They would much rather be straight.

The theft of apples or watermelons or peaches committed by youngsters is mischief.

Show them that it is really stealing, that they are depriving someone else of what is rightfully his, and there will be no more climbing over back fences for them.

One of the reasons that this is not a difficult world in which to live is that honesty is instinctive, and theft has to be cultivated.

The average schoolboy despises a thief, and will have nothing to do with him.

If he reads in the newspapers of an absconder or a forger or a man who misappropriates a trust, the lad is shocked and disgusted.

It is only when he becomes hardened by contact with the world, and learns that men often prosper, even though they are dishonest, that he becomes hardened, and justifies his own misdeeds.

Watch a crowd of boys at games, and you will find that the cheat is always marked and barred from the game if he continues to cheat.

The cheat himself was not a cheat always. He has learned cheating from another boy who in all likelihood learned it from a man.

As long as we start honest, as we do, the greater percentage of us are likely to remain so.

Only those who are weak fall from their standards, and even they, when the race is over, heartily regret that they ever were anything but fair and clean and open-minded in their dealings with their fellows.

(Copyright by John Blake.)

And should a rabbit start to run
From here up to the moon,
He'd find the going pretty hard,
I'll bet you, mighty soon.

Be as you would seem to be.

POULTRY

ED AND CARE FOR PULLETS

t Common Mistake to Give Fowls Free Range and Compel Them to Hustle for Living.

Then should an April pullet begin ng? Generally the statement is e that Leghorn pullets should be when five to five and one-half ths old; Rhode Island Reds and ndotte pullets take a month long- and Plymouth Rocks still another nth.

n investigation made by Purdue versity developed the fact that y flocks are not doing as well as y could if the young pullets were perly fed and cared for. They are en crowded in the coops at night the little brood coop that is big ugh in the spring is crowded by fall and the chicks sweat.

The most common mistake is poor ding. The pullets are allowed free ge over the farm and compelled

Addition to Free Range Pullets Should Be Given Plenty of Mash.

gather most of their living. They y grow, but it is a slow growth. To rry this growth, plenty of mash ould be kept before them at all nes. A very simple mash for the der pullets can be made by taking pounds bran, 50 pounds shorts, and pounds of high-grade tankage. ls should be placed dry in a self- eder, or trough, and the pullets in- ced to eat all they will of it. Some ain should be fed in addition, that e pullets may be in good flesh when dy to start laying.

EEP YOUNG STOCK GROWING

ucculent Green Feed, Variety of Grain, Fresh Water and Shade Are of Importance.

So long as the young stock have lenty of succulent green food, a vari- y of grain, fresh water, shade and xercise, together with well-ventilated leeping quarters, they will grow like he proverbial weed, but if the growth stunted by the lack of any one of hese essentials, gain is slower even hen conditions become normal than t would have been. The poultry rower gets tired; surely the chickens ught to be all right for one night— ut that very night is the night the hickens take to pile up. Morning inds the half-grown stock gaunted; day or so shows them with the dirty ostrils that come when the catarrhal ischarge has filled with dust.

A cold from crowding soon becomes roupy cold unless prompt action heads it off, and one night's neglect ms cost dearly.

Keep them growing by giving more room through culling market stock as fast as it develops, and by providing shade.

MATURE CHICKENS ON RANGE

Good Summer Ration for Hens Is Mixture of Wheat, Oats and Corn, One Part Each.

Encourage mature chickens to range by feeding them sparingly. A good summer ration for hens consists of 1 part wheat, 1 part oats, and 1 part corn, by weight. More eggs are obtained where the birds are fed a little grain than when forced to depend upon "pickings" about the farm.

POULTRY NOTES

Cockerels to be kept for breeding purposes should be handled in a similar manner to pullets.

* * *

Young stock will do better if not compelled to pick their living with the old. There will also be less trouble from lice.

* * *

Misshapen eggs are always penalized by the market and bring an inferior price to smooth, even, perfectly shaped eggs.

* * *

Do not make the mistake of feeding too much in the early days of the fattening process. It should ever be kept in mind that the appetite must be preserved unimpaired.

* * *

Shade is one of the most important essentials during the hot months. Get the chicks into the orchard and corn field. It is not too late to plant sunflowers.

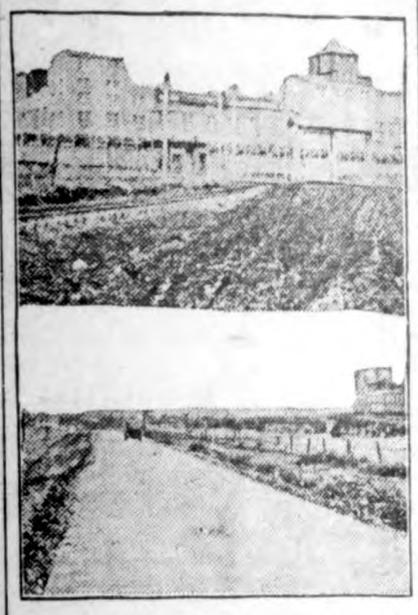
BETTER ROADS

MINIMUM WIDTH OF HIGHWAY

Hard-Surface Roads Should Be at Least Eighteen Feet Wide for Safety of All Concerned.

(Prepared by the United States Department of Agriculture.)

A minimum width of 18 feet for hard-surface roads is recommended by the bureau of public roads of the United States Department of Agriculture. The maximum width of truck body generally permitted is 8 feet, and 5½ feet is the ordinary clearance width of automobiles. At an average speed of 30 miles an hour it is unreasonable to expect the driver of an automobile to drive with the wheels closer than 1½ feet to the edge of the pavement, says the bureau. For trucks at an average speed of 15 miles an hour, this distance should not



Sheridan-Big Horn Road in Wyoming Before and After Improvement.

be less than 1¾ feet on account of the great width of the rear wheel. Three feet seems to be a minimum safe clearance between bodies. Inasmuch as a certain amount of truck traffic is to be expected on all main country roads, the minimum width of surface should be 18 feet to provide these clearances when an automobile meets a truck.

Where the frequency with which trucks pass each other becomes a big factor, as in the neighborhood of large cities, the minimum width of pavement should be 20 feet to provide a clearance of 3½ feet and a safe distance of wheels from edge of pavement.

ALLOW FOR FUTURE TRAFFIC

Count of Automobiles on Number of Roads in Tennessee Shows Surprising Fact.

(Prepared by the United States Department of Agriculture.)

In building a road liberal allowance should be made for future increase in traffic, says the bureau of public roads of the United States Department of Agriculture. A traffic count conducted by the bureau in co-operation with Tennessee officials on a number of roads in Davison county, in which Nashville is located, shows surprising facts when compared with a similar count in 1916. During this period automobile registrations have doubled, while the number of motor vehicles on the roads is five times as great as in 1916. In 1916 horse-drawn and motor-vehicle traffic were almost equal in volume. In 1921 horse-drawn traffic had increased only slightly in volume and constituted 16 per cent of the traffic, motor vehicles constituting 84 per cent.

Observations in this and other countries lead to the conclusion that volume of traffic may increase in much greater proportion than the number of motor vehicles and will also depend to a large degree on the condition of improvement of the road and on the economic conditions in the adjacent territory.

ROADS IN FEDERAL-AID PLAN

System Designed to Serve Whole Country and Will Be 180,000 Miles in Length.

The chief of the bureau of public roads of the United States Department of Agriculture will probably never personally inspect all of the system of federal-aid roads provided for by the federal highway act and for which initial appropriations have been made.

The system is being designed to serve the whole country and will be approximately 80,000 miles in length. Should he make an inspection, traveling at the rate of 30 miles an hour, 8 hours a day on all working days, and not go over any mile twice, it would require nearly two and one-half years to complete the job.

Benefits of Good Roads.

Fresh food is made available for the city children, better schools and wider social opportunities are provided for the country boys and girls, through improved highways and motor transportation.

Deflation of Prices.

Prices of dairy and poultry products suffered the least in the rapid deflation of prices of farm products which began in 1920 and continued through 1921, according to the United States Department of Agriculture.

MODERN STABLES HELP KEEP MILK

It Is of Utmost Importance to Have Them Clean and Free From Disagreeable Odors.

AVOID FILTHY PLANK FLOORS

Dairyman Must Be Constantly at War With Filth—Cows, Utensils and Barn Must Be Kept Unpolluted at All Times.

(By W. G. KAISER, Agricultural Engineer.)

From the very fact that milk is used as a human food it is essential to exercise the greatest care to keep it clean and wholesome. Milk is a product that absorbs disagreeable odors very quickly and if left stand in a stable where bad odors are presnt it will in a surprisingly short time be contaminated.

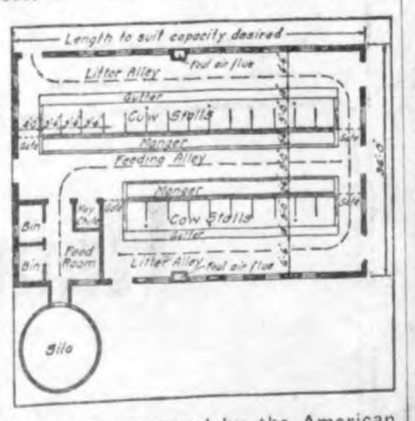
"The old filthy plank floored, poorly lighted, ill-ventilated barn is the harbinger of disease, especially tuberculosis," says W. B. Barney, state dairy and food commissioner of Iowa, in a report to the governor of that state. If all ordinances on floor construction were summed up in a single sentence they would read about as follows: "No building shall be used for stabling cows which is not provided with an easily cleaned, impervious floor." The dairyman must be constantly at war with filth. The cows must be kept clean, the utensils in which milk is kept must be kept clean and the barn must be clean. An easily cleaned impervious floor in the dairy barn is very necessary. Concrete is used in many sections of this country for dairy barn floors. Plank floors with cracks full of filth are being taken up and a permanent concrete floor put in their place. This work can be done at any season of the year when there is time to do the work. The floor can be laid in winter if the interior of the barn can be kept above freezing for four or five days until concrete has hardened.

Avoid Costly Mistakes.

A good plan is necessary so as to avoid costly mistakes. Once concrete has hardened it is difficult to remove. Most agricultural colleges have suggested dairy barn layouts which they furnish free to farmers. Many barn equipment manufacturers also furnish this information without charge.

The first step in the construction of a dairy barn floor is to clear out rubbish and bring the area to proper level. All holes should be filled and if there are any soft spots these should be tamped solid.

The manger curb is usually built first and it is very important to do this job right so that steel stanchions will fit. The curb should be 5 or 6 inches thick and project about 6 inches above top of floor level when finished. For the curb a 1:2:3 mixture is recommended. This means that each sack of cement will be mixed with 2 cubic feet of clean sand and 3 cubic feet



Floor plan prepared by the American Society of Agricultural Engineers after a study of several thousand plans. Whether the cows face in or out is largely a matter of personal preference. Here they face in.

of pebbles or crushed rock. Sand should all pass through a screen with quarter-inch mesh. Stone should be clean, rough and vary in size from one quarter inch up to 1½ inches. Concrete must be placed in form immediately after mixed and should be tamped or spaded to make sure that all holes are completely filled.

Plan for Stall Platform.

The stall platform is usually built next and it is very similar to building a sidewalk. A 1:2:3 concrete mixture is used. The full thickness of the floor is placed at one time. This is known as one-course construction and is generally more satisfactory than two-course work. A wood float should be used for finishing. It will produce a smooth surface yet leave it just gritty enough so that it will not get slippery. Do not use a steel trowel as it is likely to give a surface that will become slippery which is very objectionable in a dairy barn.

WAYS TO DESTROY INSECTS

Arsenate of Lead May Be Sprayed or Dusted to Kill Pests on Various Plants.

When dry arsenate of lead is used for chewing insects from four to six tablespoons of the arsenate may be put into one gallon of water. A small sprayer or watering pot may be used to apply it. All insects that bite and chew their food may be destroyed by arsenate of lead. Another way to use arsenate of lead is to mix it with air-slaked lime and dust on tender plants.

CHIEF REQUIREMENTS FOR STORING POTATO

Tubers Must Be Protected From Extreme Heat and Cold.

Satisfactory Temperature Is About 35 to 40 Degrees—Provide Ventilation to Remove Foul Air and Moisture.

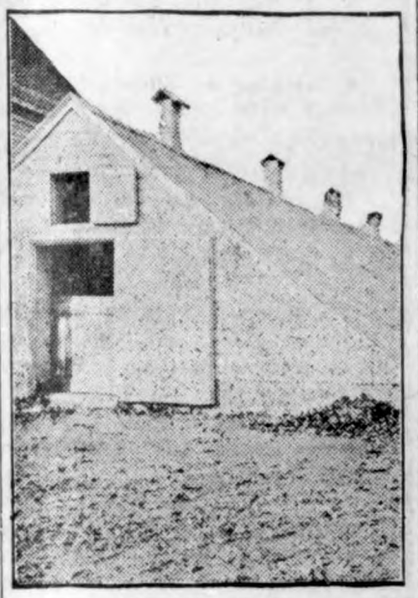
(Prepared by the United States Department of Agriculture.)

The requirements for the successful storage of potatoes are summed up by the United States Department of Agriculture as follows:

The tubers must be protected from extremes of cold and heat. A temperature ranging from 35 to 40 degrees F., is considered satisfactory.

Sufficient ventilation must be provided to remove foul air and excess moisture.

The storage house must be so constructed as to make it possible to ex-



Exterior View of Satisfactory Potato Storage House.

clude the light, as the table quality of potatoes quickly deteriorates if they are exposed to light.

The tubers should be dry and reasonably free from dirt when put into storage. An excess of moisture or of soil increases the amount of heat generated in a newly stored pile of potatoes. The soil tends to close up the spaces between the tubers, thus cutting off air circulation and helping to retain heat that would otherwise escape.

All diseased, badly cut, or bruised tubers should be removed before putting potatoes into storage.

It is not advisable to store potatoes in bulk at a greater depth than 5 or 6 feet, and the floor dimensions of the bin should not be greater than 12 by 12 feet unless provided with a series of ventilating shafts for the escape of moisture and heat. Ventilated division walls and floors are also desirable.

THRASH GRAIN UNDER COVER

Small Tractor and Outfit Make It Possible to Store Bundles and Thrash in Winter.

One of the interesting ideas that is developing along with the growth of the small tractor and the small threshing outfit, is the storing of bundled grain in the barn and threshing it out at leisure in the fall or winter. Several farmers in Illinois have found this a good plan.

The small threshing outfit can be left set up, and any day when there is a little time it can be started and some of the grain worked through. The straw goes back into the barn or a nearby shed for use with the live stock. There is no rush, and no extra help is needed. It helps to ease up on the work during the rush season, and keep everybody busy during slack times. This is one way the big barn helps pay a profit.

STORE BEET PULP FOR FEED

Best Way Is to Spread It Over Beet Top Silo—It Effectually Seals Silage Masa

The best way for the beet grower to store pulp for winter feeding is to spread it over the beet top silo. It effectually seals the silage mass and the heat from the silage warms the pulp and thus hastens the curing process; it also reduces the annoyance of handling frozen pulp.

SUMMER FEEDING FOR EGGS

Plan Differs but Little From Winter Rations Except in Regard to Amount of Grain.

Summer feeding for egg production differs but very little from winter feeding except in regard to the amount of grain fed. A good grain ration for egg production is corn and oats equal measure, feeding but little if any in the morning, and all the hens will eat at night.

BEST HEN-FEEDING PRACTICE

Fowls on Many Farms Are Compelled to Shift for Themselves and Then Stop Laying.

The best practice is to always feed the hen the proper amount of feed. This practice is not always done on the general farm. There is a tendency to let the hens shift for themselves, and as a result the hens cease to lay and molt earlier than they should.

FARM STOCK

PRODUCTION OF SPRING PIGS

Average Cost of 100 Pounds of Marketable Pork Placed at $6.08 by Department.

(Prepared by the United States Department of Agriculture.)

The average cost of producing 100 pounds of marketable pork in sections of Iowa and Illinois in 1921, was $6.08, according to a cost of production study made by the United States Department of Agriculture on 3,574 spring pigs producing 855,140 pounds of marketable pork.

This pork was produced when corn was relatively cheap last year. The survey shows that 65 per cent of the hogs returned between 25 cents and 75 cents per bushel of corn fed. Costs ranged from $3.76, in one drove, to $10.80, in the drove showing the highest cost, 85 per cent of the pork showing a cost of $7 or less per 100 pounds. An average profit of $1.28 per 100 pounds of marketable pork is shown, or an average profit of $3.05 for each pig weaned.

The size of the litters, the relative economies made in the use of feed and labor, and the quantity of pork produced per sow were the three principal cost factors. The entire herd was used as a basis for cost finding, all the expenses of the sow being divided among the pigs in her litter. The principal causes of high costs were the small litters weaned, heavy feed and labor expense, and slightly lower gain per head. Tankage formed an important part of the rations of the economical pork.

The average cost of the total quantity of pork produced, or 882,758 pounds, which included 27,612 pounds lost later through deaths, was $5.88, with a range of $3.76 on the farm making the cheapest pork, to $10.48 on the farm showing highest costs. Thirty-nine of the 51 farms upon which cost figures were kept showed costs between $4 and $7.

The farm averaging the smallest litters, or two pigs to the sow, made 473 pounds of pork per litter in 200 days. The farm making the highest record made 1,759 pounds of pork per litter in 200 days from an average of 7.27 pigs weaned per sow. Two farms producing an average of eight pigs per sow produced 1,616 pounds

Pasture Crops Compel Hogs and Growing Pigs to Take Necessary Exercise.

and 1,435 pounds per sow respectively.

The average cost of producing a weaned pig, ten weeks of age, was $4.50. Figures were kept on 796 spring litters. The cost of producing a weaned pig varied from $2.73 in the breeding herd having the lowest cost per pig to $10.16 per weaned pig in the drove having the highest cost. These costs included all feed and other expenses upon the mothers from the time of sorting the sows in the fall to be bred to the date of weaning; also the feed and other costs on the boar while on the farm.

While no attempt was made to find the cost of pigs at farrowing time, the report shows the influence that the selection of sows and condition of the farrowing pen have upon the size of litters, and the number of pigs brought through alive, the department states.

MARKETING EARLY LAMB CROP

Hot Weather Slows Down Gains Decidedly and It Doesn't Pay to Keep Them Back.

Experience has proven that it pays to market the lamb crop when it is ready rather than delay with the hope that additional weight may be had. As a matter of fact, hot weather slows down the gain very decidedly, and it doesn't pay to keep the lambs on after they are ready to go. Well-grown early lambs that weigh sixty to seventy pounds will soon be ready. Let them go then as soon as possible.

Exercise for Sows.

Exercise is necessary for brood sows. They should not be allowed to lie around all day, but given some grain at a distance from their sleeping quarters which will compel them to walk and thus keep fit.

Renew Interest in Sheep.

Many farmers are now becoming interested in the rearing and feeding of sheep who never before took much interest in them. Most of them have a lot of highly interesting things to learn about sheep.

THE DAIRY

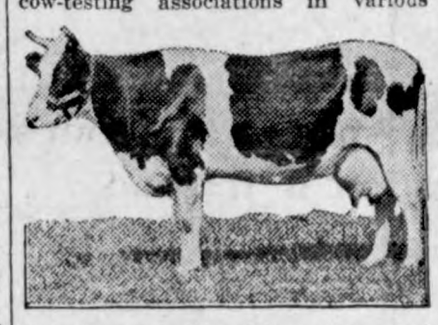
LARGE PRODUCERS EAT MUCH

One of the Important Points Brought Out in Department Bulletin by J. C. McDowell.

(Prepared by the United States Department of Agriculture.)

Cows that produce milk and butterfat in large quantities have keen appetites and roomy paunches, but they bring in higher incomes over feed cost than the scanty producers, regardless of breed, age, weight, date of freshening, and geographical location. This is one of the important points brought out in Department Bulletin 1069, Relation of Production to Income from Dairy Cows, by J. C. McDowell, just published by the United States Department of Agriculture.

The facts in the bulletin are based on a study of data supplied by 90 cow-testing associations in various



This Cow Ate More Than 11 Tons of Grain, Hay, Silage and Beet Pulp in a Year—She Made in That Time More Than a Half Ton of Butter and More Than 10 Tons of Milk.

parts of the country. Because of better feeding, better breeding, and better care, cows owned by association members are much better than the general run of cows. The estimated production per head of all the dairy cows in the United States is approximately 4,000 pounds of milk and 160 pounds of butterfat a year. The association cows are about 50 per cent better, producing an average of 6,077 pounds of milk and 248 pounds of butterfat.

According to figures based on 18,014 yearly individual cow records, as butterfat production increased from 100 to 400 pounds there was a regular increase of about $16 in income over feed cost per cow for every 50 pounds of increase in average production of butterfat. As the yield of butterfat increased from 109 pounds to 396 pounds, the returns above the dollar expended for feed increased from 35 cents to $1.52.

The cows having an average milk production of 3,250 pounds showed an average income of $32.25 over the cost of feed, while those producing 13,250 pounds showed an average income of $218.19 over feed cost. The cows in the latter group produced about four times as much as those in the other group, and their average income over cost of feed was nearly seven times as great. The increase in income above feed cost grew regularly with the increase in production.

A study of these records shows that it pays best to put feed into big producers, even though they are big eaters, says the department.

A copy of the bulletin may be obtained upon application to the Department of Agriculture, Washington, D. C.

KEEP COLTS IN ROOMY STALL

Young Animals Should Not Be Permitted to Run With Mares Which Are Working in Field.

If mares are being used for farm work, do not let colts run with them in the field. Keep the colts penned in a roomy, clean, cool, ventilated box stall in the barn. If the stall is screened to keep out flies, so much the better. Let the colts nurse morning, noon and night, and run with their mothers in the horse paddock at night.

CARE FOR FARM WOODLANDS

Keep Stock Out as They Injure Young Seedlings and Trees—Forest Supplies Timber.

Take care of the farm woodlands advises the forest service of the United States Department of Agriculture. Keep the stock out—they injure the young seedlings and trees. Woodland and pasture land are most profitable when managed separately. The home forest, if well cared for, will supply all the timber which the farm needs for buildings, fences and fuel.

Animal Food Required.

Animal food is required for the best growth in chicks, as well as for large egg yields. Where bugs and worms are scarce, it is well to feed meat scrap, fish scrap, or any form of milk products.

Bad Time to Buy Cows.

Usually it is a bad time to buy milk cows any time during the middle of the summer unless they are dry and due to freshen some time during the fall or early winter.

Realizing Value of Silo.

Dairy farmers are realizing more and more the place of the silo in the successful feeding of dairy cows.

Plan to Build Silo.

Plan to build the silo and remodel dairy barn or build new one

Economy

Keeps Some Men Hard Up

You've heard of men so extravagant they never have a dollar.

Well there are also some so economical they never have a nickel.

R. A. Jorgenson and family spent Sunday visiting Garner folks.

Everything in Shoes—Nuff said. SMITH THE SHOE MAN, Garner, Iowa.

Mr. and Mrs. Ludwig, of Nevada. were over Sunday visitors at the E. S. D. Kahrs home.

Mrs. Edwin Nickols, of Clear Lake, was visiting with Mrs. Edwin Jacobs a few days the past week.

ODORGONE, a guaranteed remedy for sweaty feet. SMITH, The SHOE MAN, Garner, Iowa. ad

Mr. Grover Daily came Friday for and over Sunday visit at the Aug. Lau home.

Peter Merkel's returned Monday from their visit at Blue Earth. Minnesota.

Mr. Figi and family, of Renwick, visited at the F. J. Wenck home last Sunday.

The A. G. Koerner family enjoyed an outing at their cottage at the Lake Sunday.

Arthur Wellemeyer and family drove over to Charles City Sunday for a visit wi thhis mother.

SMITH, The Shoe Man.—Dependable Shoes. Garner, Iowa. ad

Fresh Bread every day at Kluck's.

A good rain fell northeast of here Sunday afternoon, but this locality is still on the "dry" list.

Miss Effie Steward, of Leland, Ia., was a visitor at the home of Anna Gibbs Sunday.

Glenna Gruetzmacher, Dorothy and Homer Ridder, were Mason City visitors Monday.

Quite a number of Klemme folks attended the fair at Mason City the past few days. It began Sunday.

Mrs. Henry Lewis enjoyed a visit from her uncle of Ackley, who was here Sunday.

Andrew Wellemeyer drove to the city of Clarion on business Monday morning.

Wm. Lau, and family, of Garner, were visiting with Klemme relatives Sunday.

Henry Church and family, of Garner, were visiting with Klemme friends Sunday.

Miss Klaus, of Charles City, came Monday for a visit at the Athur Wellemeyer home. She returned to Charles City yesterday.

Leonard Sampson and family left this morning in their car for Dubuque and other points east for a visit with relatives and friends.

Mrs. Dewey Rice, and daughter, Harriet, of Clarion, came Saturday for a week's visit at the home of her parents, Mr. and Mrs. Fred Musefelt.

Mrs. Hitt, and daughter, of Clinton, Illinois, came Monday morning for a visit at the William Bell home. M rs.Hitt is a sister of Mrs. Bell.

Mr. and Mrs. Herb Bailey and daughter returned from Lake Okoboji Monday night. They had been there attending the Methodist Camp Meeting.

R. W. Elder, Clarence and Reva, and Mr. and Mrs. Marion Elder were at Hampton Sunday for a visit with Mrs. Elder. She is getting along well they report.

POTATOES FOR SALE—Put in your order now for Irish Cobblers, and Early Ohio Potatoes, for eating or seed. Will dig soon. Elmer Ludeke, Klemme, Iowa. adv-tf

Mr. and Mrs. Ben Coobs left yesterday morning in their car for McGregor for a week's visit with Ben's parents, and other relatives and friends.

Mr. and Mrs. Leroy McDaniel and son, Cecil, and Mr. and Mrs. Raymond Greene and two children, arrived here last Wednesday afternoon for a visit at the Henry Ludeke home near Klemme. They returned home to Bascobel, Wisconsin, on Saturday. They made the trip in Mr. McDaniels Maxwell car.

The rain last Friday morning did not prevent Al White and family from starting on their tour to the west. They will spend six weeks in Colorado and other western states. They are making the trip in their "Universal" car.

Prof. Neese, of Ventura, moved a few of his houeosl dhgoods to this city Monday. He will live in the Tom Blank residence, which was for a time occupied by Sam Harvey and family. Prof. Neese will teach in the Klemme schools this year.

Quite a number of people of this vicinity drove to West Bend, Iowa, last Sunday to view the Grotto. It is a structure well worth driving a great many miles to see. It is said to be the most wonderful Grotto in the United States and the third best in the world. West Bend is only a few miles southwest of Algona.

WHY NOT JAIL THEM

No railroad company would ever dream of employing an engineer who had been found drunk at the throttle. He would be discharged instantly and would find difficulty in finding employment on that or any other road.

Our courts and civil authorities, however show less business acumen than do our corporations.

A drunken man at the wheel of an automobile can terrorize pedistrians and other motorists and kill and maim and get off with a nomial fine or no punishment at all, depending upon the shrewdness of his lawyer or political or financial drag.

Such a condition of affairs is totally without reason or justice.

A man found at the wheel of a car while intoxicated should be deprived of his right to drive for all future time. If he kills or maims while in that condition he should go to the penitentiary, regardless of who or what he is.

Until we have drastic laws covering such cases, and those laws are relentlessly enforced, our highways will continue to be a menace instead of a public benefit.

—Winnebago Republican.

School will start soon—bad news for the kids. We remind them of it now so the shock won't be so hard for them.

Mr. C. L. Smith, of Belmond, was a Klemme caller yesterday.

Mr. Bert Fritz, and son Claude. of Des Moines, were here yesterday for a visit at the Mille Smith home.

Miss Lena Bergmann came from Morningside College, at Sioux City, Friday evening and will enjoy a vacation visiting with her parents, Rev. and Mrs. W. C. Bergmann. She has been attending usmmer school at Morningie Cdollege.

Shirts

I am showing and selling the best line of Dress Shirts ever bought in Garner. You can have anything you desire, both collars detached, and collars attached. Now is the time to buy. All are popularly priced—

$1.50 to $4.50

e Spend Part Of Our Vacation On Trip To Illinois

HANOVER; OR DUMP-OVER

e Trip Through The Hills Gets Our Billy Goat

Last Friday morning Ye Editor family left in the Sheeny Show for Hanover, Illinois.

The object of the trip was to make selves conspicuous at a family nion of the Nesbit Tribe, rela- of Mrs. Jorgenson.

Concerning more of the trip which be of some interest to our read- we will state that we left Garn- at 4:30 a. m. and hit the North Pike east over the paving to rles City and then south to the of Waverly, Olwein, Strawberry nt, and then we discovered we near Edgewood, the home of and Mrs. A. H. Meyer and we red it could be made at noon. stopped with them two hours and our dinner there. Rev. and his are both well now and enjoy at Edgewood. They have a tiful new kragstone bungalow, tly modern in every way. The ch is also a new building finish- n kragstone, and all modern. ey wanted us to greet all their friends here and said they ex- ed to spend their vacation in vicinity and will be here in a- three weeks.

ur next destination was Dubuque e we encountered the first real at least we thought the hills were the real thing alright but oon found that the "hills" were to come and the hills of Dubuque only small bumps compared to we later went through. After ng East Dubuque we inquired oad to Galena, Ill., and found there were two roads; one a road and the other they called "low" road which was much er so we decided to take a long e on it as they said that way only 16 miles and the other was t 30 to Galena. Well, we got it a couple of miles from East que—it was rougher than a tin board in a cyclone, quick turns would break a snake's back, as a quarry, hilly as h——l! road was so narrow that if we met a bicycle we would hae had ve it elevated over our car in to pass by. In places the road so close to the brink that if we skidded a foot we would have d down where the cows were grass in the valley a thousand straight down.

last we thought we were out e mess as we again had come main road—actually it was a d road (according to the nativ- We thought it was a cement walk out in the country but we d car tracks on it so took a e of being pinched in case it only a side walk. That "paved was about seven feet wide but welcome at that. Only thing ted only about two miles and ame into Galena. That town so old that we thing Christoph- lumbus' grandfather must have it. Funny old buildings, narrow s, and all old looking. We a guy how to get to Hanover he reply he gave was like this: o the end of the street; you will railroad bridge, but don't cross t cross over the wet bridge and cross the dry bridge and keep until you come to where the forks. If you take one fork it take you to Hanoer; but if you e other way it does. Now you ell if you are on the wrong road se you come to a school house, you turn around and drive back go up the other fork. It will you to Hanover." Well those ions were about as clear as soft in the dark. We later learned the "wet" bridge meant the one a creek flowed under and the bridge simply spanned a little e. Somehow or other we got d toward Hanover (but on the road) and after many miles opped a farm house at the foot igh hill to get some water. We permission of the lady and she up Ye Ed. and told us we could a drink but be careful that we break the windmill She even on to the wind mill while we ed, but we didn't have the least notion to carry it away with us. She told us we were headed alright for Hanover but it was only a wagon road and cars were'nt supposed to go that way as the hills were too steep but said if we could get over the hill ahead of us we would make the rest of the journey alright. We started up the hill but couldn't make a run for it as it started on a sharp curve. That hill was so steep it even appeared to lean back toward us but we hit up the trail and had to put her in low quick and step on the gas for all there was and then we darn near stopped crawling before we came to the first "resting" place. You will appreciate how steep that hill is whehn we tell you that about every hundred feet on the hill they have trenches dug across the road and the dirt piled back so you can drop into one of those "rests" to give the engine another start. If those trenches were not dug in across the path to hold the car from going backwards down the hill a car would never get to the top. And the road was very stony and rough besides and nearly straight up for perhaps a half mile. We later learned that the natives called this young mountain "Rocky Hill." We beleive the vicinity of Hanover is the place that hills were invented.

We rolled into the town at 6:45 p. m. and just in time to get in on a picnic supper. After that it was big feeds and picnics all the time—fun for the whole tribe. There were about eighty of the relatives that had arrived by Tuesday morning when we had to start home again. We intended to return Monday but it rained there all Sunday night and Monday.

The town of Hanover is an old town but rather quaint and pretty. The people all live in great roomy houses, most of them have window shutters and all have fire places. There are very few wells there as the people drink filtered cistern water, or spring water. There is no railroad in the town as the railroads pass several miles away from it, but they have their own railroad to connect with the big roads. Their railroad consists of about three miles of old track, a sort of tractor on railroad wheels and pulling an old buss mounted on car wheels. The "Hanover and Northern" connects with the railroad up the line and hauls back passengers and freight and does a big business.

We had the pleasure (?) of seeing a rattlesnake one day in driving up a steep hill. The snake was as big around as a man's wrist and was just coming out of some brush perhaps to sun himself on the rocks in the hillside. We stopped the car up the hill as soon as we could find a place to pull out of the road and in company with another man (from Colorado) walked back down the hill with a couple of big rocks in our hands but we couldn't find the rattler. We threw stones in the brush in the hopes of locating him and thought perhaps he would "rattle" the warning note. "Colorado Joe" said it was the biggest rattler he had ever seen. On our way home to this town of Klemme we saw a small rattler about two feet long in the road that someone had killed. The old rough hills there are full of the dreaded reptiles.

Pehaps some of our readers know what jiggers are like and how they act. Well Ye Editor is still scratching where those blooming jiggers got under our hide. They are very affectionate little critters—they are certainly close friends and will stick to you until they die—which is a couple of weeks. We got acquainted with jiggers when prowling around an old cemetery one day with some more of the Tribe. Result was that there is still a lot of scratching at Hanover and also some at Klemme at this time.

Although Hanover is a town that is smaller than Klemme, they have quite a woolen mill factory there. We were lucky enough to secure a permit to go through the mill. The weekly pay roll amounts to about $7,000. They make very fine cloth there of pure wool.

Returning home to Klemme we drove up into Wisconsin in order to avoid the hills and found fine roads.

We left Hanover at 9:00 a. m. and arrived in Klemme at 11:00 p. m. We struck quite a lot of mud on our way home which made slow traveling part of the way, but as a general rule we had good roads coming and going in Iowa. No puncture and no trouble at all on the trip.

IOWA NEWS

..The 12,000 bushels elevator of the Farmers' Grain Elevator company at Athelstan is full of grain and no grain cars are obtainable.

Authorities of Glenwood are considerably aroused over what appears to be an attempt to kill all the fish in Glenwood Lake by poison.

T. F. Dunlevy of Waukon, tells of a potato weighing two pounds that he, his wife and daughter, made a meal of and had some left over.

(Aug-17-24-31) Executor.

CELEBRATE SILVER WEDDING ANNIVERSARY

Last Sunday marked the twenty-fifth mile stone of the marriage of Mr. and Mrs. J. W. (Bill) Johnson. The day was observed bp a big celebration and dinner in which some forty relatives and friends from all over took part.

The day was enjoyed with general visiting and talking over of old times and experiences and a general reunion.

Those who attended were: E. M. Johnons, wife and son Luell, E. C. Johnson, wife and baby Jean, of Blue Island, Illinois; Geo. W. Johnson, wife and three children, Margaret, Harold and Charles of Albany, Ohio; Tom Larson, wife and baby Mildred of Ellendale, Minn.; Mrs. Magdaline Larson, of Owattona, Minn.; A. E. Dutheridge, wife and daughter Jane and Mildred Amey; Joseph and Fredda Schuldt; A. C. Carpenter and wife and Richard and Alfred; Dr. and Mrs. W. F. Missman and son; Thora Carpenter; Amas Hanson;, of Klemme; the following from Goodell: Albert Schlichting, Alma Ruka, Thelma Carpenter, Harry Carpenter, Selma Sandberg, Lloyd Carpenter. Mr. and Mrs. Randalls and two children of Ellendale, Minn.; Rev. A. B. Gedye and family of Klemme; Sylvan Johnson and family; Effie and Clarice Johnson.

Mr. and Mrs. Leo Swanson and showered with many beautiful gifts to remember the occasion.

EAGLE GROE STRIKERS

Four Eagle Grove men, said to be stirkers, are in jail at Fort Dodge, charged with an attempt to burn a strikers' home in that city on Monday night. They first went to his home to induce him to leave under some pretense or other and upon his refusal left. Later they returned with a can of kerosene and attempted to burn his home. The owner discharged a shot gun in the air and soon after deputy marshals arrived and captured all four men. It is hard to believe such a serious offense could be commited by Wright county citizens, but our sourse of information is thoroughly reliable — Kanawha Reporter.

When a man has more luck than sense." he gives all the credit to the sense.

What the Merchant Marine Bill Means

By MALCOLM STEWART
Chairman, Middle West Merchant Marine Committee

WHAT does the merchant marine legislation pending in Congress mean? How much will it cost? What will be the direct return? The indirect return? How will it safeguard the nation? How will it help our foreign trade? Our domestic business?

President Harding says passage of the bill will put the American flag back on the seas. Chairman Lasker of the Shipping Board says it will do that and provide a market for government owned ships, now unsaleable. Senator Ransdell of Louisiana, president of the National Merchant Marine Association, says the bill will do all the President says it will do, all Chairman Lasker hopes for, and in addition will provide world markets for our excess agricultural products, an outlet for manufactures and help our shippers.

The first thing asked about legislation, shipping or otherwise, is "How much will it cost?"

Shipping Board experts calculate the indirect aids to shipping in the bill will not exceed $6,000,000 and the direct aid $15,000,000, the first year. The maximum will not exceed $30,000,000 in any one year, the experts say. Indirect aids include sale of Shipping Board vessels to American operators on easy terms; that half the incoming immigrants come in American ships; that government officials and goods be carried in American ships. Those indirect aids take nothing from the Treasury.

The indirect aid most interesting to the public permits the shipper to deduct from his income tax five per cent. of the freight on goods shipped in American vessels. This applies to imports and exports, so the benefit would be distributed throughout the nation in lower prices.

The direct aid estimated to cost $15,000,000 the first year, and after five years perhaps $30,000,000, is payments to owners of ships of over 1,500 tons in foreign trade to partly overcome higher operating costs of our ships. Payments are scaled according to speed and based on tonnage and miles travelled.

The direct return of the legislation would be the retention in this country of hundreds of millions now paid foreign carriers of our goods; the making of a live asset, instead of a dead liability, of the Shipping Board fleet, now unmarketable. The last item is estimated at $150,000,000, not counting $4,000,000 a month it costs to run Shipping Board vessels now.

The indirect return of the shipping bill is beyond calculation. Not even the best informed shipping expert, nor the most enthusiastic advocate of the bill, is able to figure this. Probably the most important indirect return will come in the revival of shipbuilding. For America to have the correctly balanced fleet vital in world trade, hundreds of the finest, fastest ships will have to be built, employing thousands of skilled workers in the many trades incidental to shipbuilding.

The most general indirect return would be expanded foreign commerce. That directly concerns the farmer of the Middle West with surplus crops to sell and the manufacturer with excess production. In 1921, with ships in ample supply, farm and forest exports were worth $2,250,000,000; in 1919, $4,250,000,000. In the five years before the war, when American ships handled less than ten per cent. of our foreign trade, those exports averaged little more than one billion dollars.

The nation's safety is linked directly with the shipping bill. Naval power—that is, fighting ships—has been fixed at the 5-5-3 ratio. But naval power is not sea power. Great Britain's sea power ratio, based on ships suitable for navy auxiliaries, is five to one for the United States. The shipping bill corrects this by fostering the very type of vessel needed to back up our restricted Navy—the ship making 18 knots or better, of which Britain now has 44, and we only seven.

Every American citizen has a direct interest in the bill.

Big Hancock County Fair Begins At Britt Next Week

THE IOWA STATE FAIR

DES MOINES—The next ten days will be summer holiday time for every community in Iowa.

Over 400,000 people of the state representing every age and every calling are expected to close up shop during the coming week for the annual outing at the Iowa State Fair. In fact, the first of these thousands of holiday crowds have already started arrive at the big state fair grounds here. Tents are already going up among the trees of the great 80 acre tent city. Incoming train and trucks are bearing hundreds upon hundreds of etxhibits of every type and description.

Ths first of the 500 carloads of live stock, form produce and equipment displays to be seen this year have already bee unloaded at the fair grounds.

Unusual provisions have been made by the fair board for the comfot rand enjoyment of fair visitors. Automobile parking spacee, housing accomodations, information bureaus and comfort stations have been established in all parts of the fair grounds and the adjacent city. Over 500 men and women are at work now making final preparations to recciee the incoming thousands.

The fair program proper opens Friday, August 25, continuing throu Friday, September, 1. Auto races, horse races, hipodrome airplane thrillers, train wreck, eight bands, society horse shows, horseshoe tournaments and like features headline the big amusement program.

NOT TOO LATE FOR GARDEN

Radishes, Lettuce and Endives Can Still Be Grown

If the farm garden is to continue producing until late in the fall, the late crops must be planted very soon says C. V. Holsinger, extension specialist in small fruits at Iowa State College. Three late crops are recommended by Mr. Holsinger, radishes, lettuce and endives.

If the latter two are to produce before frost. they must be pklanted at once, according to Mr. Holsinger, Radishes, which require only about four to five weeks to produce, can be planted as late as Aug. 15 to 25.

Mr.Holsinger suggests that the best results can be secured with the flat leaf endive rather than the curled leaf. The seed should be planted rather thick and later thinned so that the plants are from a foot to 15 inches apart in rows.

A practical way to bleach the endives is to gather the leaves together into a loose bundle and tie them up with a string. The result is a plant very much like head lettuce with white crisp leaves, which make an excellent salad material.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning Worship.....10 A. M.
Sunday School.....11 A. M.
Evening Worship.....8 P. M.

Arthur B. Gedye, Pastor.

Meeting for fellowship and prayer Thursday evenings at 7:45 P. M.

Official Board meeting held Friday evening was fairly well attended. Business was conducted with a fine spirit. Satisfactory closing of the years accounts in view.

The W. F. M. S. met at the home of Mrs. J. N. Day this Thursday afternoon.

It is hoped that the officers of the various church associations who elect their officers before the annual conference will take steps to do so as is the custom.

The Sunday School attendence was fine last Sunday. If some of our families who are unavoidably away could have been present it would have been a large attendence.

We are missing some faces every Sunday for quite a few Sundays.

"Be not weary of well doing".

"Put on the armour of God. Arm yourself with the Sword of the Spirit."

We shall be glad to welcome you to the service for fellowship and prayer on Thursday at 7:45. Come and be ready to take some part.

The Hancock county fair will open next Tuesday, and plans and preparations have been made for the biggest event of the season, and for one of the best fairs ever held in this county. The Board of Directors have taken an active part in the management of the fair this year, and have co-operated in making plnas securing entertainment.

There will be one of the largest exhibits of livestock and agricultural products ever seen at this fair. All of the stalls have reserved, and space has been arranged outside the barns. It has been neccessary to turn away several herds on account of not being able to house them.

It has been the aim of the directors this year to run the fair as cheap as possible, yet not sparing any expense in hiring good, clean entertainment.

While the race program has been cut down somewhat from previous years, there is no doubt but what there will be some very good races as a number of entries have already been made.

Pactically all the consession space has been sold, and saree has been taken to sell only to good, clean concesions. There will be plenty of amusements on midway for everyone, merry-go-round, feris wheel, and shows of all kinds.

The hoseshoe pitching contest for the county championship is creating considerable interest, and promises o be some close contest. Trap shooting, which created so much interest here a number of years ago, has again been revived and a contest well worth watching will be staged in this line. Good cash prises, as well as trophies, will be given in both horse shoe pitching and trap shooting.

Base ball has been arranged for each day between Kanawha and Wesley on Wednesday, and Garner and Woden on Thursday. The winning teams of the previous days will play on Friday. These are all good teams and have been playing good games his season.

Plenty of music has been arranged for and good band concerts will be held each day. Hayfield, Crystal Lake, and Britt bands will furnish this music, and give two concerts daily.

Four large acts of freee attraction have been secured. They are good, clean acts, and come highly recommended. coming from the State Fair circuits.

The night program will be held as usual. Moving pictures have been secured to follow the free acts, and we are attempting to contract with a Musical Company from Chicago to furnish further entertainment before the Grandstand in the evening.

The fair must have the support of everyone in the county to make it a success. It is well worth while undertaking, and is educational, as well as a place where plenty of good entertainments and amusements can be had. The directors and officers of the fair have done everything they possibly can to make the fair a success, and from the interest that is being shown all over the county, it would appear that the people are going to show their appreciation of this by their support. It is very evident from all reports that more interest is being shown this year in every department of the fair than ever before.

AGAINST THE MOTOR TRUCK

The commercial club at Boone is out with printed matter, making an appeal to the merchants of that town to refuse to send freight to neighboring towns over motor truck lines that are handling freight. Attention the damage done the roads by heavy is called to the high taxes imposed in keeping up highways because of the damage done the oads by heavy freight motor trucks, and it is also cited that the railroads leave large sums of money to that city and pay heavy taxes and therefore ought to receive the carrying business of the city. Motor busses and motor trucks are playing havoc with the business of the branch railroads in Iowa. The state railray commission looks upon the movement as a real hardship because most of the "plug" lines are operated at a loss, but communities are insistent that train service be not impared.

—Tintoka Topic.

PRESIDENT PUTS CURRENT ISSUES BEFORE SOLONS

Asserts Determination to Keep Transportation Moving.

ASKS NATIONAL COAL AGENCY

Upholds Right of Men to Work and Asserts Purpose to Use Every Power of Government to Have Laws Upheld.

Washington, Aug. 19.—President Harding announced to congress and the country that his administration, having exhausted every means for a settlement of the rail and coal strikes, now was resolved "to use all the power of the government to maintain transportation and sustain the right of men to work."

Absent Members Called.

Telegrams to absent members of the house interstate commerce committee to return at once to Washington to begin work on bills recommended by the President for creation of a coal agency and a fact-finding commission for the coal industry, were sent out by Representative Mondell, the Republican leader, after the President's address. Leaders plan to have these measures taken up early next week and made ready for speedy passage.

Accounting for his course during the recent trouble in an address to the senate and house, the President said he did not propose to ask for any "hasty action" by congress in the railroad strike, but that authority should be given to set up a commission to make a sweeping investigation into the coal industry "to reveal every phase of coal production, sale and distribution."

As another measure in the coal situation the President asked for the creation of a temporary national coal agency to purchase, sell and distribute coal in interstate shipment as an "instrumentality of guarding the public interest where private conscience is insensible to a public need."

Condemns Herrin Crime.

Groups who take the law into their own hands, the President said, and attempt to control for their own purposes the resources of the whole people can only be regarded as perils to public safety. He said neither employers nor employees could entirely escape responsibility for the present industrial situation, but he condemned in particular the "shocking crime at Herrin, Ill."

The President said the government was helpless to intervene, but, on the allegation that two aliens were among the killed, and in view of the absence of all provision in federal law under which the federal government can protect aliens in their treaty rights, he now asks congress to pass a law under which the government can take hold in cases such as that of Herrin.

Country at Union's Mercy.

The President likewise committed himself to the assertion that the United Mine Workers' organization now has the whole country "at its mercy."

With special reference to the Herrin massacre, the President said:

"My renewal of this oft-made recommendation is impelled by a pitiable sense of federal impotence to deal with the shocking crime at Herrin, Ill., which so recently shamed and horrified the country. In that butchery of human beings, wrought in madness, it is alleged that two aliens were murdered. This act adds to the outraged sense of American justice the humiliation which lies in the federal government's confessed lack of authority to punish that unutterable crime.

"Had it happened in any other land than our own, and the wrath of righteous justice were not effectively expressed, we should have pitied the civilization that would tolerate it and sorrow for the government unwilling or unable to mete out just punishment.

"It is deplorable that there are or can be American communities where even there are citizens, not to speak of public officials, who believe mob warfare is admissible to cure any situation."

In summing up the situation, the President said:

"It is manifestly my duty to bring to your attention the industrial situation which confronts the country. The situation growing out of the prevailing railway and coal mining strikes is so serious, so menacing to the nation's welfare, that I should be remiss if I failed frankly to lay the matter before you, and at the same time acquaint you and the whole people, with such efforts as the executive branch of the government has made by the voluntary exercise of its good offices to effect a settlement.

"It is not my thought to ask congress to deal with these fundamental problems at this time. No hasty action would contribute to the solution of the present critical situation. There is existing law by which to settle the prevailing disputes. There are statutes forbidding conspiracy to hinder interstate commerce. There are laws to assure the highest possible safety in railway service. It is my purpose to invoke these laws, civil and criminal, against all offenders alike."

Though he pronounced as inadequate the law creating the railway labor board, Mr. Harding said "no perfection of it by congress at this moment could be helpful in the present threatened paralysis of transportation."

Reasons for Legislative Action.

"The almost total exhaustion of stocks of coal, the crippled condition of the railways, the distressed situation that has arisen, and might grow worse, in our great cities, due to the shortage of anthracite; the suffering which might arise in the Northwest through failure to meet winter needs by lake transportation—all these, added to the possibility of outrageous price demands, in spite of the most zealous voluntary efforts of the government to restrain them, make it necessary to ask you to consider at once some form of temporary control of distribution and prices.

"If it may have your approval, I recommend immediate provision for a temporary national coal agency with needed capital, to purchase, sell and distribute coal which is carried in interstate shipment. I do not mean that all interstate coal shall be handled by such a federal organization; perhaps none will be necessary; but it will restore its capital to the public treasury and will be the instrumentality of guarding the public interest where private conscience is insensible to a public need."

Announcing his decision to invoke all pertinent laws in the interest of industrial restoration, the President used carefully chosen language to apply his strictures to both employers and employees.

"Surely," he said, "the threatening conditions must impress the congress and the country that no body of men, whether limited in numbers and responsible for railway management or powerful in numbers and the necessary forces in railroad operation, shall be permitted to choose a course which so imperils public welfare. Neither organizations of employers nor workingmen's unions may escape responsibility. When related to a public service, the mere fact of organization magnifies that responsibility and public interest transcends that of either grouped capital or organized labor."

Refers to War on Unions.

At the same time, however, Mr. Harding said he had "come to appraise another element" in the present industrial situation which he held in some degree responsible for strikes.

"I refer," he said, "to the warfare on the unions of labor. The government has no sympathy or approval for this element of discord in the ranks of industry. Any legislation in the future must be as free from this element of trouble-making as it is from labor extremists who strive for class domination."

Supporting his request for a temporary national coal agency, President Harding warned congress that, although the "skies are clearing" in the coal situation, a recurrence of difficulty might be expected next April, when wage contracts now being made are to be renewed, unless a cure were provided for the fundamental ills affecting the industry.

Stating that the Esch-Cummins act in establishing the railroad labor board was inadequate, being with little or no power to enforce its decisions, the President recommended action to make the board's decisions "enforceable and effective against carriers and employees alike."

Stating that sympathetic railroad strikes had developed and impaired interstate commerce seriously, the President said that trains deserted in the western desert "had revealed the cruelty and contempt for law on the part of some railway employees, who have conspired to paralyze transportation."

Scores Lawless Strikers.

Asserting that the striking unions in some instances had not held their forces to law observances, Mr. Harding said "there is a state of lawlessness shocking to every conception of American law and order," and announced his intention to invoke laws, civil and criminal, forbidding conspiracies hindering interstate commerce and requiring safety in railway service.

In declaring positively for the right of men to work, the President said that in both the coal and railroad strikes this right had been "denied by assault and violence," and, in some cases, winked at by local authorities. He added:

"It is fair to say that the great mass of organized workmen do not approve, but they seem helpless to hinder. These conditions cannot remain in free America."

Government "by law must and will be sustained," the President said, "no matter what clouds may gather, no matter what storms may ensue, no matter what hardships may attend, or what sacrifice may be necessary."

The President concluded his address after speaking 40 minutes.

BANDIT KILLS MAN FOR $6,750

Secretary and Treasurer of Baltimore Firm Is Slain—Passengers on Street Car Threatened.

Baltimore, Md., Aug. 19.—William B. Norris, forty-two, secretary and treasurer of the Hicks, Tase & Norris company, contractors and builders, and Fred W. Kuethe, a bookkeeper for the firm, started from the Commonwealth bank, Howard and Madison streets, for the company's office at 106 West Madison street—not two blocks away—with a $6,750 payroll. One block from the bank they were attacked by a bandit. Norris was shot to death and Kuethe struck over the head with the butt end of an automatic pistol. Passengers on a crowded street car and scores of pedestrians who ran to their assistance were threatened by the bandit, who escaped in an automobile.

C., and 72-inch reflector telescope through which he recently discovered and measured twin suns of immense size. 3—Dedication of monument on Argonne battlefield to those who perished there.

NEWS REVIEW OF CURRENT EVENTS

Strike of Bituminous Miners Settled Temporarily and in Feeble Manner.

BOTH SIDES CLAIM VICTORY

Negotiations Between Railway Executives and Shopmen Resumed—Violence by Strikers Exasperates the Public—France Ready to Enforce Sanctions Against Defaulting Germany.

By EDWARD W. PICKARD

ONE of our great strikes—that of the bituminous miners—was settled last week, partially, temporarily, and after a fashion. The agreement reached at Cleveland by the miners' officials and operators representing perhaps 60,000,000 tons annual production means there will be enough coal to get through the fall and winter, though conservation and rationing probably will be necessary. But the old wage scales and working conditions are to continue in effect until March 31, 1923, which means the high prices for coal that have prevailed for several years will be maintained by the dealers, if they can do it, and also that next April the disputes and probably the strike will begin all over again. To be sure, the agreement provides for the creation of machinery to avert further strikes and to bring some order into the chaotic coal industry, but the public must not count too much on this.

Both the miners and the operators claim to have won a victory at Cleveland, the former because their wages and work conditions are unchanged, and the latter because the miners signed agreements with individual operators and also because the tribunals to be set up solve the issues revolving around the question of arbitration, which the miners oppose.

The agreements were with operators of all the bituminous states except Illinois and Indiana, but the prospects for resumption of mining in those two states also was excellent.

Already the coal profiteers are getting in their work. Senator Borah of Idaho called this to the attention of the federal fuel committee and announced his intention of seeking legislation to check them. At the same time Fuel Distributor Spencer asked the railroads to refrain from competitive bidding for coal, the result of which had been to force the price above the limit set by Secretary Hoover. It was stated in Washington that President Harding would ask congress to pass legislation giving the federal fuel committee legal powers to control the distribution and regulate the price of coal as a safeguard against hardship and profiteering. It is quite evident that unless the government does come to the rescue, the settlement of the coal strike will be an expensive thing for the consumer.

HIS final suggestion for settling the strike of railway shopmen having been rejected by the union, and only accepted by the railway executives with reservations, President Harding lost nearly all the wonderful patience with which he has been dealing with that problem.

On Friday the President laid the whole matter before congress. After declaring the right of employer and employee alike to conduct their business must be recognized, he said he was "resolved to use all the power of the government to maintain transportation and sustain the right of men to work." He said the Esch-Cummins act was inadequate and recommended action to make the railway labor board's decisions "enforceable and effective against carriers and employees alike."

He scored severely the strikers for their acts of brutality and their contempt for law, and announced his intention to invoke laws, civil and criminal forbidding conspiracies hindering interstate commerce and requiring safety in railway service.

The President, asserted a national investigation of the coal industry was necessary and recommended a federal commission to advise as to fair wages and conditions.

In discussing coal the President referred to what he termed the "shocking crime at Herrin, Ill., which so recently shamed and horrified the country," and added the incident was "butchery of human beings outright in madness."

WARNINGS of brotherhood officials that alleged faulty equipment and the employment of armed guards would result in many sporadic strikes of members of their unions were fully justified. Engineers, firemen and trainmen in numerous instances abandoned their trains and service, especially in the Far West, was badly crippled. Passengers were marooned for days in small towns in the desert regions and women, children and invalids suffered greatly from heat and lack of milk and ice. In some cases the sending of relief trains was prevented or delayed by the strikers. The government, the railway heads and the entire American public were thoroughly exasperated by these methods, and the brotherhood chiefs, realizing the great mistake their men were making, ordered them back to work. The heads of the "big four" still insist that equipment is so degenerated that the lives of the trainmen are endangered, and they were pleased to read that President Harding had written to Chairman McChord of the interstate commerce commission insisting that the federal laws relating to inspection of rolling stock and safety appliances must be strictly enforced, regardless of the public inconvenience which might ensue.

As for the employment of armed guards, the striking shopmen and their sympathizers have by their actions destroyed completely the argument of the unions. They have mobbed, killed and maimed many nonunion shop workers in most cowardly fashion; they have set fire to shops; they have torn up tracks, they have bombed trains, and they have blown up at least one railway bridge. Wherever railway property and workers are not well protected by armed guards or state troops, acts of violence are perpetrated. Over and over again, in scores of places, the striking shopmen are proving themselves to be brutes and cowards. Their only excuse—if it be an excuse—lies in the statement of Attorney General Daugherty that Red agitators and I. W. W. leaders are exceedingly active in fomenting troubles.

IN ACCORDANCE with its arranged plan, the senate voted Saturday on the tariff bill devised by its committee on finance, accepting it by a fair majority, and the measure is now in conference. During the final days of debate several important amendments were adopted, one of them authorizing the establishment of foreign trade zones in American ports where foreign goods may be brought in without payment of duty to be stored, exhibited, mixed with domestic products and reexported. Logs of fir, spruce, cedar and western hemlock were transferred to the free list, and so were scientific instruments for educational purposes. The Democrats failed to get a reduction of the rates on aluminum, and Senator Harreld (Rep., Okla.) lost his fight for duties on crude petroleum and fuel oil.

MISSISSIPPI Democrats staged a pretty contest Tuesday in their senatorial primaries. The real fight was between former Senator James K. Vardaman and Hubert D. Stephens. A third contestant was Miss Belle Kearney. She polled only about 17,000 votes, but that was enough to prevent Vardaman from getting the required majority; he received over a thousand more than Stephens. Under the state law it is necessary to hold a second primary on September 5 to determine which of the two men shall be the nominee. Some time ago former President Wilson stated that he hoped Vardaman would not be sent to Washington again.

UNABLE or unwilling to recede from the position he had taken regarding Germany's failure to pay, Poincare returned to Paris and the allied conference in London broke up without result unless it be the momentous one of a rupture of the entente and the wrecking of the treaty of Versailles. The French premier summoned his cabinet and it unqualifiedly indorsed all he had done and said in London. It also decided the government was competent to handle the situation without convening parliament, unless conditions become much worse. Though fully prepared to put into force the French sanctions against Germany, the cabinet decided to await the action of the reparations commission concerning a moratorium. Germany meanwhile defaulted in the war debts due on Tuesday, declaring in a note to the allies that this was due to the demand for foreign currency to pay for urgently needed necessaries of life and to the fall in the value of the mark. The reparations commission was trying to devise some way of tiding over the situation until November or December when, it believes, another meeting of the allied premiers will have to be held to consider the whole question of German debt and finances and the interallied war debts.

The break-up of the London conference caused another great decline in the value of the mark, and at the same time came a series of farm strikes throughout the country led by the communists and seriously threatening the harvests. Chancellor Wirth, in a statement to press correspondents, said:

"Germany cannot pay in gold. Ten million gold marks, paid this week, were drawn from money set apart to buy wheat this month. The first duty of the German government is to give bread to our sinking people.

"In Austria, which is less densely populated than Germany, the authority of the state has been endangered. Germany is now heading under full sail into parallel conditions. What can France gain from her policy? Our inability to pay in gold will be followed by inability to pay in anything. What comes after that is not politics—it is social revolution. We of the German republic have restored harmony in central Europe, where formerly an entire upheaval threatened. We are today sitting at the deathbed of our work."

THOUGH expected for some time, the death of Lord Northcliffe, the famous British journalist and leading publicist of the world, came as a real shock. America feels the loss only less than Great Britain, for he was often in this country, knew thoroughly its people and its ideals and was the greatest force in the promotion of close friendly relations between the two nations. His power in British politics was tremendous, and there is no one to fill his place. Viscount Northcliffe was buried in Westminster Abbey Thursday with all the honors that could be bestowed. Eminent persons, including many ambassadors, filled the edifice and the humbler folk thronged the streets outside.

IRISH insurgents, having been almost totally routed in the South, broke into renewed activity in the North and among other exploits captured Dundalk in a surprise attack. But they were unable to hold the place more than a few days. When the regulars reoccupied it they took hundreds of prisoners. Regular riverboat service has been re-established between Cork and Queenstown and normal conditions almost restored in that district. The Marconi radio station at Clifden on the coast north of Galway has been rescued from the rebels.

The new Irish Free State lost one of its wisest and strongest supports in the death of Arthur Griffith, president of Dail Eireann, on August 12. Irish and English alike mourned him and his funeral in Dublin was the occasion of a very remarkable demonstration.

OVER in China a peace parley actually was begun, the agents of Gen. Wu Pei-Fu, war lord of the North; and of General Chang, dictator of Manchuria, and Sun Yat-Sen, former head of the southern government, getting together in Shanghai. Representatives of President Li and others also were present. Doctor Sun, who reached Shanghai from Canton via Hongkong, said he had no personal ambitions and would obey parliament and support whomever it chose as president.

The American Legion

(Service Department Supplied by The American Legion News Service.)

MEMORY OF GALBRAITH

Tablet Is Embedded in Huge Boulder on Spot Where Commander Was Killed.

Dedicated to the Memory of Fred W. Galbraith, Jr., National Commander of the American Legion, who was killed on this spot in active service of the American Legion, June 9, 1922," reads the inscription on a bronze tablet embedded in a huge boulder which has been dedicated by the Legion in memory of its beloved commander.

Galbraith Memorial.

Galbraith was killed in an automobile accident near Indianapolis, while in active service of the Legion. The rock and tablet were recently dedicated at a special service held by the headquarters staff and attended by National Commander Hanford MacNider and Mrs. Lowell F. Hobart, president of the American Legion Auxiliary.

CORPORAL SCORES AGAIN

John Shoemaker, Through Phoenix Post American Legion, Draws West Point Appointment.

The "Kid Corporal" has scored again. John Shoemaker, who enlisted in the army at fourteen and served many months with the American expeditionary forces in France, has now received presidential appointment to West Point.

Shoemaker received a high school in Phoenix, Ariz., where he took special courses in military tactics under Maj. Claude Decatur Jones. Major Jones became interested in the boy because he had such an unusual record.

Young Shoemaker served with a machine gun company in the Fifty-fourth infantry for two years, during and following the World war. His West Point appointment followed a campaign in his behalf by the Phoenix post American Legion and Major Jones, who were anxious that a war veteran should take the place at the military academy vacated by Charles Barrett, overseas hero, who graduated at the head of his class last June.

ENGLAND SEEKS LEGION PLAN

Government Asks American Body for Details in Matter of Employment for War Victims.

One of the highest compliments ever paid to the peace-time efforts of an organization was paid the American Legion when the Polish government asked that the Legion explain its plan used in the successful campaign to aid unemployed former service men in the United States in order that just such a system might be used for doing away with unemployment in Poland.

The Legion furnished a detailed outline of the scheme used in this country, and has received a letter of thanks from T. Hoinko, commercial department manager of the consulate general.

More than 400,000 ex-soldiers were given at least temporary employment during the first week of the Legion's drive and it is estimated that now more than 500,000 men are in permanent positions largely through the efforts of the American Legion.

Ex-Tommies Cheer the Legion.

Ex-Tommies who attended the first annual conference of the British Legion in London recently, rose en masse and cheered H. Nelson Jackson, national vice commander of the American Legion, when he read the greetings of Commander Hanford MacNider and the entire American Legion to these "buddies" in the mother country. The message of good will and comradeship was received for the British Legion by Field Marshal Earl Haig.

Many "Bummed" to Convention.

Because of the financial depression and lack of government compensation, many penniless disabled veterans of the World war walked and rode in box cars to San Francisco to attend the second annual convention of the Disabled American Veterans of the World War, according to Raymond Creelman and Robert M. Smyth, members of the national staff.

NEED FAITH AND CONFIDENCE

Positions Open for Newly Trained Victims of World War Before They Are Ready.

That the rehabilitated World war veteran's success in life depends absolutely upon his faith in himself, is the assertion of Maj. W. F. Lent, chief of the employment service of the United States veterans' bureau which has in charge the proper training of thousands of disabled service men.

Major Lent, in speaking before the headquarters staff of the American Legion in Indianapolis, said that the Legion and the Legion Auxiliary had as one of their greatest obligations the task of instilling into the hearts of service men an absolute faith and confidence in themselves and their abilities to cope with life's problems.

He said that the government is to have a place for every veteran three or four months before the veteran is ready to take it. "We do not guarantee that a man who has studied to be a factory superintendent will be placed in that position," the major explained, "but he will be placed in the path so that he can obtain such a position through his own initiative and ability.

"We want employers to understand, too, that these men are no longer cripples. They may be physically crippled, but not industrially or vocationally. When we put a man with one arm into a job, he is as well able, and perhaps more so, to do that particular work as is the man with two arms."

AS THE "FLAPPER OF 1776"

Charming Hilda Scheurer Aids Indianapolis Legion in Advertising Benefit Picture Show.

A white wig and a hoop-skirt are not generally considered as part of the necessary equipment of a "flapper." The flapper pictured here, however, wore these and other colonial trappings most effectively when she wanted to draw the attention of the public to the fact the Indianapolis American Legion was presenting a historical motion picture at one of the local show houses.

Miss Hilda Scheurer, charming as a "flapper" of 1922, was still more attractive as a "flapper of 1776." The crowds which packed one of the largest and finest motion picture theaters in the Middle West during the entire showing of "Cardigan," a picture of Revolutionary days, which the American Legion is sponsoring, was proof of the fact that Miss Scheurer and her sister "flappers" did a good job of advertising.

It was not the first work Miss Scheurer has done for the American Legion. She is an ardent worker in the Legion Auxiliary.

War Gases for Farm Pests.

Gases which were used with such deadly effect during the World war are now being used for the extermination of farm pests. Gases have been used in the West for the extermination of jack rabbits and gophers. Mustard gas is sprinkled over the paths of rabbits, irritating their feet and causing them to rub them across the face. The poison then quickly becomes effective.

Clock for Airplanes.

The air service of the United States War Department has developed a peculiar kind of clock to be used on airplanes. It is said the clock will keep perfect time in any temperature from 90 degrees below zero to 150 degrees above. Furthermore, the vibration of the plane does not affect the accuracy of the timepiece, which has a movement like a watch and is wound by electricity.

Veteran Had Many Relatives.

In investigating the record of Bennie F. Taylor of Crystal Springs, Miss., a World war veteran who died in 1918, the veterans' bureau found that Taylor, exclusive of cousins, was closely related to four per cent of the total population of his home town of 1,395 residents. The stepmother and 15 brothers and sisters are each receiving monthly installments of $1.92.

Carrying On With the American Legion

"Standing Bear," a Sioux squaw, presented Mrs. Lowell B. Hobart, national president of the American Legion Auxiliary with an Indian doll during Mrs. Hobart's visit to the Indian reservation in South Dakota.

* * *

On a $10,000 wager six American Legionnaires from Dallas, Tex., started to walk from Dallas to New York in 300 days. One got married on the way and three fell by the wayside. Only two reached the last lap of the journey.

* * *

A hero of the World war, five times wounded at Chateau Thierry, but without work and with no prospect of getting the government compensation to which he was entitled, Daniel Webster of Philadelphia, Pa., committed suicide and would have been buried in a potter's field had not the American Legion given him a decent burial.

USES FOR STEAM PRESSURE COOKER

Housewife Saved Much Time and Fuel in Cooking, Especially in Hot Climate.

FOODS BECOME MORE TENDER

Cheap, Tough Cuts of Meats or Dried Beans May Be Prepared in Relatively Short Time—Flavors Retained.

(Prepared by the United States Department of Agriculture.)

In canning meats, chicken, fish, game and vegetable mixtures, especially in hot and humid climates, the pressure cooker is usually recommended for reliable processing. There are also many dishes which may be prepared for the table in the steam pressure cooker, the United States Department of Agriculture suggests.

Most foods cooked in steam at temperatures above 212 degrees Fahrenheit become tender much more rapidly than in the ordinary way of cooking. Cheap, tough cuts of meat or dried beans and peas consequently may be prepared in a relatively short time in the steam pressure cooker, since at 5 pounds pressure the temperature of the boiling water and steam within the cooker is 228 degrees Fahrenheit; at 10 pounds pressure it is 240 degrees Fahrenheit; at 15 pounds it is 250 degrees Fahrenheit, and at 20 pounds it is 259 degrees Fahrenheit.

Preserves Flavor.

Time and fuel are often saved by using the pressure cooker. Food value also may be saved in some instances; for it is often the case, that only a small amount of water is necessary,

A Large Type of Steam Pressure Cooker in Common Use.

and the extractives from meats or vegetables can easily be kept and utilized. Some flavors are better retained in the tightly closed cooker. It is a good idea when planning to use the pressure cooker for preparing a meal, to put as many articles as possible into the cooker at once.

The meat will usually require the longest time. The vegetables should be put in about 15 minutes before the meat is expected to be ready to serve. Some experience is necessary to enable the housewife to judge the length of time for any given dish.

Stewed and boiled meats which are cooked in the pressure cooker often have a richer flavor than those cooked over the stove. The problems of cooking meat in the pressure cooker are those incident to finding the proper length of time for which a piece of meat of given size, shape and toughness needs to be cooked. The rate at which the heat penetrates to the center of the piece of meat and the amount of heat necessary to soften the connective tissues must be considered.

It is easier to cook meat in the pressure cooker if the meat is cut into rather small pieces, than if it be in one large piece. Heat can then be applied for a shorter time with less danger of rendering the outer parts of the meat tough, hard or dry. Processing at 10 to 15 pounds pressure is usually necessary when tough meat is in a thick, compact mass. When the meat is cut into pieces it is not timed by the pound but by its toughness. The usual rule is to process 30 to 50 minutes. Chicken and rabbit, disjointed, and prepared in the pressure cooker, are excellent.

How to Cook a Pudding.

Steamed puddings made of batter or dough may be cooked in the pressure cooker, but it is better to divide the pudding into small portions or individual molds. This allows a more rapid heat penetration, quicker expansion, and reduces the time of cooking. It may be advisable, also, during the first part of the cooking period, to keep the petcock wide open, and even to prop the cover up so that it fits loosely, in order that the rate of cooking shall not be too rapid. When the pudding has risen well the lid may be clamped down and the pressure brought slowly to 15 pounds for 10 or 15 minutes.

Before attempting to remove the lid of the cooker be sure that the pointer of the dial is at zero. If the petcock is opened to relieve the pressure, care should be taken to open it little by little to avoid burning the operator

USE LARGEST PIECES WHEN CURING MUTTON

It Will Be as Delicious as Any Ham or Bacon.

Bureau of Animal Industry Recommends That Meat Be Thoroughly Cooled, but Never Frozen—Two Successful Methods.

(Prepared by the United States Department of Agriculture.)

The average farmer seldom thinks of curing mutton as he thinks of curing pork for future use but, says the United States Department of Agriculture, it is possible to cure and smoke mutton that will be as delicious as any ham or bacon. The practice, says the department, should result in increasing the consumption of this meat which at the present time is only 3.9 per cent of the total meat used in the United States.

One reason that the average family tires of mutton and develops a prejudice against it is that when a sheep is killed it has been the habit to eat all the meat while fresh. Naturally, a diet of fresh lamb or mutton to the exclusion of other meats for many days is apt to cloy the appetite.

As a result of the experimental work done by the bureau of animal industry, the following recommendations are made for curing mutton: Cool the meat thoroughly but never freeze it, either before or during curing. Begin the curing process from 24 to 36 hours after killing. Because of high shrinkage in curing, only large pieces, such as legs and shoulders, are suitable for this use. A brine formula may be used, but dry-cured meat requires less work and keeps better. Both methods are successful, if the work is carried out properly. In making the dry cure, for each 100 pounds of meat use seven pounds of salt, three pounds of sugar or sirup, two ounces saltpeter, two ounces red pepper and three ounces black pepper. The meat, after these ingredients thoroughly mixed have been applied, should be packed away in a box or on a table. A day and a half for each pound of the average weight of the pieces is the right time to leave the meat in cure. When that period has elapsed, hang the pieces in the smokehouse and smoke.

GOOD PRESERVE FOR WINTER

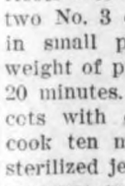
Children Will Like Dried Apricots for Their Lunches—Novelty for Sunday Supper.

The United States Department of Agriculture has tested and approves the following recipe for a good winter preserve. The children will like it for their school lunches, and to many persons it will prove a novelty for Sunday night supper.

Soak one pound chopped dried apricots over night. Drain the juice from two No. 3 cans of pineapple and cut in small pieces. Add one-half the weight of pineapple in sugar and cook 20 minutes. Drain and add the apricots with one-half pound sugar and cook ten minutes longer. Turn into sterilized jelly glasses and cover. This preserve requires careful watching to prevent scorching.

HOME CONVENIENCES

One way to get labor-saving devices for the home is to devote all proceeds from poultry grown from one setting of eggs to buying home conveniences, suggests an extension worker, who put this idea into practice in Linn county, Mo. Any woman could follow this plan independently, but in Linn county seven communities organized and 104 women pledged themselves to buy conveniences with all they made from the chicks raised and sold after setting one hen. In addition to the 722 chickens, which brought $735.20 cash, a number of premiums were offered by business men, ranging all the way from a paring knife to a pressure cooker, for those who made the best records from their single sitting. Several communities who have heard of this plan have asked to come in another year.



OF INTEREST TO THE HOUSEWIFE

If cooked too long, oysters lose their flavor.

* * *

French chalk is excellent for cleaning white felt hats.

* * *

Rubber fingers are excellent to wear when slicing vegetables.

A cut apple placed in the bread box will give forth just enough moisture to keep the bread and cake fresh.

* * *

For a novelty, try stuffing tomatoes or peppers with nuts, raisins and bread-crumbs.

EVER THINK ABOUT NOTHING?

Courteline, Eminent French Philosopher, May Have Added Another Word to Language.

Courteline, the French philosopher, bids fair to add a new word to language, as did Osler and Fletcher. Perhaps we shall overhear the expression "to do a Courteline" applied to the attempt to think without a subject. A new edition of the "Philosophy of Courteline" has recently been issued, and the reviewer in Le Progres Medical assures the reader that in place of a system of metaphysics the book consists of a string of thoughts, maxims and reflections on the most diverse themes.

Courteline, or some one else, had heard a woman say that "she never thought, because thinking fatigued her; but if she did think she tried to think of nothing. This declaration he regards as great to the point of sublimity—the best thing that has been said since a certain gentleman went on record as "no lover of spinach." Such remarks are worth more than many acts of parliament.

Instead of giving rules about how to think of nothing, Courteline seems to think along absurd lines and thus reduce thought to absurdity. Thus he states that it is better to drink too much good wine than even a little poor wine, and that it is better to court two pretty girls at the same time than one aged spinster alone. He says of the doctors that they can frighten him, but never convince him; that when they tell him he has this or that trouble he has no difficulty in believing them, but when they tell him they can cure him he no longer takes their word. He would rather consult a small-fry doctor than a leading light of the profession, because the former, having no theories, is much less to be feared. The brainy doctor thinks more of justifying his theory than of curing the patient.

"Thinking about nothing," inconceivable in itself, becomes intelligible if we look upon it as thinking nonsensically to stumble now and then on a sensible conclusion.

Old Belief Proved Wrong.

The London Times recently carried a news dispatch which indicates that a pet theory of the late Sir Norman Lockyer has just received a blow from which it can hardly recover. Accurate measurements made by the Egyptian survey have proved that never since the great temple of Karnak was built has the sun shone straight down its axis. Sir Norman Lockyer believed that this temple, and many others in addition, were constructed for the purpose of obtaining an exact observation of the precise time of the solstice—that is to say, the day of the sun's most northerly setting. But Mr. Richards, of the survey of Egypt, has proved that the sun has never been visible at all, at any moment in any day in any year along the axis of the temple, since about 6,000 B. C., and that it last set along the central line of this axis between 12,000 and 13,000 years ago. At this date Europe was still in the old Stone age; the cave period was at its zenith, and the hunters of the Dordogne were chasing reindeer over the French tundras. To suppose that the temple of Karnak can have been built then is out of the question. This would appear to dispose of the sun-temple hypothesis; and the survey of Egypt is to be congratulated upon a useful piece of work.

Love and Green Peas.

Leguminous plants and divorce appear to have little in common, but, according to the Daily Chronicle, London, England, the Pathological congress, recently held in Paris, discovered the analogy when considering divorce cases resulting from war-time marriages.

Haricot beans were stated to confer advantage upon brain and brawn; spinach would prevent dawdling in the household, but green peas were condemned as developing frivolity, making women capricious and reckless. Men and women, it was asserted, flirted under their influence, and the pathologists attributed a majority of the divorce cases to the consumption of peas.

Something Goes Wrong on Jupiter.

Something has gone wrong with Jupiter, the great planet which is 1,000 times as large as Mother Earth. Frank Sargent of the Durham University observatory has reported to the Royal Astronomical society that an area of the planet's surface equal in size nearly to the continent of Europe was seen by observers to be moving seventy miles an hour slower than the rest. This was in 1921. This year a similar movement has been observed, but over a smaller area. The drift thus far has been about 50,000 miles. What this movement means is a mystery.

Something Missed.

"The millionaire said he didn't know there was $20,000 worth of liquor on board."

"That's what he testified in court."

"Umph! I suppose everybody in court snickered."

"Everybody but a friend of the millionaire, who had been invited to go on a cruise. He groaned aloud."—Birmingham Age-Herald.

New Name for Prevailing Style.

Mary's home is in the country and she was unaccustomed to seeing children wear half hose. During a recent visit in the city, at which time the prevailing style impressed Mary greatly, she exclaimed, "O, mamma, won't you p'ease buy me some low-down stockings?"

A RAINBOW SCARF

By HILDA L. HARRIS

© 1922, by McClure Newspaper Syndicate.

Somner Brett scowled as he swung open the heavy hotel vestibule doors and stepped into the crowded street. Evidently the charm of the sunny afternoon, which seemed to brighten the faces of the passing throngs, had no effect upon him, for the scowl grew deeper as he meditated. To Brett, the thought that he had three whole hours in a strange city, with only the prospect of a rather dull dinner with Ambrose Potter, when he could be enjoyably spending the time elsewhere—the Lindale Country club golf links, for instance—was annoying, and his scowl deepened into a heavy frown.

But, suddenly, all signs of annoyance disappeared and the man's face brightened with interest. Involuntarily he threw back his shoulders and buttoned his topcoat.

A golden-haired, blue-eyed bit of feminine daintiness was the cause of his sudden change of mood. The colors in her silken scarf fairly fascinated him. In a flash, he called it a "rainbow" scarf.

The girl stopped at shop windows; the man paused by near-by shop windows. His courage failed him, however, when his vision of loveliness disappeared into a quaint little bookshop, but he lost no time in deciding that the bookstore probably had just the volume of Kipling that he had wanted for some time.

The girl, who had evidently selected a book, was murmuring something about having lost her money, as she fumbled in her little purse, while the sales clerk, with suspicious eyes, waited impatiently. Then the girl glanced at him, a distressed look in her deep blue eyes, and before he realized it, he had paid for the book and was standing out in the street again. And his "rainbow" scarf girl was actually speaking to him, thanking him for his kindness!

"I can't imagine how I lost the money," she said in a perplexed tone. "I wonder—I wonder if you would mind very much walking down a few blocks to the Betty Brown tea-room? I am going to meet a friend there, who will return the money to you."

Then she smiled. In a flash the man understood why men wrote songs about smiles that made one happy.

The walk to the tea-room was ridiculously short, but luck again favored Brett, for the girl, with a tiny pout of disappointed surprise, found that her friend had not arrived.

But the pout changed into a dimpling smile when a "Waffles and Syrup" sign tempted Brett to suggest a cup of tea, and the adventure progressed famously.

* * * * * *

It was not until he met Ambroze, waiting as stiffly and sedately as only Ambrose A. Potter could wait, that Brett came back to earth, and then he tried to visualize the look of polite incredulity that would appear on his friend's face, if he were to hear of the afternoon's adventure. Brett smothered a chuckle as he discovered that he had not heard one word of Potter's conversation.

"Sorry you're here for so short a time, Somner," Ambrose was saying, unfolding his napkin with a precise gesture. "I wanted you to meet Mary."

Oh, yes, Brett remembered. Ambrose, old chap, had got himself a fiancee with the growing prosperity of his hay and grain business. He wondered if waffles were included on the menu.

"Do you serve waffles?" he inquired of the waiter, who promised vaguely to "see."

"You were surprised to hear of my engagement?" Potter asked, as he fumbled in his coat pocket. He produced a photograph and, with a flourish which surprised Brett, exclaimed: "Meet the future Mrs. Ambrose Augustus Potter."

Brett glanced rather carelessly at the picture, and then stared and stared!

"Is that one of the scarfs from—India—she's—wearing?" he finally blurted, mopping the perspiration from his forehead.

"Yes," complacently answered Ambrose, "she has an aunt in India—"

Brett sank back weakly in his chair, but managed to summon enough strength to stop the passing waiter.

"Never mind the waffles!" There was a savage tone in his voice.

"Of course, this little picture doesn't do Mary Anne"—Brett winced—"justice," said Ambrose, as he carefully put the picture back into his pocket. "She has nice eyes, and rather pretty, light hair. Speaking of waffles made me think of Mary Anne. I promised to meet her at a little tea-room on —— avenue this afternoon, but I was tied up all day at a meeting. Mary is a dear girl," Ambrose went on, "but she's a bit childish and chatters—"

Somner Brett smiled grimly as he listened.

A Narrow Escape.

Fisher was proudly exhibiting to his young wife his day's catch.

"Aren't they beauties!" she enthused. "But, dear, I've been so anxious for the past hour."

"Foolish child!" he said, caressingly, "why, what could have happened to me?"

"Oh, I didn't worry about you, dear," she replied, "but it grew so late I was afraid before you got back to town all the fish markets would be closed."

Must Youth Be Served?

According to an old saying, "youth must be served." But banking is the exception which proves the rule.

A bank possessing the confidence of the public must possess also many years of experience. The ability and integrity of its officers must be demonstrated in times of peace or war, of prosperity and business depression.

Back of this strong bank are 30 years of successful service. As a depositor you profit by the valuable banking experience thus gained.

First National Bank
"The Bank for Everybody'.'

DES MOINES, IOWA, Aug. 23, 1922.

One billion Christmas seals have ben ordered printed by the National Tuberculosis Association. They will be sold next December by the State Associations and the local local health organizations and committees and their proceeds devoted as usual to fighting tuberculosis and other popular diseases and to constructive health work of various sorts. The Iowa Tuberculosis Association is ordering 24 million.

The design of the sticker is a radical departure from those used in previous years. It is a symbol of the present interest on the part of health workers in the mother and child. It shows in the foreground a mother holding a child, while in the background is a Christmas tree limned against a sky whose hue is the now fashionable periwinkle blue. Over the center of the tree is the emblem of the world-wide movement to eradicat tuberculosis, the bright red double barred cross. At the bottom of the seal are the words "FOR HEALTH.

The seal was drawn by T. M. Cleland. a celebrated artist, and was appoved by a committee of national and state officials with the advise of Richard S. Back of the Metropolitan Museum of Art and Heyworth Campbell, Art Editor of the Nast Publication. The Metropolitan Museum declares that the 1922 seal is the best ever produced by the National Tuberculosis Association.

The posters designed by Earnest Hamlin Baker and the Ethridge Association of Artists. are also especially attractive.

One will make a strong appeal to school authorities and school children. as it shows a beautiful child standing at a blackboard writing, "The good they do depends on you", to the seals which decorate the the sentiment evidently referring Christmas packages lying at his feet.

GOOD ROADS AND STRIKES

Much has been said about the econ omy of good roads but Secretary of Commerce Hoover's plan for feeding the country and keeping open communication presents an entirely new phase with it. He has estimated that with the good roads already constructed and motor trucks available he can transport at least one-third the foodstuffs required by the people Unboubtadely effective organization of all motor driven vehicles would surpass this estimate.

And there is another phase still of the economy of good roads. If they contribute one-third the food supply and communication of the nation, they will by such a measure make ineffective any railroad strike that may be called. This a new factor in the industrial situation, and its economic value can probably be necessary to promote developement.

So far good roads have been more or less theorically economic. They heve reduced the cost of motor vehicle operation, but have been appreciated only by those owning cars and trucks. As usual general benifits that are real must accrue before value is reecognized, and this may come if Secretary Hoover is forced to feed the country and keey communication open.

Mason City Gloge Gazette.

CUT CORN AT RIGHT TIME
Here's Rule For Choosing Time To Fill the Silo

Corn that is to be cut for the silo wants to be matured enough so that the kernals are hard and at least one fourth of the leaves and husks have turned brown, says the Iowa Agricultural experiment station experts. Corn that is cut when too immature lacks the nutriment value the more mature corn has.

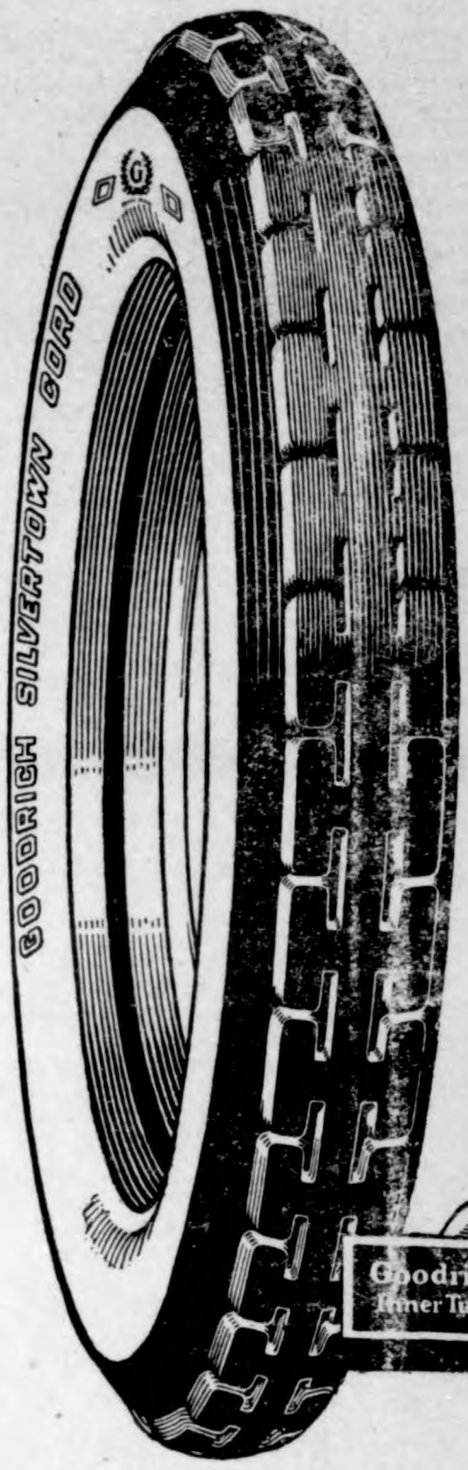
However, when corn becomes to dry, before cutting it is not likely to have enough moisture for the fermentation process. If the corn is dry when cut it is a good plan to add water, as this not only helps in the fermenting but serves to pack the silage and drive out the air spaces. It is in the air pockets that form in the silage that molds start and ruin part of the silage.

Corn that is cut too green produce a high acid content in the silage so that considerable trouble to stock often follows its use.

In cutting the silage it has been found that inch lengths are the easiest to pack properly.Be sure that the silage gets tamped around the edges, as it is here that air pockets form the easiest. Due to the incoming silag from the blower the center of the silo is packed the hardest and the tampers should keep the outside edges as solid.

If a silo is half full in the afternoon and left stand over night. it is a good plan to operate the blower fast for a few minutes and force fresh air into the silo before starting to fill it. Often t
silo an accumulation of gas thrown off by the new cut corn and this is dangerous. The blower will soon remove this.

Provide empty comb for the fall flow of honey as bees do not build much comb in the fall.



Quality

You can buy tires that cost more and tires that cost less than Good rich Silvertown Cords

But when you come to the only cost you are really interested in —*final cost*—you can find no greater economy than through the use of Silvertown Cords.

Their ability to withstand continual hard driving and their uniformly high mileage make them the greatest tire value that can be obtained.

Come in and get our prices and service story regarding Silvertowns the next time you are in need of a tire.

Bring in all you can, we will pay $4.50 per ton. Don't bring us any tin, boilers or sheet iron. We also pay 1-2c lb. for rags.

Henry Lau & Son

Are Positions Plentiful?

A great many people have the idea that it is practically impossible to get a position. This is not true. During the week of the fair we were at our wit's ends to meet the demand for really competent office help. On Wednesday morning we had six calls for bookkeepers, stenographers and machine operators. (We will furnish the names of the firms and business men asking for help if you wish.)

One thing is required today, that was given little thought two or three years ago, and that is through preparation . Our graduates without exception get positions . Many under graduates are placed, but those who graduate get the choice positions.

The fall term opens Tuesday, September 5th, enroll, complete your work and you need not worry about a position.

The Hamilton University Of Moson City, Iowa

Mr. and Mrs. John W. Waterman, daughter Mable and son Clarence, drove to Keystone, Iowa, Sunday for a visit with John's mother who was sick. They returned to Klemme on Tuesday.

Miss Laura Brooks, Mrs. LuVerne Smith and the Joe Starnes family all drove to Belmond yesterday to take in the Creamery Day Celebration.

Chris Blumer has purchased the Ford truck and cream hauling business of Louie Knoke. Chris now makes the cream route a couple of times a week and between times is hauling freight to and from Mason City.

The Senior Class of theh Garner High School gave a feed to the last year Juniors of the Klemme High school one evening the past week. as a get aquainted affair as a number of the Klemme students will finish their work at Garner this year.

In another item we neglected to mention that Miss Doris Buriff was also visiting in Klemme with her parents last week. Miss Doris has been at Salt Lake City, Utah, the past year as music instructor in a college there. Her many Klemme friends were glad to see her.

Quite a number from here drove over to Belmond yesterday to take in the Creamery Day Celebration. The celebration was well attended and there was plenty doing all of the time and everybody reports a good time. Today quite a few went over to Thornton to help those people eat roast ox. They promised a big celebration also.

Mr. and Mrs. Hugh Chapman, of Kansas City, Mo., accompanied by Mr. and Mrs. Lyle Liebendorfer and son, Robert, of Pawnee City, Nebr., drove into Klemme yesterday afternoon to spend about a week visiting at the R. A. Jorgenson home. The three families are staying at the C. F. Keraus cottage at the lake until next week. The Chapman's come to this place every summer to spend a couple of weeks. This is the first trip of the Liebendorfers to Klemme. The ladies are sisters of Mrs. Jorgenson.

The youth who thinks he is a "game sport", is game for the leeches.

EPWROTH LEAGUE LIFE LINES

Were you present at the league service last Sunday evening? If not, you certainly missed something, for we had a dandy time together. And, following the devotional meeting, we listened to a fine sermon by Milton Schaper, who plans to leave for Sioux City the latter part of this week. He will continue his work at Morningside College there this fall.

Miss Geneva Schult, our 1st Vice-President, who was to have led last Sunday's meeting according to your topic cards, will conduct the service next Sunday night instead. We will study about Dr. Grenfell, who is known as "the prophet of a hard trail". But that's not all.

We're going to do something else, too. Here are two peppy Epwroth League songs which we have copied from "The Epwroth Herald." We heard these and (also many more) at the Institute in July, and they never failed to fill every Leguer with enthusiam. We want toh ue te s songs which follow, next Sunday evening, so please bring your copy of the Times with you, or clip them out.

The tune for the first one is "Marching Through Georgia.".

"Sing a song of Epwroth League,
Oh, sing it far and near;
Sing it out so good and strong
That all the world may hear,
Sing of service, brotherhood,
And also of good cheer.
While we are boosting for Our League."

Chorus

"Hurrah, hurrah, hurrah, for the Epwroth League,
Hurrah, hurrah, 'tis good for you and me;
And now we're up, we're up to stay,
You'll never 'get us down:
While we are boosting for Our League!"

Nows here's the other one. Tune "Brighten the Corner Where You Are."

Wake up the chapter where you are,
Wake up the chapter where you are,
Some discouraged chapter you may give a little jar,
Wake up the chaptr where you are!

The League social we have been talking about so much lately will occur on the evening of September 1. It seems like a long time to wait, but it will be only a week, now. Remember, a week from Friday evening. The committees will see you soon.

Come, come, come to League, Bring your chum along,
A friendly crowd, a friendly crowd.
The League, we're for it strong.

Earl Josten, Pres.

There never was such a crop of wild grapes as is in evidence this season. The housewife has long recognized their value in the making of high class jellies but probition has given them a higher standing in the production of grape juice. Fence rows along highways lined with grape vines have brought to the front an old time controveersy as to the rights of the public to fruits along the highways. Some people think that anything growing along the public road belongs to the public, but the courts have held differently. Land owners in giving of their possessions for a road way relinquish no title in the land thus utilized, but have absolute ownership and control, exept as to the concession for highway purposes. Grapes, plums and nuts growing along the roadways are the property of the abutting land owners. Farmers in the vicinity of Des Moines anticipating the ripening of wild grapes are posting notices warning the public that all such fruit is private property.

BOY'S ARM BROKEN BY HAIL

Fairmont Independent:—The first accident to be reported at this office as an aftermath of the severe hail storm, which swept Martin County Wednesday, destroying hundreds of thousands of dollars of standing corn was that of Rogert Bieth, fourteen year old son of Mrs. Joe Bieth of this city, who suffered a broken arm as a result of the hail.

Robert who had been imployed on the Beckstrom farm this summer was busy shocking oats, when the hail struck the county. Being too far from the house to attempt to make it he crawled beneath a shock but was soon forced out, so terrible was the hail. Grasping two bundles and holding them over his head he made a dash for the house. When he had covered about half the distance to the house, a large chunk of the frozen rain struck his right arm below the elbow, shattering it. The young man succeeded in making the house where he was given prompt medical attention .

The Biggest Fence Post Value Ever Oifered

ANY Way you look at it, this new RED TOP Double Strength Studded Tee gives you the greatest value ever offered in a fence post.

Greater strength—there isn't a single hole punched in this post either for staples or anchor plate.
Firmer in the ground—the RED TOP anchor plate is sturdier than ever.
Longer service—kthe new aluminum finish and solid post make it longer lived.
More efficient stapling—the RED TOP Perfection Staple holds fencing tighter and is easier to apply.
Better Looking—the aluminum finish gives it a neat, trim appearance.

Come in and see this new RED TOP before you start work on your fences. It's as good for repairing old fences as for building new ones You can get a better idea of the big value in this post by seeing it than we could give you in a full page advertiemsent.

It's cost? Less than the better grade wood posts and last twice as long. Remember, too, that it costs one-tenth as much to set a RED TOP. It's by far the cheapest in the fence line.

WE HAVE A GOOD STOCK OF "RED TOPS" ON HAND AND CAN TAKE CARE OF YOUR NEEDS WITHOUT DELAY.

Something to Think About

By F. A. WALKER

TURNING CORNERS

THE very ease and speed with which you rush ahead, so agreeable while the road is smooth and clear, make it difficult sometimes to slow down and turn the corners in safety.

A straight course is easy to follow, but a devious way is hard and calls for all your strength and finer judgment in spite of your vaunted skill.

A few trifling words, a slip of the foot, a shifting of the eye or a broken troth and you are destitute of courage, in a perilous position from which it may take years to extricate yourself.

Friendships are irrevocably lost at the corners where you must turn to determine your future; where you find that you must curtail expenses and live a simpler life with less pleasure and more work.

Turning corners dampens the spirits of high-strung men and women and often narrows their views to so great an extent that they become mere corner loungers, of no use to themselves or to the community in which they exist.

The sunlight vistas of life have been darkened by the gathering clouds of adversity in which they unexpectedly plunged as they turned a sharp corner in an unfamiliar territory.

Like you, these victims of misfortune were comfortable and happy in the heyday of prosperity.

And like thousands of others, they miscalculated their strength and were hastily swept off their feet, bruised and maimed as they found themselves bereft of power and humbled in pride.

In an atmosphere that stifles their ambition and fills their souls with remorse, they are like frightened children lost in the dark, afraid of the shadows and unable to move.

Yesterday they would have laughed at the plight of a friend who made an unfortunate turn at the corner; today, laughter and they are not on speaking terms.

Only the brave and true and merciful can hope to turn the corners on life's highway in security.

And if you will look into the lives of such persons you will find that they were early taught at a good mother's knee to put aside greed and selfishness, to call men brothers, to help the poor, to be charitable to the fallen, and to practice in their dealings with others the golden rule, that the corners might be turned without calamity, even in the purpling twilight.

(© by McClure Newspaper Syndicate.)

Mother's Cook Book

Be wise, be cheerful, bright and gay,
leave to the fool his folly,
And let your motto be "Cheer up," your
rule of life, "Be jolly."

THESE ARE GOOD

STEAMED Brown Betty.—Mix two cupfuls of brown bread crumbs with two cupfuls of chopped apple, add two-thirds of a cupful of finely chopped suet, one-half cupful of brown sugar, one cupful of seeded raisins mixed with two tablespoonfuls of flour and one-half teaspoonful of salt; add one cupful of milk to which one beaten egg has been added and beat thoroughly. Steam in buttered molds two hours. Serve with lemon or vanilla sauce.

Sponge Cake.

Take four eggs, one and one-half cupfuls of sugar, the same of flour, one-half cupful of cold water and flavoring to taste. Beat the yolks until thick, add cold water and beat again until thick; sift the sugar several times, add it to the yolks, then the flour alternately with the whites, the flour having been sifted four times, three times after it is measured. Bake very slowly at first. Use a tube pan. The cake should, when properly made and baked, be the size of an eleven-egg angel food.

Nut Loaf.

Take one cupful of chopped nuts, two cupfuls of bread crumbs, one-half cupful of hot water, one-half cupful of melted butter, one egg well beaten, one teaspoonful of mushroom catsup, one teaspoonful of onion juice and one and one-half teaspoonfuls of salt, a few dashes of pepper. Mix the ingredients in a loaf and bake in a moderate oven one-half hour. Baste occasionally with butter. Serve hot with brown sauce.

Eggs in Peppers.

Use large green peppers of regular shape, wash them and with a sharp knife cut in halves. Remove the white membrane and seeds and place in boiling water to cook ten minutes. Remove and invert to drain. Sprinkle each pepper with a layer of buttered crumbs and minced ham moistened with cream. Break an egg in each, season lightly and place in the oven to bake until the egg is set. Serve on rounds of bread lightly browned in butter.

Spanish Potatoes.

Cook potatoes in boiling salted water until tender, drain and shake over the heat until dry. Into a hot vegetable dish place two to three tablespoonfuls of butter and two tablespoonfuls of minced onion; this amount will be sufficient for six potatoes. Chop and stir the hot potatoes, covering with the butter and onion, then sprinkle thickly with paprika and serve very hot. This is a good dish to serve with cold meats.

SCHOOL DAYS

KIDDIES SIX

By Will M. Maupin

AGRICULTURAL

IN JANUARY how I love
To dream of hoe and spade,
And in my dreams to contemplate
The garden I have made.
In February how I plan
Straight row and level bed,
And dream of lettuce, peas and beans,
And radishes so red.

In March I walk around the lot
And mark with care each place
Where every vegetable will grow
In meet and proper grace.
In April I take up the tools
And work till hands are sore—
Then buy my summer green goods at
The corner grocery store.

Uncommon Sense . . .

By JOHN BLAKE

"USED" THOUGHTS

EMERSON, wisest of all American essayists, says somewhere that every man must sooner or later make up his mind that he and no one else must determine his future.

We can learn from others knowledge, methods, even wisdom.

Other men can teach us how to think, as they can teach us how to swim or play golf.

We all employ a great deal of thought that is not our own. That must be, for we should be foolish not to profit by the accumulated wisdom of those who have gone before.

But these "used" thoughts, while we must at times employ them, serve not at all to develop our minds.

And while we might get along fairly well through life without original thought, we should die little wiser than when we began, and contribute nothing whatever to the progress of the world.

All that is of value in education is learning how to think.

From biography we derive a great deal, but most of it consists in knowing how other men thought, and how their thought made their careers.

If we carry all our problems to others to solve for us, we shall some day be confronted with a great problem and lack the understanding of how to grapple with it.

And in that time there will be no one to help us, and we shall meet with a failure that may change for the worse the course of our lives.

Most of us will do anything rather than think, for thinking is labor of the hardest kind.

But it is the sort of labor that means development, that enables us to use our minds for our own advancement, that makes us resourceful and independent and not afraid of tackling whatever comes along.

There are small differences between the outsides of our heads. There are tremendous differences between the insides of them. And those of us who have learned to think have developed machines which steadily and industriously through the years will work for our prosperity and our happiness. But those whose thoughts are second hand wonder why they never arrive.

(Copyright by John Blake.)

THE ROMANCE OF WORDS

"WELSH RABBIT"

THE name of the dish composed of melted cheese with the addition of sundry sauces and piquant flavorings is usually spelled "rarebit"—an error due to the fact that persons who could see no resemblance between their favorite midnight repast and a hare which came from Wales concluded that it must be a "rare bit." Even Worcester and Webster were formerly guilty of this mistake, until an examination of Continental colloquialisms showed them where they erred.

Welsh "rabbit" is a dyed-in-the-wool slang term, belonging to the same class as a considerable number of other, but less well-known names applied to the favorite dishes of various communities. In England, for example, they refer to a sheep's head stewed with onions as a "German duck," while a bag-pudding is a "Leiscestershire plover" and "Norfolk capon" is eatinghouse slang for a herring. Following the same school of rough wit, the French call a herring a "poulet de careme" or "Lenten chicken" and the Italians reverse this process, referring to a chicken as a "fish out of the coop." Nor is the custom by any means confined to European countries. The New England habit of speaking of codfish as "Cape Cod turkeys" and the current slang of "Irish confetti" for bricks are two other examples from the same school.

So Welsh "rabbit" it should remain—on account of the fondness of the Welsh for toasted cheese and not because it is a rare bit, or delicacy.

New Knitted Textiles; Coats and Coat Dresses

THOSE enterprising manufacturers who make our knitted wear for us have been experimenting with textiles lately and have turned out some beautiful fabrics that have the added allure of novelty. Among them are the fiber-silk and worsted combinations classed as matelasse, which present a lustrous surface covered with motifs in contrasting or self color. They follow the successful printed patterns on knitted textiles used for sports coats.

These new patterns in knitted goods are making their appearance in handsome frocks which have all the character of those made for afternoon wear. This is a hitherto unoccupied field, for knitted fabrics have been identified with sports clothes where they have been entirely successful. Sports suits and dresses, in heavy and light weights, and greatly varied in texture by variations in the knitting, are beginning to vie with sweaters in variety of design.

Another field has been invaded by the knitted dress of wool. It is a comfortable and sturdy garment for the little school girl and appears in slip-over frocks in one color with decorations in contrasting colors knitted in. A gray or blue dress in a plain, close stitch, has bands of red, orange and green about the bottom of the skirt and sleeves, and around the waist. A narrow knitted silk girdle at the waist and a similar tie at the neck, match the dress in color.

Very attractive knitted trimmings of wool yarn are used on dresses and suits of Jersey cloth or to finish knitted dresses of fiber silk. These trimmings are knitted in many ways, those of wool yarn in loops are among the most effective. Fiber silk makes some of the handsomest trimmings and dresses. It appears as a trimming on the overblouse of crepe de chine which is illustrated, worn with heavy crepe skirt. Very handsome tassels of the silk finish a soft girdle of the crepe de chine.

When a woman simply must have a wrap, usually it is a practical utility coat that is needed and these are the garments that move early and in quick succession from the merchant's assortment of new models. There is a demand for these smartly tailored, mannish overcoats right now and they appear in English mixtures, with plaid back, tweeds, velours and polo cloth. They are made with collars that may be buttoned up closely about the throat or worn open across the shoulders, they hang in full, loose lines, are ample in width and length and sometimes have belts or narrow girdles that are worn very loose. Tailors vary them in many ways and use patch pockets and large buttons to give them a snappy finish.

In a clever overcoat of tweed, in two-toned plaid, the tailor has contrived unusual sleeves having slashed cuffs ornamented with large buttons. The collar is the new "tunnel" design and these are little points that distinguish the coat illustrated from others of its kind.

The smart utility coat sells itself, to fill a definite need, but not everyone needs a coat, and there are some intriguing coat dresses calculated to coax money out of those who are not driven by necessity to part with it. They are handsome affairs that will serve without a coat for wear in autumn and with one for winter. One of them is shown here. It is made of men's-wear serge and has novel sleeves, with pendant panels finished with silk fringe. Loose straps, embroidered with silk floss and ending in long silk tassels, hang from the shoulders and the same embroidery finishes the collar, cuffs and sleeve panels. A small net vestee is revealed at the front, below the neck fastening and there is a very narrow girdle of the serge which ties loosely at a low waistline, confining the embroidered straps.

UNNECESSARY ALARM

They were sitting alone in the moonlight. "Maud," whispered Ernest, "you know I love you. Will you be mine?" "Alas, Ernest, I fear it cannot be." "Ah," gasped Ernest, placing his hand on his breast, "broken at last!" "What?" screamed the girl, throwing her arms about his neck, and her breath coming in great panting sobs, "I did not mean it, Ernest. Oh, speak; tell me what is broken, it is your heart?" No, my darling, only my collar stud, I felt it slip."

A Painful Contrast.

"I got even with an old school teacher who used to thrash me when I was a boy," remarked Mr. Wadleigh.

"How did you do it?"

"I gave him a lift in my limousine. The opportunity to calculate my income and contrast it with his salary probably spoiled his day."

Highly Educational.

"Do you believe the movies are instructive?"

"Certainly. Elderly ladies in little country towns who have never been out of the counties where they were born can tell you all about the underworld of Paris."

Worse Than "Dry."

Meenister—I hear they've gone dry in the village where your brother lives.

Sandy—Dry! Man, they've gone parched. I've just had a letter frae Tam, an' would you believe it, the postage stamp was stuck wi' a pin!"—London Tit-Bits.

APTLY TERMED

The Salesman: Something new in shirts? This pattern is the last cry in gentlemen's wear.

The Customer: Last cry, is it? I thought so. It reminded me of a death wail.

True.

I'll tell you this
That a sight worth while,
Is a traffic cop
With a genial smile.

The Proper Kind.

Sympathetic Lady—This man, warden, tells me he is interested in books. I believe I'll bring him some on my next visit.

Warden—Pocketbooks are the only books that interest him, madam.

Sententiously.

Arthur—Most people are not what they used to be.

John—How's that?

Arthur—Children.—Nebraska Awgwan.

And Such Prices!

"It's the woman who pays."

"Yes, but she does it with her husband's money."

Too Literal.

"Well, did you hire a flat from that agent?"

"I did not. I remarked that I wanted one big enough to turn around in, and hanged if he didn't ask me to stand up while he took my exact measurements."

Rural Roles.

"Are you serving your country or working for re-election?" asked the meddlesome person.

"Both," said the statesman. "As regards the first, I court the fullest publicity. As for the other, the less said about it the better."

Couldn't Find It.

"Where have you been?"

"Over Europe; and say."

"Well?"

"This realignment of nations has wiped out Graustark."

Playing Safe.

Apprentice—What is in this bottle with no label?

Chemist—That's what you use when you can't read the prescription.—Stockholm Kasper.

Color Needful.

"Why do they use such bright colors in bathing suits?"

"Sometimes a bathing suit fits so very close," replied Miss Cayenne "that colors are necessary to call attention to the fact that it is being worn.

No Cause for Alarm.

The Mistress—Really, Justine, you are wearing very pretty silk stockings.

The Maid—Don't be uneasy, madame; I got these at my last situation.—London Opinion.

POULTRY

AN TO PREVENT MOULTING

ural for Very Early Hatched Pullets to Go Through Partial Moult in Fall.

very fall we hear a number of reports of pullet-egg production being down by fall moulting. This is haps only natural when we consider that every one is working toward ly maturity and production by ans of better breeding early hatch- and heavy feeding. It is natural very early hatched pullets to stop ing and go through a partial moult fore cold weather. In addition to s natural tendency, the moult may hastened by any sudden change of d, care or environment. The fol- wing simple rules, if followed, will helpful to prevent this fall moult: 1. Avoid hatching out of season; rch, April and May are best, the act time depending on the breed. 2. Provide free range during the en- e season. 3. Avoid rations containing an ex- ss of protein. 4. Do not attempt to hold pullets ck, let them mature normally. 5. Have the pullets in their winter arters before production starts. 6. Avoid any sudden change in feed, re or management after production egins.—Connecticut Experiment Sta- on.

IFFICULTIES WITH TURKEYS

ard Work to Keep Flocks From Wandering Over Wide Area and Invading Other Farms.

Prepared by the United States Department of Agriculture.)

One of the greatest difficulties with hich turkey growers have to contend to keep their flocks from wandering er too wide an area and invading eighboring farms. To some extent, eeding heavily night and morning re- uces the area over which turkeys nge, but even then they often go too r. When trouble of this kind oc- urs, the most effective plan is to rive them into an inclosure and keep hem there until about noon.

In warm weather turkeys do most f their ranging early in the morning, nd by nine o'clock they are usually s far from home as they will get dur- ng the day. As soon as the sun be-

Turkeys Do Most of Their Ranging Early in Morning.

comes very warm they spend most of their time in the shade, until three or four o'clock in the afternoon, when they begin moving toward home, ranging for feed along the way. If the weather is not too warm they do not spend so much time lying in the shade, and consequently range over a larger area, and may keep moving away from home until noon. By feeding in the pen every morning they soon learn to go there on coming down from roost, and no time is lost in penning them. If they fly out of the pen after being fed, the flight feathers from one wing should be clipped.

KILLING OFF BEST CHICKENS

Housewife Makes Mistake in Getting Rid of Cockerels Because They Are Large.

The housewife who kills off her largest and best cockerels and pullets is not as much a poultrywoman as some people think. Often it is the cockerels that are the most valuable, yet nearly every farm woman thinks she is justified in killing off her largest chicks if they happen to be cockerels. It is not a very hard matter to get $2 and $3 for good, vigorous utility cockerels nowadays. Better be certain before you kill the next one.

GIVE OLD FOWLS ATTENTION

Hens Intended to Be Sold Should Be Fattened and Placed on Market Soon as Possible.

Just now your greatest attention should be directed toward the care of the old hens. Those that you intend to keep over another year should be given a separate pen where you can give them additional care and a special ration to meet their requirements, but those you intend to sell should be fattened and placed on the market as soon as possible. It doesn't pay to waste time in the culling work.

GOOD ROADS

FINANCING FUTURE HIGHWAYS

Make Plans Now and Place Transportation on Firm Foundation, Says Chief McDonald.

(Prepared by the United States Department of Agriculture.)

"Plan now the financing of highways for the future and place highway transportation, which has come to be an indispensable part of our national life, on a firm foundation." This is the advice given by Thomas H. MacDonald, chief of the bureau of public roads, United States Department of Agriculture, for the consideration of every voter, taxpayer and legislator.

"We are starting out to construct a system of highways such as no nation ever constructed before. The nearest approach to it is found in France and Germany, and the area of neither is as large as Texas. This great undertaking is being entered into because highways are not a luxury but furnish a real service, have a real earning capacity, and have become a national necessity.

For such an undertaking to be successful, financing to care for maintenance, reconstruction, and new construction should be planned for a long period of years in advance. Changes in methods of raising funds every few years, uncertainty as to whether funds will be provided, and periods in which funds are not provided all increase the final cost of highways. Such a policy would soon bring any private business to disaster.

"Development and increase in numbers of motor vehicles and the coincident need and demand for good roads have come so rapidly that methods of raising funds have often been expedients for the time being. Consideration has been given not so much to the just distribution of the cost as to how the funds can be raised with the least controversy and the utmost ease.

"All this leads to the conclusion that the whole situation should be gone

A Concrete Road in Wayne County, New York.

over very carefully, traffic studies made, and the cost distributed in proportion to the service rendered.

"The bureau of public roads estimates that of the $600,000,000 spent for highways last year 33 per cent was federal aid and motor-vehicle revenue. The remaining 67 per cent comes either directly or will eventually be paid from state and local taxes. It is believed that a very considerable readjustment of the source of revenues must be made so that a larger percentage will be paid by the road user and a lesser percentage from state or local taxes."

LIGHTED CIGARS DANGEROUS

Discarded Butt or Cigarette Thrown on Wooden Floor of Steel Bridge May Cause Fire.

(Prepared by the United States Department of Agriculture.)

Don't throw away your cigar or cigarette when crossing a bridge with a wooden floor, advises the bureau of public roads of the United States Department of Agriculture. It may start a fire that will destroy the bridge.

Many such fires are started. Most of them are put out with small damage, but occasionally a large structure is destroyed. It seems strange that a steel bridge should be destroyed by fire, but heat from a burning floor may cause the destruction of the whole bridge by softening; the breaking of one weakened member will cause the whole span to drop into the river. On some large bridges a watchman is kept to guard against this danger, and in a dry season fires have been known to occur daily.

A committee composed of a representative of the bureau and representatives of the national board of fire underwriters, the lumber and creosote industry, and the Engineering News-Record, a prominent engineering magazine, is now investigating the subject and considering the best means of protection.

Road Repair Big Industry.

As more than a million men are now employed in building and repairing public roads the highway building industry is believed to have become the largest in the United States.

Warning Signs in Missouri.

The Missouri state highway commission is planning warning signs along 7,700 miles of highway.

Most Important Crop.

Hay is one of the most important crops grown in the United States.

MEXICAN BEETLE SPREADING FAST

Already Established in Several Southern States and Expected to Migrate North.

RESISTANT CROPS WILL HELP

Insect Feeds on Many Table Beans and Other Legumes—No Satisfactory Means for Control Has Been Discovered.

(Prepared by the United States Department of Agriculture.)

Cropping and cover-cropping methods in the South are likely to be radically affected if the Mexican bean beetle lives up to the predictions made by the bureau of entomology of the United States Department of Agriculture. It is expected that the bean beetle, which is already established in 36 Georgia counties, as well as in 35 in Alabama, 34 in Tennessee, 2 in Kentucky, 2 in North Carolina and 3 in South Carolina, will probably be distributed southward, and westward to the Mississippi river, as well as following the main direction of spread, northward to the Michigan and New York bean areas. At points in Tennessee where it was found only after close inspection in 1921, the beetle is now causing great concern among growers.

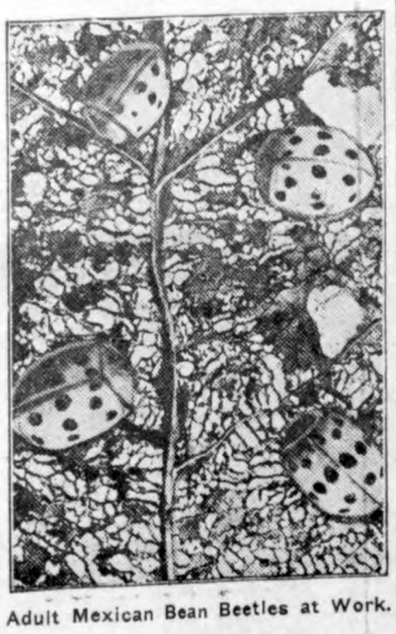
Aids in Solving Problem.

A study of the situation and some experimentation in advance, in planting resistant crops, are recommended as aids in solving the problem for the fruit grower and general farmer. Certain legumes, including the mung bean and the horse bean, have been found resistant to the bean beetle. The immature beetles or grubs do not feed on the velvet bean, and the adult beetles often starve if no other food is present.

The food plants of the Mexican bean beetle are so important as soiling and green-manuring crops in the farm practice of the southern states that the future of southern agriculture is seriously imperiled. The insect feeds on many table beans and other legumes, including snap, lima, pinto and navy beans, soy beans, hyacinth beans, cowpeas and cultivated beggarweed, and occasionally on sweet clover and alfalfa. In Colorado and other western states where the Mexican bean beetle has existed for years the attacks have been confined practically to table beans, and not over two generations or broods are produced annually between June 16 and September 15. In Alabama, however, four and even five generations have been observed with continuous breeding from the latter part of March to the first of November. If the bean beetle gains a foothold in Florida from five to seven generations might be expected.

Study Made of Pest.

The bureau of entomology maintains a laboratory at Thomasville, Ga., in addition to the one at Birmingham,



Adult Mexican Bean Beetles at Work.

Ala., for the study of this pest. No satisfactory recommendations for control, other than changes in cropping, have yet been worked out, although the department has been studying the problem since the discovery of the pest in Alabama in 1920. The Mexican bean beetle threatens to become even more serious in effect than the gypsy moth, the hessian fly, the European corn borer or the boll weevil. The total money valure of crops destroyed is not less than $100,000,000 annually, of which damage to table beans alone is at least $50,000,000.

TIME TO CUT SWEET CLOVER

If Allowed to Blossom and Mature Stems Get Woody and the Leaves Will Shatter Off.

As a rule, sweet clover should be cut just as the blossom buds appear, because if allowed to blossom and mature the stems get woody and the leaves shatter off. The height of cutting is important. In order to get a second crop the second year the first crop of the second year's stand should be cut eight inches above the ground. This is because the plant does not propagate from the crowns at this time, as alfalfa does, but from buds on the lower portion of the stalks. So if the first crop in the second year is cut too low so as to nip off those little branches that bear the shoots, there simply will not be any second growth.

FIGHT TUBERCULOSIS IN VARIOUS STATES

Campaign Against Great Stock Plague Gaining Impetus.

Many Communities See Possibility of Ending for All Time Drain Upon Their Live Stock Resources —Louisiana in Line.

(Prepared by the United States Department of Agriculture.)

As the possibility of eradicating tuberculosis in cattle becomes apparent to a greater number of people, the campaign against the great live stock plague gains impetus. States and counties that had given little thought to this work from the economic standpoint are now taking it up in a businesslike manner, says the United

The Kind of a Cow That Will Pay Any Farmer.

States Department of Agriculture, because they can see the possibility of ending for all time this drain upon their live stock resources.

The latest state to fall into line for practical tuberculosis eradication work is Louisiana. On June 29 the legislature passed a bill authorizing the state live stock sanitary board to co-operate with the United States Department of Agriculture, and providing an indemnity fund of $15,000 a year for two years. A small amount of eradication work had been done there before, but because no money was provided for paying indemnities for slaughtered animals almost no progress was made. Since the state has only a light infestation of tuberculosis, estimated by the bureau of animal industry at 1 per cent, it should require only a few years of such appropriations to free the cattle entirely.

Massachusetts, a state that has been spending money to fight tuberculosis of cattle since 1894, recently passed a law enabling the state bureau of animal industry to co-operate with the United States Department of Agriculture. About $60,000 a year will be provided to pay indemnities on the co-operative basis with the federal government.

RAPE IS FINE FORAGE CROP

Crop Makes Rapid and Rank Growth and Affords Highly Nutritive Feed for Hogs.

Because of its heavy yielding qualities and high protein content, rape is one of the best of our forage crops, says J. C. Eldridge of the Iowa State college. No hog breeder should be without a small patch of it unless other excellent pasture is provided. Rape makes a rapid and rank growth and affords highly nutritive feed for hogs early in the season and later when the blue-grass pasture is about gone.

Rape may be sown any time until late in the summer. Early planting will insure higher yields, however. Rape is also excellent as an emergency pasture crop when other forages have failed to make a stand. Where it is intended to hog down corn, a good practice is to plant a small patch of rape adjoining the corn field, thus providing a balanced ration for the hogs late in the summer.

Some slight precaution is necessary in handling the rape pasture. It should be pastured only lightly at first and hogs should not be turned in early in the morning when a heavy dew is still on the rape. White or thin-skinned hogs blister in such instances.

Sow rape alone 4 to 6 pounds to the acre. Use the Dwarf Essex variety only, as it has been found to be best for our conditions.

EXHIBIT GOOD AND BAD PIGS

Boys' and Girls' Clubs in California Community Show Results of Proper Feeding.

At an exhibit held recently at the close of a pig club conducted by the boys' and girls' club agent in Riverside county, California, both good and bad types of pigs grown by club members were shown, with initial and final weights, feeds, costs, and gains of both types. Two pigs out of the same litter, each fed 150 days, were entered; one gained 70 pounds at a cost of 18 cents a pound, the other gained 206 pounds at a cost of 9 cents a pound.

INDIVIDUAL HOUSE IS BEST

Some Are Built So That Sides May Be Raised for Needed Shade During Hot Weather.

Some producers build individual hog houses with sides that may be lifted to provide an increased amount of shade during the summer months. This plan furnishes shade for hogs where only a few are kept.

LIVE STOCK NEWS

LIMIT TO USE OF MOLASSES

Test Made by Department of Agriculture in Co-Operation With Alabama Station.

(Prepared by the United States Department of Agriculture.)

That there is a limit to the quantity of blackstrap molasses which can be added with economy to a ration of 5.4 pounds of cottonseed meal and 46 pounds of corn silage for fattening yearling steers was shown in a test made by the United States Department of Agriculture in co-operation with the Louisiana experiment station.

Two lots of nine 700-pound steers were fed for 112 days. Forty-six pounds of silage per steer per day was practically the limit of their capacity. Lot 1 was fed 5.42 pounds of molasses per steer daily, while lot 2 was fed 8.07 pounds of molasses per steer daily. As lot 1 gained 2.48 pounds per steer daily, while lot 2 gained only 2.41 pounds per steer daily, it is evident that 2.65 pounds of molasses was wasted daily per steer in lot 2. The results in lot 2 might have been more favorable to the use of so much molasses had the cotton-

Steers Grazing on Pasture in South.

seed-meal ration been reduced to 3.5 or 4 pounds. In the test, lot 1 consumed 1,880 pounds of silage, 218 pounds of cottonseed meal, and 218 pounds of molasses per 100 pounds gain, while lot 2 required 2 per cent more silage, 3 per cent more cottonseed meal, and 54 per cent more molasses to produce 100 pounds of gain.

ROOTING NATURAL FOR HOGS

While It Probably Helps Make Muscle It Is Otherwise of No Particular Benefit.

Why do hogs root? Will rings or other means of prevention have any detrimental effect on the health and progress of the animal? Experts at the Nebraska State College of Agriculture say rooting is just one of the natural proclivities of swine. While it probably does help make muscle, it is otherwise of no special benefit and has no particular significance. The fact that hogs show a strong tendency to plow up alfalfa fields or tear out foundations of the buildings is no indication that they are not getting proper feed. There is no basis for the statement that rooting results from lack of mineral or protein in the ration. Hogs root for worms, roots and other food, but they seem to thrive just as well when a check is placed on the extensive use of their snouts. They also root to make a cool bed on a hot day. There is no reason why rings should not be used where hogs do material damage rooting.

EFFICIENCY OF WORK HORSE

One of Chief Factors During Hot Weather Is Quantity and Quality of Feed Received.

One of the factors that materially affects the efficiency of the work horse especially in hot weather is the feed he receives and the manner in which he receives it. In order that a horse may do a full day's work regularly throughout the summer months and yet maintain a presentable condition he must be fed just about to his full capacity. In order to do this and not injure his health, care and judgment must be exercised in the selection of feeds used.

The feeds best suited to form the principal components of the ration are good bright clean timothy or upland prairie hay and bright, clean, sound oats. The average horse weighing 1,500 pounds will require about 20 pounds of hay and 22 to 24 pounds of oats a day.

LIVE STOCK HINTS

Work horses should have an opportunity to eat all the salt they care for.

* * *

Keep the live stock supplied with water during the hot days of summer.

* * *

There is a wide variation in feed requirements of different horses of the same weight.

DAIRY FACTS

PRACTICE OF PASTEURIZING

Dealers Know That Milk So Treated Keeps Better and Prevents Spread of Disease.

(Prepared by the United States Department of Agriculture.)

The practice of pasteurizing milk is growing rapidly in the cities of this country, as shown by figures collected by the United States Department of Agriculture. Through pressure of health departments and through voluntary action by milk dealers, plant after plant has been switched over from raw milk. It is now generally recognized by those who have studied the problems of milk supply, that proper pasteurization does not injure the chemical or nutritive properties of milk, and that it does destroy all bacteria that may produce disease. Milk dealers know that milk so treated keeps better and satisfies customers, and that it prevents outbreaks of disease which might cast discredit on their product and injure their business.

With these facts in mind it is easy to see why the practice has grown. In 1915 only 77.8 per cent of the cities with population of more than 500,000 reported more than half of their milk pasteurized, while in 1921 every city in this class had a milk supply more than 50 per cent of which was pasteurized. In 1915 more than 10 per cent of the cities of 75,000 to 100,000 people had no pasteurized milk, but during the past year all of them had some part of the supply pasteurized.

The increase in pasteurization in small cities is particularly striking. Take, for example, those from 10,000 to 25,000 population. In 1915 about 40 per cent had pasteurized milk, but in 1921 nearly 61 per cent had it. Even in cities below 10,000 population pasteurization is becoming more common.

KEEP CREAM DURING SUMMER

If Cooled to 50 Degrees Promptly After Separating It Will Keep Several Days.

The dairyman must figure a way to keep the cream in good condition during the hot weather months. There is always someone saying "cream can't be kept sweet very long during the summer months," but it has been proven that cream cooled to 50 degrees shortly after separating can be kept sweet for several days.

To accomplish this, it is necessary to have a cooling tank. Such tanks may be bought from the dairy supply houses, but if only a small quantity of cream is produced a homemade tank will do the trick. This tank is made as follows:

Take a water barrel and around it make a box about 3 feet square by about the height of the barrel, insert a pipe leading from the pump into the

Cooling Tank for Cream.

barrel extending to the bottom. An overflow pipe is then placed on the opposite side of the barrel leading to the outside of the box. This overflow pipe should be placed as high as the neck of a large cream can. The intake pipe from the pump should extend to the bottom of the barrel as the warm water then rises and overflows.

The space between the box and the barrel is filled with sawdust or other insulator and the box finally covered to the edge of the barrel. A close fitting lid is then placed over the top of the barrel and completes the tank. When a partly filled can is set down a stick across the barrel above the can will help to hold it down.—A Miller, in the Farm and Home.

METHOD OF RAISING CALVES

Most Economical to Make Use of Good Calf Meal on Farms Where Whole Milk Is Sold.

Where whole milk is sold, undoubtedly the most economical method of raising calves is by the use of a good calf meal. Calves that have been raised properly on calf meal make just as good cows as those raised on whole milk or skim milk.

When Cow Holds Milk.

When a cow persists in holding her milk, a common remedy is to attempt to divert her attention from the operation of milking by providing some tempting food.

Drawback to Dairy.

Perhaps the greatest drawback to the dairy business is that a cow will produce a little milk, no matter what she is fed. Too many dairymen are satisfied with that little bit.

Methods Work Well.

The methods aren't the same, but one works as well as the other—culling hens and culling cows.

Be Regular With Calves.

Be regular in the various operations performed in caring for the calves.

Garner - Iowa

There is a difference

The Badge of Certainty — Northland — of Quality and Uniformity

Northland

SUPERLINE MOTOR OILS are of such high quality because they are refined from pure Pennsylvania crude. Pure Pennsylvania crude is better than any other because Nature made it that way. There is a difference in trees, grain, people—in fact everything. This difference is not brought about by human hands—Nature made it that way. Oil is no exception.

The interior of your house may be trimmed with lumber that is dressed ever so smooth; the joints may have been fitted ever so well, but it will not stay well fitted and will be easily damaged by bumping something against it if it isn't of good material.

Oil may be ever so well refined. The best workmanship may have been employed, but it isn't so good if the raw material is not of the best provided by Nature.

Ask Your Dealer

for NORTHLAND SUPERLINE MOTOR OIL. Better lubrication—much less carbon—use less of it.

The Charwoman's Husband—Well a'am she was so bad last night I d to go to the pictures by myself.

YOUNG KLEMME MAN SERIOUSLY BURNED WITH GASOLINE

Blow Torch Explodes While Working Back Of Garage

Levi Ridder received severe burns from gasoline last Thursday while working in the shed back of the F. H. Ridder garage. A gasoline blow torch. which he was using exploded and threw gasoline on him and then caught ablaze. His father was close by and extinguished the flames with a chemical gun but not until Levi had received bad burns on one leg and arms. He is gettinkg along well at this writing but will have some ugly scars to show for his experience.

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Please remember the change of time in our services for next Sunday morning:—

Morning sermon at 11:00 o'clock followed by the Communion of the Lord's Supper.

Epworth League service at 7:45 p. m. followed by a literary program.

Chior practice Tuesday evening.

Prayer service Thursday evening in side room of the church.

The people of Liberty church will worship with us next Sunday morning.

On Friday evening the Epworth League will give an ice cream social on the church lawn to which we invite all who desire to come and hav a good time. See special notice in this week's issue elsewhere.

EPWORTH LEAGUE NOTES

Come to the Epworth League meeting Sunday night and hear the interesting topic on education, "Investing My Mind." This should be a lively meeting. Miss Minnie Lenz is the leader.

And you Klemme and Liberty twp. Leaguers, remember the big social on the church lawn this Friday evening. We intend to have a lot of fun this time, and have good live games and plenty of refreshments. The "wind-up" will consist of a grand "weenie" roast. There will be a stand where you can purchase good home made ice cream and candy. The proceeds to go toward League expenses.

.METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning Worship.....10 A. M.
Sunday School.....11 A. M.
Evening Worship.....8 P. M.

Arthur B. Gedye, Pastor.

Thursday evening, 7:45 ok'clock, for fellowship and prayer held in the church.

The Win One Sunday school class have elected officers for the coming year; Verner Nelson, President; Mrs. Ben Coobs, Secretary; and Miss Mabel Smith, Treasurer. The Class will hold a party at the home of the President, Verner Nelson, next Tuesday evening. Every membker is invited to be present. The teacher of the Win One especially asks that there may be a good attendance on Tuesday for he has an important proposition to put before the class.

Let us have a good attendance on Thursday night at the fellowship meeting.

BOY SCOUT CORNER

The regular meeting was held on Monday night at which plans were made for a hike to Ventura Heights on the following day. Scout Scribe Wellemeyer gave an interesting talk on Radio-phone, in which the troop took part in discussion and questions.

Freddie Arnold has received his registration certificate from National Headquarters and is now Assistant Scoutmaster of the Klemme Troup.

Everyone enjoyed the hike to Ventura Heights on Tuesday.

Regular meeting Monday, September 4 at Headquarters.

A. S. M. Arnold elected Troop Bugler at last meeting.

A man from Chicago entered a barber shop and settled in the chair of an Italian tonsorialits.

Naturally, the barber struck up a conservation, during the course of which he asked the customer from whence he came.

"Chicago", the man answered.

"Oh, Chicago," said the barber "Why I shaved one of your countrymen yesterday.—Indianopolis News.

IDLE AND MISCHIEVOUS

"In 1920 we, as a people, made up our minds that we would not permit a billion dollars a year of our hard earned money to be thrown away upon paying war wages to shirkers and running railroads at a loss. We as a people, heve not changed our minds, but the conspiracy to force us to do so is palpable."—Wall Street Journal.

Whatever your policy for the future may be, we can at least afford to face the facts of our past experience candidly. It is not realy worth while to face them in any other way if we expected to learn anything of value for the future.

The theory on which war railroading was done was plainly stated by Mr. Hines many times and nobody will question that Mr. Hines was a railroad man of standing. War railroading was treated as a war emergency, to be paid for out of war emerg ency taxes and not out of freight and passenger rates advanced, as they must have been , almost prohibitively.

We shall learn nothing at all from our war experience with the railroads so long as the Wall Street Journal and others like it insist on misrepresenting what it has done.

Everybody of any intelligence knows that it cost something to mobilize the railroads to move men and munitions and supplies as we moved them during the war years. and somebody had to pay. Mr. Hines and the others in control put the burden on the war emergency tax fund along with the other unusual costs of war. To talk of this as "a billion dollars thrown away" is merely to darken counsel with words, something we have always been warned not to do—Des Moines Register.

IOWA CORN SONG IS FAMOUS

E. E. Taylor, of Traer, Tama county upon his return from a western trip, marveled at the prominence that has been given Iowa because of its famous corn song. Mr. Taylor's comment reached the Sioux City Journal and that paper proceeded to state tthat both words and music of the famous song were written by John O. Knutson of Sioux City. It constitutes the most effective bit of advertising for the state and its leading industry that has been devised up to date. It has spread the name and fame of Iowa to the remotest sections of the country and even to foreign lands. It is sung by Iowans where ever they travel and whatever their business may be. It is played by bands on parade. It is adapted and adopted. Iowa's neighbors in the middle west— everyone from the land of the tall corn—claim it and proclaim it with a zest equal to that of Iowa's. Other states have their songs, but none is eqsual to the Iowa Corn song in catchiness. The song is short and to the point: "We're from Iowa, Iowa. State of the Tall Corn Grows.

LOOKING FOR TROUBLE

Parties Who Blocade Roads May Find Lots Of It

State officials have been here this week inquiring into the case where the road just north of Chapin wah blocked with a rope a week ago last Sunday night, when two auto travelors were forced to stop their cars and get out and cut the rope in order to proceed.

There is a heavy penalty against blocking the highway, and it is well that there is a penalty provided First, because no person has any right to blocade a highway except on official business. Second, travelers are to be protected from holdups, and when they find a road blocked day or night, without any seeming reason, they are justified in using revolvers on any gang of boys or men who are blocking the roads just for thet fun they are getting out of it. The travelor is not expected to know that the road was blocked for a joke. Thugs and robbers do these same stunts when they want to stage a holdup. —Hampton Chronicle.

Willis—Didn't your wife bawl you out last night when she woke up when you came home?

Gillis—No; I fooled her. I stood in the hall an hour, delivered a lecure on civic righteousness, told a bedtime story, sang three grand opera selections. and she thought sne had forgotten to turn off the radio. —Kansas City Star.

WHEN LIFE WAS SIMPLE

Uuless it has something to do with airplanes or motor cars or with the more vigorous and spectacular games like tennis or baseball, it is not likely that the announcement of a coming national tournament will get much attention from us. And when we learn that the tournament in question is to decide the national championship in horseshoe pitching we are inclined to yield it even less than passing notice.

In an age when we demand for diversion nothing short of headspins on the wings of a rushing airplane; when a game of auto polo is an ordinary occurence only occasionally thrilling us. and when a ball player has to be a conistent home run hitter, we are likely to wax enthusiastic over horseshoe pitching.

And yet this ancient pastime is not without merits. More keenly than ever should it today challenge our attention, for it goes back to a time when life was simpler. It carries us to remote countrysides and lanes at a time when the noise of the world was barely making itself heard even in the great cities. Quiet days those! when men got their excersise at their work, and did'nt find it necessary, as men do now, to work at their play.

The game of horseshoes satisfied to the full the simple desires of a simple life. It did not take years of most exacting toil to perfect one's self in it; one improved with practice, of course; one may become exceeding skillful at it, but the nerve-racking apprenticeship needed for perfection in a game like tennis, for instance, is not neded to enjoy pitching horseshoes.

Mason City Globe Gazette.

A POOR EXAMPLE

To take a chance and when caught confess and pay the penalty with a smile is good sportsmanship as we understand it and in keeping with rules of fair play. The average man, therefore, is inclined to applaud the chief justice of the Ohio Supreme court who was arrested for speeding the other day. He said he was in a hurry to get to golf links, pleaded guilty and was fined.

It would have been amusing if the municipal court justice had seen fit to givee his superior on the bench a lecture on the law and the necessity for upholding it, but such a lecture was not undeserved. The chief justice know as well as anybody that his conduct should be almost beyond censure and an example for others less prominent.

Traffic laws are to prevent accidents and to decrease the appalling number of deaths; they are for the safety of the many, and should be respected as are other laws entailing more severe penalties. It is good sportsmanship to take a chance, but to endanger the lives of others. recklessly, in order to keep an engagement for a golf match is the worst kind of citizenship. The small fine imposed by no means indicates the gravity of the offence. —Mason City Globe Gazette.

THE SIGNERS

Robert Morris

Robert Morris, signer of the Declaration of Independence from Pennsylvannia, was born at Lancashire, England, January 20, 1734. Emigrating to America, he engaged in business in Philedephia. He was strongly opposed to the stamp act. and signed the non-importation agreement of 1765. He was chosen as a delegate to the continental Congress in 1775. He voted against the Declaration of Independence on July 1.but signed it three days later. On July 20, 1776, he was elected to Congress and again in 1777. He was instrumental in establishing a bank in 1780, by means of which 3,000,000 rations of provisions and 300 hogsheads of rum were procured and forewarded to the needy soldiers of the Revolutionary Army. In 1781 he was elected superindentent of finance, serving until 1784. He established the bank of North America. For several years he was charged with the affairs of the navy. He was a member of the convention which framed the Federal Constitution and served in the first United States Senate. In 1784 he sent out the first American vessel that ever appeared in the port of Canton, China. He died at Philadephia in 1806.

Talking about waste. what it the matter with a bathing beach that is only used three months in the year?

Farm North Of Here Destroyed By Fire Monday Morning

ORVILLE BURGESS AND MISS EVELYN TIERNEY MARRIED

Brother of Mrs. M. O. Barr Of This Place Marries Garner Girl

M. O. Barr gave us an interesting news item the other day when he told us that his brother-in-law, Orville Burgess was now a married man since last Thursday.

Orville Burgess, formerly of this place, but more lately of Garner where he has been working in a garage, was united in marriage to Miss Evelyn Tierney, of Garner, at Spencer, Iowa, last week Thursday.

The Bride is a daughter of Editor and Mrs. J. E. Tierney of Garner. She is a young lady of fine qualities and will make Mr. Burgess an excellent life-mate.

The Bridegroom is well known in Klemme having lived here off and on for the past two years. He is a fine young man and an excellent auto mechanic, which trade he now follows.

We did not learn where Mr Mrs. Burgess will reside but we wish them the best in life and may joy and happiness be their's.

WHAT THIS COUNTRY NEEDS

What this country needs in not a new birth of freedom. but the old-fashioned $2 lower berth.

What this country needs isn't more liberty but less people who take liberties with our liberty.

What this country needs is not a job for every man, but a man for every job.

What this country needs isn't to get more taxes from the people, but for the people to get more from the taxes.

What this country needs is more tractors and less detractors

What this country needs isn't more young men making speed, but more young men planting spuds.

What this country needs is more paint on the old place and less paint on the young face.

What this country needs isn't a lower rate of interest on money, but a higher interest in work.

What this country needs is to follow the footsteps of the fathers instead of the footsteps of the dancing master.—St. Paul Crescent.

WHITTEMORE OFFICER NABS ALGONA MASHERS

There is a rather common practice of boys and young men driving around town of an evening, and when they see a bunch of girls they swing to the curb and intreat them to go with them for a joy ride said last week's Whittemore Champion. "Sometimes the boys are rather insistent in their demands. Last Sunday evening four lads weree driving around pulling off such a stunt and, stopped four Whittemore girls, some of them were hardly in their teens. It just happened that Marshall Ed. Walsh was close by and he collered the lads before they could get away. They told him their home was in Algona, and that this was their first visit to Whittemore. Mr. Walsh invited them to visit the mayor, and then they began to beg like good fellows. They solemnly promised that if he would let them go they would never come to Whittemore again, and that they would never bother the girls again. Mr walsh being of a kind disposition let them go on their way, and they exceeded the speed limit in getting out of town. Algona boys are not the only ones disturbing the young ladies out walking, our own boys are just as handy as any of the outsiders. Some day some of them will get piccked up as an example to others."—Whittemore Champion.

The Early Bird

Every Sunday afternoon Robert's mother would take him on her lap and show him pictures in his Bible for little folks, and at the same time explaining them to him.

One Sunday the pictures happened to be martyrs thrown to the lions.

She explained to him very solemnly the picture trying to make him feel what a terrible thing it was.

Robert was very still, then all of a sudden exclaimed, "Mama, oh, mama! just look at that poor little lion way behind there, he won't get any."

FARM NORTH OF KLEMME THE SCENE OF BAD BLAZE

Nearly All Buildings Destroyed By Fire On Melin Whitesell Farm Early Monday Morning

The Melvin Whitesell farm, four miles north of Klemme on the Wilson Highway, was the scene of a bad fire which was first noticed at about eight o'clock Monday morning. At that time the roof of the barn was all ablaze and it was seen that the fire could not be controlled to save the other buildings near by and so efforts were directed to saving the house.

A large barn, a good sized granary containg 3,000 bushels of oats, corn crib, 200 bushels of corn, some hay, some machinery and harnesses were destroyed..

The fire was on Mr. Whitesell's south farm and was tenanted by Mr. C. C. Nelson, who will be the heavy loser as he had no insurance on the grain or insurance. Whitesell carried some insurance on the buildings.

Most of Mr. Nelson's good machinery was standing under the trees as he had used it recently and had not as yet put it away in the sheds, but he will loose quite a large sum any way.

WHEN THE SCHOOL BELL RINGS

Many Will Go To Garner This Year

As far as we can learn, the entire graduating class of the Klemme High School will go to Garner this year to complete their twelfth grade work with the exception of Miss Glenna Gruetzmacher. who will attend Britt High School. Howard Wiles, Adolf Lauritzen, Donald Stille, Edwin Bock, George Bergmann, Edna Bergmann, Pearl Johnson and Fred Arnold will all go to Garner. Fred Arnold was forced to quit last year on account of sickness and so will take up his studies this year again. Miss Gruetzmacher will go to Britt as her brother, Harold and wife are on the teaching staff at Britt this year and she will stay with them.

Prof. L. Neese, former instructor here, and lately of the Ventura consolidated school, will head the teaching staff here this year. The other teachers are the same as last year.

A JOB FOR YOU, MR. READER

Too many people seem to think their duty of citizenship ends when they vote and obey the law. Having put a man in office they stand at ease until the next order come to resume the political march. Unless there be a rapid awakening the time is not far distant in this territory when an object lesson will force the taxpayers to realize they must be on th job and that they are a part, in fact the most important part of h government. The lesson will come in the shortage of coal. We are basking now in the heat of summer but it will not be long before the fires and furnaces must be lighted. Any thinking man knows there will be a coal shortage. The conditions in the local coal yards are well and the increasing difficulty of obtaining fuel can be learned by any one who cares to inquire. If the people had been alive to their duty they would not be today caught between the millstones, the coal barons on the one hand and the labor leaders on the other squeezing out their lives. The public could have ended the strike in short order. But the public remained indifferent. Warm weather was no time to get excited about a possible coal shortage. The coal barons have not worried. They don't care whether there is a shortage or not. will arrange their output by fixing prices.

Even toady the individual remains pathetic. If every man and woman were to writ a letter to our Congressman, and our two United States Senators, particularly the Congressman, asking what steps are being taken to protect his district and demanding that he see that we obtain an adequate supply of coal, something might be done. There are plenty of letters written for free seeds. Why not a line on fair priced coal Let our Congressman see we are on the jobk and that we expect him to do what he can to protect the people who seen him to Washington. —Winnebago Republican.

Romance Ends in a Grand Row

Jack Sanborn and His Bride Part and Skeletons Rattle in Family Closets.

KIN INVOLVED IN CHARGES

Young Wife Says Husband, Knee on Her Chest, Forced Her to Sign Paper Accusing Her Aged Guardian Uncle of Abuse.

New York.—Staid citizens of Boston as well as of this fair village, debs and subdebs, are getting thrill after thrill as the bones in a dozen family closets are rattling loudly and ominously.

The long buried family skeletons started on their rampage about the time the five-months' romance of young Jack Sanborn and his bride, Eleanor Montgomery Sanborn, blew up with a bang that was heard from Cape Cod to Sandy Hook.

Sanborn is a son of Oren Sanborn, of coffee fame, and his bride was the ward of W. Robert Montgomery, former president of the Hamilton National bank here.

Marriage Made to Order.

Their marriage was made to order. The Sanborns were desirous of marrying off their son, according to reports, and Montgomery, his past unknown, was anxious to see the girl married.

The eighteen-year-old bride charges that Sanborn deserted her after five months of wedded life.

Then came more scandal. In possession of the Sanborn lawyers is a letter signed by Eleanor in which she charges that her aged guardian uncle abused her before her marriage.

But says she:

"I signed that paper because Jack held me by the throat, put his knee on my chest and threatened to kill me unless I would write what he told me. He wanted to get $100,000 out of my uncle."

When Uncle Robert heard about the letter and the charges it contained he threw them both out on their own resources. Up to that time he had been supporting them.

Now Eleanor is living in a hotel here with girl friends.

Uncle Refuses to Forgive.

She has tearfully begged her uncle to accept her version of the charges and forgive her but he has shown no sign of relenting.

"I'd heard of lounge lizards around the lobster palaces of New York, but I never heard of such a thing in Boston until I discovered that Jack was hired out as a dancing partner, on a taxi meter basis at the Colonial hotel."

More skeletons. Eleanor's parents. Dr. and Mrs. Edward Montgomery are divorced. So are the Sanborns, Sr. Uncle Robert was convicted of grand larceny ten years ago while president of the Hamilton National bank and now the Sanborn lawyer is deciding on what action to take with the letter of charges placed in his hands.

And Mrs. Eleanor Sanborn, who four months ago was a principal in one of the most brilliant weddings of the season in Boston, is now deserted by her husband, cast off by her parents, spurned by her guardian uncle and compelled to seek shelter with friends.

Missing 42 Years, Returns, Rich.

Allentown, Pa.—Charles Kressley had no use for a stranger who called and offered him a fancy price for his fine home. The stranger next begged Kressley to allow him to tell his fortune, and grudgingly he consented. The fortune teller revealed such remarkable facts about his past life that Kressley was amazed. Then a great truth dawned on him. The visitor was his brother, Elias, who left for the West in 1880. Since that time he has made a stake mining gold in Colorado and is rich.

JIM BRIDGER'S GRAVE

Here is the tablet on the grave of Jim Bridger, famous old frontier scout and Indian fighter, in Kansas City, Mo. When Jim first told the "outside world" of the wonders he had discovered as the first white man to enter what is now Yellowstone National park, the world promptly called him a liar. But the wonders were there—are there—and the great national playground has just celebrated its golden anniversary.

UNEARTHED BY PROF. MILLER

Geologists Gathered Many Fine Flints and Also Explored Two Rock Houses That Are Promising Grounds for Work of Archeologists.

Lexington, Ky.—Ruins of what once was a flourishing "munitions factory" are sheltered in a cave 14 miles east of Mill Springs, in Wayne county, Kentucky, in the opinion of Prof. A. M. Miller, head of the department of geology at the University of Kentucky.

This factory, according to the belief of Professor Miller, produced arrow heads to tip the shafts of Indian braves to whom what is now Kentucky was no-man's land in the days before the squirrel rifle supplanted the bow and the broad ax the tomahawk.

Professor Miller returned recently from a trip to Wayne county, where in addition to re-examining interesting invertebrate fossil-collecting horizons visited 25 years ago in company with an Ohio geologist, Prof. August Foerste of Dayton, he said he prospected the region for caves, rock houses and old Indian village sites, favorable ground for archeological exploration and the finding of extinct mammalian remains

Finds Many Arrow Heads.

"Two rock houses and one cave were examined," he said. "One of the rock houses was in the coal measure conglomerate at Denny's Gay, about 14 miles east of Mills Springs. Numerous arrow heads in various stages of completion, together with flint-flakes scattered at a shallow depth over the floor of an overhanging conglomerate, constituting the rockhouse at this point, furnished abundant evidence that this shelter formerly was inhabited by aborigines and that they had established there an arrow-head workshop."

The other rock house, opening widely to the south, was near the Mill Springs camp, in the Mammoth cave limestone. This house, according to Professor Miller, is a most promising spot for both archeological and mammalian paleontological exploration. Half an hour's prospecting with geological hammers and a hand pick showed that every shovelful of deposit on the floor of this shelter was "pay dirt," he said.

Wealth of Fragments.

A wealth of bone and pottery and flint fragments were unearthed, as much as persons could carry away.

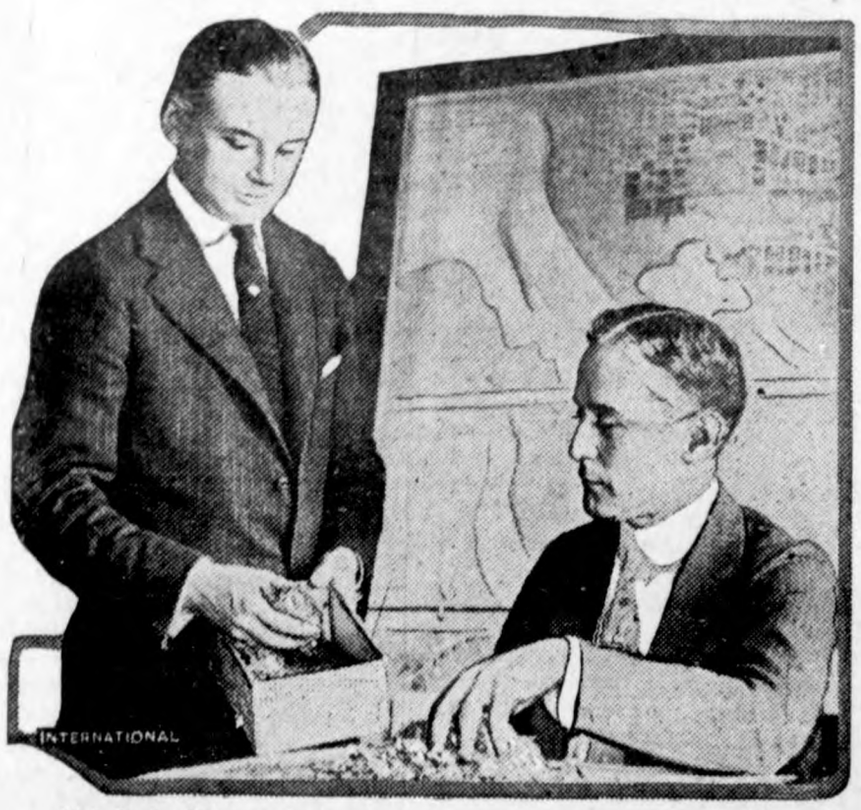
The large amount of fine material on the floor of this shelter, which could not have been washed in from the outside, filled everywhere with charcoal, ashes, fragments of pottery, arrow points, flint flakes, bone fragments and teeth, prove that it was a popular resort for the aborigines for a very great period—perhaps extending back to the Pleistocene times, Professor Miller declared. No human bone fragments were found here, tending to prove that the shelter was never used as a place of burial.

The third natural grotto visited—a true cave—was near the mouth of a small stream flowing into the Cumberland river at Ford's island, about four miles above Mills Springs. This cave had been an Indian burial place, as was proved by the finding of a number of human bones, mostly on the rock ledges along the walls.

Eagles Menace Fox Industry.

The chief enemy of the fox raisers of Alaska is the eagle which swoops down on the pups as they sport about in the open.

Washington Gets Tree Seeds From Indiana



Maj. D. L. Weart, at the left, and Lieut. Col. C. O. Sherrill, with seeds of trees that will be planted in Washington. The seeds were sent from Indiana, and are from historic trees.

LIQUID OF THE PAST STRONG STUFF

Ancient Booze Found in Earthen Jar in Kentucky Cave.

More Potent Than Modern Whisky, It May Be an Elixir That Was Manufactured by the Mound Builders.

Middlesboro, Ky.—Were the mound builders of old the first real distillers in what has become America?

This question is asked following the story brought here by two young men from the Molus section of Bell county mountains.

They say they were exploring the dense parts of the hill country when they saw the entrance to a cave, whose existence never had been suspected. The youths entered its labyrinths, and far back in the interior discovered an earthen vessel. They opened it carefully and they are quoted as saying there came forth a most delicious aroma. Investigation proved the existence of a liquid in the vessel, which the explorers tasted.

Both declare, it is said, that they were familiar with the taste and potency of corn whisky, but this liquid in the long-buried vessel surpassed "Kentucky liquor" in strength. They said that after a few minutes their senses became dulled and visions of celestial delight burst upon them. Finally they recovered and carried the vessel away with them. They are quoted as asserting that there was an inscription on the vessel which no one they have seen can decipher. It is understood the vessel will be sent to experts in ancient languages in the hope that the letters can be made out.

If the mound builders left the jar and its unusual beverage it is believed unlikely that the words can be deciphered, as it is said the writing of the mound builders never has been translated. The youths who found the vessel declare a single drop of the elixir they found possesses the strength of a quart of corn liquor and that dilution with water is all that is necessary to obtain a "real drink."

Just what the attitude of prohibition authorities would be toward this find in the cave has not been made known, nor has it been sought so far. The mound builders, from strange relics, mounds and other marks, long have been thought by some historians to have made their last stand in the Ohio valley. In Kentucky and Tennessee there are numerous traces of a strange people, the secret of whose origin or disappearance has not been learned.

Wills Courteous "Newsie" $100.

Boston.—"Jimmie" Caswell, Lynn's sixty-eight-year-old newsboy, will receive $100 for his unfailing courtesy under the will of the late Dennis F Reardon, Lynn grocer. "Jimmy" left papers at the Reardon home for 1: years until his health made it impossible for him to deliver papers on a regular "route." But his pleasant smile and courtesy were remembered by the late grocer

NEWS REVIEW OF CURRENT EVENTS

Seniority Again Blocks Efforts to Settle the Railway Shopmen's Strike.

BERT JEWELL NOT HOPEFUL

Illinois Miners Resume Work and Profiteers Boost Prices—House Passes Coal Commission Bill—Senate Acts Swiftly on Soldiers' Bonus—Slaying of Michael Collins.

By EDWARD W. PICKARD

SENIORITY rights were still blocking a settlement of the railway shopmen's strike as last week drew to a close, and though peace efforts were continued, their success was worse than problematical in view of the uncompromising stand of both sides on the chief point in dispute. On Wednesday the Association of Railway Executives, by a vote of 254 to 4, rejected the proposal of the chiefs of the brotherhoods, acting as mediators, that the strikers be reinstated with seniority unimpaired. The brotherhood leaders, after conferring with heads of other rail unions, suggested the possibility of separate agreements with the railroads, and the executives said they would test the sincerity of this proposal, but with the distinct understanding that any individual settlement would have to conform to the understanding of seniority reached at the general session of the executives. Most of the railroads also refuse to agree to take back all of the strikers, as consistently demanded by the union.

Bert M. Jewell, spokesman for the strikers, was pessimistic as to a peaceful settlement. He issued a statement saying:

"The association of railway executives has closed the door. The unions have offered every concession within reason to end the strike and to save the public from a breakdown of transportation, but the association has made none. On the contrary it has, since the strike began, raised an entirely new and irrelevant issue of its own—seniority; and by its refusal to recede from its position has made a settlement impossible at this time. The responsibility for what will happen now rests wholly upon it.

"The shop craft employees voted in June for a strike to establish a living wage and decent working conditions. The association of railway executives have now voted for a lockout to smash unionism on the railroads and to eliminate collective bargaining from the industry.

"The 400,000 striking employees accept the challenge of the association. We redouble our efforts, confident of success."

FROM the American Federation of Labor came an appeal to its four million members to give their moral and financial support to the striking shopmen. It attributes to "the small but powerful group of bankers who control the finances of the railroads" the adoption of a policy by the railroads of "bitter antagonism to the organizations of the workers," reasserting what many unprejudiced persons believe, namely, that there is a deliberate plan to destroy the unions.

Most of the sporadic strikes of brotherhood men soon came to an end, but last week the Southern railroad was badly tied up by walkouts of train and engine men. The situation became so serious that the superintendent of mails in the southern district planned to handle mails by motortruck service, with the possibility of calling on the army to handle and protect the trucks.

Secretary of War Weeks said he did not believe the administration would make further attempts to settle the railway strike, and added: "The government is not going to permit transportation service to break down."

COAL miners and operators of Illinois reached an agreement on the lines of that adopted at Cleveland, the men winning all their contentions. Production was resumed at once, but in that state as elsewhere, and as was to be expected, the profiteers also resumed and prices began to climb, to the dismay of the consumers. From various sources protests against this reached the authorities in Washington. Congress, having been urged to action by President Harding, showed it was alive to the situation. The house took up the administration bill for a coal commission reported from the committee on interstate and foreign commerce and speedily passed it, only reducing the salaries of the commissioners from $10,000 to $7,500 and the appropriation for its expenses from $500,000 to $300,000. In accordance with the desire of the President, the bill prohibits the appointment of any operator or miner as a member. In the senate a similar bill introduced by Senator Borah was passed, and the two measures went to conference for adjustment of the small differences.

Negotiations for the settlement of the anthracite strike were broken off, their failure seeming to be complete. Official statements indicated that the duration of a contract and the submission to arbitration of any differences were the stumbling blocks that could not be overcome by the negotiators. Representatives of the mine workers insisted upon a contract at the old wage rate, to extend to April 1, 1924, while the operators would not agree to a continuation of the old scale longer than next April. The miners maintained their stand against arbitration.

JOHN SHANK, secretary of the trades and labor assembly of Sioux City, Ia., is authority for the statement that plans are maturing for a general nation-wide strike of organized labor. He says various union organizations have called on the executive council of the American Federation of Labor to call such a strike. Probably this need not be feared while the more conservative element remains in control of the council. However, the activities of the Reds and radicals are increasing. Last week those chronic disturbers held a rather secret conference in Berrien county, Michigan. Federal and state agents of justice watched them a few days and then made a raid. The radicals had been warned, however, and only 17 were caught. William Z. Foster, one of their leaders, was arrested in Chicago. Much Red propaganda was seized and the officers said they had broken up a huge plot to foment violence in connection with the railroad strike. Michigan's syndicalism law, which has never before been used, was invoked against the prisoners. It was said other radicals would be arrested, among them Rose Pastor Stokes. According to the raiders, the propaganda seized in Michigan included pamphlets advocating the overthrow of the government and the establishment of a soviet regime.

SENATORS who are opposed to the soldiers' bonus seemed to have given up hope last week, or else they merely were in a hurry to get through with the bill and go home. Anyhow, they were so supine that the senate broke its speed records in adopting the finance committee amendments and taking up consideration of individual suggestions of changes. That the measure would be passed within a few days was conceded, and Senator McCumber said he did not believe the President would veto it, since the conditions that caused Mr. Harding and Secretary of the Treasury Mellon to seek delay last year have been met. Mr. McCumber placed emphasis on the points that the annual outlay for payment of the bonus has been reduced to such a figure that the argument of the inability of the treasury to bear the strain no longer holds good, and that the financial condition of the government and the country is quite capable of withstanding the burden which the bonus will impose.

THE administration shipping subsidy bill will not be considered further by congress until the December session. This delay has been urged by the Republican leaders, and now President Harding in a letter to Representative Mondell has given his consent. In this letter the P refers to the unfavorable effe question of the sale of t American ships on the subsi lation, and also refers to o which has arisen to the fe the bill which provides tax e to shippers of freight on A ships equal to a percentage money paid for such shipmen fact that it will be difficult to full attendance during the c period, he indicates, also en the situation.

THERE is some reason to that the civil war in C about over and that the coun be united under one or anothe strong men who have been the factions. The AMERICAN LEGION

(Material for This Department Supplied by the American Legion News Service.)

POLICE CHIEF LEGION MAN

V. R. Molony, Superintendent of New Orleans' "Finest," Will Call Legionnaires to Aid.

Confronted with the task of handling crowd of 150,000 visitors to the American Legion convention in New Orleans, October 16 to 21, Police Superintendent Guy R. Molony will call his brother Legionnaires into action.

Superintendent Molony, an active Legion member, has announced that 1,000 uniformed Legionnaires will assist his police force in regulating the large crowds thronging the convention parade route and will serve as provost guards in the business district.

During a recent trip to Kansas City Superintendent Molony investigated conditions prevailing in that city during last year's American Legion convention. He discovered that city and police officials had no criticism to make concerning the way in which the 150,000 visiting ex-service men conducted themselves, and stated that Kansas City officials would welcome the opportunity to have the organization again choose Kansas City as their convention city.

BUNKS FOR THE LEGION MEN

V. A. W. Steger, Chairman of National Convention Housing Committee, Has Completed Plans.

"Every man to his own taste in bunks," says V. A. W. Steger, chairman of the housing committee of the American Legion national convention, to be held in New Orleans next October. Convention visitors will be housed in a variety of ways.

While the bulk of the crowd will choose the hotels and rooms in New Orleans homes, there will be an opportunity for a substantial percentage to remain on the Pullman cars and the steamboats and ocean liners which take them to the convention city.

Mr. Steger has obtained a hotel rate of $1.50 a day without bath and $2.50 a day with bath. More than 14,000 visitors can be housed in the Pullman cars, which will be provided with all conveniences of a modern hotel. A special arrangement with railroads will enable the convention guest to live on his Pullman car for about $2 a day, and a uniformly low rate will also prevail in rooms in New Orleans homes.

Those doughboys who prefer to return to the barracks life for five days may be quartered in New Orleans' $15,000,000 army supply base and in various halls and lodge rooms.

Reservations for rooms, Mr. Steger has announced, must be made through the visitor's American Legion state adjutant, who will confirm them with the convention housing committee.

HAVE ARMY ON SHORT NOTICE

Government Could Provide Ample Military Protection in Any Emergency, Pershing Says.

An army large enough to guard every important bridge and railway terminal, all important industries and coal mines, as well as governmental buildings, could be placed in the field on short notice by the United States government, Gen. John J. Pershing declared in a statement recently issued, telling what could be done if this country were invaded.

Eighteen regular war strength infantry divisions of reserves, composed of 600,000 men, an expanded National Guard with 500,000 men and regular army units, augmented by volunteers to approximately 175,000 men, could be made quickly available, the general said.

"The national defense act of 1920," Pershing's statement declared, "prescribed that 'the organized peace establishment, including the regular army, the National Guard and the organized reserves, shall include all of those divisions and other military organizations necessary to form the basis of a complete and immediate mobilization for the national defense in the event of a national emergency declared by congress.'

"The evident intent," the statement continues, "is that the system of national defense shall be definitely organized, that the military units required for service in any emergency shall be constituted in time of peace, and that each of them shall be prepared to undertake its initial mission in time to meet the requirements of the situation."

HOMESICK FOR THE ARMY

Ah Han Kook, Korean With Honorable Record in the U. S. A., Returns to the Service.

Born in Korea, taken to Hawaii when a child, without any trace of relatives, an honorable record in the United States army behind him, Ah Han Kook, a little brown man, called at the American Legion headquarters in Indianapolis the other day and declared his intention of "going back home" to the army.

"I was a dental officer's assistant in San Francisco," Kook, private first class and specialist fourth class, medical department, said, producing an honorable discharge to prove it. "The officer was Dr. H. C. Feyler, now of 822 Gay street, Portsmouth, O. He asked me to come to see him when I got out of the army. He is in private practice now. So when my enlistment expired in San Francisco, I got on a train and went to Portsmouth. The officer said he would like to have me work for him. He treated me very good and I had a pleasant visit with him, but I got homesick. The army is the only home I know. I am a member of the American Legion, Schofield Barracks, H. T., post No. 6, and I heard a lot about Legion headquarters in Indianapolis, so I thought I would like to see them."

Kook was shown about the offices at Legion headquarters and the various phases of the work explained to him. Then this little brown man, now an American citizen, who first entered military service in the National Guard at Hawaii in August, 1917, and continued the service through the national army and the regulars until May 26, 1922, departed for Fort Benjamin Harrison, at Indianapolis, to reenlist.

"Sure, he was homesick for the army," the recruiting officer at the fort said later over the telephone. "We welcome him back."

WOULD BE SECOND TO NONE

James Shelley, Phoenix, Sent to West Point, Wishes to Be First-Class Officer.

President Harding has appointed another World war veteran to West Point. James Shelley of Phoenix, Ariz., told a "white lie" and at sixteen was enlisted as a regular in the army. He served nine months overseas with the artillery. He is now a "plebe" at the academy where after four years' hard work he will be graduated a second lieutenant.

The stuff that is Shelley's and which made him enlist when under age evidenced itself when he answered the telegram of West Point officials who asked: "What is your ambition?" Shelley had to make his answer in seven words, but it was to the point. He said: "I want to be second to none."

FOR LEGION POST IN KOREA

Application for Charter Is Made to the Legion's National Organization Department.

An application has just been received for a charter for an American Legion post in Korea by the Legion's national organization department in Indianapolis. There are 15 persons eligible for membership in Korea and the application bears the names of those 15 persons. The local post will have its headquarters at Kwangju, Chosen. The post in Korea is being organized by M. L. Swineheart, treasurer of the South Presbyterian mission in that country. In his letter accompanying the application for a charter, Mr. Swinehart said: "Please have the application acted upon as quickly as possible as we have good reason for wanting to get busy and get the post organized into a going concern."

It is unfortunate that some World war veterans in the United States, where it is harder to stay out of the Legion than it is to get into it, don't get some of this enthusiasm manifested by their erstwhile comrades in arms in far away Korea.

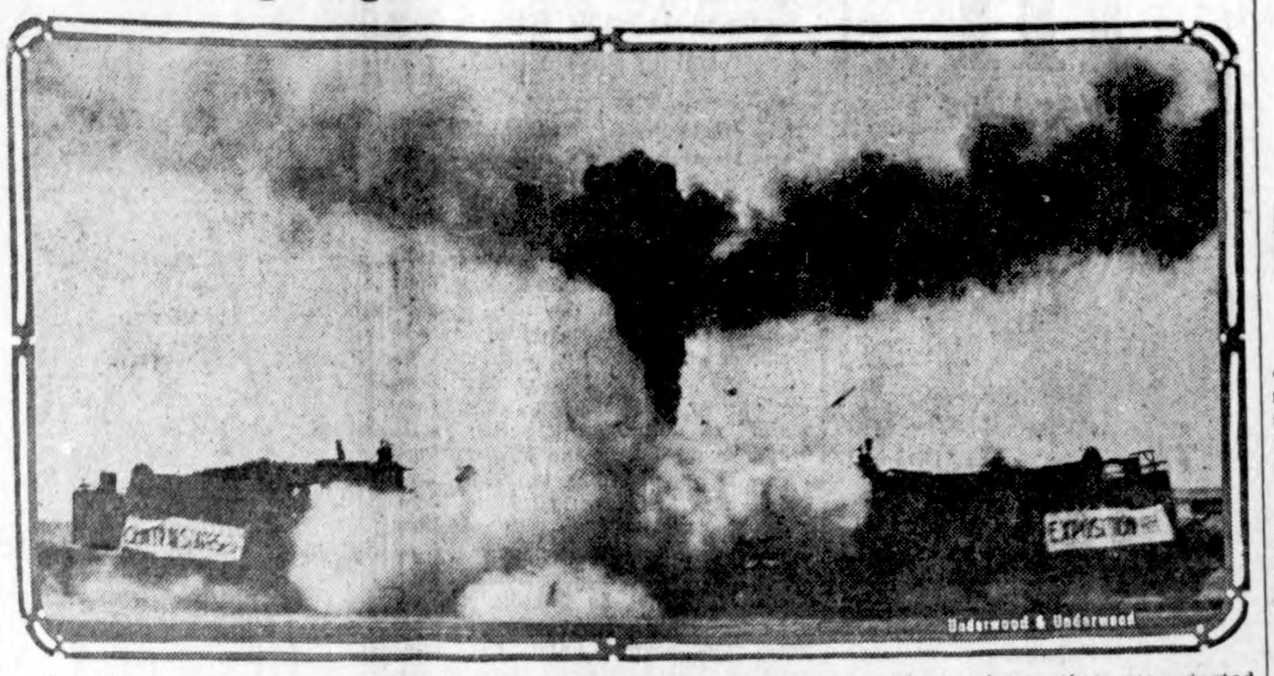
Carrying On With the American Legion

Shell shock caused Thurman K. Williamson, Lincoln, Neb., World war veteran, to forget the girl he was engaged to and marry another. The District court has just annulled Williamson's marriage, leaving him free to carry out his first pledge.

* * *

"40 Femmes and 8 Chapeaux" is the name given a fun-making, purely social organization, formed by members of the national executive committee of the American Legion Auxiliary. The new club corresponds to the Legion's "Forty and Eight" organized some months ago, which now has local chapters in all parts of the United States.

Colliding Engines Are Fair Attraction in Illinois



In order to attract attention to the big fair at Aurora, Ill., on the new grounds, two locomotives were started at full speed and came together with a crash in front of a crowd of 50,000. To make the collision more thrilling, a quantity of dynamite was placed on the front of each engine.

MAPS AIRPLANE ROUTE

Establishment of a permanent air route between Washington and San Francisco will be mapped out when Lieut. Paul Wilkins completes his trip from Bolling field to the Pacific coast in a D-H airplane. The photograph shows (left to right) Lieutenant Wilkins and Sergt. Leo Huckill. Adequate landmarks and the most safe landing fields between here and the coast are the principal objects sought during the flight.

HAS SERVED LONG

Edward Dunn entered the government service in 1867 as a mounted messenger under Secretary of War Stanton. After 55 years' service he was relieved August 20. His co-workers presented him with a purse filled with gold, which was handed to him by Secretary Weeks.

England's Star Chamber.

The Star chamber was a tribunal in England consisting of a committee of the king's privy council, instituted or revived by Henry VII in 1486. It had extensive powers and held itself unfettered by rules of law, dealt with civil and criminal cases without the intervention of a jury, and could inflict any form of punishment short of death. It was abolished by parliament in 1641, during the reign of Charles I.

The court is said to have derived its name either from the gilt stars that adorned the ceiling of the chamber in the old palace at Westminster, where it held its sessions, or, as is more probable, from the Jewish bonds (stars) deposited there by permission of William I.

Anxious to Please.

At breakfast in one of the hotels an exceedingly fidgety and irritable person within two minutes of giving his order began to squirm and demand when he was going to get his food.

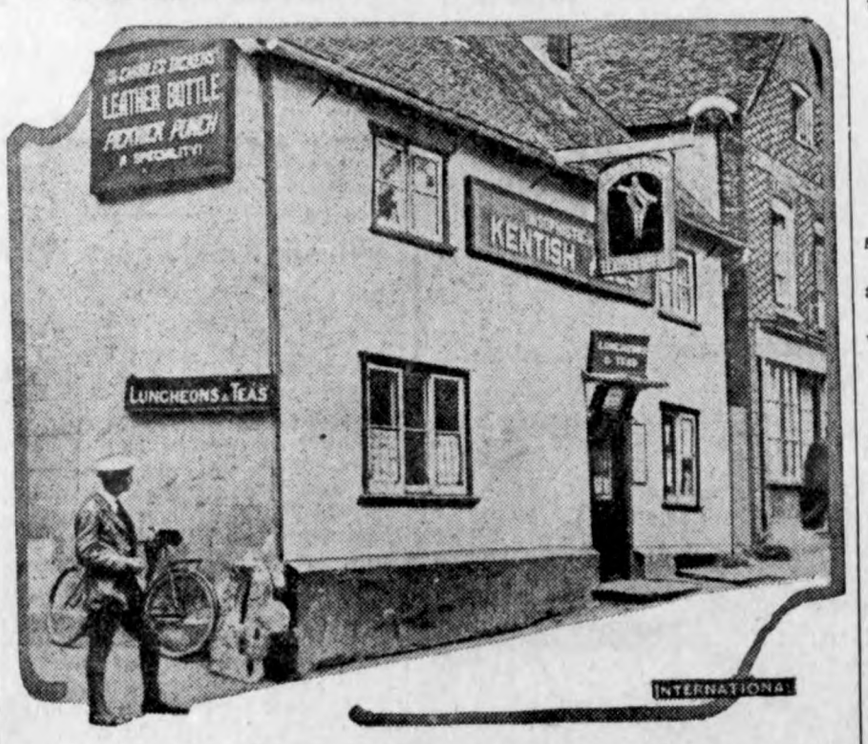
"Waiter," he demanded, for about the fourth time, "where's my chop?"

"It's on the grill, sir," the waiter responded. "Will you have it now, or wait until it's done?"—Philadelphia Ledger.

Receives Her Dead Hero's Decoration

For bravery in the World war at the battle at Belleau Wood, in which he lost his life, Sergt. William J. Geary of Washington was posthumously decorated with the Distinguished Service cross, the decoration being presented to his mother, Mrs. Claudia Geary, by Maj. Gen. John A. Lejeune, chief of the United States Marine corps.

Famous Dickens Inn Changes Hands



The famous inn at Cobham, England, known as the "Leather Bottle," is soon to be vacated by the present host, one of the most prominent of Dickens enthusiasts. The old inn, pictured here, has been a center of attraction for tourists and sightseers, for it figures prominently in the "Pickwick Papers."

Does This Rock Look Like Mr. Bryan?

Pillar Rock, which is 20 miles above the mouth of the Columbia river, between the states of Oregon and Washington, has just been made an aid to navigation by the installation of a beacon light. If you will study the rock you will see that it resembles the face of a man. Folks in Oregon liken this face to that of William Jennings Bryan.

Scraps of Humor

MORE THAN ONE WAY

A gentleman with a sensitive and cultivated ear was annoyed by the persistent and wretched piano playing of a woman who occupied the adjoining flat. One day he met her in the hall with her four-year-old daughter.

"Your little girl plays quite well for a child of her age," he remarked in his most friendly manner. "I hear her practicing every day."

The offender made sure he was out when she opened the piano again.

Deserved Reward.

"What's going on here?"

"A column conductor is being presented with a loving cup by his admiring constituents."

"What inspired such an unusual demonstration?"

"He has never imitated Pepy's diary or written a parody on 'Mary's Little Lamb.'"

Hard to Discourage.

"Senator, there is a man outside who looks like a job hunter."

"Tell him to come back tomorrow."

"He says he hasn't eaten in two days."

"That won't keep him from coming back. He'll show up here if he has to be brought in on a stretcher."

The Modern Equivalent.

"A member of congress accused another statesman of indulging in 'livery stable talk.'"

"He's behind the times."

"Eh?"

"He probably meant garage chatter."

PERISH THE THOUGHT

The Dog Fancier: Yes'm, that's a blue ribbon Pekingese. Pedigree goes back to the time of the Ming dynasty. I tell you, ma'am, a dog like that's not to be sneezed at."

The Dog Lover: I should say not. He might catch something dreadful from a sneeze.

Normal.

A normal boy
Is Willie Spratt,
He's always asking:
"Where's my hat?"

The Scenario Writer.

"You seem blue."

"Work is scarce. All the movie stars are writing their own plays."

"How about the case of this monkey actor?"

"That cheers me somewhat. He can't write his own."

Not Enough Exits.

"Have you any complaint to make?" asked the prison visitor.

"Yes, I have," replied the life convict. "There ain't nearly enough exits from this place."

Playing Safe.

Kriss—What did you have on the fifth race?

Kross—Just a pair of borrowed field glasses.

"The White Man's Burden."

The Man Friday—I don't like this goatskin Prince Albert, master. It's too hot. Why do we have to wear clothes on this island?

Robinson Crusoe—These garments are unhandsome and uncomfortable, but we must endure them. They are our badge of civilization.

It Usually Pleases Us.

"It is easy enough for an orator to get thunderous applause at the very beginning of his address."

"How?"

"All he has to do is to say, 'My friends, we are a great people,' and then pause dramatically for the cheers."

Adds to His Revenge.

She—Father's remarks about you were very bitter.

He—I'm glad they were, because I'm going to make him eat his words.

One on Uncle Sam.

Ella—Who is this E Pluribus Unum?

Father—I don't know, but I don't like these men who part their names in the middle.

Accommodating.

Lady—Before I take you I must know if you're engaged.

Lena—Ma'am, do you mean if I have a feller.

Lady—Yes.

Lena—No, ma'am, I haven't, but I can soon get one, if you like it.

Both Out—Calling.

He—Where were you last night?

She—Out. I called on a newly married pair. Where were you?"

He—I was out, too. I called on a pair of nines.

HAVE NEW DOPE CRAZE

Indians of South Dakota Now Eating Peyote Bean.

Has Demoralizing Effects, Mentally and Morally as Well as Physically—Couple Habit With Religious Ceremonies.

Washington.—A new dope craze—peyote eating—has taken such hold on the Indians on the nine reservations of South Dakota as to create a problem which those who are interested in the welfare of the red man view with grave apprehension. The peyote bean is the fruit of a cactus plant, which grows along the Mexican border. It is known as the Indian cocaine, and has practically the same effect as that drug. Eaten by the Indians under any circumstances, it has demoralizing effects, mentally and morally as well as physically. To complicate the situation in South Dakota, the peyote habit has been coupled with religious ceremonials which combine ancient Indian superstitions with Christian rites, and the craze is now in full sway among hundreds of the nation's wards in the Northwest, says the Washington Star.

Saturday night has become the favorite occasion for these peyote orgies. Gathering in tents or huts, the devotees eat from 30 to 40 of the small beans, following which they begin to see visions.

Despite the traditions of the red Indian's reticence he is a great talker, especially when under the influence of a stimulant. In the grip of peyote, the braves claim to have wonderful revelations and are filled with the spirit of weird prophecy, which is unfolded to the gathered tribesmen in long and eloquent harangues.

In this state of drug-created frenzy they read from the Bible, offer prayers and sing hymns, using these devices to cover the degenerate activities which accompany the progressive effects of the drug.

The culmination of many of these peyote meetings is declared by those who have witnessed them to be most revolting. Many instances have already been called to the attention of the authorities of husbands and wives having been separated as a result of the peyote debauches, and the debilitating mental and physical results of the drug are already beginning to show in hundreds of the younger generation of the Indians.

Spreading north from the Mexican border during the past five years the craze entered South Dakota from Nebraska, where there are said to be about 400 addicts among the Winnebagos, Omahas and Poncas. From the Winnebago reservation it spread to the Yankton reservation in South Dakota, where there are said to be about 40 confirmed addicts, and then to the Ponca Creek station of the Rosebud reservation, where about 60 individuals are habitual users of the drug. The other members of the tribe have not yet fallen victims to the craze, the cult having its leadership from men of an age ranging from 30 to 45 years, which may be classed as semi-educated.

GORILLA NEAREST APE TO MAN

But Scientists Do Not Claim He Is Ancestor of Humans—Evolution Theory Explained.

New York.—The gorilla, that 400-pound chunk of ferocity, was classed as the animal closest to man in its qualities of physical and mental endowment by scientists who addressed the annual meeting of the American Society of Mammalogists in the American Museum of Natural History. It was not contended that the gorilla is man's ancestor, but that in the group to which man belongs, which includes besides the gorilla, the gibbon, the orang-utan and the chimpanzee, the gorilla surpasses the other apes.

Dr. W. K. Gregory, curator of comparative anatomy of the museum, explained the theory of man's descent as evolutionists hold it today. Their contention is not that man is descended from one great ape, but that he goes back with them to a common ancestor, now long extinct. Certain fossil remains of this creature, Doctor Gregory said, show that the pattern of his teeth was closer to that of man's than in the case of any animal now existent.

Hair Saves Woman's Life.

Pottstown, Pa.—Although severely injured when she fell from a second story window while reaching for a screen the other day, Mrs. Clara Keim owes her escape from probable death to her long hair. She landed on her head on a cement walk, but her hair was so arranged as to form a cushion which broke the force of the contact. She was unconscious when found and taken to a hospital.

Money Lost Last Winter Found in Potato Field

Miller Ressler, a farmer, of Eden township, Pa., lost his pocketbook early last winter. He advertised for it in the newspapers and made personal inquiry without results. He mourned $60 as a dead loss. A little girl hunting potato bugs found the wallet in a field a few days ago. The notes were sent to a bank at Quarryville, Pa., for redemption.

Picnic Hams

UNDER GOVERNMENT SUPERVISION

BILLION DOLLARS

U. S. VICTORY LOAN CALLED

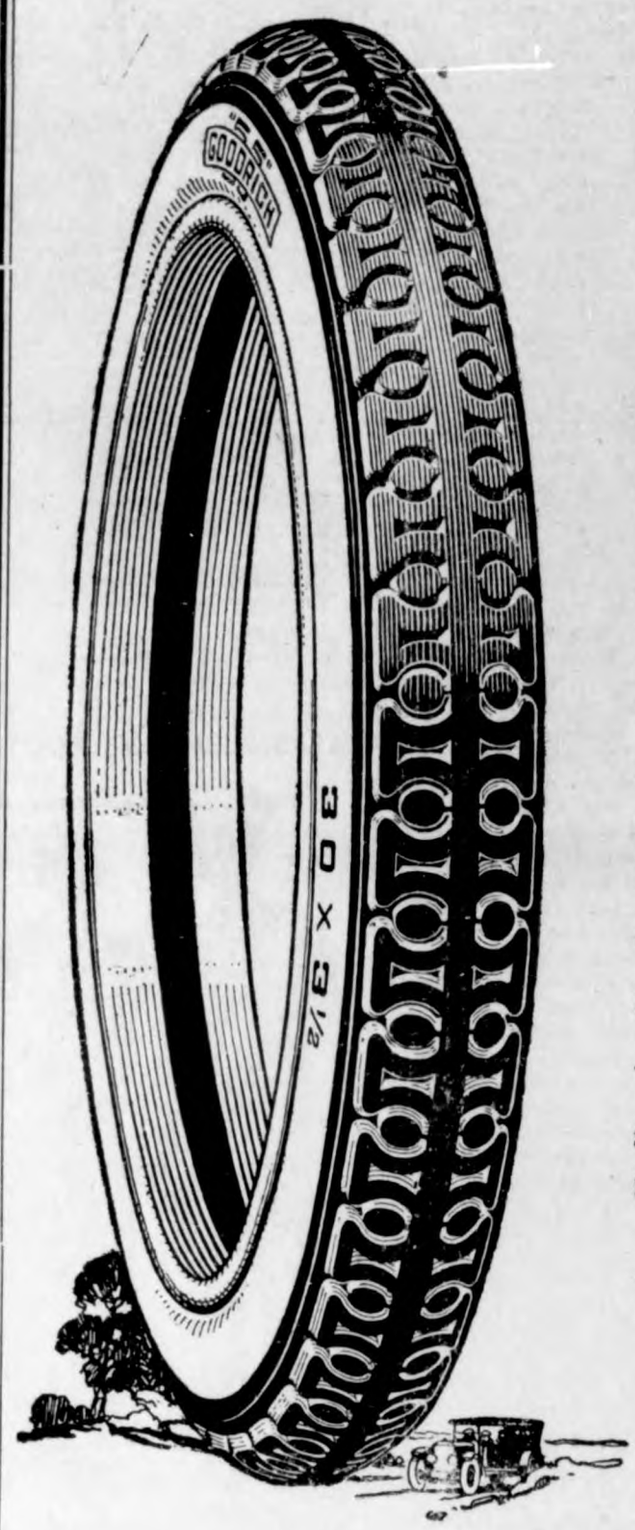
The calling of a large portion of the Victory loan prior to maturity, at $100 and interest, gives the holders two things to consider:

1. Holding the bonds until the date called for redemption. after which all interest stops, and receive only par for the bkonds.

2. Selling your bonds through us and receive market price, (which is more than par at this time) and accrued interest, giving you an opportunity to place your money at a higher rate of interest than you now receive.

All other Government issues are now selling above par. We may be able to make some suggestions to you and will be glad to have you call and talk with us about this matter.

First National Bank
"The Bank for Everybody'.'



You Can't Beat This Tire At The Price!

The Goodrich "55" is a *real* tire of real value at a price remarkably low.

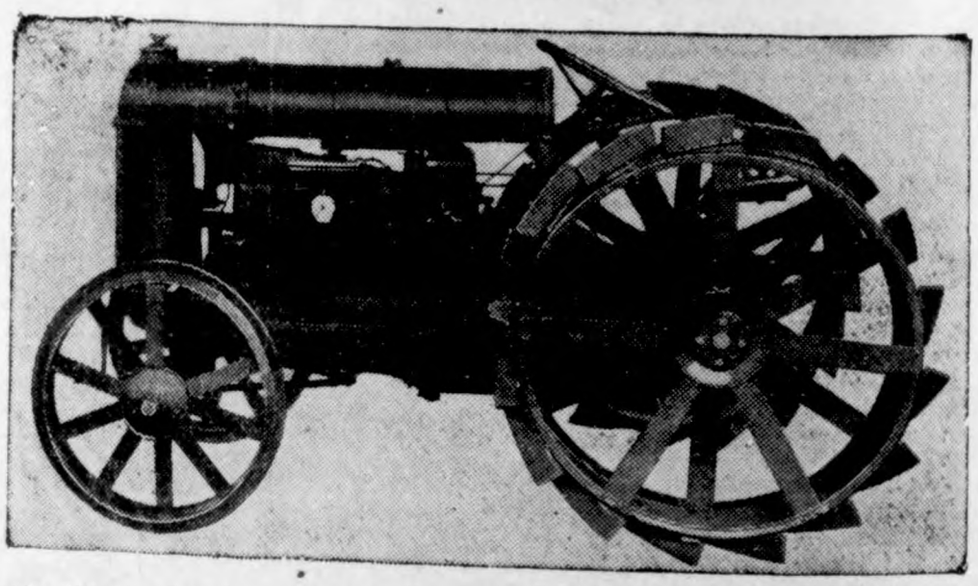
It is the *economy* tire for light cars made with all the skill of Goodrich.

It has everything you demand in a tire—rugged construction, long mileage and good looks.

You can't beat this tire for all-around economy. And we sell it at an unusually low price.

ERICKSON GARAGE
KLEMME, IOWA

FORDSON
THE UNIVERSAL TRACTOR



$395.00 F. O. B Detroit

HENRY FORD

HENRY FORD was 35 years getting ready for the new price on the FORDSON. He started as a farm boy, planning to get rid of the drudgery, long hours and low money return that has always faced the farmer.

He wanted to furnish you with a tractor that would not only do your work better and faster, but at lower coss—and he 170,000 FORDSONS now in use have proved hat he has accomplished these things.

What you get in the FORDSON for $395 f. o. b. Detroit is the greatest farm power unit ever offered.

Let us show you how a FORDSON will cut farm costs, increase your bank account and take the drudgery out of farm work. Write, phone or call—

"THE FIRE EATER," WILL BE SHOWN HERE SATURDAY NIGHT

Is A Picture Well Worth Seeing

Synopsis of the Picture: "The virgin forests of Paradise Valley were food and drink to the inhabitants of the valley, and when the government announced its intention of protecting the timberlad as a part of its Federal Reserve, the natives laughed and went ahead cutting trees.

TheForest Ranger Service decided a diplomatic as well as courageous ranger should be sent into Paradise Valley to teach the natives a respect of the law, as well as the fact that they could make as good a living abiding by the law as by evading it. Smilin' Bob Corey was selected as the best bet, and accompanied by Ranger Jim O'Neil, he made his way into Paradise Valley.

After he met the prettiest girl in the valley, and was exposed as a ranger, life was no idle dream for Smilin' Bob. He found something to do every minute of his time, from smiling to fighting. And when he was accuksed of murder, and the fire broke out in the forest, he broke all records for speed.

He escued the girl from the fire, found the murderer, helped fight the fire, course, he wins the girl, and the community receives him with open arms.

A side splitting comedy will also be shown at the Idle Hour Saturday night entitled 'His Inheritance Taxi'.

Manager Pavey has a number of big pictures booked which will be shown in the near future.

This Big Helpful Book FREE

We are holding for you a book of intense interest to ambitious young people. We will send it to you FREE if you will ask for it.

Te ahnme of the book is "MOVING YOUR FUTURE FORWARD." It is handsomely printed an illustrated. It tells you how you can create a bigger market for your services—and a PROFITABLE market. It tells you how you can secure a good position—one which pays a good salary right from the start, and which offers excellent opportunities for advancement.

There is no expense to you whatever. There is no risk—no obligation. We will send this book with our compliments. It is our contribution to ambitiuos young men and women, and especially to those who come from modest homes. You will find it both interesting and helpful, as have hundreds of others.

So, if you want to know how you can move YOUR future forward; if you want to know how you can secure a god psition, send the attached coupon NOW. "MOVING YOUR FUTURE FORWARD" will be sent with our compliments by return mail.

Very truly yours,

The Hamilton University

THE FALL TERM OPENS SEPTEMBER 5, 1922.

Mr. W. R. Hamilton,
Mason City, Iowa.

Dear Sir: I shall be glad to receive with your compliments and without expense or obligation to me, a copy of your illustrated book, "MOVING YOUR FUTURE FORWARD."

SOME SMILES

Clerk—Did you say that you wanted moth balls?

Lady—No, I said Golf balls.

Clerk—Here they are and if they don't keep the golfs out of your clothes bring them back. — Life

"John, you'll have to take that ball away from baby; he hit his sister on the head with it.

"Did they treat you as a member of the family'

"No but they threatened to once when I was behind with my room rent."—Life.

Tommy—Paw, what it "the forest primeval?"

Paw—A woods where there are no initials cut on the birch trees.—New York Sun.

"Mr. Meekingham has great presence of mind."

"Is that so?"

"Yes, while he was proposing to Miss Stronghead, instead of saying, Will you be mine?" he said, "May I be yours?"—Kansas City Star.

Angela—A clock is different from a man.

Andrew—What do you mean?

Angela— Well, when it strikes it keeps on working.—Life.

"I woke up in the night and found my wife going through my pockets.

"What did you do. "

"I turned over in bed and laughed."Legion Weekly.

Salsman — Individual alarm clocks? Never heard of them what are they like?

Shopper—I never saw one myself, but I thought maybe I could get one tuned so it would wake my husband without disturbing me—Judge.

"So you and Nexdore are not on speaking terms. What's the matter.'

"Why, he sent me a box of Axle grease and advised me to use it on my lawnmower."

"Well."

I" sent it back and advised him to use it on his daughters voice."—Boston Transcript.

She—Do you see anything about that painting you admire?

He— Yes the frame.

She—But the frame is not the picture.

He— No. but its about the picture isn't it—Boston Transcript.

She—I've been assigned to read a paper on "Thee Ideal Woman" at the next meeting of our club.

He—Read a paper? Why, all you need to do is to stand up on the platform and let them look at you—Boston Transcript.

ASK UNIFORM SIGNALS

Railway Association Recommends Standard Colors.

One of the Suggestions Made in the Interest of Public Safety Is Use of Yellow in Automobile Tail Lights.

Chicago.—In the interest of public safety recommendations for the standardization of colors for traffic signals are being considered. These recommendations were made on behalf of the signal section of the American Railway association at a recent conference requested by the Illuminating Engineering society and the International Traffic Officers' association and held under the auspices of the American engineering standards committee. The recommendations are:

1. The principle of red for stop everywhere, unless qualified by a more favorable indication—that is at highway crossings with railroads if train is approaching, in fixed signals and in the hands of traffic officers, at street intersections, at the ends of streets, and possibly to indicate excavations in streets.

2. Yellow for tail lights of automobiles, possibly excavations in streets and for calling policemen, or for any other purpose where caution is required; possibly at busy street intersections to indicate that the traffic lights will be changed from red to green or from green to red.

3. Green lights for fire escapes, for proceed at street intersections and other purposes to indicate the way is clear.

In presenting these recommendations on behalf of the signal section A. H. Rudd, chief signal engineer of the Pennsylvania system, said:

"The railroads are particularly interested in eliminating the use of the red light for various purposes other than that of indicating danger or stop unless qualified by a more favorable color. They desire that any scheme devised may conflict as little as possible with their own signal systems already established and that uniformity of indications in the protection of highway crossings at grade may be established."

HAS GOPHER TURTLE

Miss Theodora Olsen is pictured here with the gopher turtle brought from the dry pine woods of Florida by Curator Englehardt of the Brooklyn museum. The turtle is of a queer species and known to be a vegetarian, feeding for most part on grass and various farm products. It is exceptionally tame and harmless, and at the least show of battle on the part of other animals will draw its head and legs into its shell.

PARIS BEAUTY SUES MANAGER

France's "Queen of Queens" Passes Up Marriage for Stage Contract.

Paris, France.—Because he dashed her hopes of becoming a stage star, France's "most beautiful girl" is suing a theatrical manager for breach of contract.

Elected by popular vote France's "queen of queens" for 1922 and acclaimed the most adorable out of 5,000,000 adorable blondes and brunettes, Mlle. Germaine Buchet expected to fulfill her childhood dreams of appearing before the footlights.

She turned down many offers of marriage, she alleges, to sign a contract for appearance in the operetta "Helen Returns," but the role went to a rival beauty.

Now Mlle. Buchet demands that the court make the manager keep his promise or pay.

Skunks Lure Bees From Hives, Eat 'Em

Washington.—A report from Ohio received by the biological survey of the United States Department of Agriculture says that skunks are giving a great deal of trouble to beekeepers in that region. The skunks visit the hives at night and scratch on the outside till the bees come out. As soon as they appear the skunks eat them. The biological survey recommends that under such conditions the hives be fenced in with chicken wire at least three feet high.

Speedy

The foreman came around just after Mike had dropped a stick of dynamite and departed for parts unknown.

"Where is Mike?" he asked

"Mike's gone away," answered Pat

"When will he be back?"

"Well," said Pat dubiously, "if he comes back as fast as he went he will be back day before yesterday."

New One On Conductor

"I want to be procrastinated at de nex' corner," said the Negro passenger to the tramcar conductor

"You want to be what?" demanded the conductor.

Don't lose your temper. I had to look in de dictionary myself befo' I found out dat 'procrastinate' means 'put off'.

"Why do you call the tenor in your quartet 'Gob'?"

"Because he's so found of hitting the high C's"—Life.

"Wille. can't you be quiet for a bit?"

"No, ma; two bits is my lowest figure."—Boston Transcript.

In one of our great cities there is a family composed of the parents one little boy about six years of age. and a baby. The husband is a musician, and it is possible you have listened to his banjo on your Victrola

Recently a number of friends were invited to a Sunday dinner.

When seated at the table the husband quietly raised his hand. A sudden hush insued. Neither of the parents are zealous attendants at church and the husband can even swear like a pirate. The guests were plainly puzzled.

Then a tiny voice was heard, asking God to bless the food, and the parents, and the baby brother, and the friends who were guests of theh home.

Levity? You could have heard a pin drop.

—Mason City Globe Gazette.

"Why is Mr. Grumpson so unpopular?"

"Because he's eccentris."

"Yes"

"Hecarries around a pocket Bible. When a golf player starts to tell a about his score, Mr. Grumpson takes the good book out and asks him to lay his right hand upon it."—Birmingham Age-Herold.

The Biggest Fence Post Value Ever Offered

ANY way you look at it, this new RED TOP Double Strength Studded Tee gives you the greatest value ever offered in a fence post.

Greater strength—there isn't a single hole punched in this post either for staples or anchor plate.

Firmer in the ground—the RED TOP anchor plate is sturdier than ever.

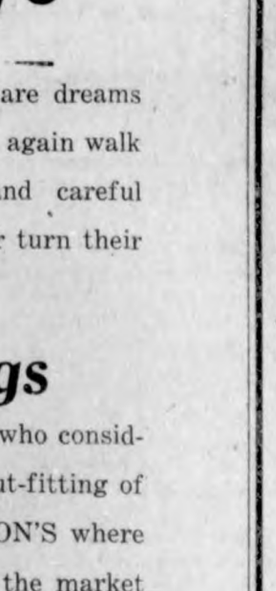
Longer service—the new aluminum finish and solid post make it longer lived.

More efficient stapling—the RED TOP Perfection Staple holds fencing tighter and is easier to apply.

Better looking—the aluminum finish gives it a neat, trim appearance.

Come in and see this new RED TOP before you start work on your fences. It's as good for repairing old fences as for building new ones. You can get a better idea of the big value in this post by seeing it than we could give you in a full page advertisement.

Its cost? Less than the better grade wood posts and lasts twice as long. Remember, too, that it costs one-tenth as much to set a RED TOP. It's by far the cheapest in the fence line.



Red Top
GUARANTEED
Steel Fence Posts

We have a good stock of RED TOPS on hand and can take care of your needs without delay.

Something to Think About

By F. A. WALKER

THE INEVITABLE EBB

WHEN the ebb tide comes, apparently determined to sweep you off your feet and carry you down to the waiting sea; or when the storm clouds darken the serene sky and obscure your bright, trustworthy guiding star, summon all your courage and hasten to reach the nearest friendly port.

A man naturally thinks it will go hard with him if the tide turns and sets against him.

If long accustomed to good fortune, fair winds and sunny weather, a sudden burst of opposition at its first manifestation of energy appals him.

For years he has been making rapid progress, avoiding the reefs upon which many of his intimates have been wrecked.

When they sank beneath the growling waters he smiled complacently and congratulated himself on his superior skill.

His craft was seaworthy, his vision clear and his hand unerringly sure.

But now, as the ebb froths in anger, he realizes that his boasted cleverness was largely a matter of condition with which his ability had nothing to do.

He has fallen back so long on the thought that he was a superman, possessed of extraordinary prowess, the change alarms him.

The inevitable ebb fills his soul with inexpressible terror.

Though he shuts his mouth hard and says nothing to his suspecting wife, he cannot quell the sickening fear.

Danger lurks in the waves and in the wind—in the very breath of idle gossip.

The shoals are marked by fretting foam leaping high in the air, but the night is dark. His nerve is undone. His once keen perception fails him.

And yet, if he is a true man, or a man in the making, this is the one time in his life when he will show his mettle, grip the wheel with a firmer hold, bend his back and resolutely face the snarling gale panting in its effort to hurl his ship upon the rocks.

In every life there is a shipwreck somewhere buried in the sands of unforgotten years.

It tells the tale of a day that is done, of fond hopes, that were swept to sea and sucked under the waters of the inevitable ebb, from which no man can always steer clear, but against which every brave man will battle until he makes port.

(© by McClure Newspaper Syndicate.)

Mother's Cook Book

If you want a thing will it, don't merely wish it. The Chinese say "great souls have wills, feeble ones have only wishes."

SOMETHING TO EAT

SPONGE CAKE.—Take four eggs, one and one-half cupfuls of sugar, the same of flour, one-half cupful of cold water and flavoring to taste. Beat the yolks until thick, add cold water and beat again until thick; sift the sugar several times, add it to the yolks, then the flour alternately with the whites, the flour having been sifted four times, three times after it is measured. Bake very slowly at first. Use a tube pan. The cake should, when properly made and baked, be the size of an eleven-egg angel food.

Corn California Style.

Take two cupfuls of corn, one cupful of milk, one cupful of bread crumbs, one-half teaspoonful of salt, one and one-half tablespoonfuls of green pepper, three slices of bacon, two tablespoonfuls of fat and three of flour. Cut the bacon in half-inch pieces, cook until beginning to color. Add flour to the bacon, stir in milk and cook until thick, seasoning with salt and pepper, mix corn (fresh may be used), crumbs, pepper and sauce. Put in a baking dish, sprinkle bacon over the top and bake in a moderate oven until the bacon is crisp and brown.

Vassar's Delight.

Soak one-fourth of a pound of prunes over night in cold water, cook until tender and cut the flesh in small pieces, discarding the stones. Add half as much coconut per measure as prunes, a little of the coconut milk, and one or two tablespoonfuls of orange marmalade. Boil and stir in three-fourths of a cupful of sugar. Beat two tablespoonfuls of butter to a cream, add two egg yolks, one after another and one-fourth of a teaspoonful of salt; stir and cook in the hot prune mixture until the egg is set. Have ready flaky crust baked over small fluted tins. Fill the shells with the pastry mixture and cover with a meringue made of the whites of the eggs piped over the filling. Dredge with sugar and bake ten minutes to brown the meringue. Sprinkle with chopped browned almonds or coconut shreds.

KIDDIES SIX

By Will M. Maupin

RELICS

A LITTLE box with tear-stained lid
Beneath which many things lie hid.
And often when the twilight's gloom
Paints memory faces o'er the room,
I leave the world of toil and care,
And seated in the old armchair,
I ope the lid and fondly gaze
Upon the things of other days.

A little box with tear-stained lid
Beneath which sacred things are hid.
A little shoe out at the toe—
O, baby boy, I love you so—
A tiny cap with upturned brim
That eloquently speaks of him—
These are the treasures laid away
To gaze upon at close of day.

A little box with tear-stained lid
Beneath which treasured things are hid.
A broken top, a toy, a whip,
A crippled ox from Noah's ship;
A tiny stocking—all the wealth
That men secure by work, or stealth,
Would not suffice to buy from me
One thing I ope the lid to see.

A little box with tear-stained lid
Beneath which love-worn things are hid.
As long as Death's angel roams
To lay a blight on happy homes,
Full many a box will hide away
The relics of a happier day;
And when the evening's echoes call
Upon their lids hot tears will fall.

SCHOOL DAYS

Uncommon Sense . . .

By JOHN BLAKE

ACCURACY FIRST

FIFTY years ago a mathematical marvel mystified audiences in small towns in the United States.

He would walk up to a blackboard and ask people in the house to give him two long numbers.

Given such numbers as 3,796,402,897 and 72,875,295,839 he would place one below the other, announce that he would multiply them, and write beneath them the answer.

No one understood how he could do it. The people who beheld him gasped in amazement at his powers. And he went from town to town for several weeks exciting wonder and admiration till some skeptic in the audience took the trouble to write down the numbers and multiply them himself.

Then it was discovered that the lightning calculator never made a multiplication at all, but merely wrote an answer in the proper number of units, which of course, was invariably wrong.

A telegram to the next town and prompt action by the local authorities put an end to the calculator's career.

It is easy to work rapidly if you do not work accurately, but it is of little more use than were the labors of the faker in the story.

In this world of progress men must work both accurately and rapidly to get ahead, but they must cultivate accuracy first.

Millions are lost in industry every year through mistakes and carelessness of people who try to work faster first consideration. When, either in figuring, or in writing, or in any line of endeavor you are sure that you can be accurate it is safe to cultivate speed.

But never work so fast that you are not sure you are getting down the right answers to your problem. Better creep for a while than fall every time you attempt to run.

The quick men are valuable, of course, but they are never judged for their speed alone. If their work doesn't check up, they hold their positions but a little while.

(Copyright by John Blake.)

THE FRIENDLY PATH

By WALTER I. ROBINSON.

DON'T be afraid to laugh. A hearty laugh is as good as medicine. It aids digestion. It shoves cares aside and brings happiness to those who are sad.

Thackeray declared that "a good laugh is sunshine in the house."

The world may be wild over jazzing; it may think too much about pleasure and show. But it is sorely in need of more whole-hearted laughter. When people really laugh out loud, their glee relaxes their nerves. They can feel the exhilarating tingle clear down to their toes.

A man needs rest from everyday cares. He needs to forget temporarily vexations and sorrows which burden his mind. He gets partial rest when asleep; but after sleeping he sometimes awakes more tired in mind and body than when he lay down, because mischievous troubles—usually imagined—have kept creeping through his mind.

But when a man laughs from pure joy or because he sees something or hears something which actually appeals to his sense of humor, he gives his mind a more complete rest than at any other time during day or night.

It pays in happiness; it pays in everyday accomplishments to see the sunny side of life.

The long-faced, dreamy mortal seldom has many friends. He finds more troubles than he actually has and exaggerates those which are real.

In our pathways of work and our pathways of rest we should seek real causes for mirth.

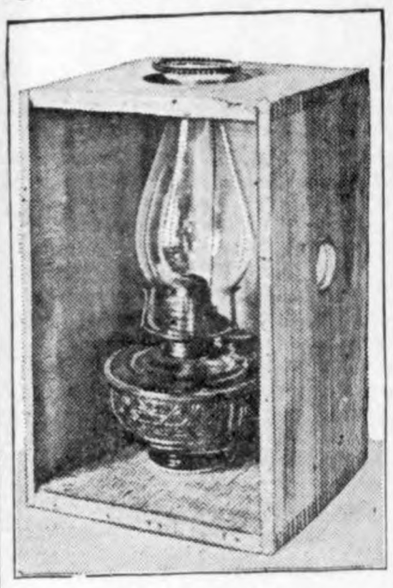
CANDLE ALL EGGS FOR SHIPPING TO MAKE SURE THEY ARE FRESH

A Strong Light Renders Contents of Egg Visible and Its Quality Is Indicated.

(Prepared by the United States Department of Agriculture.)

Do you know how to tell the quality of an egg without breaking the shell? All you need is a pasteboard box with a hole 1¼ inches in diameter, a strong light such as is furnished by a lamp



Making Use of Pasteboard Box.

or an electric-light bulb, a dark room, and the egg. When the egg is held close against the hole the strong light renders its contents visible and its quality is indicated by the appearance of the yolk, the white and the air space at the blunt end. By comparing the egg with charts furnished by the United States Department of Agriculture in Department Bulletin 51, it is possible to learn the exact condition of an egg before it is broken.

Candling By Housewife.

Testing eggs by candling, as it is called, may not only be used by the housewife in obtaining fresh eggs for her table but has also proved to be commercially practicable in preventing loss by separating for local consumption, eggs, that, because of cracks, wetness, incipient spoilage, and other defects, are likely to spoil in shipment. Such eggs are suitable for immediate use but will not stand shipping.

Candling Saves Charges.

Candling as near as possible to source of production will not only save transportation and storage charges for the farmers who wish to buy and sell on an accurate quality basis but will prevent the loss of a valuable food product. This method of conservation was tried out during the World war and the results have been so gratifying that many states have made it a permanent feature of their food-control work.

Department bulletin 51, which contains these charts, may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 40 cents.

PROMPTLY CAN FRESH VEGETABLE OR FRUIT

If Permitted to Stand, Bacteria Have Chance to Multiply.

Product Which Is Unduly Soft, Overripe, Partly Moldy or Decayed, Withered or Bruised, Should Be Carefully Discarded.

(Prepared by the United States Department of Agriculture.)

Many of the bacteria which form heat-resistant spores are found in the soil, and thus are quite likely to occur upon the surface of fruits and vegetables. If these products stand for some days, or even hours, after being picked, the United States Department of Agriculture finds that certain bacteria will have a chance to multiply, which they did not have while the fruits or vegetables were growing in the field, garden, or orchard. When packed or piled together, the vegetable or fruit mass may heat in the center, even if stored in a comparatively cool place. Thus these bacteria will be supplied with all the conditions that most favor their rapid development—warmth, moisture, darkness, and an abundant food supply. The result is rapid growth and development of several new crops of bacteria. Evidently, then, our chances of success in the effort to kill all the bacteria and their spores in the canning process will be much less than if the perfectly fresh vegetables or fruit had been promptly canned.

For similar reasons, no fruit or vegetable which is unduly soft, over-ripe, partly moldy or decayed, withered, or bruised, should be canned. Most of these conditions mean that there is already present an unusually large number of those microorganisms which have caused or aggravated the undesirable condition of the fruit or vegetable. In case of bruising or oversoftness, the injured or dying plant tissues have a very low resistance to bacterial attacks, consequently the bacteria grow much more rapidly than would otherwise be possible.

There is another reason why speed is imperative when handling these perishable products. There are present in all plant, as well as animal tissues, certain substances called enzymes, which have power to produce very great changes in the tissues, independently of the changes wrought by the growth of bacteria. The apple, as it ripens, becomes less starchy and more sweet because its sugar-forming enzymes transform the starch to sugar; at the same time, other enzymes cause the disappearance of the acids of the green apple. As ripening progresses still further, another set of enzymes brings about the softening of the cell walls which results in mealiness, and still another set causes the gradual disappearance of the sugar, so that the "dead-ripe" apple is no longer as sweet as it was. Equally important changes of one sort or another take place in all fruits and vegetables during ripening.

In some actively growing products, such as young green peas, asparagus, and sweet corn, these enzymes work with exceeding rapidity, and sweetness is lost with each succeeding hour that passes after they are gathered.

"One Hour From the Field to the Can," is an excellent slogan for home canners, especially when canning that most difficult of all products, corn. Its adoption as a working guide would do much to improve the quality and insure the safe-keeping of canned products.

SAVE SEWING TIME

If a woman's time sewing at home is worth 30 cents an hour, and if, through learning to make a foundation pattern, according to the United States Department of Agriculture, she saves an hour or more of time each sewing day, the 371 women in two training classes in Dunklin county, Mo., who saved a total of 408 hours after they had studied with the home demonstration agent, must obviously have saved time worth $734.40. These women made 74 foundation patterns among them, 324 undergarments, 409 outer garments and 148 garments that would have been bought or hired made under ordinary circumstances. In addition to the time saved, and its value, these garments represented a saving of $975 cash outlay.

Household Questions

Oysters are considered best if bought in shells.

* * *

Use gelatin immediately after dissolving for ice cream.

* * *

Panned chicken is delicious served with currant jelly sauce.

* * *

It takes more time to freeze water ice than it does ice ceram.

* * *

Dip fish into boiling water for a minute and the scales will be much easier to remove.

* * *

The inkstain on the rug will disappear if you shift the rug so that the sun will shine on the spot.

* * *

When putting cooked currants in cookies, add them to the butter, sugar and egg mixture before the flour is added.

Home Town Helps

LEARN VALUE OF SHRUBBERY

Matter Has Been Too Long Neglected, but Its Worth Is Beginning to Be Appreciated.

It is only comparatively recently in America that we have discovered shrubbery and how to use it. Not many years ago people used to deal in individual shrubs. One shrub on each side of the gate was thought plenty. Occasionally a little clump was set out in the middle of the lawn.

But when home makers began to experiment with masses of shrubs, when they began to frame their houses in forsythia and wigelia and spirea and rambler roses and honeysuckle, they found they had made a transformation. The whole appearance of the place was changed. A house that otherwise might be commonplace, in a proper setting of foliage and blossoms proved wholly charming and lovely.

Necessarily with the shrubbery came trees, both in the parking outside and within the yard. Trees for a background, for protection from the sun in summer, and for the delicate tracery of branches in winter, for the wonderful play of lights and shadows—trees there must be.

Most cities have plenty of object lessons in the effect of massed shrubbery and trees. It would pay any person interested in the appearance of his home to wander tomorrow through the residence districts where shrubbery and trees are growing in profusion, just to contrast them with districts where foliage has been neglected.

It is wonderful how defects in architecture can be made to disappear by the proper handling of the masses of green nature has put at man's disposal.

GET THE COMMUNITY SPIRIT

Excellent Results Follow the Getting Together of Organizations for Civic Betterment.

Recently quite a good-sized company toured the lower half of the eastern shore to attend the summer meeting of the Maryland State Horticultural society, with visitors from the Maryland Forestry association, the Florists and Gardeners' club of Baltimore, the Peninsula Horticultural society and the Maryland Agricultural society and affiliated organizations—a pretty comprehensive representation of rural Maryland.

In Easton the local federated farmers, the Rotary club, the Men's Community club and other societies got together on the program of entertainment, mobilized the automobiles and arranged plenty of shelter and food. Other towns were moved to support Easton's leadership.

The point we call attention to here is the evidence the trip affords of the growth of the inter-community spirit. Rural Maryland caught it during the war, and it did great good. After the armistice there was a lull, but last year the farmers and the city men got together in a meeting held in Baltimore and the mutual feeling was revived and set in motion. We now see it at work in the summer meetings of the farmers and the various organizations. The value of it is indisputable. It brings our people into better acquaintance; it exalts the state spirit; it makes for happiness and good fellowship. And in the end it leads to better methods and better results on the farms and in the orchards, all of which is reflected in more prosperity in the towns.—Baltimore American.

Kansas City an Object Lesson.

St. Louis does not give the exterior appearance of a packing center, for its residence district is uncommonly handsome, and it possesses an exceptional art museum, writes Nina Wilcox Putnam in the Saturday Evening Post. Kansas City is an object lesson in home building, and the average stranger will be astounded at the uniform beauty of its residence developments and the interesting manner in which areas are restricted to a single type of architecture.

The plan upon which its boulevards are laid out also is unique and the planting of the parkways that border them will bring joy to the garden lover and the tree worshiper.

It Worked.

The principal of a public school in Flatbush, N. J., appealed to the pupils to preserve the lawns. Instead of the usual threat, the following sign has been placed in a conspicuous place: "Ball playing not allowed. Young people with civic pride and community spirit will heed this warning." It has had the effect.

Would Make It Thorough.

LIVE STOCK

PREPARING STOCK FOR SHOW

Much of Improvement in Breeding Is Made Possible by Comparing Animals in Ring.

(Prepared by the United States Department of Agriculture.)

There are many of the elements of sport in preparing live stock for the show ring and in competing with other breeders for prizes, and showing animals at fairs and expositions is no mere fad, although there are still some people who seem to think so. Much of the improvement in the various breeds of animals in this country, says the United States Department of Agriculture, has been due to the comparisons made possible by bringing animals together in competition. Not only do the breeders who compete reap a benefit, but also every farmer and breeder who attends the show as a spectator. Many a man marks the beginning of his success from the time of some live-stock show where he was brought to a realization of the inferiority of the stock on his farm.

A good illustration of the value of a state fair as a live-stock improver comes from a state in the Middle West. A bill providing for the appropriation of $80,000 to build a hog barn on the state fair grounds was up before the legislature where it was encountering much opposition because of the comparatively large expenditure planned and the short time the building would be used each year. Finally, one legislator, a small-town banker who had never made a speech before, got the floor and in a few words convinced his hearers that the $80,000 would be well spent. He told of having studied the list of depositors in his bank with the idea of finding out which were breeders of purebred stock and how they stood in comparison with the others. He found that 14 of them were breeders of purebred hogs and all of them were prosperous, far above the average. Then this banker went to see each one of the 14, and he found that almost without exception they gave the state fair or some other fair credit for having taught them the value of better blood and the right type for the market.

There are farmers who find it next to impossible to pick a real good animal unless they have the opportunity to make comparisons. They may be able to pick the best animal in a herd, but if the herd happens to be a mediocre one they will pick an ordinary

Champion Poland China Sow.

animal in the belief that they were getting a good one. By making his selection at the farm of a successful breeder or at a show where many excellent animals can be observed, his chances of getting the right sort of stock are greatly increased.

SHADE AND WATER FOR STOCK

Abundant Supply Will Result in Rapid and Economical Gains With Hogs and Cattle.

Experience has taught cattle and hog men that a good shade with an abundant supply of pure water near the feeding place will result in rapid and economical gains, whereas lack of shade or shortage of water or stagnant impure water make slow and costly gains. Flowing springs or fresh well water are the best sources of supply for stock.

USE PATIENCE WITH HORSES

Nothing Gained Where Animal Is Abused and Continually Kept Nervous and in Fear.

Horses that are handled quietly and patiently will do much more work and keep in better condition on a given amount of feed than will horses that are abused and continually kept nervous and in fear of the driver.

Beef Producer's Problem.

The beef producer's problem is so to feed roughage that it will bring him the greatest return. Corn fodder when fed with some kind of legume hay or nitrogenous concentrate to balance, makes a cheap and satisfactory ration.

Study of Feeding Value.

The beef producer must study the feeding value of the different concentrates and roughages, and should be guided by the market prices in balancing rations and feeding.

IMPROVED ROADS

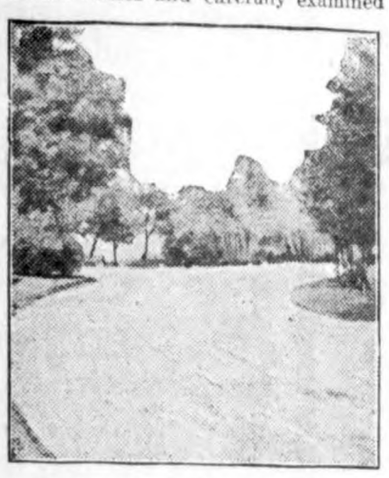
GREAT SYSTEM OF HIGHWAYS

Scheme Being Worked Out by Federal and State Authorities to Surpass Other Countries.

(Prepared by the United States Department of Agriculture.)

A system of highways that will serve the whole country and will be far superior to any other in the world is being mapped out by federal and state engineers. It is estimated that the system will comprise 180,000 miles of road. The federal highway act recently enacted specifically requires that all federal aid be spent on a connected system of highways consisting of not more than 7 per cent of the road mileage in each state, and that this system shall consist of interstate or primary roads and intercounty or secondary roads.

Proposed systems have been received by the bureau of public roads of the United States Department of Agriculture from all but eight states. They are plotted on a large map of the United States and carefully examined



An Improved Michigan Highway.

as to co-ordination with the roads of adjacent states and service to all sections of the country. Where co-ordination is not satisfactory conferences are held with all interested state highway officials and routes adjusted.

Many states have already adjusted difficult problems with their neighbors. As an example the system sent in by Nebraska showed a big gap in an important road along the northern boundary. It was learned, however, that South Dakota would follow with a system that would fit like pictures on toy blocks. Since the federal highway act of last November became a law, only roads certain to be on the system have been approved for construction.

MUCH LOWER BIDS ARE MADE

According to Reports to Bureau of Public Roads Prices Will Be Greatly Reduced.

Early bids for the construction of federal-aid roads indicate that prices during the coming season will be materially lower than last season, according to reports received by the bureau of public roads of the United States Department of Agriculture. While bids have not been received on any large volume of work, there is, however, enough to indicate a lower level of prices.

Grading has been bid at 20, 23½ and 30 cents a cubic yard in Missouri, Arkansas and Minnesota, respectively, as compared with an average of 35 cents for the section in which these states are located in 1921.

Prices of reinforcing steel in place range around 6 cents as compared with the 1921 price of 8 or 9 cents, and bridge steel at 4¾ cents against 7 to 8 cents.

A few bids, for the best grade of concrete, of about $17 a cubic yard have been received in sections where the 1921 price was about $25 a cubic yard.

Prices bid for the construction of concrete roads per square yard are as follows: Ohio, $1.52; Colorado, $2.27, and Georgia, $1.38, as compared with an average for the whole country during the period 1916-1920 of $2.57 a square yard.

FEDERAL-AID ROAD PROJECTS

Total Mileage Under Construction in May Amounted to Nearly 15,000 Miles.

Federal-aid road projects totaling 663 miles in length were completed and 541 miles went under construction during May, bringing the total under construction to nearly 15,000 miles and the mileage in completed projects to 17,038, according to reports of the bureau of public roads, United States Department of Agriculture. These figures indicate that the federal-aid system grew at a rate of more than 20 miles per day on each working day of the month. Allotments of funds to definite projects amounted to $7,828,000 during the month.

Mark Set for 1922.

Three hundred and fifty thousand miles of improved highways, extending through every state in the Union, is the mark set for the summer of 1922.

Kicks Would Pave Roads.

If we could cash in the kicks we make on poor roads, we would soon have them all paved.

Tuberculosis the Worst Enemy.

Tuberculosis in poultry causes greater loss than among cattle.

SOY BEANS TAKE PLACE OF OATS

Production of Seed During Past Few Years in Corn Belt Has Become Profitable.

SEEKING COMMERCIAL OUTLET

Possibilities of Utilizing Crop for Oil and Meal Had Much to Do With Increased Acreage—Grower Afforded Cash Crop.

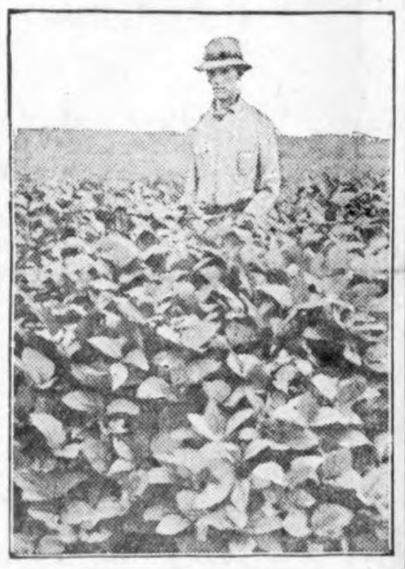
(Prepared by the United States Department of Agriculture.)

The soy bean is rapidly taking a place as a major crop in the farming systems of the corn belt, replacing oats to a considerable extent and taking part of the corn acreage. Although primarily used for forage, pasture and ensilage, the growing of seed during the last few years has been a very profitable industry. The production of seed has now increased to the point where the supply greatly exceeds the demands for planting.

Seek Commercial Outlet.

County soy-bean associations, growers, county agents and extension officials, notably in Illinois and Indiana, have concerned themselves in the development of a commercial outlet of the seed. As a result, the production of oil and meal from corn belt grown soy beans seems to be definitely assured for the season of 1922. Several mills in Indiana and Illinois have become interested in the possibilities of the soy bean as source of oil and meal. Two mills in Illinois have planned to use about 750,000 bushels this season, while other mills are planning on a smaller scale.

Although definite figures are not available on the acreage of soy beans in the various states, reports to the United States Department of Agriculture indicate very large increases in acreage for seed production and forage purposes throughout the northern and corn belt states. The possibilities of utilizing domestic grown beans for oil and meal no doubt had much to do



An Indiana Field of Soy Beans.

with the large increase in acreage for seed. Such a commercial outlet affords the grower another cash crop as corn and wheat.

Ready Market Indicated.

The various ways in which the soy bean and its products are utilized in the United States indicate a ready market for the commercial production of soy-bean seed. Soy-bean oil is largely used in the manufacture of soaps and paints, and it is also used in the manufacture of lard and butter substitutes, rubber substitutes, linoleum, printing ink, and as a salad oil. The cake or meal is a superior cattle feed and of high value for human consumption.

HOGGING OFF CORN AND PEAS

Mixture Makes Reasonably Good Balanced Ration and Animals Thrive Well on It.

In hogging off corn and cowpeas, the pigs and hogs eat the beans only, and not the vines and foliage. This legume seed is relatively high in protein, balancing the starchy corn. The mixture makes a reasonably good balanced ration; the hogs grow on it and gain in both flesh and fat; and there is more of the mixed feed than with corn alone.

FEED-FARMING IS IMPORTANT

Department of Agriculture Has Established Project Which Deals With It Exclusively.

Owing to the importance of feed-farming industry, the United States Department of Agriculture has established a project which deals with it exclusively. It furnishes information to prospective breeders, as well as to those already engaged in the industry, which helps them to overcome obstacles and avoid pitfalls.

TEST WITH PUREBRED LAMBS

Consumed 63 Per Cent as Much as Scrubs and Were Disposed of at 75 Per Cent More.

Eighteen lambs sired by a scrub ram and eighteen sired by a purebred ram were fed out in a contest. Those sired by the purebred ate 63 per cent as much grain and sold at 75 per cent more money than the scrubs did—good blood pays.

FAMOUS RAMBOUILLET RAM GETS ATTENTION

Ranchers in West Study Result of Breeding Work.

Particularly Interested in Noted Sire, Prince of Parowan—Uniformity and Good Type Produced Are Exhibited.

(Prepared by the United States Department of Agriculture.)

Ranchers from Washington, Oregon, California, Arizona, Nevada, Utah, Idaho, and Montana, about 200 persons in all, recently attended a field day at the government sheep farm in eastern Idaho, where they studied the results of the breeding work done by the department, particularly that with Rambouillets. The famous Rambouillet ram, Prince of Parowan, attracted much attention from these

Prince of Parowan, Rambouillet Ram on Government Farm in Idaho.

range sheepmen. This ram, a particularly high-class sire, produced nearly 120 sons and daughters on the ranch last year. Of these, 28 selected rams and 58 ewes were exhibited in pens to show the uniformity and good type produced by the sire. Some of his grandsons were so much like his sons that it was difficult to pick them out. Stockmen consider that this ram is a "find" and equal to the best of the breed.

In addition to the breeding work on this range station studies are being made of various methods of year-round management and the effects on yields of wool and lambs, range improvement by grazing studies and reseeding of abandoned areas of the range, shed lambing, and methods of watering sheep on parts of the range distant from water. Fences are now built so that it will be possible to carry out experiments on the use of range to the full capacity.

BABY BEEF VERY PROFITABLE

Production Can Be Made on Land Worth Not More Than $150 Per Acre—Always "Toppers."

Baby beef production can be made most profitable on land worth not more than $150 an acre, of which at least 50 per cent is easily cultivated, says W. H. Peters, acting chief of the animal husbandry division of the University of Minnesota. By baby beef production, he says, is meant the growing, fattening and marketing of beef calves at ages ranging from 12 to 24 months, 16 to 18 months being the most economical at which to sell.

"With sufficient fat on them when placed on the market, baby beeves are always market toppers," Professor Peters says. "Baby beef production allows raising of more calves on the same amount of land than does production of stock or feeder cattle. Each good baby beef steer should sell for $30 to $50 more when one and one-half years old than the average feeder steer will bring at two and one-half years of age.

PLANT WALNUTS ON HIGHWAY

Minnesota Forester Receives 20,000 Trees for Distribution in Southern Minnesota.

Planting trees along Minnesota highways is well under way, following distribution of nearly 20,000 black walnuts, recently received by the state forestry department. The walnuts are to be planted along highways in the southern part of the state, according to W. T. Cox, state forester.

The plans of the forestry department have changed somewhat since the launching of the tree planting program, due to the fact that the demand for trees is greatly in excess of the available supply.

BEET TOP SILAGE IN RATION

Hay Requirements May Be Lessened One-Half in Feeding for Beef, Mutton or Milk.

The best feeding practices have demonstrated that by the use of beet-top silage in the ration the hay requirements may be reduced by one-half in feeding for the production of beef, mutton, or milk. The succulent value of the silage supplements its actual feeding properties and that of forage and other feeds.

NEW GRADES FOR POTATOES

Revision Provides for Elimination of All Those Misshapen and With Hollow Heart.

Revised grades for white potatoes, prepared by the United States Department of Agriculture, provide for the elimination from No. 1 grade of misshapen potatoes and potatoes affected by hollow heart, and the addition of a grade known as No. 1 small.

DAIRY

REPLACING OLD DAIRY STOCK

Oregon County Organization Striving to Save Animals From High-Producing Stock.

(Prepared by the United States Department of Agriculture.)

While calves from low-producing cows are saved to maintain the herds on some farms, on other farms and in other sections, where higher-producing cattle are kept, calves from 300-pound cows by purebred bulls are often vealed because no market is found for them as dairy stock. This is an economic waste which, according to re-

Economic Waste to Veal Calves From High-Producing Cows.

ports received by the United States Department of Agriculture, the extension organization of Coos county, Ore., is striving to eliminate.

About thirty calves from the best stock in Coos county were saved last year by arrangements made with farm bureaus of other counties to take them when two weeks old at $12 a head, crated and delivered at the express office. Arrangements also were made recently for a representative of the Klamath county extension organization to spend 30 days locating newborn calves of good stock and finding a dairyman to feed them for two weeks before shipment to farmers in his own county.

The reports also say that calves two weeks old are shipped safely as far as 500 miles, or for 36 hours' travel; day-old calves can rarely be shipped.

PUREBREDS AID MILK YIELD

Tribute to Value of Improved Sires Is Contained in Statement by J. C. McDowell.

A tribute to the value of purebred sires is contained in a recent statement made by J. C. McDowell, of the dairy division of the United States Department of Agriculture, who pointed out that the average production of 38,000 grade cows in cow testing associations in 1920 was 5,980 pounds of milk and 300 pounds of butter, while the average production of all cows in the United States was 4,000 pounds of milk and 200 pounds of butter. The average milk and butter yield of grade cows was 50 per cent higher than the average for all grades and scrubs taken together. The economy of production was over 100 per cent greater.

INCREASE FAT ECONOMICALLY

Best Plan Is to Put Cows on an Abundant Ration That Is Rich and Easily Digested.

In a herd of well-fed cows it is not practical to try to produce milk containing more fat by giving rich feeds; that is a pretty well-settled fact. In a herd of poorly-fed cows, though, the percentage of fat can be increased by putting the cows on abundant ration that is rich and easily digested. Tests in New York showed an increase of one-quarter of 1 per cent of fat, when the cows were kept on good feeds for two years. The increase was economical, too. There was 50 per cent increase in amount of milk produced.

WAY TO AVOID LEAKY TEATS

Good Plan to Apply Collodion After Each Milking—This Closes Up the Opening.

The only way to prevent leaky teats is to smear collodion on the end of the teat after each milking. This closes up the opening and before the next milking it must be removed. This is bothersome, but may be used to good advantage where the cow loses a quantity of milk.

INDIVIDUALITY IS ESSENTIAL

In Selecting Cow It Is Important to See That Strain Is of Large Producers.

Breed is of less importance in selecting the cow than is individuality, for in every breed there are good individuals and poor individuals. It is important, not only that the breed, but the strain or family represented be noted for large and economical production.

Provide Supplemental Feed.

If concentrated feeds are not provided to supplement the pasture, the cow must either reduce her production or draw on reserve materials from her body.

Grain Is Essential.

The feeding of grain to dairy cows on pasture is essential to sustained high production.

Give Plenty of Water.

Give the calves plenty of clean water to drink.

POULTRY

TERM STANDARD-BRED FOWLS

Means That Bird Referred to Conforms to Standards of Color, Markings and Weight.

A purebred, whether it is a hen or a cow, means that the animal comes from a definitely recognized breed and that the parents were purebred animals of the same breed. If an animal has lineage of pure breeding, which can be definitely proved, and thus makes the animal eligible for registration, it is then a purebred animal. There is the added stipulation that an animal must be healthy, vigorous and a creditable specimen of its breed in order to be purebred.

In reference to poultry breeding, perhaps the best terms of all to indicate 100 per cent blood is the expression "standard-bred." This means that the fowl referred to as standard-bred is one which conforms to the standards of form, color, markings, weight, etc., for the various breeds under the standard of perfection of the American Poultry association. Standard-bred is a term which is growing in popularity among those doing business in the purebred poultry field, and is perhaps a more distinctive expression than any other which might be used with reference to poultry. Of course, there are standard-bred horses which refer to a distinct breed of light horses, including both trotters and pacers eligible to registration in the trotting registry.

DUCKS FOR MEAT AND EGGS

Pekin Breed Is Kept Almost Exclusively for Green Ducks—Runner Is Good Layer.

"The Pekin breed is kept almost exclusively by producers of green ducks, and also on many farms where they are grown for meat," says H. W. Sanborn, extension poultry husbandman, United States Department of Agriculture. "They fatten rapidly and may be fed on rations recommended for chickens, but better results are usually secured by feeding more green and vegetable feeds and a larger proportion of mash.

"For the general farmer who is more interested in obtaining eggs than producing meat, the Runner is a good breed. This duck holds the same relative position in the duck family that

Pekin Ducks About Seven Weeks Old in Fattening Pen.

the Leghorn does in the chicken family. It lays a good-sized white egg considerably larger than a hen's egg, and is declared to be a small eater, a good forager, and hardy. The introduction of this bred is helping to build up a trade of first-class duck eggs. These eggs should be marketed frequently, as they depreciate in quality more rapidly than hen's eggs."

HEN NEEDS SHELL MATERIAL

Tests Show Decrease in Number of Eggs Where Oyster Shell and Grit Are Lacking.

Tests made at the University of Wisconsin experiment station, where the feeding of hens could be watched closely, show that hens have a tendency to cut down on the number of eggs they lay when they run short of material which goes into the egg shell. Some believe that soft shells come as a result of not having sufficient oyster shells or ground bone material, but tests do not bear it out. So, for keeping up the number of eggs, it is essential that hens running free on the farm have a supply of oyster shells, ground bone or some other mineral grit, near where the flock is fed.

FEED FOR YOUNG COCKERELS

Where Market Is Available for Spring Chickens Plan to Feed Green Stuff Liberally.

If there is a market available for spring chickens, it is a good investment and time well spent in building a little enclosure where green stuff is available to feed the young cockerels all they can eat for a couple of

Mr. Jim Elder and bride, of Madison, Wisconsin, who have been visiting in Iowa for a month, were again visiting Klemme relatives and old friends this week.

Our "devil" Clarence Elder has made himself scarce around the shop this week as he is enjoying a week's vacation—and Ye Editor has also been away more or less the past week trying to be at Clear Lake and Klemme at the same time.

Mr. John Waterman returned Tuesday from Keystone, Iowa. He was called there by the death of his mother who died there Saturday afternoon, at the home of her daughter. Funeral services were held on Monday and burial was made at Luzerne, Iowa. She was 73 years old.

Mrs. A. D. Gimer, and children, Blanche, Thomas and baby Thelma, left Saturday morning by way of Clarion for White, South Dakota, for a visit with Mrs. Gimer's sister, Mrs. S. W. Ibach, and also her mother, Mrs. Fouts who is visiting there at this time.

Mrs. C. B. Hartwick, of Giard, Ia., was visiting in Klemme the past week with the Arnold boys and their families. The Arnold boys are her nephews. She also visited at the F. E. Blackstone home at Garner.

County Auditor, C.hris Jacobs and their daughter and husband, Mr. and Mrs. C. J. Papousek, of Belmond, returned Sunday from a two week's vacation trip spent in the eastern part of Iowa, at the Jacobs' old home at Maquoketa and other points.

Ray White and family hae moved to Belmond where "Pat" has a job in a meat market. Mr. and Mrs. George Johnson have moved into the house vacated by the White family.

Mrs. George Schaper and daughter Roxanna, and sons Milton and Homer, left last Friday for Sioux City, where they will make their future home. Milton and Roxanna will attend Morningside College there and Homer will enter the Sioux City High

Don't run away to get married. It deprives your friends of an opportunity to see how scared you are.

By studying the above list it is seen that there are less than 3 per cent male teachers in our rural schools this year, and a very small percent of married women are listed. The young men graduating from the high schools are evidently going into different lines of work or perhaps more are entering colleges. In some years there was quit a number of young men teachers.

PAVING COMPLETED

GARNER-DUNCAN PAVING TO BE OPEN THIS WEEK

Only Two and a Half Miles Yet to Finish Between Garner and Britt

The following news item appeared in yesterday's Garner Signal:

"The paving between Garner and Duncan is to be opened this week, says Worth Ross, the engineer in charge of Hancock County's road work. Next Tuesday would be 28 days since it was completed, but he says it will be open for traffic as soon as the shoulder can be cut and the paving cleaned.

The Henkel Company is making rapid strides toward the finish, and Monday morning there was only two and a half miles left of the stretch between Garner and Britt. They had laid a part of the paving west from Duncan, and Monday began at the Britt end of the job. They are working east from the railroad track at Britt, and will have the job completed some time the latter part of this monh.

The crew that is working west of Hutchins had two and a fourth miles approximately to finish, as reported Monday morning. They can not run the concrete quite as fast as the gang this side of Britt, but they will finish before October 1st. You can always depend on the Henkel Company to get safely under the wire on time."

MORE FARMERS ARE WANTED IN WESTERN CANADA

Why is it that so many farmers continue to try to fill a rich man's place on high priced farms? The Canadian Pacific Railway Company will sell you good, productive land at from $15 to $30 per acre and give you twenty years to pay for it. Interest at from 2 to 6 percent. You cannot lose if you buy land of the Canadian Pacific. They want you to have the land; the Company wants your freight haul. Why don't you join our next excursion party on September 19th. A very cheap ticket will be furnished you on that date. For further information write F. O. Smokstad, Canadian Pacific Agent, 101 South Delaware Ave., Mason City, Iowa. adv 1c

SHOOTS WRONG MAN

FARMER, SHOT FOR CHICKEN THIEF BY SON IN LAW DIES INSTANTLY

Was Himself Watching For Thieves

J. H. Spilman, a farmer residing twelve miles northeast of Bloomfield, was accidently shot and killed by his son-in-law, Edward Hickenbotham, at his home at 10 o'clock last Sunday night.

Beleiving that he heard chicken thieves, Mr. Spilman had taken his rifle, left the house unheard by the family and was in the poultry lot watching when Hickenbotham. hearing him and thinking him the thief, fired. The bullet entered the right side of his back and he died in thirty minutes.

Mr. Spilman was 69 years of age, had served on the Wapello county board of supervisors, and was known by many. Nine children survive.

BOY SCOUT CORNER

No meeting was held last Monday night, several members of the troop having other interests on hand that evening.

Regular meeting at Headquarters at 8:00 o'clock next Monday evening, September 11th.

HE RODE TOO FAST

YOUTH TOSSED OFF HORSE AND KILLED

Floyd County Parents Find His Body When They Go to Pasture

Vernon Melcher, 11 year old son of Mr. and Mrs. Charles O. Melcher, living five and a half miles southwest of Charles City, was thrown from his hore asnd killed Tuesday morning.

Vernon was in the habit of going for the cattle and left in the forenoon as usual to go to the pasture. Soon after he departed the horse returned riderless to the farm house and the boy's parents becoming alarmed went to hunt for him. finding him dead in the pasture with a gash on the side of his head which would indicate that his skull was crushed.

In looking for the cause of the accident a large hole was found which had been enlarged from a gopher hole, when efforts had been made to get rid of the gopher and near the hole were signs which would indicate that the horse had fallen and attempt to regain its footing. Forty feet from the hole and in line with the direction the horse was taking, was found the body of the boy.

The supposition is that he was riding at a good rate of speed, to have been thrown so far and that the horse had stepped in the hole throwing the rider.

—Program—

HANCOCK COUNTY SUNDAY SCHOOL CONVENTION

Thursday, September 14, Liberty M. E. Church

MORNING

9:30 Opening—Devotional and Praise..... .....Rev. E. Dale Calkins

9:50 Welcome—E. G. Beier, Supt. Liberty S. S.

10:00 "Some Social Functions the Church school Should Sanction." Mrs. Gladys Fillenwarth

10:15 "The Christian Education of the Home Through the Church School..... ..... Mrs. Louis Auten, State Worker

10:40 Song—Special ..... Liberty Choir

10:45 "The Frame of a Church School"..... .....Walter Hutton, Gen. Sec.

11:15 Appointment of Committees. Adjournment.

AFTERNOON

1:00 Committee Meeting.

1:30 Praise Service ..... Rev. Bergmann

1:45 Round Table Discussion, Mrs. Wil Sparks

2:45 Song ..... Ladies' Quartette, Klemme

2:30 Report of County Secretary, Mrs. Durant.

2:45 Report of Committees. Election and Installation of Officers.

3:00 "The Scope of the Sunday School"..... ..... Walter G. Hutton. Song—Special..... Goodell Choir.

3:45 "What the Sunday School Can Contribute to the Child Life of Today. Mrs. Ray Baker

4:05 Address on Children's Work, Mrs. Auten. Adjournment.

EVENING

7:30 Song Service ..... Rev. Bruce Gillis

8:00 "What Young People Think of the S. S." ..... Emery Schaffer.

8:20 Song—Special ..... Liberty Choir

8:30 "A Great Opportunity for Service"..... ..... Walter Hutton, Gen. Sec.

Adjournment.

Everybody please bring baskets for a picnic dinner and supper at the church.

Klemme Schools Open With The Largest Enrollment In History

SCHOOL HAS LARGEST ENROLLMENT IN HISTORY

Baseball Team Organized Wednesday

The Klemme Public Schools opened up Monday with the largest enrollment in the history of the school. As a result of this the high school department is congested and part of the student body will occupy the 7th and 8th grade room for the present.

Organization of the School System—

L. Neese, Superintendent.

Miss McKahan, Principle of the High School Department.

Miss Smith, 7th and 8th Grades.

Mrs. Gibbs, 4th, 5th and 6th Grades.

Miss Everest, 1st, 2nd and the 3rd Grades.

Enrollment—

9th Grade—22.
10th Grade—10.
11th rade—6.
8th rade—9.
7th rade—5.
6th Grade—10.
5th Grade—9.
4th Grade—7.
3rd Grade—16.
2nd. Grade—11.
1st. Grade—7.

The High School is so congested that the Juniors will have to be placed in the 7th and 8th Grade Room for the present.

Baseball Organized

The Baseball team was organized Wednesday evening with Gearald Koerner elected captain and Glenn Busch elected assistant captain of the K. H. S. squad.

Games will be scheduled with nine or ten of the neighboring schools.

Watch the School Notes

The School Notes Column will be a regular feature of the Times during the school year. As the school was so busy getting settled down for study this week, very little time was available for writing up very many notes, but more will appear in the future. Watch for them!

JUST ONLY A RUMOR

ELECTRIC POWER NOT TO BE TURNED OFF

Rumor Has No Grounds Says Myron Haskins

A rumor was going the rounds in Klemme the latter part of the week that the Iowa Falls Electric Company was entirely out of coal and that the plant would shut off power on Tuesday.

We were at Garner Sunday and took the trouble to look up Manager Myron Haskins and he told us that there was nothing to it, and that the company had coal to run for some time. They would not shut down without first notifying their patrons. With the coal strike settled it is almost certain that they will be able to ge enough coal o keep running.

Klemme women, hearing the rumor, were more than busy Monday trying to get their washing, ironing, and canning all done before the "juice" was turned off! We bet some of them done a whole week's work at once on account of the scare.

100 In the Shade!

Yesterday it was "some warm" and perhaps as warm as any day this summer. At 1:00 o'clock p. m. the thermometer registered 100 degrees in the shade.

Why worry about coal shortage on a hot day like that?

AVERY CLUB MEETS

CLUB MEETING AT THE HOME OF MR. AND MRS. V. A. COOK

North Avery Progressive Club Met Last Friday Evening.

The North Avery Progressive Club met last Friday evening, September 1st, at te hhome of Mr. and Mrs. V. A. Cook. The interest in the meeting was much in evidence by the large attendance, every family being represented.

After the regular business meeting the following program was enjoyed:

Scripture Reading, Mrs. Fred Bachman.

Community Singing.

J. J. Cook spoke on, "What benefit do I derive from attending the North Iowa Fair."

C. A. Arnold gave an interesting account of his visit to the Iowa State Fair.

Mr. Arnold especially emphasized the activities of the Farm Bureau.

Mrs. Arnold read, "Old Watermelon Time is Coming 'Round Again." This was followed by a treat of melon sserved by the hostess. It was a feast enjoyed by all.

The Club guests were, Mr. and Mrs Herrick, of Los Angeles, California; Mr. and Mrs. Chase; Mr. and Mrs. Lemke; Mr. and Mrs. Barges and Mr. Wellemeyer.

STORE BURNS DOWN

BUSINESS BLOCK AT PLYMOUTH RUINED BY FIRE

The W. H. Borman hardware and drug store on the west side of the street at Plymouth, Iowa, burned last Saturday night. Fire was discovered at 10:45 p. m. by boys who gave the alarm. As Mrs. Borman had locked the store about 20 minutes before and Mr. Borman was at Iowa Falls and arrived home about midnight, the first he knew of the fire was at that time.

The Joe Casper family, who occupy rooms in the south side of the store moved out practically all their furniture, clothes, etc., except the stoves.

The fire is suppoesd to have started from wiring. There is some insurance. All buildings in town were watched for about one hour. A fire was started in the lumber yard about three blocks away but was very quickly extinguished.

FOR FARMERS ONLY

A DEPARTMENT FOR "BOSSY"

The Times' Dairy Columns Of Practical Value

Recent discussion of the properties and value of vitamines has emphasized the importance of the use of plenty of good rich cream and butter. Dairying has become one of the most important of farm industries. Modern marketing methods have reduced the drudgery of the dairyman and put the small producer in position to sell his daily "crop" in bulk at the shipping station or creamery instead of peddling it a quart at a time. Improved methods in dairying are constantly being introduced, and the Dairy Column appearing in The Times is one of the means by which this is accomplished.

If you farmers have not being reading this column you are missing out on some valuable information, which is prepared by an expert on the dairying subject.

The dairy notes will be found each week on page seven.

IS OF VALUE TO ALL

IT'S REAL INTERESTING TO ALL

Our "Magazine Department" of the Times Presents a Variety of Material

The Times is especially proud of its feature entitled "Our Magazine Department," because it provides so many kinds of high-class material in small space. There is a "School Days" cartoon by "Dwig," a poem by Will M. Haupin, a recipe department conducted by Nellie Maxwell. a little esay "Uncommon Sense," by John Blake, another under the general heading, "Something to Think About," by F. A. Walker, a little humor, and other choice bits.

Readers of The Times can always find something inspiring, something instructive, something entertaining, and something funny in "Our Magazine Department." If you have not been reading it, begin now.

This interesting feature occupys page six of each issue of the Times.

UNDER GOVERNMENT SUPERVISION

BILLION DOLLARS

U. S. VICTORY LOAN CALLED

The calling of a large portion of the Victory loan prior to maturity, at $100 and interest, gives the holders two things to consider:

1. Holding the bonds until the date called for redemption. after which all interest stops, and receive only par for the bkonds.

2. Selling your bonds through us and receive market price, (which is more than par at this time) and accrued interest, giving you an opportunity to place your money at a higher rate of interest than you now receive.

All other Government issues are now selling above par. We may be able to make some suggestions to you and will be glad to have you call and talk with us about this matter.

First National Bank
"The Bank for Everybody'."

Marie Prevost

THE RIGHT THING *at the* RIGHT TIME

By MARY MARSHALL DUFFEE

FOR THE CHAPERON

Air and manner are more expressive than words.—Richardson.

IF YOU were asked to act as chaperon for a party of young girls and boys would you know just what you ought to do if you undertook that responsibility?

A chaperon need not be married—but when an unmarried chaperon is chosen she should be a person of dignified appearance and of mature years. If the chaperon is married, she need not be accompanied by her husband, even when the party is in the evening; though if you are asking a married woman to perform this service for you you should, of course, include an invitation to her husband also.

If it is a theater party, she should be given the best place. If the guests are seated in a box then she sits in one of the front seats. At a dance a chaperon may dance a few dances, but it would be rather out of keeping with her responsibility to dance all or even the majority of the dances. She need not, of course, watch the young women in the party as if she were a duenna, but she should make a point to be in evidence all through the party. At a small dance the guests who know her should make it a point to present the other young people to her. If she is chaperoning a certain young woman at a larger dance then they should emphatically present their escorts to her. Needless to say, the chaperon always remains until the last guest or dancer has gone. If you do not feel like remaining until the "wee sma' hours" do not accept an invitation to chaperon a dance, for since the war is over dances are continued much later than they have been, and unless the chaperon has been especially enjoined by the parents of her charges, or unless they are very young, she should not object to this late dancing.

One of the most difficult tasks that any chaperon ever has to perform is that of "calling down" one of her charges. Occasionally, of course, some daring young person will indulge in one of the dance steps that are looked upon askance by proper folks. But if the chaperon herself has not danced for a decade or so she must make allowances for the changes that have taken place in the way young persons dance. It is extremely ill-bred to call a dancer down conspicuously. In most cases it is better to wait until the dance is through and the dancers have left the floor and then to make the request for a change in mode of dancing quite confidentially.

A LINE O' CHEER

By John Kendrick Bangs.

TIME'S COURSE

OLD Father Time's a swift old boy
Who brings us stores of woe and joy,
And never fails to stand close by
E'en though he runs with speed so high.
In early days he gives us Youth,
With all its searching after Truth,
Then through a somewhat mellower stage
He leads us gently on to Age
To find in ports beyond life's sea
The quiet of Eternity.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

BERNICE

BERNICE is an auspicious name. It means "bringing victory" and is one of the many names derived from the Greek "nike," signifying victory. Nike was the goddess of victory and named the images which adorned the prows of the warships of Greece. The famous Winged Victory is the largest of the Nikes.

Feminine names ending in "nike" were very popular with the Greeks. Berenike was used in early times in Macedonia and was sometimes spelled Pherenike. The princesses of the two Greek kingdoms of Syria and Egypt favored Berenike and there are innumerable instances of its use by them in early Greek history.

It was from these royal patrons Bernice came to be adopted by the family of Herod. The name occurs frequently in the history of Christianity and it was borne by that Bernice who heard the defense of St. Paul.

France liked the name, though it seems to lack all trace of French influence. The peasants of Normandy created Berenice and bestowed it upon their daughters. The French Veronique and the English Veronica are said to be corrupt forms of the name, but much doubt is cast upon such a contention.

The moonstone is the gem of Bernice. It is said to protect her from all danger and to bring her true love. It is believed that one can note the waxing and waning of the moon in its depths and that lovers can read the future therein. Monday is her lucky day and 2 her lucky number.

DON'T FALL FOR SPANISH SWINDLE

Americans Have Quit Going to Spain to Rescue Wealthy Imprisoned Princesses.

GERMANS ARE NOW VICTIMS

Impostors Who Market Adventures to Credulous Investors Give Their Princesses Names of Famous Women Long Dead.

Granada, Spain.—Americans have quit coming to Spain in search of the beautiful and wealthy princesses imprisoned in a dark, damp tower by a greedy uncle who is anxious to annex her fortune.

The historic old Spanish swindle apparently has gone out of fashion in the United States, but it is still in vogue in other parts of the world. Germany has recently supplied quite a crop of kind-hearted gentlemen who advanced money for the release of the dark-eyed Spanish beauty who was suffering in a rat-infested cell and slowly dying on a diet of bread and water while the bats hovered about her head and added to the terrors of her solitary confinement.

Beauties in Granada.

Granada has always been a popular center for the men who have contributed to the relief of imprisoned beauties. Washington Irving and scores of lesser writers have credited Granada with having more beautiful women than any other city in the world.

The legend of the Rose of the Alhambra and the stories of the three beautiful princesses, Zayda, Zorayda and Zorahayda, hover about the Alhambra and make it the natural refuge for disappointed investors in distressed beauty.

So it is not strange that searchers for princesses should come to Granada after having sought vainly for mythical castles in mythical mountains. Most of the modern Spanish princesses are being held captives in castles by the sea. Castles by the sea are so much damper, and then it is much more romantic for rescue parties to approach the rock coast in ships and wave to the imprisoned princess, who will promptly tear her clothing to bits and make a rope with which she will lower herself from the gloomy tower.

Many of the impostors who are marketing adventure to credulous investors give their princesses the names of famous women who have been dead for centuries. Moraymah and Aishah, queens of the Moorish regime, who have been dead for over 400 years, and many other celebrities of history and legend have lent their names to princesses supposed to be in distress.

Visitors Are Warned.

Hotel keepers in Granada have become skilled in detecting visitors who are searching for imprisoned beauties. They usually make very guarded inquiries and seldom admit they have been duped. Frequently they inquire for gypsy fortune tellers, or astrologers, who probably charge well for their services.

Letters concerning the distressed princesses are usually marked strictly confidential, and instructions are given that nothing must be said to anyone lest the life of the princess be endangered. Most of the dupes are too much ashamed of their plight to confess openly that they have been gulled.

VOLCANOES OUR BEST FRIENDS

Geologist Says Without Them We Would Have No Oceans or Carbon Dioxide.

KATMAI ERUPTION DESCRIBED

Most Tremendous Volcanic Explosion of History Passed Unnoticed Because It Was So Far From Centers of Civilization.

Washington.—It might be a surprise to many to be told that the fire-spitting, lava-spouting, earth-rocking volcano is one of mankind's best friends rather than his arch enemy, but such is the surprising declaration which was explained to the conference on geography of the National Education association in Boston recently.

The most tremendous volcanic eruption of history, that of Mount Katmai in Alaska in 1912, was described in this connection by Dr. Robert F. Griggs, leader of several parties sent to the scene of the cataclysm by the National Geographic society, and who discovered the valley of Ten Thousand Smokes, Katmai's neighbor wonder of nature.

Mankind's debt to the volcano has been more fully recognized by results of recent researches, says a bulletin of the society describing the unheaval. Without volcanoes, it is now believed, there would be no oceans, and to volcanoes we are indebted for carbon dioxide, without which human life could not exist.

Katmai Explosion Unnoticed.

The explosion of Katmai, the conference was told, was unnoticed because it was so far from the centers of civilization. Had the eruption occurred near New York city, the bulletin declares, the suphurous fumes would have polluted the air everywhere east of the Rocky mountains; the noise would have reverberated like an artillery duel across the central states. The lower Hudson itself would have been turned into a gigantic tomb.

However, due to the lack of population in that far region, there was no loss of life, and the eruption provides scientists and geographers now one of their greatest opportunities to study the phenomenon of volcanic action.

Though generally unaware of the eruption until long after, every inhabitant of the country, and almost of the world, felt its effects, one of which was the cold damp summer of 1912. This was caused by the interception of sunlight by the long-hanging dust cloud in the upper air. Even in cloudless Sahara, it was declared, the sky was overcast.

Repeat Ice Age.

A succession of such mighty explosions could plunge the earth into another ice age, it is believed.

An area around Katmai, larger than the state of Delaware, was covered that summer by more than a foot of volcanic ash which was enough to destroy all but the hardiest of vegetation. When the explosion occurred two cubic miles of material were blown off the top of the mountain, and the present whereabouts of the mountain top is still a mystery to scientists.

GIVE BOUNTY FOR MALE BABES

Government of Montenegro Takes Steps to Increase the Rapidly Dwindling Birth Rate.

Cetinje, Montenegro.—There has been an alarming decrease in the birth rate of Montenegro, due to the loss during the war of so many of the "Black Mountain's" fighting men. The government is offering premiums to mothers who bear male children. The females now greatly outnumber the males.

The incentives offered by the government to mothers of male children have resulted in pathetic appeals from the untutored peasant women to the American Red Cross nurses to give them "the medicine to make a boy."

In Montenegro boys are considered much more valuable than girls, and the constant prayer of the mountain dweller is that she may be blessed with a male child. This disparity in the sexes is largely the outgrowth of the days when Turkey held dominion over the Balkans and when the liberty-loving Montenegrins had an ever-present need of men to defend the homeland.

In Montenegro the women do all the work, the men considering manual labor undignified. They feel it is their chief duty to carry firearms and swords, talk politics and prepare for the next war.

BRIDE AND EX-SUITOR DROWN

Double Tragedy Ends Gay Night Among Cabarets of Hoboken.

Union Hill, N. J.—Mrs. Margaret Gallagher, nineteen, bride of two months, ended a gay night of rounds of Hoboken and Union Hill (N. J.) cabarets in the company of Thomas Cassidy, a suitor before her marriage to Andrew Gallagher, by leaping into the North river from a ferry boat at 5 o'clock in the morning. Cassidy leaped to rescue her and both were drowned.

Frontéering.

Wife—How many fish did you catch last Saturday, George?

Husband—Six, darling—all beauties.

Wife—I thought so. That fish dealer has made a mistake again. He's charged us for eight.—Stray Stories.

WHY ?

IS THE SKY BLUE

AFTER astronomers and scientists of various kinds had puzzled over this apparently simple question for many hundreds of years, Prof. John Tyndall, a famous scholar of the last century, solved the mystery with the following explanation:

Sunlight is pure white light, made up of rays of the seven primary colors which are seen in the rainbow—red, orange, yellow, green, blue, indigo and violet. The sky, which is really the air which surrounds the earth, is filled with myriads of tiny specks or particles of matter which absorb some of the colors in the rays of sunlight and reflect others—forming the combination which we have come to know as "sky blue." The variations in shade of this blue is due to the fact that the atmosphere is filled with different densities of these dust-particles at different times and also to the varying angles at which the sunlight strikes upon them. After a rain, however, the air is washed comparatively clear and the sky then appears at its true blue which we are accustomed to associate with it. If one could penetrate outside the shell of air which surrounds the earth, the "sky," instead of being blue, would appear to be pure white because there would be nothing to impede the direct rays of the white sunlight.

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

"SHALL I TRAVEL?"

SOMETIMES the mount of the moon, or Luna, bears a large number of horizontal lines, in addition to the vertical lines of travel. If these horizontal lines cross the face of the mount and reach the line of fate, the journeys undertaker by the subject have been or will be longer and more important than those indicated by the short, heavy, vertical lines on the same mount. But the travels, in this case, may be within the subject's own country and not outside its boundaries.

When the horizontal lines enter the line of fate and travel upward with it, they show voyages that will benefit the subject materially. But when the end of any of these horizontal lines droops or curves downward toward the wrist, the voyage has been or will be unsuccessful. Lines that ascend, no matter how short a distance, indicate successful voyages. When one of these horizontal lines crosses another, the voyage will be repeated, for some important reason. If such a line bears a square, danger is indicated, but the subject is protected from misfortune.

KIDDIES SIX

By Will M. Maupin

THE DAY AFTER

"LICKED to a frazzle!" But, say,
What is the use of repining?
Home at the close of the day—
Arms of our loved ones entwining.
Out of the fret and the worry,
Out of the din and the strife;
Out of the battle and worry—
Home and the joytime of life.

Downed in the battle! But, say,
What is the profit in sorrow?
Love is still lighting the way
On to a glorious morrow.
Out of the turmoil and fuming
Out of the worry and wiles,
Love with its welcome is looming,
Beckoning on with its smiles.

Whipped to a standstill! But, say,
Still there is joy in the losing
If love binds the wounds of the fray
After the battle's confusing.
Out of the smoke and the rattle,
After the heat of the fray;
After the din of the battle,
Love lights the close of the day.

The Friendly Path

By Walter I. Robinson

READJUSTMENT

"MONEY grows or money goes." But it will neither grow nor leave one of its own accord.

Many persons have had these facts brought home to them with a jolt. Unfortunately, however, they did not recognize the value of what they obtained when it came in fast.

Harsh lessons are usually well learned. The man who foolishly trusts a rotten plank to carry him across a whirling stream and then pays for his folly by a stiff fight for life, always is more cautious when he must walk another plank to follow his pathway on the other side of a stream.

The same logic may justly be applied to every walk of life. If one spends all he earns, the money naturally goes; but, if he is wise and saves something, what he saves is certain to grow if properly invested. And it is surprising how fast it will grow and what an assistance it will become when the source of supply becomes weak or slow in producing.

Whatever the difficulties one has faced during the period of depression incident to readjustment of economic conditions, he still has much for which to offer thanks. Long faces and grumbling are inclined to increase the world's pessimism and hamper the progress back toward normalcy. It is far better to be a good sport—if we be permitted to use gaming language—then one is more likely to see the brighter side.

Out of the struggles and discouragements the country and world at large have been experiencing, common sense will eventually rise to a higher plane than it has occupied for several years. And, though many may have foolishly spent all they earned when prosperity was with them and since have been finding it difficult to make both ends meet, when the tide turns back to normal, greater value will be placed on incomes, more caution will be exercised in spending, more money will be saved, simple and healthful pleasures will be appreciated and there will be wider appreciation of the privilege of earning fair wages or making fair profits on business done.

Painful though the lesson of readjustment is, it was necessary to assure honesty and happiness in the years to come.

Public sale of Big Type Chester White and Poland China Hogs, on Thursday, October 5th. 75 head of Boar Gilts and Sows. Write for catalog. R. C. Ludeke, Klemme, Iowa. adv 2c

Dr. R. W. Shultz, of Mason City, was visiting with some of his Klemme friends Friday. He recently returned from Kirksville, Mo., where he spent about seven weeks studying up on some new methods of osteopathy.

"Scotty" Erwin, and family, of Rockford, Iowa, were visiting at the Clint Erwin home, and with other friends here last Thursday ."Scotty" is in the restaurant business at Rockford and was formerly in the same line of business here.

Mr. and Mrs. Schoh, son and his wife, of Caledona, Minnesota, came last Thursday and remained until Saturday visiting with Mrs. Schroeder and Mr. and Mrs. Marlin Croner. They were enroute to Nebraska.

Valentine Josten went to Mason City Monday to enter the Mercy Hospital, where he submitted to an operation Tuesday. We presume that he is getting along alright as we have heard of r reports to the contrary.

Mrs. Henry Groves, of De Kalb, Illinois, came Monday from Algona, where she had been visiting, for a two weeks visit at the home of her son here, Dr. J. L. Herselhuus and wife.

Mr. and Mrs. Billy Keraus left last Sunday in their car for the Twin Cities to spend a few days at the Minnesota State Fair. They then drove to Aberdeen, S. Dak., for a few days visit before returning to Klemme. Billy is taking his vacation this week.

Ye Editor and family and Mr. and Mrs. J. Jorgenson of Garner, drove to Algona and LuVerne Sunday just to see what we could see. Farmers were scrubbing their stock at the Algona Fair Grounds getting them in shape for the fair this week. Crop looked drier there than in this vicinity.

Donald Nissen came from Sioux City Monday for week's visit at the J. N. Day home. From here he will go to Lake Okoboji to spend another week of his vacation before returning to his duties at Sioux City. Since graduating from Morningside, Donald has been working in a bank at Sioux City.

Mrs. Ralph Elder was the subject of another operation at the Hampton Hospital last week Thursday. She had her first operation about six weeks ago but on account of her weakened condition the last operation was postponed. She will now be able to return to Klemme soon, news which her many friends here will be glad to learn.

The Iowa Falls Electric Co. gave a mortgage June 1st for $3,000,000 on their plants at Iowa Falls and Garner and the points between. It was recorded in Hancock County last week. We do not ordinarily report it when anyone gives a mortgage, but mortgages of that amount are not recorded in Hancock County very often.—Garner Signal.

A light rain fell in Klemme this morning about seven o'clock. A heavier rain fell a few miles northwest of here. The sun shining thru the rain formed a very pretty rainbow in the west and according to the old saying, "A rainbow in the night i a ssailor's delight, but a rainbow in the morning is a sailor's warning," so we might look for more rain before the day is over.

Mr. and Mrs. Ben Swalve have been enjoying a lot of company the past few days. Last evening Mr. and Mrs. Wes Dreif, their daughter and her husband, who were recently married, all of Freeport, Illinois, stopped with the Swalves for a short time before continuing on their way to Del Rapids, South Dakota. The former is a couisn of Ben's. Tuesday evening Charles Schutpeltz and family drove in from Lane, S. Dak.. for a ten days stay at the Swalve home and for a visit withk other relatives and friends here. Mrs. Schutpeltz is a daughter of Mr. and Mrs. Swalve.

FATHER TAKES A VACATION

Ussed to wonder just why Father never had much time to play. Used to wonder why he'd rather work each minute of the day. Used to wonder why he never loafed along the road and shirked; can't recall a time father played while others worked. Father didn't dress in fashion, sort of hated clothing new; style with him was not a passion —he had other things in view. Boy's are blind to much that's going on about 'em every day and I had no way of knowing what became of father's pay. All I knew was when I needed shoes I goty 'em on the spot; ever thing for which I pleaded somehow father always got. Wondered season after season why he never took a rest, and that I might be the reason then I never guessed. Saw his cheeks were getting paler, didn't understand just why, saw his body growing frailer then at last I saw him— die. Rest had come, his tasks were ended; calm was written on his brow; fathers life was big and splendid — and I understand it now.—Detroit Free Press.

Reformed Church Notes

As Rev. A. A. Depping will be at Wabashaw, Minn., to attend a mission festival, there will be no services at the Reformed Church in the morning next Sunday. However, Rev. C. Schmid will conduct srevices at the church in the afternoon at 2:00 o'clock. Please remember the change in time.

LOCAL BUTTER FINE

LOCAL BUTTER SCORES HIGH AT IOWA STATE FAIR

Missed Out On Prizes By Only A Small Fraction

Those who furnished cream for the special batches of butter for the North Iowa Fair and also for the Iowa State Fair did very good and furnished a very fine flavored quality cream from which we made two very fine flavored tubs of butter.

After going through all the butter at a scoring contest, the Judges pick out what they call "the shake," which is a few out of the whole lot and these few left determine who shall get the prizes.

Our tub at each of these scorings was in the shake so we lost out just by a fraction of a point.

Our tub at the State Fair scored 95 points.

We will have to do a little better in order to get 1st. So those of you who are asked to furnish cream will please do the very best you can and we will do our very best to win out.

Thanking you for your co-operation, Klemme Co-Op. Creamery.

NEARLY LOST LIFE

A JOKE NEARLY COST HIM HIS LIFE

Tables Turned For Practical Joker Near Rockford

In attempting to play a practical joke on the Bohlen boys, who live near Rockford, Joe Walskey, young tiler, had the joke turned on himself in a way which almost cost him his life.

The Bohlen boys were preparing to load oats from the bin into a wagon, preparatory to taking them to town to sell. Walskey climbed into the bin, thinking to stop the oats from running into the chute, and thus playing a joke on the boys. Instead, when the chute was opened the oats descended with such force as to make a suction which drew the young man down and covered him with about three feet of oats.

Realizing his danger he screamed loudly enough to attract attention, and then began a lively scramble to rescue the young man before he met death by smothering. To do so the walls of the bin had to be torn out, and when he was finally extricated he was unconscious.

THEY STEAL WEEDS

HERE'S SOMETHING NEW IN THE WAY OF BURGLARY

Thieves Steal Ginsing Roots From Monona Farmer

Near Monona in Clayton County, a farmer named Ferguson had a big patch of ginsing roots, which were planted 25 years ago. None of these have been disturbed in recent years, the idea being to permit them to expand to the limit. Some culprit got next to the proposition and proceeded to help himself to the valuable crop, taking roots to the value of perhaps $1,000. As soon as the theft was discovered bloodhounds were placed on the trail and this led to a clue that may be successfully worked out later. Ginsing roots sell for about $10 a pound but it takes a long time to grow a sufficient amount to make the business profitable.

Ginsing, golden seal and other medical herbs grow wild in northeastern Iowa. Ginsing roots can also be found in Hancock County as those who know the plant have said it can be found in the vicinity of Pilot Mound.

HE'S A LUCKY MAN

FORMER WRIGHT COUNTY MAN STRIKES BIG GUSHER

He's One Of The Lucky Few Who Beat The Oil Game

Word was received in Clarion to the effect that H. L. Hock, a former well known resident of Wright county, has made a lucky strike in the California oil fields. He in company to sink a well 50-50 on a five acre tract near Los Angeles and awarded a contract to another company to sink a well on the 50-50 basis. The other day the drillers brought in a gusher, the flow yielding 3.500 barrels per day.

We haven't heard of any Klemme men getting rich off of their oil stock purchased a couple of years ago.

SHE SAVES CHILDREN

MOTHER SAVES CHILDREN WHO FELL INTO WELL

Children Fall Thirty Feet But Are Not Hurt

Two little children of Mr. and Mrs. E. Nielsen, of Ackley, Iowa, had a miraculous escape from death last Thursday, and the mother played the heroic part. The children, 3 and 2 years old, had been playing about the house, when suddenly the mother's attention was attracted by faint cries. Hastily dropping her work, she ran to the street, but the sounds came from an opposite direction, and returning. the cries led her to a well at the rear of the lot.

The children while at play had fallen through a broken board on the platform of the well, and had fallen down, 30 feet, into 3 feet of water. The mother frantically tore another plank off the platform and clambered into the well, down the jagged rocky sides, and rescued her two little ones.

Holding the little children with one arm, she worked herself back to the top again in the same manner that she had descended. The little ones escaped with only slight bruises, and within a comparatively short time were at play again, none the worse for their thrilling experience.

BUGS EAT METALS

INSECTS DAMAGE CANAL CABLE

They Must Have Cast Iron Stomachs To Do This Stunt

Insects may damage metals and other materials, in addition to crops. According to reports received by the United States Department of Agriculture, the termite "Coptotermes niger Snyder" is causing serious damage to lead-covered cables at the locks of the Panama Canal. These termites work through the lead, often causing large openings, and then travel between the two wires of the Duplex cable. Since the space between these two wires is not large, they eat away the insulation. Another termite, "Nasutitermes ephratae Holmgren," is also a very serious offender. It does not care for the lead, but works havoc in rubber, cloth, and other insulation. Studies on these and other termites are being made.

WITH DAVE JONES

U-111 IS FINALLY SUNK

Carrying out the strict letter of the treaty agreement to sink surrendered German submarines in deep water, the navy has sent the notorious U-111 to the bottom of the sea off the Winter Quarters shoal lightship on the Virginia coast. Several months ago when the navy start ed to sink the U-111 she sprung a leak while being towed to the ocean graveyard and sank in Lynnhaven Roads insidethe Virginia capes. At great expense she was raised and patched up and last week finally was taken out to sea by the mine sweeper Falcon, which opened the hatches of the captive and then sent her down with a depth charge.

Nobody wants exact justice because everybody wants to keep out of jail.

OLD BONES FOUND

FIFTEEN SKULLS FOUND BY IOWA FALLS ROAD WORKERS

An Old Indian Mound Uncovered On Farm Near Alden

The knowledge of state archeologists will probably be necessary to determine the history of the remains recently disinterred on a farm northwest of Alden. In doing some road work, near the Charles Brassfield farm, some Iowa Falls workmen plowed into a mound to get dirt for a fill. In doing so, a skull was unearthed. Interested in the discovery, the workmen went a little deeper and discovered more bones, resulting in their finding fifteen skulls and other bones, as well as a number of beads. While unable to determine the race, the beads lend color to the theory that an Indian burying ground has been uneathed, or the site of an Indian battle field discovered. The oldest settler knows nothing of there being a cemetery near the location of the discovery and the matter will probably be submitted to students of archeology to solve the mystery that surrounds this discovery.

YOU CAN SELL IT

ADVERTISE TO SELL PRODUCTS

Let Public Know That a Good Crop Is Waiting For Them at a Fair Price

"I've got more apples than I know what to do with; they're rotting on the ground. How can I sell them?"

"Advertise!"

That was the answer to the apple grower who wrote in distress to the agricultural journalism department at Iowa State College.

In every community in Iowa there are farmers who have a surplus of apples, or honey or vegetables suitable for canning, or other food products. Also in every community there are many folks who do not have them. but want them and do not know where to get them. Advertising brings them together, to their mutual advantage.

"Advertising has been proved an efficient and economical way of selling special farm products by more than one farmer," says F. W. Beckman, head of the work in agricultural journalism at Ames. "Right near Ames is a farmer with a good sized orchard who disposes of all his early and late apples, cider, vinegar and other products by advertising. Moreover, his advertising brings his customers to his farm, and he has to deliver only a small part of his sales. Four families out of five live in town can readily get to his orchard because they drive automobiles. His advertising bill runs up pretty well, but it saves him many times its amount in time and trouble and gasoline.

"This particular farmer uses both small 'for-sale' ads and larger display space. The display space attracts more attention. However. any farmer who has special products to sell can get splendid help from his local newspaper man in working out an advertising campaign and advise as to the best kind of advertising for his selling problem."

This week we are running just such an ad as the Ames gentleman tells about. You will find it elsewhere in this issue. Mr. Luick is using newspaper ink to tell the community he has fine apples and we'll bet that he sells every apple on the place. Many farmers are beginning to realize what advertising will do. It brings the buyer and the seller together. Try it Mr. Farmer.

THUGS TREAT HORSES ROUGH

Legs of Horses Are Wired Together With Barbed Wire

Officers of Jones County are investigating one of the most dastardly crimes committed in the county in many years. Last week Monday night unknown persons bound the hind legs of the horses of Ed. Shimerda together with barbed wire, using a stick to draw the wire together tightly. The horses were running in the pasture on his farm north east of Anamosa. The horses were badly lamed.

Bloodhounds were secured as soon as the matter was reported to the authorities, but they were unable to pick up any definite trail.

High School Being Remodeled; More Room Needed

CORWITH UNLUCKY

CORWITH AGAIN VISITED BY FIRE

Lightning Causes Damage This Time

An electrical storm sweeping over this ecstion of the state last Thursday morning caused damage at the town of Corwith when lightning struck an ice house and blacksmith shop and also put the telephone line out of commission for several hours. Lightning also struck a barn five miles south of Britt. A cable was struck at Garner the same morning and put their telephone system out of service. The ice house and shop at Corwith were visited by flames twice before the past year, but were extinguished before much damage was caused.

Only a light rain fell in Klemme with no electrical storm here.

IT BRINGS THE CROWDS SAYS LIVE MERCHANT

R. H. Reed, of the Wadsworth & Reed Dept. Store says: "I find it pays to let your customers know what you have in stock. I beleive in advertising. We never run a big advertisement but what we notice an increase in the lines advertised. This week we wish to make our fall announcement. Make our advertisement prominent, don't be stingy with the space, as the more people that notice and read our ads, the bigger business we get." We like to hear our advertisers talk this way. We think no one will be able to overlook the big ad. we set for this store in this issue."—Lake Mills Graphic.

And sure enough, we looked for the ad. and found it to be a 72 inch ad on the back page of the Graphic, and Reed & Wadsworth are not afraid to quote prices when they advertise as nearly every article in the ad was followed by the price. We don't know the gentlemen but we bet they are good businessmen.

BRING HOME PRIZES

GREIMAN TEAM WON HORSE SHORE CONTEST AT CO. FAIR

Ben Greiman Is Again Champion Of Hancock County

The Greiman team—Ben and Aarron Greiman, again cleaned up on the horse shoe tournament at the Hancock County Fair by winning two first places and one second place of the three day event. Ben also brought home the highest individual score and was the high man each day of the tournament.

Here is what the boys copped off at the fair: Champion Team Prize of $10.00 and a set of nickle plated regulation shoes for 433 points and 113 ringers to their credit. Ben's Champion Individual Prize of $5.00 and a pair of nickle plated shoes as he had 227 indivual points and 57 ringers to his credit. This team won 18 games. Ben also copped a $5.00 prize for having the greatest number of individual ringers.

The Greimans are real horse shoe pitchers and you can depend on our fellows to bring home everything worth getting.

Fred Shuldt's Boy Has Accident

Curtis, the son of Mr. and Mrs. Fred Schuldt who live south of this city on the east road to Goodell, was seriously injured Sunday when the pony he was riding, kicked him in the forehead, when he had dismounted to open a gate. The lad was given medical attention immediately and is getting along fairly well at this writing.

AVERY RESIDENT DEAD

Mrs. P. Costello passed away at her home north of Goodell Sunday. She was an old resident of Avery township and was past 90 years of age. Funeral services were held on Tuesday at the Catholic church at Goodell and the remains laid at rest in the cemetery near Belmond.

SCHOOL BEING RE-MODELED TO ACCOMODATE NEW STUDENTS

High School Filled To Overflowing So More Room Needed

So many students entered our school this year in the high school department that the teaching staff could not find seats for all of them. Something had to be done at once and so the schools, being closed this week, it was an opportune time for the board to have some necessary remodeling done.

In order to take care of the overflow of high school students, the eighth grade room and the recitation room to the south of it are being made into one large room for the high school. The partition is being removed between the recitation and the grade room and the space thus gained will seat about fifty-five students.

The eighth grade will then move into the old high school assembly room, which will be partitioned off into two rooms—one for the grade and the other for a recitation room.

Electric lights were also installed the other day for use on dull days and for evening entertainments in the high school assembly.

What the future will be is hard to foresee at this time. If the enrollment continues to grow as it has the past two years, Klemme will have to have a larger building.

A board member told us that the tuition they were receiving from outside students amounted to about $1100 a year; but on the other hand it was costing Klemme $108 a month tuition to send Klemme students to Garner this year to finish the twelfth grade.

Here's an interesting problem for the taxpayer—"Does it pay to be without a new school any longer?"

With plenty of room we could have twelve grades, and save the tuition charges which we are now paying out to Garner. And it is a fair gamble that our outside tuition students would increase in number for the simple reason that they woud be able to take the entire high school course here.

RECORD HEIGHT REACHED BY WEATHER BUREAU BALLOON

Goes Up Thirteen Miles And Then Bursts

A record height for the Washington district was reached recently by the balloon sent up by the Weather Bureau of the United States Department of Agriculture in connection with its observations of upper air conditions. The balloon was seen to burst at 22,590 meters, a height of about 13 miles, after being watch 123 minutes.

The aerological service of the U. S. Weather Bureau releases a balloon filled with hydrogen gas twice daily, at 8 a. m. and at 3 p. m., from the roof of the Weather Bureau Office, provided there is no rain. The object is to get the direction and the velocity of the wind movements at various elevations as far as the balloon can be observed. These balloons are small, about 2 1-2 feet in diameter when inflated, and made of the finest quality uncolored rubber. The watching is done through a theodolite, and the time is kept by a clock which sounds an alarm every minute. The distance the balloon travels is calculated from computations of how high a balloon of given weight will rise per minute.

The information obtained is useful to those interested in &ying, and when recorded on charts showing conditions at various elevations for each of the 15 stations of the weather bureau scattered over the United States which make these particular observations it is an aid in the daily task of weather forecasting. An unusual point in connection with this record height reached on August 17 was the fact that, although the general drift of winds in the Washington district is from west to east, the prevailing winds on this day were from the east and northeast.

HELICOPTER TO BE USED SOON

Dr. Albert F. Zahm, Expert for the Navy, Declares It Is Not an Impossibility.

TWO TYPES OFFERED TO U. S.

Experiments Are Continuing in Hope of Perfecting a Motor That Can Be Depended Upon to Maintain Machine in Air.

Washington.—The helicoptor, or vertical rising air machine, is not an impossibility, and, should a real use for such a type arise, successful ones may be seen before many years, according to Dr. Albert F. Zahm, aeronautical expert for the navy. Had there been a need for the helicopter during the war, he said, any of several types could have been perfected, of which working models have been flown.

Much interest has been shown of late in reports of successful machines of the helicopter type being perfected in both Germany and England. However, while some flights have been made, none of any consequence are reported by a machine equipped with horizontal propellers or revolving planes, designed to rise vertically from a confined space and descend on the same.

That the helicopter is possible Doctor Zahm said, is proved by the German machine, which, rising several times to moderate heights, has carried observers, remained almost stationary while in the air, and descended in safety. The machine, however, has made no extended flight, such as would prove its dependability, but was tethered to the ground by a mooring rope. At times, when the motors failed, the machine dropped, and the passengers saved themselves only by leaping with parachutes.

The experiments are continuing, however, with the purpose of perfecting a motor which can be depended upon to maintain the machine without sudden failure, the scientist explained, for, as soon as the engine stops, the machine cannot glide to the ground, as does an airplane, but drops vertically. In a proper descent the propellers should be whirled slowly to ease the landing.

Two Other Types Offered.

Present hopes of attaining successful vertical flight rest mainly upon the endeavors of Emil Berliner, Washington inventor, whose experiments with the helicopter have extended over a long time; and of Louis Brennan of London, whose newest machine is reported as nearing completion. He is working to win the £50,000 prize offered by the British air ministry for successful flight.

The helicopters upon which most experimentation has been made consist mainly of two or more propeller screws mounted horizontally on a vertical shaft bearing engines, fuel and passengers. Equal numbers of propeller blades must revolve in opposite directions, that the body of the machine may not spin like a top.

Whether or not this type of machine is brought to actual use, Doctor Zahm stated, at least two other types of planes that may fly vertically have been offered to the government. This fact is not widely known.

One of these, of which Dr. Zahm observed experiments with a working model, was almost identical with the present type of plane, except that mounted behind the body were two sets of air vanes, in groups, tilted at an adjustable angle, like those of Venetian blinds.

When the power was turned on, he said, the "wash" of the air stream from the propellers, pushing against these groups of vanes, caused the model to rise gently vertically. The model was held in midair by the action, and when the power diminished it returned gently to earth. A full-size machine of the type, he said, would be equipped with engines of immense power in order to furnish sufficient air pressure, and when driven to a sufficient altitude the vanes would be so adjusted that horizontal motion would result. The plane could then fly in the usual manner, finally using the vanes again to descend vertically.

Able to Rest Motionless.

The other type offered to the army, he said, was of the present wing plan, equipped with three propellers, two placed far out toward the wind ends, and with vertical rudders and allerons similar to those in use. The quicker lifting power was to be gained by having the wash of the central propeller act upon elevators on the tail of the body, while the side propellers would wash against the special allerons on the wing tips.

In the air, Doctor Zahm continued, this machine could maneuver exactly as does the ordinary plane, cut figures and do stunts, besides being able to rest motionless in any desired position—vertical with nose up, if need be.

The best feature, he said, is that both planes of the new types are entirely feasible and can be constructed at any time. In fact, several European inventors and manufacturers are patenting designs of the second type, notably the Frenchman, Bleriot, one of the pioneers of aviation.

Experts for the government studied the second type during the war, it was explained, but the matter went no further.

PAVING ON PIKE OPENED UP TO AUTOISTS LAST FRIDAY

The paving on the North Iowa Pike between Garner and Duncan, and about a quarter mile west of that point, was officially opened to traffic last week, Friday.

There still remains about two miles of paving to be completed between Britt and Duncan, which will be finished about the first of next month and will be opened for traffic about the first of November. It is expected that the paving in Kossuth county will also be finished up about the same time and this will give a continuous strip of concrete road across noth Iowa extending from Algona to Charles City.

Work on the Wilson highway between Klemme and Garner is coming along fast. This stretch will be hard surfaced next spring.

Apples For Sale

DURING WEEK OF SEPTEMBER 18—23.

WEALTHIES GREENINGS WOLF RIVERS

Apples from the Hancock County Spraying Demonstrational Orchard will be picked and ready for sale beginning Monday, September 18th. Cider will be made as wanted and sold at 40c per gallon. Bring your jugs.

This orchard was sprayed four times. Fruit will be hand picked and hand sorted, and will be absolutely clean.

Get your supply of apples and cider during the fore part of the week as the supply is limited.

How long will it take to double my savings at 5 per cent interest compounded semi-annually

Of the more than 11 millions of savings depositors in the United States, perhaps only a comparatively small number realize the interest-earning power of their savings.

For instance: A savings fund of $500 drawing compound interest at the rate of 5 percent will at the end of the 18th year amount to $1,140.09, without the addition of a single penny on the part of the savings depositor. Your $500 will have earned $640.09 in interest during that period.

That is something to think about when you start a savings account for yourself or for your small son or daughter.

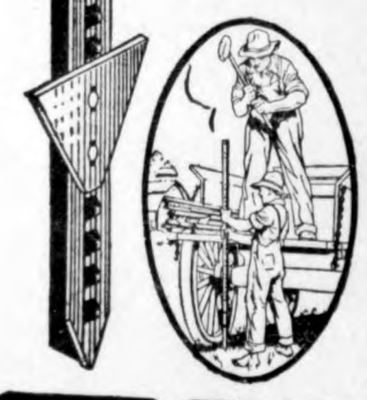
NEW **Red Top** GUARANTEED
Double Strength Studded Tee
Steel Fence Posts

See the New Double Strength Studded RED TOP Tee Post

NOTHING we can say to you about this new RED TOP will be half as convincing as your seeing it. We know it's hard to believe that the Studded Tee is such a great improvement over the old steel posts. It's stronger because there isn't a hole in it. It's more durable, easier to attach fencing to, better looking and better finished and firmer in the fence line.

Best For Building New Fences or Repairing Old Ones

Whether you are building new fences or repairing old ones, the RED TOP Studded Tee gives you the biggest value. It can be easily and quickly driven alongside of rotted posts without disturbing the fencing—costs less than better grades of wood posts—and can be set for one-tenth the cost of setting wood posts.



RED TOP Perfection Staples have twice the holding power of a regular 1½-inch staple in a punched steel post and 267% more than the same staple in a wood post.

Come in and get the whole story, and see the post for yourself. It will only take a minute and your fencing problem will be settled for you.

NEW **Red Top** GUARANTEED
Steel Fence Posts

We have a good stock of RED TOPS on hand and can take care of your needs without delay.

THE GREATEST THINGS

The best day—today.

The biggest fool—the boy or girl who will not go to school.

The greatest deceiver—one who deceives himself.

The most beautiful woman—the one you love.

The greatest mistake—giving up.

The most expensive indulgence—hate.

The cheapest, stupidest and easiest thing to do—find fault.

The greatest trouble maker—talking too much.

The worst bankrupt—the soul that has lost its enthusiam.

The cleverest man—the one who always does what he thinks is right.

The best teacher —the one who makes you want to learn.

The best part of anyone's religion —gentleness and cheerfulness.

The meanest thing—jealously.

The most important training—training in democracy.

The greatest need—common sense

The greatest gift—forgiveness.

—Dr. Frank Crane.

She was out sitting at the village dance when a well meaning but rather rustic youth saw a spider running over her lace collar.

"Permit me", he murmered as he bent to remove it.

"How dare you to speak to me without an introduction? she said witheringly.

At this point the spider reached her neck and suddenly she cried "Oh, take it off! Pleas take it off!"

The young fellow only said, I couldn't think of it miss, I haven't been introduced to the spider."—Boston Transcript.

GARNER HAS NEW POSTOFFICE

Moved Into New Quarters Sunday

The Post Office Department at Garner moved into their new location Sunday and are now housed in a fine, modern equipped building.

Their new location is the first door north of the First National Bank It was formerly a pool hool, but was entirely remodeled.

The entire force of clerks and rural carriers were busy Sunday moving the equipment into the new quaters.

Just because things were different when you were a boy is no reason to suppose they were better—and your boy knows it.

You'd naturally suppose house rent would be low now that so many people live in their automobiles.

In many a home the husband is a hard worker because the wife is a hard shirker.

AVERY NO. 2

Miss Lurley Wilson opened up her school at Avery No. 2 last Monday morning.

Mrs. Robert Roth visited with her mother last Monday.

The Win-One Class of the English M. E. Church held its meeting at the home of the president, Verner Nelson, last week Tuesday evening. A good time was enjoyed by all. Ice cream and cake were served as refreshments. All are looking forward to the next meeting.

Mr. and Mrs. D. D. Ross of Garner were visitors at the Wm. Bell home last Thursday afternoon.

Silo filling started in the East Avery Ring last Wednesday.

Pigs, poultry, potatoes, bread, canned vegetables and meats, and other products which boys and girls enrolled in extension clubs grew or prepared following demonstrations by county extension workers were shown in 4,300 exhibits at community fairs and 6,000 exhibits at county, district, and state fairs last year, according to reports to the United States Department of Agriculture.

TOTEM POLES ARE MADE AT SATE REFORMATORY

Alaskan Indians Carve Poles For Anamosa Park

Two totem poles, 12 and 18 feet high are being carved for the state park at Anamosa by three Indians prisioners from Alaska, who are confined in the reformatory according to J. H. Strief, chairman of the board of control. The Indians are federal prisioners, two having been convicted of burglary and one of embezzlement. The poles are carved from the oak trees and after the faces and figures are made, the Indians paint the idols.

TO ALL TO WHOM IT MAY CONCERN:

The commissioner appointed to locate a road commencing at the East Quarter corner of Section 19 and the West Quarter corner of Section 20 or the Quarter corner common to Section 19—20 in Twp. 94 Range 24 West of the 5th P. BIRD DIES WITH HER YOUNG

Killed in Forest Fire in New Jersey Rather Than Desert Her Nest.

Asbury Park, N. J.—A dead gaunt pine was a giant torch half way up its length in the big woods fire, which swept the outskirts of Brielle recently. At the very top was a giant fish-hawk nest, and braving the inferno of flame and smoke a parent bird hovered over the nest with a fish in its beak for the three baby inmates craning their necks over the edge. Finally, wheeling in desperation, the bird conquered its terror and settled upon the nest just as the tree toppled with a resounding crash into the blazing underbrush, carrying the hawk mother and babes to death.

BUYS DOGS FOR "PARADISE"

Texas Man Will Save Hounds Doomed to Death by City—To Build Big Kennels.

Beaumont, Tex.—The first "dog paradise" in the South will be established here by T. D. Brooks, president of the Brooks Supply company, who already has bought more than 200 canines of all breeds, sizes and colors which were awaiting execution in the city dog pound.

Mr. Brooks said he would build the largest and most complete dog kennel in the South. He gives as his only reason for the project that he was anxious to save the lives of homeless dogs which were to have been asphyxiated by the city.

Mr. and Mrs. Charles Nissen, of Rockwell City, Iowa, were visiting with Klemme relatives and friends Saturday. Mr. Nissen is in the newspaper business at Rockwell City.

Wm. X. Smith, and family. and J. N. Day and family, joined the J. E. Baumgartner family at Mason City Sunday and together the three families enjoyed a picnic dinner in the Mason City tourist camp.

Peter Josten and family were at Mason City Friday for a visit with Val. Josten who is in a hospital recovering from a recent operation. He is getting along fine now.

Joe Miller has about finished up painting the exterior of Jacobs & Son's store and it makes a fine appearing building now. Ed. has also excavated under the store and is installing a furnace.

We acknowledge a pleasant visit Monday from Mr. G. L. Caswell, of Ames, Iowa. Mr. Caswell is the traveling secretary for the Iowa Press Association, of which this paper is a member. Mr. Caswell was on his way to Mason City to speak at a meeting of the National Ad Club.

Walt Bloom arrived in Klemme from his home at Los Angeles, Cal., Friday mornin. Walt mixes business with visiting when he comes to make his annual trip to the old home town. He is having some repairs done on his farm and the rest of the time he is busy shaking his right hand in the grasp of old time side-kicks. Walt reports that every body in California from this vicinity are well and happy.

We neglected to mention in our issue last week that Walter Lau and family and Walter Johnson returned on Sunday from their visit at Paxton, Illinois where they had been visiting Mrs. Lau's and Mr. Johnson's parents. They made the trip in the car and covered a distance of approximately 1300 miles. They all enjoyed the trip.

C. G. Waterman and Clarence Kluckhohn have both improved their property in south Klemme by having a new cement side walk built in front of their homes which adds greatly to the appearance of their property and the street. The city is putting in a new cement crossing between the Clarence Kluckhohn and R. W. Elder homes.

Probably few real boys ever liked their names unless they could be abbreviated to "Bill."

If you make a circus out of your business, your business will make a monkey out of you.

The world may be "going to the dogs," as some old timers say, but these old-timers don't seem to be in any rush to get out of it.

STATEMENT OF CONDITION OF STATE SAVINGS BANK

organized under the laws of Iowa, located at Klemme, in the County of Hancock, at the close of business on the 2nd day of September, A. D. 1922.

THE KLEMME TIMES

wenty-seventh Year—Number 2. Klemme, Iowa, Thursday Afternoon, September 21, 1922. $1.50 In Advance—$2.00 Outside of County

Doings Of The Week Reported By The Klemme Schools

Grade Room Notes

The week of vacation is over but absences in the fore part of the ek were many. Nearly half of Primary room children were ab- nt and nearly half of the Grammer om showed better attendance om showeda better attendance cord. Only three were absent. e cause of most of the absences unknown.

School is Remodeled

Back again to the old school ilding, but into a new room. It ost: seems as though it is a dif- ent building entirely (that is th our eyes shut), for the room is fferent and we even have electric hts. If we look at the walls we see the marks where once the lls of our old recitation room od, our new recitation room is much larger and better room. The grammer room is much small and occupies the north west corn- of the school building. It has door which leads directly to the ll, the pupils must either go thru recitation room or thru the high hool assembly room. In case of e the Grammer rooh pupils will in a terrible fix. But we, the pils of the Klemme School must feel bad for there will be a ght and better day coming bye d bye.

Junior Class Reorganize

A meeting of the Junior class was lled last Mondey evening by the rmer class president for the pur- se of reorganizing. Following are e class officers for the coming ar:-

President Clarence Elder
Vice President Marie Blank
Secretary and Treasurer Dolores Koerner
Entertainment Committee:
Maybelle Johnson, Chairman
Dolores Koerner
Bernice Tanner

The class colors were changed to arlet and bright green. They for- rly were yellow and green. The ss motto is "Facta non Verba" e class is not studying Latin, but ese words have such a good mean- g that the class choose them any- y. There are five girls and one y in the Junior class this year. you have any sympathy please stow it upon that poor boy. He eds it.

The Juniors have a very good ntertainment committee this year d they intend to have some real od times planned for the class is year.

The Freshman have not had their itiation yet but it will stand them ell in hand to look out.

7 MINERS KILLED

SCUE WORKERS FIND BODIES IN ARGONAUT MINE

re Imprisoned For Three Weeks; Gas Causes Death

Monday rescue workers tunneling om the Kennedy Mine broke the st barrier and entered the fatful rgonaut Mine, near Jackson, Cali- rnia, in which forty-seven gold ners had been imprisoned for a- ut three weeks, when they were pped due to a fire in the main aft and were unable to get out d were killed by the gas.

Rescue workers found all the bod- s in a horrorable condition and the ng exposure to the intense heat ade it difficut to identify them.

W. ELDER RESIGNS FROM SCHOOL BOARD

A. Jorgenson To Fill Vacancy Until Next Election

The resignation of R. W. Elder as member of the school board was ed and approved at a meeting of e school board Tuesday evening. r. Elder has taken charge of a eamery at Bode, Iowa, and expects move there soon and for that ason wished to resign from the ard. Mr. Elder has served on the ard a little over a year and a half. The board elected R. A. Jorgen- n to succeed him until the next hool election.

MR. BLUMER DEAD

OLD RESIDENT DIED TUESDAY

Funeral Services Will Be Held Friday Afternoon

After an illness of several weeks, death came as a releif to Grandpa Blumer Tuesday evening at eleven o'clock. His age was against him in his battle for health. He is one of the old residents of this community and his figure was a common sight on our streets until health failed him this summer.

Funeral services have been set for Friday afternoon at one o'clock at the house and at one-thirty o'clock at the Reformed Cchurch. Rev. A. A. Depping, his pastor, will conduct the services.

TOO MUCH "JUICE"

YOUTH KILLED BY KESLEY "HIGH LINE"

Daredevil Climbs Electric Pole And Meets Instant Death

BELLE PLAINE, Sept. 18— The funeral services of Neil Schubert, of this city, were held at the Congregational church. He was about 20 years of age and had been doing carpenter work for the Northwestern railway at Kesley and met death by electrocution. Just before his death he had been playing ball with some others and in a spirit of daring and against the wishes of the others he climbed a pole carrying the high tension wires. He placed his arms over one wire and one leg over another wire, thus completing a circuit. A voltage of 33,000 passed through his body causing instant death.

The body was brought to his home in this city. He was the first of a family of twelve children to pass away. His father died several months ago.

THE SCARE IS OVER

NO NEW CASES OF DIPHTHERIA THE PAST WEEK

Health Board Has Situation Well In Hand; Says State Officer

There have been many false reports concerning the diphtheria cases in and near Klemme and it might be well for the people to have the "straight" of the matter.

In the first place there were only a small number of cases in this community, less than a dozen all told and most of these were very mild. But as the local health board did not want the disease to spread they took drastic measures to have it checked at once, and of course this caused some alarm among the people. Dr. Griswold, of the Laboratories of the State Board of Health of Iowa City was called here and he stated that the local doctors had the situation well in hand and there was no cause for alarm. In a talk with us, he complimented the local doctors for the way they handled their cases.

At no time has the town been under quarantine as some people had heard in neighboring towns. The schools were closed for one week in order that the children might be examined, and a few "germ carriers" were thus found, who might have spread the disease had the schools not closed. However, it was also necessary to remodel the school and it would have had to close for a week anyway. Dr. Griswold advised to re-open the schools as soon as possible, as the children could be watched for a few days and the last report we heard was that the tests conducted showed the children to be all free from diphtheria.

Folks, you can come to Klemme again without fear of contracting diphtheria as the disease has run its course. At no time did we have many cases, and those were light. If you hear any reports to the contray contradict them and brand them as false.

The man who is prepared to support a second family is able to support a big automobile.

A DOUBLE WEDDING

POPULAR KLEMME PEOPLE ARE MARRIED YESTERDAY

Pretty Double Wedding Held At The Ernest Henschen Home

Yesterday, Wednesday, September 20th, a pretty double wedding took place at the Ernest Henschen home north-east of Klemme when Elsie Henschen became the Bride of Mr. Fred Bell, of this place, and her sister, Lulu Henschen became the Bride of Otto Woiwood, of near Garner. Rev. C. A. Schmid was the officiating clergyman.

The double wedding which took place at 3:00 p. m. was witnessed by about sixty relatives and friends of the couples. At six o'clock the wedding dinner was served.

Thus we briefly give the facts of the happy event uniting these young people in the Holy Bonds of Matrimony.

All parties concerned are well known to our readers and come from the best of families.

Mr. and Mrs. Fred Bell will live on the Henschen place and Mr. and Mrs. Woiwood will live on the farm which he owns near Garner.

We extend congratulations and our best wishes to both of the happy couples.

THE BIGGEST BRIDGE

KLEMME HAS LARGEST BRIDGE IN HANCOCK COUNTY

Three Span Bridge Now Completed Over Iowa River Here

The new concrete bridge over the Iowa River just south of town has been completed, as well as the smaller over-flow bridge a few hundred feet north of the river bridge.

The new concrete and steel bridge which now spans the river is the largest bridge in Hancock County. The structure has three spans, each 34 feet long and was erected at a cost of $8,000. The county claims the same bridge would have cost twice that much last year. The over-flow bridge was built to take care of extra heavy rains when the water is high in the spring. It has about a twenty foot span.

Grading Progressing Rapidly

Grading on the Hilson Highway between Klemme and Garner is progressing rapidly and the majority of the work has been completed. A few short stretches here and there still require filling, but practically the bulk of the work has been done on the highway.

POLE CAUGHT AFIRE

HIGH LINE POLE CAUSES SOME EXCITEMENT HERE

High Voltage Pole Caught Fire Early Monday Morning

Those early birds who got up real early Monday morning to start the week's washing were wondering about the bright flashes and peculiar humming noise coming from the vicinity of the Farmers Elevator.

Upon investigation it was found that the pole south of the switch box on the Iowa Falls high line had caught fire in some manner and was having a regular July Fourth celebration all it's own. The light rain which was falling might have caused a short circuit and started the blaze. The rain fell a little harder and soon the fire wa osut.

A gang of electricians repaired the damaged cross arm on the pole Tuesday afternoon. The "juice" was shut off for several hours and Klemme was at a stand-still as far as power was concerned.

Editor R. R. Roberts, of the Britt News-Tribune, and Ole Peterson, also of Britt, stopped here for an hour or so Friday afternoon and "gassed" awhile with the Times force. Ole evidently didn't get his fill of Klemme air for he was back again Tuesday afternoon. Ole is well acquainted in Hancock County and we believe he knows more people and can call them by name than any other individual in the county. Everybody knows Ole.

Some people suffer in silence and others seem to be suffering if they are silent.

100 YEARS OLD; DIES

BUT ACCIDENT AT BIRTHDAY PARTY PROVES FATAL

Mrs. Likely Grandmother of Mrs. J. L. Hesselhuus, of This City

Happy, yet ending sad, was the birthday anniversary of Mrs. Mary Likely, of Ames, Iowa, grandmother of Mrs. J. L. Hesselhuus of this city.

Saturday, September 9, Mrs. Likely celebrated her one hundreth birth day anniversary and her children had prepared a dinner in honor of the great event. All were happy and Mrs. Likely was having a good time but as hse got up from the table she fell and broke her hip. Death followed one week later, Saturday. September 16. Funeral services were held at Ames Tuesday.

It is not often that a person reaches the age of one hundred years, but it seems sad to think this venerable old lady should have an accident proving fatal on her hundreth birthday.

OWN THREE MARKET

J. P. LARSEN & SONS BUY MEAT MARKET AT BELMOND

They Now Own a String of Three Good Meat Markets

J. P. Larsen & Sons, of this city closed a deal last week whereby they acquired the Cash Market at Belmond. Possession is to be given the first of October, when the former proprietor, Thos. Tyrrell, will turn over the keys and "Scoop" Larsen, who is now conducting the Garner shop, will take charge.

J. P. Larsen & Sons are now owners of a string of three meat markets: one at Klemme, Garner, and Belmond. The Klemme market is the central market as they do their butchering and manufacturing here for the other two shops. They then haul the finished products to the other shops as needed by them.

DO UNTO OTHERS

Why is it that, when a fellowman falls from grace, we are so prone to kick him down yet a little farther? Instead of offering him a helping hand, endeavoring to assist him to rise again and be one of us, we go out of our way to push him down farther. Is it just? Is it Christian? Is it "Doing unto others as we would have them do unto us?.

Why it it so many people think a prison is to punish. when as a matter of common sense it should be to reform? Why is a person forever damned because they have disobeyed once the laws of God or man? Is it so awful that we should fall from the dictates of ourselves occasionally? How many people would there be outside of prison if all were in who have broken the law? Mighty few folks, mighty few! The next time you feel inclined to swing the hammer on some one who is down, just stop to think whether you have any cause to make a noise—are you so free from taint that you can condem? If you are, order your casket, you're too good to live much longer.

But, some of you will say, we must do something to protect ourselves;if there were no laws and no public opinion where would we be? Better off with fewer laws most emphatically enforced, and do not confuse public opinion with back-fence gossip, there is a wide difference. Public opinion may justly condemn the offender for the act, but only gossip and narrow minded prejudice will kick him or her down farther. Because and individual has gone wrong it is no sign that such is to be expected always, that there is no decency in them. It is narrow-minded rather let us say, feeble minded fools who knock and jeer and gossip over the back fence, the store counter and the supper table that deny the fallen one a chance to rise. Do unto others as you would have them do unto you, for you may need to-morrow the help you deny another today.—Belmond Independent.

Everybody knows thath if he were rich he would be generous, which is what makes it so strange that so many rich folks are not.

Rural Schools of Hancock County Honored by the State

LARSEN IN ACCIDENT

TRUCK STRUCK BY GRAVEL HAULER ON WILSON

Truck Driver's Arm Broken When His Machine Turns Over

Clarence Larsen, of the Klemme Meat Market of this city, and Levi Anderson, truck driver for the gravel crew on the Wilson Highway, were the central figures in a smash-up Saturday forenoon on the highway north of Goodell near the Frank Quigley farm.

Larsen was delivering meat with his truck in that vicinity and was going north. Anderson, driving the big gravel truck was also traveling north. Larsen went to turn in on a private road when Anderson evidently tried to pass not knowing that Larsen would make a turn, and in trying to avoid a serious accident to swerved his machine, struck the rear of Larsen's truck and again swerved tipping over.

Anderson suffered a broken arm, and his truck was also damaged to some extent. Mr. Larsen was not hurt and his truck only damaged a little.

It appears that neither was to be blamed for the accident.

Anderson's home is at Swea City. He has been working with the graveling crew. We understand he was given medical treatment at Goodell and is getting along well.

NEW MAIL CARRIER

C. J. KROUSE SUCCESSFUL BIDDER FOR MAIL CARRIER

Will Carry Mail To And From Train To Post Office

Beginning Monday morning, C. J. Krouse took up his new duties as mail carrier for the postal department. He carries the mail to and from the post office and makes all the trains.

Quite a number put in bids for the job but his bid was the lowest and he will carry the mail for twenty dollars a month. The mail was formerly carried by the station agent or his helper.

A RAT BITES BABY

RAT BITES SMALL BABY; CONDITION CRITICAL

Little Tot May Die Because Of The Poisonous Bites of Rat

SHELDON, Sept. 14—The infant daughter of Mr. and Mrs. George Harkins is in a critical condition from the effects of being badly bitten by a rat, the rat having got into the baby's cab at night while the child was asleep.

After some doubts as to the cries of the child at 1:00 o'clock in the morning the parents found that a rat was in the cab and had bitten the baby in several places on the face. On the rat's reappearance the baby was rescued from danger by its parents.

CONCEALED HIS IDENTITY

A certain youg man had a amazingly large mouth which he contorted into an all-prevading smile whenever he wished to make a good impression. His sweetheart persuaaded him to "ask father", and the youth was determined to show himself to good advantage.

"Mr. Jenks," he began, streching his principle feature to the utmost of geniality, "I have come to ask for the hand of your daughter, I—"

"Just a momeent," interrupted the old gentleman. mildly; "Would you mind closing your mouth for a moment till I see who you are?"—Meedical Record.

ALL SET

"I'm thinking of shooting my husband and I want to retain you as my lawyer."

"But my dear madam, isn't this a rather unusual proceeding?"

"Why no, indeed. I thought the next thing to do was to engage a lawyer, as I've already had photographs taken and ordered some new gowns". Birmingham Age- Herald.

OUR RURAL SCHOOLS HONORED

Last year our county suceeded in winning one place in the State Schol arship Contest. This year we have won two places. Olof Eliason of Twin Lake Township, District No. 4, Miss Myra Mabie, teacher, is the boy from our county whose papers have been chose as one of th best fifteen sets in the state. Hallie Grieman of Ell Township, District No. 4, Miss Stella Huenamann, teacher, is the girl from our county who receives the same honor. Below is a copy of th leetter received from the State Department notifying County Superintendent Baggs of the sucess of his contestants, also the rules of the con test explaining what this scholarship contest really is and how it is conducted.

Des Moines, Iowa.
Department of Public Instruction
Mr. J. R. Baggs,
County Supt. of Schools.
Garner, Iowa.

Dear Mr. Baggs:

I am very glad to inform you tht Olof Eliason and Hallie Grieman are both winners in the State Scholarship contest this year and will both be awarded a special diploma signed by the Governor of Iowa, the U. S. Commissioner of Education and the Superintendent of Public Instruction.

I consider this one of the greatest honors that can come to a pupil, and I wish you would express to the teachers of these pupils my special appreciation of the effort put forth in training them. It is no small honor for a teacher to have trained a pupil who is among the thirty best students in the state, and I want to congratulate you ha you have two such strong teachers in the county.

Yours truly,
P. E. Mc Clenahan
Superintendent of Public Instruct-i on.

SCHOLARSHIP AWARD AND REGULATIONS FOR THE CONTEST

Department of Public Instruction,
Des Moines, Iowa.

For the past two terms the State Department of Public Instruction has conduced an educational conest to determine the boy and girl in each county of the state who can attain he highest rank in the common ranches, and to determine from among the winners in all counties the fifteen boys and fifteen girls who can attain the highest rank in the state. The interest in these conests has been so gratifying and encouraging that the Department is conducting the same kind of contest again this year. The rules for the contest are as follows:

1. Every contestant must be a pupil in regular attendance at some rural school, classified in the eighth grade.

2. The county superintendent hall determine the boy and girl who are successful candidates in his county and shall save the papers from the eighth grade examinations he papers for each successful candidate in the county shall be sent o the State Superintendent and will here be re-graded on a uniform basis. The fifteen boys and the ifteen girls there winning the highest honors will be given a special diploma in recognition of scholarship.

3. Diplomas will be issued to each of the successful candidates from each county. These will be signed by the Governor, State Superintendent, Inspector of Rural Schools and the County Superintendent.

4. Special diplomas will be issued to thirty students, fifteen boys, and fifteen girls, winning highest honors in the state. These will be signed by the Commissioner of Education of the United States.

Yours sincerely,
P. E. McCLENAHAN,
Supt. of Pub. Instruc.
F. A. Welch,
Inspector of Grade and Rural Schools.

TWO IN THIS VICINITY RECEIVE STATE GRADES

Twin Lake and Ell Pupils Win High Honors in State Contest

Honor War Dead of All Nations

Sculptor Outlines Most Pretentious Tribute of Modern Times to Soldiers of World War.

MUSEUM AND TEMPLE IN ONE

In Conception It Can Be Compared Only to the Wonderful Basilica of Imperial Rome—Is Leading Sculptor.

Rome.—An exhibition of Antonio Sciortino's "Monument of the Nations" will be opened in Rome in the fall, and the model, as well as thousands of sketches and plans, is to be on view in his studio at the British academy. This monument is one of the most pretentious ever planned in modern times. In conception it can be compared only to the wonderful basilica of Imperial Rome.

It was in 1917 that Professor Sciortino, pondering over the war in which millions of soldiers were killed, planned a monument which would be a fitting one for the heroic dead, as well as a museum and temple combined. His original idea was that it should be an international monument, one which could be erected on some historic spot, on a battlefield. He suggested to many friends that, while the bones scattered over many battlefields could be interred in the walls of the crypt, one central tomb should be a memorial for all, whether privates or officers. On the sketches which he made in 1917 he wrote: "Plans for a monument to an unknown soldier and sailor." It was his idea that millions should consider that tomb the resting place of their own lost ones.

For Noted Dead.

The monument is a building which will consist of three galleries, a library and a museum. In the first gallery there will be 300 instrumental percussions, which will be heard for miles around; in the second, 300 bells, which will peal on commemorative days, while in the central hall there will be an organ, to be played on solemn occasions. In whatever country it is erected it would be not only a monument to the memory of the fallen soldiers, but also a kind of Westminster Abbey, where men of note would be buried.

Antonio Sciortino, who occupies the post of director of arts at the British academy in Rome, is a man of great talent and is considered by many art critics to be the leading British sculptor of today. He studies not only in Rome, but also in Paris.

Though still a young man (he is thirty-nine years old) he has accomplished much. He works quickly, modeling with a rapidity which is contrary to the custom of many modern sculptors. His quickest bit of work was a mask made when he was in Paris ten or twelve years ago while visiting a friend's studio. It happened to be his last day in Paris and he had called in to say good-by to a fellow sculptor. He had only twenty minutes to spare. Seated in a corner, in an easy chair, was Leo Textonius, the American pianist, who had often asked Sciortino to make a model of his head. Sciortino took up a piece of clay and in little more than fifteen minutes had modeled a mask of the pianist.

This mask was hanging in the American artist's studio when Rodin paid a visit there. Rodin was enthusiastic at the originality of the work.

The winning of the competition in 1914, offered by the Duma committee of Kieff, was not only a personal, but an international success, as 300 sculptors of all nations competed for five years. Three times Sciortino competed and won money prizes. When in 1914 he won again it was decided to give him the order for the statue. The decision of the committee caused great indignation throughout Russia.

The committee then decided to hold a referendum. All the prominent men and women of Russia were asked to view the model and decide whether the Russian models were equal to that of the British sculptor. They unanimously held that the statue chosen was best of all the other 209. This referendum was taken carefully. The written opinions were placed in sealed envelopes, in a sealed box and only opened after all had finished voting.

The occupation of the city in Moscow by the Bolshevists prevented the statue ever being erected and the final award was never given to the sculptor. Now an effort is being made by the committee to collect subscription for the purpose of erecting the statue.

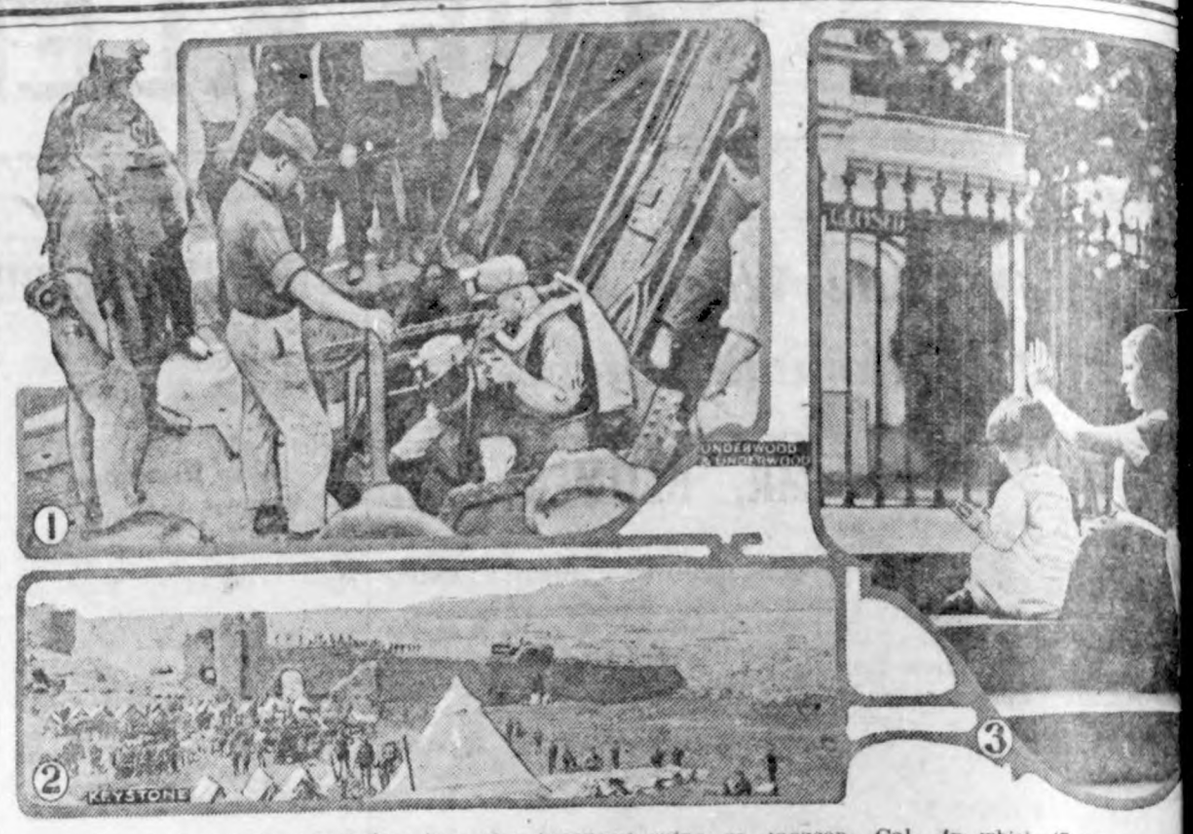
Paid $20 to Hear Dog Bark Over the Telephone

An American business man left his table in Muldoon's restaurant, in Havana, Cuba, and walked to the telephone.

"Give me Murray Hill, New York City, and tell the party who answers that I wish to speak to my bulldog," he said.

After a brief interval guests at a nearby table heard a faint "woof, woof," coming from the receiver. The charge was $20.

"Doggone," growled the man, "that's $10 a woof."



1. Squad of rescuers descending into the Argonaut mine at Jackson, Cal., in which 47 miners were tombed. 2. Greek encampment at Smyrna, photographed just before the Turks drove them out. 3. Chil of F. Sumner, "presidential shoemaker," praying outside the White House for the recovery of Mrs. Harding

Columbus' Bones Need Real Tomb

Plan for Great Monument Over Discoverer's Neglected Remains Is Revived.

IS PAN-AMERICAN PROJECT

Coffin at Santo Domigo is Now Opened So Visitors May Handle Relics—Plan Beacon Light for Navigators.

Washington.—Reorganization of a movement among Pan-American nations to provide a suitable memorial and final resting place for Christopher Columbus, the man who gave "the New World to the Old," has been reported to the War department by William E. Pilliam, receiver-general of Dominican customs. Mr. Pilliam's report says the project was relaunched recently and is commended to the sympathetic consideration of Pan-Americans everywhere.

Open Coffin for Visitors.

The remains of Columbus were brought to Santo Domingo from Spain in 1540, the report says, adding that it has been the practice lately to open the casket and permit high dignitaries or distinguished visitors to the island republic to handle personally some of the bone fragments.

"This happened upon the occasion of a visit by Secretary of War Stimson and party in 1911, also the year following, when Secretary Knox and numerous parties made their ceremonial trip around the Caribbean Circle," the report says. The writer was present upon both occasions and admits, but not without some self-reproach, that he, too, handled some of the bone fragments.

"It was that fact," the report continues, "which first suggested the idea that it should be the concern of Pan-Americans, the peoples of the twenty-one republics occupying the territory of North and South America, with the co-operation of Canada, to provide a suitable memorial and final resting place for Columbus in the 'Cradle of America,' as Santo Domingo is called.

Popular Move.

"A popular move it should be, and with its palpably popular appeal its failure would constitute a reflection upon Pan-America. Poor, unfortunate Santo Domingo cannot do it alone, though thirty years ago, at the four hundredth anniversary of the discovery of America, a Junta Nacional was duly constituted by Dominican government decree to erect a monument in the cathedral. That much was accomplished, but at the time it was understood the arrangement was temporary. While the monument at the cathedral is ornate, it is nowise commensurate with the greatness of the man, nor does it constitute a fitting or adequate homage for such a world character."

The report concludes with a statement that the project abandoned on account of the World war contemplates the erection of a massive tomb, its interior modeled after that at Les Invalides, Paris, with its exterior patterned after the lines of Grant's tomb, in New York. Superimposed on the tomb itself would be a beacon tower, about 300 feet in height, in the top of which would be a great light as an aid to navigation.

Wearing Quality of Leather Measured

Actual wear tests on army and civilian leather are compared with machine tests in the bureau of chemistry of the Department of Agriculture, where machines are being developed to measure the wearing quality of sole leather. R. W. Frey, in charge of leather work, is shown at one of the machines.

BISO WILL HAVE TO BE DEPORTED

Big Buffalo Will Be Sent to Montevideo, Uruguay.

Favorite of Visitors to Wichita National Forest Doomed to Exile Because Southern Neighbor Wants Specimen.

Washington.—Biso is unhappy!

He is to be deported, thrust from the land of his birth, torn from his wives and children and doomed to live in exile for the rest of his days.

Secretary of Agriculture Wallace has decreed that he must go; the forest service has arranged his transport and Biso is inconsolable.

Biso is the big buffalo bull that for 15 years has been the admiration of visitors to the Wichita national forest and game refuge in Oklahoma. The city of Montevideo, Uruguay, has asked that its zoological garden be supplied with an American bison and the forest service men who have charge of the buffalo on the Wichita say that Biso will be an excellent representative of this typical North American species whose once mighty herds roamed the great plains from Mexico to northern Canada.

In 1907 15 bison were "planted" in the Wichita national forest and have since increased to over 150 head. This herd promises to maintain the type and stamina of the original bison, since the animals are kept at all times under natural conditions. They subsist entirely on wild grasses and live within so large an inclosure that they are under practically no restraint.

So Biso has been well content and is reluctant to leave. Yet many of the younger buffalo bulls are casting envious glances at the old fellow. It would be very pleasant, they think, to doze idly beneath a palm tree and be served with fresh cut grasses or have their wrinkled noses patted by some dark-haired senorita.

But Biso has his doubts.

Spain Ousts Whole Mail Force Following Strike

The entire postal force of the Spanish postal service was dismissed by a governmental decree as a result of the recent strike which tied up the service for several days throughout Spain. The decree lays down rules for the reorganization of the postal staffs.

The strike, which paralyzed business throughout Spain, was actively waged by the letter assorters, who remained away from work, and indirectly by the other branches of the service, which conducted a "white strike," in which all reported for work, but listlessly attended to their duties.

Scotland's Many Islands.

The islands of Scotland number about 800 altogether.

NEWS REVIEW OF CURRENT EVENTS

Shopmen's Strike Is Broken By Separate Agreements With Many of the Roads.

MEN GO BACK AT OLD WAGES

Senators Lodge, Townsend and Poindexter Renominated—Republicans Win Maine Election by Fair Majority—Danger of New War in the Balkans.

By EDWARD W. PICKARD

SEPARATE agreements entered into by striking shopmen and railways representing about one-fifth of the country's mileage last week brought about a break in the strike that has lasted for some 75 days and threatened the nation's transportation facilities with demoralization. It is believed some other railways will soon make the same arrangement with the men, these including the Rock Island, the Burlington and the Northern Pacific.

Some of the big lines, notably the Pennsylvania, have not adopted the settlement plan. They assert they already have won the strike and will not make terms with the men who went out. Of the roads accepting the agreements the most important are:

New York Central lines and subsidiaries, including Michigan Central, Boston and Albany, and Big Four; Chicago, Milwaukee and St. Paul; Erie; Chicago and Northwestern and its subsidiary, the Chicago, St. Paul, Minneapolis and Omaha; Baltimore and Ohio; Seaboard Air line; Southern railway; New York, Chicago and St. Louis; The Monon; Wheeling and Lake Erie.

The agreements are, as they should be, a compromise. All the strikers, except those proven guilty of acts of violence, are to be taken back within thirty days at the prevailing pay prescribed by the federal railway labor board, and in the shops where they were formerly employed, but not necessarily at the same jobs. There is no specific provision regarding the matter of seniority rights, but it is believed this issue can be worked out satisfactorily after the men are back at work. Any controversies arising from the strike that cannot be settled otherwise are to be referred to a commission to be established, consisting of six representatives of the labor organizations involved and six representatives of the railroads. This commission is to remain in existence only until May 31, 1923, and none of its decisions nor the agreement in general "shall be used or cited in any controversy between these parties or between the railroads signing the same or any other class or classes of their employees in any other controversy that may hereafter arise." There is to be no intimidation nor oppression of the employees who remained at work or those who took the places of strikers, and all law suits pending as a result of the strike are to be dismissed.

CREDIT for arranging this agreement is evidently due mainly to S. Davies Warfield, president of the Seaboard Air line and head of a securities concern which owns large amounts of railway bonds. President Willard of the Baltimore and Ohio also was prominent in the peace negotiations; and B. M. Jewell, head of the striking organizations, proved amenable to all suggestions looking toward a fair and reasonable settlement.

Mr. Warfield, in a statement concerning the agreement, made this pertinent suggestion:

"Regional railroad labor boards should be properly and promptly established; a board named by each group of railroads that operate in each of the four rate-making districts into which the commission has divided the country; the men of each group of railroads to also organize boards to confer with the regional railroad boards. Negotiations could be successfully carried on and disputed questions settled if approached in good faith."

HEARING on the motion to have the strike injunction obtained by Attorney General Daugherty changed into a preliminary restraining order until a trial began last week before Federal Judge Wilkerson in Chicago, and the attorney general announced that it would proceed despite the partial agreements reached. The temporary injunction was extended ten days, but the court warned the government forces it would not be further extended. The government presented many thousands of affidavits telling of acts of violence and threats and other circumstances, all tending to prove its theory that a conspiracy existed, which in effect obstructed interstate commerce.

Mr. Daugherty's determination to press the case to a decision is based on his belief that the principles at stake are more important than any immediate issue or effect. The injunction, he thinks, if granted beyond the ten days now fixed by the court, will not only protect the workers who have taken places of strikers on roads not in the settlement, but will reach the question of responsibility of union leaders for acts of violence.

PRESIDENT HARDING and Secretary of Labor Davis were greatly pleased by the news of the partial strike settlement. The secretary said:

"American industry has overcome the last obstacle in the way of the greatest economic revival the nation has ever known. With the settlement of the strike on many of the trunk line railways assured, the whole industrial machinery of the country is ready for a forward movement unprecedented in our economic history.

"The disturbances in the bituminous and anthracite coal mining industries are in the past, and the 600,000 coal miners of the country are back at work. Our representatives in New England have advised me that in the textile workers' strike settlements are rapidly enabling the mills to resume operations.

"These three great industrial disputes have been the only hindrances to the nation in its rapid recovery from the industrial depression which we faced a year ago. With them out of the way progress toward prosperity will be swift and sure."

IT IS true, as Mr. Davis says, that the disturbances in the coal mining industry are ended, but the disturbances in the minds of the consumers of coal are just beginning. The dealers, greedy, unscrupulous and conscienceless, are demanding exorbitant prices for coal and the people are wailing, with little prospect of relief except in some states where the authorities have both the power and the will to check the profiteering. Meanwhile the congressional conferees have been disputing over the Cummins-Winslow coal distribution and price control bill, disagreeing as to its application to intrastate as well as interstate shipments. Henry Ford is the most vociferous of the big coal consumers, and according to the latest reports he had not altered his intention to shut down the Ford plants. He charges that the interstate commerce commission, through its control over empty coal cars, "is playing into the hands of coal profiteers under guise of regulations for the public good," and adds: "The same interests which own the public utilities, railroads and mines are using the commission as part of their scheme to fleece the public, and the scheme is so simple that nobody sees it."

CONSIDERABLY battered by results in recent primaries, the "old guard" of the Republican party resumed its smiling appearance last week after the primary elections were held in Massachusetts, Michigan and Washington. Senator Henry Cabot Lodge won over Joseph Walker by a three to one vote, and will have to contest the election with William A. Gaston, who defeated Sherman L. Whipple for the Democratic nomination. Senator Townsend of Michigan, who was opposed by three candidates, won his renomination by a plurality of about 25,000—a notable victory since he was hampered by the issue of "Newberryism." Out in Washington Miles Poindexter had little di in obtaining a renomination f senate. The Democratic nomi C. C. Dill.

The AMERICAN LEGION

(Matter for This Department Supplied by the American Legion News Service.)

TH BY GAS IS DENOUNCED

J. H. Mathews, Former World War Major, Condemns Method Used in Nevada.

vada's chamber of death, the gas which a new law in the state provides is to be used for the execution of condemned criminals, is strongly denounced by Prof. J. H. Mathews, chairman of the department of chemistry, University of Wisconsin, and an expert on poisonous gases. Professor Mathews served major in the World war, studying warfare at the British front and g in charge of the gas and flame h of the trench warfare section e United States army.

he purpose of gas in warfare is roduce as much agony and torture ossible, in order that the victim be at least incapacitated, if not act- killed," Major Mathews is quoted aying to the American Legion service. "And it is inconceivable a state should desire to use gases produce such effects. The pur- of capital punishment is to re- the victim quietly and effective- n order that society henceforth be protected and to serve as a ing to other potential evildoers. Is to be hoped that civilization reached a point where revenge is nger a motive. Only savages tor- their victims before killing them; se of any of the war gases to re- criminals would be quite in line the practice of savages."

fessor Mathews said there were which might be used for execu- if the use of gas at all could be deemed wise. Carbon dioxide, oisonous constituent of ordinary inating gas, he declared would e logical one to use. He asserted, ver, that if the administration of for execution of criminals were d out, it should be entirely in ands of medically trained men understand both its use and at- nt dangers.

he horrors of poorly carried out ecutions are sufficiently vivid in minds of thinking people to make abhor any method of execution may not be both humane and ive," he declared.

PROUD OF THIS LEGION HERO

Mourned as Dead, "Big Jim" Hanbery Returns and Is Accorded Honors for Bravery.

They mourned "Big Jim" as dead, and in Pittsburg, Kan., Enid, Okla., and Tulsa, Okla., there were memorial services. The newspapers carried stories of "Big Jim's bravery, of his sacrifice on the country's altar—all in the past tense.

"Jim isn't dead," Mrs. "Big Jim" insisted, and refused to attend the services. "He'll come back to me. I know it."

"And "Big Jim" did come back. "Big Jim," otherwise Lieut. James W. Hanbery, came back, through war's worst hell, to the woman who waited at home for him. He's a newspaper reporter now, in Omaha. And the other day "Big Jim" was summoned to Fort Crook, near Omaha, and in the presence of a thousand or more American Legion buddies and Hanford MacNider, national commander of the American Legion, and other notables, the Distinguished Service cross was pinned on his breast.

A letter from Gen. John J. Pershing, and one from Gov. Henry Allen of Kansas, were read, praising "Big Jim" for magnificent heroism. And the story was told again of how he fought his way back, dangerously wounded, to life, and back home again to the wife who held to the faith he would return.

Lieutenant Hanbery's act was cleaning out a German machine gun nest at Chateau Thierry. He and his men went forward in bayonet charge. All but 12 of the platoon were killed or wounded. "Big Jim" was wounded in the head, and his right arm paralyzed, but he kept on going, refusing medical attention, but insisting that his wounded men be looked after. He led a brilliant charge, personally capturing two of the German guns.

He sustained wounds in the head, right thigh and left arm. He crawled into a shell hole and was unconscious eight hours. When he recovered consciousness he bound up his own wounds and tried to help two other wounded men in the same hole—but they were killed by shells.

Then he tried to "dig in." But he was seen by a German gunner, and was hit a few more times. He "played 'possum," until the firing ceased. He tried to signal the attention of an American flyer, but a German airman, instead, saw him, and came swooping down, opening fire on the wounded officer with a machine gun. He "played 'possum" again.

And two hours later he crawled out of his hole and started, slowly, in agony, to crawl to the American lines. He couldn't walk. He rolled, crawled, pushed his way along inch by inch. A German sniper shot at him every time he rolled over, and added more wounds to his total. Finally the sniper got him with a bullet through the right thigh, and "Big Jim" fainted.

He was picked up the next day and sent to a hospital. He was unconscious 52 hours, and for a month his identity lost. The War department cabled his wife in Pittsburg, and parents in Enid, that he was dead. Then the services were held.

But two months later Mrs. Hanbery received a letter from "Big Jim," from a hospital in France. After being brought back to the States he was many months in the hospital. When he was able to get out he went to Omaha and became a newspaper reporter. When he enlisted, at the very start of the war, he was a teacher in the State Normal school at Pittsburg. It was with Company L, Fifty-ninth infantry, he went to France, and from the start he was called "Big Jim" because of his height—6 feet 2 inches in his bare feet.

LEGION MEN AS POLICEMEN

Portland, Oregon, Post Responds When the Call Is Made for Traffic Officers.

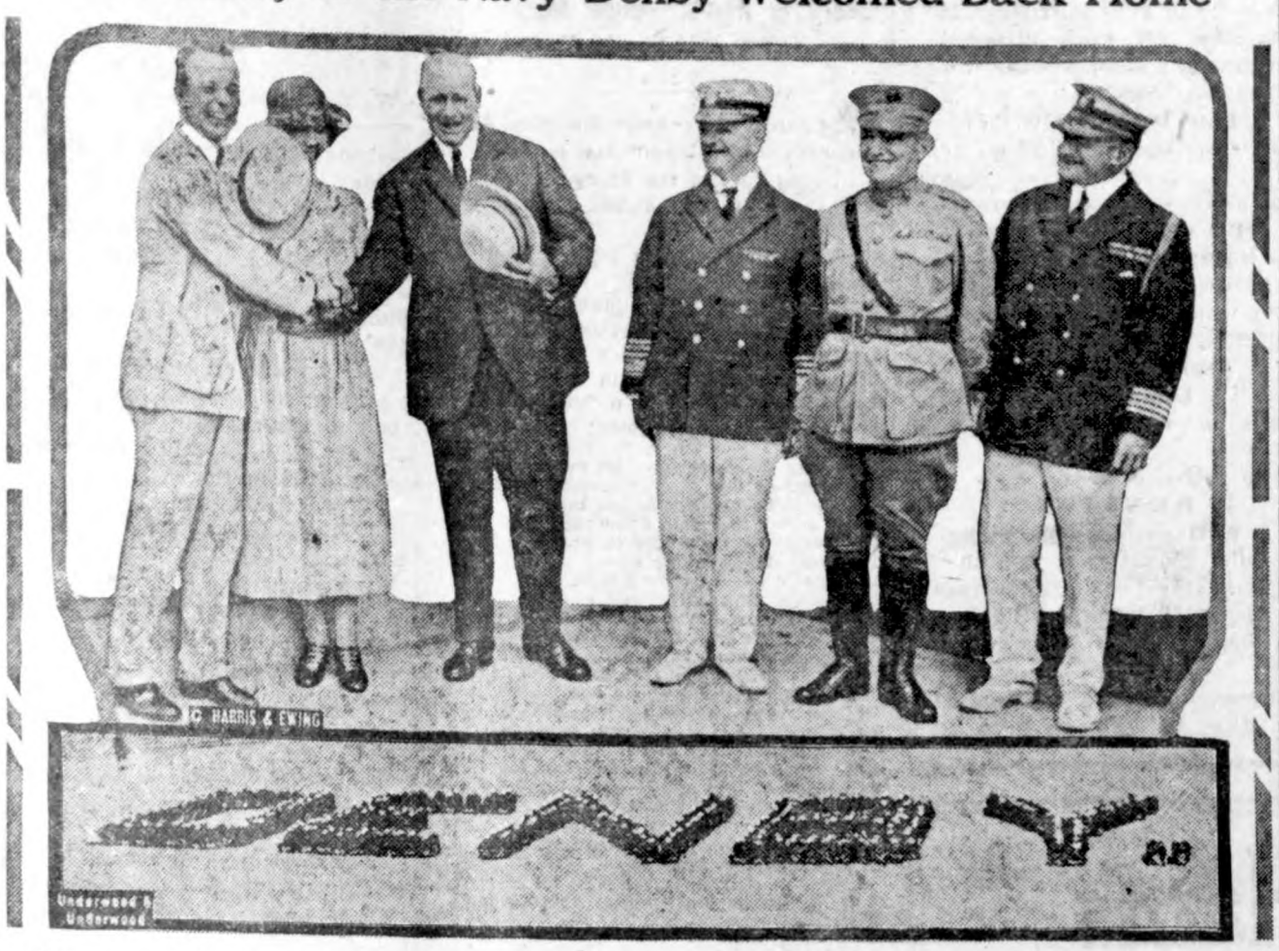
Glenn H. Ticer, one time infantryman and director of the employment bureau of Portland (Ore.) post of the American Legion, received a call from Portland's police commissioner one morning asking for ex-soldiers to act as policemen. The longshoremen's and water front employees' lockout was in full blast at the time and the regular traffic police were detailed for special duty.

The majority of the veterans donned their war time uniforms and wore police officers' badges on their O. D.'s where many of the men might have worn hero's medals. Fifty-two veterans were sworn in as "specials." One of them is pictured here. He's L. L. Robertson, who, with other service men, operated the "stop and go" signs for the two months the lockout lasted.

Will Greet Visitors.

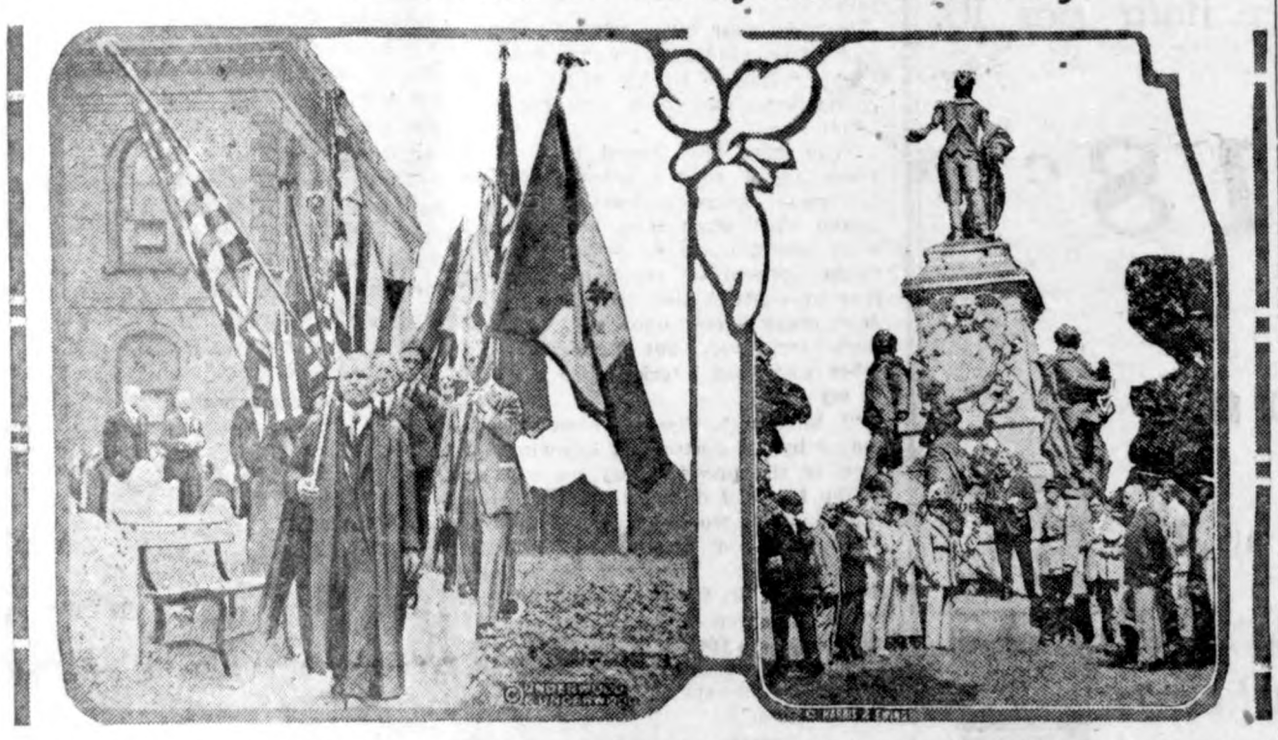
Four state senators and four members of the House of Representatives of the Louisiana legislature have been appointed members of a reception committee to greet distinguished visitors to the American Legion national convention in New Orleans, October 16-20.

Secretary of the Navy Denby Welcomed Back Home



Secretary of the Navy Denby was welcomed back to America after his trip to the Orient in ways that must have pleased him greatly. The illustration shows how the gobs at Goat Island training station, California, greeted him, and how the famous family smile broke out on the face of Assistant Secretary Theodore Roosevelt when the secretary arrived in Washington.

Americans Celebrate Lafayette's Birthday

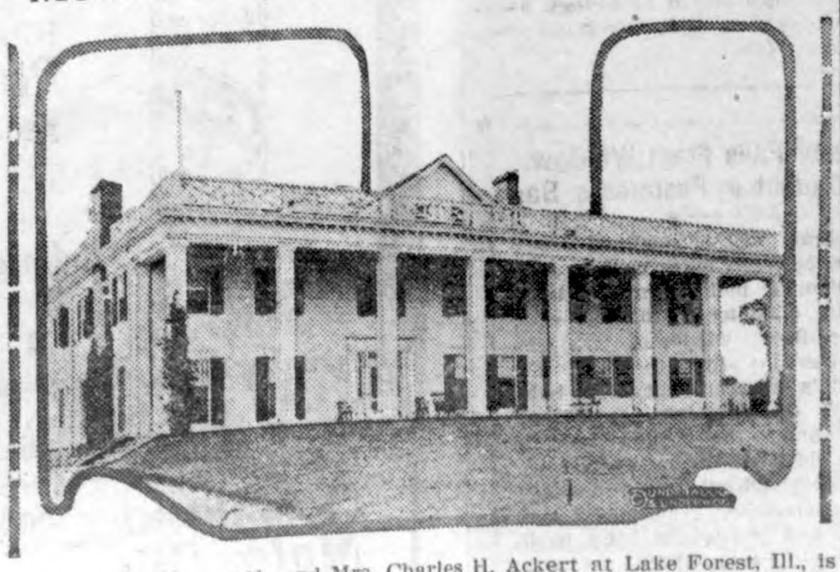


The eighth anniversary of the Battle of the Marne and the birthday of Lafayette were celebrated coincidentally in this country. In the graveyard of St. Paul's Episcopal chapel, New York, water from the Marne and earth from Lafayette's native town of Ay were mixed, blessed and poured on the grave of Etienne Bechet, Sieur de Rochefontaine, who served in the Continental army. In Washington a wreath was placed on the Lafayette statue by the Sons of the American Revolution.

Pythians in Rainier National Park

Knights of Pythias of the state of Washington annually have a ceremonial atop of Alta Vista, at the base of Mt. Rainier, in Rainier National park. This year Col. George C. Cabell of Norfolk, Va., supreme chancellor of the order, directed the ceremonies, assisted by Mrs. Lucy Macqué of Medicine Lodge, Kansas, chief Pythian Sister.

Mount Vernon Duplicated in Illinois



This new home of Mr. and Mrs. Charles H. Ackert at Lake Forest, Ill., is practically a duplicate, in style, structure and furnishings, of Washington's Mount Vernon home. The home contains many relics of the revolutionary period.

NEW QUEEN OF BEAUTY

When the people of Columbus, O., selected Miss Katherine Campbell to represent their city in the Atlantic City pageant they said she was the prettiest girl in the country, and the judges at the resort agreed with them. Katherine was awarded the first prize and thus became the "Queen of Beauty," and "Miss America" for next year's pageant.

SHE COLORS SLIDES

Mrs. Elsie Sellers, United States Department of Agriculture, colors posters and lantern slides for agricultural fairs and conventions all over the country.

Steal Potatoes and Replant Vines.

Thieves at the farm of Glen Leaders, near Defiance, O., stole 15 bushels of potatoes from a patch and then replanted the vines. The theft was discovered when Leaders went to dig the potatoes and found that there were no tubers on the vines, which were healthy.

Home Town Helps

NOT A NATION OF RENTERS

People of Country Have by No Means Lost Ambition to Own Their Own Homes.

Is home owning a lost ambition? Are we becoming a nation of cliff dwellers and renters? Not if we put faith in the figures compiled by the lately established bureau of housing of the Department of Commerce.

Of the 68 cities of more than 100,000 population but 20 show a loss in percentage of homes owned between 1910 and 1920 (the figures are from the census bureau) and the losses are more than offset by the gains of the other 48. Of the 20 where losses were recorded, four—Detroit, Cleveland, St. Louis and Los Angeels—are in the first ten cities of population.

Although in New York more homes are owned than in any other city the percentage is the lowest, but 12.7, yet even here the percentage has grown from 11.7 in 1910 and 12.1 in 1900. Manhattan presents the most striking situation. With more than a half a million homes, less than 11,000 were owned, little more than 2 per cent.

If home owning be a form of civic virtue, then Des Moines may gather her chaste skirts about her as painted Manhattan passes, for the Iowa paragon among cities shows a percentage of home ownership of 51.2, a growth from 45.6 per cent in 1910 and 28.5 in 1900. In only one other community of more than 100,000 inhabitants are half the homes owned, and that is Grand Rapids, Mich.—The Nation's Business.

LET GROUNDS HAVE PURPOSE

Plants and Foliage Should Be Designed to Emphasize Dominant Points of the House.

For a colonial house the good, old-fashioned plants should be used: box, lilacs, syringas and snowberries, as shrubs; grapes, wistaria and woodbine, as vines, or English ivy against brick. Use them not in the meaningless masses so popular in modern planting, but simply, with the severity and restraint that are characteristic of the colonial period. The planting should emphasize the dominant points of the house. Frame the entrance with clump of lilacs, or more formally with round bushes of box. Use vines, not to cover the whole house, unless the house is so ugly that it must be covered, but to soften a hard line, to accentuate the beauty of a chimney, to make a porch part of the house, to lend color and texture to a wall.

"Last fall I saw an old brick house at the edge of town, half covered with English ivy, and with a flame of woodbine running to the roof," says the writer of this article in House Beautiful. "Great leafless clumps of snowberry on either side of the door still held their plump berries, beautifully white against the red of the brick. That was all the planting, but it was a picture that has remained with me."

The City Beautiful.

We can't have too many pretty towns or too many pretty homes in town and country. Progress along this line is being made annually and with increasing interest among progressive town builders and home owners. There is no use for shabbiness. Shabbiness connotes indolence and indifference. A house or a town which indicates careless occupants, citizens concerned only for primitive necessities, is not one to attract the sort of people that energetic people want to know. Poverty is no excuse for shabbiness. The humblest dwelling does not need to be shabby. Shabbiness is carelessness, not flimsiness. Many a flimsy little cottage or cabin exhibits a quality that is far superior to shabbiness. It is the careless, untenanted, dilapidated, apathetic look to a man's home, a man's town, or a man's clothing that gives it shabbiness. One needn't be shabby in overalls any more than in a tailor-made suit.—Dallas (Tex.) News.

Oaks Best for Street Planting.

Oaks are considered by the United States Department of Agriculture to be the best trees for street planting. It is probable that oaks have not been more widely planted because of the prevalent belief that they are slow growers, and because in the North they are rather difficult to transplant. A white oak, however, which is one of the slow-growing varieties, will reach the same height as a sugar maple in the same period of time, and maples have been used much more widely than oaks for street ornamentation, despite many unsatisfactory characteristics.

Plan for Growth of Town.

The crooked streets of Boston grew up along old-time cow paths. Cities, more recently founded, took note of the inconvenience and laid their streets out in a straight line, though that was about all they did by way of advancement.

Cities now discover that traffic congestion is due mainly to narrow streets. Yet they go ahead laying out more narrow streets. It is a foolish policy, especially foolish in small towns that may some day be giant cities.

How long will it take to double my savings at 5 per cent interest compounded semi-annually

Of the more than 11 millions of savings depositors in the United States, perhaps only a comparatively small number realize the interest-earning power of their savings.

For instance: A savings fund of $500 drawing compound interest at the rate of 5 percent will at the end of the 18th year amount to $1,140.09, without the addition of a single penny on the part of the savings depositor. Your $500 will have earned $640.09 in interest during that period.

That is something to think about when you start a savings account for yourself or for your small son or daughter.

"The Bank for Everybody'.'

WHO WAS THE FIEND?

Story of Flask Spurs Muse to Pity "Uncle Joe"

Mr. Cannon Says After Reading Admirer's "Cannonade" He is Willing to Let the Story Go Uncontradicted.

Washington.—Recent reports that a flask had mysteriously disappeared from "Uncle Joe" Cannon's coat pocket caused H. E. McFarland of St. Louis, one of Uncle Joe's fervent admirers, to burst forth in verse. He wrote what he termed a "cannonade" on the incident as follows:

Who was the fiend, pray let me ask,
Who filched our Uncle Joseph's flask?
The flask he carried on his hip,
From which to take a quiet nip
Of mellow stuff we used to know
In happy days of long ago.
How could one have such little tact
Regardless of the Volstead act?
How could one be so mean and low
To rob our dear Old Uncle Joe?
To rob the widow or a bank
Is bad enough and savors rank;
To rob a graveyard of its dead,
Or take away the orphan's bread
Are crimes we may, perhaps, condone,
If circumstances all were known.
But cursed be he who breaks the lock
To rob us of our private stock.
Or, what is worse, will watch his chance
And steal our liquor from our pants.
And spare us, pray, the crushing blow
Of doing this to Uncle Joe.

"It is a question whether the author owes you an apology," the author wrote Mr. Cannon, "or is deserving of the thanks of congress for what he intends as a slight tribute of respect and affection for its most beloved and honored member. It is his fervent hope that there was no material delay in getting the prescription refilled."

Mr. Cannon replied to the letter as follows:

"I have your favor, with enclosure, and after reading your 'cannonade,' I am willing to let the story go uncontradicted and thank you for your tribute.

"You may have heard that many years ago I gave a promise to the newspaper correspondents in Washington that when they had a good story and no one to father it they might appropriate my name without fear of contradiction. I have had a good many thrust upon me, some of them irritating, but generally the other way, and I reckon the score is in my favor.

"I have a flask—two ounces—presented by my doctor, but knowing the boys in the press gallery as well as in the house, I do not bring it to the capitol, as it would represent neither hospitality nor temptation—scarcely an emergency. That may have been the inspiration for the story. It has, however, served a friendly purpose as an inspiration for the 'cannonade,' and I am again in debt not only to you but to the newspaper fraternity, and I thank you."

TWO PICTURESQUE KIDDIES

These two boyish looking individuals are not what they seem, but in reality are girls and they're on their way a-visiting. An interesting study from that picturesque country, the home of windmills and wooden shoes.

WOOD INTO PAPER IN 3 HOURS

Germans Fell Trees and Make Newsprint in Record Breaking Time.

Berlin, Germany.—Trees on which birds warbled their morning song are turned into newsprint paper and sold as midday editions on the same day in certain towns of the Harz district, says the Papierfabrikant, the leading German paper makers' organ.

The exact time taken in the process is 3 hours 25 minutes. The trees were felled at 7:35 a. m., pulped and turned into paper by 9:39, rushed in a motor truck two and one-half miles to the printing office and at 11 o'clock newspaper boys were crying the local sheet on the streets.

Baby Falls From Window, Caught in Postman's Bag

Henry M. Druckman, of Brooklyn, N. Y., a letter carrier, was delivering mail when he saw a baby climbing to the sill of a third-floor window. He ran across the street to notify the child's mother, but the baby kept on climbing. Druckman got under the window just as the child, who had crawled over the sill, fell out. The letter carrier stretched his empty mail bag and caught the baby in it. The child was unhurt.

THE CHURCHES

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Morning sermon at 10.00 A. M.
Sunday School at 11:00 A. M.
Evening Sermon at 8:00 P. M.
Epworth League at 7:30 P. M.
Prayer services on Thursdaay evening at the church.
Choir practice at 7:30 on Tuesday evenings.
At the morning service the pastor will give a full financial report of the past conference year.
Let us all endeavor to fill our place in all the Sunday services.
W. C. Bergmann.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship 10:00 o'clock.
Sunday school 11:00 o'clock.
Evening worship 8:00 o'clock.
Fellowship meeting at church at 7:45 o'clock, Thursday evenings.
Services will be resumed next Sunday. You are invited to attend.
The fourth Quarterly conference will be held next Monday morning in th the church at 9:00 a. m.
It is hoped that every official member will be present,
are due to be closed Friday Sept. 22. He will be glad to receive belated Centenary payments so that tht accounts may be sent to the Annual conference Treasurer.
Sunday October 8th will be conference Sunday. As usual there will not be any preaching service, but Sunday School will be held. Make this a record attendence and support the Superintendent.
Sunday October 15th the first Sunday after conference the evening service will be held at 7:30. Let us maake the closing days of the conference year a season of Consecration asking Divine forgiveness for past failure and consecrate ourselve with renewed heart to the work of the Kingdom for another year.

WORTH NOTING

Fear pays no dividends.

A helmet is the original knight cap

It takes a hot fire to purify gold.

Pray for health and walk five miles a day.

The only cure for old age is to die young.

We hate to see a man shy at opportunity.

Gold is tried by fire, and man often by gold.

Nothing needs a lie to support it—save a lie.

Self interest makes us work harder than duty.

In a free country one is also free to be foolish.

A man's past is the best prophet of his future.

The faith that does not revive you needs revising.

WOMAN

She will live longer with an undeserving mate than any known animal.

She will forgive oftener than an angel.

She will make herself riduclous if she thinks it attractive.

She will pay 15 cents carfare to get a $4 article for $3.98.

And she will go to heaven and be lonesome. —Richmond Times-Dispatch.

MR. FOX SPOILS PARTY

OLD Mr. Drake waddled down to the pond one morning, and seeing a boat nearby, made up his mind that as he had been swimming for a long time he would take life easy; so he hopped into the boat and called to the Ducks on the pond to come along.

"I will be the captain," explained old Mr. Drake, "and you youngsters can be the crew. I do not mean to work any more, for why should I swim when I can sail about the pond in a boat?"

He hopped into the boat.

In a few minutes he had all the Ducklings on the pond in the boat, and a stiff breeze sprang up just then, and away he went, bobbing over the pond as the wind waves hit the boat.

Now, it happened that Mr. Fox was hidden among the bushes by the bank on the opposite side of the pond, watching for the Ducks that he was sure would be swimming about, and when the wind blew the boat, with the captain and his crew, to that side Mr. Fox could hardly wait quietly, so sure was he of having a feast.

"A whole boatload of young Ducklings!" thought hungry Mr. Fox. "Whoever was in such luck before? I would not bother with old Mr. Drake, but how I wish I had a dozen mouths and paws! I could have Ducklings for dinner for a week!"

Mr. Fox grew hungrier every second, and when the boat touched the bank, without waiting to find out if the Ducks were going to get out of it, he made a spring for the boat, expecting to land right in the midst of the Ducklings.

But alas and alack for all well-laid plans!—they often go awry; and so it was with the well-laid plan which Mr. Fox had, for when he struck the boat, out flew all the Ducks, and even old Captain Drake was as spry as the others. Fright made him forget his old age, and he flapped his wings and away he swam.

And where do you think Mr. Fox was all this time? Under the boat, trying to get free, for he hit the side and over it went, with him under it. After a while he managed to swim out, and there, far off in the distance, Mr. Fox saw his dreamed-of dinners.

It was no use to swim after them, for they were close to the bank, and he knew that the farmer's gun might put an end to his ever again being hungry if he was seen near the farm, so he swam for the bank and sadly walked toward home, a hungrier but a wiser fellow.

"A duck on land is worth more than a boatful," thought Mr. Fox, "and if I should meet one this minute here in the woods, even if it was tough old Mr. Drake, I would like to see it get away."

(Copyright.)

Just because things were different when you were a boy is no reason to suppose they were better—and your boy knows it.

You'd naturally suppose house rent would be low now that so many people live in their automobiles.

In many a home the husband is a hard worker because the wife is a hard shirker.

Pigs, poultry, potatoes, bread, canned vegetables and meats, and other products which boys and girls enrolled in extension clubs grew or prepared following demonstrations by county extension workers were shown in 4,300 exhibits at community fairs and 6,000 exhibits at county, district, and state fairs last year, according to reports to the United States Department of Agriculture.

TO ALL TO WHOM IT MAY CONCERN:

The commissioner appointed to locate a road commencing at the East Quarter corner of Section 19 and the West Quarter corner of Section 20 or the Quarter corner common to Section 19—20 in Twp. 94 Range 24 West of the 5th P. M. and running thence due South on the Section line between Sections 19 and 20 in said Twp. 94 Range 24 for a distance of about 80 rods more or less and through the lands owned by E. O. Eliason, and terminating at the point where the said section line is intersected by the present County Road running East and West between the Towns of Goodell and Kanawha be established and that the present road East and South from said Quarter corner and running through the lands owned by E. O. Eliason, R. H. Jamieson, J. W. Griggs and M. P. Floy be vacated, has reported in favor of the establishment and the vacation, and all objections thereto, or claims for damages, must be filed in the Auditor's Office on or before noon of the 13th day of October, A. D. 1922, or such road will be established and vacated without reference thereto.

Something to Think About

By F. A. WALKER

ENCOURAGING WORDS

TO FORM a pleasant background or a pleasing accompaniment to the drudgery of every day life, pass around among the hordes of weary mortals whose backs are bent under heavy loads a few encouraging words and observe, while you are doing it, the happy change that comes over their stoical countenances.

It takes but little kindness and manifestation of interest to brighten dull eyes and move sad faces to a smile.

As the lips curl at the corners, you comprehend with a new understanding the value of cheering words spoken in a kindly voice whose ring is sincere.

Whatever opinion you may entertain as to the influence helpful acts and speech have upon others, you will find upon intimate observation that it is always acceptable, uplifting and productive of friendship.

Encouraging smiles and words are like bright lights on a dark highway, guiding the tired traveler to his destination, who but a little while ago had lost his way and fallen into the "slough of despond."

Reason as you may, the tongue plays the leading role in the great drama of life, permitting itself liberties that make for peace or war an enmity or love, often forgetting in an unguarded moment its great responsibility.

No man or woman who indulges in gross speech can expect to get anything in return except that which arouses resentment.

If you should incline to prove this for yourself, scold your pet dog. If the opposite you would verify, fill your purse tomorrow morning with kind words of encouragement, crisp as new bills, and pass them around as you wend your way to business.

Give one to the old newsman on the corner, and see his face light up as the sun of happiness touches his heart and suddenly warms his whole being.

Hand them out all along the way until you are ready to assume your duties of the day.

You may marvel as you begin at the ease and gladness with which you take up your work.

The troublesome perplexities of yesterday have vanished, and there is a goodly spirit hovering over you, whose presence you have not felt for months, and all because you started the day by cheering others and thus unconsciously cheered yourself.

(Copyright.)

Uncommon Sense

By JOHN BLAKE

"NERVES," A LUXURY

IF YOU have an inherited fortune, which some one else is taking care of for you, you can afford to have "nerves."

You can afford to be sensitive, to be easily irritated, to be extravagantly disturbed at small annoyances.

You will not enjoy this, but it may be some comfort to know that you can afford it.

But if you have your way to make, and are anxious to get as far as is possible with your particular mental equipment, you will find that "nerves" are too big a load to carry.

As you no doubt have discovered by this time, the world in which we have our being is not altogether a pleasant one.

In it there are loud and raucous noises, offensive sights, and displeasing people.

There is also a thing called labor, which viewed from the standpoint of the busy man is a good deal of a burden.

But this happens to be the only world you are in, for the present at least.

And if you permit all its unpleasant features to get on your nerves, you are going to be so busy with your unhappiness and your self-pity that you will have very little time to improve your natural gifts.

If you are nervous and touchy and sensitive, and always looking for offense, you might as well go directly to the poor house and give yourself up. You will get there in the end, and it will only be a waste of time to delay your arrival.

A good many cases of "nerves" were cured by the great war, permanently.

Young gentlemen who thought they could not eat, save from a nice mahogany table, spread with the best food, and who fancied they could not sleep if a trolley car was rattling by, discovered that they were mistaken.

After they had slept for a few days within the sound of exploding shells, they saw that they hadn't had much to worry about back in peace times.

Get rid of your nerves if you want to get along. Take the world as you find it, and put up with it. You may be able to improve it just the least bit later on, but you will have to become very able, and very great, before you can do so.

Watered Stock.

Jimmie (visiting his uncle in the country)—"Oh, Uncle George, your hired man is not honest. He let th' cows drink a whole lot of water just before he milked them."

Mother's Cook Book

Today may be all that is mournful;—
Our paths cannot always be bright,
But tomorrow we'll somehow take courage,
And trustingly enter the fight.

EVERY DAY DISHES

WE WELCOME foods that give variety without adding to the expense of living, which is high enough with the best of management.

Date Surprise Cookies.

Stone dates and stuff with whole almonds blanched. Roll out the cookie mixture very thin, cut in rounds and place a stuffed date in the center; sprinkle with sugar and lemon rind mixed; fold over the cookie and pinch the edges together. Bake in a hot oven.

Pear Bread Pudding.

Slice canned pears in very small pieces; add lemon rind and juice and place half of them in a pudding dish. Mix one tablespoonful of butter with one-half cupful of sugar, one cupful of water and a pint of bread crumbs; spread all but a tablespoonful over the pears. Put more pears in the dish; add grated nutmeg and sprinkle with the tablespoonful of crumbs. Bake with a cover for an hour and a half, then remove the cover and brown. Serve with a hot sauce.

Fruit Meringue.

Beat the halves of canned fruit with a bit of lemon peel or candied ginger in the centers; cool and place on each a tablespoonful of meringue. Use the whites of two eggs and one-third of a cupful of sugar for the meringue.

Sandwich Piquant.

Take one cupful of new cabbage or cucumber chopped, one-half cupful of onion chopped, four tablespoonfuls of green pepper chopped, drain, add cayenne and seasonings and use on buttered bread.

Apple Pudding.

Cook one-half dozen apples until nearly done, unless of a variety which cooks quickly; place in a deep baking dish and cover with a rich biscuit dough made like a drop batter, leaving spaces for the steam to escape. A little seasoning may be added, such as sugar, nutmeg and butter. Serve with a lemon sauce or with thickened apple juice or cider seasoned to taste.

Fried Apples.

Core good flavored apples and slice in half-inch slices. Into a frying pan put two tablespoonfuls of bacon fat, lay in the apples after sprinkling lightly with salt and sugar and brown on both sides. Serve with pork chops.

Rice and Asparagus Soup.

Wash the asparagus and cut off the tougher portions. Put the tips into a quart of well-seasoned broth and one cupful of water and cook until tender. Add one-half cupful of rice as soon as the broth and asparagus are boiling hot. Cook until very tender. This soup may be put through a sieve and is then ready to serve. Pass grated cheese with the soup.

Nellie Maxwell

Climate and Climate.

Prof. Ellsworth Huntington of Yale university marked on a map of the world the areas where climate was most favorable to human effort. He called these areas zones of climatic energy. Then he delved into history and plotted a map of civilization. He found that the two maps coincided. His conclusion was that "climate has a great influence on health, and its action on civilization in this way probably is greater than its direct effect or than the indirect results arising through agriculture or food."

Professor Huntington took the records of pieceworkers in Pittsburgh factories and students at West Point and Annapolis and found that both physical and mental work varied in harmony with the weather, according to the Detroit News. He found that the death rate also fluctuated seasonally according to the weather. He therefore concluded that no high civilization is possible in tropical regions, or where weather conditions are adverse. No high accomplishment was held possible where temperature and humidity are unfavorable.

Not Talking to Husband.

There is no testimony in court that is as vehement and pointed as that of a militant housewife who seeks a divorce from her husband. This fact, it appears, is true especially when the wife's case is uncontested and the husband is not at the hearing.

During such a case in one of the county courts, the wife became very loud and vociferous in her descriptions and denunciations of the brutal manner in which, she said, her spouse had treated her. Her testimony was as rapid as loud. In fact her words became jumbled and were lost in the noisy din of her own wails.

"'Now look here a minute," the judge interrupted. Nobody can get heads or tails of what you are saying as long as you go on that way. Now turn here and talk to me and tell me the story. Just tell me so I can understand it, but remember you are not talking to your husband."

Idol Shattered.

Bobbie had always been intrigued by the wax figures in the windows, but had never asked any questions concerning them. Several weeks ago he and his mother emerged from the elevator on the second floor of one of the department stores, immediately in front of a wax lady clad in a gorgeous pink satin breakfast jacket. Bobbie rushed up to the figure and touched her face and neck, then turned and said in a horrified tone, "Mother! She's wax!"

Mother smiled tolerantly and replied, "Yes, son, did you think she was real?"

"Sure, I thought she was real—stuffed."

Henhouse Raided by Flying Rat.

Sam Cherowiski, a Russian farmer, living a mile below Packer, Conn., says flying rats are carrying off eggs and young chicks.

Sam declares they are not bats, nor flying squirrels, but big rats with wings like a bird. All rat holes to his hennery were plugged and still the eggs and chickens disappeared. The farmer hid and watched for the marauder. Soon, he said, through a broken window up near the roof a flying rat came in.

Backsliding.

"Felice seems interested in that book she's reading."

"She's careful to keep the title hidden. Maybe it's a naughty book."

"It may be Dickens, or something of that sort. Even a flapper hates to be ridiculed by other young women in the same way of life."

There is one consolation for the man up a tree—he lives high.

Good health means a good business. But bad health is bad business.

The wisest habit to acquire is the habit of care in forming habits.

Measure the appreciation you bestow by that which you desire.

SCHOOL DAYS

Uncommon Sense . . .

By JOHN BLAKE

ENERGY IS CAPITAL

A LAKE cannot turn a turbine, though it contains more water than a cataract.

All the knowledge you can accumulate in a lifetime will do you no good unless it can be translated into energy.

The difference between doers and wishers in this life is a difference of energy.

The wishers want things. The doers get them. It is hard work getting them, but energy is the force that can accomplish hard work.

The reason you see so many men succeed whom you know to be no better fitted mentally than failures of your acquaintance is because the successful men are energetic.

Energy is the driving force behind everything that is done.

All of us have some of it, or we could not live.

Those who have a great deal usually get along, unless they constantly misdirect it.

There are, of course, energetic people who never get very far. But even they get farther than they would if they were content to sit still.

If the maxim, "Everything comes to him who waits," were amended to read "Nothing comes to him who waits" it would be true.

As it stands it is one of the most misleading and dangerous falsehoods in existence.

Your energy is your capital. Use it wisely and economically and it will pay you an almost usurious rate of interest.

Half use it, or waste it on things that are of no value, and you will just about make a living, which is a thing no man of ambition wants to do.

Education teaches us to use our energy profitably. An educated man can, or should, get more out of the same amount of energy than an uneducated man, exactly as a turbine gets more out of a column of falling water than the old-fashioned overshot wheel.

Yet the energy must be there, or the education must be useless. There must be driving force which will apply what you have learned to your problems. Nothing important was ever accomplished by education alone.

If you haven't got energy, cultivate it. Put your health in good condition and your physical energy will improve, and with physical energy you will gain mental energy.

Be careful how you use both. You can't settle a business tangle if you have been playing tennis all the morning. The exercise will use up the energy that ought to be expended on the job. Your brains can't use what your muscles have used already.

Energy is always capital, but it must be well and prudently invested.

Take care of yours. Add to it by care of your health, and by abundant mental exercise. Then expend it on important matters, and don't be afraid to expend it liberally. It is one thing of which the more you spend the more you will have, provided, of course, it is not foolishly wasted.

(Copyright, by John Blake.)

Ships Have Chaperons.

Mistress-at-arms is the official title bestowed on the official chaperons who have been added to the working personnel of all vessels operated by the United States lines. Their especial duty is to look after the comfort and welfare of all girls who are traveling unattended.

SCHOOL DAYS

Something to Think About

By F. A. WALKER

FAR-OFF TOMORROW

THOSE happy-go-lucky individuals who manifest so little interest in the stirring events of life, which are buzzing like bees all around them, are often insensible to their lamentable delinquencies.

Occasionally, however, their consciousness flutters a moment, but, seemingly changing its benumbed mind, yawns, nods and falls asleep to dream.

But they are going to wake up and do something tomorrow.

They will yank the old world from its easy chair and wake its billion inhabitants with an earthquake.

Hitherto they have been shaping a brilliant course, not quite matured yet, or in a fit state to be presented in its entirety to their intimates, who have wept over them, prayed for them, and done their utmost to arouse them to action.

There is, however, no declaration on the part of these habituated drones of making undue haste.

The months and years stretch ahead in long rows on either side of tomorrow's path. Why fuss, fluster and worry?

Why should they bother themselves while youth is so full of delightful expectancies and time so abundant.

They are not seeking the dull, common roads in life, but the magnificent avenues that take direct to fame and wealth in the glare of sunlight and amid the plaudits of an admiring world, swept suddenly off its feet by the daring work of genius.

So the years drift by, and in their drifting there comes sometimes to these disciples of the god of futurists a petrifying fear that makes them sick at heart.

With an odd mixture of humility and pride stirring in their ill-arranged brain they are prompted to exertion. But they have unconsciously lost the skill which was theirs when life was vibrant with power. They reach out but they touch not. And now, all of a sudden, a terrible realization overwhelms them.

While they were loitering, putting off until tomorrow, their plodding associates were improving their time, gaining respect and an assured competence for the bare days of winter, sighting its appearance in the naked branches of the trees and drifts of snow-flakes.

Tomorrow is man's most terrible trouble maker, luring by promises which are seldom redeemed and leaving him ragged and alone at the crossroads, where youth and opportunity lie buried in the piled up heaps of dust and ill-spent years.

(© by McClure Newspaper Syndicate.)

These Efficiency Courses.

"That new employee of ours doesn't seem to accomplish much."

KIDDIES SIX

By Will M. Maupin

WRITING IT AT HOME

A BUNCH of four—four happy kids
Chock full of fun and pleasure.
All four a mighty big expense,
But ev'ry one a treasure.
And when I want it quiet like
So I can do my writing,
The noise that bunch begins to make
Sounds like two armies fighting.

One clambers over my machine;
One asks for help with "numbers";
One for my pencil makes demand;
One my tired knee encumbers.
"A dozen eggs cost forty cents,
What will three dozen cost?"
And by the time I work it out
My thread of thought is lost.

One sticky hand is reaching out
To grasp my thinning locks.
One piercing voice makes loud demand
For help with building blocks.
"My pencil's broke; please sharpen it
So I can write the rest—"
And then the thoughts I've garnered in
Are all knocked gally west.

But when, at last, the sandman comes
And all four little heads
Are resting on the pillows white
Of two soft, downy beds;
And all is quiet 'round the house
Where once the noise did ring,
I start to write—and then can't think
Of a dodgasted thing!

(Copyright by Will M. Maupin.)

Mother's Cook Book

Scarlet tufts are growing in the green like flakes of fire; the wanderers of the prairie know them well, and call that flower the "painted cup."

EVERY DAY GOOD THINGS

THERE always will be in most families some waste bread. Not a small bit should be wasted for there are countless ways of using it.

Nut Loaf.

Take one cupful of chopped nuts, two cupfuls of bread crumbs, one-half cupful of hot water, the same of melted butter, one egg well beaten, one teaspoonful of mushroom catsup, one-half teaspoonful of onion juice, one and one-half teaspoonfuls of salt and one-fourth of a teaspoonful of pepper. Mix the ingredients in the order given, form in a roll and bake in a moderate oven one hour, basting occasionally with butter. Serve hot with brown sauce.

Madeira Cake.

Put the yolks of two eggs into a mixing bowl, then with a wooden spoon beat in one cupful of sugar and one-half cupful of butter. Add two cupfuls of sifted flour, with a teaspoonful of baking powder, then one-half cupful of cream and a grating of nutmeg, beating all the time. Last of all, fold in the well-beaten whites of the eggs. Line a round cake tin with greased paper and pour in the batter. Place a large slice of candied citron on top. Bake an hour and a quarter in a moderate oven, lowering the heat after the cake is well risen.

Nellie Maxwell

(©, 1922, Western Newspaper Union.)

CUTE KNITTED OUTERWEAR; FUR TRIMMED FALL COATS

NOW that the big stores and children's specialty outfitting shops carry a vast assortment of "comfy" knitted woolen togs for infants and wee tots, the problem of going "a-huntin' to get a rabbit skin to wrap the baby in" has been reduced to a minimum.

In this day and generation mother seeks the infant or junior department of her "nearest dealer," where is spread before her an array of knitted outergarments suited to every requirement of every child. Already the falling leaves hint of cool days to come and the subject of providing the children with protective outdoor garments is a timely one.

From the standpoint of appearance or of practicability there is nothing to compare with knitted goods for children. Consider, for instance, the little white wool infant set shown in the illustration. It is adjustable to every change of the thermometer. Consisting as it does of four pieces it may be worn in part or entirely. The snug-fitting leggings have a slip-cord at waist with tassels; the sweater coat is supplied with a protecting collar, four white buttons down the front, one at neck; pockets (the pride of childhood); cap with flap each side and white pearl button; pair of mittens.

For the child who spends most of its time outdoors the sweater is indispensable, and let it be of the sturdy sort, knit substantially, to withstand wear and tear. The happy looking little girl in the picture is wearing just such a one. It is a scarlet sweater coat with collar and belt fastened with one red button in front, six red buttons down the front and one under collar fastened with the loop. The becoming hood is knitted in fine stitch, with two colorful stripes and white tassel on short cord matched to the stripes.

A very clever idea also is the plaited knit cape for little girls. Another article obtainable in the junior department is a knitted tam o' shanter with its top of white wool in finger stitch.

A very handsome four-piece set is knitted in a striped stitch effect and it has a brush lining. Silk braid binds the leggings. The brushed lining appears in the reverse of the cap, the collar and the top of the mittens.

The question of the coat is uppermost in many a fair head, for the time has come to buy one. A feast is spread for the benefit of every woman who must make a choice this fall; but the melancholy days are come when many a coat aspires to associate with beautiful, sumptuous furs; they are higher priced and far more becoming than they would be otherwise. Women are finding them irresistible and there are several good reasons for buying as fine a garment as the purse allows.

The soft-faced cloths are rich and lustrous and they invite the use of furs in their trimmings. There seems to be an abundance of skins, but the handling of furs takes much time and this is what runs into money. Most furs are long-lived and serve their wearers for several years, so that they pay for themselves in the end.

"Comfy" Knitted Woolen Togs.

Two handsome coats, as shown in the picture, are typical of the season's offerings. Both of them employ a soft, lustrous pile-fabric for the body of the garment, both of them are straight-hanging and each has a strap-girdle of self material. They have a look of warmth and luxurious softness, which appears to be the aim of every coat designer this year. The coat at the left is a lovely wood-brown color, with collar and cuffs of silky, dark brown fox fur. Long silk cords, ending in tassels, fall from ornaments of silk at the left side.

A rich and glossy black, in the coat at the right, measures up to the beauty of the black caracul fur that adorns it. It has wide cuffs and full collar of the fur and squares of it make a checkerboard design that almost covers the skirt portion of the garment. Crepe de chine is a favorite material for lining coats of this kind.

Usually linings are in plain colors, and there is a fad for using two or even three colors, set together with a soft, fancy braid. A light color, at the top of the garment, will never "crack" or darken a light dress, and a dark color on the lower half of the coat does not show soil which is apt to gether there.

HIS ATTENTIONS NOT WELCOME

"My love for you drives me mad."

"I think I'm the one to get mad about it."

Cheer.

Let's give a cheer
For Old Man Banks.
He never moves
"A vote of thanks."

Sufficient Excuse.

"I've just heard the news," interestedly said an acquaintance. "Why do you suppose John Schott killed his hired man?"

"D'know," replied the gaunt Missourian, "unless it was b'cuz he acted like a hired man."

Apprehensive.

"This is a fashionable grillroom."

"Yes, Tessie; all the other ladies are smoking."

"So I see. Do you think they will put us out for not smoking?"

ROAD BUILDING

GUISING CRACK FILLERS

ghtly Black Lines to Be Done ay With by Use of Material Colored Like Concrete.

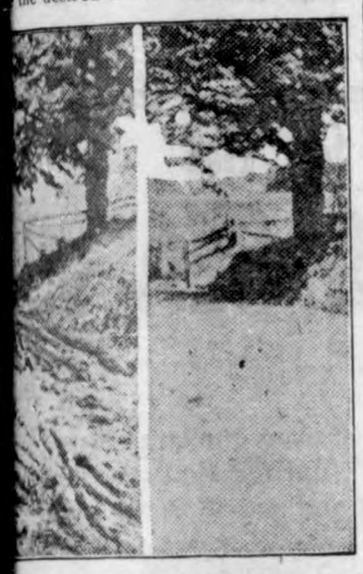
pared by the United States Department of Agriculture.)

Slightly black lines, sometimes d and irregular, which mar the arance of practically all concrete and which are due to the natural of materials used to fill joints cracks, will be avoided by the use material for the purpose developed e laboratories of the bureau of c roads, United States Depart- of Agriculture, if tests by actual prove as successful as expected. material has the same color as ete, and when used to fill cracks joints the surface has the appear- of a continuous and unbroken to the casual observer.

particular advantage over other materials is claimed for the prep- on other than its color, and it is able that the cost will be some- higher but not prohibitive.

r several weeks a section of road expansion joints filled with this erial has been under observation, the results are entirely satisfac- but a longer test will be neces- before it can be recommended for eral use.

e mixture consists of approxi- ly 12 parts rosin, 1 part crude rub- with sufficient barium sulphate to the desired color. In preparation



Hard Surface Road Just North of ew Providence, Pa., Showing the oad Before and After Completion.

rubber is dissolved in gasoline, the rosin is then mixed in with an lication of heat, the coloring mate- being added as required. Any de- d consistency can be obtained by ying the proportions. A material h remarkable adhesive properties is duced and which can be heated so it will flow into the cracks and nts.

UILD FEDERAL-AID BRIDGES

arly Fifty Miles Constructed in 35 States During Period of 4 Years and 4 Months.

More than $8,525,000 has been ex- ded by the federal government, ough the bureau of public roads, ited States Department of Agricul- e, toward the building of bridges federal-aid roads and highways in states during the 4 years and 4 nths ending November 1 last. That iod dates back to the inception of federal-aid road work as at pres- supervised.

Placed end to end, these bridges, h of which has been constructed in nection with the road work, would al 47.4 miles. Their estimated to- cost is placed by the department at ,235,200.13. It will thus be seen t approximately 42 per cent of the al was contributed by the federal ernment. The location of some of chief projects and their total cost as follows: Georgia, $2,950,474.59; w Jersey, $5,108,402.75; North Da- s, $1,306,384.59; Oklahoma, $2,280,- .76; South Carolina, $1,404,278.25, Texas, $809,967.20.

OOD ROADS ASSIST FARMER

nt Commission of Agricultural Inquiry Finds Improved Highways Lessen Costs.

The joint commission of agricul- al inquiry sees in good roads one the ways of solving the farmer's ficulties. Part one of the report on gricultural Crisis and Its Causes" ys: "Good roads to local markets, nt facilities at terminals connect- rail, water and motor transport stems and more adequate facilities shipping points will materially con- bute to the reduction of costs of rketing and distribution to the mu- al benefit of producer and con- mer."

Highroads and Skyroads.

"Highroads and skyroads" is the e of a one-reel motion picture just leased by the United States Depart- nt of Agriculture. It was made in e western tier of states under the pervision of highway engineers of e bureau of public roads.

Replace Grade Crossings.

There are 252,000 grade crossings in e United States. To replace these a separation of the highway and lway grades would require accord- g to estimates, $12,000,000,000.

POULTRY

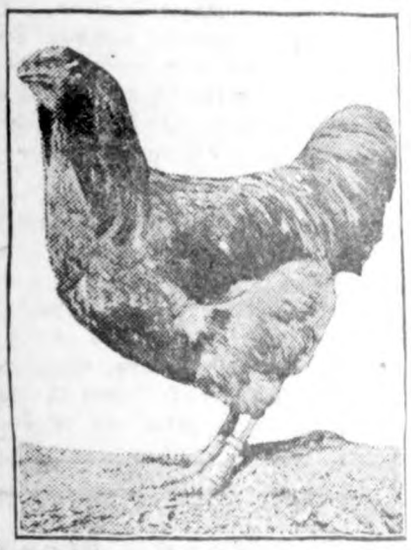
CORRECT TIME TO CAPONIZE

Impossible to Determine by Age as All Breeds Do Not Develop Alike—Watch Comb.

This is a question asked more frequently than any other by novices. It is a very important question, and the answer should be so simple that anyone could understand.

It is impossible to tell the best time for caponizing by the age, because all breeds do not develop alike; neither do birds of the same breed and hatch; some will be small of body with large comb and wattle developments, while others will show very little comb and be large and vigorous.

With any breed when the comb and wattles begin to grow you may know that the reproductive organs are growing correspondingly; when the little comb begins to redden you may know



A Well-Developed Capon.

that the organs are receiving more blood for their very rapid growth; as they receive more blood the danger of an operation is greater, for the artery carrying the blood to the testicle is larger and in more danger of being ruptured.

Therefore, if you wish to operate at the perfect time watch the growth of the comb and wattles; when they are just "showing red" is the best and proper time; then there will be little danger to the life of the bird, less pain and no "setback" to speak of; while if you wait until the comb is bright red and the wattles hang considerably there will be more danger of death and more "slips."

EARLY HATCHED FOWLS BEST

Pullets Mature So That They Begin to Lay in Fall When Fresh Egg Supply Is Low.

Every fall hens take a vacation. In doing so they have very important business on hand. Typically feminine by nature, they insist upon having a new dress each fall. During their vacation they are engaged in shedding their old plumage and in growing new, and their energy is so occupied in this way that they lay few or no eggs. The process of molt or changing their plumage takes at least three months on the average, and it is due to this three months' vacation that the supply of fresh eggs is so scarce during the fall and winter. Early hatched pullets mature so that they begin to lay in the fall and early winter, and it is upon these early hatched pullets that the poultry keeper must depend for his supply of eggs during the time the old hens are molting and resting from their labors as egg producers. So if you want eggs when the old hens have quit laying, be sure that you hatch early and have a nice bunch of early hatched pullets coming along to supply the eggs at that time.

MALES FAVOR SCRATCH FEED

Better Plan to Have Medium Sized Fowls Than Too Large, Especially for Breeding.

Cockerels usually eat more scratch feed and less mash than the pullets do. Feeds which develop a medium sized bird are better than to have the cockerels develop into too large roosters, especially those to be saved for breeding purposes.

POULTRY NOTES

As the chicks grow they need more room. It does not pay to let them crowd.

* * *

Beware of musty, mouldy, sour, or decayed food. It is sure to cause trouble.

* * *

Tough grass is of no value as a green food. Better sow some quick growing crop.

* * *

Feed hoppers greatly reduce the work. If they are kept filled, the chicks will never go hungry.

* * *

Two-year-old hens had better be sent to the market. They seldom pay for their feed if kept over the third season.

* * *

Grit and oyster shell should be included in the ration for both young and old. To neglect this would be poor economy.

FIGHT AGAINST CATTLE PLAGUE

No Idle Dream of Overoptimistic Veterinarians, but a Practical Possibility.

EXAMPLE STIMULATES OTHERS

Work Directed Toward Eradication of Tuberculosis Now Being Carried On in 28 States—Nebraska Making Strides.

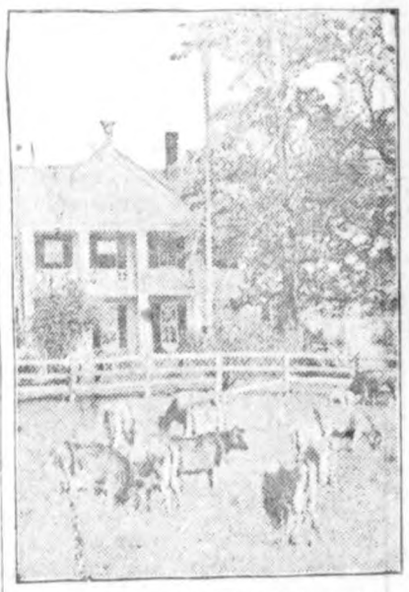
(Prepared by the United States Department of Agriculture.)

Since the area plan of tuberculosis eradication has gained headway, the end of the fight against the great cattle plague seems to be no idle dream of overoptimistic veterinarians, but a practical possibility. Many counties are now raising large amounts of money for the purpose and the clean counties have set an example that stimulates others to follow. Progressive communities are beginning to realize that they cannot have diseased herds and expect to compete with farmers and breeders in localities that are entitled to advertise that all of their cattle are free of tuberculosis.

Oregon in Lead.

A dozen states, according to records kept by the United States Department of Agriculture, now have one or more counties in which all of the cattle have been tested one or more times. Oregon now has seven counties in this class: Washington and Wisconsin four each; Michigan and Mississippi three each; Nebraska and Montana two each, and Idaho, North Carolina, Utah, Virginia, and West Virginia each have one.

One hundred and twenty-eight counties in 22 states are now doing intensified work directed toward the eradication of tuberculosis. Some of these states are going at the problem



A Good Herd Free of Tuberculosis.

on a large scale. In this list Missouri has 18 counties; Nebraska 16; North Carolina 14; Maine 11, and New York 10. Preliminary work is being done in 256 counties and 70 communities in 33 states. Iowa has 31 counties in this list; North Carolina 30; Idaho 26; Kentucky 28; Oregon 23; New York 17, and Nevada and Wisconsin 10 each. Forty communities in Georgia, 31 in South Carolina, and a few in Louisiana and Vermont have started eradication wark.

Michigan seems to be leading in the amounts of money appropriated by county authorities to assist the federal government and the state in eradicating the disease. To date the largest appropriation made by any county in the country is the $15,000 fund voted by county commissioners of Huron county, Michigan. Other appropriations in that state are as follows: Eaton county, $8,000. Calhoun county, $9,000; Oceana, $4,000; Clinton, $8,000; Muskegon, $5,000, and Monroe $5,000. Hillsdale county, the first in the country to have all cattle tested, has made an additional appropriation of $3,500 to continue the work through the second year. A number of other counties have made additional appropriations of $1,500 each.

Strides in Area Work.

The board of supervisors in a number of counties in North Carolina have made appropriations to assist in fighting tuberculosis on the area plan. Some Kentucky counties have used money for this purpose from the general tax levy.

Nebraska is making long strides in area work, and the county officials are fast appreciating the fact that eradication of the plague benefits everyone in the county and that, therefore, the funds for carrying on the work should be derived from taxation. California was one of the last states to enter into co-operative eradication work with the Department of Agriculture, but it is now being carried on actively in two counties.

RODENTS DO IMMENSE HARM

Loss in Measure Can Be Prevented by Use of Galvanized Metal Bins, Now on Market.

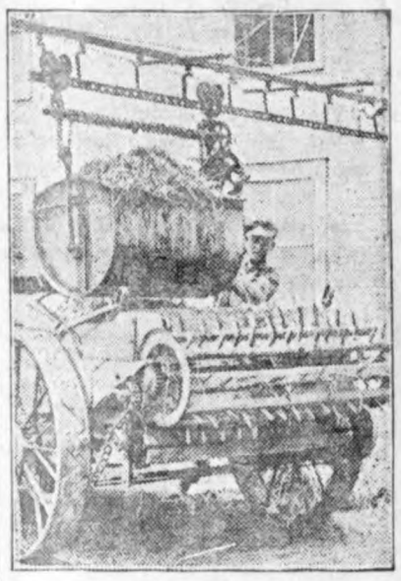
It is estimated that nearly ten per cent of all the grain grown in the country is being destroyed by rodents. This loss on the farm can be prevented in a measure by putting up fire-proof galvanized metal bins which are now on the market and have been proven satisfactory.

CONSERVE MANURE BY SPREADING ON FIELD

Not Generally Understood That It Saves Nitrogen.

Certain Forms of Bacterial Life Find Conditions in Usual Manure Pile Favorable to Development—Heating Also Occurs.

It is not generally understod just why spreading manure in the open field checks the loss of nitrogen which commonly takes place through the formation of ammonia in barnyard waste. The reason will be seen if one recalls how ammonia is produced. This is due to the activity of certain forms of bacterial life which are always present in manure and which



The Right Way to Care for Manure Produced on the Farm—Conserve the Plant Food Which It Contains to Increase the Fertility of the Soil.

find in the usual manure pile conditions favorable for their development. Through their operations organic matter is broken down into simpler chemical forms, one of which is ammonia. Heating of the pile also occurs. Both of these occurrences are familiar to everyone around a stable or where piles of manure are about.

When manure is spread evenly in the open field not only are the conditions which make for the activity of the bacteria overcome, but new factors tending to check their continued operation are introduced. The mere fact that the waste no longer lies in a pile is a matter of considerable moment, for the pile, as already indicated, furnishes the physical surroundings most favorable for the operation of these organisms. Moisture, which they need, is present in just the right amount. Air in the pile supplies them with the oxygen which they require. The mass of waste holds the heat which is generated in the chemical reactions which accompany the processes of decay. This, in turn, makes possible even greater activity on the part of the bacteria.

MANURE WILL HELP PASTURE

Top Dressing Often Will Bring About Improvement Where Grasses Are Undeveloped.

When pasture begins to fail it may often be improved without ploughing by topdressing the land liberally with barnyard manure or acid phosphate with lime. This is usually the case where the pasture has plenty of the good pasture grasses which, however, are poor and undeveloped. A topdressing on such a pasture will not only bring a good crop of grass in two or three years but also drive out some of the weeds that overrun the rundown pasture lands. This topdressing will be better than reseeding where the soil is exhausted.

Where there is a decided dearth of good grasses, liberal applications of manure may be combined with plowing and reseeding. Where it is necessary to plow as well as topdress with a manure and fertilizer, it is a good idea to grow a crop of potatoes or oats or perhaps buckwheat. Such a crop will pay the cost of reseeding, then the following year a good crop of hay can be taken off, and after that good pasturage may be had for many years.

FALL PLOWING FOR INSECTS

Multitude of Pests May Be Killed After They Have Gone Down and Prepared Winter Homes.

There are a multitude of field insects that may be killed by fall plowing if it is done after they have gone down and prepared their winter home, which they do before frost. Any time after they become dormant they may be turned up to the weather and will be destroyed, and even if they are not dormant plowing will give the birds and other natural enemies a chance at them. If the plowing is done primarily as an insect campaign it is best to wait until as late as possible. The plowing is good for the land anyway.

SHIPPING SWINE IN SUMMER

Fat Hogs Are Liable to Suffer More or Less En Route to Market During Hot Weather.

Hogs, if fat, are likely to suffer when shipped to market during hot weather. It requires considerable care to ship during the summer, but it can be done if the owner uses good judgment and is able to secure service from the transportation company's officials.

DAIRY HINTS

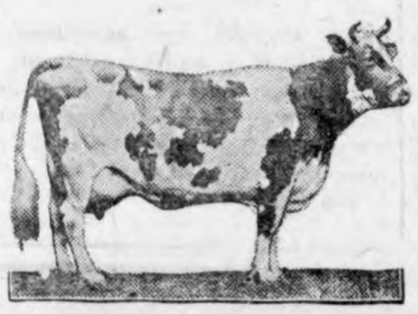
FEED POINTS FOR DAIRYMAN

To Obtain Maximum Milk Production Cow Must Be Attended to at Proper Moment.

If you would get a maximum milk production from your cows, feed the right feed at the right time and in the right amounts, advises M. H. Keeney, dairy specialist of the New Jersey State College of Agriculture.

Mr. Keeney gives the following practical suggestions for dairymen in feeding for milk production:

1. Feed all the roughage a cow will



More Guernseys Have Been Imported to United States During Past 33 Years Than Any Other Breed.

clean up. Part of it should be a legume such as clover or alfalfa.

2. Feed some succulent feed such as silage or roots.

3. Feed a balanced ration.

4. Feed grain in accordance to milk production: For a Holstein or Ayrshire, approximately one pound of grain for each 4 pounds of milk; for a Guernsey or Jersey, about one pound grain for each 3 pounds of milk. A variety of grains in the mixture is desirable.

5. During short pastures supplement with silage or some green feed, together with some grain.

6. Feed and milk regularly.

7. Supply an abundance of pure fresh water at all times.

8. Give access to salt daily.

9. Purchase grain feeds on the basis of their protein and energy content and not alone on just the cost per cwt.

GROWING RATIONS FOR CALF

In Feeding Young Dairy Animals Material Supplied Must Be Flesh-Building—Salt Is Needed.

"There are two things to remember in feeding dairy calves," says E. A. Hanson, dairy specialist with the agricultural extension division of the University of Minnesota. "The feed must make them grow and must supply flesh-building material so they will be in good condition.

Growing feeds, he says, consist of skim milk, clover hay, oats, bran and oil meal. The fattening feeds are corn, barley and oil meal. For calves under six months old in good condition and having a soft, mellow hide a mixture of 30 pounds ground corn, 30 pounds ground oats, 30 pounds bran and 10 pounds oil meal, fed three to five pounds daily, is recommended by Mr. Hanson. A mixture of 30 pounds ground corn, 20 pounds ground barley, 40 pounds ground oats and 10 pounds oil meal, also fed at the rate of from three to five pounds a day, is advised for calves in poor condition.

"Salt improves the calf's appetite, so keep a box with clean salt in sheltered place where the calf may eat of it freely," Mr. Hanson advises. "Provide all the good clover or alfalfa hay the calf will eat up clean. Never allow the calves or yearlings to run with the herd."

NEW BETTER-SIRES EMBLEMS

Certificate of Improved Design for Recognition of Good Work in Improving Stock.

A new emblem of improved design for recognition of good work in improving live stock is ready for distribution by the bureau of animal industry of the United States Department of Agriculture. The certificate, which measures 8½ by 10½ inches, resembles a steel engraving and is suitable for framing.

A person holding an old emblem and desiring to exchange it for a new one may do so by returning the old one to the bureau of animal industry. About 7,800 of the old emblems have been issued to breeders and others working with the department in improving the utility value of farm animals, reducing the number of runts, and in other ways benefiting the live stock of the country.

Bull Is Most Important.

Have you a ready dairy bull? If not see your county agent about getting one or forming a co-operative bull association. The bull is the most important part of the dairy herd as he is the sire of your future herd.

Make Silo Fit Herd.

In installing a silo make it fit the size of your herd. The diameter should allow you to feed your herd at least two inches off the surface to prevent surface spoilage, then make it deep enough to last as long as you expect to feed during the year.

Silo a Necessity.

The silo has come to be recognized as a necessity on farms where ten or more dairy cattle are kept. In fact it is now recognized as the most profitable building on the dairy farm.

FARM LIVE STOCK

PLOW UP BARN LOTS YEARLY

Turning Over Soil Helps to Get Rid of Pests and Forage Makes It Profitable Job.

(Prepared by the United States Department of Agriculture.)

Hog raisers may accomplish two desirable results by plowing up the barn lots at least once a year, says the United States Department of Agriculture. In the first place, hogs need good succulent pasture as much of the time as possible, and in the second place they need protection against internal parasites, such as roundworms, the eggs of which remain in the soil. Turning over the soil in the lots helps to get rid of the pests and the crop of forage makes it a profitable operation. In addition to providing cheap protein feed, pasture crops aid as a laxative and require the hogs to take a certain amount of exercise, which is necessary to breeding animals and growing pigs.

Rye is probably the best crop to use for fall, winter and spring pasture for hogs. Throughout the corn belt it may be sown from August 20 to about October 1, depending on the latitude. In warmer climates the crop may be put in at various times up to as late as December. By putting in successive plantings from two to four weeks apart it is possible to have fresh pasture all the time. Seeding for pasture should be much

Hogs Need Good Succulent Pasture.

heavier than for a grain crop, from three to four bushels per acre on a good soil. Pasturing can probably begin six weeks after seeding, and may continue, if the rye is not covered with snow, until the following April.

WORMS CAUSE SERIOUS LOSS

Farmers Should Exercise Special Care Against Stomach Infection for Rest of Summer.

"All farmers who have sheep should exercise special care regarding stomach worm infection for the remainder of the summer," says A. E. Darlow, assistant professor of animal husbandry at Oklahoma A. and M. college.

"All spring lambs grown for the market should be rushed and put on the market at the first possible date. Stomach worms in connection with short pastures cause serious financial losses, especially with lambs.

"Wherever possible the sheep should have a change of pasture and where flockmasters are prepared to furnish a change of good pasture danger from stomach worms is small."

Aside from changing pasture and rushing lambs the best method of overcoming the stomach worm is drenching, Darlow says. Oklahoma station bulletin 137 by J. E. Guberlet gives directions for preparing and administering this drench.

VITAMINES IN YELLOW CORN

Experiments Conducted at Wisconsin University Show White Variety Is Inferior.

Feeding experiments at the University of Wisconsin indicate that white corn and skim milk when fed to pigs in drylot, is decidedly inferior to yellow corn and skim milk. Two pens fed on these two rations were cared for in other respects alike. None of the lot fed white corn did well; those fed yellow corn produced fairly good returns. Over half the pigs given the white corn were seriously affected and two or three died before the test was completed.

This experiment is in further proof of previous tests both at Wisconsin and elsewhere, indicating that in yellow corn there is a much larger percentage of vitamines. If these can be supplied through green crops, white corn, according to the experiments is satisfactory.

LIVE STOCK FACTS

Caring for sheep is very pleasant work for the man who likes them and who cares to study their peculiar and ofttimes amusing habits.

* * *

Lice may be destroyed on hogs by dipping, the use of crude oil being highly recommended by those who have experimented widely.

NEWS OF GOODELL AND VICINITY THERE ABOUT

Weekly Reports By The Times' Reporter

"Eyes of the World," was shown to a full house Saturday night.

Arthur Lowenberg left Wednesday for Dubuque were he will attend College.

J. J. Cook attended the Farm Bureau Convention at Des Moines last week.

Miss Hill, principal of the High School, spent the week end with her parents at Clarion.

Prof. Nelson, Amos Hanson and Selma Sandberg were visitors at Albert Lea, Minn., this week.

One of the gravel haulers met with a serious accident one day last week, when the truck which he was driving suddenly turned over. He was seriously injured and the truck badly damaged.

The many friends of Mrs. Dominy were grieved to hear of her death which occured Sunday morning. Funeral services were held on Tuesday afternoon at the house. Interment was made in the Evergreen Cemetery east of town.

Goodell High School News

Carl Sandberg was absent Monday on account of sickness.

The American History Class passed a very good quiz Tuesday.

The American Literature Class will soon start reading some of the classics.

Curtis Schuldt returned to school after a week's absence, due to an accident.

The Physics Class have been informed that a radio outfit will be installed for their benefit in the near future. The exact distance that messages can be received is not yet known, but it will range from 300 to 400 mile.s

Our telephone number is 12. Use it when you have some news.

It's easy to say, "1—2." That's the Klemme Times phone number. Tell us when you have some news of yourself or neighbor.

Carl Suckow recently treated his house to a new coat of paint. It sure makes a house look fine to have a new coat of paint now and then and if all houses were kept nicely painted the town would look one hundred percent better.

Quite a number of fans here took in the baseball tournament at Garner Tuesday and Wednesday of this week. Hampton, Dows, Bayside, and Fairmont, Minn., played for the purses. Fairmont took the tournament, beating Bayside in the final game.

A peat marsh three miles southwest of Hayfield has been afire for several weeks now. The fire has spread over some sixty acres and has burned to a depth of from one foot to four feet over that area. The recent rains has helped some to extinguish the fire.

Last week me made a statement that the tuition from outside pupils brought the local school about $1,100 a year. Since then we have learned that it amounts to around $2,000 a year. The other amount, we believe was for the high school. and not for the entire school.

"Butch" Schroeder, of Chicago, came Saturday night and remained until Tuesday. visiting with his mother, Mrs. H. Schroeder, and with other relatives and old friends. He is in this locality looking after live stock interests for his firm, the Central, of Chicago.

Mrs. R. W. Elder returned from the Hampton hospital Sunday and is greatly improved in health. She was at the hospital for over eight weeks and had two operations. Her many friends are glad to see her in Klemme again and are glad to learn that she is on the road to recovery.

The hunting season opened last Saturday morning at sunrise, 5:39 a. m., to be exact, and many were the hunters ready for the first shot at the unsuspecting duck. A few of the local nimrods had fairly good luck and have been bagging ducks nearly every day.

Marvin Weigmann, who resigned his position at the First National Bank here a couple of weeks ago, left Monday night for Madison, Wis. where he will enter the University of Wisconisn to complete his law course. Perhaps we could induce Marvin to "hang out his shingle" in Klemme after he graduates.

Paul Grange is certainly getting his new house put up in quick style. This morning we noticed the carpenters were beginning to shingle it. We suppose next week we will see smoke coming out of the chimney and soon Paul will live there. It will be a fine home.

Paul Stille has a new kind of advertisement in this issue. He will make a complete change of it each week and it promises to be interesting. Paul is a wide-awake young business man and he knows that advertising pays good dividends.

The work of remodeling the high school is finished and school again opened Monday. A partition was removed in the eighth grade room and that made into the high school. The old high school was divided and a partition put up for the eighth grade and a recitation room. This will temporarily take care of the needs of the school.

One day the past week Dr. R. M. Thomas, local veterinarian, called in Federal Veterinarian Dr. Price, of Algona, for a consultation regarding developements following vacinations for hog cholera. Dr. Wesson. of Garner, Dr. Nelson, of Sioux Falls were also members of the consultation. The Federal Veterinarian is frequently called all over the state for consultations of this nature.

We thought Clarence Waterman was acting rather strange when he stepped into the Times office Monday morning and shoved a ten center under our nose and at the same time hopping around and trying to tell us all about "her.". He finally came down to earth and it was all about Marion Lucille who arrived at their home Sunday afternoon, a fine little miss weighing 8 pounds. Since then C. G. has been conspicuous by his absence at the bank, but he will recover sufficiently to be able to again add up a column of figures.

To prove to a Minnesota farmer (who had never been south of the Twin Cities) Art Wellemeyer recently spent eighty cents for express to ship a couple of Iowa corn stalks to the farmer. The stalks were over 12 feet high. Art had told the man that corn really grew tall in Iowa, and lest the farmer would call him a liar, Art sent the corn from that part of Minnesota corn grows about hip-high. The ears on the stalk Art sent were several feet from the ground. Wonder what that backwoodsman thought when he gazed on that Iowa corn.

The rich have their troubles, nearly every poor man stands ready to assume them.

This is the initial bow for us in this style of advertising. We hope you will like it and read it from week to week. In Stille's Implement News we shall try to give you the latest developements in good, efficient farm machinery, as well as other items of interest. Look for it —read it—and we'll both profit.

—S—

Ground Feed Best

Every day that you feed your stock whole feed you can depend on it that you are wasting from 12 to 25 percent of it. Most animals bolt their feed and the digestive track is not capable of handling all of the whole grain, and thus considerable amount is undigested and wasted. An International feed grinder will help stop this loss. Why not come in and look over the new International grinder with its interchangeable double-faced fast grinding plates, which are self sharpening and self adjusting? You'll like it. The Type B. grinds corn on the cob and small grains equally well.

Becker Bros. and Ernest Henschen, Jr., each bought an inside elevator for those big new combined grainaries and cribs that they are building. They bought the King & Hamilton because it unloads fast and is a long lifed machine. Ernie also bought one of our little batch cement mixers to run in the foundation with.

FIRST BALL GAME

KLEMME TO PLAY FIRST BALL GAME AT MESERVEY

Want Booster Crowd To Go With The Local Team

Friday, Sept. 29. Klemme High's Base Ball Team will journey to Meservey to play the Ball Team of that High School.

The game will be held on the Meservey local diamond. Let's see a good crowd of Klemme people at the game.

The possible line up of Klemme playeers will be.

Elder or Koerneer, Catchers
Gimer — Pitcher
Busch — First Base
Lempke — Second Base
Koerner or Brant — Third Base
Turgasen — Short Stop
Wellemeyer — Left Field
Elder or Gibbs — Center Field
Ax — Right Field.
Larsen — Substitute

KLEMME HOT TIMES

Monday morning all's well, no more new cases of diphtheri heard of.

Mrs. Lester Stille certainly has a lot of pep to come and teach the High School, and she thinks our School colors, (which are Green and White) match us to a "T". Mrs. Stille took Miss McKahan's place, the latter being called home on account of her Sister's sickness.

Do you hear some horrible noise every Monday, Wednesday and Friday mornings, well don't get frightened for it's just the Grammer and High School pupils trying out their wonderful voices in songs. We all hope that the voices will improve so you can hear our merry songs all over the country.

Last Tuesday morning we had the most pleasing entertainment, from the High School recitation room there floated on the fresh morning breeze, Ah's and Oh's and Te Hee's. As Dr. Missman was swabbing throats, sure must be some job, we bet that Dr. Missman knows what the human mouth looks like. We all hope that when the tubes come back from Iowa City there will be no positive.

Grade Room Notes

Doctor Missman also swabbed the seventh and eighth pupils throats Tuesday.

Wednesday the third room had an exersise on "Fire Prevention".

Ella Louden is back to school after an absence of one week.

Wayne Pavey is back to school after a week of sickness.

Three Buseman children are back again after a week's absence.

Clara Bergman started to school this week Monday. This makes the enrollment 26 in the Indermediate room. She is in the sixth grade.

Howard Baack is back to school again. Howard is in the Primary Room.

TAKES BAD SPILL

HAYFIELD BOY IS BADLY INJURED WHEN BIKE BREAKS

Raymond Stiniker, 12 year old son of Mr. and Mrs. William Stiniker, who reside one mile north of Hayfield, met with a serious accident Sunday afternoon, when the bicycle he was riding broke at the fork and he was thrown to the road head first. His forehead and face were badly skinned up. Medical attention was given at once. He was unconscious for several hours follow ing the accident. He was still considered in a serious condition the fore part of the week.

MERKEL-ULRICH

NOW THEY ARE MR. AND MRS. LLOYD ULRICH

Popular Young Klemme People Are Married By Gedye

A very pretty home wedding took place at the rural home of Mr. and Mrs. Peter Merkel yesterday (Wednesday) afternoon, when their daughter, Clara, was united in marriage to Mr. Lloyd Ulrich.

The ceremony was performed by Rev. A. B. Gedye of this city, using the Methodist Episcopal form of wedding service. Ben Merkel, brother of the Bride performed the srvices of Best Man, while Miss Fern Ulrich, sistr of the Groom, acted in the capacity of Bride's Maid. This simple, but pretty, home wedding was witnessed only by the immediate relatives of the contracting parties. Those present were, Mr. and Mrs. Peter Merkel and family; Mr. and Mrs. Geo. Ulrich and family; Mr. and Mrs. Jim Wade; Mr. and Mrs. Walter Bredlow; Mr. and Mrs. Ben Merkel; Mr. and Mrs. Alfred Merkel, and Rev. Gedye and family.

After the wedding services were over and congratulations were given the happy couple, the guests were seated to a bounteous six o'clock wedding dinner. which all enjoyed.

That evening when the news of the wedding had spread, many of the friends of the couple drove out to give the newly-weds a real reception. Of course "Bub" set 'em up to the crowd and all went away wishing Mr. and Mrs. Ulrich. newlyweds the best of good luck.

Both of the young people are well known here. The Bride is a very pleasant young lady of many good qualities and universally popular with her many friends.

The Groom is a son of Mr. and Mrs. Geo. Ulrich of this city and is a farmer. "Bub" a fine fellow and worthy of the lady he has chosen as his bride.

We understand they will make their home on the Ulrich farm next spring.

The Times extends congratulations.

Largest Bond Issue

CLARION.—The largest single issue of drainage bonds ever put out by Wright County was signed by Chairman George Grattidge and the Auditor, Frank Walker. The aggregate sum was $172,000. The bonds were issued for the payment of what is called the Clarion storm sewer There were 200 of these bonds, each of which had to be signed and also countrsigned, registered by the Auditor, and then again entered upon the books of the Treasurer Edgar Allen. The bonds run 20 years and bear 5¼ per cent.

WONDERFULL BABY

5 MINUTES OLD BABY CALLS FOR MOTHER 3 TIMES

Five minutes after birth, the infant son of Mr. and Mrs. Peter Zontes. called 'Mother, Mother, Mother' three times, as distinctly as a two year old child, according to the attending physician. The babe was born at the Mercy hospital Thursday morning. He weighed 7 1-2 pounds.

"The baby has been placed in a crib," said the physician, "while the mother was being attended, when all of a sudden persons in the room were startled to hear a small voice crying 'Mother' The call was repeated three times, clearly and distinctly. We all turned to look at the child, disbelieving our ears, and found the younster speaking the words." The physician displayed a credulous and puzzled air when discussing the incident with a reporter.

Several Heard Cry

He explained that the baby had not been crying, hence could not have been making other sounds which were mistaken for the word "Mother." He insisted that others in the room with him heard the cry and understood it exactly as he did. The child had been perfectly normal since then, not assaying to talk or do anything else not done by other babies.

The uncanny incident has aroused much comment since its occurrence. If the child really spoke, he is the first person ever born to that honor. Physicians in charge of the case could not explain the happening except to say that in some manner the child made a sound which happened to be "Mother."—Globe-Gazette.

LOCATE OLD BONES

HUMAN BONES ARE YIELDED TO DIGGERS IN INDIAN MOUND

Boone, Ia., Sept 24.—(Special)—I. T. Pierce and another man opened a mound on the J. B. Dyer farm, situated in the northwest part of Douglas township, and at a depth of six feet found the skull and the roof of the mouth, with all the front teeth in place, and a half-grown Indian and the 15- inch thigh bone of a full grown Indian.

The mound is oblong in shape and about six feet above the general level. It has been seen and talked about for a number of years, but no one had ventured to open it until last week, when Mr. Pierce and his friend concluded to doso.

There is no doubt but that near this mound there was at one time an Indian lodge, for many stone axes ,Flint spears, arrow heads and many other things of Indian manufacture have been found in this vicinity.

The bones are now in the possession of tht Madrid Historical society.

SOMNAMBULIST WALKS TWO MILES IN SLEEP

London—An extraordinary case of sleep walking is reported from Fleet, Lincolnshire. A Norfolk man was cycling through the country, an darriving at Holbeack close upon midnight was unable to find a lodging place. Placing his bicycle against a gate, he lay down exhausted by the roadside and went to sleep.

On awakening he could not find his machine. He aroused the vliage constable and learned that he had walked to Fleet, two miles away, in his sleep. The bicycle was later found where he had left it at Holbeach.

Raised a What-Is It.

Red Oak, Ia., Sept. 28.—(Special)—W. O. McHenry raied something on his farm which he has been unable to identify. A vine grew in his cucumber patch much resembling the cucumber vine. The product of the vine measures three feet in length and ten inches in circumference. He brought the product Reed Oak but no one has been able to tell him definately what it is. Some say its a gourd, others claim it to be a cucumber. It has been examined by farmers and gardeners, but no one has been able to inform Mr. McHenry what the product is.

HELP PREVENT FIRES

IOWANS ASKED TO JOIN IN A CRUSADE TO CHECK FIRES

Much Property Is Damaged By Fire In Iowa Each Year

State Fire Marshall J. A. Tracy, of Des Moines, is sending out some 30,000 fire prevention circulars containing a proclamation by Gov Kendall, urging the adoption of measures of precaution against the fire peril in Iowa.

Half of the proclamations will be sent to the schools of the state and the remainder to banks, newspapers, insurance companies, commercial clubs and county officials.

Big Loss In Life Last Year

Iowa's fire record for last year was a loss of 115 lives and a financial loss of $9,608,145 in a total of 4,769 fires, Mr. Tracy says.

Carelessness with gasoline is one of the most common causes of fire The fire marshall points out that fires caused by gasoline or coal oil caused the deaths of 26 persons last year.

HELP PREVENT FIRES—

TAKES A LONG NAP

BOY'S LONG SLEEP BLAMED ON DRINKING WATER

Waterloo Boy Went To Sleep Labor Day; Just Awoke

On Labor Day Fred Hunt, 13 year old son of Mr. and Mrs. C. A. Hunt, of Waterloo, lapsed into unconsciousness which for days baffled physicians. The other day he sat up in bed and recognized his parents for the first time. The lad also understood hi sfather.

Physicians declare the illness an unusual one and it probably resulted from uraemic poisoning caused by drinking a large quantity of water while in an over heated condition. The physicians now express confidence in the recovery of their patient.

START MUSKRAT FARM

BEMIDJI, Minn., Sept. 27-Walter E. Fowler and John Curry, formerly of Minneopolis, hhave started a muskrat farm. The site of the new industry is the north end of Three Island Lake, about twenty miles north of here. This is thee first experiment of its kind in this state, according to John A. Cline, local game warden, who has made an inspection of the Industry.

THE ORIGIN OF "UNWEPT UNHONORED, AND UNSUNG"

A new member of Congress from Texas was asking many questions of old members as they sat in the cloak room. "I wish some one would tell me," he drawled, "who originated that saying, 'unwept, unhonored and unsung.' It pops up in Texaas papers every year or two."

"Well sir," said Congressman Cassius C. Dowell, of the Des Moines Iowa.. district, "That well known line is by no less a personage than Sir Walter Scott. If my memory serves me correctly the poem runs—

Breaths there a man with soul so dead,
Who never to himself hath said,
"This is my own, my native land!
Whose heart hath ne'er within him burn'd
From wandering on a foreign strand?
If such there breathe, go mark him well!
For him no minstrel raptures swell;
High though his titles, proud his name,
Boundless his wealth as wish can
Boundless his wealth as wish can Claim—
Despite those titles, power, and pelf,
The wretch, concentred all in self,
Living, shall forfeit fair renown,
And, doubly dying, shall go down
To the vile dust from whence he sprung
Unwept, unhonor'd and unsung."

A number of Klemme American Legion men went to Garner last nite to take in the Legion doings there. They all report a good time.

Hancock County Pioneer Was Buried Here Friday

A DANGEROUS JOB

125 PROBITION AGENTS KILLED BY U. S. BOOTLEGGERS

..Washington, D. C., Sept28— (United Jress)— Bootleggers have killed one hundred and twenty-five probition agents since the war on rum runners began, Prohibition Commissioner Haynes estimated today. Twenty-four were federal agents and remainder state. county or municipal officials. Less than 50 bootleggers have been killed or wounded by agents. He placed the number of wounded agents at 3,500.

Commissioner Haynes placed the blame upon the people buying from bootleggers and encourageing them.

Texas, with four federal agents killed leads the list of states in the number of bootleggers' murders.

THE CHURCHES

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Regular worship Sunday morning at 10 o'clock.

Sunday School at 11 o'clock.

In the evening beginning with 7 o'clock, the Epworth League will give a literary program which promises to be of interest for both heart and head. Let every Epwrothian and all friends be present to hear this program.

Please remember the change in the hour of beginning our evening services.

Choir practice on Friday evening.

Prayer service at the church on Thursday evenings. Please bring your bibles. Next Tuesday evening Sunday School Board meeting at the church. Every member should be present.

W. C. Bergmann.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship 10:00 o'clock.
Sunday school 11:00 o'clock.
Evening worship 8:00 o'clock.

Fellowship meeting at church at 7:45 o'clock, Thursday evenings.

There will be no sermon held on Sunday, October 8th, this being Conference Sunday and the pastor will be at Fort Dodge, the seat of the Annual Conference. A number of our congregation will be attending Sunday Conference services.

The Annual Election of officers of the Ladies Aid was held Thursday afternoon.

On Sunday, October 15th, the evening service will commence at 7:30 o'clock.

REFORMED CHURCH

Because of the Mission Festival next Sunday at the Ell Town Reformed Church, there will be no services here Sunday. We hope that as many as possible will attend the services at Ell Town.

—A. A. Depping.

BREAKS ARM WHILE STANDING ON HEAD

While standing on his head at the Sisters' school, Paul Dlugosch, Lake Mills youth, had the misfortune to break his right arm.. He and a number of his playmates were performing in the school yard when one of the boys fell, his foot striking Paul's arm.

Thirty-foot Fall Drove Man's Legs into Earth

Iowka City, Ia., Sept, 27.(Special)—Weseley Geigenheeimer is in an Iowa City hosipital hospital as a result of a fall from the top of a thirty foot windmill. Bones in both legs were snapped off. Witnesses to the event claim that one foot was driven six inches into the ground by the impact.

A. D. White, of Goodell, left Monday for the G. A. R. Encampment at Des Moines.

OBITUARY OF MR. JACOB PHILIP BLUMER

Was An Old Pioneer Resident Of Hancock County

Jacob Philip Blumer, whose death was reported in the last issue of this paper, was born August 1, 1836, at Knittlingin Wurtemberg, Germany. The deceased spent his young manhood in the place of his birth, where he was educated and by confirmation was received into the full membership of the Evangelic Protestant Church.

On May 15, 1860, Mr. Blumer was joined in marriage to Miss Christiana Miedermeier. This union was blessed with ten children; five of whom died in infancy and one, Jacob died in the prime of life in 1904. In March, 1883, Mr. Blumer came with his family to America making his new home on a farm near Garner, Iowa. Here, on the prairie, Mr. Blumer struggled under many difficulties, because in those days Hancock County was not what it is today; however, Mr. Blumer with his honesty and unceasing toil did his share in the developement of this country. The Lord blessed the work of his hands so that he could become the owner of a farm, on which he lived until 1902, when he moved to Klemme, there to spend his declining days.

Mr. Blumer was a kind and peaceful man and had many friends who will not only miss him in the future but who have missed him already because of his long illness. As a husband and father he was an example for many. When he came to Garner he and his family jonied the Ell Township Reformed Church where Mr. Blumer was a member until he came to Klemme in 1902, and since that time, until the time of his death, been a very faithful member of the Klemme Reformed Church.

Father Blumer was very fond of reading and this was his passtime during the last years of his life.

After an illness of several months death came peacefully on September 19th, at 11:00 p. m. His long and useful life was brought to a close by the weight of years. His age was 86 years, one month and nineteen days.

He leaves to mourn his death: four children, one son and three daughters, fifteen grandchildren and eighteen great-grandchildren and many relatives and friends.

Funeral services were held Friday afternoon, September 22nd, at the Reformed Church and was largely attended. The remains were then taken to the Ell Town Church cemetery.—Rev. A. A. Depping.

Card of Thanks

We desire to express our gratitude to the friends who so kindly assisted during our recent bereavement and to those who tendered floral offerings.

—The Relatives.

Eye Ball Taken Out

FOREST CITY, Sept. 26.— Neils Swanson has been suffering for some time with an infection of the eye. It was caused by a piece of plaster striking the eye ball. The attending physician found it neccessary to remove the eye ball this morning. Mr. Swanson is a man along in years.

YALE WINS ITS FIRST GAME FROM BATES, 48-0

Nw Haven, Conn., Sept. 24.— Yale won its first football game over Bates college yesterday, 48 to 0. Although the day was unusually warm, over 15,000 spectators were in the bowl. Bates was helpless before the Eli attack.

Walter and Harold Ridder, and Henry and Lydia Beier, left yesterday morning for Waterloo where they will attend the Cattle and Dairy Show which is in progress there during this week.

Levi Anderson, who was hurt in an auto wreck a week ago, as reported in the Times last week, was s ofar improved that he was able to leave for his home at Swea City last Saturday.

NAVY HAS NEW COMBAT PLANE

Meets Every Requirement of Fighting in Connection With Fleet Operations.

CAN LAND ON DECK OR WATER

TS Type Tested Out, Winning High Praise From Government Experts—Equals Any Combat Plane Now in Use.

Washington.—A shipplane designed to meet every requirement of combat and pursuit in connection with fleet operations, of navy design and built at the naval aircraft factory, Philadelphia, is undergoing final tests at the Anacostia air station here under the supervision of the bureau of aeronautics, navy department.

Another plane of the same type was recently completed by the Curtiss company at Garden City, L. I., and will shortly be flown to Anacostia for further tests.

The tests on the new plane of navy design, called a TS, have been uniformly satisfactory, and naval aviation experts consider it as good a combat plane as any in use by military services from land bases. In addition to operating from a land base, this plane can be quickly converted into the sea type by substituting pontoons for the wheel landing gear.

A statement prepared by the bureau of aeronautics concerning the need for such a plane describes the TS as follows:

Analysis of the Design.

The function of the combat plane is to protect our own aircraft by destroying or dispersing the enemy aircraft. With the development of aircraft carriers to a point where they are now recognized as an essential arm of the naval force, it has been necessary to tackle the problem to be solved in producing suitable designs of aircraft to operate from the carriers. These problems in a few words included the following questions:

How to evolve aircraft of the various types and possessing the following qualities: (a) Best performance, (b) greatest radius of action, (c) smallest dimensions, (d) best adapted to handling and stowage on board ship, and operating from a ship or airdrome.

It must be speedy and have superior qualities of maneuverability and stability; it must be lightly constructed but rugged.

The TS, which the new plane has been designated, in recent tests, has demonstrated all of the above qualities in a manner extremely satisfactory to government experts, and it is expected that quantity production on this type will go ahead within the near future.

The plane is equipped with a Lawrence 200 h. p. air-cooled motor, which is the highest-powered air-cooled motor built in the country. The construction of the wings is such as to permit of rapid assembly.

Lands on Deck or Water.

A standard equipment of two types of landing gear is provided, viz., wheels for landing on the deck of carriers or on land and pontoons for landing on the water. Both types of landing gear will be supplied so that the rapid conversion from landplane to seaplane may be effected. This is one of the most noteworthy features of the craft in that it will double its usefulness and make possible land operations by combat planes based on the fleet as well as providing a swift fighting seaplane equipped for making landings on the water.

The naval battles of the future will depend largely on gaining and maintaining control of the air. Spotting, scouting and observation from aircraft will give to that fleet possessing these facilities an advantage that will be practically decisive. The torpedo plane has also entered into naval problems within the past two years to an extent that places an entirely new complexion on this method of attack. But all of these invaluable aids to the successful outcome of the naval battle are dependent on the combat plane that is able to take the air in sufficient numbers and with sufficiently superior fighting qualities to sweep enemy aircraft before it.

The new TS combat plane gives every prospect of fulfilling these exacting conditions.

KILLED BY RACING HORSE

Spectator Trampled to Death When Animal Dashes Into Crowd at Race Meet.

Loraine, Tex.—William Lefever, nineteen, was killed and three others injured here when a horse ridden by Poley McGee at a race meet left the track and ran into the spectators. McGee, Sam Williams and Lem Fowler suffered internal injuries. Their condition is serious.

Tailors' Shears Get Heirlooms.

London.—Shawls and delicate laces coming down in the family for generations are being hauled forth from cedar chests and sent to the modiste to be made into summer wraps. Lucky the woman who owns a thin silk India shawl and a length of fine lace. The two combined, with perhaps bands of crepe marocain added, will form a stunning cloak for wear over a summer gown.

LUCKY STRIKE CIGARETTE
IT'S TOASTED

It's toasted. This one extra process gives a delightful quality that can not be duplicated

Where They Differ.

Gandhi has overthrown another barrier; the antagonism between the two great religions of India—Hinduism and Mohammedanism. While the Hindus have their hereditary caste system, the Mohammedans consider all men absolutely equal and recognize no distinctions of birth. The Hindus, for both religious and economic reasons, consider the cow a sacred animal; but the Mohammedans eat beef. On the other hand, the religion of Mohammed forbids its followers to eat pork; but the Hindus eat pork. Hindus and Mohammedans do not intermarry; since Hindus cannot marry outside their religion. The Mohammedans call the Hindus "Kafirs," or, at least, do not consider them "men of scriptures," a category that includes only Jews, Christians and Mohammedans.—Overseas Science.

Polly and the Profiteer.

The parrot had frequently heard the dealer quote his price to customers and had added the words to his vocabulary. One day a lady customer stopped in front of his cage and said: "I like the looks of this bird. What is your price for him?"

The dealer noticed the lady's rich apparel and he raised his price to match.

"Ten dollars, madam," he said.

"Five dollars, madam," croaked the parrot.

The lady looked at the proprietor, who had turned a deep red. "He certainly is a good talker," she said, "and he seems to have good sense. I am willing to take him at his own valuation. Do I get him?"

"You do," said the man sadly.—Boston Transcript.

Going Some.

"So you were out automobiling with Jack Speeder yesterday. How did you enjoy it?"

"My dear, the experience was positively breathless. We made only one remark each during the entire ride. He said, 'Isn't that a fine view ahead of us?' and I said indeed it was."—Boston Transcript.

How long will it take to double my savings at 5 per cent interest compounded semi-annually

Of the more than 11 millions of savings depositors in the United States, perhaps only a comparatively small number realize the interest-earning power of their savings.

For instance: A savings fund of $500 drawing compound interest at the rate of 5 percent will at the end of the 18th year amount to $1,140.09, without the addition of a single penny on the part of the savings depositor. Your $500 will have earned $640.09 in interest during that period.

That is something to think about when you start a savings account for yourself or for your small son or daughter.

Where Extra Service is Demanded
Firestone Cords Predominate

WHEREVER the exactions and tests of tires are most severe—there you will find Firestone Cords in universal use.

The hard jobs seek Firestone. And so well has Firestone responded under difficult conditions—so consistently has mileage mounted to totals impossible to obtain from ordinary tires that today Most Miles per Dollar is the buying slogan of thinking motorists everywhere.

The blending and tempering of rubber, gum-dipped cord construction, air-bag cure—all these mileage methods have been developed by men whose life work is the production of constantly increasing tire values for the public.

Users in this vicinity verify Firestone reputation, and report almost daily some new Firestone record of extra distance travelled.

Don't be satisfied to buy tires—buy values—the longest mileage at the lowest price consistent with such reliable performance.

Make Most Miles per Dollar your principle of tire economy — choose your next tire on that basis.

H. V. Reed,
J. C. Ford, Commissioners.
A. J. Lilly, Engineer.

Owners of the above described lands, Drainage District No. 21 of Hancock County, Iowa, and to all actual occupants, and to all persons having or claiming any right, title, or interest in and to the above described lands.

You and each of you are hereby notified that the Commissioners appointed by the Board of Supervisors of Hancock County, Iowa, to inspect and classify the lands benefitted by the location of Hancock County Drainage District No. 21 of Hancock County, Iowa, in tracts of forty acres or less, in a graduated scale of benefits, to be numbered according to the benefits to be received by the proposed improvement, and to make an equitable apportionment of the costs, cost of construction, expenses, fees, and damages assessed for the construction of said improvement, did on the 21st day of September, 1922, make their report to the Board of Supervisors of Hancock County, Iowa.

That the real estate owned or occupied by you and each of you, and situated within Drainage District No. 21 of Hancock County, Iowa, a description of which is set opposite the name of the owner thereof in the foregoing schedule, has been classified by said commissioners, that the amount of special assessment apportioned to you and each of you by said commissioners is hereby set opposite the description of each tract of land on which assessment is made.

That said report will come up for hearing before the Board of Supervisors of Hancock County, Iowa, on the 15th day of November A. D. 1922, at 1:00 o'clock P. M., at the Court House at Garner, Iowa, that all objections to said report must be made in writing and filed with the County Auditor of Hancock County, Iowa, prior to the day of hearing, all objections not filed prior to the day of hearing should be filed with the Board of Supervisors at the place where the hearing is to be held.

Dated this 26th day of September, A. D. 1922.

CHRIS JACOBS, COUNTY AUDITOR,
(SEAL) HANCOCK COUNTY, IOWA.

NOTICE OF PROBATE OF WILL

STATE OF IOWA,
Hancock County, ss
IN DISTRICT COURT
October Term, 1922

TO ALL WHOM IT MAY CONCERN:

YOU ARE HEREBY NOTIFIED, That an instrument of writing purporting to be the last Will and Testament of Wm. F. KOERNER, deceased, dated March 8, 1910, having been this day filed, opened and read, the 23rd day of October, 1922 is fixed for hearing proof of same at the Court House in Garner, Iowa, before the District Court of said County or the Clerk of said Court; and at 10 o'clock A. M. of the day above mentioned, all persons interested are hereby notified and required to appear, and show cause, if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased.

Dated at Garner, Iowa, Sept. 26, 1922.

B. E ERWIN,
Clerk of District Court.

FALL ONE BY ONE

How Time Brings Changes in a City's Landmarks.

Famous Old Washington Square, in New York, Is a Good Example—Once Place of Execution.

It is sweet to dance to violins
When love and life are fair—
To dance to flutes, to dance to lutes
Is delicate and rare;
But it is not sweet with nimble feet
To dance upon—the air.
—Oscar Wilde. "Ballad of Reading Gaol."

A city grows. Landmarks which have defied time fall before wreckers and landmarks of the future take their places. The tales whispered about them are lost in the crush of riveting hammers, in the rumble of subway trains, in the roar of truck engines and the shouts of truck drivers.

Often time works to change completely not only the physical aspect of a locality, but also its spirit.

Washington square, says a New York Sun writer, is a name to conjure with, more, of course, in cities and towns far from New York than within the limits of the greater city. Wherever aspiring and hopefully artistic youth congregate, in every city in every state, eyes are turned toward the radical artistic groups with which the square and its environs are inevitably associated. And feet have a way of following eyes.

Countless thousands come every year from Iowa and Missouri, from Arkansas and Texas, to spend a few weeks in the metropolis; perhaps to stay, if the city is welcoming.

They go, after the Woolworth tower, straight to Greenwich Village. They drink bohemian tea in eagerly artistic places; they dance to the strains of violins in the hands of unpublished poets. They dance and are thrilled.

Most of them—perhaps even some New Yorkers—who "dance to violins"—not, it is to be feared, "to flutes, to lutes"—are missing a thrill justifiably theirs.

On a gray morning a hundred years ago a trembling negro girl was led up the steps of a gibbet. Whether the girl, Rose Butler, had committed the murder for which she died cannot be said. Probably, not to do our ancestors injustice, she deserved her fate. At any rate she paid the penalty. "It is not sweet with nimble feet to dance upon the air."

The gibbet upon which Rose Butler and others died was set up at the point where now the Fifth avenue busses sweep into Washington square to discharge their loads of sightseers, many of them to dance in the more commodious of the village tea shops.

But there was no Washington square in those days. Instead, the space it now covers was part of the pauper field in which those too poor to be given the luxury of tombstones were buried. Hundreds of pauper funerals passed through lanes that are now famous streets of New York's "Quartier Latin," wending their way to the public burying ground.

Even in those days the district was taking on a more fashionable aspect, however. Monument lane (or Greenwich lane) passed on one side of the cemetery and it was at the insistence of those who rode over the fashionable drive in still more fashionable carriages that the field was abandoned as a cemetery in 1823, after 26 years of service to the city.

Washington arch has replaced the gibbet as the laughter of gayety has replaced the silence of the pauper field; as polished wood has replaced the air as a dance floor. And time changes thrills as it changes landscapes.

"Poison Squad" at Work.

The Brooklyn Botanic garden has a poison squad which has enjoyed little publicity, but has enjoyed poor health. A paragraph of a recent report of the garden reads:

"Dr. Perley Spaulding, pathologist, United States Department of Agriculture, called at the gardens and secured cuttings of five species of currant. The shrubs propagated from these cuttings will be used by Doctor Spaulding in his investigations of destructive diseases."

The scientist now has this currant bush poison squad working night and day seeing how unhealthy it can get. These currant bushes have all the ailments that a currant bush is heir to, and the chances are they may never get well. If it were possible for these bushes to express their opinion of all this listeners would probably hear some sizzling current opinion.

Elephant Desk Light for Good Luck.

Elephants carved from ebony or ivory have long been popular in the home, superstition having attached to them the power to bring good luck to their owners.

Now comes a glorified symbol of fortune's smile for desk or boudoir, consisting of a beautifully made electrolier. In this the animal, sturdily made, bears on his back the palanquin-shaped lamp, which furnishes a richly colored light.

Whether or not an elephant so fitted brings good luck to his possessor beyond the luck of owning such an exquisite accessory, the average girl would find sufficient pleasure in ownership to believe the sign had already "come true."—Exchange.

"White Coal" in Sweden.

In 1920 Swedish hydro-electric stations were developing 1,200,000-horse power. The equipment since added probably brings the total close to 1,500,000-horse power.

U. S. GETS STOLEN CARS

2,120 Automobiles Recovered by Uncle Sam's Theft Squad.

Burns Men Get Conviction of 1,113 Under Dyer Automobile Law—American Automobile Association Helps Federal Officers.

Washington.—Since the passage of the Dyer anti-theft automobile law in October, 1919, the bureau of investigation, Department of Justice, has recovered 2,120 automobiles, worth at a fair second-hand valuation $2,567,208, according to figures compiled for the American Automobile association.

The department has investigated 2,391 cases, which involved 4,385 persons. There were 2,778 persons arrested, of whom 1,533 were indicted and 1,113 convicted. These convicted persons received sentences amounting in the aggregate to 2,356 years 6 months 11 days, and paid fines of $41,140.

The American Automobile association took an active part in supporting the Dyer anti-theft bill, which was prepared by Representative L. C. Dyer of Missouri, who is an active member of the Automobile Club of Missouri, and who was assisted in obtaining facts necessary for the preparation of this measure by the Automobile Club of Missouri and the A. A. A. Credit for the enforcement of the law is due largely to William J. Burns, head of the bureau of investigation.

The outstanding feature of the Dyer law is that it places interstate transportation of stolen motor vehicles under federal law and makes such an action punishable in federal courts. Formerly bands of unscrupulous men had maintained assembling factories at various points and were able to so alter a stolen car as to make it practically unrecognizable to the original owner.

Officials of the A. A. A. are working with federal officials and heads of other organizations to induce motor car manufacturers to mark permanently all automobiles so as to make identification more easy.

JEWS LEAD AS NEW CITIZENS

More of Them Than Any Other Race Naturalized in New York During Last Year.

New York.—About 150,000 new citizens were made in the New York district during the last fiscal year, according to a report just made public by Merton A. Sturges, head of the naturalization bureau. Classified according to races, the Jews led all others in applying for citizenship papers, numbering about one-third of the total.

About 45,000 applications were received, of which 41,000 were granted. This, including wives and minor children, makes approximately 150,000 new American citizens. Aliens are not required to pass a literacy test in applying for their papers, but must speak the English language. Refusals were based mainly on moral grounds.

NEW U. S. CURB ON NARCOTICS

"Dope Fiends'" Path Is Made Much Harder by Safeguards on Blanks.

Washington, D. C.—Stringent regulations to prevent "dope users" from obtaining narcotics on stolen blanks have been issued by Internal Revenue Commissioner Blair. All agents and other persons registered under the Harrison narcotic law were instructed to report immediately the numbers of any stolen or lost order forms. The new orders, it was explained, were issued as another means of closing the door to the illegal use of narcotics.

DOGS CAN'T LIVE ON ISLAND

Animals Brought to Tract in Mississippi River Near Biloxi, Miss., Do Not Survive.

Biloxi, Miss.—For some mysterious reason dogs cannot live on Ship island, 13 miles off this port. This fact is borne out by old residents, who frequently have attempted to keep dogs, only to lose them after a short stay. Some medical authorities believe the dogs become affected with chigga, a disease which is said to originate from the island sand.

Lad, Asleep, Steals Ride on Front of Locomotive

Hammonton, N. J.—When a Pennsylvania railroad bridge train from Atlantic City passed through here at high speed last night the motionless form of a lad was seen on the front of the engine. When the train stopped at Broad street station, Philadelphia, railroad officials found the body of a boy seventeen years old lying inert on the fore part of the locomotive.

He was alive, but asleep, and had made the ride, almost 70 miles, in this dangerous position, sometimes rushing through the darkness at 70 miles an hour.

The passenger was Frederick Herbert of Shawnee, Okla., homeward bound without the formality of paying regular rates. The Philadelphia police took the nervy lad in tow.

AIR HEROES TO REST AT VERDUN

Members of Lafayette Escadrille Who Fell in War to Lie Together.

SIXTY-FOUR NAMES ON LIST

With Approval of Their Relatives Bodies Will Be Gathered and Will Rest Beneath Mausoleum Worthy of Their Valor.

Verdun.—Verdun will be the final resting place of the American heroes who fell while fighting with the Lafayette Escadrille.

Scattered along the line of death from the sand dunes of Nieuport to the swamps of Salonika, their bodies—with the approval of their relatives—will be gathered, and beneath a mausoleum worthy of their valor on a shell-torn hill of the shrine of heroism, they will await the final call, a symbol of the purest sacrifice ever made by man.

Sixty-four names will adorn the monument, but only 62 bodies will be there, that future generations may revere their memory indelibly engraved in the hearts of the living. Nothing was found of the mortal remains of Sergt. Victor Chapman of New York and Lieut. Carter Ovington. They met their fate while soaring high above the clouds, and like Guynemer, they vanished into space, leaving no trace.

A small urn will suffice to contain all that is left of Maj. Raoul Lufbery, cremated alive in his burning plane. Their bodies may have gone to dust, but for each one of these 64 men a place will be set apart as an individual memorial which either now or at any time can be used as a place of interment. In any case, the name of each will appear among the names of his comrades.

A Burial Garden.

This is the program of the Lafayette Escadrille Memorial association. Born of the initiative of Lieut. E. G. Hamilton, it has undertaken to create and maintain in France a burial garden for the heroes of the Lafayette Flying corps who enlisted under the flag of France and gave their lives for the cause they defended.

President Millerand, Premier Poincare and Minister of War Maginot have accepted the patronage of the association, whose president is Marshal Foch and its vice president Ambassador Herrick.

The plan for the memorial garden, designed by Alexandre Marcel, chief architect of the French government, has been mailed to every relative of the dead aviators. The garden will occupy a site about two miles from Verdun, the ground having been donated by the French government for this purpose. In the letter which accompanies the plan the committee says:

"We feel that these men who were actuated by the same noble motives, who together underwent the arduous life of training and faced the dangers of the front; who in many instances had been close comrades in life, should in death lie together in this memorial garden, which for all time shall be a testimonial to their devotion to an ideal which was stronger than their love of life. It is for their relatives themselves to decide whether or no the body shall be moved to the place reserved for it. The committee pledges itself that the removals will be done with the utmost care and reverence."

TAKES JUDGE'S NAME IN SPITE

Purse Snatcher Seeks to Get Even With Court for Jail Sentence.

New York.—In 1916 Samuel Gumpel was arraigned before Magistrate Gibbs in the Bronx county court charged with pocketbook snatching. Judge Gibbs sent him to Elmira.

Apparently to spite Judge Gibbs, Gumpel has since assumed his name. Recently when arraigned as Joseph Gibbs before Magistrate Max S. Levine in Washington Heights court, charged with vagrancy, a prohibition officer reported this to be the fact.

The magistrate sentenced the prisoner to four months in the workhouse saying:

"You have assumed the name of one of the most highly respected judges in New York city. I'll give you four months in the workhouse so you can think of another name to use."

ENGLISH DEATH RATE LOWER

Vital Statistics Also Show New High Record for Births in 1920.

London.—The year 1920 furnished several records in vital statistics, according to the annual report of the registrar-general of England and Wales. Births totaled 957,782, a new high record. Deaths numbered 498,130, or a rate of 12.4 a thousand of population. This is the lowest death rate since 1862, when the population was only half that of 1920. Infant mortality was the lowest recorded, the rate being eighty per thousand births.

Marriages totaled 379,982, also a record. The natural increase in population was 491,632, the largest ever recorded. Divorces were nearly three times the number of any year prior to 1919.

CROWS HUMBLE EAGLE

Beat Huge King Bird of Air to Earth in Bitter Fight.

Defeated Bird, Its Feathers Broken, Picked Up and Sent to Cincinnati Zoo—Distress Signal Brings Hundreds of Crows.

Cincinnati.—A golden eagle sat morosely in the eagle house at the zoo, doing his best to straighten and preen the broken feathers of his once proud coat. No wonder. The huge eagle had been humbled by members of the crow clan.

The eagle arrived from Williamsburg, crated and riding on top of an automobile truck driven by Harry Hall. Mr. Hall said he captured the huge bird several days ago on his farm after the eagle had alighted near a crow's nest containing young birds.

Mr. and Mrs. Crow were standing guard over the brood, and when the eagle dropped out of the sky they let out frantic squawks for help. Instantly, from all points of the horizon, there began to materialize a fleet of angry crows. In a few moments the air was black with crows and blue with crow epithets.

The haughty eagle glared defiance at the threatening cloud of feathered warriors wheeling past and clung to his limb. Bolder and bolder became the crows; closer and closer they swept to the enemy, their wing feathers brushing his face, their beaks snapping defiance and hatred. More than a hundred of the ebony fighters assembled at last, and finally the bolder spirits began delivering blows along with the threats and oaths.

The finish came swiftly. The eagle and the nest which the crows were trying to defend were both knocked from the limb and went tumbling to earth in a pecking, clawing, cursing mass. Even after they had their enemy on the ground the victorious crows gave no mercy, and but for the timely arrival of Mr. Hall and other farmers who were plowing corn in the fields near by the affair might have ended in a tragedy.

The men drove the crows away and were going to pick up the fallen eagle when his ready talons and waiting beak warned them away. Mr. Hall found a solution by procuring a horse blanket and throwing it over the vanquished eagle. Then he carried him to his house and put him in a cage, the crows following as a triumphant escort to see that the thing was done properly and without deceit.

Sol Stephan, manager of the zoo, says the eagle is a fine specimen, measuring nine feet from tip to tip of his dull bronze wings. Except for broken feathers, the big bird is none the worse for his terrible mauling, Mr. Stephan says.

ROMPS WITH "LADDIE BOY"

Eight-year-old Miriam Battista enjoyed a long romp on the White House lawn recently with President Harding's dog, Laddie Boy.

FORGES TO FEED DYING WIFE

Youth Freed by Los Angeles Judge, Who Refuses to Consider Him Culpable.

Los Angeles, Cal.—William Strickler, nineteen, whose wife and babe were sick, got a day's work and a check for $4 in payment. He put a zero after the four, cashed the check and spent the $40 on his family.

When arraigned for his crime, Strickler admitted everything to Judge Reeve of the Superior court. The public defender told how, a few days after the forgery Strickler's wife died, and how Strickler, at her grave with his four-month-old baby in his arms, was arrested, handcuffed and taken to jail. Then he asked probation for Strickler.

"Probation?" thundered the court. "Why, the case is dismissed."

Sun Hatches Chicks on Ship Becalmed at Sea

Tacoma, Wash.—A small flock of chickens and ducks was hatched out of the cook's eight cases of Australian eggs while the ship Matsalau lay helpless in the doldrums with the thermometer averaging 102.

The flippers of a giant sea turtle were cooked for food for the baby chicks. When a few ducklings appeared, a tub of sea water was kept on deck for these youngsters to bathe in.

FIRST LAW IS HOSPITALITY

Arabs Will Quarrel Over the Privilege of Entertaining a Visitor—Strict Rule of Etiquette.

Although most Arabs are Bedouins or nomads, many of this ancient race live in towns. To the traveler unused to the swaying and almost "mal de mer" inducing motion of the camel—for this is the mode of locomotion in Arabia—it is a great relief to come to one of these dingy yet picturesque towns.

With a sigh of relief the care-worn and dust-covered voyager crosses the dry moat and passes through the city walls. All Arabian towns have walls and turrets. The traveler wonders what the great standpipe is, rising high above the houses, and if by chance there might be some industry connected with it. But on inquiring he finds that it is the watch tower—a remnant of the Middle ages when only spears and lances were used in warfare. Today the tower would fall quickly if it were hit by the shell from a five-pound gun.

To visit in one of the Arabian houses is indeed a great pleasure, for the Arabs are most hospitable, and treat their guests royally, asserts Temple Manning in the Cleveland Plain Dealer. In fact, the whole town will squabble over the privilege of entertaining a visitor.

No mention of the length of a visitor's stay or where he is going is alluded to—this would be the height of ill manners. For this handsome and bold race are gallant and courteous to the last degree, and some of their forms of conduct are difficult for the Westerner to adopt.

Although it is fascinating to live as a guest of an Arabian family, it is really difficult, and one must be on his guard if he cares to be invited again.

The main room in every Arabian house is the coffee room. Here is where the men meet at all hours and talk and drink the Arabian coffee, which is so strong that it is apt to keep the guest awake all night.

There is no furnishing in the room save rugs. On these beautiful rugs one sits, and is very careful not to let his foot stick out in front of him. For in an Arabian house feet are to be used, but never seen.

If you should visit in this land of "A Thousand and One Nights," be sure to tuck your feet under you, no matter how uncomfortable, because if you don't you will be considered badmannered and will not be asked to call again!

RETARD OLD AGE

Certain Foods Known in Asia Minor as Life Preserving.

System of Diet of the Early World When People Lived for Hundreds of Years.

It may interest readers to hear of a system of diet which is that of the early world when people lived hundreds of years without growing old. I heard of it while traveling in Asia Minor from an Armenian woman of sixty of very youthful appearance, writes M. E. Forbes in the Saturday Review. Traditions on diet and long life had been preserved in her family from very ancient times.

Her father had lived to one-hundred and fifty and her grandfather and her grandmother also. She attributed her youth to certain laws of diet and to a particular sweetmeat, a kind of sweet paste, which she claimed was one of the foods of the patriarchs and enabled them to live to their great age. It prolongs youth and retards old age, and is made from two of the life-preserving foods mixed with honey and other ingredients. She believed that old age and disease were due to unsuitable and wrong combinations of food and that a longer youth can be achieved by keeping as strictly as possible to the diet of the ancient world.

She divided food into three classes—the life giving, containing the proteids, fats and carbohydrates; the life preserving, only six in number; wine, olive oil, youhort (fermented milk), butter, honey and dates; and the life destroying, five in number, which should never be eaten, and consist of flesh of meat, tea, coffee, beer and spirits. Her own diet consisted of wholemeal bread, eggs, vegetables, some of each of these life-preserving foods, and lentils, and at the midday and evening meals some of the sweetmeat, the latter being a very essential part of the diet. She claims that it is possible to maintain youth and vigor up to a very long time on this diet.

I have tried it now for seven months, eating only very little fish and fowl. I have grown much stronger, my friends tell me I look much younger, and I have entirely got rid of a troublesome throat affection and cough which I suffered from for years and which I always feared would develop into consumption. Medicine and an operation failed to do me any good, but this diet seems to have eliminated the germs from my system, for I am entirely cured.

There are such a number of systems nowadays that one is apt to think very little of them, but I can testify that this system will yield the fullest results, only it must be conscientiously carried out, and, whatever else is eaten, the life-destroying foods should be given up.

Revenue From Trees.

The United States forestry service is endeavoring to get the cities and municipalities of the country into line for the proper forestation of such lands as these organizations might own and control. The fact is deplored in a recent paper on the subject that less than one-half of the land owned or controlled by the cities of New York state is properly cared for and made to pay for the keep.

Newberg, which leads in the development of municipal lands, has been engaged for some time in the task of reforesting its watershed so as to insure a supply of water and to derive a future income. This consists of 175 acres, of which 18 acres have been reforested. The work has been done by securing the interest of the school children, and each year 200 boys and girls are taken to the country for the purpose of tree-planting.

NOW THE HORSELESS FARMER

Young Men Are Leaving the Farms to Engage in Manufacturing of Agriculture Appliances.

If all the farm boys are leaving the farms to work in the city factories, it may be they are doing so because the factories have to make so many machines and appliances for the farmers, observes the Literary Digest. Of course every one realizes that the American farmer is increasingly making use of the products of inventive genius, but for the first time, the National City bank of New York notes in its Trade Record, the 1920 federal census presents figures on the number of automobiles, motortrucks, telephones and farm tractors in use on the farms of the country, and the number having "water piped into the house." These figures, it is remarked, indicate that the automobile and telephone are now a big factor in farm life, not merely as a comfort and convenience but as an actual aid in business. The Trade Record sums up the census figures as follows:

The number of telephones, by which the farmer may communicate with his local trade center or with the great cities in which the prices and markets for his products are determined, is officially stated at 2,498,493 in 1920, while another authority puts the total number of phones in all the United States "without regard to ownership" at the end of 1920 at 13,411,379, which suggests that nearly one-fifth of the phones in the United States are now in the farm home and farm business service; while 38 per cent of the reporting farms were equipped with telephone service in 1920.

The automobile statistics are also extremely suggestive. They show the number of automobiles on farms in 1920 at 2,146,362, while figures compiled by Automotive Industries put the total of automobiles in use in all the United States in 1920 at 7,904,000, suggesting that the farmers owned in that year considerably more than one-fourth of the automobiles of the country, to say nothing of the 139,000 motor trucks and 246,000 farm tractors reported in operation on the farms in 1920. Over 30 per cent of the reporting farms in 1920 utilized automobiles.

Still another evidence of the disposition of the farmer to utilize machinery in increasing his business activities is found in the fact that the value of his "farm implements and machinery" reported in 1920 was nearly three times as much as in 1910, five times as much as in 1890. The official valuation of farm implements and machinery in 1920 is $3,195,000,000 against $1,265,000,000 in 1910, $750,000,000 in 1900 and $494,000,000 in 1890.

It is not surprising then, in view of the increasing use by the farmer of these time and labor-saving devices, the telephone, the automobile, the motor truck and the farm tractor, coupled with the enormous increase in his farm implements and machinery, to find that the census reports the value of horses on farms in 1920 only $1,782,000,000 against $2,084,000,000 in 1910, a decrease of 14 per cent in value of horses, while all other classes of farm animals increased in value in the same period.

Elephant's Smeller.

What the elephant lacks in vision is more than compensated for by the animal's keen sense of smell. His trunk is probably the best smelling apparatus in the world; and he depends first of all on his sense of smell. When he is at all suspicious he moves his trunk around in every direction, so that the slightest taint in the air will reach him. In many other ways the elephant's trunk is the most extraordinary part of that most extraordinary animal. It is entirely flexible at every point, and it can turn in any direction and has tremendous strength. There is no bone in it, but it is constructed of interwoven muscle and sinew so tough that you can scarcely cut it with a knife. From it an elephant can shoot a stream of water that will put out a fire; and with it he can lift a tree trunk weighing a ton, or pull a delicate blade of grass. He drinks with it, feeds himself with it, smells with it, works with it and fights with it.

Asleep for Four Years.

In certain parts of the African desert, where it is too hot for any plants to grow, the ground is in places thickly covered with white snails.

In 1918 a naturalist traveling through this region collected some of the shells from a spot on which it was believed no rain had fallen for five years. These snails' shells were packed away and left untouched until this year, 1922, when the naturalist, at home once more, unpacked his shells and placed them in a basin of water to be cleaned. To his amazement, a quantity of healthy living snails were found on the following morning crawling all over his study table!

Then Father Flared.

A young man was wheeling a perambulator to and fro in front of his house. He looked hot, but contented.

"My dear!" came a voice from an upper window of the house.

"Now let me alone!" he called back. "We're all right."

An hour later the same voice, in earnest, pleading tones:

"Arthur, dear!"

"Well, what do you want?" he responded. "Anything wrong in the house?"

"No, dear; but you have been wheeling Dora's doll all the afternoon. Isn't it time for the baby to have a turn?"—Chicago Herald.

RIVER IS BEDDED WITH GOLD

Expedition From the United States Expects to Retrieve Treasures of the Congo.

When the White Star liner Majestic sailed recently she carried with her an expedition composed of eight men from Katonah, N. Y., which hopes to penetrate 600 miles into the Belgian Congo in search of a gold field which they believe will prove as rich as the Klondike, said a recent issue of the New York Herald. The expedition expects a search of at least six months. All the while that the organization work was going on the facts relating to it were kept secret.

It all came about this way: Julius J. Dolgos, a chemist of Goldens Bridge, Katonah, was in the mounted forces operating in the Belgian Congo during the war. Back in 1917, while with a column of cavalry, he lost his way, toppled off a cliff, but suffered only slight injuries to himself and horse, and continuing he came to a brook, at which he stopped to refresh himself. It was what Dolgos saw while drinking water as he lay on his stomach that caused the expedition into the wilds.

The bottom of the brook seemed to Dolgos to be carpeted with gold. He thrust his hands in, picked up a handful of what he thought were pebbles, but found they were of a metallic substance. He thrust a handful into his pocket and proceeded on his way rejoining his unit, but not confiding in his comrades the secret of his find. Upon leaving the service he took the "pebbles" to an appraiser who purchased them from him, he said, for $1,500.

Dolgos got back to Goldens Bridge and Katonah eventually and there met Edward P. Barrett, supervisor of the town of Bedford, to whom he told his story. Barrett was so impressed that he took six other men into his confidence. They were A. C. Brower, Raymond Brower, Charles F. Ganung and Robert Eiseman of Katonah; William H. Odell, Jr., of South Norwalk, and Capt. Carlos de Mantanha of Brooklyn. These men with Barrett and Dolgos composed the party of prospectors who left on the Majestic. Barrett will travel as far as Brussels, where he will seek concessions necessary for the development of any property the expedition members may deem of value.

Travel on the Fulton Ferry.

Persons, who travel daily back and forth on the little red ferry boat that plies between the foot of Fulton street and Manhattan would be surprised if you told them they were traveling on the most expensive boat line in the world, the New York Sun says. Not even the great Majestic, 56,000-ton White Star liner, the largest steamship in the world, charges a higher rate of fare per mile. On the Majestic the first-class passenger pays about $250 to cover 2,800 miles of salt water between New York and Southampton and he gets three meals a day and his stateroom thrown in, but the passengers who ride on the little ferry that shuttles back and forth under the shadow of Brooklyn bridge would have to pay nearly $400 to ride the same distance and they would not have even so much as a sandwich for food.

Owing to the increased cost of operation, a notice was recently posted increasing the fare to 7 cents a trip. The journey is a little less than half a mile and the rate of 14 cents a mile is the highest on record for marine travel.

HOW NEW ZEALAND GETS TIME

It Is Flashed Each Morning From the Great Wireless Station at Bordeaux, France.

Since the middle of March the New Zealand government astronomer has had to adjust his breakfast hour to the ticking of a clock at Bordeaux, France, a Wellington correspondent of the Christian Science Monitor writes. Under the international agreement exact Greenwich time is flashed from the great wireless station at Bordeaux at 8:30 o'clock each evening. New Zealand time is 11 hours ahead of French time, so that the signal reaches New Zealand at 7:30 o'clock in the morning. It is the task of Dr. C. E. Adams, government astronomer, to take the time, make any correction that may be necessary in the official clocks and then broadcast Greenwich time for the use of anybody in the South Pacific who may require it.

Wellington lies in a cup in the hills. High on a ridge overlooking the city and the harbor are the towers of one of the big government wireless stations, but the busy operators there are not required to listen for the time. The observatory on a lower ridge of the hills has its own aerials and receiving set, and there the time signals are taken.

Wellington and Bordeaux are just about as far apart as the dimensions of the world will permit them to get. But as the government astronomer "tunes out" the chatter that comes to him from Australia and America, Germany and Japan and Africa, the tick of the Bordeaux clock gradually comes clear to the ear. Three hundred ticks are given, so that all the nations may adjust their clocks to the true—stellar—time.

These signals from France to New Zealand are probably the record long-distance achievement of wireless telegraphy. More important than the making of any record is the assistance that the signals give to the marines in the South Pacific. Greenwich time is the basis of navigation, and many a ship has experienced difficulty, due to uncertainty as to its chronometers' accuracy after a voyage extending over many weeks. But now the New Zealand station can tick off the time for the information of all ships within hearing, and so place navigation on the most secure possible basis.

Return of the Snuffbox.

Cigarette and pipe smoking does not seem the limit of feminine uses for tobacco, as the London Express discovers that snuff-taking is a widespread secret habit among English women of the better class. One snuff manufacturer has given the paper some amazing information, declaring "women consume 65 per cent of the snuff now sold." He continued:

"For the most part women take snuff secretly. They will not admit the habit even to their dearest friends. Every walk of life has its women snuff-takers. I myself have come across thousands of them, especially among the cotton operatives in Lanchashire. There old and young women are taking snuff daily.

"They tell me that it is beneficial in clearing the air passages from the rising fluff, which is inevitable when they are at work. But it is not only the working girls who follow the practice. We number rich and poor alike among our clients, for we are able to judge their position by the quality of the snuffboxes they buy, some of which display exquisite workmanship."

Announcing the Arrival of our

New Fall Goods

For Women and Girls

We have unpacked our new line of FALL GOODS and it is the biggest and best line of merchandise we have ever shown. You will be surprised when you see these goods at our store—and remember the prices are low for high quality goods.

Miss Mable Waterman, of Belmond was an over Sunday visitor in this city. Mable is teaching at Belmond this year.

Mr. and Mrs. C. F. Keraus left yesterday morning for Dakota. We presume that Charlie heard some stories of big duck shooting there and thought he would investigate.

A large crowd of relatives and friends gathered at the home of Rank Buss Friday evening and helped him celebrate his birthday. A fine time was had by all.

Stripped of Illusion.

"When the millionaire married the chorus girl beauty he told the world it was Cupid's handiwork."

"And now?"

"Judging from the way he talks in court it was a put-up job."—Birmingham Age-Herald.

Good Work of Salvation Army.

The Salvation Army reached 27,703,817 persons through its street meetings last year, a third of whom would never have heard a sermon or a hymn except for the Salvationists.

"Bill' Anderson has resigned his position at the creamery as he went to Ames where he is taking a special course in the art of butter making.

The Quarterly Conference of the English M. E. Church was held Monday morning. District Superintendent Bushnell was here to take part in the meeting.

Mrs. Guard, of Cylinder, Iowa, accompanied by her son, Roland, and wife of Garner, visited at the Rev. Gedye home Sunday. They are old friends of the Gedye's.

Mr. and Mrs. Marion Elder left for their home at Eagle Bend. Minnesota, last Thursday. after visiting with Klemme relatives and friends for ten weeks.

R. A. Jorgenson and family and Mr. and Mrs. J. Jorgenson, drove to Nora Springs Sunday afternoon. The city of Nora Springs is all torn up as they are paving the streets.

Monday was the first time in a great many weeks that Mrs. Elder has been seen "up-town." Her many friends are glad to hear that she is rapidly regaining health.

Walter Lau and family, accompanied by Dr. and Mrs. J. L. Hesselhuus, drove to Nashua, Sunday. The object of the trip was to visit the "Little Brown Church in the Vale."

Mr. and Mrs. Ernest Wellemeyer came Thursday for a few days visit at the Arthur Wellemeyer home. They were on their way to Charles City.

Mrs. Darner came last Thursday for a short visit with her daughter, Mrs. J. L. Hesselhuus. She came from Ames where she had been visiting and was on her way home to Minneapolis.

The funeral of Mr. Jakob Blumer was held at the Reformed Church last Friday afternoon. Burial was made at the Ell Town Cemetery. The obituary is published in this issue on page one.

Mrs. Ruther, of Grand Junction, Iowa, and Mr. Jake Merkel, of Des Moines, returned home Monday after visiting at the Peter Merkel home for a few days. Peter is their brother.

Mr. and Mrs. C. J. Papousek, of Belmond, were here last Thursday and Friday. "Pap" was doing some electrical work and Mrs. Papousk visited at the home of her brother, Ed. Jacobs and wife.

Mrs. Fred Musfelt and her granddaughter, Laura Lanahan, came from Clarion Monday where they had been visiting several weeks at the homes of Mrs. Musfelt's sons. Oscar and George, and her daughter Mrs. Oscar Rice.

Watered Stock.

Jimmie (visiting his uncle in the country)—"Oh, Uncle George, your hired man is not honest. He let the cows drink a whole lot of water just before he milked them."

British Inventors Won.

When airplanes crash they nearly always catch fire. This, the air ministry decided, was due to the nature of their petrol-tanks, which up to now have been made of steel.

Prizes were therefore offered for designs of tanks which would make fires less likely. The competition, open to the world, has been won by British inventors, who took all the three prizes. Now the air ministry believe they have got types of tanks which, will remove the danger of fire whether an airplane falls or whether it is attacked in the air.

The result of this open competition proves that British ingenuity can hold its own with that of any other nation, so long as it gets a fair chance. Two of the prizes went to firms of manufacturers; the third was taken by a retired naval officer living in Surrey, England.

The Salary of M. P.'s.

The salary of an M. P. is £400 (nominally $2,000) a year, on which he has hitherto paid income tax. As an income this is inadequate, but in the days of anti-waste campaigns both ministry and house of commons shrink from increasing it. But the law officers of the crown suddenly discovered that an M. P.'s expenses may legitimately be reckoned against his income, so that the poorer of them will now pay no tax at all. A happy issue, relieving the poor M. P., endearing the government to his grateful heart and throwing no odium on parliament ministry, since it seems that this is the ordinary law and always was, although no one suspected it till a few weeks ago.—New Republic.

Prompt.

"You are strong in your praise of the Brokers and Stokers' Magazine."

"I am."

"Yet they have never printed any of your poetry."

"No, but it doesn't take them two months to decide that my stuff won't do. They get it back to me in the next mail."—Louisville Courier-Journal.

STILLE'S IMPLEMENT NEW

VOLUME 1. Thursday, September 28, 1922 NUM

Another frost, a few more drying days and the corn will be fit to crib. Then it will be a matter of buying gloves and hooks and then of "pulling out" the ears from as early as they can be seen until about dark. Sprained wrists, sore fingers, Oh boy! Can't pick it all alone. Have to hire some help. But the help wants a good price and board too. And when the corn is out the help with the price and board go down the road, of course you've still got the corn but just think if you put that money into a good McCormick-Deering Picker you'd get out of that lame arm and sore finger and when the corn is out you'd still have the corn and the picker too. The next year you wouldn't have to stop to ask it how much a bushel it wanted, it is paid for, its picking for a good number of years. Come in and talk it over.

Mens' clothes are in style as long as they are wearable; womens' clothes are wearable as long as they are in style.

John Larson brought in a tripple box load of oats the other day which weighed-out 116 bushels and 28 lbs. Herman Miller says that it was the biggest load of oats ever brought into Klemme in a regular 36 inch box. Well, anyway, it surely must have been good oats. Mr. Larson does tractor farming.

Albert Schmidt came in the other day to pay us a visit, and while here he looked over our line of machinery. Before he left he bought one of our higher grade wagons and boxes. Albert says he believes it pays to buy the best, and we believe he's right.

Household Hint—A little floor oil put on baby's dress will keep the floors shining. Learn one new thing daily.

Leonard Sampson purchased a new P. & O. Beet Puller from us this week. He got one of the new riding pullers because it gets the beets unbruised and whole. It has many new patented features; operator guides puller by shifting seat; lifting bars are adjustable; chilled re-placeable points; heavy, sturdy steel standard rolling coulters. Three-horse evener and neck-yoke furnished. Frame has ample clearance for foliage. Two levers give easy control. It is easy pulling. and easy controlled machine

We have a few "spud lifters" on hand. They are the kind that lift the spuds out of the ground, shake the ground off of the spuds and then leave a clean row of potatoes on top of the ground ready to pick up.

Elmer and Ralph Ludeke bought one of the 6-ft. elevating type Eureka diggers with vine separa all complete from us this They are making good use of They planted their potatoes Eureka automatic planter, them with a Eureka Cutter.

Better come in and get one little shaker diggers and ge the spuds.

Hogs

A hog needs water just as it needs feed, but the some cheaper than feed yet. hog is just so particular wants watr when he wants it. of farmers are using hog which keep the water above ing.Now that is a great impro ovr the old wooden trough but the one draw-back about fountains was that they work sort of a vacuum feed idea, b hole in the top spoiled the quite occasionally. The other ran across something that j anything we ever saw before. lift the lid off the top and (plenty of room to pour too full just put lid back on. No to monkey with, no overflow ter pulling plugs. No vacuum it should ever leak just take and solder it and set it toge gain. Nothing to get out of Come in and look them over.

THE KLEMME TIMES

enty-seventh Year—Number 4. Klemme, Iowa, Thursday Afternoon, October 5th, 1922. $1.50 In Advance—$2.00 Outside of County

ROOKHART TO MAKE TOUR OF COUNTY SATURDAY

L. BROOKHART TO SPEAK IN COUNTY SATURDAY

Be At Garner In The Afternoon; Britt In The Evening

Y ALSO SPEAK IN KLEMME

Plans To Make A Tour Of The County On Saturday

Col. Smith Brookhart, the Republ- n nominee for United States ator from Iowa, will make a tour Hancock County on Saturday, if ther permitts. He will speak at county seat town in the after- n at 3:00 o'clock, and will also k at Britt in the evening at 8:00 ock.

t is reported that he will arrive Garner Saturday morning from east and will then accompany a ty over the county by auto and l cover several towns in this way. have been unable to learn just at time he will appear in Klemme we presume it will perhaps be metime before his speach at the nty Seat.

Col. Brookhart coming to this nty will be quite an event as no er man in the state at this time ttracting as much attention as he Brookhart did an almost im- sible thing when he won out for ted States Senator with five oth- men in the field, and winning by large vote. Undoubtedly Brook- t will be our next Senator.

t will be well worth your time to r Brookhart Saturday at either rner or Britt as he will give a d long talk at both places. His eches at other places will neces- ily be somewhat brief as his time l be limited in each place.

AYS HE'S A WINNER

ERRING AS GOOD AS ELECTED, SAYS DEMOCRATIC CHIEF

NEW HAMPTON, Oct. 5.—E. J. uling, New Hampton, chairman of e state democratic committee, was Fort Dodge yesterday sizing up e political situation in Webster nty and spreading the gospel that de Herring is going to beat ith Brookhart in the race for ited States senator.

"The senatorship fight isn't going be another Meredith-Harding ht because this year the demo- ts, or at least the great majority them, are going to vote for Mr. rring," declared Mr. Feuling. here are enough republicans who e going to bolt their party to elect rring provided the democrats vote him. And you can put it down in ck and white that the democrats n't going to bolt. Herring will elected."

"This senatorial fight isn't a party oposition. It's a fight between mericanism and socialism. Iowa 't going socialistic. Brookhart can ke all the last minute repudiations the socialist party he wants, but record stands."

NO SAVED FROM DEATH IN FLAMES AT GOODELL

und Asleep In Burning House And Rescued By Fire Fighters

At about 9 o'clock Monday night, rs. Buer living in the south part Goodell noticed flames and smoke ming from the roof of Minton ine's residence, knowing that Mrs. ine and her 6 year old grandson re alone, she at once gave the a- rm. The two were found asleep d nearly overcome with smoke. ey escaped in their night clothes. The chemical fire engine was omptly on the scene and smother- the fire out, saving the main part the building, the kitchen and the rch were burned.

The loss was covered by insurance. r. Cline was out in the country at e time doing chores for a farmer ho is away on a vacation.

JOSTEN-GAUGER

REV. GAUGER AND MISS GRACE JOSTEN MARRIED

Garner Minister And Popular Young Lady Married Thursday

Last Thursday afternoon at four o'clock, at the home of the bride's mother, Mrs. Minnie Josten, at Garner, occurred the marriage of Miss Grace Josten and Rev. A. W. Gauger pastor of Grace Methodist Church of that city. Rev. Schmidt, of Rudd performed the ceremony. Only a few relatives and close friends witnessed the ceremony.

That evening a large number of the members of the church and friends gave a reception in honor of the Bride and Groom at the church at which a large number was present.

The Bride is a daughter of Mrs. Minnie Josten and this highly respected family at one time lived near Klemme, later moving to Garner. Mrs. Gauger is a graduate of the Garner schools, later taking college work at Cornell from which she is a graduate. She taught school for a number of years, and was principal of the Garner High School for a couple of years.

Rev. Gauger is also well known to many of our readers through his church work. He has been pastor of the Garner church for six years, is a fine public speaker and a tireless worker in the interests of his church. He is very popular both with the members of his church and those not connected with that institution and is well liked by all who have come in contact with him.

The Times extends congratulations and best wishes for a happy future.

ARE REAL SWIMMERS

Large Crowd Witnesses Remarkable Swimming Record of Two Young People at Popular Resort.

E. E. Heldridge, of Milford, Dickinson county, says that Miss Muriel Craig, 16 year old daughter of Editor John H. Craig of the Tripp, South Dakota LLedger and Harold Buffett, son of Ernest Buffett, of Omaha,, made a remarkable swimming record Saturday morning, August 26, when they swam across Lake Okoboji at the widest point. The feat has been accomplished by older and more expeienced swimmers but never by anyone so young as these two. The boy is about the same age as the girl and the feat was witnessed by a crowd of spectators and caused quite a sensation tround the lake district.

SHOULD HAVE LIGHT

Horse-Drawn Vehicles Should Have a Light When on Public Highways, Says State Highway Commission

The Iowa highway commission advocates a law requiring lights on a horse-drawn vehicles using the highways at night. The Service Bulletin says that there has never been a sensible reason given why horse-drawn vehicles should not carry lights when so used. Lights should be carried, for the protection of the vehicle and its occupants as well as the driver of the motor car, as there is nothing more difficult to see down the road at night than a slow-moving dust-covered wagon or buggy.

Along Des Moines River for Generation of Electric Power in Webster, Boone and Humboldt Counties.

No less than six dam projects are on foot along the Des Moines river, beginning with the big enterprise to be financed by a bond issue already voted at Oskaloosa for a dam at Harvey in Marion county. The other projects are further up the river in Boone, Webster and Humboldt counties. All are for the generation of electric power.

KILLED IN ACCIDENT

ED. BRENNAN KILLED IN DES MOINES ACCIDENT

His Gravel Truck Was Struck By Great Western Engine; Well Known Here

Ed. Brennan, son of Mr. and Mrs. Jerry Brennan, of Garner, but who formerly lived ea Klemme, was killed in Des Moines last week on Thursday morning at 10:30 when a truck he was driving for a gravel company was struck by a Great Western engine and died almost instantly.

Ed. and a man named Miller were hauling a load of crushed rock to a school house in East Des Moines. According to the story told by Miller they looked up the track both ways when they came to a crossing but saw no train, but just as they got on the crossing Miller saw the ine upon them and yelled to jump, but he must not have understood. Miller jumped just before the engine hit them overturning the truck and rocks on Brennan whose body was underneath the wreckage, his abdomen crushed. He died in a few minutes. Miller claims that the train, consisting of engine and a way car didn't whistle, the crossing bell was not heard and there was no man at the crosing with a stop signal.

The bereaved family have many friends here who extend to them a deep feeling of sympathy.

JUICE FROM GARNER

PLANT AT GARNER TO RUN ON NEW SCHEDULE

Object Is To Give Patrons Better Power And Light Service

This newspaper is in receipt of a letter from Mr. Myron Haskins, the manager of the Garner plant for the Iowa Falls Electric Co., in which he states that the Garner plant has begun to operate evenings to give the people better service. if such a thing is possible. Mr. Haskins also states that the plant will operate on Mondays and Tuesday forenoons to give more current for washing and ironing when so many are using the power service.

BUS COME TO STAY

BUT SHOULD COME UNDER CERTAIN REGULATIONS

A Great Benefit If Properly Handled Otherwise A Menance

CHICAGO, Ill., October 5.—That the motor bus has come to stay but that this means of transportation should be supervised and regulated just as strictly as other public carriers, was the opinion expressed at the annual convention of American Electric Railway association, in session here this week. A special committee composed in part of bus men has been studying the problem for a year and made its report to the ocnvention.

"We firmly believe," the report said, "that all the transportation requirements of any community should be furnished by one agency and that agency should be the electric railway company. It alone has the trained organization and the ripe experience required for handling passenger transportation problems and the development of any other agency for handling these problems would result merely in duplication of service, which could produce only a higher cost of transportation for the public.

"We find that railless transportation has come to be recognized by the electric railway industry as an aid to transportation if properly fostered, and is recognized by regulatory authorities as a menance unless it is properly supervised and controlled and required to pay its just share of taxes and public charges.

"It is recognized that the electric car running on rails is the most essential, reliable and economic method of urban, suburban and interurban travel, considering the transportation problem as a whole and especially for mass transportation. This condition arises largely from the fact that the operating cost per passenger is higher for bus operation than with electric cars."

IS CRADLE OF IOWA

82 YEARS REQUIRED TO COMPLETE BUILDING

Picturesque Old Building Iowa's First Capitol

IOWA CITC, Oct. 5.—Eighty-two years to complete a building! That's the record that joins the halo of memories wreathed about the old capitol. Iowa's first seat of state government and now the administration building of the University of Iowa.

Now the picturesque old building is nearing completion according to the original plans. An appropriation of the state legislature has been directed to the task of not only restoring the ancient building but also of fireproofing it so that this "cradle of Iowa" might be preserved to posterity for all time.

HELP PREVENT FIRES

ALL IOWA OBSERVING FIRE PREVENTION WEEK

Ordinary Precaution Needed; Better Look At Those Flues Now

Ordinary precaution would do away with much of the country's half billion dollar annual fire loss. For the guidance of the public the State Fire Marshall has issued a few simple rules designed to reduce fire hazards in Iowa homes. This is Iowa Fire Prevention Week—Oct. 2 to 9—you can help by observing the rules:

Before starting the fires for the winter, it is important that careful attention be given o the chimneys and flues, for if they are neglected the entire home may be reduced to a few charred embers merely because of such lack of care. During th five years ending 1920, property valued in excess of $12,000,000 was destroyed annually as the result of defective chimneys and flues. The larger part of this loss could have been prevented if an inspection had been made, soot cleaned out, and the necessary repairs made before the fire was built in the fall.

Oils and gasoline take their annual toll of destruction because someone uses them carelessly or ignorantly. Kerosene or gasoline is a dangerous assistant when starting a fire in the stove or furnace. Oily mops or rags often cause fires from spontaneous combustion. They should therefore be always kept in metal containers.

Electric lighting and heating apparatus should be carefully installed and frequently inspected. Electricity alone causes an average of $17,000,000 loss annually during the five year period ending 1920.

Disorder and untidiness breed fires. Careful attention should therefore be given by the householder to he removal of all rubbish from cellars, attics and cupboards.

All open lights in a home should be properly protected. Care should be taken that curtains or other inflammable material cannot blow into the flame of the gas light. Screens should be placed in front of open fireplaces so that no one can accidently get his clothes in contact with he flame.

Lighted matches, cigar or cigarrette butts should be properly disposed of.

Hot water, not fires, should be used to thaw frozen water pipes.

Klemme has been fortunate in not having had any serious fires. But just because we have been lucky so far is no reason why we should become careless in the matter of fire prevention. Get busy and look over your premises and see if there is any accumulated rubbish which should be hauld to the dump, or burned in the yard; perhaps your chimney is not in the best of shape, better take a look as it only takes a few minutes and it may save you many dollars. Examine your stove and furnace pipes, a few new lengths may be needed. Wrap the pipes with asbestos where they run near the wall or ceiling.

HELP PREVENT FIRES!

Bicycle Victim Recovering

HAYFIELD, Oct. 5.—Raymond Stiniker, who was injured last week by falling from a bicycle when theh forks broke and was picked up unconscious, is recovering nicely and will be able to attend school again in a few days. He feels no bad effects from the accident but cannot remember how it happened.

HANCOCK COUNTY PAVING WAS FINISHED TUESDAY

LAST CONCRETE WAS POURED LATE TUESDAR NIGHT

Concrete Paving Now A Continuous Strip Across County

The last batch of concrete has been poured and the Hancock Co. paving is now completed.

Work was finished at a late hour Tuesday night on the last open work west of Duncan. The section west of Hutchins was finished last Friday. The Henkel Construction Co. who have the contract finished the work ahead of schedule time. It will require one month for the concrete to dry sufficiently before allowing any traffic over it.

It is reported quite a number of autoists were on hand Tuesday night to witness the finishing of the concrete pouring on the Pike. Their auto lights materially aided the men in their work on the finish as the whole roadside was illuminated.

The paving just completed by the Henkel Construction Co. is officially designated as Sections A, C, and D. Section B., the section between Britt and Hutchins, and Section E, between Garner and the county line west, was the paving which was completed last year. Sections A, C, and D together comprise 14.51 miles and with the parts in the city limits of Garner and Britt through which the Pike passes makes a total of 15.13 miles of concrete paving finished up n Hancock County this year.

According to reliable reports the next big stretch of paving will be laid between Klemme and Garner next year. The grading has been practically completed.

HENRY LAU IS DEAD

OLD BUSINESS MAN OF KLEMME PASSED AWAY MONDAY

Had Been In Business Here For The Past Twenty-five Years

This community was greatly shocked when the news had spread about that Henry Lau, Sr., had passed away at his home here at 2:30 o'clock Monday morning. His death was attributed to pleural-pneumonia. He had been confined to the house but a few days but he has been in ill health for the past year or more and in his weakened condition he was unable to stand this last illness.

Mr. Lau has been in business for a great number of years, for twenty-five years or more he has been actively engaged in business in Klemme.

In our next issue of the Times we will have a complete sketch of his life.

The bereaved family have the sympathy of the entire community in their sad loss of a husband and a father, who also will be greatly missed by the many friends who knew him.

PEAT BOG ON FIRE

BLAZE IN PEAT BOG AT HAYFIELD ENDANGERS FARMS

One Fire Fighter Burned When He Steps Into Hole Of Burning Peat

The fire in the peat beds about four miles southwest of Hayfield, which have been burning for more or less the past three months, broke out in a dangerous blaze last week on account of the high winds adn dry weather, and several gangs of men were fighting the fire to keep buildings and haystacks from catching on fir.

Three hay stacks on the C. C. Geddes farm were burned and G. P. Harper had to haul his hay to the barnyard to save it. The large set of buildings of the E. J. Newman farm were reported as being in danger Friday, but faithful work of the fire fighters kept the flames from spreading. The fire burned across plowing and fire guards by burning in the peat and then getting a start in stubble and corn fields.

Peter Trosoff, a beet worker on the Peter Green farm, was badly burned while plowing a fire guard. He fell into a hole where the peat was burned to a depth of several feet and before he could be rescued had his arm badly burned.

Saturday's rain hlped get the fire under control, but as the fire has covered an area of about 200 acres, it is difficult to keep it from spreading.

NEGRO FRIEND DEAD

"Uncle" Asa Turner Recently Died at His Home in Maxwell. A Great Friend of the Negro.

"Uncle" Asa Turner, known to farmers in every part of Iowa because of his prominence in the better corn movement inaugurated when P. G. Holden was at Iowa State College has just died at his Maxwell, Story county, home at the age of 80 years. His father was the Asa Turner who established Denmark Academy, in Lee county, the first institution for higher education west of the Mississippi river and north of St. Louis, and he helped to found Grinnell college. Asa 2nd was born in Lee county in 1842. When the Civil war broke out, he enlisted as a lad of 19 and saw his first service at Shiloh. He was captured held in a southern prison and then exchanged to reenter the service to become an officer in a regiment of freed slaves with whom he saw notable service. "Uncle" Asa came to have a regard for the negro that made him his life time friend. This friendship expressed itself in recent years in his support of various negro schools, notably Piney Woods Institute, established in Mississippi by an Iowa negro, Lawrence C. Jones.

A TOPIC FOR DEBATE

Wall Lake, in Wright County, is the Object of Much Discussion Between State and Lease Holders.

The effort being made by the state onservation comuission to oust a bunch of Waterloo sportsmen from the shores of Wall Lake in Wright ounty where they had taken leases for land that prevented the public from having access to the lake, took n new interest when the leaseholders went before the state executive council and protested the action f the council in making a state park at this lake and to object to the amount paid for the land by the state These leaseholders have already filed an appeal from the price fixed by the condemnation committee in the courts of Wright county.

WILL RAIZE CAMP

Last of Buildings at Camp Dodge Will Be Sold Next Week. $8,000,000 Equipment Will be but a Memory

The last of the Camp Dodge buildings is to be sold Monday, October 9, at 10 a. m. at auction at Camp Dodge. The sale is held by the authority of Governor Kendall and Adjutant General Lasher. Three hundred fifty buildings will be sold, as well as steam boilers, large and small, hot water tanks and ranges. These are the buildings that were secured from the government in a recent purchase but are on land owned by the state. The plan is to get money enough out of the salvage to erect permanent buildings for the National Guard. With the wrecking of these buildings the last vestige of the famous camp will have been removed and Camp Dodge that received a couple of hundred thousand soldiers during the world war and which represented an outlay by the government of $8,000,000 will be only a memory, but there are thousands of men who were in the service who will treasure recollections of the great camp as long as life shall last.

Something to Think About

By F. A. WALKER

FROM THE SHADOWS

THE man or woman who smiles upon us from the lowly cottage door, ever ready to offer a helping hand to the unfortunate and to give cheerful encouragement to the weary, has, through tenderness and love, found the way to a sunshine that grows brighter and brighter until the end of life.

The dismal panorama of dark clouds has drifted away from the sky and nothing remains but the crystal depths of benevolent blue.

Despair has yielded to confidence, but not without first marking its exit with sorrows and tears, and perhaps also ragged dishonor, thus fitting the soul for the comforting change.

Erring, thoughtless, selfish, untrue, and living in the valleys of darkness while the beauties of Nature were striving for mastery, the shadowed soul found it difficult to rise to the glorious heights where the atmosphere was sweet and pure.

If, when you are in the shadows, you expect an angel from heaven to come to earth and lead you away to a blissful elysium, you will find that you are still living among shadowy delusions.

To break away from the sombrous shade lurking everywhere about us is extremely difficult, but with a heart filled with a struggling radiancy of faith, sustained by qualities which only faith can give us, we can do it, and reach the state of tranquil content which comes quietly to the earnest and sincere, like the sunshine of morning after a night of storm.

We may clap our hands to the heights but we cannot reach them except by our own unceasing endeavor.

We must expect tired, bruised feet, we must anticipate slips and falls and a sickening sense of our own infirmities, but we must keep climbing—keep holding fast all the while to the hand of shining-eyed Faith, who, in spite of our unworthiness, will lead us hour by hour to higher ground.

There are many ways in which we may help ourselves, but not until our hearts have been properly attuned to the dominant key and kept in tune.

Hard work, high thinking and a charitable attitude towards others will be found helpful attendants, for without their first aids no man or woman however accomplished or exalted, can hope to emerge from the shadows and write an acceptable record of a well-spent life.

Kiddies Six

By Will M. Maupin

SMILE AND HUSTLE

WHEN your plans go all awry,
Smile and hustle.
Not a bit of use to cry.
Smile and hustle.
Waste of time to fret and scold;
Brace, and get another hold;
Meet the future brave and bold—
Smile and hustle.

Some big scheme wound up in wreck?
Smile and hustle.
Bad luck smite you in the neck?
Smile and hustle.
Be a man among big men,
Grab a hold and try again,
Spit upon your hands, and then
Smile and hustle.

When a brave man hits the bumps—
Smile and hustle.
Then is when he up and humps,
Smile and hustle.
Waste of time to weep and wail,
Just forget that small word "fail."
Don't moon 'round till you go stale—
Smile and hustle.

Everybody has bad luck.
Smile and hustle.
That's the time to show your pluck.
Smile and hustle.
Say, "Hard luck, good-by to you,"
Start off on a tack that's new,
Keep straight on with purpose true,
Smile and hustle.

Uncommon Sense

By JOHN BLAKE

HONESTY

A TEN-DOLLAR bill is either good or bad. A man is either honest or dishonest.

If he is honest he will not cheat or steal, or take undue advantage of another man, under any circumstances.

If he is dishonest, his cheating and stealing will be limited only by his opportunity or his timidity.

The difference between big thieves and little crooks is sometimes a difference of opportunity—more often a difference of courage.

The little thief doesn't steal continually because he is afraid to. The big thief has less timidity—or less imagination, and steals whenever he has a chance.

But one is just as dishonest as the other. And often the little fellow is the worse, for he adds cowardice to his crookedness.

A full-grown man or woman, trained in life who does a dishonest action, will do another under the same circumstances.

A boy or girl, lacking this training will sometimes become straight with the growth of intelligence.

For the ancient adage about honesty being the best policy is so apparent to common sense that even people who are mentally crooked often turn honest and remain honest, merely because more profit can be had in that manner of life.

It is well to apply the honesty test to yourself, and change your method if you find that under certain circumstances you would take advantage of a fellow creature—legally or illegally.

It is well to drop friends that you catch cheating at cards or at golf, or in business. For the cheat is a particularly despicable form of crook, and deserves no friends whatever.

Never think that a man or a woman is a little dishonest, or dishonest about some things and honest about others.

They are 100 per cent honest or not honest at all. They are honest in everything or honest in nothing.

If they are honest, as we believe most people are, they are worthy to be trusted. If they are dishonest, knowing what dishonesty means, the wider berth you give them the better it will be for you.

(© by John Blake.)

SCHOOL DAYS

The Friendly Path

By WALTER I. ROBINSON

SIN AND CITIES

DON'T blame sin on the cities.

No community is ever better than the people within it. If the people are honest, God-fearing, law-abiding and live up to the teachings of their churches, regardless of denomination, they'll find little cause for complaint no matter where they live. But when they know what is right and don't do it or don't insist on others following the best pathway, they are likely to be disgruntled with conditions which they bring upon themselves.

We know a great deal about most of the big cities, but we know just as much of the small towns and open country, and proportionately, we believe, there is no difference in the volume of wrong-doing. And we confidently believe that if people hailing from the small towns and country would be as devout to the cause of right as they claim to be when they come into large communities, the blotches on cities' reputations would be much fewer than they are.

It is true that there are many more amusements and inducements in big towns which are likely to divert newcomers' attention from church work and home life. But none of these will lead people from the proper pathway unless they are willing to be led. Even commercialized amusements on the Sabbath will have no harmful effects on those who know they are wrong, if they wish conscientiously to follow the safe pathway.

Remove from every big city the sinners who rush in from small places for hiding and the police and uplift workers would find little work necessary in order to preserve the standards of morality and honesty which are so greatly to be desired.

Able ministers, fine churches, educational opportunities, science, invention and commercial and industrial progress of the cities are the kind of inspirations which should make the world in general more happy, comfortable and thankful to God.

Mother's Cook Book

The warm raindrops aslant the sun
And in the rain the robins sing;
Across the creek in twos and troops,
The hawkling swifts and swallows wing.

WHAT TO EAT

DISHES for luncheon that are not too filling will be found in the following:

Ham and Noodles.

Butter an earthen baking dish, put into the bottom a layer of cooked noodles, add a layer of cold boiled ham cut into small bits, then another layer of noodles. Repeat until the dish is full. Beat one egg, add one cupful of milk and pour into the dish. Cover with crumbs, dot with butter and bake in a moderate oven.

Baked Sausages With Rice.

Cut pork sausages into thin slices. Butter a baking dish and fill with cold boiled rice. Moisten the rice with water in which beef extract has been dissolved. Spread the sliced sausages over the rice and bake in a hot oven until the slices are crisp.

Graham Gems.

Take one cupful each of sour milk and graham flour, one-half teaspoonful of soda, a little salt, one egg, well beaten, two tablespoonfuls of sugar and three of shortening. Bake in well-greased gem pans.

Baked Eggs With Cheese.

Make toast of rounds of bread which have been cut nearly through with a smaller cutter and the center thus made hollowed out. Mix grated cheese with cream and spread over the toast. Arrange on a platter, break an egg in each depression, sprinkle with seasonings and cheese, dot with butter and set into the oven in a dripping pan of hot water. Bake until the eggs are set.

Pretty Things that are made at Home

IT IS getting to the place where every ambitious young woman aspires to an assortment of sweaters, and often she knits them for herself. This ability to make them puts the expensive, handmade garment within the reach of even a very limited dress allowance, besides making the exercise of individual taste possible, in colors and other things. The sweater gets smarter all the time—the element of style grows more and more important in it.

Vestees and collars, to be worn with sweaters or coats, are among the dainty accessories that women make for themselves, elaborating them with handwork. They add just the right note to the sweater and skirt costume and make a separate waist unnecessary. Two collar and vestee sets, as pictured, worn with sweaters and skirts contribute so much of attractiveness that they are real necessities—the good points of the sweater are emphasized by them.

A straight band of net is the foundation of both the collars, but in the set at the left it is rounded at the ends. Three frills of fluted val lace form its decoration. A panel of tucked net down the center of the vestee is bordered by frills of val lace and a very full frill edges the top.

Straight lines and square corners make the set at the right a simple matter to handle. Net, lace and embroidered swiss insertion are set together in strips for the vestee, the net strips covered with frills of val edging. There is a plain fold of net at the top and the collar is plain net, edged with frills of val.

That early rumor, that the silhouette would expand and the waistline move upward this fall, is less than a whisper now, for the displays do not bear it out. All the lovely frocks for afternoon and evening show that women are still devoted to long lines and slimness and that they insist on wearing soft fabrics that fall into graceful draperies. What they are looking for is apparel that glorifies the human form divine by clothing it with supple draperies that fall and float and betray its grace and beauty. Their mood will have to change before the fashions will. Long and trailing sashes and panels—sleeves that are merely floating drapery, veils and long earrings are the mode because they suit the mood of their wearers.

There is every reason to be satisfied with things as they are in the world of fashion, for women have every opportunity to be beautifully as well as fashionably dressed this season. The styles are lovely and are also refined—a consummation devoutly to be wished. After so much "jazzing" in the near past it is refreshing to study the new things. Among them appears the delightful afternoon costume, shown herewith—made of heavy brown crepe. It is a simple affair with bodice bloused at the low waistline and wide-draped sleeves ending in points and confined at the wrist. The popular trimming of loose straps has been ingeniously managed on it, falling free from neck to girdle and caught up in tiers about the skirt. The skirt is ankle length but the straps in the lowest tier fall to the instep.

The girdle of self-material is embroidered with graduated, overlapping disks, made of little knots, set close together, in colors. The small hat is a Napoleon shape of hatters' plush with rosettes of metallic leaves at the sides. It is trimmed with a long, fine lace veil which falls over it to the tip of the nose at the front and to the shoulder-blades at the back.

Delightful Afternoon Costume.

COPYRIGHT BY WESTERN NEWSPAPER UNION.

Nice Hair Ornament.

A pretty barrette for the little maid with either bobbed hair or a demure braid is of tortoise shell shaped like flowers.

Tweeds for Autumn.

Dark tweeds are promised great popularity for fall. Imported plaids and checks, too, are being made into very snappy suits and coats.

Adrift With Humo

MIGHT PREFER OTHER PLA

"Do you suppose jazz musicians go to heaven?"

"Maybe so," replied Mr. Grum. "According to the modern idea, everybody is going to heaven, won't present my credentials to Peter until I find out whether they'll have to check their horns at the gate."

Hard Labor.

"Well," said the shoe dru "what's going on in Chiggersvill day?"

"Heard about Zeke Dawle?" Squire Witherbee.

"No. Has he gone to work?"

"Yes. Quite a number of our zens were on hand to see him acc position. In fact, the courtroom crowded."

Poor Chance for Him.

He—What would your father I told him I wanted to marry yo

She—He'd refer the matter to

He (hopefully)—And what you do?

She—I'd refer the matter to Smart, who proposed to me and accepted while you were tryin make up your mind.

INEXPERIENCED

"What kind of coal do you w mum?"

"Dear me, I am so inexperienc in these things. Are there vari kinds?"

"Oh yes. We have egg coal, che nut ——"

"I think I'll take egg coal. have eggs oftener than we ha chestnuts."

Swat!

The skeeters sing on airy wing
As they linger hungrily by,
But oft their song, like that of the s
Is the last before they die.

Specimens of Magnificence.

Teacher—The word "grand" is u in the sense of "splendid, sublim noble," and the like. Can you give example of such use?

Little Bobby—Yes'm. Grand du and grand larceny.—Judge.

Willie's Suggestion.

"Ma, can't I give baby a bite of apple?"

"He has no teeth to bite with dear."

"Can I get him yours, ma? They on the bureau."

When He Gets It.

"Does your wife ever let you dri her car?"

"Oh, yes. She is always most anxi to have me take it whenever it nee gasoline and oil."

Speeding Up Production.

Alice—Why do you go shoppi when you haven't any money?

Virginia—Oh, I get through much quicker.

Question Mark.

"Last week he sent me candy, s ing sweets to the sweet."

"A pretty sentiment. What of it?"

"But now he sends me an ivory h brush."

FORCED TO IT

Mr. Thurston: Old Guzzle's been drinking like a fish ever since the country went dry.

Mr. Wetmore: Put me next. Where does he get it?

Mr. Thurston: From the same source where the fish gets his drink.

Hoping.

If I survive to ninety-three,
Or even ninety-seven,
I'll live in hope that there will be
No saxophones in heaven.

A Bit Previous.

First Prisoner—Well, pardner, wha are you in for?

Second Ditto—Found some jewelry

F. P.—Why, they wouldn't send you up for that, would they?

S. D.—Found it before the owner lost it.

Keen Housekeeping.

"Y'see, on Sundays we rise late. Then we don't need much breakfast because it is so near lunch time and we don't need any lunch because we've just had breakfast."

H. V. Reed,
J. C. Ford, Commissioners.
A. J. Lilly, Engineer.

Owners of the above described lands, Drainage District No. 21 of Hancock County, Iowa, and to all actual occupants, and to all persons having or claiming any right, title, or interest in and to the above described lands.

You and each of you are hereby notified that the Commissioners appointed by the Board of Supervisors of Hancock County, Iowa, to inspect and classify the lands benefitted by the location of Hancock County Drainage District No. 21 of Hancock County, Iowa, in tracts of forty acres or less, in a graduated scale of benefits, to be numbered according to the benefits to be received by the proposed improvement, and to make an equitable apportionment of the costs, cost of construction, expenses, fees, and damages assessed for the construction of said improvement, did on the 21st day of September, 1922, make their report to the Board of Supervisors of Hancock County, Iowa.

That the real estate owned or occupied by you and each of you, and situated within Drainage District No. 21 of Hancock County, Iowa, a description of which is set opposite the name of the owner thereof in the foregoing schedule, has been classified by said commissioners, that the amount of special assessment apportioned to you and each of you by said commissioners is hereby set opposite the description of each tract of land on which assessment is made.

That said report will come up for hearing before the Board of Supervisors of Hancock County, Iowa, on the 15th day of November A. D. 1922, at 1:00 o'clock P. M., at the Court House at Garner, Iowa, that all objections to said report must be made in writing and filed with the County Auditor of Hancock County, Iowa, prior to the day of hearing, all objections not filed prior to the day of hearing should be filed with the Board of Supervisors at the place where the hearing is to be held.

Dated this 26th day of September, A. D. 1922.

CHRIS JACOBS, COUNTY AUDITOR,
(SEAL) HANCOCK COUNTY, IOWA.

FACTS WORTH KNOWING

Great Britain and Ireland consume 30,000,000 rabbits as food annually.

To blow two soap bubbles at once, one within the other, is the purpose of a recently patented pipe.

The Pennsylvania railroad states that shippers could save $2,000,000 a year by more carefully packing freight.

Japanese copper mines yielded 111,562 tons of ore last year, an increase of nearly 30,000 tons from the preceding year.

Apparatus has been invented for accurately testing the hardness of metals by showing their resistance to the teeth of files.

English chemists have made a synthetic turpentine at what is said to be one-third the cost of the genuine American article.

Eighty thousand women are serving with the Red Cross ambulances and hospitals in France, Algeria, Morocco and in the Orient.

A Japanese is the inventor of a street sprinkler that distributes water so as to form advertisements on smooth pavements.

Clad only in nightgown and overshoes and chasing a coyote carrying a pair of fat hens in its mouth for a distance of half a mile in zero weather was the stunt of Ernest Barnes, a farmer near Smith Center, Kan.

Henry B. Pierce, an English shipowner, who started life in humble circumstances as a laborer in the harbor works at Messina and afterwards became one of the leading shipowners in Italy, has just died at his home near Naples, leaving a fortune of $20,000,000. At the great Messina earthquake nine years ago all the other members of his family were killed.

The Klemme Meat Market

Ask Him "How"?

Ask any man of wealth how he acquired his money, and his answer, ninety-nine times out of a hundred, will be something like this:

"I learned early in life to spend less than I earned. Systematically I set aside a part of every pay-check and put it into an interest-earning savings account. When the 'Big Opportunity' came my way I was in position, financially, to grasp it."

Barring unusual and unforeseen contingencies, every man can save part of his regular income if he has definitely made up his mind to do so.

HELPS FIGHT OFF LONELINESS

Radio Is Proving a Valuable Aid to Those Engaged in the Lighthouse Service.

Hundreds of thousands of dollars are saved annually by the lighthouse service merely through the installation of radio sets on the lighthouse tenders, declares the Washington Star. Aside from the direct money saving to the government, the crews of these vessels, which cruise thousands of miles in all parts of the navigable waters of the country and its possessions, are made more contented and shipping is made safer. Lighthouses in lonesome sections also are being equipped, both for the closer contact which it permits and also for the lifting of the lonesome air around many of the stations, some of which are visited only once every ten months or so.

But the radio has stopped all this and has increased the efficiency of the service many fold. For example, a report may come into a lighthouse office that a buoy has been damaged by a passing vessel and the light is out. Formerly a tender working in the general vicinity might have no knowledge of this, and return several hundred miles to headquarters and have to be immediately sent back to repair the damage. Now, under the new system, with an order by radio the tender may be quickly sent to the trouble.

The Department of Commerce has recently authorized several of these tenders to make the small additions to their radio equipment which will enable the crews to receive the radio broadcasting services. As there is only one radio operator on a tender, this permits others of the crew to pick up calls when the operator is off duty and it also will familiarize the officers and men with the use of radio apparatus, all to the benefit of the government, as radio is of constantly increasing importance in the lighthouse service work. An incidental but quite important effect of this recent enlargement of the radio equipment on these vessels will be the advantage in furnishing instruction and entertainment to the crews, as the vessels are often out of touch with the world for days at a time.

Although the government endeavors to give every reasonable consideration to the men on the remote stations and vessels, the conditions are sometimes necessarily difficult, as these instances show. The keepers of the Alaska lighthouses at the entrance to Bering sea remain three years on the stations, getting leave only each fourth year. They have been without mail for ten months at a time. The experiment now is being tried of installing radio telephones at these stations. At Tillamook Rock light, south of the mouth of the Columbia river, there have been intervals of seven weeks when the tender was unable to reach the rock on account of stormy weather. Landing is made on this rock only by means of a crate swung out over the boat from a long boom. On the offshore light vessels, supplies are generally received only once a month.

Two Martyrs to Fashion.

Women up to thirty-five years old come in to have their hair bobbed, our barber tells us. The other day, says Capper's Weekly, he had father, mother and daughter in the chairs at the same time, and all were getting bobbed except father, who came in for a trim and hair tonic. The same day one woman customer asked the barber to save the hair he cut from her head. Then she went away and forgot it and the barber threw it away. Meanwhile another woman customer came in who also wished her shorn locks saved. The barber tied them up in a paper and placed them on the show case at about the same moment the small brother of the first woman whose hair had been thrown away arrived on a bicycle to get it for her. The boy grabbed the package and departed before any one could stop or catch him and two women who wanted their hair saved are disappointed. Two more martyrs to style.

Profiteering by a Doctor.

A medical man in Nagykoros, near Budapest, recently charged 5,000 crowns (present value £2, but purchasing value in a village about £6) for a single visit to a patient who lived not far from the doctor's residence. This patient sued the doctor for "profiteering," but the court dismissed the case. The plaintiff appealed, however, to a higher court, which gave judgment against the doctor, on the ground that the demanding of an exorbitant fee for professional services was to be regarded as profiteering, and was therefore illegal. It was decided that mental workers could fairly be considered as profiteers in such cases; no exception could be made concerning doctors, for although the latter did not technically receive "wages," their services came within the accepted meaning of "work."

Nothing Easier.

Mr. and Mrs. Jimton, a young couple recently married, were beginning their housekeeping and were doing the work of putting the rooms in order themselves.

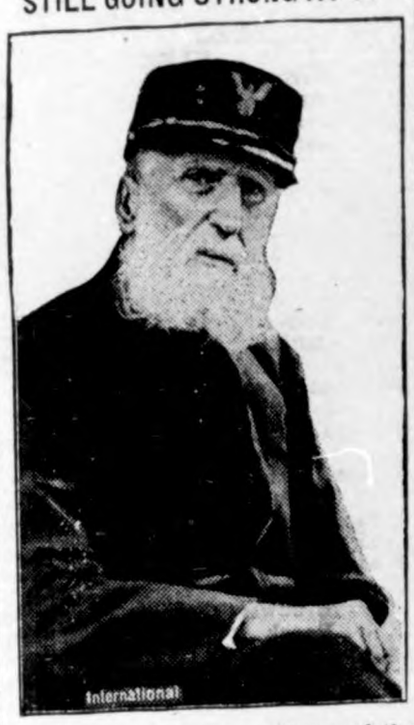
Mr. Jimton was having some trouble in hanging one of the presents, a fine clock, upon the wall of the dining room.

"Why is it taking you so long, dear," asked the young wife, "to put up that clock?"

"I can't get it plumb," he replied.

"Then why don't you send for the plumber?" she asked in perfect sincerity.

STILL GOING STRONG AT 97



Gen. Nelson Monroe, veteran of the Mexican and Civil wars, who at ninety-seven years of age is still active. He lives in Arlington, a suburb of Boston, and only recently made application for renewal of his license as an insurance broker.

First Shave by Barber.

Media, Pa.—Taylor Neal of Middletown township was shaved for the first time in his life the other day by a barber. He is seventy-three years old and since a young man performed the task himself.

Pulled Automobile Off Battling Goat's Horn

In his shining new automobile, E. A. Weathers of San Diego, Cal., drove deep into the foothills and parked in a quiet lane. A goat stalked near and gazed inquiringly at his reflection, distorted by the curved body. A bleat brought no response. Then he lowered his curled horns and charged. Weathers pulled the machine off one of the goat's horns and the animal strolled away. Repairs to the car cost $50.

Counterfeit Postage Stamps.

A feature of the present prevalence of crime is the counterfeiting of contemporary postage stamps on an extensive scale. Not long ago the Argentine republic was compelled to change the design of its 5 centavos stamps through this cause. Now the news comes from Peking that the discovery of dangerous imitations of the current 7, 10 and 15-cent stamps of China has necessitated their withdrawal from circulation.

School Board of Manchester Has Taken Matter to Supreme Court For Settlement.

A couple of years ago Miss Ruth C. Dudley signed a contract with the school board at Manchester to render services as a teacher for the stipulated wage. A higher salary was available at Fernald, Story county, so she "jumped" the contract and accepted the better job. The Manchester school board brought suit to enforce a forfeiture clause in the contract stipulating that in case she did not carry out her part of the obligation she would pay the district $200. Superintendent J. S. Hilliard, a witness in the case in the district court, stated that the forfeiture clause in the contract was not to be taken seriously and was never intended to be enforced. The judge took this view of the matter and found for the school teacher. The school board has appealed the case to the supreme court. Its contention is that the forfeiture clause in the contract means just what it says.

Judge Courtright Declares That Hooch Vendors Are in This Class. Given Indeterminate Sentence.

In the superior court of Waterloo Judge O. B. Courtright declared hooch vendors "deliberate murderers" when he sentenced two of their victims to indeterminate sentence for intoxication. He will release the men when they tell who the potential murderers were.

Adrift With Humor

MIGHT PREFER OTHER PLA

"Do you suppose jazz musicians go to heaven?"

"Maybe so," replied Mr. Grumm. "According to the modern idea, everybody is going to heaven, but I won't present my credentials to Peter until I find out whether or they'll have to check their horns at the gate."

Hard Labor.

"Well," said the shoe drummer, "what's going on in Chiggersville today?"

"Heard about Zeke Dawley?" asked Squire Witherbee.

"No. Has he gone to work?"

"Yes. Quite a number of our citizens were on hand to see him accept position. In fact, the courtroom was crowded."

Poor Chance for Him.

He—What would your father do if I kissed you?

Reproduction of medallion to be given to every employee of the Rock Island Lines on the occasion of its Seventieth Anniversary

"Seventy Years of Service"

The unknown and sparsely settled West is now the Nation's bread-basket. Trackless plains and rolling prairies have become fertile farms; struggling villages have become thriving cities of wealth and beauty.

And the railroads made all this possible in the threescore and ten years allotted as the life of man.

We celebrate, in our Seventieth Anniversary, the part the Rock Island Lines have played in this transformation.

During our "Seventy Years of Service" we have grown to a system of 8,122 miles, serving fourteen states.

We extend grateful thanks for the co-operation which has made this possible.

Our mutuality of interest is inseparable. We are eager to merit your confidence and respect.

As we face the future we seek your co-operation and support to the end that we may serve you efficiently and satisfactorily and reap in equitable proportion the prosperity which will result from mutual understanding and reasonable consideration of each other's problems.

School News

KLEMME SCHOOL NEWS OF THE PAST WEEK

Good Music—Last Friday morning held a surprise for the Grammar and High School rooms. Elvira Stille and Florence Behringer played a very pretty duet. We all enjoyed it and hope the players will again give us another surprise. Music is to our ears like the light to a blind man; for we hear it as seldom as the blind see the sunshiney world around them.

Singing Stopped—Did you miss the wonderful singing Monday morning? You were glad we didn't sing! Well, you know very well that practice makes perfect; how can we become perfect if you don't want to hear us practice? Well, you can thank the teachers for the relief.

No Ball Game—Last Friday afternoon we were surprised and sorry when Prof. Neese said we'd better not go to Meservey to play ball. We were not only sorry because we couldn't play ball but were sorry to know that some of the players were on the sick list.

The six week's tests will be held all over the school next week.

Books and Magazines—We were happy when Prof. Neese told us the school board was letting us have six magazines and a daily paper. This is a fine idea for expanding the minds of the pupils to read of the outside world.

Prisoners in Allamakee County Must Do Manual Labor While Serving Their Sentence

Judge Taylor and the board of supervisors of Allamakee county, have jointly agreed that hereafter all persons sentenced to jail must be put to work. O. S. Bailey, of Waukon, says that when the new plan was put up to the prisoners, three in number, by the judge, two of them were emphatic in their assertions that they would not work and were informed it would not only be the pleasure but the absolute duty of the county sheriff to see that they had only bread and water diet so long as they refused to labor. Shortly after this ruling Nick Reed was released from jail upon payment of his fine of $350 for bootlegging. The amount was furnished by his father. This leaves but two occupants. The board has ordered these men to be put at work on city and county work, remaining under guard and to be locked in their cells each night instead of having the freedom of the corridors as before. The judge takes the attitude that their incarceration is imposed as a punishment and that hard labor is in line with the intent of the law.

Farmer Near Juanita Who Treated His Seed With Formaldehyde Solution Has Gratifying Results.

Northern Iowa is counting on a record-breaking crop of potatoes this season. S. M. Stouffer of Sac City says that Fred A. Martin, on his farm near Juanita, has raised this year nearly 4,000 bushels, the yield amounting to approximately 200 bushels per acre. Unlike most potato crops this year Mr. Martin's crop is wholly free from rust. He achieved this simply by treating his seed with formaldehyde. It took only one day and cost less than $8 to dip the entire 200 bushels of seed in a solution of one pound of formaldehyde to thirty gallons of water. The solution was heated to a temperature of 120 degrees. The potatoes have grown under ideal weather conditions in a peat soil. Mr. Martin expected that his seed would yield about 2,000 bushels and experienced a gratifying surprise when he found that it would be nearly twice that.

Col. Brown, Now in Charge at Fort Des Moines Will Retire January 1st After 41 Years Service.

A battalion of the Ninth field artillery, consisting of an officer and ninety-one men and full equipment, arrived at Fort Des Moines where it will be stationed under orders from the war department. The move was in accordance with the new program of the government to move troops from camps to permanent posts and to eliminate temporary posts. Col. R. A. Brown, who has served forty-one years in the regular army, will retire from active service Jan. 1, and will take a leave of absence in October from his command at Fort Des Moines.

STATEMENT OF THE OWNERSHIP

Management, Circulation, Etc., required by the Act of Congress of August 24, 1912. Of The Klemme Times published weekly at Klemme, Iowa, for October 1, 1922.

State of Iowa, County of Hancock, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared M. J. Jorgenson, who, having been duly sworn according to law, deposes and says that he is the Business Manager of hte Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, etc.

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, R. A. Jorgenson, Klemme, Iowa.

Editor, R. A. Jorgenson, Klemme, Iowa.

Managing Editor, R. A. Jorgenson, Klemme, Iowa.

Business Manager, M. J. Jorgenson, Klemme, Iowa.

2. That the owner is: R. A. Jorgenson, Klemme, Iowa.

3. That the known bond holders are: None.

M. J. Jorgenson, Bus. Mgr.

Sworn to and subscribed before me this 2nd day of Oct. 1922.

(SEAL) F. J. Wenck.

(My commission expires July 4, 1924.)

JOHN D. ENIGMA TO NEIGHBORS

Richest Man Rarely Seen in Tarrytown and is Guarded From All Questioners.

GIVES CAMERAMEN A CHANCE

Recently He Let Photographers Shoot Him to Heart's Content, but Reporters Still Are Barred—Stories About Dimes.

Tarrytown, N. Y.—Is John D. Rockefeller, passing the Indian summer of his life on his vast estate in the Pocantico hills, at last letting down the barriers he has always raised against photographers and reporters?

This is a question which has been interesting the newspaper profession ever since the world's richest man, on a recent Sunday, permitted camera men to snap him to their heart's content after they had consented to follow him into church for service.

Mr. Rockefeller, who bears the reputation of being one of the most camera-shy men in America, may be becoming more lenient in his attitude toward photographers, but as yet he has given no indication of taking reporters into his confidence.

An effort to interview Mr. Rockefeller on the recent occasion of his eighty-fourth birthday anniversary—made, as usual, through a third party representing the household—brought the response "Impossible." As no reporters as yet have succeeded in storming the well-guarded gates of the Rockefeller home, the modern Croesus goes uninterviewed.

Enigma to Fellow Townsmen.

Even to his townsmen the little man, slight of frame, who appears in mid-summer in leather waistcoat, overcoat and muffler, is very much of an enigma.

Tarrytown points out to each visitor the home of John D. Rockefeller, urges the visitor to go up and see where Rockefeller lives, talks constantly about Rockefeller—but rarely sees him itself.

Very seldom do Tarrytowners get inside the gates which guard the big home back in the hills. Once in a while they see John D. come downtown and sit in his machine while a chauffeur goes into a bank or a store—but Tarrytown almost never talks to its richest citizen. He comes and goes—there is excitement while he is downtown, and discussion afterward. And that is all of Tarrytown's claim on its most famous citizen.

Ever since the oil king celebrated his eigth-fourth anniversary Tarrytown has been seething over the question of who is its oldest citizen. There is no question as to the most famous.

An ancient who sits in front of the big hardware store just around the corner from the station concedes first place to John D. The ancient admits he is only eighty-three. But an Italian has asserted his grandfather is eighty-eight, and there is a farmer who lays claim to ninety. Still, even in the face of odds Tarrytown stands loyally behind its prominent citizen and announces to the world that its oldest citizen today is none other than the man who made oil famous.

But the town maintains that Mr. Rockefeller is still a youngster in spirit.

"Any man who plays golf as frequently as he does," began one citizen, when he was interrupted with a question as to whether John D's. private links were regular size.

"Certainly, but John D. goes around slowly," replied the citizen, but another Tarrytowner broke in with a denial.

"It is not. It is only about four holes of a normal course. And John D. takes three hours to make two of 'em."

Last but not least, in Tarrytown's viewpoint toward its leading citizen is the tradition of the dimes, the day of days for the boys and girls. Spasmodically John D. Rockefeller gives 10-cent pieces away to children. How did it start?

Stories About Dimes.

Three stories are current:

Number 1—Three boys, many years ago, walked up the hill, climbed the stone wall, went up to the porch and saw Mr. Rockefeller. They asked him for a dime apiece—and got it. Since then, it is said, the oil magnate has held his yearly party.

Number 2—A boy was standing downtown when the Rockefeller machine drove up. A package dropped out. The boy picked it up and handed it to Mr. Rockefeller personally. The boy got a dime and John D. Rockefeller got an inspiration which he has followed ever since.

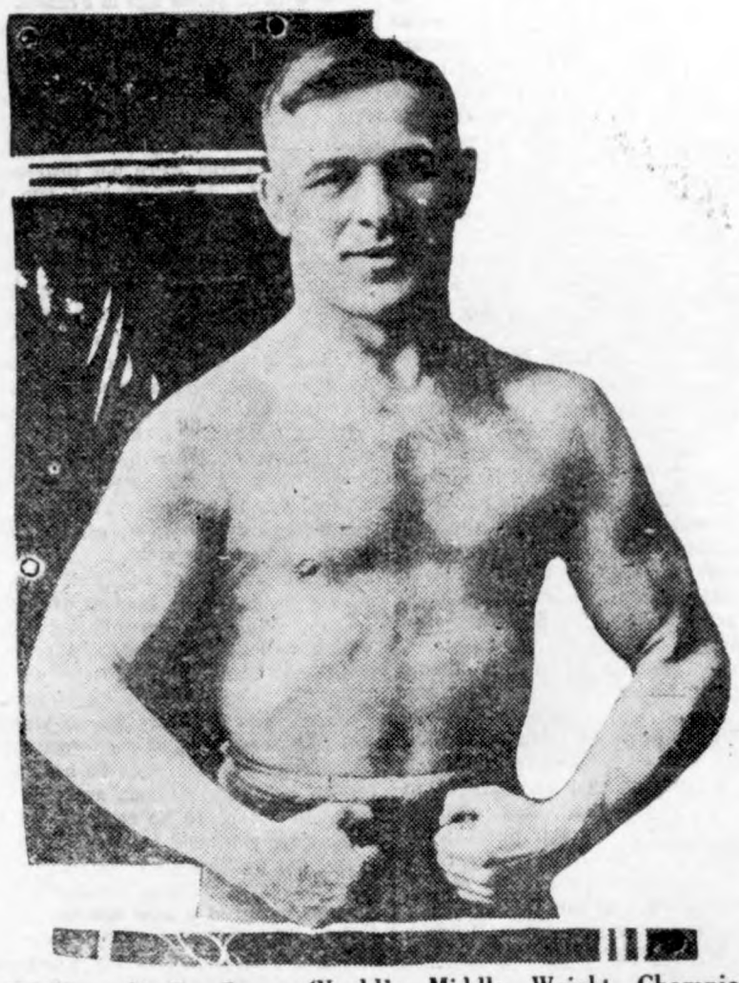
Number 3—A lad was lost. He wandered onto the Rockefeller mystery links. The oil king saw him. He took him into the house, gave him a dime and sent him home. And the 10-cent party sprang from that.

Whatever the cause, "dime day" has become to the youth of Tarrytown a day apart, ranking with Christmas and the Fourth of July.

Horse Kick Breaks Baby's Jaw.

Bay City, Mich.—Edward Haritier, three-year-old son of William Haritier of Linwood, had his right jaw broken when kicked by a horse. The boy was playing in his grandfather's barnyard and toddled unnoticed to the rear of a skittish horse hitched to a wagon. He will recover.

Big Wrestling Match Here Friday Night



Billy Schober World's Middle Weight Champion, 158 lbs., of Clear Lake

Willer vs. Anderson In Big Finish Match--Main Bout

WILL BE A FINE ATHLETIC PROGRAM OF SKILL

The wrestling program which will be staged at the Idle Hour tomorrow night (Friday, Oct. 6) promises to be something worth while to see.

The big attraction will be the finish match between Hans Willer, the State Champion in the 158 lb. class and of this city, who will wrestle the Mason City Danish Champion, Ole Anderson. This will be a big match and will no doubt draw a good big crowd.

Another good attraction which is to be staged the same evening is a one fall match between the popular Billy Schober, of Clear Lake, who holds the title for the World Championship for the 158 lb. class, and Willer of Mason City, a 200 pound lad.

The match is scheduled to start at 8:30 P. M.

STRIKE COST IS HEAVY

Loss to Labor in 1921, Due to Disputes, Was $132,000,000.

Survey Indicates 10,000,000 Man Hours Lost Daily in Disturbance—Building Trades Lead, With Printers Second.

New York.—The loss of time due to strikes in the present year will undoubtedly exceed that of last year, according to figures compiled by the National Industrial Conference Board, 10 East Thirty-ninth street. The board estimates that at present 1,250,000 workers are idle because of strikes in various industries, entailing a direct loss of approximately 10,000,000 man hours of work each day.

There were 2,267 strikes and lockouts in the United States in 1921, says the board report, or less than any of the five preceding years. The number of strikes brought to the attention of the bureau of labor statistics in 1916 was 3,789; in 1917, 4,450; in 1918, 3,353; in 1919, 3,577, and in 1920, 3,254. The number of persons involved in 1,587 of the strikes and 95 of the lockouts reported in 1921 was 1,085,653.

The total duration of 1,409 of the strikes and 70 of the lockouts last year was 60,165 days. The average duration of the strikes in 1921 was 60 days. Estimating the average wage of the workers in these strikes and lockouts at $2 a day, the total loss of wages alone due to this number of labor disputes in 1921 would be about $132,000,000.

Two and a half times as many strikes occurred in the first half of the years as in the last half, says the report, the largest being that of the marine workers in May, involving about 140,000 strikers and embracing all the principal ports of the United States. Of the total number of labor disturbances during the year, 1,527 were in the section north of the Ohio and east of the Mississippi, New York state leading the country with 359, Pennsylvania second with 203 and Massachusetts third with 198. As usual, the board states, New York city led among cities with 180 strikes and lockouts, followed by Chicago with 89, Philadelphia with 49 and Boston with 43.

"Considered by industry groups, the building trades in 1921 led all others with 568 strikes and lockouts," the report says. "Printing and publishing came second with 473 such disturbances, the clothing industry was third with 202, and the metal trades were fourth with 183. In 1920 also the building trades led with a total of 511 strikes and lockouts, while in 1919, 1918, 1917 and 1916 that doubtful distinction belonged to the metal trades, with totals of 581, 411, 515 and 547, respectively.

"In the last three years an increasingly large proportion of strikes and lockouts have been settled in favor of the employers, while in the preceding three years, when the war was still in progress, the reverse was true. This may be said to reflect the declining power of the labor organizations in the years following the war."

Queer Cargoes.

The oddest cargo recorded was probably that carried lately by a British steamer bound for Morocco.

It consisted of some two million gallons of water. To carry that amount of water a distance of 15,000 miles sounds too absurd, but the matter becomes clearer when we are told that the water was specially purified drinking water for the use of the Spanish troops fighting the rebels in Morocco.

Another cargo sent to Spain consisted of an immense quantity of bank notes. There were several millions of these, most of them of small value. It is testimonial to British printing that Spain gave such an order, and is due to the fact that notes printed in Spain have been so largely counterfeited.

A master stevedore, working at the Albert docks, London, recently received compensation for being hit on the head by a bundle of old horseshoes which were being loaded into a steamer's hold.

In court the judge asked the reason for sending old horseshoes out of the country. Counsel told him that they were being sent to China, where they were made into spades, a purpose for which they were specially suitable.

Slave.

The word "slave," in the sense in which it was used in America until the proclamation by President Lincoln that abolished it, was originally the name of a great branch of the human race. That branch was the Slavs, among whom the Russians, the Poles and the Czechs are numbered.

In the early wars between the Germans and the Slavs, the Slavic captives were used much as the negroes were used in parts of America prior to the Civil war. Hence a bondman was designated as a "Slav" or slave by the Germanic conquerors.

By way of an offset to this contemptible designation of the Slav as "slaves," it is only fair to point out that the Slavs trace the derivation of their race name to "slava," or glory.—Chicago Journal.

Tunnel vs. Airplane.

The channel tunnel is a popular subject to debate in England, and it is again being discussed. This time a new phase has entered into the discussion, for the belief is being expressed that the projected construction of a channel tunnel may never be carried out because of the very strenuous competition which air transport would be in a position to offer by the time such a tunnel could be completed and got into operation.

For those "Snappy" cold days--

That's the time when there is nothing more comfortable for the working man than the Vest that is shown here--we have them in Leather and Moleskin. They are light, but warm!

Come in and see these new coats--snappy fall and winter styles for men and young men at that will make you buy. Finest materials.

HARD TIMES THESE FOR CATS

Once Petted and Pampered Felines, When Abandoned, Can't Shift for Themselves.

Forlorn and lost-looking pussy cats are beginning to appear all about the streets which show an unusual crop of "Furnished Room" and "Sublet Apartment" signs. They are timid, all their ribs show, they look about them in as forlorn a fashion as a feline creature can ever manage. They do not prowl in the fine hunting style of cats that are alley-and-ash-can broke from babyhood. Their tastes have become too nice to let them have any liking for garbage as the main meal of the day. Long pampering has made them too weak or too unwilling to tide over a starvation period by pouncing on a cellar rat and making a dinner of raw meat when they fail to find any better food.

The pampered pets have become pariah, declares a New York Sun writer. The fine lean wild creatures that come into the streets after one at night and that have a brand of night life all their own will have nothing to do with down-and-outs that have known better days. So when the food hunt is best for the wild city cats, the latest recruits of the street—the house pets stay under cover. They do not fear men but they fear their own cat kind.

By day they come out of hiding. They hunt for a home and let themselves follow any one who looks as if he might hand out a saucer of milk. Hunting a new home takes so much of their interest that they forget to fend for themselves. For food is plentiful all over town if puss knows where to hunt for it. These cats of the better days may be too old to learn the trick. At any rate they let themselves go down; they become utterly dejected, perhaps most of them die.

Chinese Bride's Presents.

The American girl who is somewhat overwhelmed by the number of gifts received on her wedding day, might well wish at times that she were a Chinese bride. "The gifts sent to the home of the bride-to-be," writes Miss Maud Russell of the Y. W. C. A. in Changsha, China, "are gravely inspected by her father and mother, who return those which are not desirable." This manner of censoring the incoming gifts does away with all possibility of duplication or of receiving articles which are not in harmony with the bride's scheme of interior decoration. Furthermore, she is spared the ordeal of feigning a gratitude she does not feel for bridal misfits. But, on the other hand, she has no voice in the selection of the groom and too often the wedding day finds the bride a terrified little being in whose eyes lurks blackest tragedy. We do all in our power," adds Miss Russell, "to prevent such marriages. Again and again our girls beg us to intervene. Sometimes our efforts are successful and again, all we are able to do is to secure a promise from the girl's parents that this will be the last marriage of its kind in the family."

Passing of "Open-Knife Switch."

With the passing of what is called the "open-knife switch," the last serious risk connected with the use of electricity becomes a thing of the past. Authorities in many states already have prohibited the use of this type of switch, which may be dangerous when ignorant, careless and unauthorized workmen meddle with it. The latest move toward absolute elimination of this risk is the proposal to have safety switches made mandatory by the national electric (fire) code.

The public has never realized that the continued use of open-knife switches has been the result of false economy upon the part of buyers. Electrical men have generally recommended and tried to sell safety switches, but people have preferred to "take a chance" rather than pay a slightly higher price for protection.

When the safety types of switches are made compulsory, serious accidents due to electricity will be about as scarce as deaths due to the eating of custard pies.

"Micographic Photography."

A Boston scientist, a member of the American Chemical society, has engaged in the business of "micographic photography." This unique business consists of making photographs of fine instruments, textiles, jewels and other extremely small objects, or details of objects for purpose of identification or reproduction.

For example, if a merchant wants a sample of cloth reproduced, he has micographic photographs made of the goods, showing details of the fiber in the threads, the tightness or the looseness of the twist and details of the design.

Such photographs are of much assistance to the textile maker in reproducing the goods and to the purchaser in determining whether the reproduction is truthful. The micographic pictures also easily identify various kinds of threads, whether they be silk, wool or cotton.

Oysters Forever.

The New York conservation commission has been successful at the Cold Spring harbor, Long Island, in the efforts to produce oyster sets from artificially fertilized eggs, an achievement which has been striven for in one place or another for 40 years. This means that there will be little danger of exhausting the oyster supply, for by this method the oyster beds may be kept properly populated with growing oysters.

IMAGINATION WON WEALTH

Joseph Oller Invented the Pari-Mutuel System of Betting and Founded Many Resorts.

Oller, the inventor of the pari-mutuel system of betting, is dead. A little old man, hard of hearing and bowed, the name of Joseph Oller was one to conjure with 60 years ago in France. He made a fortune by his imagination, which enabled him to transform the whole system of betting, according to an exchange. And this is how he did it. When he appeared on the scene betting was nothing more than a lottery. Bulletins were put into a hat, stakes were deposited, and the man who drew the winning number took the sweep. This system often led to disagreeable results, for the cashier did not always pay up; he disappeared with the stakes. In order to do away with quarrels and frauds Joseph imagined a pooling agency, which he ran by means of a special carriage painted yellow, and containing several compartments in which were clerks, who were receiving bets of 2 up to 100 francs. A numbered wheel was turned, and before each race the backers drew horses which corresponded to their tickets. After the race the amount of the pool, less the sums going to the holders of tickets bearing the numbers of the horses which had been placed, and commission, was handed over to the winner. Oller's system was an instantaneous success. His betting carriage was besieged by crowds, and not infrequently there were fights. Soon he had to increase his rolling stock, and his betting vans were to be seen on all the Paris race courses.

By and by he had rivals, but again his imagination came to his rescue, and he invented a new system, which was nothing less than the pari-mutuel at present in use, with the difference, that Oller deducted ten per cent, which was reduced to five per cent when the business began to flourish.

Oller had other activities, other claims to fame. He founded that famous Paris Pleasure resort, the Moulin Rouge, also the Nouveau Cirque, and installed a switchback railway which had a run of success lasting several years. It subsequently became Olympia. He also created the Jardin de Paris and Luna park. On account of his Austrian origin, Oller saw his enterprises placed under sequestration when war broke out, but he resumed the direction of them after the armistice. He was immensely clever, an indefatigable worker and a man of excellent character.

"Oddest Couple I Know."

"My cousin, Dan Broadhead, and his wife are the oddest couple I ever knew," asserted Hostetter Smith, "and yet they appear to enjoy themselves more than anybody else of my acquaintance. They buy nothing merely because somebody else has it, but only when they want it themselves.

"They do not permit anyone to select their books, plays or music for them. They own up that they know nothing about art, and don't care a whoop about their lack. They are not in the least defiant of public opinion, but are totally indifferent to it.

"Neither of them has the slightest desire to run for office. They do not seem to yearn to uplift anyone else, and they will not permit anyone to uplift them. They are both growing fat and don't appear to care in the least. They live in a comfortable old house on an unfashionable street, with the yard ablaze with old-fashioned flowers. They are a funny couple, most any way you look at them, which I suppose is the reason they have so much fun."—Kansas City Star.

Now Peddle Flowers.

Nothing more pathetic can be seen in the Near East today than the splendid, upstanding Russian officers in their badly worn greatcoats selling flowers on the street.

"They would do anything, these Russian men and women, exiles from their own country," says Doctor Bestor, president of Chautauqua. Doctor Bestor spoke recently at the national board headquarters on his three months' tour of the continent. "The wife of a former Russian ambassador is a cook in a family. The doorkeeper of the embassy is a former admiral of the Russian fleet. These Russians have lost their relatives, in fact everything in the world except their grit and courage, and the only organization in the Near East administering to the women and girls among them is the Y. W. C. A."

Evidently a Good Riddance.

"Oh, dear!" exclaimed Mrs. Jibway. "Mrs. Glipping next door has lost her little poodle."

"Are you sure it's lost?" asked Mr. Jibway.

"Oh, yes. She's looked everywhere. And when you go out you might speak a word of condolence to her."

"I can't do that," said Mr. Jibway, "but I'll try to keep my face straight, and I promise not to jump in the air and crack my heels together until I get around the corner."—Birmingham Age-Herald.

Roll Butter.

The young housekeeper who told the fishman that she wanted some eels and when he asked her how much, replied "About two yards and a half," has a rival in a Baltimore woman.

"I wish to get some butter, please," she said to the dealer.

"Roll butter, ma'am?" he asked, politely.

"No; we wish to eat it on toast. We seldom have rolls."

WORDS OF WISE MEN.

Style is the gossamer on which the seeds of truth float through the world. —Bancroft.

The aristocracy of mind and heart is the only aristocracy that none wish to destroy.—Anon.

The least error should be humble, but we should never permit even the greatest to discourage us. — Bishop Potter.

It is a sad thing when a man has either a reputation beyond his merit, or an ambition beyond his ability.—S. Beatty.

Liberty will not descend to a people; a people must raise themselves to liberty. It is a blessing to be earned before it can be enjoyed.—Tilton.

The flowers within our reach we tread down without so much as even looking at them; the tiny exotic, which is far less beautiful, we covet because it is difficult of attainment.—Anon.

Faith sustains the same relation to works that lightning does to thunder. Faith without works is dead—lightning without thunder is ineffective. Works evidence faith; so does thunder, lightning.—F. W. Robertson.

The greatest thing a human soul ever does in this world is to see something and tell what it saw in a plain way. Hundreds of people can talk for one who can think, but thousands can think for one who can see. To see clearly is poetry, prophecy and religion, all in one.—Ruskin.

The world is a solemn fact; we are in it, passing through it, let us try to understand it, let us grapple with its mysteries, let us think much of its responsibilities, let us ponder the thoughts of the inquiring minds of past ages, let us prize all the light we have from man—from God, so that we may be guided aright amid its perils and chancing experiences.—Rev. Dr. Alexander Reed.

MYSTERY OF LOVE

Love is indestructible, its holy flame forever burneth.—Southey.

Love hath every bliss in store. Not to know love is not to live.—Gay.

The nectar which love's own hand pours never fails or sours.—Mallettt.

Oh, what a heaven is love! And, also, what a hell!—Middleton and Dekker.

Unless you can die when the dream is past—oh, never call it love!—Mrs. Browning.

Love is the storehouse of Nature's joys, the highest heaven of pleasure.—Thomas Chatterton.

Love is not to be reasoned down, or lost in high ambition or a thirst for greatness.—Addison.

Love is more to a woman than ambition is to man—her light, her life, her very breath.—Longfellow.

Love is as sweet unto a shepard as a king, and sweeter, too, for kings have cares that make the sweetest love to frown.—Greene.

There is music in the silent note which Cupid strikes, far sweeter than the sound of an instrument.—Sir Thomas Browne.

SCIENTIFIC FACTS

Machinery has been invented for shredding waste paper into an acceptable substitute for excelsior.

The Swiss government is conducting experiments in the use of compressed turf as a substitute for coal.

Pressing a lever at the driver's seat throws new antiskidding chains under the rear wheel of an automobile.

Italian railroads are experimenting with lignite, peat and peat mixed with other substances as locomotive fuel.

A California inventors' suitcase is provided with legs and can be unfolded and set up to form a writing desk.

The development of the use of coal gas for motor vehicle power has passed the experimental stage in England.

The United States weather bureau has established a station in Honduras that reports to Washington by wireless.

PICKED HERE AND THERE

Ecuador has a tree producing berries which can be used as soap.

A new flagstaff for railroad brakemen has a compartment in the handle for carrying torpedoes.

Japanese waterproof paper umbrellas and lanterns with an oil extracted from rubber plant seeds.

The smallest practical dry battery has been invented for use in a French vest pocket cigar lighter.

A new igniter for gas stoves that produces sparks by friction is operated like a pair of shears.

FULL OF WISDOM

It's easier to go broke for liberty than to go blind.

It's wanting the last word that keeps most of the arguments going.

Selfishness is the hardest obstacle the cause of freedom has to meet.

The biggest ambition any man can have is to be the good father of a good son.

A woman may love her husband even though he isn't rich, but she can't help wishing that he was.

In this war our observation is that the gold givers are still a long way behind the boy givers.

One of the false notions some men have is that they can be patriotic without it costing them anything. They can't.

There are two kinds of profiteers. One is making money at his country's expense, and the other is saving money at his country's expense.

A woman can get along on bran bread and corn muffins and all other sorts of Hoover substitutes, but when she gets a desire for a new bonnet only a new bonnet will do.

After a woman has been married for a few years she realizes that it is just as hard for her husband to be good-natured all the time as it is for her to be good-looking every minute.

One of the things we are not going to try to do this year is run a farm by long distance and twilight. We discovered last year that to be a successful farmer requires more than 40 minutes' work Tuesday and Thursday evenings.

WE HAVE OBSERVED

That the man who thinks he lacks time generally lacks energy.

That a fellow doesn't have to be a Marathon runner to be long-winded.

That no amount of culture will make a fat man stop snorting in his sleep.

That in the constant sifting of life men generally land about where they belong.

That there are lots of men with just enough knowledge to be nuisances.

That a homely face saves a woman from hearing a lot of rank nonsense.—Boston Transcript.

WHAT'S NEW IN SCIENCE

Ore from Bolivian tin mines is being smelted at a new plant in Chili.

A phonograph attachment makes a new clock speak the time every quarter hour.

One of the easiest ways to cool an overheated oven is to stand a basin of cold water in it.

The Argentine government will install an electric voting machine in its chamber of deputies.

Clothing made of pressed feathers as a substitute for wool has been invented by an Italian priest.

A shade that folds like an umbrella, for convenience in carrying features a new portable electric lamp.

A new system of incubation hatches chicks by the heat of an electric light under a glass bell in which the eggs are placed.

The building of concrete sea-going vessels having proved successful in Sweden and Norway, Denmark is embarking in the industry.

Hardened copper phonograph needles are the invention of a New York man, who also has succeeded in making a watch spring from the metal.

As a new cotton picking machine is driven over a field four men follow it and pick the bolls with nozzles connected to pneumatic apparatus with which it is equipped.

It has been estimated that the wire in the cores and sheathing of the world's submarine cables that have been made since they were first used in 1857 would reach from the earth to the moon.

THINGS WORTH KNOWING

The French "horizon blue" is said to be the best color for a military uniform.

A whitewash is now made from the "sludge" refuse of the acetylene gas manufactory.

An X-ray picture of a specimen of "silk hosiery" will reveal the "tin" filling of the fabric.

Bivalves suspected of bearing pearls are examined by the X-ray to avoid destroying the shellfish.

"THE WORLD DO MOVE"

A gasoline torch that cannot be blown out supplies the heat for a new cooking stove for campers.

A new mop for washing automobiles has a hollow handle through which water is fed by screwing it to hose.

A holder has been patented for safety razor blades to enable them to be used by tailors or dressmakers for ripping seams.

A Californian is the inventor of a registering device to be attached to a hen's back to record the number of eggs she lays.

The extermination of all flies is the aim of two British physicians who are experimenting with a parasite that kills the insects.

The vacuum-cleaning process has been applied with specially designed apparatus to removing soot and dirt from boiler tubes.

To make a kitchen stove help warm the room in which it is used a metal cover that radiates the heat evenly has been patented.

With government encouragement, extensive experiments will be made with a view to reviving the growing of flax in Scotland.

Made of flat steel spring a quickly adjusted belt has been invented to take the place of strings on kitchen or laboratory aprons.

A rudder has been patented, normally within the hull of a vessel, but which can be projected through the bow to aid in steering.

A method has been invented in Europe for treating old hops so that they can be used as an acceptable substitute for tobacco.

IS IN FAVOR OF SALARIES

James Wicker, Jr., Director American Legion Tour of Europe, Urges Pay for Commanders.

James J. Wicker, Jr., director of the American Legion tour of Europe, thinks department commanders of the Legion should be paid salaries. Just before sailing from New York on the S. S. President Roosevelt, which carried the party to the battlefields of France, Wicker sent a message to his comrades in Virginia, refusing to permit his name to be mentioned as department commander in the election by the state convention. His letter follows:

"The department commander should devote his principal time to the Legion—its work, its growth, its welfare should command his mind, his heart and soul, and should always be uppermost in his daily life. The position of department commander is a very high office and it is worthy of the very best men in the Legion. It is a man-size job, requiring the very best efforts and the hardest work to handle it with the greatest success.

"Given a commander who would practically surrender himself to the Legion, and who could make its progress and success his chief aim and objective during his term of office, we would see this Legion of ours expand and grow in membership, influence and healthy activity almost beyond conception. I am of the sincere conviction that if the Legion called a man to serve as leader—asking him to give practically his whole time and providing for his support—he would, if of proper caliber, consider that call as leading him to a wonderful service, just as serious, as noble and as patriotic as that which brought him into uniform against the enemy."

The question is one which has been much discussed over all the country by Legionnaires, and probably will come before the national convention at New Orleans.

CHEERS FOR FORMER SOLDIER

J. N. Hoffman, Disabled Ex-Service Man, Rescues Woman From Death in Lake Michigan.

J. N. Hoffman, former service man, didn't stop to consider the fact that he was only an indifferent swimmer and that a disability incurred in his army service made swimming even more difficult for him, when he saw a woman floundering in Lake Michigan, off Ardmore beach in Chicago. Fully clothed, he rushed into the water, his sole thought that of rescue.

Spectators stood on the beach and watched the heroic struggle. For many minutes they feared both Hoffman and the woman would be drowned. It was night, and only by the lights of the beach could the crowd watch the two dark forms bobbing up and down on the water. And there were cheers when Hoffman, exhausted, towed his limp burden onto the beach.

The woman declined to divulge her name. She said she had gone out for a drive in her limousine and decided on impulse to go swimming before she returned home. She swam beyond the sandbar and, finding herself in deep water, became panic-stricken and shouted for help. She declared she would have drowned in a few moments more had not her rescuer reached her.

WILL CHANGE STREET NAMES

New Orleans Thoroughfares to Be Rechristened During Legion National Convention.

Illuminated by 28,000 electric lights and decorated with flags, banners and streamers, the downtown streets of New Orleans will be in holiday regalia during the American Legion national convention next October.

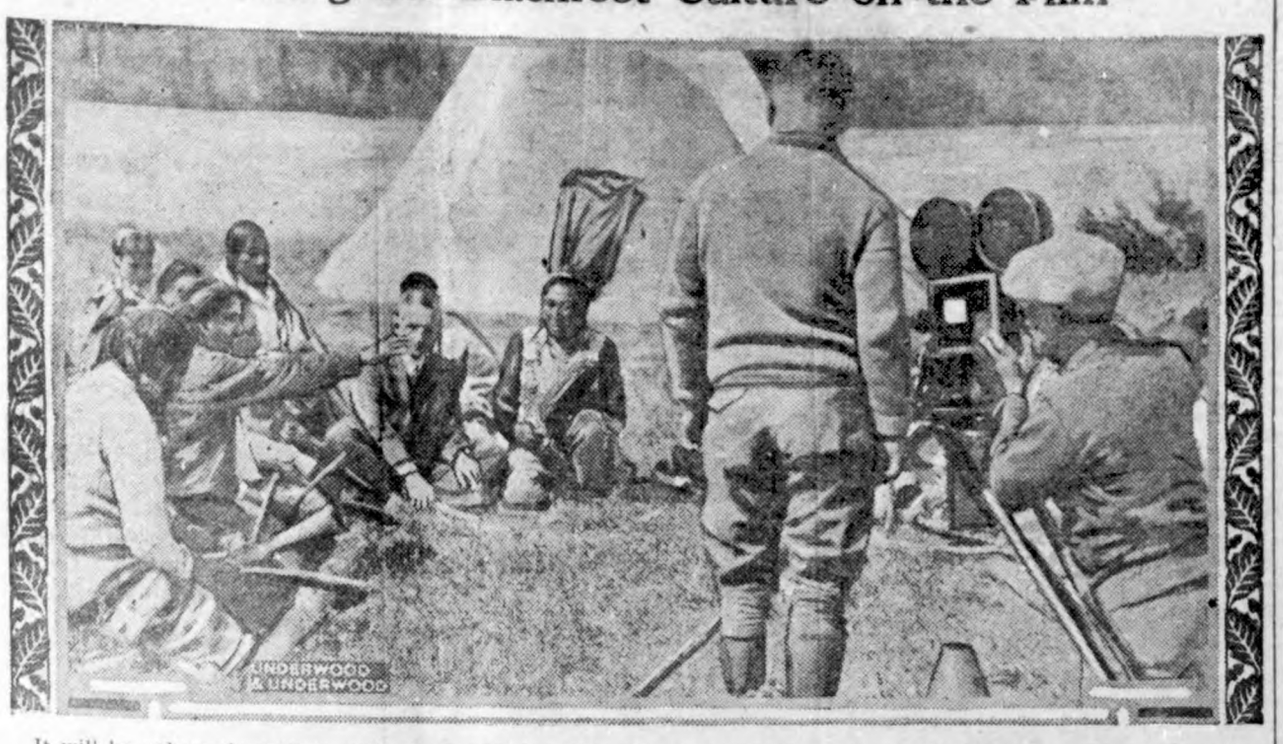
For five days the conventional names of business streets will be thrown into the discard and they will be rechristened with designations more appropriate to the Legion gathering.

A court of honor of the nations will be established in ten blocks, each block being set aside for one of the principal allied powers with corresponding flags and decorations. Signs indicating the names of the states, with their contributions in numbers of World war fighters, will feature the court of honor of the states, to be held on the principal residential street. American Legion avenue will be decorated with Legion banners and emblems.

Visiting doughboys in search of their buddies will be assisted in the establishment of the streets of the divisions. Suspended across the streets utilized for this purpose will be the insignias of all divisions in the World war army. Impromptu reunions of men who served in the same division will be held near the banners inscribed with their divisional insignia.

Red, white and blue electric bulbs will illuminate Canal street, the main thoroughfare, and all principal side streets.

Recording the Blackfeet Culture on the Film



It will be only a short time until the old chiefs of the Blackfeet Indian tribes will have disappeared from the earth. In view of this fact the government has decided to make a permanent record of what remains of their peculiar type of civilization. For the past two months a camera crew has been working in Glacier National park, filming the Indians in their home life, their dances, their tribal gatherings, their sacred medicine ceremonies and other forms of their work and play. The film will be preserved for educational and historical purposes.

Greek Cavalry Retreating Before Victorious Turks

Greek cavalry are here seen retreating before the victorious troops of Mustapha Kemal Pasha which finally drove the Greeks out of Asia Minor.

MacMillan Back From Baffin Land

Capt. Donald B. MacMillan, arctic explorer, and the schooner Bowdoin on which he and his expedition have just returned from an exploration of Baffin Land. MacMillan is holding See-nul-muk, one of the dogs that were with the expedition.

Aviator Smith Is Nearly Killed

In view of thousands of persons, Walter J. Smith of Chicago, second oldest flier in point of service in the United States mail service, crashed to the ground at the state fair ground in Indianapolis and was dangerously injured. The wreck of his plane is shown in the photograph.

TAKEN FROM EXCHANGES

A height of more than 7,000 feet has been reached by balloonists.

Basking sharks, the largest known variety, grow to 32 feet.

Baikal lake, Siberia, attains a depth of 4,500 feet.

Ginseng grown in Korea is considered of the most value.

Bas-reliefs seem to have been invented by the Egyptians.

CHIEF NAVY DEBUTANTE

Miss Emma Scott Stitt, daughter of Rear Admiral and Mrs. Edward Rhodes, popular and beautiful member of Washington's younger set, who will head the list of navy debutantes during this winter's social season.

UKRAINIA JOAN OF ARC

Miss Olga Kopachuk, termed the Joan of Arc of Ukrainia, active leader in the spiritual struggle for emancipation of the people of Little Russia, came to this country as the advance guard of the Ukrainian National chorus. The other members soon followed her and will make a tour of the United States, the purpose being to indicate to Americans the artistic, intelligent, peace loving nature of the Ukrainians. Miss Kopachuk is a graduate of the Vienna conservatory.

HOME TOWN HELPS

MERE UTILITY NOT ENOUGH

Designers of "Main Streets" Should Get to Realize the Value of Appearances.

We spend our young years grubbing for dollars, and when we succeed in making our pile, if we do succeed, we are too tired and too untrained to enjoy it.

Some day we will wake up to the fact that beauty pays.

We need not abandon work and go to loafing. It is just as necessary, and adds just as much to the rational enjoyment of life, to have a beautiful place to work in as to have a beautiful place to play in, or to worship in.

The main trouble with Main street is that it is hideous.

The store fronts are not attractive. The men who put them up did not care how they looked. All they wanted was a place, secure from the rain, where they could sell hardware and groceries. And all the people want that visit them is a place where they can get a stove or a can of corn.

That is why the young people "hate the place." That is why they leave it as soon as they are old enough. At least, that is a very important contributing reason.

That is also one of the reasons why we have so little civic pride. We have little to be proud of.

We ought to realize that even from the standpoint of efficiency people do better work when they are in conducive surroundings.

A large eastern manufacturing company has no strikes. It has never had any labor trouble. If you visit the place you will see why.

The factories are beautiful. They are largely of glass. The workers work amid beautiful surroundings. They are not only well paid, they are treated as human beings. All around the work buildings, engine houses, stables and warehouses are beds of flowers, smooth lawns, graveled roads. And a vast park is at hand where the workers can picnic.

Go to another factory, one that I have especially in mind, where they manufacture steel products. Its huge, blackened walls look like a state prison. The fire and smoke belching from its chimneys look like hell. The homes of the work people are hovels. There are no flowers, no trees, no lawns; only dirty, cluttering yards, goats and battered tomato cans. They have plenty of labor troubles there.

This, of course, does not mean that you can satisfy laborers by giving them posies, but it does mean that beauty helps.

For the company that provides beauty shows that it realizes that it is dealing with human beings, and not with cattle.—Chicago Herald and Examiner.

APPEARANCE MAKES OR MARS

Condition of City's Streets Gives Pretty Clear Insight Into Its General Character.

American cities are manifesting a new interest in anti-litter work. Of the minor problems facing American municipalities there is scarcely any one more important than this. Just as the neatness and cleanness of one's personal appearance is an indication of character, so the physical appearance of a city's streets gives a pretty clear insight into the city's composite character. A fine avenue littered with filth and rubbish means nothing except bad citizenship. It betrays the absence of that spirit of co-operation which is the essence of good government. A man who has so little respect for his associated citizens as to strew the highway with papers and general refuse does not possess that "social conscience" which brings important results in more important matters. It is difficult to believe that a littered-up city is a well-governed city; the thing is nothing but a badge of civic carelessness, waste and even of corruption. —World's Work.

Zoning Plan in Small Cities.

If the Third-Class City league is really deeply interested in the welfare of the municipalities of the state, it will concentrate next session on an effort to have the legislature enact a zoning law. Third-class cities are meeting problems every day of serious character that only zoning regulations solve. . . . Real city planning embraces the zone system if it is to get anywhere. Harrisburg's planning system has done many things worth while. But it could do far more if the zoning of the city were made a part of its duties.—Harrisburg (Pa.) Telegraph.

Where to Find Out About Zoning.

The Department of Commerce, in response to the needs of over sixty cities in which zoning is in effect and of over 100 cities which have zoning ordinances in preparation, has issued a selected bibliography of zoning. This contains critical references to the most important articles on the subject which have appeared in periodicals and books.

The bibliography may be obtained by application to the division of building and housing, Department of Commerce, Washington, D. C.

Mr. and Mrs. Fred Bell. and Mr. and Mrs. Walter Reed, and son Johnny, were Sunday visitors at the Wm. Bell home.

Jeff Bell and Walter Johnson arrived home from Abercrombie. North Dakota, Saturday night. They had been there digging potatoes. They sorted and sacked 2800 bushels of potatoes while they were there, and also helped thresh and cut corn.

Mr. and Mrs. Ed. Backman and family, and Mr. and Mrs. Walter Red and son, Johnny, Jake Backman of Goodell, Chris Anderson and children, Charles Fritzell and wife, and Fred Backman were Sunday callers at the John Backman home.

The Win One Class of the M. E. church met at the home of Gail Buss tast Friday night. After the business meeting games were played after which refreshments were served. consisting of sandwichs, bananas, and cocoa. All present report a good time.

Thieves at Oskaloosa Have P lans Thwarted When They Strike Mustard Gas Fumes.

At Oskaloosa a new defense against safe-blowers has been evolved and it works fine. A report says that amonia and mustard, forming mustard gas when a bottle oontaining the concoction was broken, thwarted yeggs who blew the safe in the Standard Oil company office building. The bottle was shattered when a charge of some explosive cracked the safe. Fumes filled the room to such an extent that the thieves left without securing any loot. The safe, which was new, was badly wrecked. This is the second similar depredation at the same place within recent months.

THE CHURCHES

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Regular worship Sunday morning at 10 o'clock.

Sunday School at 11 o'clock.

Our Sunday services will be held in their usual order next Sunday. All are cordially invited to come and worship with us.

In the evening at 7:30 o'clock the Epworth League will carry out a well prepared program. It will pay you to be present at the evening's program.

Remmber the prayer service on Thursday evening. Bring your Bibles.

W. C. Bergmann.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

There will be no sermon held on Sunday, October 8th, this being Conference Sunday and the pastor will be at Fort Dodge, the seat of the Annual Conference. A number of our congregation will be attending Sunday Conference services.

REFORMED CHURCH
A. A. Depping, Pastor

Because of the Annual Synod held at Sutton, Nebraska. which the pastor expects to attend, there will be no services next Sunday morning. But Rev. C. A. Schmidt will preach at 2:00 P. M., and Sunday school will be held immediately after the services.

STILLE'S IMPLEMENT NEWS

VOLUME 1. Thursday, October 5, 1922 NUMBE

Whn The Frost Is On The Pumpkin

As the days roll by and the Autumn winds bring the corn harvest to it's peak, more and more farmers find use for McCormick-Deering Corn Machines. Many will drive into fields with McCormick-Deering Corn Pickers and make quick work of a job that calls for supreme effort when done by hand. Others will carry the fodder to the barn lot and put it through McCormick-Deering Huskers and shredders. But whatever the work that confronts them Hancock county farmers know they can depend on the McCormick-Deering Line for the proper machine for the job. They should also know that here at our store—and our store only—can they buy good, serviceable McCormick-Deering Corn Machines in Klemme.

Will Suckow bought one of our Burnham wagon boxes. Bill also bot one of our International 8 in. feed grinders; he has an International 6 h. p. engine which will make him a fine outfit.

Otto Pringnitz bought a Triumph wagon box from us this week.

Terhufen and Metzgar bought a 2 h. p. Waterloo gas engine the other day to run their Pony Batch Concrete Mixer with. If you have much cement work to do we can fix you out with one of these outfits, at a very reasonable price.

Lew Neuberger bought one of our John Deere Steel Portable Bridge Trussel grain elevator outfits complete. Mr. Newberger says he can pick with most of them yet, but when it comes to unloading "let John Deere do it."

Mr. M. P. L. Juhl of Crystal Lake bought a Nesco Spreader, McCormick Mower and a complete wagon from us this summer. Recently Mr. Juhl's barn, corn crib and grainery burned down and nearly got the new wagon. but by good effort he and his man saved it. He was down the fore part of the week to see us about an inside elevator job for the new crib and grainery he is going to build. The fire caused Mr. Juhl considerable loss.

Ask any experienced feeder and he'll tell you the faster you can fatten your stock the more profit there is in it. It takes so much feed to keep the animal alive and healthy and what it digests above that fattens. In order to have stock get the real benefit out of their feed the feed must be ground. We have a grinder in all sizes, from the size that requires 4 h. p. to the size that would require a powerful steam engine. We have grinders rangi

price from $10.00 up and we grinders that will grind any from flax to corn fodder. (Some they would grind monkey wren but we would advise a different of grinder for this.) We also several second hand feed gri that we will sell very reason Come in and look them over, t over and then load one up.

If your pump or windmill fixing now is the time to do it. winter sets in it will be a disa able job. Ring us up and tell us troubles and we'll "fix-'em."

Even a chicken has to scrat a living.

OL. BROOKHART GAVE A FINE TALK TO BIG CROWD HERE

OKHART SPOKE TO LARGE CROWD HERE

Col. Smith Brookhart, Republ candidate for United States ator spoke to a fairly large audi- here Saturday morning at the Hour Theatre. He was schedul- o arrive here at 8:30 A. M. but account of the rain and bad roads not get here until an hour later. Col. Brookhart gave some inter- ng facts. He disclaimed the rge his enimies are making a- st him stating that he is a Soci- ; the Col. branded that as false he stands for everything that is erican. He made it clear to all he is for the farmer, the labor- nd the small business and will k for their interest. His talk well taken here and no doubt will pull a solid Republican vote and also gather in many of the ocrat votes in this county.

e had planned to make a speak- trip to every town in the county on account of the bad roads was able to make Klemme and Good- nd get back to Garner in time the afternoon meeting and then to Britt in the evening.

PREVENT FIRES

RE ARE MORE RULES FOR FIRE PREVENTION WEEK

Prevention Week Aims At The Teaching of Many Lessons

n October 9, 1871, a fire started hicago which destroyed property ed at $190,000,000 and cost the of 200 citizens. By proclama- of the President of the Uinted s and many state governors the versary of this date has been aside for a number of years as onal Fire Prevention Day, and people of the country have been d upon to observe it by giving l attention to the subject of fire ention. The following are a few e rules to observe:

on't smoke in bed. Some night will go to sleep and the bedding t easily catch on fire.

on't allow trash to accumulate in ments, in attics, under stairways r elevator shafts and on your ors.

on't dry clothing, gloves, etc., h have been cleaned with gaso- near fires where the fumes can e and start a dangerous fire.

on't drive your automobile with- having an approved extinguish- ith you for an emergency.

on't try to substitute pennies for n fuses in the electric meter; were put there for the purpose ontrolling the current; pennies permit any flow ofcurrent and ouse may be set on fire.

on't permit the use of gasoline in or open containers in garages.

on't wash motors with gasoline rages; do it outdoors.

on't smoke in your garage.

on't keep furnace ashes in wood- ontainers.

on't leave electric irons or any electrical appliances without necting them.

on't use oil or gasoline to start

on't leave greasy mops, etc., out metal containers; spontaneous ustion may set them on fire.

all the "don'ts" the one least rved is the last. Dustless mops ey are called, which are woolen ber mops, which have been treat ith oil, have never been looked as a grave source of danger they are just as liable to spon- ous combustion as greasy rags aper, and should be kept in the l container in which they come, h would prevent the spread of fire started by them.

FIRST KILLING FROST

e first killing frost of the fall Sunday night when the ther- eter dropped quite low. The killed all vegetables which were protected.

e have had real light frosts be- but not damaging anything. nce Sunday night we have had a frost nearly every night.

IT MAKES 'EM GOOD

FROST IMPROVES THE FLAVOR OF PARSNIPS

Can Be Left in Ground All Winter and Be Good in Spring

The home gardner who has a patch of parsnips and wonders whether or not they will be damaged by frost need not worry, as this root crop requires a frost to give it the best flavor.

Parsnips of the highest quality are those which have been frozen and they can be left in the ground until the last of crops harvested. Then they should be dug out and stored in an outdoor pit or placed in sand in the cellar.

If a large crop is raised the parsnips can be left in the ground until spring and dug up and used when the earth thaws. Late carrots, beets winter radishes and turnips should be dug about the first of October, before a hard freeze comes. These can be stored in a cool, moist cellar with little circulation of air. Covering these vegetables with moist sand will prevent them from shriveling and will absorb any bad odors that might arise from decay and keep the rest of the vegetables from being contaminated.

Potatoes should be stored in an open bin in the dark, where they will not freeze. Cabbages want to be pulled up by the roots and stored with the head down on the floor of the cellar.

Squash, pumpkins and sweet potatoes should be stored near the furnace where they will be dry and also warm at all times.

Onions require a cool dry place and keep best when stored in crates where a good circulation of air is present.

HOME BREW NEWS

THEY HAVVE KEGS—BUT HAVE NO BUNGS FOR THEM

Cedar Rapids. Oct. 12.—The home brewers are having troubles of their own these days. First it was the scarcity of kegs, but the receipt of several car loads of all sizes of these receptacles has relieved that trouble. Now it is the lack of wooden bungs. The wholesale drug houses have been cleaned out so great has been the dmand for these important stoppers.

The immense grape crop in this vicinity this year has caused more amateur wine makers to try their hand at "brewing their own" than ever before. The prevailing price is 2½ cents per pound and as sugar is coming down, a ten gallon keg of cheer can be fixed up at a very nominal cost.

Instead of trading gossip over the backyard fence, housewives are now telling each other how many cups of sugar, etc., should be used to get the best "kick."

Local cellars will be filled with something else this winter besides coal and potatoes.

TOOK A BAD CHANCE

TRAIN CUT OFF END OF CAR BUT GIRL NOT INJURED

A very unusual auto accident occured recently at Sabula, Ia., when a Milwaukee train cut off the unoccupied rear seat of the automobile which Miss Elizabeth Taplin was driving, leaving her unharmed in the front seat.

Miss Taplin was alone in the car. Nearing the railroad crossing she saw the train approaching. Her car was about fifteen feet from the crossing and the brakes refused to set.

Going ahead, the car had nearly cleared the crossing when the train struck it. completely severing the tonneau.

LUDEKE HAS GOOD HOG SALE

Ludeke's Pure Bred Chester White and Poland China Hog Sale turned out good last Thursday and brought fairly good prices.

WISELY & SONS FINISH WILSON ROAD GRADING

Packed Their Machinery And Shipped Out From Garner

Wisely & Sons have completed the grading on the Wilson Highway between Klmme and Garner. The fore part of the week they were busy packing their equipment and moving their machinery, horses, mules, etc. to Garner, where they shipped out for some point in Illinios, so we understand.

This company are certainly fine graders and understand their business. They are also fast workers and do their jobs up on schedule time.

FARMER FINDS COAL

BIG COAL VEIN IS HIT IN BUENA VISTA COUNTY

News reports state that coal may be mined in Beuna Vista county in the near future if the plans of Adolf Boese materialize. While drilling for water on his farm near Linn Grove, Friday, he struck a twenty-one foot vein of coal.

The well diggers reached a depth of 250 feet and Mr. Boese decided to have them go on, as he recalled coal had been struck in the valley close by about twelve years ago. When they had reached a depth of 256 feet they found this vein of clear coal.

A RAMBLING BUCK

DOLLAR RETURNS AFTER LONG VACATION

Ames, Ia., Oct. 12.—Thirty-five years ago this summer, Roy Minear, then a chunk of a lad living near Story City, drove into Ames with a load of watermelons, which he sold there. The silver dollar he received for the melons was to be his own and was the first one he ever owned. It was of the coinage of 1882.

For some years Minear kept the dollar, but the time came when he had to spend it. Before he did so he dented the coin on both sides with a rock.

Minear, who is now employed by a grocery firm at Sioux City, has made it a practice for years to look at every dollar that came over the counter to him in an effort to get hat old dollar.

A few days ago he bought a bill of lumber and in the change was the long-lost dollar, still dented, which had been missing for thirty-five years.

PRESENTS NEW BIBLE

A BEAUTIFUL GIFT

The Liberty Township Congregation is the recipient of a beautiful black morocco Pulpit Bible, presented to it by Mrs. Wm. Koerner in memory of her husband, the late Rev. Wm. Koerner, who died May 18, 1922. Last Sunday morning Rev. Bergmann took occasion, in a few well chosen words, to thank Mrs Koerner for her beautiful gift. The Missionary Society also showed their appreciation of her gift at their meeting and handed her a large bouquet of purple and white astors.—Contributed.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship at 10:30 o'clock.
Sunday school at 11:30 A. M.
Evening worship at 7:30 o'clock.
Fellowship meeting at church at 7:45 o'clock, Thursday evenings.

Please note change in hour of the evening service.

The newly appointed pastor will conduct services on Sunday.

The regular meeting of the Ladies Aid Society planned for Thursday, has been postponned until later notice.

Let all our people consecrate themselves afresh to the task of the Kingdom.

—Arthur B. Gedye, Pastor.

Iowa leads in the production of canned sweet corn with an annual pack of about 2,500,000 cases.

WIRELESS TELEPHONES IN THIS CITY WORKING FINE

There Are Now Four Sets Here To Furnish Amusement

Certainly Klemme is up to date and on the map! Perhaps you do not know it but there are four radiosets in Klemme. Jack Wellemeyer, Fred Arnold, Adolph Lauritzen and th Turgeson boys all have radio outfits and some have caught messages from New York, California, Texas and Canada. Adolph used his to listen in on the World's Series and was able to get some of the plays

We presume there will be more radio outfits in operation this winter.

HAVE CURIOUS PET

AMES STUDENTS' SNAKE NOT A HEAVY EATER

Ames, Ia., Oct. 12—At last the lowly snake has condescended to partake of the food which has been forced on it by man.

The young boa which was brought to Ames in a bunch of bannnas shipped to a local grocer was put in the care of the zoology department at Iowa State College. For four months the snake has refused the finest delicacies which have been put beefore it. A little mouse put in the cage had beat up the boa to convince the creeping creature to break its hunger strike.

Recently hunger got the best of the snake and he swallowed two mice just for spite. According to the zoology profs this will hold him until his Christmas dinner.

Electric Light Company Plans For Better Service

New 33,00 Volt Station and Line Being Constructed at the Local Plant

The Iowa Falls Electric Co. is preparing to give its patrons the best of service in the future, according to a statement from the local office Wednesday.

The company has purchased 2,000 tons of coal from the Illinois fields that will cost f. o. b. Iowa Falls, $7.30 per ton, which will be placed in storage and will only be used in case of an emergency, and they are also buying coal from the Iowa fields for their current needs, which will result in the company being in a position to maintain their service thruout the winter, unless the transportation system breaks down entirely.

Another big improvement the company is making at the present time is the construction of the 33,000 volt line from Cedar Rapids to Iowa Falls and the new sub-station at the local power house, which will cost over $50,000, and this with the $25,000 spent for new stokers makes a total of $75,000 spent by the company in improvements which will not bring in one cent more revenue, but on the contrary will add about $10,000 to operating cost yearly in interest, depreciation and maintenance charges, which is all expended for the betterment of service.

When this improvment is completed the city will be assured continuous light and power even if for some reason the local plant would fail to operate. This is a big thing for Iowa Falls, for in case of a flood such as the city experienced last spring the city will be assured of light and power.—Adv.

Captuures Twenty Wolves

William Schellsmidt, of Waukon, Iowa, recently marketed a timber wolf at Auditor Palmer's counter, it being the twentieth wolf he had captured this year during the past three months. He states that the wolves are numerous in that locality this year.

SCOUT CORNER

Regular meeting at Scout Headquarters Monday night to register troops. Full attendancce is requested.

—Scoutmaster.

Council Bluffs is the center of the Iowa grape market where an annual production of 100 cars is shipped.

WILLER DEFEATS DANE CHAMP AFTER HARD MAT TUSSLE

WILLER WINS OVER ANDERSON WITH TOE HOLD

Schober Throws Heavy-Weight After Fifty-two Minutes Battle

The wrestling match which was to have been held Friday night but on account of the bad weather was postponed, was held last night at the Idle Hour. Only a fair crowd was present to see this fine match as so few knew it would be held.

The preliminary was a real treat to wrestling fans who always like to see Billy Schober on the program. Billy had a real job last night to put the big 230 pound Miller on the mat and hold him there, but after fifty-two minutes of hard work little 155 pound Billy worked his man into an arm scissors and a leg lock which Miller could not break and had to come to the mat.

The main bout between Hans Willer of this city, who is the 158 pound champion of the state, and Ole Anderson, of Clear Lake, who holds the Danish title for that class, was the best match we have seen for a long time. Willer and Anderson were well matchd and both showed wonderful skill in both getting holds on their apponent and also in breaking holds. It looked like it woul be an all night affair but after about 39 minutes of hard wrestling Willer clamped a punishing toe hold on his man who stood the cruelty of the hold for about two minutes and then had to give Willer the fall as he was unable to stand it any longer. The time was 41 minutes. Anderson's foot was so badly injured that he was unable to come back for the next round and so gave Willer the match.

Wrestling fans would like to see o see these men get together at om future date as they certainly put up a real exhibition.

Pittinger Challenges Winner

Before the Willer-Anderson bout was announced that Otis Pittinger, 155 pound wrestler of Mason City would challenge the winer for match. Willer accepted the challenge and will wrestle Pittinger here n Tuesday, October 24. Wrestling fans should bar in mind this date as it promises to be a real match. Undoubtedly Billy Schober will again appear on the program.

NAME "SKY PILOTS"

PASTORS NAMED IN FT. DOGE CONFERENCE

Rev. Gedye Returns To Klemme For Another Year's Service

With the reading of the appointments to charges in the Methodist church for the coming year by Bishop E. G. Richardson, the Northwest Iowa Conference of ministers of the Methodist church was adjourned at Fort Dodge Monday after a week's session. This was the fiftieth anniversary of the conference.

Following is a partial list of the appointments in this lacality:

Belmond and Alexander. W. A. Wilkinson.
Britt, J. T. Pierce.
Clear Lake, F. S. Story.
Corwith, E. T. Gerkin.
Crystal Lake, A. Nash
Forest City, J. D. Wolcott.
Garner, J. D. O'Connor.
Goldfield, A. E. Buriff.
Kanawha, George Osborn.
Klemme, A. B. Gedye .
LuVerne, W. P. Webb.
Thornton, E. Redmain.
Woden, H. L. Mayne.

CRIB AND CORN LOST

FIRE DESTROYS BUILDING AND GRAIN AT SCHLEI'S

Fire of unknown origin Monday night destroyed the corn crib and granery on the Elmer Shlei place Besides destroying the building Elmer's loss also included about 200 bushels of corn, and about 1,500 bushels of oats was also partly destroyed. A Ford, belonging to a party at Belmond was also in the driveway and went up in smoke.

DOINGS AT SCHOOL

NOTES FROM THE GRAMMAR DEPARTMENT

The Grammar Room took advantage of the beautiful autumn weather last Monday night when they held a "weinie" roast out in the country Several were unable to be present but those who attended reported a splndid time with lots of weiners, buns, watermelons and marshmallows to eat. The ever thoughtful Asa carried water from a neighboring farm house which was greatly appreciated by the rest. A similar event is planned when all can be present. The Misses Smith and Everest chaperoned.

The Eighth Grade are doing some very creditable work in language this year. Last Friday each member received an interesting magazine, article or event of history. Some of these were: "The Stone Forrests of South America," by Kermit Koerner; "Counterfeiting Extraordinary," Donald Gibbs; "Brief Sketch of the Life of Joan of Arc," Gertrude Johnson; "Life of Florence Nightingale," Ethel Wellemeyer. This is only a partial list but gives an idea of the variety of subjects and work necessary to have them prepared for the class. We think there are many budding orators in our class.

The class in American Literature are studying Howell's "The Rise of Silas Lapham."

The Freshmen will begin the study of Eliot's "Silas Marner," next week.

The new song books have come. More amateur singing to contend with.

HAS LATE INVENTION

BELMOND INVENTOR HAS WAY TO CUT COAL EXPENSES

Matt Holtzbauer, plumber at Belmond, recently invented a machine for turning gasoline into something like city gas. It does away with priming and lighting as does gas and there is no soot. It is now in use at the candy kitchen and seems to work perfectly with a hot blaze.

Johnson & Wright, the hardware men are investigating a contrivance to burn oil in the furnace.

Red Clergy Plan Live Church

Calls All-Russian Conclave to Decide the Fate of Orthodoxy.

TO GET CLOSER TO MASSES

New Movement Is Against Supporters of Old Byzantine Church Service Which Demands Splendor in All Its Glory.

Moscow.—The "Red clergy," led by a group of young men, held its first congress here early in August and discussed plans to establish a new "live church." It was contended that the church must be brought nearer to the masses, and that the "new church" should be as "simple and as humble as was Christ himself."

The aims of the "Red clergy," so-called because of its acknowledgment of the social revolution and the soviet internationale, include liquidation of the superiority of the regular clergy in Russian church affairs, doing away with the reactionary section of higher clergy who, it is claimed, are still hoping for a coup d'etat to sweep them into power again, and preparation of an all-Russian conclave at which a successor to Patriarch Tichon is to be elected.

Orthodoxy in Split.

The "Red clergy" group, headed by Archbishop Antonin and a number of young Moscow and Petrograd clergymen, came into existence as a result of a split among the Russian Orthodox clergy, brought about soon after confiscation of church treasures was started by soviet government officials.

Because of the opposition which developed among the ruling church authorities, a number of the clergy were prosecuted in various parts of Russia, even Patriarch Tichon himself having been placed on trial. Many sentences of death were imposed, some of which were carried into effect, and various other archbishops, bishops and clergymen were given jail sentences.

Realizing that the conflict between the state and the church threatened the very existence of the church itself, the group of young clergymen took the initiative and demanded the abdication of Patriarch Tichon. The patriarch yielded to the demands, and immediately afterward the movement of the "live church" was inaugurated.

Oppose Splendid Service.

The new movement, first of all, is against supporters of the old Byzantine church service which demands splendor in all its glory. It is contended that the costly miters of gold studded with jewels, the magnificent vestments, the priceless rugs, are too significant of aristocracy.

"In all this splendor," claim the young clergymen, "little room is left for the light of Christ's mercy and love." The church must be brought nearer to the masses—it should be "proletarized." And it is on these grounds that the "Red clergy" have recognized the revolution, its results, and the internationale.

The live church proposed also to clear the churches and parish councils of counter revolutionary clergy and to remove the vow of celibacy for bishops.

CARRY BABES 2,400 MILES

Man and Wife in Long, Weary Walk in Fruitless Search for Employment.

Rochester, Minn.—Completing a weary walk of 2,400 miles carrying two babies with them, Mr. and Mrs. L. C. Tofte of Tidewater, Ore., plodded into Rochester on what he said has been a hunt for a job. They did not find work here and Tofte, disconsolate and rather forlorn, says he will again start out with his family.

Tofte says they started from Oregon in May while he was out of a job, crossed the Cascade and the Rocky mountains and found no work. He says Mrs. Tofte sometimes fainted from exhaustion, but they stuck to the trail steadily.

"I've had some jobs along the way," said Tofte, "but it's been a tough struggle, and I don't know where it will end up. Well, let's go," he finished, speaking to his wife. He swung one of the children upon his shoulder, where the lad had ridden for hundreds of miles and with Mrs. Tofte and the other child following he set out on a new hunt for work.

C., when Daniel Carter Beard, national commissioner, was presented with gold eagle badge. 3—Gir Jackson, Cal., laying flowers on coffins of 46 victims of the Argonaut mine disaster.

Hunt Secret of Youth in Tibet

English Expedition Hopes to Penetrate Mysteries of Ancient Monasteries.

PRIESTS HAVE STRANGE POWER

Mission Expects to Find Rare Volumes Written Shortly After the Great Deluge—Are All of Buddhist Faith.

London.—The veil of mystery which shrouds Tibet and the forbidden city of Lhassa may soon be pushed aside.

Recently a group of English investigators left London for Tibet. There they hoped to obtain from Buddhist priests secrets of great and mysterious powers they are rumored to possess.

If the expedition succeeds it may mean a great step forward for the white race—or it may mean nothing at all.

The investigators are headed by D. W. M. McGovern. One of the principal rumors they will investigate is the statement that Tibetans have the power to lengthen the span of human life.

Know Secret of Youth.

It is said there are Tibetan priests who have been in the priesthood more than a century. It has been believed that the priests possess the secret for which Ponce de Leon sought in vain. Whether there is any truth in the belief is one of the things in which the mission is interested.

Another matter the mission proposes to investigate is the belief that Tibetan monasteries contain books written thousands of years before the art of letters was introduced into the western world.

It has been rumored that in some of these monasteries, where no white man has ever been allowed to enter, are rare volumes written shortly after the great flood, giving an authentic account of the great deluge. Thus far the white world has been compelled to rely upon the Jewish legend contained in the Bible and the legends of other peoples.

Wealth in Libraries.

London is confident the investigators will find material of great importance in the libraries, records which will clarify many puzzling chapters in the early history of the world.

Whether or not the mission will accomplish the great things expected of it remains to be seen. Tibet has never welcomed intrusion from the outside world. A few short years ago a white man took his life into his hands to visit the country.

In the last few years, however, the attitude of the country has changed slightly—perhaps on account of Great Britain's invasion.

One thing which will be in favor of the men composing the English mission is the fact that all connected are of the Buddhist faith. The leader is a Buddhist priest and as such will be able to get into much closer touch with the priests who guard the great secrets, if such they are than would one of the Christian faith.

The members of the mission are not so sanguine about finding a fountain of youth, but they do believe their investigations will be of great historical value. All this provided, of course, that Tibet allows itself to be "investigated." If not, about as much as the average tourist.

Big Blue Oval Meteor Found on River Bottom

Fergus Falls, Minn.—A dredge working in the river here, below the central dam, brought up a meteor two feet long and shaped like an egg. The meteor is blue in color, heavier than granite, and hundreds of pebbles are buried in it. Engineers say it must have struck the river while flaming hot, and the pebbles sank into it when it fell.

Wallaces Patronize Government Market

Secretary of Agriculture and Mrs. Henry C. Wallace caught by the camera at Center Market, Washington, where they go daily to make all food purchases for the Wallace family table. Center Market is the only one in the United States owned and controlled by the government through the Department of Agriculture.

PLAYS JOKE ON UNDERTAKER

Jersey Man Sentenced to Cut Grass in Library Grounds as Punishment for Hoax.

Belmar, N. J.—Because he played a practical joke on an undertaker, Harry G. Sykes was sentenced by Mayor William A. Bamford to cut grass in front of the public library.

Sykes was accused of calling by telephone Russell T. Hardy, reporting a death and asking him to take care of the corpse. When Hardy found he had been made the victim of a joke, he complained to the mayor.

REDUCE THE COST OF HELIUM

Government Makes Greatest Price Reduction on Record.

Cost Is Dropped From $2,000 to Nine Cents a Cubic Foot, and May Be Reduced to Five Cents—Only Plant in World.

Fort Worth, Tex.—The biggest price reduction on record has just been put into effect here by the government's helium plant. The cost has been cut from $2,000 to 9 cents a cubic foot! Even at that there is no crowd at the doors to take advantage of the great reduction. Experiments are now going forward to make the cost only 5 cents.

An immense warehouse at the plant has stored in it 2,000,000,000 cubic feet of helium. Two weeks ago two carloads of the product were shipped East for army use. The institution has been closed for six months, but recently resumed operation, congress having appropriated $800,000, which will keep the plant working for one year. When the plant is in full swing it is expected that 150 men will be employed there, and work will continue day and night.

This is the only helium plant in the whole world, giving this government a monopoly of the supply. Experiment has shown that only the Texas gas contains helium. Gas from other states and other countries, when tested, did not contain the element.

The Fort Worth plant was erected during the war and its first shipment was sent East before the war ended, but before it could reach France the armistice was declared. If the dirigibles during the war had been able to use helium, Lanham says military authorities informed him, the great conflict would have lasted no more than a year. On the other hand, if Germany had possessed this helium plant she could have sent her Zeppelins broadcast and destroyed cities in France and England without danger to the Zeppelins.

Cop Retires, Burns Uniform.

New York.—"Here goes all my hard luck," said Patrolman James J. Donahue of the Third Jersey City precinct, as he took off his uniform, poured kerosene over it, lit it and cast the bundle into a field near the Isolation hospital, where he had been stationed for the last few years. This episode marked the retirement of Donahue, after 20 years' police duty.

Dog Picks Up Dollar Bill.

Gettysburg, Pa.—William Zinkand, who resides along the Lincoln highway near here, has a valuable dog which he has trained to pick up objects.

Recently as the dog was walking along the road it found a dollar bill. Picking it up the animal brought the paper money to the Zinkand residence and laid it on the porch.

NEWS REVIEW OF CURRENT EVENTS

Allies Ready to Permit Turkey to Regain Her Former Territory in Europe.

KING CONSTANTINE OUSTED

Greek Army Compels Him to Abdicate and Declares for War to Keep Thrace—Federal Fuel Distributor Spens Gets Busy—Death of Senator Watson.

By EDWARD W. PICKARD

OWING to the military and diplomatic skill of Mustapha Kemal Pasha and his colleagues in the Turkish Nationalist government, and to the strong determination of the people of the allied nations not to embark in another war, it is practically certain that Turkey will regain the territory in Europe which she lost in the World war and probably a considerable part of Mesopotamia, now under British mandate. **Do you and your friends think the Turks are entitled to this restoration and are really no worse than most of their neighbors? Or do you believe it is worth another great war to keep them out of Europe?**

CONCILIATION and concession were the order of the day in the Near East. The allies, in formally inviting the Turks to a peace conference, assured them that they "will take advantage of this opportunity to declare that they look with favor upon the desire of Turkey to recover Thrace up to the Maritza river, and Adrianople." It was even intimated that Russia would be admitted to the conference, and M. Franklin-Bouillon, who last year negotiated an agreement between the Nationalists and the French, was sent to Smyrna with a mandate to deal with Kemal. The stipulation of the allies was that the Dardanelles, the Sea of Marmora and the Bosporus must remain free and open to all nations. The British also insisted that the neutral zone, which embraces the straits and Constantinople, must not be invaded by the Nationalists during the peace negotiations.

Early in the week Kemal gave a long interview to a correspondent of the Chicago Tribune, in which he said that he had no desire to provoke hostilities with Great Britain, but that he insisted on complete independence of the Turkish empire and complete freedom of the straits to all nations. He said Turkey had no wish to fortify the Dardanelles, but that she must control the Sea of Marmora and the Bosporus to secure the safety of her capital—Constantinople. On Wednesday the Kemalists announced they would respect the neutrality of the straits pending an armistice conference with the British generals. They then formulated their reply to the allied peace proposals. Not given to the public at this writing, this answer is understood to provide, among other things, that the Nationalists shall occupy all strategic positions prior to the opening of the conference; that all British forces en route be recalled and the British shall not fortify the neutral zone; that the Nationalists shall occupy Thrace before the conference, at which Russia, Ukrainia and all countries bordering on the Black sea shall be represented; that if these conditions are accepted, the Nationalists agree to an armistice conference at Mudania, which is to be followed in three days by the opening of the peace conference in Smyrna.

Meanwhile Kemal, who has freely expressed his distrust of the British and especially of Lloyd George, sent various units into the Asiatic part of the neutral zone and occupied strategic positions from which he virtually controlled the Dardanelles. The British commanders made several demands for the withdrawal of the Turks, but Kemal responded that he knew of no neutral zone. To the French he explained that he had occupied these places because the British had disregarded the neutrality of the straits by permitting the Greeks to have free passage through them.

REVOLT by the Greek army against the government, which was expected, came on schedule time. The troops that had returned from the scene of disaster in Anatolia and were concentrated in the archipelago islands rebelled and, using battleships and destroyers as transports, sailed to the mainland and moved on Athens under the leadership of regular officers of the army and navy. Military airplanes dropped in Athens proclamations demanding the abdication of King Constantine, the formation of a ministry friendly to the allies and the sending of reinforcements to Thrace. On Wednesday the cabinet resigned and Constantine formally abdicated the throne in favor of Crown Prince George, who was sworn in. For the present a revolutionary committee is in charge of the government. The object of the coup d'etat as announced in Athens was to oust Constantine in order to unite the country in firm opposition to the Paris conference's peace terms to Mustapha Kemal Pasha and to wage an immediate and aggressive war to retain Thrace. Army and navy leaders fully support the Thracian war, and they say they can take Constantinople.

THOUGH it had been reported that Bulgaria was ready to seize the part of Thrace which she claims, Dimitri Stancioff, Bulgarian minister to England, denies this. "Bulgaria is firmly resolved to avoid participation in any military action," said he, "not only because the country is practically disarmed, but also because the new Bulgaria is an agricultural country and does not wish to risk a repetition of her previous misfortunes."

SOVIET Russia formally declared herself the champion of Islam last week. She sent a note to the entente, the Balkan nations and Egypt demanding the restoration of Turkey in Europe and warning the world that she would not recognize "any decision concerning the Turkish straits taken without her participation or arrived at against her interests."

ACCORDING to an agreement about completed between the United States and Japan, the international technical control of the Chinese Eastern railway by the Stevens commission will soon be terminated. It is provided that the commission shall cease to function upon completion of the evacuation of Japanese troops from Siberia. The Chinese government is to be made responsible for the continued operation and protection of the railway, and if it fails in this, there will be a resumption of international control. The other allied powers are in accord with this plan. That is the news that comes from Washington. From Peking come reports that put another face on the matter. The president of China has suspended the Russian Boxer indemnity of about $5,000,000 annually and the soviet government, in its reply of protest, intimates that it will seize the Chinese Eastern railway. John F. Stevens, the head of the commission, according to a correspondent, is convinced the line is lost to China.

GREAT BRITAIN has offered to pay $50,000,000 of interest due the United States, and the World war debt funding commission has been considering the proposition. At the rate of 5 per cent, the interest due in the next two installments, October 15 and November 15, amounts to $95,000,000, but the funding law authorizes a rate of 4½ per cent, so it is suggested that the $50,000,000 be paid October 15 and adjustments be worked out with Sir Robert Horne, who is coming over soon. Congressman Burton of Ohio, who is a member of the funding commission, is in London, and at a luncheon attended by prominent financiers he said plainly that the United States expected Great Britain to pay in full. He pointed out that the loans made by America were not given out of an overflowing treasury, but were raised, sometimes with difficulty, by loans from the A people, who had no reason to that they would not be repa also drew attention to the A suspicion that if the loans w given the money thus release be used in new wars.

The American Legion

(Text for This Department Supplied by the National American Legion News Service.)

LEGION MEN ON HERO LIST

David O'Leary and W. W. Colton of Pasadena Post Rescue Victims of Explosion.

There came a deafening roar, and from the building gushed the strong odor of ammonia gases. David J. O'Leary, adjutant, and W. W. Colton, of the Pasadena, Cal., Post No. 13, American Legion, peered through the dark toward the post clubrooms.

"My God," O'Leary cried. "The boy scouts holding a meeting up there. And caretakers must be in there, too." The men ran into the building, fought their way through the deadly ammonia fumes, one in search of the caretakers, the other upstairs to the clubrooms, where the Pasadena boy scouts were holding their meeting. The boy scouts, acting with the coolness of nerve and calm discipline that are the result of their training, calmly were marching out of the building—and carrying, four of them specially detailed for the work, a crippled boy and a man who had been overcome. They had even remembered to pull a pillowcase over the stricken boy's head, and they carried him out to safety and revived him.

Colton and O'Leary, staggering, groping their way, searched for and found Mrs. Maude Woodburn and Mrs. A. Hare, the caretakers, who had been sleeping in their quarters in the building. They carried both women to safety. First aid treatment revived them. The two commissaires also resuscitated.

The post's clubrooms are over an ice plant and it was an ammonia tank in the plant which exploded. It was declared that if it had not been for the bravery of O'Leary and Colton the two women would have met death.

AUXILIARY WOMEN SET PACE

Under Leadership of Mrs. Rose Cravens, Missouri and Kansas Workers Conduct Benefit.

"Let's go," the rallying cry of the American Legion, went flying over Kansas recently when it was announced that the American Legion of Kansas and Missouri would take over the dedication of Kansas City's new $500,000 speedway, sharing in the receipts. Mrs. Rose E. Cravens, president of the auxiliary, sounded the cry to the members of the auxiliary in the state, and began immediately organizing flying squadrons of ticket sellers in every city and town of Kansas.

"We're working for the disabled men, and their dependents, and dependents of the dead heroes," Mrs. Cravens told the auxiliary workers, explaining that the two American Legion departments would realize $60,000 from the dedication.

The women responded with enthusiasm. Under Mrs. Cravens' leadership they conducted a campaign as strenuous as any held in war days. They gave of their time and energies to make the dedication a great success, and American Legion officials declared that the women of Kansas and Missouri were the men in their activity.

"BLESSED HAVEN" IDEA

Hasbrouck Heights (N. J.) Legion Post Establishes Retreat for the Convalescent Ex-Service Men.

The hiatus of loneliness and pain and weakness that often is the lot of the veteran as he leaves the operating room of a government hospital, before he can go to his home, is to be made one of pleasure and real help by the Byron Pennington Croker post of the American Legion at Wildwood, N. J. The post has established what is known as Blessed Haven, a home for the convalescent ex-service men. It is the only institution of its kind in the state.

As successful has Blessed Haven been and so thoroughly has it become what its name implies, that other Legion posts are contemplating the establishment of like retreats. It is planned to have them in the more thickly populated sections in order to bring the boys as close to their homes as possible.

TO AID LEGION'S AFFLICTED

Chairman of Rehabilitation Committee Shows Need of Care for World War Victims.

Many a former soldier boy is finding his old officers, who, like himself, have returned to the paths of peace, spending their time and energies and money fighting his battles for him these days, particularly those born of the war he helped to win. One of these has come to the forefront in smashing fashion in the national dispute between Brigadier General Sawyer and the national rehabilitation committee of the American Legion over the committee's claim of governmental neglect and obstruction in providing hospitals for the disabled veterans.

He is Humphrey McBride, former lieutenant colonel, of St. Louis, and chairman of the rehabilitation committee of District No. 9, comprising Missouri, Kansas, Iowa and Nebraska in the United States Veterans' bureau designation of territory. Following Sawyer's statement to A. A. Sprague, chairman of the national committee that "we now have hospitals enough except in two districts," Mr. McBride created something of a furore in making a detailed report of conditions in District No. 9, which was not one of the districts mentioned by the general, and supporting Mr. Sprague's strong claim that General Sawyer fails to comprehend the nature of the great problem the disabled present.

Mr. McBride quotes the government report of 1,348 beds available in Missouri for disabled veterans and asserts a careful check by his committee can locate only 1,143. He asserts there are 5,000 cases of insane with only 492 in hospitals, and that part of these are in contract institutions at an average expense of $300 a day without any supervision whatsoever over the care given them.

"There are 518 insane comrades who should be receiving the best of care, in Missouri, Kansas, Iowa and Nebraska," he declares. "They should be in hospitals. The district absolutely requires immediately up-to-date hospital facilities for treatment of 1,000 insane veterans.

"There is urgent need for satisfactory hospital facilities for 1,000 medical and surgical cases in order that the suspected insane or tuberculous veterans may be provided with observation and diagnosis, and that hundreds of totally or partially disabled veterans may be treated and re-examined as the occasion requires. There are, according to the actual records of the Veterans' bureau 6,000 ex-service men in this district suffering with tuberculosis; 191 are in hospitals within the district, 52 of them in contract hospitals, 139 in government loaned or leased institutions. Many more have been sent to the South or West far away from homes and families. This district imperatively needs two 500-bed hospitals located at points within the district, and easy of access."

GIVES HOSPITAL TEA PARTY

National President Legion Auxiliary Helps Celebrate Anniversary of Surgical Patient.

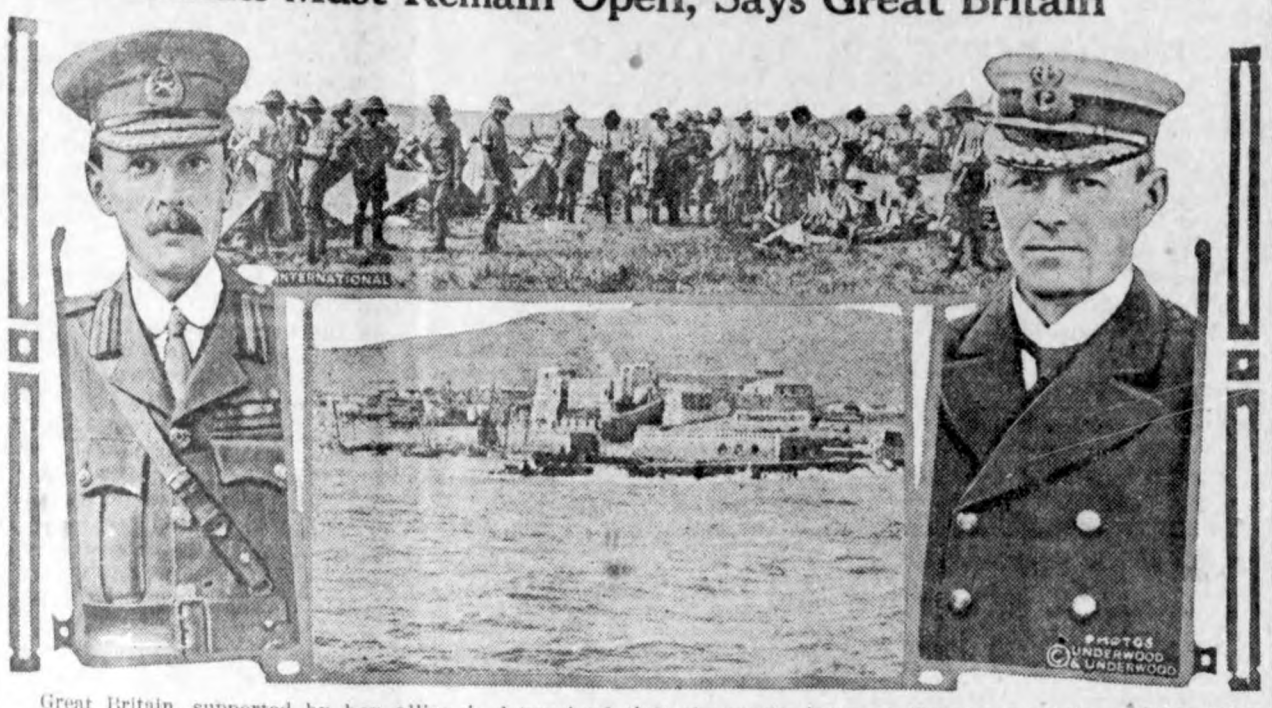
Jack L. Hamill of the Twenty-third infantry, Second division, had spent a year and a day in the Sacred Heart hospital in Spokane, Wash., when Mrs. Lowell F. Hobart, national president of the American Legion Auxiliary, visited there recently. He jokingly suggested a celebration of his anniversary as a surgical patient.

Mrs. John R. Neely, department president of Washington, and Mrs. Hobart immediately arranged a tea party for one, and the event was photographed, to preserve a souvenir for Hamill.

Tea Party for One.

This institution was one of more than a dozen that Mrs. Hobart visited in a six weeks' trip through nine western and Pacific coast states in June and July. In every hospital she reported finding that the Auxiliary women were welcomed by the veterans and by the authorities in charge.

Straits Must Remain Open, Says Great Britain

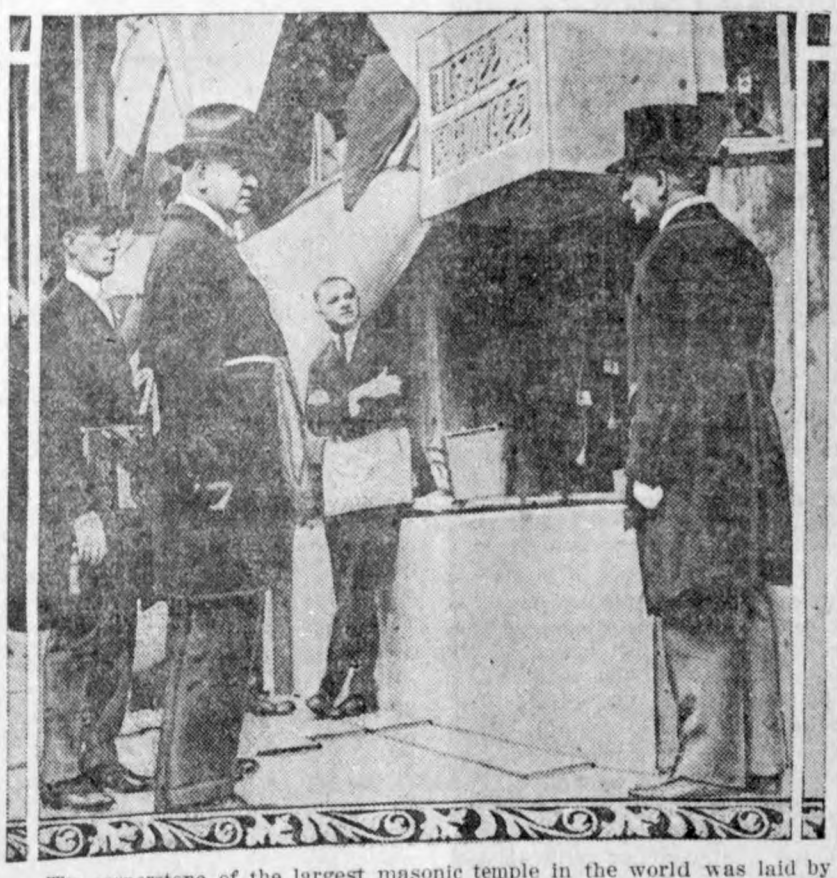


Great Britain, supported by her allies, is determined that the straits between Europe and Asia shall be internationalized, and until the League of Nations is given "teeth" with which to keep them open, Britain will keep control in her own hands. The illustration shows Tenedos island, dominating the entrance to the Dardanelles; British troops guarding one of the roads into Constantinople; at the left, Gen. Sir Charles Harington, commanding the land forces in that region; at the right, Vice Admiral Sir Osmond Brock, commanding the British Mediterranean fleet.

Horthy Rules With Royal Pomp

Admiral Horthy, regent of Hungary, rules with all the pomp of a monarch. Appointing officers for the army becomes a regal ceremony with all the trappings of the days gone by. Here the admiral is appointing an officer by tapping him lightly on the shoulder with the flat of his sword.

Denby Helps Lay a Corner Stone



The cornerstone of the largest masonic temple in the world was laid by master masons of Michigan the other day at Temple and Cass avenues, Detroit. Secretary of the Navy Edwin Denby, personal representative of President Harding, assisted Grand Master McKenzie in the ancient ceremony, which is one of the few rites of operative masonry still practiced by the world's largest secret order.

Girls Wade in Boston's Frog Pond

Can you imagine girls going wading in Boston's public frog pond? They did, the other day, but it was a part of the initiation of co-eds of Boston college into sororities, and the candidates peeled off their silken hose and waded into the cold water without a murmur.

LATEST PARIS GOWN

Paris first decreed stockingless legs, sleeveless gowns, and other such fashion extremes, and now comes the gown without a bodice, or at least with much less than usual. Our photograph shows Mlle. Rhahna, the beautiful dancer who has created a sensation in Paris with her new frocks, composed mainly of voluminous skirts and bodices of pearls and lace.

TACKLING A HUGE JOB

Walter C. Loudermilk, civil engineer and forestry expert, with his bride of a few weeks, photographed at San Francisco just before sailing for China. Loudermilk will tackle the stupendous job of reforesting China, thus bringing back the soil to productivity, preventing floods and famine and creating new industries that will employ millions of people. His wife was formerly Miss Inez Marks of Pasadena, Cal., for five years a missionary in the Orient.

ROMANCE IN WASHINGTON

Mlle. Paule Dumont, daughter of the French military attache in Washington, and Capt. Georges Thenault, aeronautical attache of the French embassy, whose engagement has been announced.

Home Town Helps

PEOPLE GROW MORE ORDERLY

Gratifying Improvement in Sense of Municipal Responsibility Shown in Recent Years.

Several years ago American cities cut a poor figure in respect to neatness compared with the cities of Europe. At present the comparison in disarray is not so unfavorable to this country. European cities have become less tidy—the war, of course, is to blame for this as for most other things—and American municipalities have become cleaner. At the present time, indeed, the littered condition of London and the English countryside is receiving much attention from the British press. The careless populace not only throws its newspapers into the public highway, but disposes of tin cans in a similarly informal manner. But American cities are still far from immaculate. For this reason the "clean-up weeks" and the creation of agencies which devote their energies to anti-litter work are hopeful signs. Improvement is certain. Anyone who has watched American cities for twenty-five years knows that men and women develop a municipal responsibility much more rapidly than is commonly supposed. Twenty-five years ago few free-born Americans hesitated to spit in public conveyances or public places. The inhibition that has developed in respect to this vice shows how rapidly personal habits can be improved. The day will probably come when the average citizen will be as careful about dropping his read newspaper in the street as he is now about spitting in a street car.

But there is still much opportunity for missionary zeal, especially among the crowds who spend Sundays in the public parks. Nothing would more eloquently portray the perfection of the civic conscience than an unlittered city park on Monday morning.—World's Work.

PLAN NOW FOR THE FUTURE

Too Many American Communities Have Failed to Foresee the Importance of Looking Ahead.

Most great cities have grown after a haphazard fashion, with narrow and often crooked streets, insufficient park and recreation space, overcrowded tenement districts and improvised means of transit. Occasionally they have been made over at great expense, as Paris was made over by Baron Haussmann under the Second empire; oftener they have groped their way blunderingly into greater and greater confusion. Washington is an almost unique example of a city that was deliberately and spaciously planned from the beginning.

But in recent years city planning has become a profession, and city governments have more and more become convinced of the advantages of intelligent study of their special problems. In Germany a great deal was accomplished before the war in improving and beautifying such cities as Berlin, Cologne and Nuremberg. Something has been done in England and something also in the United States, though oftener in new or small cities than in the larger ones.—Exchange.

Sow Grass in the Fall.

Springtime is commonly considered to be seedtime, but with lawns better results often are obtained by seeding at some other season. Except, perhaps, in the northern tier of states and in New England, says the United States Department of Agriculture, early autumn seeding is much more satisfactory than spring seeding. South of the latitude of New York spring seeding should rarely if ever be practiced. There are good reasons for this rule. Young grass does not stool well in spring and summer and is not sufficiently aggressive to combat crab-grass and other summer annual weeds. In the area south of this and north of the Potomac and Ohio rivers the time is early September. The reseeding of an old lawn should be done at the same season as new seeding.

Save Trees When Possible.

One of the unfortunate results of urban growth is the destruction of fine trees which have sheltered generations of young villages only to be sacrificed at last to make room for a few yards of asphalt or to obviate the necessity of deflecting a concrete sidewalk. Often, of course, it is impossible to save a venerable elm or maple or oak which gets in the path of business expansion, but not infrequently these fine old veterans of a hundred years' war with the elements are slaughtered ruthlessly.

Tree Selection.

There is a popular notion that oaks cannot be domesticated, but I have a burr oak 30 feet high that I planted as a six-inch seedling just 20 years ago, writes a correspondent of the Chicago Daily News. A red oak in my lawn I planted when three feet tall, and it has kept pace with Norway spruce set at the same time, furnishing with its brown clinging foliage in the winter no less charm than the green of the spruce. The hickory is perhaps the shyest of domestication, but treated rightly it is a rapid grower

The Klemme Meat Market

Ask Him "How"?

Ask any man of wealth how he acquired his money, and his answer, ninety-nine times out of a hundred, will be something like this:

"I learned early in life to spend less than I earned. Systematically I set aside a part of every pay-check and put it into an interest-earning savings account. When the 'Big Opportunity' came my way I was in position, financially, to grasp it."

Barring unusual and unforeseen contingencies, every man can save part of his regular income if he has definitely made up his mind to do so.

First National Bank

"The Bank for Everybody'."

WITH THAT FIRST MILLION

Harold Hope Has Planned to Have Many Things, but the First Is a Marble Swimming Pool.

"When I make my first million," said Harold Hope carelessly, "I'm going to build my house."

Harold has so many things to do when he makes his first million that there is some anxiety in the minds of his friends as to whether the money will suffice to pay for them all. A million doesn't go so very far nowadays, you know, observes a New York Sun writer.

"My house," continued Harold, undisturbed by any doubts on that score, "is not going to be like other people's houses. Oh! it's going to be a very original house in many ways. And the one feature of it that I delight in more than anything else about my house is the swimming pool.

"I've always from childhood wanted to have my own private marble swimming pool, with a tame seal in it to skylark with me when I take my plunge. And my dream is going to be realized when I make my first million and build my house. I haven't quite decided whether to have a seal or a sea lion. Whichever I select, I'll probably end by getting a pair of 'em."

Harold's eyes kindled at the thought, and he exclaimed:

"Won't it be wonderful to have those beautiful animals to sport with in the water? You see, a seal swims for enjoyment. It swims for business, too, of course, but when it hasn't any business to swim it just swims for enjoyment. If you watch 'em in their tanks at the aquarium or the zoo you'll see that they take a positively voluptuous joy in their element.

"There's an infinite graceful abandon in the air with which they circle round and round on their backs, or go plunging like porpoises, making a tremendous splash, playing tricks on each other and then at intervals rearing themselves out of the water, pointing their noses as high as they can, and trying to look as if they never broke a plate.

"And the sea lions have the most beautiful eyes in the world, bar none—I don't even except the giraffes, the llamas or the antelopes. And they're very gentle when you domesticate 'em and train 'em. I bet they'll enjoy having a master who swims with 'em every day. Of course I'll get young ones and break 'em in gradually to swimming with me.

"You see, I'm very much the same class of swimmer as the seal family. Maybe I was a sea lion in my last life. Anyhow, I make myself one with the water, just as the seals do. I love to slide lazily down among the roots of the water lilies, and mosey around below the surface with a very seal-like joy in the element. And I look forward to having great games with my pet sea lions when I bathe in my marble tank in the house I mean to build when I make my first million."

Max Was Cautious.

After refusing the slightest assistance to the writer of a book just issued entitled "Max Beerbohm in Perspective," Max continues in the course of his letter: "I remember several books about men who, not yet dead, had blandly aided and abetted the author; and I remember what awful asses those men seemed to me thereby to have made of themselves. Two of them were rather great men. They could afford to make awful asses of themselves. I, who am 100 miles away from being great, cannot afford such luxuries. My gifts are small. I've used them very well and discreetly, never straining them; and the result is that I've made a charming little reputation. But that reputation is a frail plant. Don't over-attend to it, Gardener Lynch! Don't drench and deluge it! The contents of a quite small watering-can will be quite enough." And then comes this cautionary advice: "Be judicial. . . . Don't, by dithyrambs, hasten the reaction of critics against me. Tend rather to underrate me—so that those who don't care for my words shall not be incensed, and those who do shall rally round me."—Boston Transcript.

Cars Pulled by Balloon.

Hochstauffen, near Bad Reichenhall, in Germany, will soon have one of the most peculiar railways in the world. It will run up a steep mountain side, and will be operated by a balloon.

The mountain is so steep that no ordinary way of locomotion would do, so it has been planned to hitch a balloon to the car that makes the up trip, and have it practically lift the car to the top of the hill. But the car will be held to the earth by clamps that will retain the wheels close to the rails, and the upward tendency of the balloon will furnish the power.

The big bag of gas will be 67 feet in diameter, and will have a lifting capacity of about 10,000 pounds.—Milwaukee Sentinel.

Woman Radio Expert.

One of America's foremost women radio experts is Mrs. Charles E. Cutter, of Tacoma, Wash. Mrs. Cutter was one of the first women wireless operators. For some years she was engaged as a radio instructor and now she is actively interested in a radio manufacturing company.

Cause for Joy.

Ted—There must be some subtle charm about being a first nighter. I've often noticed what a happy bunch they are.

Ned—Why not? Those fellows generally get in on a free ticket.

Autograph letters, trinkets and other articles associated with Franz Liszt have been brought to this country by Rudolph Siegel at the request of the composer's heirs, remarks the New York Herald, for whose benefit they are to be sold.

Included in the collection of eighty items is a death mask and a lock of Liszt's long gray hair. The genuineness of the latter is attested by Lena Schmalhausen, who was the housekeeper at the Liszt home at the time of his death, in 1886. The cast, which is in a glass case, is in excellent condition. A prayer book, much used and worn by the great composer, is an item closely woven with his life as the two presentation books given to him on his seventieth birthday, October 22, 1881.

One of these books contains many autographs of musicians who were famous during this period. In it Hans von Bulow, eminent pianist, is represented in two separate autographed notations. Translated from his script, which is in German, they read: "As soon as we artists are able to emancipate ourselves from the plebeian vice of envy and fear we will be enabled to consider ourselves the pinnacle of aristocracy and music as photographic reproduction of the acoustics of eternity."

Thirty letters in French and thirteen in German comprise the collection of letters, among which is correspondence from Theresa Carreno, Carl Tausig and Pablo de Sacrasate.

Rats Infest English Town.

A Nottingham (Eng.) municipal medical officer has this to say about rats in his city: "A half million rats, some two feet long and weighing two pounds, inhabit the prehistoric subterranean passages of the city. They would attack elephants. They have killed and devoured mongooses, ferrets and wildcats, and men do not dare invade their haunts. An underfed female cat alone is superior to a big rat. The city tried poisoning them, but the rats quickly discovered the food was tampered with and they refused to eat it." Asphyxiating poison gas has been suggested to rid Nottingham of the horde of rodents.

United States Land of Phones.

At the end of 1921 there were 13,280,000 telephones in residences and places of business with which any Bell sysem telephone can be connected. The United States, with only one-sixteenth of the population of the world, has two-thirds of the world's telephones. The average daily exchange and toll connections amounted to more than 35,000,000, or a total of 12,000,000,000 calls for the year.

Distinguished Organization.

The Knights of Honor, an organization of holders of the three congressional decorations for valor, has opened headquarters in Seattle, Wash. The organization is open to winners of the Medal of Honor, Distinguished Service cross, and Distinguished Service medal. More than 5,000 persons are eligible for membership.

PET SUPERSTITIONS

Thousands of intelligent people have their favorite superstitions.

—

When the left hand itches it's a sure sign you are going to have money come to you. It always itches a day or so before pay day, and the proper thing to do when the left hand itches is to rub it on wood, and you'll get something good.

—

If you spill salt you're sure to have a row with someone unless you throw some of the salt over your left shoulder.

—

When you see a spotted cat or a pinto mustang, make a wish and your wish will come true.

—

Never set your shoes on the top of anything or you're likely to be disappointed.

—

If you give a friend anything sharp as a gift it will cut friendship.

—

In walking with a friend allow nothing to come between you and your friend, for it might part friendship.

—

Never walk under a ladder; it's unlucky; especially if the ladder happens to fall on you.

—

It is said that three lighted lamps left in a row are a sign of death.

—

Wisacres claim that a child born with a veil is likely to become rich.

—

Old-fashioned farmers planted in the dark of the moon.

—

Unless a child falls out of bed during its babyhood it's likely to grow up an idiot, although the fall may cripple it for life.

—

A "newlywed" must wear out his wedding clothes before he can expect to prosper.

—

Those who whistle at night talk with the devil.

—

A female child that resembles its father is sure to be lucky.

—

A broken looking glass will cause seven years of bad luck.

FLASHLIGHTS

The best way to train a boy is to set him a good example.

—

In order to die rich some men make their families live poorly.

—

The trouble with the near-great is that they're not near enough.

—

The best politics and the best religion today is to be a patriot.

—

The man who does his best is usually the man who gives his best, too.

—

The man who is his own worst enemy certainly lives up to the injunction to "love your enemies."

Dreaming of Writing.

To dream that you write with a denotes good luck; with a quill, health; with a stick, firmness of pose; with a pencil, warns you of cret enemies. To dream of writi letter foretells good news; a bill, accusation.

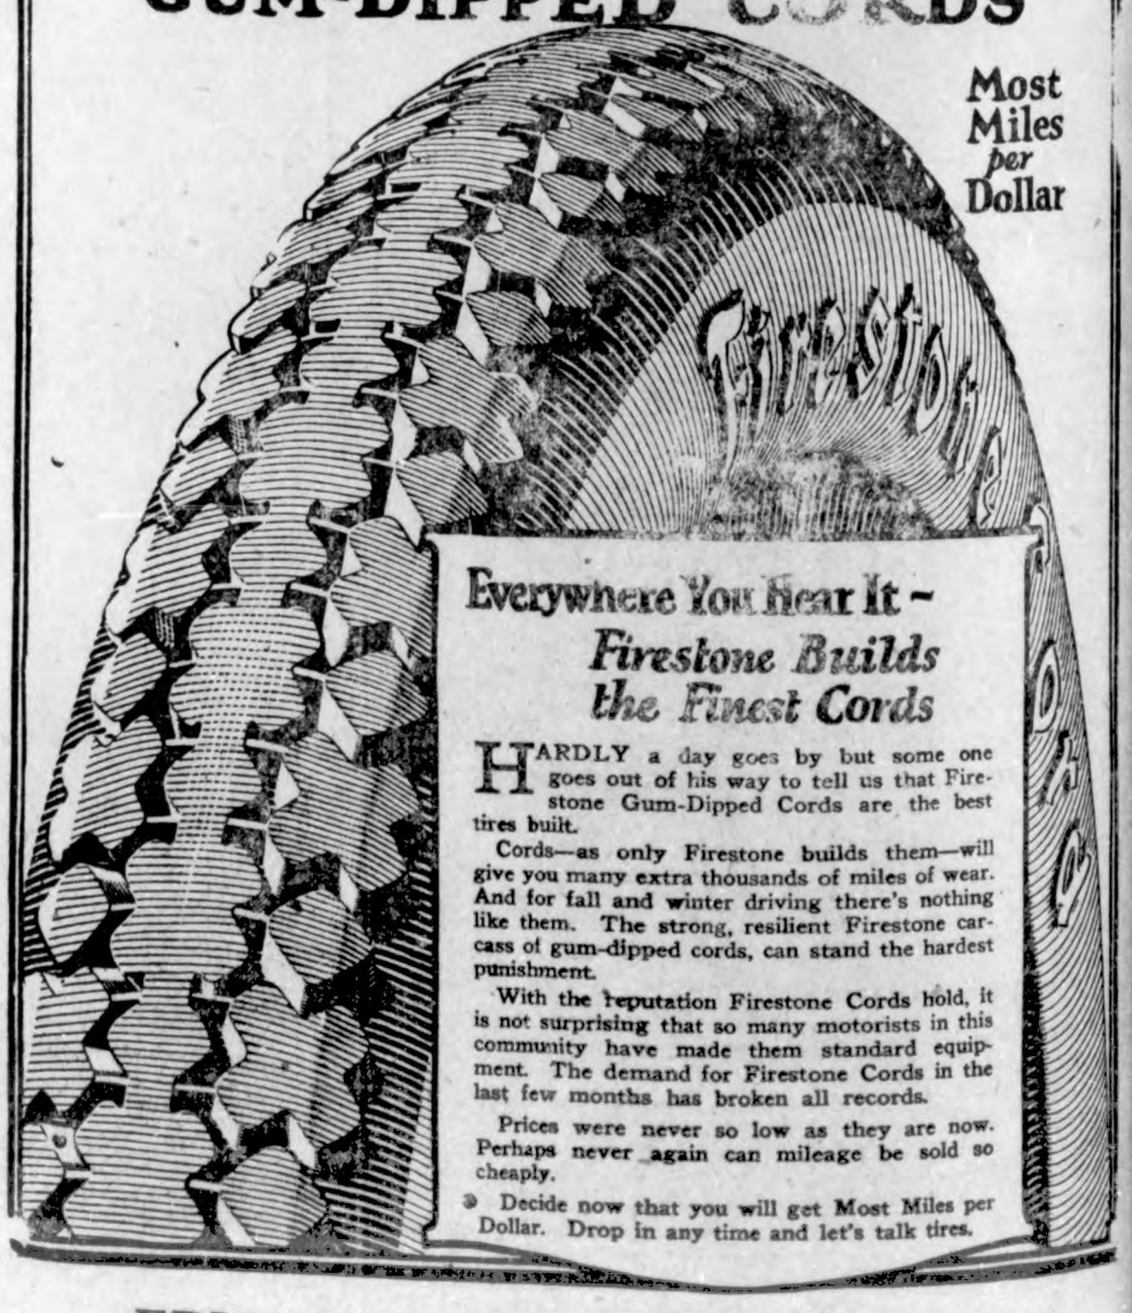
GUM-DIPPED CORDS



Everywhere You Hear It—*Firestone Builds the Finest Cords*

HARDLY a day goes by but some one goes out of his way to tell us that Firestone Gum-Dipped Cords are the best tires built.

Cords—as only Firestone builds them—will give you many extra thousands of miles of wear. And for fall and winter driving there's nothing like them. The strong, resilient Firestone carcass of gum-dipped cords, can stand the hardest punishment.

With the reputation Firestone Cords hold, it is not surprising that so many motorists in this community have made them standard equipment. The demand for Firestone Cords in the last few months has broken all records.

Prices were never so low as they are now. Perhaps never again can mileage be sold so cheaply.

Decide now that you will get Most Miles per Dollar. Drop in any time and let's talk tires.

DRAINAGE NOTICE

Hearing on Establishment of Drainage District Number 116 petitioned for by Frederick Klinge et al.

STATE OF IOWA)
)ss.
Hancock County)

To Frank Ptacek, Mary Ptacek, George Houdek, Herman Lemke, John Heginger, Frederick Klinge, Petronella Wellik, Vaclav Zeman, Frank Houdek, Fred Houdek, Herman Knop, F. M. Hanson, J. F. W. Vrba, B. F. Benson, Frank Tusha, T. B. Erwin, F. S. Livermore, Charles Johnson, Erick Josten, Erich Josten, Wm. C. A. Gast, William H. Kraus, Eveline D. Morehouse, E. S. Ellsworth, L. E. Jones, W. H. Kraus, Helen Braund, W. C. Wells, The Travelers Insurance Company, F. D. Schwartz, W. C. A. Gast, William Fritsch, Esther Kleist, The Prudential Insurance Company of America, First Trust Joint Stock Land Bank of Chicago, AEtna Life Insurance Company, Frank C. Hrubes, George Merkle, William Stork, First National Bank, Klemme, Iowa, H. J. Stromer, Clerk of Liberty Township and to Trustees of Liberty Township and to all other persons in anyway interested in any of the following described real estate situated in said district, Hancock County, Iowa.

SE SE; SW SE; Section 7, all in Township 95—24., SW SW; SE SW; NE SW; SE NW; SW SE; NW SE; Section 8, all in Township 95—24., SW NW; Section 16 all in Township 95—24., SW SW; NW SW; Section 16, all in Township 95—24., NE NE; SE NE; SW NE; NW NE; Section 17, all in Township 95—24., NE SE; SE SE; SW SE; NW SE; Section 17, all in Township 95—24., NE SW; SE SW; SW SW; NW SW; Section 17, all in Township 95—24., NE NW; SE NW; SW NW; NW NW; Section 17, all in Township 95—24., NE NE; SE NE; SW NE; NW NE; NE SE; SW SE; NW SE; NE SW; SE SW; SW SW; NW SW; SE NW; SW NW; Section 18, all in Township 95—24., NE NE; SE NE; SW NE; NW NE; NE NW; SE NW; NW NW; NE SE; Section 20, all in Township 95—24., SW NW; NW SW; NW NW; Section 21, all in Township 95—24., NE SE E of Ditch; SE SE; Section 13, all in Township 95—25., all roads and highways included within the watershed of the district.

You and each of you are hereby notified that on July 16, 1920, there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district AND that a system of drains be constructed for the relief of said district.

You are further notified that on July 26, 1920, A. J. Lilly was appointed Engineer to make a survey, plat and profile and field notes of said proposed district, and that on March 2, 1922, said engineer filed his report recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said county and may be amended at any time before final action is taken thereon by the Board of Supervisors, and that November 15, 1922 at 2:00 o'clock P. M. has been fixed as the time of hearing thereon. All objections and claims for damage must be filed in the office of the County Auditor not less than five days before said hearing.

Witness my hand and official seal at Garner, Iowa, this 27th day of September, 1922.

CHRIS JACOBS,
Auditor of Hancock County.
(SEAL) Oct.-12-19

ANNIVERSARIES SAD TO SOME

According to Professor, Those of Victories Recall Bereavement; While as for Tin Weddings—

"There is always an element of sadness in the celebration of an anniversary," remarked the professor, laying down his paper with a sigh.

"How can you say anything so pessimistic? Why, I think anniversaries are just lovely!" cried his wife.

"Only when we succeed in forgetting that they are anniversaries," retorted the professor. "The very fact that they remind us of the inexorable passage of time gives them a fundamental sadness to begin with but that is not what I meant.

"I was thinking of Mothers' day with all its reminders of bereavement, and then it suddenly occurred to me that the original occasions of almost all annual celebrations contained sadness for somebody.

"The other day came the anniversary of Sherman's march to the sea. With what feelings do you suppose that reminder is received by survivors of the unfortunates who lived in the great general's devastating path? And so it is with the anniversaries of all battles and victories. Even the rejoicings of the victorious side are tempered with the sorrows of those who lost sons in the conflict."

"Some anniversaries are sad," confessed the professor's wife, "like Memorial day and Good Friday, but most of them are awfully happy, like Christmas and the glorious Fourth."

"Please don't remind me of those most melancholy festivities, Isolde," groaned the professor, "with their artificial and unwholesome stimulation of the young and their inescapable depression of the—er—middle aged."

"Well, at least you will admit, dear," said Isolde, "that wedding anniversaries are happy occasions."

"Ghastly!" cried the professor. "I never remember being so wretched in my life as I was at the tin wedding you insisted on our inviting our friends to. Really, my treasure, I trust you will never do that again."

"Of course not," said Isolde sharply. "We couldn't have another tin wedding, but we'll have a silver wedding when the time comes, and meanwhile I think we'll be having an aluminum wedding, or a silk wedding, or—in fact, just as many anniversaries as we are entitled to."

"Heaven help me!" cried the professor. "For my part I feel with the poet that, 'The holiest of all holidays are those kept by ourselves in silence and apart. The secret anniversaries of the heart!'"

LAYS WORRY ASIDE

"Uncle Jim" Unaffected by Cares of the Day.

"Squatter" in New York City Has Permanent Home and All His Modest Needs Supplied.

In New York, where the high-cost-of-living specter haunts the millions and some millionaires, possession by a penniless man of health, happiness and a home on Riverside drive, with acres of front lawn, is perhaps an accomplishment without precedent. Yet, for 22 years, "Uncle Jim" Miller, Manhattan's oldest, if not only real "squatter," has enjoyed these things as a result of:

"Just believin' in God."

Uncle Jim is a negro who, on February 10, entered upon his seventy-third year, and is today smilingly confident that he will live beyond the century mark without the loss of his health or physical activity. His theory is that God will take care of anyone who trusts Him, although he does not quite carry this belief to the point of a lily-of-the-field existence, and admits that his health has been and will be maintained by his physical efforts in gathering, cutting and sawing wood for his winter fires, doing his own washing and cooking and otherwise keeping his house in order.

In 1900, when what is now his front lawn was marsh land almost on a level with the Hudson river, "Uncle Jim" was employed by a contractor named Conway as one of a number of laborers who were to fill in the marshes lying along the Hudson's east bank. He was provided with boards for a little "shack" which he built with its back against a huge boulder. Then he aided in filling in what is now his front yard. When the work was completed and the contractor and his men moved, "Uncle Jim," having staked his claim, as he says, decided to "squat" there indefinitely.

Conway said it was all right with him, and since then various owners of the property have given tacit consent to his remaining. As his lawn is filled-in-land, hardly suitable for the foundations of houses, the old "squatter" feels secure in his possession.

The one-room shack is now strengthened on the river side by sheets of tin which resist the winter blasts. Within is a stove, some cooking and eating utensils and a cot, but "Uncle Jim" spends most of his time outdoors. From the Hudson he obtains crabs and fish for his meals, and an odd job now and then brings sufficient change with which to buy bread, coffee and tobacco.

"When I came here," said "Uncle Jim," "this was all a wilderness. I always liked to rough it, and I never in my life worried about anything. I'm happy and never was sick a day. I get all I need, and this is the kind of life I like—so why shouldn't I be thankful?

"I don't want any better home than this, and I don't need any more money to live as I do here. I want to be outdoors all the time. At night I read a little by lamplight. I never wore glasses, and lately I think I am getting my second sight—I can see better than I did a short while back."

As he talked "Uncle Jim" sat in front of his shack smoking a pipe that appeared to be almost as old as its owner, and quite as strong, and smiling broadly, a perfect outpicturing of his peculiarly serene mental make-up.

Bologna and Sausage Alike.

When is a sausage not a sausage? When it's a bologna.

This puzzling question was decided, and then again it was not, recently by the Hoboken (N. Y.) zoning commission. Just when it looked as if there was much difference between a sausage and a bologna it was decided that, both of them wearing tights, they were the same thing.

It was an important question in Hoboken. It arose over the application of George E. Herold, 85-87 Jackson street, for a permit to erect a plant for the manufacture of smoked ham, general provisions and bologna. The zoning ordinance of Hoboken forbids the manufacture of sausage in the business zone. There was much discussion and it seemed for a time as if the matter might reach serious proportions when Building Inspector Joseph Cummings finally definitely decided the question.

"They both wear tights, and that makes sausage and bologna the same thing," he said. The permit was refused, but decision was deferred until the next meeting.

Rivalry in Crying.

It was Edward's first year at school and the teacher, finding one day that he had not mastered his lesson properly, told him to remain after school and she would help him. When the time for dismissal came and Edward saw the other children leaving he thought he was being punished by being kept in and he began to cry. The teacher in an effort to quiet him said, "Edward, I never heard such loud crying." Edward stopped and looked at her through his tears and said: "Well, you ought to hear my brother Donald, he's got me skinned a mile."

Women Conduct Church Service.

At the East End Methodist church at Montreal on a recent Sunday the entire service was conducted by women members. They acted as ushers also, and furnished the musical program, while the pastor of the church sat with the congregation.

Uncommon Sense . . .

By JOHN BLAKE

KEEP BRAKES IN ORDER

AT THE approach to every dangerous turn of a state road is a sign which reads:

GO SLOW.

The automobilist who has keen sense and good brakes heeds the warning. He gets around the turn without anything happening to him.

The speed maniac, or the man whose brakes are out of order, keeps right on. And we usually read of one or both in the accident columns of the newspapers, sooner or later.

The road we all must take is pretty well marked with warnings, although it takes experience to read some of them.

If we have the brake called will power, and keep it in trim, we have nothing to fear from the dangerous places.

If our judgment is bad and our will power likely to give way we never get where we are going, except in a very badly damaged condition.

There is no occasion for such great hurry that the warning signs must be over-run.

On the road to wealth, and especially the road to pleasure, the warnings are very abundant.

Yet thousands and thousands of people run past them every day, with the usual disastrous results.

There is little enough time in the average life. We must all work rapidly if we are to get a good lifetime's work accomplished in the working years that are allotted us.

But we can always slow down at the risky corner, provided we keep our will power in condition, and use the judgment that ought to be a part of our make-up.

The "too much play" turn in the road is more dangerous than the "too much work" corner, but it is well to slow up at both of them.

Then the "overindulgence" and "late hour" spots call for almost a halt.

Read all the signs and observe them.

It is delightful to speed along the road and feel that we shall get where we are going in jig time.

But many speeders who do not see or heed the warnings, never get where they are going at all.

And when they are piled up in the hospital or the sanitarium or told by a grave-faced doctor to bid their families a last good-by, they begin to see the sense in stringing these signs along the road, and to wish they had kept their brakes in order.

KIDDIES SIX

By Will M. Maupin

NOD-A-VILLE

TO THE quaint old town of Nod-a-Ville,
Out there in the Sundown West;
Just over the crest of Slumber Hill,
Where the evening shades lie cool and still,
And the birds have gone to rest—
To a quaint old house on Quiet Street,
Deep shaded by Sleepy Tree,
While the sighing breeze sings low and sweet
My babies three—with me.

Dick-e-Dum marches with air sedate,
And Margy-ree—half-past two—
Waddles along with a queer-toed gait,
Worried for fear that she may be late,
And the dark blot out the view.
But Charlotte May—brand-new you know—
She couldn't climb Slumber Hill—
So she rides a knee the journey through,
And the only comment she makes is "goo-goo,"
On the way to Nod-a-Ville.

In the quaint old house they softly creep
As the sun sinks in the west;
And kneeling there in the silence deep
They whisper their "lay me down to sleep,"
And in God's strong arms rest.
O, Nod-a-Ville! Through all the night
May angels watch o'er thee;
And when the morning has dawned clear, bright
Send back their faces rosy alight
My babies three—to me.

SCHOOL DAYS

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm

ILLNESS SHOWN IN THE HAND.

TROUBLES with the throat are indicated in the hand by nails that are moderately long, but are thin and brittle. Typhoid fever may be dreaded if there is a small square on the line of life, with a St. Andrew's cross inside, and generally with a bluish dent. Wounds are shown by spots on the line of the heart, and the line of the head will be seen to be broken under the line of Saturn, in both hands, with the two fragments overlaying each other. A wound inflicted in a fight has its mark or sign in a spot on the upper mount of Mars, and if there are fine lines on the mount of Jupiter (at the base of the forefinger), with a star at the line of the head, we may foretell or read a wound in the head.

It must be remodeled, of course, that while the hand affords many valuable indications of illness, past, present, or to come, these signs should never be used to supersede or supplant diagnosis by medical experience. Palmistry is not a science sufficiently exact for that.

Mother's Cook Book

Mothers feel more keenly than all others that they have given hostages to the future. They know that they are wrapped up in the welfare of posterity. If that influence fails, there is no influence for good that can succeed.—Coolidge.

GOOD THINGS FROM CARROTS

THERE are many housewives who make a practice of canning a few jars of tender young carrots to use in the winter. These are especially good for little children, as they lack the tough fiber of the vegetables that are used for winter.

Carrot Soup.

Take one cupful of cooked carrots pressed through a sieve, add two tablespoonfuls of butter, one tablespoonful each of onion juice and minced parsley. Cook one tablespoonful of butter with one of flour and add to a pint of hot milk, stir in the other ingredients and serve hot.

Buttered Carrots.

Shred carrots with a potato cutter into shoe strings, cook until tender in very little water, adding butter, lemon juice and a grating of nutmeg with salt and cayenne to season. Serve very hot.

Carrot Catchup.

Take one pint of diced carrots cooked, three green peppers chopped, removing all white fiber and seeds, two medium-sized onions, one teaspoonful of mustard seeds, one cupful of sugar, three-fourths of a cupful of vinegar, one teaspoonful of salt and one-half teaspoonful of paprika. Cook all together until thick.

Carrot and Apple Butter.

Take one pint each of grated raw carrot and tart apple, two cupfuls of sugar, the grated rind and juice of lemon. Cook all together until thick. Seal in hot jars.

Carrot Salad.

Put through the meat grinder enough tender carrots to make a cupful, add one-half cupful of finely diced apple, two tablespoonfuls of minced walnut meats, a tablespoonful of grated onion, salt and cayenne to taste. Mix with a highly seasoned dressing and serve on lettuce.

Something to Think About

By F. A. WALKER

THE GARDEN INVISIBLE

SINCE the first memorable day in which you ventured forth with a fluttering consciousness of your wonderful capabilities, to show the old world that it could never hope to make permanent progress without your help, you have, let it be said, with due allowances, been digging, planting, raking and watering in the garden invisible.

And this is your garden, your very own.

Everybody in this storm-troubled sphere has one, so you are no exception. The sunbeams play hide and seek, and the storms beat at regular intervals, as the gods will. And strange to say, you carry this garden with you wherever you go.

Yours is not a coward soul, yet it lacks courage to take your friends into this particular garden and show them the result of your achievements.

You are a little abashed at the noxious plants that spring up in the night, and often left standing to gather strength to crowd out the good and the beautiful.

Failing in this you begin to fail in yourself.

So here is where your sorrows take root and overwhelm you with fear in the season of ripening fruit.

Year after year you have been carelessly sowing and reaping only a handful. Time has flown by on silent wings. You failed to take note of its swift flight, and instead of giving attention to your own work, you meddled with the work of others.

You yielded to temptation, indulgence, idleness and made a frightful picture on the face of the soil intrusted to you to cultivate.

As autumn comes you gaze on the scene with an overpressing sense of neglect and a sickening humility.

The sun and the showers were faithful to their trust; the soil was rich, capable of bringing forth the choicest fruits of wealth and happiness.

Beside your forsaken garden is your neighbor's, radiant with flowers and golden fruits. While he was doing his duty, working faithfully at his given task, and later giving work to others, you were faithless, grumbling and negligent, as is evidenced by your garden, filled now with worthless, withered weeds, taunting and mocking you in the evening of your given day.

Silks and Velvets Popular; Winter Hats Now Appear

FOR afternoon and evening dresses, fashion at present seems to have eyes only for silks and velvets in lustrous, and often intricate, weaves. These new weaves bring to designers fabrics that are rich and elaborate, but continue to be supple and clinging, as they must be to keep up with the enthusiasm for draperies.

The new fabrics merit study; some of them are printed in raised designs, others have surfaces described as "blistered," "fluted" or "crinkled," they are all descendants of the metalasse of other days.

In the face of all these charming debutantes among fabrics, satin charmeuse and crepe de chine continue to lead the procession of beautiful fabrics for fall. Other things may come and go, but they seem destined to go on forever—too fascinating to be neglected.

The handsome and very interesting afternoon frock pictured might be developed in any of the new fabrics, but it is shown made of brown charmeuse. It is a masterpiece of beautiful draping. It has a tunic, with uneven hemline, merging into long ends at each side, and into a crushed girdle, of the satin. The tunic falls over a draped underskirt and, the plain, long bodice has large, flaring sleeves and a chic bateau neckline. Cord, covered with the satin, is used for making ornaments that embellish the sleeves and each side of the girdle. The same cord makes a border for the neck line.

When Tennyson sang of "the splendor dear to women" he revealed his insight into one of their oft-returning moods; they betray a love for splendor every once in a while.

In millinery, and especially in winter millinery, there is a chance for a bit of splendor for everyone. Fabrics are rich, brocades and metal tissues are dazzling, plumage is gorgeous, embroideries and trimmings draw inspiration from Persia and India (and we look to the East for splendor). A little group of four hats, shown herewith, reflects that regal note that appears in all the styles. The velvet-covered shape at the top of the group, in dark brown Lyons velvet, becomes the background for a royal parrot in heavy cord, covered with taupe velvet, and large satin-surfaced beads in the same color.

Interesting Afternoon Frock.

At the bottom of the group a fine felt heralds the return of these lovely hats. It is a tailored model with a very ingenious trimming of folded ribbon about the brim edge and a sunflower rosette, made of the same folded ribbon, posed on the crown.

Group of Winter Hats.

Adrift With Humor

SPEAKING ILL OF AN INN

"If I owned this hotel," said the irate guest, I'd,—I'd—"

"Well, what would you do?" asked the proprietor of the Eagle house.

"I'd turn it over to a friend of mine who's an entomologist. Know what that means?"

"No."

"A bug expert. I believe he could study all the known varieties, and some new ones, without getting off the premises."—Birmingham Age-Herald.

Appearances.

"Your constituents say you are over confident with reference to the coming election."

"That's the impression I desire to create," confided Senator Sorghum. "But you may rest assured that my personal nonchalance is an outward appearance to which my busy campaign managers will pay no attention whatsoever."—Washington Star.

What It Meant to Her.

"How strange," murmured the sweet young thing, as she looked the interior of the bank over with a critical eye, "how strange."

"What is strange."

"What is strange?" asked a bystander.

"That sign over there. Why don't they make it read 'Information' instead of 'Teller'?"

NOT EXACTLY

"My son is a bank runner."

"Do you mean he runs a bank."

The Baby Show.

They had a baby show.
The babies ran neck and neck;
The winning baby's a perfect kid,
But the judge is a perfect wreck.

Sarcasm.

"Are you going to have a brass band at your next political rally?"

"No," replied Senator Sorghum. "The last time I used a brass band a sarcastic opposition editor referred to the occasion as a concert and sent a musical critic instead of a political reporter.—Washington Star.

One of Us.

"I've just been having a talk with John J. Public, who tells me that—"

"Is John J. Public an individual?"

"The person I have in mind is a fit representative of the downtrodden masses. He's trying to support a wife, six children and a motor car on $2,500 a year."

Matrimonial Hoeing.

"Edith's husband seems to me pretty common clay."

"Well, she's getting the rocks out of him all right."

Holding Out for the Legit.

"Do you think motion pictures are educational?"

"Yes," replied Mr. Stormington Barnes; "although I won't say they have gotten so far along as to teach people how to act."

One in Every Family.

He—They say there's one idiot in every family.

She—It's really too bad about your being the only child, Bernard.

A Polite Driver.

Traffic cop (signaling)—Come on! What's the matter with you?

Truck driver—I'm well, thanks. But my engine's dead.

Hard to Recognize.

"Maude declares that she hates flattery."

"Maybe. The trouble is that most of the time she doesn't recognize it."

Her Speaking Terms.

Kriss—Talk is cheap.

Kross—I don't know about that; my wife talked me out of $20 last night.

Just Flattery.

"I understand the photographer praised your beauty very highly."

"Yes, but I've looked in vain for the last six months and he has yet to display in his front window the portrait he took of me."

Fantastic.

Eagle Eye—Heap big artist. Him says he bin lookin' for a Injun like me. Him giv' me a dolla, jus' for lettin' 'im draw my face.

Coiling Snake—Hum, yum. I wish I 'ad a mug like yours.

POULTRY

RKEY FATTENED ON RANGE

h Gains in Flavor and Tenderness Way It Cannot If Fowl is Confined.

is just as important to have turk- in good plump condition before keting as it is chickens. However, od many farmers regard this as a job simply because there is con- rable misunderstanding as to the ect way to go about the matter. rkeys, if taken aright, are easily ened; in fact, easier than most fowls. But if turkeys have had range all summer, you cannot n them with any satisfaction in nclosure. The change will cause to fret and refuse to eat and they will lose instead of gain in ht. On the other hand, if they e too much while being fattened, will "run off" the beneficial ef- of your extra feeding. The right is therefore a compromise be- n these two extremes. Teach the eys to come up every evening at , and then stuff them with all they possibly eat. You will soon find n ranging at short distances only coming up even between feeding es, where they should always be to find some sort of attractive d.

on't try to fatten the turkeys on alone. A close diet of new corn n results in bowel troubles for the eys just as it does for hogs, and ck turkey is usually a dead turk- Mix the fattening ration; variety esirable for several reasons. Equal

rkeys Fret and Refuse to Eat if in an Enclosure.

rts of wheat, oats and corn, make ood ration. Give also an occasional sh feed of equal parts of corn- al and wheat middlings which kes a very rich feed, especially a quantity of ground beefscrap or en cut bone is added.

As the turkey takes on fat, the h turns to a rich golden color. If owed reasonably free range while fattening process is going on, the sh gains in flavor and tenderness a way it cannot if the bird were tened in close quarters.

ROPER FEEDING BIG FACTOR

Matter How Good the Breeding May Be, Good Care Must Be Given for Best Results.

Breeding plays an important part successful poultry operation, but factor of good feeding and the per management of the flock plays far more important part than many ultry keepers have been led to be- ve. Breeding, no matter how good, n accomplish but little in produc- results unless backed by proper eding and care. The best of breed- will give but poor results if the per care and feed are not com- ed with.

POULTRY TERMS

A poult is a turkey in its first ar.

By a trio is meant a male and two males.

What is known as a yearling hen is e having laid 12 months.

A breeding pen is usually made up from six to fourteen females and male.

A setting of eggs is usually counted 12, although many poultrymen give eggs.

When a chicken weighs between two d three pounds it is called a spring icken.

A pullet is a female less than a ar old, and when over that age it a hen.

A stewing chicken weighs about ree pounds and a rooster four or ore pounds.

A broiler is a bird weighing two unds or less and which is six to elve weeks old.

A male bird less than a year old is own as a cockerel. When over a ar old it is a cock.

A poularde is a pullet deprived of e power of producing eggs, with e object of great size.

Cramming is a system of forcing ed into young fowls, either by hand machine, so as to put on extra esh.

The male chicken is a cock and a ale goose is a gander, the male duck drake, the male turkey a tom or obbler.

A capon is a male bird deprived of generative organs for the purpose improving the weight and delicacy its carcass.

Highway Improvement

LINKING UP STATE SYSTEMS

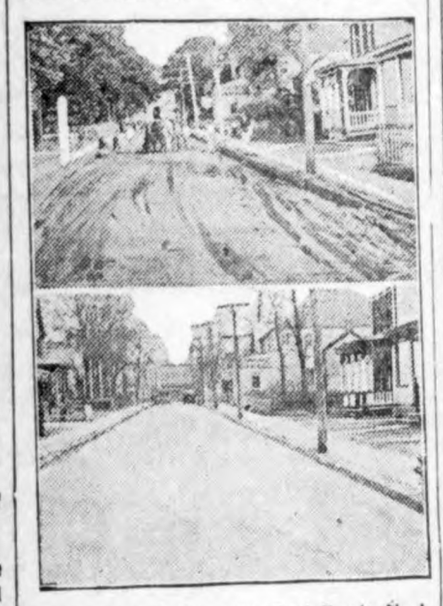
Progressive Step Attributed to Requirements of Federal-Aid Legislation.

(Prepared by the United States Department of Agriculture.)

A recent meeting of New England state highway officials and engineers of the bureau of public roads of the United States Department of Agriculture, marks an important point in the development of highways in this country. This is the first meeting ever held between officials empowered to act, for the purpose of laying out a system of highways to serve an area larger than a single state. It is the first of a series of similar meetings which will be held between the federal officials and highway authorities of various groups of states, the object of which will be the solution of the problem for the whole country.

This progressive step, long wished for by all users of the highways, can be attributed to the requirements of federal-aid legislation. It is required that all federal aid be spent on a connected system of highways designed to serve the needs of the whole country. Tentative systems have been submitted by all except eight states, and now the series of meetings is being held to connect and co-ordinate the proposed state systems.

The bureau of public roads intends to push this work as rapidly as possible, so as to lay before the people the plans for what will be by far the greatest highway system in the world. At present only roads certain to be on the system are being approved for



An Improved Road in Red Bank, N. J. Before and After Its Completion.

construction with federal aid; in May more than twenty miles of completed road was added to the system on each working day. It is estimated that the system will comprise 180,000 miles of highway.

LARGE STATE ROAD PROGRAM

South Carolina Wants to Spend $34,000,000 on Improvements in Next Six Years.

A proposal to spend $34,000,000 within six years and to complete within that time 4,000 miles of the state system, more than 600 miles of which would be hard surfaced and the remainder surfaced with sand-clay, top soil, or gravel is to be urged upon the legislature of South Carolina. In order that this proposal should conform to the federal aid acts the state highway officials recently held conferences with representatives of the bureau of public roads of the United States Department of Agriculture.

If this greatly expanded program is carried out, the state will match all of the federal aid money now available and any future appropriation that may become available. Funds will be raised by automobile licenses, by continuing the state-wide two-mill property tax, a one-cent-per-gallon motor fuel tax, plus a bond issue of $10,000,000.

HIGHWAY RULES ARE STRICT

Vehicles Not Permitted to Carry More Than Fourteen Tons Without Special Permit.

In Massachusetts no vehicle may travel over the highway which, with its load, weighs more than fourteen tons without a special permit and the load must not exceed 800 pounds upon tire inch of the vehicle. No motor vehicle which, with its load, weighs more than four tons, is allowed to travel at a speed of over four miles per hour if equipped with metallic tires, or over twelve miles per hour if equipped with tires of rubber or similar substances. The outside width of a vehicle is limited to eight feet.

Good Roads in Georgia.

The state of Georgia spent nearly $25,000,000 on good road construction last year, leading all states in the southeast. Almost $10,000,000 represented federal aid.

Cost of Our Highways.

The average cost per mile of highways constructed in the United States is $17,120.

Good Surfacing Material.

Tars and tar products are fast replacing mineral oil for surfacing roads

WILD RICE GOOD FOR HUMAN FOOD

Department of Agriculture Investigating Possibilities in Growing of Plant.

SEED STORAGE IS IMPORTANT

It Grows Mainly in Shallow Lakes and Sluggish Streams—Little of Grain Ever Gets on Market—Has Ornamental Value.

(Prepared by the United States Department of Agriculture.)

According to the usual practice recommended, seed should be kept dry from harvest to planting time, but the opposite condition is desirable in preserving the viability of wild rice, says the United States Department of Agriculture in Circular 229, Wild Rice, prepared by Charles E. Chambliss. For this reason, in buying seed it is important that the purchase be made from a dealer who guarantees that it has been stored under the right conditions.

Use for Wild Rice.

The principal use of wild rice is as feed for wild ducks and other water

Wild Rice Growing in Shallow Water—The Seed Panicles Are Two Feet Long.

fowl, but it is also used to a limited extent as human food, particularly by some of the Indian tribes of the upper Mississippi valley. Because it attracts game birds it is sown on hunting preserves, the sowers going out in rowboats or canoes and spreading the seed over the water by handfuls. Mature seed is heavy and will sink immediately to the bottom and become imbedded in the mud. Spring sowing is the most satisfactory as seed that is sown in the fall is likely to be consumed by hungry ducks or geese.

The natural range of wild rice in North America extends southward from the northern end of Lake Winnipeg to the Gulf of Mexico and eastward to the Atlantic coast throughout these latitudes. In the northern part of this region it grows mainly in shallow lakes and sluggish streams, while in the eastern and southern part of the United States it thrives above brackish water on low marshes bordering most of the tidal rivers.

Wild rice may be started in beds and then transplanted. This method of getting a stand started in a location where the crop does not grow naturally is described in the circular.

Manner of Harvesting.

For centuries the Indians of Minnesota, Wisconsin and Canada have harvested this crop by going out in canoes and shaking or knocknig the ripe seeds into the boat. The white man, with all his ingenuity, employs the same method and probably will continue to do so until the plant is brought under cultivation. The Department of Agriculture is investigating the possibilities in the growing of the plant and in the circular reports that it is a good food and that it has a possible value as forage. Very little of the grain ever gets on the markets, as the Indians sell only the small surplus they may have occasionally.

Copies of the circular may be obtained by writing to the Department of Agriculture, Washington.

SILAGE CROP IS IMPORTANT

Cutting Too Green Sacrifices Too Much Growth and Feed Value—Best Time for Corn.

The proper stage at which to harvest the silage crop is an important question. Cutting too green sacrifices too much growth and feed value and makes acid silage; cutting too late causes poor packing and spoilage. A good rule in harvesting Indian corn for silage is to cut just before the kernel glazes, and in the case of Dent varieties, after the dent is well formed.

USEFUL INFORMATION PICKED UP AT FAIRS

Farmers and Breeders Given Opportunity to Study.

In Practically All Parts of Country Excellent Exhibits Are to Be Attractive Features—Animals May Be Purchased.

(Prepared by the United States Department of Agriculture.)

Exhibits of improved livestock and poultry at county and state fairs this year promise to be unusually interesting, according to information received by the United States Department of Agriculture from many sources. In practically all parts of the country excellent livestock exhibits are to be attractive features of fairs. The attention which breeders and farmers have been giving to good livestock, combined with good feed and care, have resulted in some exceptionally well-bred and well-fitted animals.

In encouraging farmers to take advantage of the opportunities which fairs and livestock exhibits give for observing improved livestock and poultry the Department of Agriculture places emphasis on the following points: Livestock displays afford an opportunity to study breeds and types and to see a large number of good animals. In the case of meat animals the size, conformation, and uniformity are worthy of special study in view of increasing tendency to raise purebred and high grade stock as market animals as well as for breeding.

Farmers attending livestock displays obtain useful information by meeting others who are interested in superior breeding and feeding methods. Besides the ideas exchanged and information gained, new enthusiasm for the work is a common result. Animals and poultry may be purchased at most fairs, though as a rule it is more satisfactory for a farmer to purchase animals at the home of the breeder than to buy fitted animals at fairs. Animals that have been prepared for exhibition usually are priced higher than unfitted ones of similar quality and breeding.

CAREFUL IN CRANKING TRUCK

Drivers Ought to Be Sure That the Spark Is Fully Retarded—Plan to Avoid Injury.

Before cranking the engine, the driver of a motor truck should be sure the spark lever is fully retarded and that the gears are in neutral. If it is attempted to crank the engine with the spark lever advanced, the chances are that the engine will backfire, possibly resulting in a broken arm. Furthermore, if the driver succeeds in cranking his engine when it is in gear it may start and run over him and be the cause of considerable damage to the truck and other property as well.

It pays to be on the safe side when the cost of taking a chance means possibly damage suits of two kinds—one of injury to the driver, and the other

Before Cranking a Truck Be Sure That Gears Are in Neutral.

on account of property damage of one sort or another. There have been cases where damage suits have arisen from injuries done to outside persons other than the driver, all because this rule was not obeyed.

MEANING OF THE WORD VEAL

Departments of Agriculture Frequently Called Upon to Decide Between Veal and Beef.

There seems to be marked variation of opinion as to what is meant by the word veal. Ordinarily, when one hears the word uttered, he thinks of the carcass or meat of a young bovine. In most cases this conception of the meaning of the word veal is sufficient and it can be dismissed from the mind without further consideration; but, when one is called upon to state just what constitutes veal, there may be some difficulty experienced in determining when a bovine carcass is or is not to be regarded as veal.

Departments of agriculture are sometimes called upon to decide whether or not a rather heavy carcass should be classified as veal or beef and the decision conforms to the conclusion of authorities on the subject, which is as follows:

Calf carcasses weighing less than 300 pounds, with comparatively light-colored, fine-grained flesh, are classified as veal.

LIVE STOCK NEWS

"DIRTY AS A PIG" IS SLANDER

Porker Is as Cleanly in Its Habits as Any Other Farm Animal If Given Chance.

"As dirty as a pig," is a common expression, yet the fact remains that a pig is as cleanly in its habits as other farm animals if given a chance. Too often the comfort of the swine herd is the last thing to be considered on the farm but it has been fully demonstrated that hogs will quickly and liberally repay for extra attention given them. Since the profit in feeding hogs depends upon the amount of gain per unit of feed, and since perfect health is necessary to secure the highest possible gains, it is of the utmost importance that suitable conditions for handling hogs should be the first thing to take into consideration.

Vigorous stock, drainage, a pure water supply, feed, suitable runs, shade, buildings, farrowing pens, feeding places, wallows, etc., must all be planned for and the plans systematically executed. Resistance to disease is natural, or it may be acquired. Natural resistance depends very much upon physical vigor. Exposure, poor food, parasites and other things that lower the vitality not only prevent hogs from making satisfactory gains but lower their resistance to disease as well.

Give Your Pigs a Chance—They Die in This Kind of a Home.

SECRET OF SUPERIOR FINISH

Animals of Improved Breeding Excel in Feed Lot, at Market and on Butcher's Block.

Why are some feeders able to finish their cattle more economically and more rapidly than other feeders who feed cattle of the same age? Why do some fat cattle top the market while others sell a dollar, maybe three dollars, below the top. Why are a great many consumers of meat willing to pay 35 cents a pound for prime beefsteak while they would reject inferior steak at half that price?

Because animals of better breeding are superior in the feed lot, at the market, and on the butcher's block. Why are wellbred animals superior? Because they have been bred for performance and have been selected accordingly for many generations. Have not scrubs been bred for performance? Decidedly not. The breeders of scrubs have had no future in mind. They have been bred for no definite improvement. Naturally then there are many very undesirable qualities in every scrub. A scrub bull will sire no two calves alike. He tears down a herd while a good purebred bull builds up a herd.

TEACH PIGS TO EAT GRAIN

Creep Should Be Provided for Little Porkers in Order to Wean Them Without Stunting.

It is important that pigs be taught to eat before they are weaned. They first learn to eat with their mothers, starting when about two weeks of age. Later they should be fed in a creep. In this way pigs may be weaned without being stunted.

It is advisable to take the sow from the pigs rather than take the pigs from the sow.

BALANCED RATION FOR SOWS

Shelled Corn, Tankage, Wheat Middlings and Salt Fed With Pasture Is Most Excellent.

A good ration for sows with litters consists of shelled corn, plus meat tankage, pius wheat middlings and salt, all self-fed. This ration fed with good pasture and as much milk as can be spared will keep the sows in good condition.

Use the Cobs.

When cleaning up around the feed yards, make good use of the corn cobs from the hog lot. These can be hauled out and scattered over the fields, but a better use for them is to burn them into charcoal for the hogs. Charcoal is good for hogs; it keeps their digestion in good running order.

Clean Water Needed.

Remember that farm animals, as well as humans, appreciate plenty of clean, cold water on a hot summer day.

DAI POI

FEED DAIRY COWS

Animal Requires Food With Amount of Mil Able to Produc

Too many cows are un cow weighing 1,000 pounds day, for the maintenance of an amount of food equivalen supplied in 8 pounds of clover 20 pounds of good corn silag must have this food regardl whether she produces any milk. used for milk production must addition to that required to keep

A Good Dairy Cow Must Have Some Grain.

cow's body. A 1,000-pound cow producing 20 pounds of 4 per cent milk a day, if properly fed, devotes about half of her feed to maintenance and half to milk production. Obviously when a dairyman has gone to the expense of supplying that half of the food required for maintaining the cow's body, it is poor economy to withhold any of the other half, all of which goes to produce milk. A cow then requires feed in accordance to the amount of milk she is able to produce. The heavy producer needs the most feed.

Farm-grown roughages (silage, hay, etc.) furnish the cheapest food nutrients. However, a good dairy cow cannot eat enough roughage to supply her needs for milk production. She must have some grain. Therefore, to feed with the most economy the following rules must be observed, says the University of Missouri College of Agriculture.

1. Feed all the roughage a cow will eat. She will eat more if fed three times a day instead of twice.

2. Feed grain in proportion to the pounds of milk produced.

To a Jersey or Guernsey cow feed one pound of grain for each three to three and one-half pounds of milk produced.

To a Holstein, Ayrshire, or Shorthorn feed one pound of grain for each four to four and one-half pounds of milk produced.

PREVENT SCOURS IN CALVES

One of the Most Common Causes of Ailment Is Dirty Pails and Feeding in Wooden Troughs.

Calves may get scours from several causes, but one of the common sources is dirty pails and the practice followed of feeding in wooden troughs. A good rule is to keep the calf buckets as clean as the milk pails. The farmer who uses a swill pail for feeding calves or who hangs the pail on a post between feedings without washing it will be looking for a cure for calf scours. With warm weather and the fly season at hand extra precaution must be taken in caring for the pails. They should be washed thoroughly after each feed and sterilized either with steam or hot water and then inverted in a clean place until used again.

GIVE CALF SOME ATTENTION

Stunted Heifer Will Never Develop Into Profitable Cow—Provide Shade and Water.

The calf is often very much neglected from the time it is six until it is twelve months of age. A heifer stunted by the lack of suitable food will never develop into as good a cow as one kept growing from birth to maturity. During summer while the young animals are on pasture not much attention is needed, as pasture grass furnishes the best and cheapest feed available. Shade and an abundance of fresh water are two essentials which the careful herdsman always provides.

HOME-MIXED MEAL FOR CALF

Good Results Obtained in Raising Young Animals at New Jersey Experiment Station.

A very good home-mixed calf meal is made up of equal parts by weight of old-process linseed meal, hominy feed, red dog flour or wheat middlings, and high-grade dried blood. In raising calves in the dairy herd at the New Jersey agricultural experiment station, both the home-mixed and commercial calf meals have been used with equally good results.

Fresh Grass for Cows.

Mow the pasture to kill off weeds. Fresh grass, free of weeds, makes it possible for your cows to produce more and better milk.

Take Care of Cans.

Cans used for the return of skim milk or whey should be emptied, scalded and cleaned as soon as they arrive at the farm.

Corn Makes Best Silage.

Corn, either Indian or the grain sorghums, makes the best silage.

"It pays to advertise." says Elmer Ludeke. "Take out my adv, Jergie. I've sold all my spuds."

R. W. Elder came over from Bode Sunday, for a visit with his family here.

Paul Stille has rented the Jacob Blumer residence and will soon be located there.

We had a good soaking rain last Friday which also brought along a spell of cold weather.

Mr. and Mrs. Henry Lewis were at Mason City on business last Thursday.

Mrs. Tony Ahrenkeil and son of Goodell were Klemme visitors Tuesday.

Mrs. Hnrietta Wilkins and two little girls, of Meservey, were visitors in this city Tuesday.

Mrs. Sanderfel tand Mrs. Dickhuis. were Mason City visitors yesterday.

Mr. and Mrs. Alfred Nihoof and Mr. and Mrs. Albert Nihoof. of Belmond, were Klemme visitors Wednesday.

Mr. and Mrs. Will Glanville. Shirley and Floyd, of Brainerd, Minn., came Tuesday morning for a few days visit at the Peter Merkel home.

Art Wellemeyer returned the other day from the vcinity of St. Louis. Mo., where he had been o na business trip.

We understand that Miss Edith Haupt is contemplating a trip that will take her to Chicago, for a visit with relatives.

Mr. and Mrs. John Grieman from Sheffield, were visiting at the home of Mr. and Mrs. Will Grieman, Sr., the latter part of the past week.

Dr. Zinn had a sewer dug in this wek so he can connect anytime. We also noticed Frank Carpenter was having his sewer put in this week.

Prof. Neese's little girl has been quit ill the past week. She is reported to be improved at this writing.

It being Grandpa George's birthday last Friday, his son Frank and wife prepared a big dinner in his honor to which the entire "Kluck" tribe were representd.

Mr. and Mrs. Joe Johnson and Mr. and Mrs. Clarence Johnson had planned to make a trip to Minnesota last Sunday, but on account of the bad roads had to give it up.

Mr. and Mrs. Orville Burgess, of Whittemore, Iowa, came Saturday for a visit at the M. O. Barr home. Mr. Burgess is a brother of Mrs. M. O. Barr

Miss Laura Brooks and Mrs. Harry Brooks returned from Mason City last Thursday where the latter had been for medical examination. Mrs. Brooks will not need an operation.

We had missed Gilbert Schafer and on inquiring we found that he is in Missouri to spend the winter with relatives and in the hopes of improving hs health.

Farmers, if you are going to have a sale this fall come in and let us help you arrange your bills and advertising. Our years of experience are at your service.

This printing office has been busy printing the Court Calendar for the October term of court. We got the job out on schedule time and delivered them to the Clerk Tuesday.

Corn husking has started in this vicinity. We will soon here some great stories of how much corn those champion pickers were able to husk in one day.

H. G. Miller, manager of the Farmers Elevator, is having a couple of signs painted on that institution. One sign appears over the office and another will adorn the north side of the elevator which will announce to the world that it is The Klemme Co-Op. Grain Co. The work is a product of the artistic brush of R. M. Thomas.

The Garner Signal of yesterday, reports the death of Belden Cavanaugh, nine year old son of Mr. and Mrs. C. K. Cavanaugh, whose death occured last Friday of diphthreia.

Marriage licenses which were issued the past week by Clerk B. E. Erwin were to: Henry Groh and Mary Erdman; Harold B. Enger and Alma Marcus; Herbert Watts and Mabelle Vittum.

Walt Bloom returned Tuesday from Alden, Colfax, and other places where he had been visiting the past couple of weeks. We presume this little cold snap will send him back to sunny California soon.

Ed. Shlei and family. accompanied by Mrs. Elmer Shlei and two children, drove down from Fenton last Sunday for a couple of days visit at the Fred Haupt and H. F. Ludeke homes.

The sugar beet harvest is on here and beets were loaded onto cars the for part of the week. Albert Schmidt and Leonard Sampson and one or two other farmers are all that put in beets this year. They will go to the Belmond factory.

Rev. A. B. Gedye returned from the conference yesterday. He had planned to return Tuesday but a "sky-pilot" from Whittmore induced him to go there for a short visit. Rev. Gedye formerly had the charge at Whittemore.

The electricity was turned off for several hours yesterday afternoon which caused some delay in getting our paper out this week, as we have to depend on electric power to run the linotype machine and presses. A tree had fallen across the high-line near Klemme and C. J. Papousek had to come over from Belmond to clear up the line.

Ed. Kahrs bought a new Buick Six one day last week and on account of the rain left it at Garner. Sunday morinng he was seen "hoofing" it north on the track and about three hours later drove into town with the new gas bus. Ed. says he was trying to reduce and the walk over the Rock Island had ought to jar off several pounds of useless weight.

Rev. F. W. Ortmeyer, who for a number of years was pastor of the Methodist church at Forest City, and also pastor of the church at Emmetsburg the past year, has resigned from the ministery on account of ill health and taken up life insurance. He and the family have located at Garner. He has the agency for the Northwestern Life Ins. Co. and has hof his territory: Hancock County, Forest City and Clear Lake. Mrs. Ortmeyer is a daughter of Mr. and Mrs. Henry Griewe of Klemme.

STILLE'S IMPLEMENT NEWS

VOLUME 1. Thursday, October 12, 1922 NUMBER

You can't buy a good looking bunch of milch cows and then sit down and sing, "Love Me And the World is Mine," and expect to "get rich quick." You'll have to feed them a balanced ration of properly

prepared feed, milk them regularly and separate the milk with a Primrose Cream Separator, to get the best results. The Primrose gets All the Cream!

A cheap machine is a mortgage on the future.

Saving 144 Dollars

Get your pencil and do a little figuring with us. If two men stay steadily on the job with the ancient husking peg, it takes them 25 days (one month of working days) to husk 50 acres of corn. A McCormick-Deering Corn Picker will pick and husk the same 50 acres in 7 days. Take 7 from 25 and you have 18 days of inefficiency costing at least $4 a day per man, making $144 in all. That's almost half the cost of this time saving machine. Could you make a more profitable investment? Use a McCormick-Deering Corn Picker this fall—save 18 days time and 144 good dollars. We sell thkem.

Mr. J. O. Nelson purchased a new wagon and box at our store the other day. Mr. Nelson is farming on a place about ten miles west of Klemme.

Emil Beier got one of our International 10 in. feed grinders. Mr. Beier has a mighty fine bunch of milch cows, most of them if not all are thorough breds. Emil beleives in good cows and properly prepared feed, and his cream checks show it pays.

Ed. Becker drove up and loaded on one of our John Deere Triumph Wagon Boxes to pick corn in this fall.

One day as I chanced to pass
A beaver was damming a river;
And a man with no White Rose
Was doing the same to his fl

Two Engines In One

The outside appearance of an ternational Engine is different f that of most engines, but the in construction is even more so. O up the crank case and you'll see difference. You will see a remov cylinder that fits in just like a sl and when it becomes worn, can e ly be replaced. When you wear one engine—one cylinder—you have a brand new engine left by slipping in another cylinder sle that doesn't cost as much as hav the cylinder of another engine bored. You'd pay more for an gine like the International. would you? So would we.

WA IS LAND OF RICHES AND PLENTY REPORT SHOWS

A IS THE LEADING STATE IN MANY PRODUCTS

You Know Iowa Has Over 200,000 160 Acre Farms?

Some wise man has said that "Ofes we cannot see the forest for trees."

We have thought more than once this statement in reflecting upon marvelous facts about our great te of Iowa. They are so close to that we do not realize them.

It is to call your attention to a of these facts that we are pubing this article.

The whole story of Iowa reads e a romance, besides which the les of The Arabian Nights" grows nt and dim.

Hardly one hundred years ago an trodden wilderness, known only the tribes of wandering Indians; day a great commonwealth with rly two and a half millions of ple, cultured and wealthy people; th over ten thousand miles of railads; with over 450,000 automoles; crowded with well built and utiful towns; and with a taxable alth over twice as great as the alth of the entire United States en Iowa was admitted to statehood in 1846.

Unquestionably we have in the ,000 square miles of Iowa the rgest consecutive body of rich agcultural land in the civilized world. e facts concerning that land and e wealth it produces are absolutestartling and well worthy of the nsideration of every Iowan.

The statistics given are all taken om the United States census reort of 1920 and are, therefore, abolutely authentic.

We believe that a more general nowledge by the people of our state th wonderful facts concerning her ould be of great value to Iowa; and e are therefore publishing the follwing interesting facts concerning wa:

Although Iowa ranks sixteenth in population and twenty-third in area of land, she ranks first in:

alue of farm lands and buildings.
otal value of farm products.
ombined value of live stock.
otal value of farm property.
ercentage of farm land improved.
ercentage of total area in farms.
umber of automobiles per capita.
aalue of horses.
alue of hogs.
roduction of corn.
roduction of oats.
umber of poultry.
alue of egg production.

Iowa ranks second in tonnage of ay and forage crops.

The Wealth of Iowa

The taxable wealth of Iowa is ovr Twelve Billion Dollars.

One-tenth of all the food products n the United States come from the tate of Iowa.

But she does not only produce ood; the factories of Iowa in 1920 ad an output worth Seven Hundred nd Forty-Five Million Dollars, and ave over Four Hundred Million Dollars invested in plants and machinery.

Iowa's grain products for 1921 totaled 609,668,000 bushels. This amount divided by Iowa's number of square miles—55,586—gives an average of 10,750 bushels per square mile. No other state begins to equal these figures.

This is three times the square mile production of Minnesota. and over seven times the production of Texas— two leading agricultural states.

The per capita wealth for Iowa is $3,539. The per capita wealth for the remainder of the United States is $1,965.

Practically all of Iowa's thirty-five and a half million acres of land is in farms. Over 98 per cent of the soil is productive. No equally large area of land in the world can show as good a record.

Iowa has over 200,000 farms. The average size of each is about 160 acres, and the value of these farms and the property thereon is over Eight and a Half Billion Dollars.

No point in Iowa is over twelve miles from a railroad, and no one walks to the railroad station, as Iowa has a total of over 400,000 cars, and has more automobiles on farms than any other state in the Union.

Iowa has more telephones than any state.

Iowa leads the United States in literacy. Ninety-nine out of every one hundred of her citizens are able to read and write.

About Iowa Farms

The farms of Pottawattamie Co. are worth as much as all the farms of either Vermont, New Hampshire, Massachusetts, Delaware. Rhode Island or Nevada.

The farms of two Iowa counties (Plymouth and Sioux) are worth more than the combined value of all the farms in the states of New Hampshire. Vermont, Connecticut and

The farms of five Iowa counties (Sioux, Hancock, Shelby, Kossuth, and Plymouth) exceed in value the farms of either Oregon, Idaho, Montana, Louisiana, Mississippi, Alabama, New Jersey, West Virginia, Massachusetts. Maryland or Florida.

The farms of ten Iowa counties (Cedar, Clinton, Hancock, Jasper, Kossuth, Marshall, Polk, Plymouth, Shelby and Sioux) exceed in value the farms in any one of the states of New York, Pennsylvania, Michigan, Virginia, North Carolina. South Carolina, Georgia, Tennessee, Mississippi, Arkansas, Colorado, Washington, Oregon or Montana.

The farms of the above ten counties are worth more than all the combined farms in the six states of Arizona, Florida, Maine, Maryland. New Jersey and Nevada.

The farm lands of Iowa counties have increased in value in the ten years ending in 1919 to over 225 per-cent.

The farms of Iowa are worth more than the combined farms of the 23 states of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware. Maryland, West Virginia, South Carolina, Florida, Alabama, Louisiana, Arkansas, Arizona, Utah, Nevada, New Mexico. Montana and Wyoming.

CHUNKS OF INFORMATION

There are more than 200,000 stammerers in the United States.

New Mexico has a lizard which is reputed to squirt blood from its eyes.

Nine-tenths of Russia's gold mining is done on lands owned or formerly owned by the czar.

One of the easiest ways to cool an overheated oven is to stand a basin of cold water in it.

Development of water power in Norway has made electricity cheaper than steam in that country.

France is the best foreign patron of the United States patent office, with Great Britain following closely.

Cameo cutting, one of the most ancient occupations, has recently been introduced into the United States.

Most of Japan's pearl divers are women, who begin to learn the trade at the age of thirteen or fourteen.

Iron embedded in concrete in Germany has been found to be free from rust after more than forty-five years.

California is a large producer of barley, more than 35,000,000 bushels being the 1917 crop in the Sacramento valley.

Chicago has more telephones than all France and a single office building in New York contains more than there are in the whole of Greece.

A New Jersey woman has invented a mesh bag to hold a door key and prevent it from being lost among the contents of a pocketbook or shopping bag.

The average annual meat product from the Tonto national forest of Arizona and the Humboldt national forest in Nevada is estimated at $2,000,000.

Having found a way to remove the knots and bleach the pulp, a plant for the manufacture of paper from bamboo will be established in Trinidad by Scotch interests.

GIMER WINS SECOND PLACE FOR IOWA AT ST. PAUL

Local Creamery Gets Honors By A. D. Gimer's High Scores

With a score of 95.88 Klemme is being put on the map through her creamery.

As a great number of men are watching the scores of Klemme butter at the different scoring conventions and the local creamery is making themselves felt at all the scorings which have recently been held.

Some of the recent high scores made by Gimer's butter are, 95.00 at the Iowa State Fair; 94.50 at the Dairy Cattle Congress at Waterloo.

At the present time the creamery are receiving many letters from big eastern commission merchants who are begging the creamery to name a price on their butter as they want it being attracted by the recent scorings and its high quality. Fortunately the creamery have been for a number of years shipping to one of the biggest concerns in the U. S. the Great Atlantic & Pacific Tea Co. of Jersey City, N. J.

Those patrons who have been furnishing good cream for these contests are to be congratulated for the effort they put forth in helping the creamery to win.

The next scoring is the Iowa Buttermakers' Association at Mason City, November 1 and 2. Gimer is planning to have a tub at this convention and will do his best to win out.

Gimer has been so close to winning first place so many times now he does not think much of second place but watch him—he will bring a big string of first places home before long.

Over $500,000 worth of corn was grown by the 29,000 young farmers who were members of boys' corn clubs last year, according to reports to the United States Department of Agriculture.

County extension agents, in carrying the results of research by the United States Department of Agriculture and the experiment stations of the State agricultural colleges to the farmer, visited 650,000 farms in 1921 and held 125,000 community and other meetings, with an attendance of 6,000,000.

GROWTH OF FEDERAL AID ROADS IN U. S.

More than 1,000 miles a month has been the rate of growth of completed Federal-aid roads during the present working season. says the Bureau of Public Roads, nited States Department of Agriculture. The mileage completed on August 31 totaled 19,308, of which 6,401 miles have been added since the beginning of the year. On the same date there was under construction 14,670 miles Federal-aid roads in all stages, from approved projects to completed roads, now total 41,405 miles, or 23 per cent of the system of highways being outlined by State and Federal engineers to serve the whole country, and which will consist of approximately 180,000 miles.

HERRING TO SPEAK IN COUNTY NEXT FRIDAY

Is Democratic Candidate For Congress Against Brookhart

As we go to press word comes to us from Democratic headquarters that Clyde L. Herring, candidate for U. S. Senator will speak at Garner Friday, October 27 at 9:00 a. m. and at Britt at 11:00 a. m.

Herring is out after Brookhart, but this democratic Herring (fish) won't get far in this county. We predict that Brookhart will get the whole works. Anyway we might go up and hear how the democrats will nail their platform.

You can now get Typewriter Ribbons at the Times Print Shop to fit your Oliver, Remington, Underwood, L. C. Smith or Harris Typewriter. Regular $1.00 ribbons are now sold for 75c—and they are the best.

Court Convenes This Week

Three weeks term of court began at Garner Monday, October 16. with Judge Edwards on the bench. Six criminal cases, thirty trial and eighty five old cases appear on the docket. By old cases is meanth those which are carried over from previous sessions of the court. The criminal cases which are up are evidently up for violation of the Volstead act, from the foreign names of the violators. Nine probate matters are on the docket for consideration.

Will Wrestler Willer Here Tuesday Night

OTTIS PITTINGER, MASON CITY, IOWA.

Tuesday night, October 24th, another big wrestling match will be the big attraction at the Idle Hour Theatre at Klemme, when Hans Willer, the State Champion Middleweight will go to the map with Ottis Pittinger, fast 155 pound wrestler of Mason City. This promises to be a fast match and mat fans are sure to see some real clever work when these two men step onto the stage at 8:00 o'clock for a finish match.

Billy Schober, popular mat artist will again appear on the preliminary program when he again takes on the 220 pound Mason City wrestler, Mr. Miller, who he threw last week in 52 minutes after a fierce battle. Billy weighs in at about 158 pounds and he guarantees to throw Miller in 30 minutes Tuesday night.

Tell your friends about this match and don't forget the date—Tuesday night, October 24th at Klemme.

HENRY LAU KLEMME'S FIRST MERCHANT; ALSO A FARMER

SCHOOL NOTES

The first six weeks of school are gone and those dreaded exams are over. We have received all of our papers back. some with excellent rades, others not so good, and others unsatisfactory. We are sure those whose grades have been low the first six weeks will make a harder effort to raise their grades this second six weeks.

The class in Political Economy has been thinking over and trying to solve, "What wage and salary shall be paid labor?" We have almost come to the conclusion that this question cannot be settled even by our efficient Juniors.

The Agriculture Class is taking up laboratory work this week. The chief subject is corn. Such things as different classes and types of corn and time for planting, cost of production per acre and per bushel are studied. It was found that the cost of producing a bushel of corn was from 35c to 40c, with an approximate cost of eighteen dollars an acre.

Students must each select an ear of seed corn and later corn judging will take place and germination test will be made.

The class in General Science is at the present time studying the solar system. Some interesting topics for discussion are: The twelve positions of the earth around the sun, what causes the long days during summer and short days during winter, difference between cyclones and ornadoes, and many other topics.

Sophomorqs Re-organize—Last Friday evening the tenth grade held a class meeting for the purpose of re-organizing. They chose Gearald Koerner as president, and Andrew Wellemeyer as secretary and treasurer. Following is a list of those who will serve on the various committees: Neota Ridder, Adela Schroeder and Maurine Hake, Entertainment; Neota Ridder and Gearald Koerner, Athletic; Adela Schroeder and Glenn Busch, Forensic Committee; The Class motto is. "Always Ready," and the Class Colors are "Old Gold and Purple."

Three members of the Eighth Grade gave some very interesting themes in civics last Monday. This is the first of a series of papers the class will give during the year in the Friday recitation period.

Names of pupils neither absent or tardy during the first six weeks in the Intermediate rooms are: Elmer Schwartz, Irwin Schwartz, Irene Johnson, Otho Keraus, Valeria Koerner, Raymond Barz, Paul Kelly and Henry Smid.

Wayne Pavey was absent Monday

Charles and Willis Busch are back in school after a week's absence.

The Sixth Grade are memorizing the poem, "Somebody's Mother."

The Fifth Grade have finished the study of South America.

Raymond Barz had a perfect spelling record the first six weeks.

First Supgar of Season Made

The first sugar at the Belmond plant was turned out Friday, a fine standard product ready for the market. The plant is now running day and night and beets are being shipped by the car load to the factory.

FOR SALE—Some choice Spring Boars, cholera immune. Two sired by Pathmaster, others by Great Orion's Sensation Again. They are going fast, call soon. Emil W. Lau.

FORCED PIANO SALE—

The Chambers Music House of Mason City, Iowa, who have a reputation for their straight forward business dealings are, by their factory contract forced to dispose of a large number of pianos and player pianos regardless of cost in order to move stock and are now holding a mamoth Forced Piano Sale, including such well known makes as Baldwin, Lyon & Healy, Howard, Hamilton and Washburn. Their regular line of instruments are being offered and is surely a rare opportunity to save money. Used pianos are offered as low as $48, and new instruments as low as $238. Prospective purchasers will do well to investigate their offerings during this sale. Their address is 29 E. State St., Mason City, Ia. adv.

OBITUARY HENRY LAU. SR.

That in the midst of life we are in death, and that death is no respector of person, was forcefully brought home to us again in the sudden passing away from our midst of one, who for many years was a familiar and highly respected member of our community, and humanly speaking, had a number of years still to live. But in the wise providence of God, who knows what is to our best, He devised differently.

Henry Lau was born in Mecklenberg, Germany, December 12, 1855. When about nine months old he came to America with his parents and hey made their home near Elkport, Clayton County, Iowa, on the banks of the Turkey river. Here the deceased grew to manhood. Later he ame to Hancock County where he purchased a piece of land in German township. On March 17, 1881 he was united in marriage to Mary Roswag and they established a home on he bleak and wild prairie where hey lived a number of years.

When the town of Klemme was located Mr. Lau opened the first grocery store, which was on the corner where the Northern Lumber Co. s now located, which he disposed of a few years later to Schafer and ow. He also bought and shipped grain for some time before an elevator had been erected. He continued to operate his farm until 895, when he established a general tore in company with his brothers hrist and Martin and at this time noved his family to Klemme. After ome time they sold this business nd dissolved the partnership with s brothers. Mr. Lau then entered ie implement business, which he ntinued until his death.

His parents being loyal members f the Methodist Episcopal church, e was reared in the faith of his parats and at the age of 14 years also nited with the same church and remained a faithful and devoted mer. When the church was organizd in German Township he was one f the charter members. In Klemne he served on the board of trusees for many years. He took an ctive part in all the activities of the ocal church. He seldom was absent the Sunday school and public worhip. In the mid-week prayer meetings his prayers were usually very ective and at times heart touching.

He was a good father and devoted to his family. After an illness of nly a few days he passed away on ctober 2nd, 1922, at 2:30 A. M., nd on account of the epidemic preailing in the community at he ime, he was buried the same day. A memorial service will be held on later date.

He leaves to mourn his departure is dear wife, his sons William of arner, George, Wesley, Lloyd and Erwin at home. His daughters, illie (Mrs. A. G. Koerner) Mar ha, (Mrs. C. M. Bredbenner) Nellie, (Mrs. E. J. Arnold) Leona, all of emme, and Esther, (Mrs. Day of lubbard, Oregon. Three children aving preceeded him in death, amely two infants and his daughter Mamie who passed away in 1906.

Besides 17 grand children he also eaves four brothers, two sisters and a large circle of relatives and friends

Opportunities Going to Seed--

In watching for big opportunities in life, how many have overlooked a hundred apparently insignificant chances which might eventually have led to success!

Opportunities gone to seed are the real tragedies in life; they could have brought so much more happiness; achievements rather than dissappointments.

Neglecting to save is allowing one of life's greatest opportunities to go to seed.

Have you a steadily growing savings account.

Gast, William Fritsch, Esther Kleist, The Prudential Insurance Company of America, First Trust Joint Stock Land Bank of Chicago. AEtna Life Insurance Company, Frank C. Hrubes, George Merkle, William Stork, First National Bank, Klemme, Iowa, H. J. Stromer, Clerk of Liberty Township and to Trustees of Liberty Township and to all other persons in anyway interested in any of the following described real estate situated in said district, Hancock County, Iowa.

SE SE; SW SE; Section 7, all in Township 95—24., SW SW; SE SW; NE SW; SE NW; SW SE; NW SE; Section 8, all in Township 95—24., SW NW; Section 16 all in Township 95—24., SW SW; NW SW; Section 16, all in Township 95—24., NE NE; SE NE; SW NE; NW NE; Section 17, all in Township 95—24., NE SE; SE SE; SW SE; NW SE; Section 17, all in Township 95—24., NE SW; SE SW; SW SW; NW SW; Section 17, all in Township 95—24., NE NW; SE NW; SW NW; NW NW; Section 17, all in Township 95—24., NE NE; SE NE; SW NE; NW NE; NE SE; SW SE; NW SE; NE SW; SE SW; SW SW; NW SW; SE NW; SW NW; Section 18, all in Township 95—24., NE NE; SE NE; SW NE; NW NE; NE NW; SE NW; NW NW; NE SE; Section 20, all in Township 95—24., SW NW; NW SW; NW NW; Section 21, all in Township 95—24., NE SE E of Ditch; SE SE; Section 13, all in Township 95—25., all roads and highways included within the watershed of the district.

You and each of you are hereby notified that on July 16, 1920, there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district AND that a system of drains be constructed for the relief of said district.

You are further notified that on July 26, 1920, A. J. Lilly was appointed Engineer to make a survey, plat and profile and field notes of said proposed district, and that on March 2, 1922, said engineer filed his report recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said county and may be amended at any time before final action is taken thereon by the Board of Supervisors, and that November 15, 1922 at 2:00 o'clock P. M. has been fixed as the time of hearing thereon. All objections and claims for damage must be filed in the office of the County Auditor not less than five days before said hearing.

Witness my hand and official seal at Garner, Iowa, this 27th day of September, 1922.

CHRIS JACOBS,
Auditor of Hancock County.
(SEAL) Oct.-12-19

Roy Schaffer met with a bad accident Monday evening when he was working around his seven horse power gasoline engine which was running at the time. In some way his clothing became caught in the engine and was nearly torn from his body before he managed to struggle loose. He was quite severely bruised but is getting along alright as no bones were broken. Roy was a lucky man to get out of this scape without serious injury or possibly death.

Mrs. A. G. Koerner went to Garner Tuesday, being summoned there to act on the jury. This is her first time to act as a juror-ess but the judge called off all bets and told the jury to adjourn until next Tuesday. We presume Al is giving his wife a lot of valuable (?) advice on "how to become a juror" in ten lessons. Mrs. Koerner gets it back on Al as he will have to be the chief cook and dish washer while she takes a sort of vacation just sitting around listening to the lawyers chew the rag.

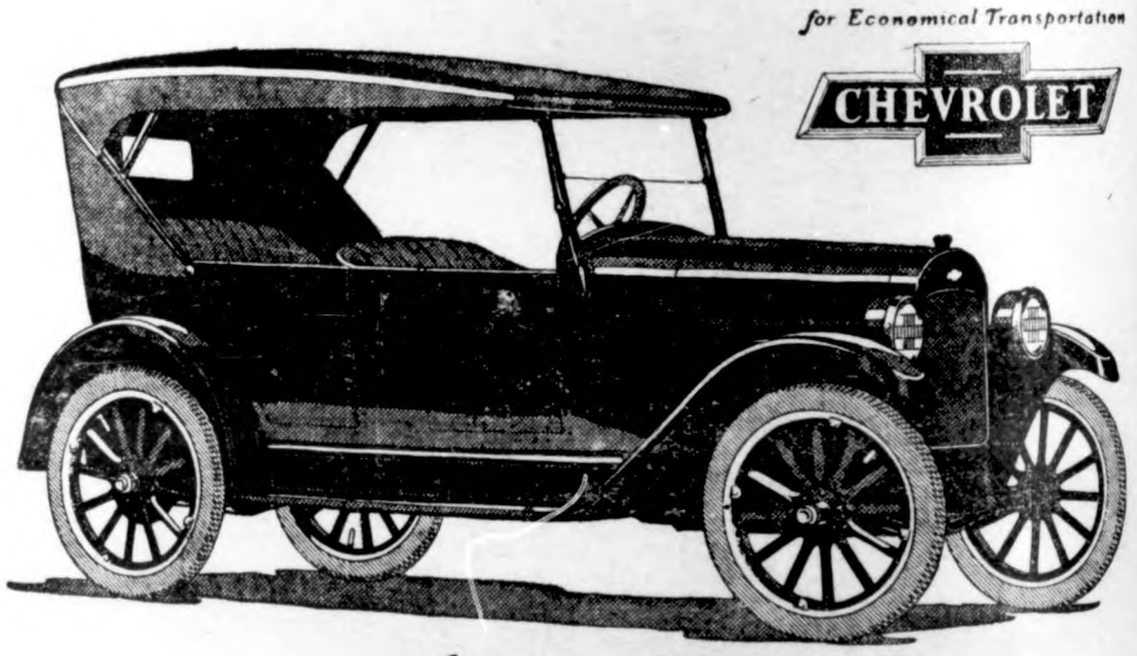
CHEVROLET



Announcing

1923 SUPERIOR Models

Again Chevrolet Motor Company has emphasized its admitted leadership as producer of the World's Lowest Priced Quality Automobiles.

The 1923 SUPERIOR models—one of which is here illustrated—represent the most sensational values in modern, economical transportation ever established.

QUALITY has been still further improved by more artistic design and added equipment.

ECONOMY has been still further increased by engineering refinements and added facilities.

SERVICE is now offered on a flat rate basis by 10,000 dealers and service stations.

PRICES remain the same in spite of added equipment and more expensive construction, which have greatly increased value.

Some Distinctive Features

Streamline body design with high hood; vacuum feed and rear gasoline tank on all models; drum type head lamps with legal lenses. Curtains open with doors of open models. Closed models have plate glass Ternstedt regulated windows, straight side cord tires, sun visor, windshield wiper and dash light. The Sedanette is equipped with auto trunk on rear.

Prices f. o. b. Flint, Mich.

THE ELECTRIC COMPANY

The **PUBLIC UTILITY** that doubtless is of the most importance in Community life today, is the ELECTRIC Light and Power Company, as its service is universally used and has become of such importance that no Community can be without it and Thrive.

This fact is self evident, as shown by comparison of Communities having efficient **ELECTRIC SERVICE** with those no so fortunate.

The City or Village that has efficient **ELECTRIC SERVICE** is the better business and residence place, and because of its modern advantages attracts new people, encourages enterprise, and grows.

The scope and diversification of the **ELECTRIC COMPANY'S** service touches the life of every resident in the Community; it lights your streets, business places and homes; runs your mills and factories; cooks your food; and heats your homes; and generally make living better, eaier and happier.

Being so VITAL a factor in our daily lives, the business should have the livest interest of all, and be deserving of support.

The Business of supplying these essential services is growing rapidly, and to meet the demand for Electric Light and Power, the Company is constntly extending its lines to serve new homes, additional communities, and to the farms.

The growth of **IOWA FALLS ELECTRIC COMPANY** which began business on October 4th, 1915, is due to this increasing demand and to the reliability of the Company's service and the efforts of the Management to meet the needs of the Communities.

At the present time the Company is serving 24 Cities, and Villages in Seven Counties, in the richest agricultural section of Iowa, and a substntial rural territory having a population of over 16,000 and now has over 4000 customers.

The Power Plants consist of the large steam generating station at Iowa Falls, with a capacity of 1342 Horse-Power, and the auxilliary plant at Garner.

The Plant at Iowa Falls is connected with the generating station of the Iowa Railway & Light Co. at Cedar Rapids, Ia. the largest system in the State of Iowa. 185 MILES OF HIGH tension lines connects the system which is under capable, careful Management.

The Company's earnings have developed from **NOTHING** on Oct. 4th, 1915, to over a **"Quarter of a Million Dollars"** for the year ending Mar. 31st, 1922.

More facts regarding the Company and its business will be given in the following issues of this Newspaper, as we believe you will want to **KNOW** your **ELECTRIC COMPANY.** Respectfully.

Iowa Falls Electric Comyany

IOWA FALLS, IOWA

Mr. and Mrs. Louis Sampson returned last Thursday from a four months visit with their daughters in Wisconsin.

Al Koerner and family drove to Iowa Falls Sunday for a visit with the M. O. Hocum family and also to enjoy the scenery around Iowa Falls.

R. A. Jorgenson and family accompanied by Fat Kluckhohn and family piled into our sheeny showcase Sunday and flivered around to Goodell, Belmond, Kanawha, Britt, Duncan, Garner and home again.

Corn husking season is on in full blast. Charlie Fritzell is the first one we have heard of who is all done husking. Charlie and Allie White have a corn picking machine and so Allie will also be through in a few days.

Owen Neuhring delivered 5 loads of oats to the Lau Elevator the other day. He hauled in a triple box and the five loads contained 565 bushels. One load weighing out 116 bushels and 8 pounds, which is the record for oats here this year.

Signal—Omer Kramer, a son of Otto Kramer, was quite seriously injured Saturday. He works for Chas. Griffen and had been to Klemme with a car and was binging some lumber home with him on the side of the car. He was driving at a good rate of speed, and just in front of Ben Katter's his car skidded and rolled over. He was more or less bruised about the body, and all day Sunday complained of pains in his abdomen. It was hoped that he would be sufficiently recovered yesterday that he might be grought home.

What About the Machinery

Are you going to let the Binders, Corn Plows, and a lot of other Costly farm machinery set outside this year?

Three or four years of outside sky for a roof and it means NEW MACHINERY for you!

A MACHINE SHED is a good investment. It will make you Big Interest and save your temper many a time if you don't have to hitch up to a rusty old plow or a binder that won't work.

NOW is the time before winter sets in.

Norhern Lumber Co.

Questions--

Which Are Put to Us Over the Phone and Otherwise

Will you have apples?

Yes, we have Ben Davis and Black Twig Apples ordered in car lot to arrive within the next week at about $1.50 or $1.60 per basket.

Later we will have Baldwins in barrells and Fancy Western Box Apples. Leave your orders.

What are potatoes worth?

35c per bushel is all that good spuds are worth right now for shipping out onto the market; however, where one farmer sells to another the price has been mostly 50c.

What is Flour worth?

We have a cracker-jack of a Southern Flour called "CONQUEROR," which is milled in Sunny Kansas, and makes good bread. Our price only $1.75—there is none better—try it.

When shall we buy sugar?

Don't be in a hurry. Sugar usually reaches the low point after the first of the year and before the first of March.

Price today—Cane $7.90. Beet $7.75.

What are eggs worth?

33c per dozen today.

Can we get grapes?

Yes, our last shipment of Michigan Concords are due now—at 45c per basket.

How about the diphtheria?

Reports come in through travellers that there are many, many cases in Mason City. Klemme now has two quarentine tags up and Garner has one or two.

Our Store is new and well ventilated and besides we gave it a thoro fumigation last Saturday night with formaldehyde.

So you see its best to trade in Klemme, for the farther you go away the worse you run into the Diphtheria.

Is Klemme the Best town on the map?

It sure is—A Stranger called to look through our Store. It was his first visit to our Town. He said, "I have heard so much about Klemme." "Pray, what did you hear?" we asked. "Oh," he said, "I have heard that the People around Klemme stick together so well, and are seldom seen trading in other towns or sending away." "Yes," we answered, "Klemme People know that it Pays to help their Town and it pays to help their Farmers.

sent about 110,000 men and into the military service be- Apr. 6, 1917 and Nov. 11, The average length of ser- as a few days more than 13 , which, if the bill is passed, ake the averagee amount to owa veteran approximately Thousands served longer than ths and 10 days or 700 days who will receive only 50 r 700 days, or $350, the max- amount provided for any one n.
e of the reasons advanced by Legionaires as to why the bond hould be voted are as follows: perience in other states where payments have been made that the ex-service men have, with out exception, put their to good advantage. In Ohio, per cent of the total amount ut has been used to meet neces obligations and indebtedness or invested, according to figures ed by Hugh K. Matrin, adjut- of the Ohio Department, Ameri- Legion, who made asurvey of ostst. Ohio has given bonuses 3, 000 veterans. Iowa would bonuses to about 100, 000 Iowa's rvice men and women are of lly as high caliber as Ohio vet- .
owa is one of the richest per a states in the union. Eighteen r states have already passed bon- ills. They are Maine, Massachu- , Michigan, Minnesota, Missouri on, Montana, Maryland, New pshire, New Jersey, New York, h Dakota, Ohio, Rhode Island, South Dakota, Vermont, Washington and Wisconsin. Illnois and Kansas will vote on bonus bills in 1923. If Iowa fails to pass its bill, it will be the first state before whom this issue has come to turn down its service men. Iowa has always been generous with her sons and daughters who have defended the nation in war.

"The $22,000,000 would come to Iowa in a lump. More than 90 per cent of it would be spent here. That would mean a tremendous business boom, from which all classes would benefit, for that amount placed in circulation all at once would naturally stimulate buying and selling.

" Iowa's veterans are among the state's best citizens. Few among them are reds. With rare exceptions they are intensely loyal to community, state and union. They were on every battlefield and in every sea engaged in the World war. They are now trying to carry on in the spirit of the G. A. R.

" Besides the unanimous vote for the bills passage in the Thirty-Ninth General Assembly both the major political parties in their recent conventions endorsed the measure and urged all voters of their respective faith to vote aye on the question. Most of the candidates for office have stated they are for the bill. Not one has openly opposed it. Not a single newspaper is objecting to its passage. No Organization has opposed it either. Only one man of any prominence has said a word against the principle of the proposition. Scores of organizations of business men, farmers and laborers, and many others have given it enthusiastic endorsement.

Although most Legion members predict that the issue will carry by a heavy majority, they have mapped out a campaign as if it were a life and death struggle. From now until election time intensive efforts will be made to thoroughly acquaint the voters with the provisions of the bill, what the Legionaires believe it will mean to ex-service men, their families and the state at large, and why they contend it should be passed.

Newspapers, magazines and other publications are being furnished with columns of material. Department headquarters and many of the 615 posts in Iowa are sending out speakers. Organizations who have not yet endorsed the measure are being urged to do so. The state adjutant is directing post commanders to perfect precinct organizations in their communities, who will be expected to get out the vote and see to it that everybody votes.

Assisting the Legion posts are the Legion Auxiliary units, numbering more than 400 in the state. The members who are women—mothers, wives, sisters, and daughters of Legionaires, have pledgeed the Legion their instinted cooperation and service in the campaign in every convention the Auxiliary has held since it was formed.

Department headquarters is ready to answer any questions, either from friend or foe, that may be asked concerning the bill.

THIEMAN—GOLL

Miss Sarah Thieman and G. A. Goll Married Last Wednesday

A quite wedding took place last Wednesday, October 18th, when Miss Sarah Thieman was united in marriage to Mr. G. A. Goll, both of this place. The marriage ceremony took place at the Reformed Church parsonage and was officiated by Rev. A. A. Depping, pastor of the couple.

The Bride is a daughter of Mr. and Mrs. Henry Thieman, Sr. of this city and is well and favorably known to most of our readers. She is a fine young lady in every way.

The Groom, Mr. G. A. Goll is one of the prosperous farmers of this community and has lived here a number of years and is likewise well and favorably known to our many readers of the Times.

We extend congratulations and our best wishes for a happy future.

Tom Nelson, Jr. and family spent Sunday at the home of Myron Haskin at Garner. The ladies are sisters.

CLARENCE ARNOLD DIED AT A MASON CITY HOSPITAL MONDAY AFTERNOON

Funeral Services Will Be Held At The Home At 1:30 P. M. Friday, Oct. 27

This community was saddly shocked Monday evening when the news was reported that Clarence Arnold had passed away at a Mason City hospital Monday afternoon at about five o'clock. About four weeks ago he went to the hospital for an operation but his condition was such that he became weaker and weaker until death finally releived his pain.

Not only his close relatives, but the entire community and all who knew him are mourning his untimely departure from this earth.

He was one of the proserous young farmers of Hancock County and always treated his fellow men as he would want to be treated himself; he was honest and fair in all his business dealings and his loss to the community will long be felt. The most sincere sympathies go out fron the community to his bereaved wife, brothers and sisters and relatives of Clarence Arnold.

The funeral services will be held at the beautiful home south of this city tomorrow afternoon at 1:30 o'clock and will be conducted by Rev. Barslow, of Whiting, Iowa, a friend and former pastor of Mr. Arnold.

We will publish the obituary of Mr. Arnold in our next issue of the Times.

WILLER WINS MATCH OVER OTTIS PITTINGER TUESDAY

Was A Good Match—Willer Was Too Fast For Mason Citian

The wrestling match here Tuesday night gave the mat fans of this locality a touch of real excitement when Hans Willer. State Middleweight Champion, of this city, met Ottis Pittinger, fast Mason City mat grappler in a finish match. Pittinger won the first fall over Willer. Then Willer came back strong in the second round and pinned Pittinger to the canvas in eighteen minutes. The third round was barely started when it was all over. Willer won the third fall in a few seconds less than three minutes. Willer used his punishing toe hold again Tuesday night which always proves to be a hold his apponet cannot break and they have to take the count.

Another match is being planned for about three weeks from now between Willer and a man from Mason City who has visions of throwing our man. Schober will appear on the preliminary again in some sensational work.

Birthday Dinner

Sunday Grandma Mary Fuller and Albert Fuller celebrated their respective birthdays, and for the occasion invited in a number of relatives and friends to help celebrate the event and a big dinner was served at the country home of Mr .and Mrs. Albert Fuller. Grandma Fuller is now 83 three years old, and is spry for her advanced years. Albert wouldn't tell his age but he is old enough to have voted a number of times.

A feature of the dinner was the large birthday cake which had 83 candles on it.

People were there from Klemme. Dows, Garner, Clear Lake and Ventura. About forty-five were present to help celebrate the event.

BROTHERS APART 40 YEARS MEET IN ARKANSAS JAIL

They Were Both Engaged In Moonshine Business

John Spencer of Pope County and Harry Spencer of Conway county, Arkansas, half brothers, met for the first time in forty years when they were both placed in the same cell in the county jail at Little Rock, Ark. Both were under arrest on liquor charges.

The father of the two men married twice. John, the elder, was living with other relatives at the time his father was killed forty years ago. His stepmother and her child, Harry left the community within a few weeks and the boys lost all trace of each other.

W. F. Pavey and family and Aug. Baack and family drove to Nashua Sunday to view the Little Brown Church.

HANCOCK COUNTY TEACHERS' INSTITUTE

To Hancock County Teachers, School Officiers and Patrons:

A County Institute for the teachers of Hancock County will be held in the school building at Britt. on Thursday and Friday, November the 9th and 10th.

The mere announcement that Dr. C. P. Colegrove, ex-president of Upper Iowa University,. Supt. M. G. Clark of Sioux City Public Schools Prof. Fullerton of thee Iowa State Teachers' College, and Miss Mary Madden of Madison, South Dakota will work in this institute, gives assurance that there will be two days of unusual inspiration and profit for Hancock County Teachers.

School Law Extract

"The County Superintendent shall hold annually a County Teachers' Institute at such times as the schools of the County are generally in session. The School Board of every school district except in city independent school districts where 25 or more teachers are regularly employed, shall adjourn the school or the schools of said district for not less than two days in each school year in order to allow teachers to attend county teachers' institutes held in the county. without loss of pay. Any teacher failing to attend said institute two days shall forfeit his or her average daily salary for each day of non-attendance, except when excused by the county superintendent for physical disability to perform his or her duties in the school room.

A cordial invitation is extended to persons interested in education to attend any or all sessions.

J. R. Baggs, Supt. Hancock County Schools.

LITTLE CHILD CLAWED BY BEAR AT WEST BEND GROTTO

Second Time In Three Years That Bears Have Injured Children

A child from Storm Lake, who, with its parents were visiting the Grotto at West Bend Sunday suffered a severe injury to its arm near the shoulder when old Dick, the mammoth bear caught it with his paws and pulled and clawed the arm of the little one. The child was finally released by men using a crowbar to pry loose the bear's claws. As the local doctor was absent the child was taken to Algona for treatment. The bear will be chained or killed that no such occurence will take place again. Father Dobberstein, the proprietor of the Grotto, is very much worried over the affair.

Three years ago a little girl from Britt was nearly killed by one of the bears. That bear was killed immediately after, but they thought this bear was safe as it appeared to be quite gentle. Warning signs have always been posted all about the grotto.

THIEVES LOOT HOMES AND BUSINESS PLACES AT MESERVEY

Meservey Thieves Remain at Large; Sheriff Still After Them

eta onishudrl etaaa .,: xzfiflm

Thieves who broke into a number of houses and stores in Meservey Sunday night and made away with various articles, worked on foot. according to a theory advanced the other morning by Sheriff F. E. Marsh, of Cerro Gordo county, who worked on the case all day Monday and Tuesday.

Because of that fact that he worked first on a theory that the thieves had used a car in which to get away after the robberies the sheriff stated he had failed to make a capture as yet. It is thought that the thieves will be captured soon.

A traveling man stated that the thieves had also attempted to steal a car bu they didn't get far as they made the mistake of filling it with kerosine instead of gasoline.

HANCOCK COUNTY PAVING NOW OPEN TO TRAFFIC

The paving between Duncan and Britt was opened Tuesday and the concrete cleaned off so that one can now travel across Hancock County all the way on a paved road.

The gravelling between Klemme and Goodell has been finished and the gravelling between Garner and Forest City is progressing nicely so Hancock County will soon be classed as the best road county in the state.

RADLOFFS CELEBRATE 25th ANNIVERSARY OF THEI MARRIAGE

SCHOOL NOTES

The first issues of the "Current Events" have arrived and have been distributed to the subscribers. The Current Events is a fine paper for High School and Grade students.

Several of the boys from the country are absent on account of the corn picking season. Other students are absent on account of sickness, and some are absent for unnecessary reasons. We think tardiness can be prevented in most cases and would like to see an improvement in both tardiness and absence.

Miss McKahan has arranged a plan by which all those who play the piano will have a chance to display their talent. Adala Schroeder was pianist the first five weeks. Maybelle Johnson the sixth week, Florence Behringer the seventh week and Stella Bock this week.

Professor Neese gave a very interesting lecture on "The Duties of a Good Citizen," Friday morning. These duties applied to the people in the home, school and the community life. Any student carrying these fourteen duties out fully is guaranteed one hundred per cent in deportment. The chief one is. "Self Control." Others are "Kindness," "Industry," "Helpfullness," "Self Respect," "Loyalty," "Unselfishness," "Co-operation," "Cleanliness," "Punctuality," "Honesty," "Courtesy," "Obedience," and "Perseverence."

The things that all students of the school are asked to do are 'Come to school; make your required grades; and be a lady and a gentleman.'

Last Wednesday in Advanced Civics the Sophomore Class drew lots for drawing expansion maps of the United States and marked off the several purchases and cessions. Maurine Hake and Gearald Koerner wrote a paper on "This Country of Ours." All four pages were very good.

The class in Political Economy are studying the "Production of Wealth" this week. We have learned that the three factors of production are: land, labor and capital. Land being the most important. The United States is the most powerful and civlized nation in the world and here abounds those natural resources that are at the foundation of production upon which all civilization rests.

Seed Corn Scoring

The class in Agriculture has taken up the scoring of seed corn. At the present time the students have just begun to learn something of this important study. Prof. Neese has not told the class very much about the work as yet, but is trying to find out how much knowledge the class really has of the work. (This knowledge is probably very limited.) When each student has the first ten ears judged he is going to critisise the scores and tell the class the correct method of seed corn scoring.

The work in this line will continue until the students are able to give a reasonable correct score for an ear of corn without the aid of the score card.

The students in the General Science class are writing descriptions of the different planets. Some of their topics for study are: Measuring the distance of the planets from each other and from the sun; Whether there is liable to be a collision between any of the planets; Will the Earth ever be able to communicate with Mars if there are intelligent people on that planet; Climate conditions and other conditions which are of great interest to all of us, not only as students but as people interested in the science of the world.

The third grade of the Primary Room have been dramatizing the story, "The Grasshopper And The Ant."

Weaving Wanted

Work guaranteed. Sew your rags, bring to C. C. Mayne's, Klemme, I will do the rest. Prices reasonable, come and see or write. I buy old clothes, pay 10c per lb. 10-29tfc

MR. AND MRS. FRED RADLOFF CELEBRATE SILVER WEDDING

Friends Gther At Their Home For Surprise Saturday Night

On Friday, October 20th was the twenty-fifth wedding Anniversary of Mr. and Mrs. Fred Radloff, Sr. who live on the Wittenberg farm near Klemme.

The day passed with nothing out of the usual but the following night, Saturday, when Mr. and Mrs. Radloff were retiring—in fact Fred was already well on the way to "soozeland" when there was an awful big racket in the yard and all the cars in Iowa seemed to have turned their headlights on the Radloff home. We presume Fred thought of burglars but soon the noise turned into that usually given newly-weds, a regular old fashioned chairvari and the house was gladly thrown open to the sixty or more neighbors and friends who had come to make merry and help Mr. and Mrs. Radloff celebrate their Silver Wedding. Congratulations were then in order after which games were played and all enjoyed a good time. A Silver Wedding would not be a success without some sort of a wedding so a mock marriage was aptly staged by "Bill" Hempel who took the part of The Blushing Bride (we are unable to get a report on what "she" wore but presume a beautiful calico dress, trimmed with red and green ribbon and a mosquito net veil. la la, etc) and the shaky-kneed Handsome Groom was none other than Ray Ford (he looks like a fat movie comedian.) Mr. Anderson took the part of the preacher and his solemn questions and the witty and humorous answers given by the handsome Groom and the Blushing Bride kept the guests in an uproar.

Later in the evening delightful refreshments were served, which the visitors had brought in heavily laden baskets for the occasion.

At a late hour the company departed wishing Mr. and Mrs. adloff many more years of happy wedded life and that they might live to enjoy their Golden Wedding Anniversary.

SWANSON—ETCHEN

Miss Esther Swanson and Mr. John Etchen Married Thursday

Miss Esther Swanson and Mr. John Etchen, both of this place, were united in marriage at Mason City last Thursday afternoon, October 19th. Thus is breifly told the happy uniting of two of Klemme's most popular young people.

Thursday evening a large number of friends of the couple gathered at the Oscar Swanson home to tender Mr. and Mrs. John Etchen a wedding shower of miscellaneous gift both useful and beautiful. A dance was also given and refreshments were served and all enjoyed a very fine time celebrating the wedding of these two young people.

Mrs. Etchen is a daughter of Mr. and Mrs. Oscar Swanson, who reside on their fine farm a few miles from Klemme. She is a fine young lady, well versed in the art of house keeping as well as talented in othber ways. The Groom is a son of Mr. and Mrs. Geo. Platt of Klemme and is numbered as one of the business men of Klemme, being proprietor of Etchen Bros. Billiard Parlor.

Monday Mr. and Mrs. Etchen left for Chicago for a wedding trip of a week's time or more, and will visit various places.

The Times extends congratulations and best wishes.

CONTRACT FOR GRAVELING ON WILSON HIGHWAY FINISHED

Now One Of The Best Roads In The County

The work of gravelling the Wilson Highway between Klemme and the Wright County line just south of Goodell has been completed.

Truck drivers huled and dumped the last load of gravel on the highway the other day.

When the gravel is well smoothed and packed down hard the road will be as smooth and as good as pavine. It is now a mighty fine road which will stand a lot of traffic and will not be affected by heavy rain.

Ancient City Is Found on Island

Thriving Town Existed on Isle Royale, Lake Superior 1,000 Years Ago.

COPPER ONCE MINED THERE

Archaeologist Finds Traces of Town After Three Years' Search—Will Head Expedition to Make Further Explorations.

Duluth, Minn.—William P. Ferguson, archaeologist and author, of Franklin, Pa., announced here that he had discovered the ruins of an ancient city, inhabited probably 1,000 to 2,000 years ago, on Isle Royale, off the north shore of Lake Superior. Isle Royale is a part of the state of Michigan.

Mr. Ferguson announced he would return next summer with another expedition to conduct further explorations of the city, which was situated, he said, on the southerly side of the island and consisted of a series of semi-underground dwellings.

Copper Mined There Long Ago.

"Most every one knows," Mr. Ferguson said in making known his discovery, "that copper was mined on Isle Royale many years ago on land now covered with pine trees. The island is covered with traces of these mines, and yet almost nothing has been done to explore the workings.

"No one has found any of the remains of the old miners, although there are many stories of finding tempered copper weapons. I have found several stone hammers, each supplied with thongs, and have been interested for the last three years in establishing reports that a town existed on the south of the island.

"A writer named Gilman was authority for this report fifty years ago, but his description and location were so vague that it was impossible for any one to make anything out of them."

Mr. Ferguson told of his first trip in the region at the outlet of Siskiwitt lake, which he said he thought tallied with Gilman's data, but there was no trace of a town. Last year he found a waterfall which he thought was the one mentioned in Gilman's report. Because of the lateness of the season, however, the explorer was unable to finish his work, he said, and so made a third trip this season with a party of five assistants, but their first efforts failed to locate the town.

At length Mr. Ferguson concluded that a ridge, if located in the vicinity, would answer a certain description of the topography of the country as given by the writer of a half century ago. He continued his search, he said, and finally was rewarded by finding what he considers unmistakable traces of a town between Hay bay and the waterfall on the south side of Isle Royale.

Used Himself to Haul His Family 300 Miles

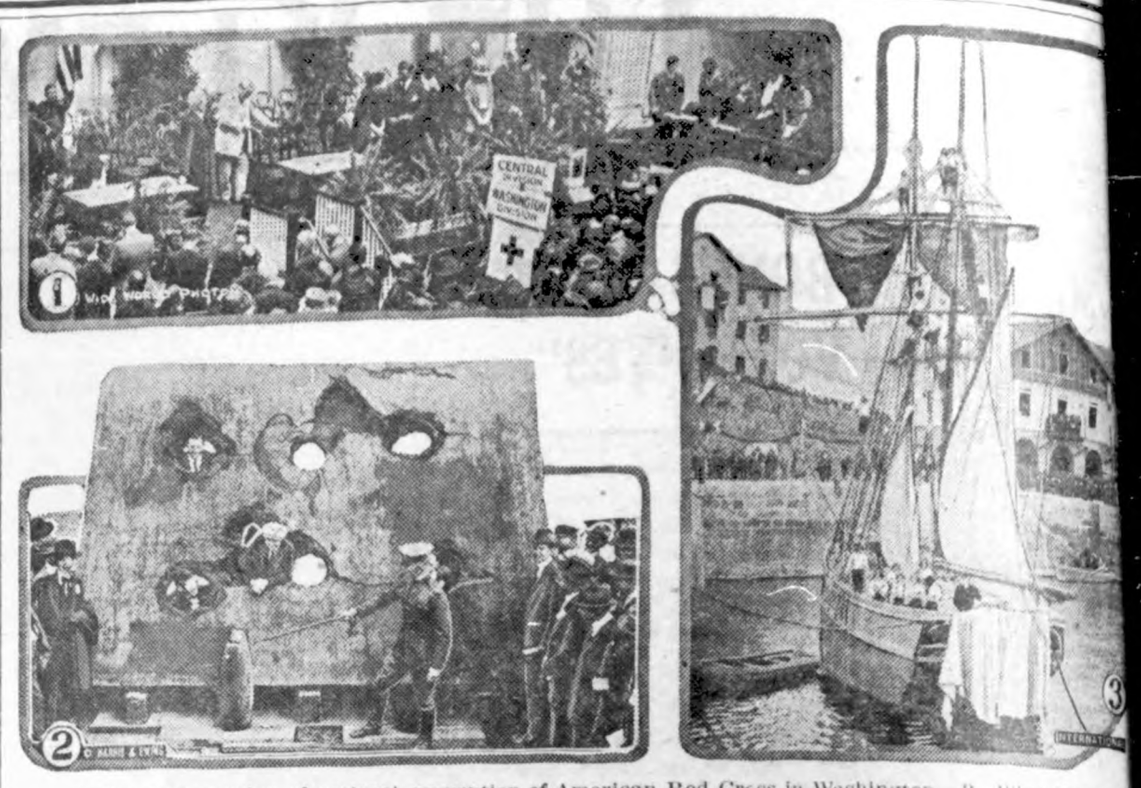
Claiming that he had traveled more than 300 miles with all his belongings in a small cart hitched to himself, Ralph de Witt of Sparta, Mo., with his wife, three small children, and a little dog, reached the Arkansas river cotton fields to pick cotton. He left home with but $6 in his pockets.

Aged Woman in County Home Made Own Wine

An eighty-one-year-old woman has lost her haven of refuge at the county old folks' home at Muskogee, Okla., because the authorities discovered a complete wine-making apparatus hidden under her bed, together with several quarts of the completed product. Officials refused to disclose her name, but said she had stolen the grapes from the county farm.

Mute Boy Gains Speech.

Clarksburg, W. Va.—Clarence McAtee, ten years old, a mute since birth, suddenly gained the power of speech after praying at the altar of a tented church where evangelistic services were being conducted by the Pentecostal denomination. The story of the seeming miracle was told by Mrs. Ida Tribet of Sturgis, Mich., the evangelist in charge of the revival. Those acquainted with the boy say he had never spoken before.



1—Scene at opening of national convention of American Red Cross in Washington. 2—What 16-inch shell did to steel target in gun tests at Aberdeen proving ground, Maryland. 3—Replica of vessel in which Juan Sebastian Elcano made first voyage around the world, built for tercentenary celebration of that event at Guetaria, Spain.

Dane King Bows to Girl's Wish

Allows Daughter of Austrian Colonel to Become Subject and Remain in Denmark.

PERSONAL PLEA TO MONARCH

Relates Her Troubles to King Christian, Who Intercedes in Her Behalf—Foster Parents Eager to Adopt Her.

Copenhagen. — Large numbers of Austrian children, particularly little boys and girls from Vienna, have been passing their summers in Denmark as guests of every class of the Danish community. But it has been distinctly understood by the Danish organizations arranging these charity visits and the Danish authorities that no child should be allowed to stay in Denmark more than six months unless special permission were given.

Leavetakings Are Painful.

Many of these Austrian children have grown very fond of their Danish foster parents, and vice versa, and the leavetakings at the railway stations, when these children are sent back to Austria, have in many instances been pitiful. The youngsters did not hide their sorrow and despair at going away.

Little Mitzi Wolf-Shickinger is nine and the daughter of an Austrian colonel who was killed on the Italian frontier during the war. Her mother was left to shift for Mitzi and herself on a pension that hardly covered the cost of rent, and she was happy when she got an opportunity of sending Mitzi on a long holiday to kind and hospitable people in Denmark. Mitzi and her foster parents became very fond of each other. The latter were so well connected that they managed to obtain permission for Mitzi to stay for a whole year. But when the local authorities could do no more the foster parents were told that Mitzi had to return to Vienna.

King Grants Her Wish.

The next day Mitzi and her foster mother left the provincial town in which they were living and traveled all day and night to Copenhagen. His majesty the king was going to give public audiences, and Mitzi and her friends had made a plan.

The king received Mitzi. She told him of her troubles, and that she wanted to stay forever in Denmark. Her foster parents were willing to adopt her, and her mother in Vienna had consented to renounce all claims of motherhood. Could she possibly stay? King Christian smiled and kissed her and promised to look into the matter. A few days later she received a personal letter from the king telling her that he had used his royal prerogative in her behalf and that whenever she wanted to she could become a little Danish girl.

Eddie Rickenbacker Takes a Bride

This shows Eddie Rickenbacker, American ace and auto speed king, with his bride, formerly Mrs. Adelaide Durant, divorced wife of an automobile maker. They are abroad for the honeymoon.

AUSTRALIAN WAR LOSS 58,850

Mortality Among Soldiers in Europe During War Placed at 7.75 Per Cent a Year.

Sydney, N. S. W.—The rate of mortality among soldiers absent from Australia during the World war was approximately 7¾ per cent per annum, as compared with approximately ½ per cent per annum for a body of men of similar age under normal Australian conditions, according to the report just issued by the commonwealth statistician.

In the calculations all deaths abroad were taken into consideration except those after discharge from the service. The total deaths abroad were 58,850.

In the South African campaign of 1899-1902, the mortality rate for all British troops was 38.7 a thousand a year, or less than 4 per cent a year, while in the Crimean war of 1854-55 the mortality among British forces was 15½ per cent per annum, the statistician's report said.

Squirrel Shuts Off Power Plants.

Marlboro, Mass.—This city and eight towns were shut off from electric power when a gray squirrel, running over a high-voltage wire, was electrocuted, causing a short circuit. Plants in Marlboro, Southboro, Northboro and Westboro were shut down for three hours.

NEWS REVIEW OF CURRENT EVENTS

Mudania Protocol Is Signed and Greeks Are Fleeing From Turkish Territory.

PEACE CONFERENCE ON NOV. 1

Attorney General Daugherty's "Dry Seas" Order Creates a Stir—May Help Ship Subsidy Bill—Great Britain Pays America $50,000,000 Interest.

By EDWARD W. PICKARD

ATTORNEY General Daugherty has ruled that no intoxicating liquor may be served on any American vessel anywhere, and that no vessel whatever may bring liquor within the three-mile limit, even though it be sealed. Do you agree with the opinion that this ruling will increase the chances of passage of the ship subsidy bill; and what do you think of that measure?

TURKEY for the Turks—that in a word will be the effect of the protocol signed by the allied commanders and the Kemalists Thursday morning at the little village of Mudania, if the Near East peace conference soon to be held follows along the same lines. Something like a million and a half Greeks who have been residents of Asia Minor, Constantinople and eastern Thrace are fleeing westward, fairly panic stricken at the thought of massacre and outrage which Christian peoples have been taught to expect from the Moslem. An added incentive to their flight is afforded by the fear of Turkish reprisal for the acts of the Greek army in Anatolia and the Greek civilians in Constantinople.

Truly the plight of these refugees is most serious. Abandoning their long-time homes and sacrificing their possessions, they are struggling in disorganized masses to get out of Turkish territory, and the means of transportation are pitifully scant. Pestilence already is appearing in the crowded concentration camps, and food is scarce. Of course they are all trying to get to Greece, but what will become of them there, is a problem. The government at Athens is striving to devise means of caring for them, but the country already is crowded and has neither the food nor the money to provide for these hundreds of thousands of newcomers. In eastern Thrace the Greeks are working feverishly to save all they can of their harvest. There is a lot of wheat there and the Greek government may purchase it to help stave off a famine. The Thracian delegates in the Greek parliament have cabled to Secretary Hoover for aid from America.

Another throng that is trying to get out of Turkish territory is composed of the many thousands of Russian refugees. They believe that Kemal has secretly promised the soviet government that he will send them back to Russia, and the record of the Bolsheviki leaves them in no doubt as to what their fate would be there.

COMPLETION of the armistice protocol was accomplished at six o'clock Thursday morning and the document was signed by Generals Harington, Charpy, Mombelli and Ismet Pasha, for Great Britain, France, Italy and the Turkish Nationalists respectively. Full agreement was reached only after many anxious days during which Ismet's excessive demands were met by General Harington's calm and unafraid firmness. The Englishman told the Turk plainly that his government had said its last word, and that if its terms were not accepted the Turks must take the consequences. He reminded Ismet that England had a strong navy, a good army and an abundance of guns. "While the British people want peace" said he, "they are equally determined to have fair play and are dangerous opponents when aroused." Meantime General Charpy received instructions from Paris, where Lord Curzon had been in conference with Premier Poincare, and announced that France adhered to the terms proposed. Ismet Pasha, losing thus the support he may have counted on, had no alternative but to yield, and this he did with good grace. The Greek representatives sent a note saying they could not sign the protocol, but the Turks were assured that it would be effective in three days despite this refusal. "Let's sign," said Ismet, and the signatures were appended and the threat of war faded out. Later Greece decided to sign.

The terms of the Mudania convention are substantially as given in this column a week ago. Greece is given fifteen days to evacuate Thrace as far west as the Maritza river, handing over the civil powers to the allied authorities, who will immediately transfer them to the Turkish authorities. Turkish gendarmerie in limited numbers will control the territory for the time being, with allied troops on guard to prevent disorders, but within thirty days after Greece gets out Thrace is to be turned over wholly to the Turks. New neutral zones in the Chanak and Ismid areas, in the Constantinople peninsula and in Gallipoli are to be defined by mixed commissions and are to be respected by the Angora government.

It is understood the peace conference will open on November 1 in Scutari, or possibly in some city in Italy. It is probable that Bulgaria, Georgia and the Ukraine will be invited to send representatives, but not the Moscow government. Other nations that are likely to have delegates, in addition to Great Britain, France, Turkey and Italy, are Jugo-Slavia, Rumania, Greece, Hungary, Austria, Czechoslovakia and possibly Poland.

HAVING avoided war with Turkey without losing dignity, and retaining for the present the actual control of the Dardanelles, the British government seems once more solidly entrenched, and the talk of retiring Prime Minister Lloyd George, which broke out furiously a few days ago, is dying down. His opponents at home, indeed, now have no fit man to suggest as his successor, for Bonar Law, upon whom they had counted, has renewed his fealty to the Welshman, as has Lord Birkenhead. The Unionists are said to have decided to stick by the coalition and make it practically a permanent party when the general election comes, which probably will be about Christmas. The premier, after a week of retirement in the country, made a notable speech Saturday in Manchester, telling his opponents what he thought of them and demanding the support of the country for his policies.

BUCHAREST was en fete Saturday, when King Ferdinand and Queen Marie were formally crowned as rulers of the kingdom of Rumania which the war enlarged by the addition of Bessarabia and Transylvania. The ceremonies were gorgeous and many other nations were represented by princes and high dignitaries. In view of the fact that soviet Russia still threatens Rumania, it is worthy of note that France sent Marshal Foch and with him General Weygand, who organized Poland's successful opposition to the Bolsheviki two years ago.

ATTORNEY General Daugherty certainly stirred up the animals when he barred liquors not only from all American vessels, but even from all other ships while within the American three-mile limits. At first there was a storm of comment punctuated with excited predictions of what foreign governments would do to us in the way of retaliation and with predictions that all foreign steamship lines would divert their ships to Canadian ports, leaving New York, Boston, Philadelphia, San Francisco, Seattle and our other coast cities to go to wreck and ruin. With the subsidence of the tempest these facts appear: The British government says it has no interest in the domestic legislation of the United States, which it has a perfect right to put into operation, and if British subjects break United States law they will have to take the consequences. The French government may send a protest to Washington, but will wait to see how the decree is enforced and how it affects French interests.

PREDICTS A REAL COLD WINTER

Long Distance Weather Prophet Has Been Good Guesser.

Last Year He Was the Only Prognosticator Who Stuck Out for Mild, Open Winter—This One Will Be Real Rough.

Packerville, Conn. — Twice every year for twenty-three years the Packerville "Cloud Digger," an unidentified weather prophet, comes out with his predictions of the weather six months ahead and has made many wonderful, correct prognostications, including the Galveston storm, California earthquake, the earthquake at Jamaica and the volcanic eruption on the French West Indies.

Last year the "Cloud Digger" was the only long-distance weather prophet in America who emphatically proclaimed a mild, open winter and was much laughed at.

This year, as the sun crosses the line in a northeast wind, "Cloud Digger" says: "The winter of 1922-23 is to be a hummer and one long to be remembered by residents, young and old. Unlike the few last years, winter this year will be upon us early in December and the old weather man will pass out all kinds of gales, storms, high tides and severe cold snaps for four long months.

"All natural indications point to a cold winter. Great abundance of nuts, fruit and berries are one indication, the activity of animals in storing their winter supply, another. The thickness of shucks on all kinds of nuts, corn husks and animal furs is another indication, and planetary conditions, coupled with a northeast wind at the equinoxial period, another. One storm will follow another all winter long. More snow will fall this winter coming than has fallen for many years, but look out for more rain than snow, ground covered with ice and general 'old-fashioned' winter conditions.

"The coming winter will be one long to be remembered and will break up suddenly in March, 1923, with terrific rains and floods. Those who joked at my predictions of an easy winter one year ago today will grin the other way this year."

Finds Wedding Ring Lost 27 Years.

Trenton, N. J.—A wedding ring lost 27 years ago was found and returned to its owner, Mrs. Conrad Margraf of 841 Genesee street, this city, by George Schroeder of 609 Beatty street. The ring came to light when Schroeder was constructing a new porch on his home, formerly occupied by Mrs. Margraf.

Catch Devil Fish 18 Feet Wide.

Gulfport, Miss.—Fishermen viewed with amazement the monster devil fish captured by Charles Swanson and Harold Oscinach while trawling for shrimp. The fish measures 18 feet across and 13 feet in length. Estimates of its weight ranged from 2,000 to 3,500 pounds.

TALENT CARNIVAL WINS

Post of Vicksburg, Miss., Nets More Than $5,000 for Home for Organization.

More than $5,000 was obtained by Post No. 3 of the American Legion at Vicksburg, Miss., by a carnival put on by home talent recently, for the post of a Legion home in that city.

Most of the shows and booths were run by Legionnaires with the exception of those operated by the Rotarians and Knights of Columbus, which organizations built their own rocking tank, show and dance booth, respectively. Every organization in the city was asked to contribute a booth or show of some kind, each with its own emblem or insignia and each paying its expenses out of the proceeds.

One of the Carnival Tents.

All money taken in and turning the profits over to Allein post.

The Board of Trade, Chamber of Commerce, Civic league, League of Women Voters, Rotary club, Exchange club, Kiwanis club, Knights of Columbus, Masonic club, Jewish club, Vicksburg Shrine club, Italian Social club, Modern Woodmen of the World, Loyal Order of Moose, Daughters of the Confederacy, the American Legion auxiliary, Voiture Locale No. 191, de la Societe des 40 Hommes et 8 Chevaux and others among the organizations using their own members as workers and performers.

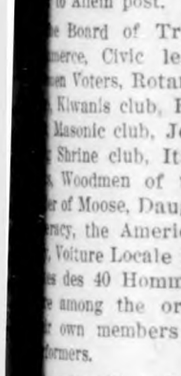
The pretty girl and ugly man contest was held. It was a great community entertainment. All profits stayed in the city to go into a civic improvement. There were no sore spots after it was over, as is the case too often when a professional carnival company uses the Legion name to make a success of such an affair. Mayor Hayes of Vicksburg had this to say of it:

"Not one incident that would mar the pleasure of anyone occurred during the five nights. Everybody wanted to help make the carnival a success, and I never saw a happier community in any life. Vicksburg is 100 per cent for the American Legion."

POST 82, AIDED IN TWO WARS

Oldest Member of Paris American Legion Post Auxiliary, Awarded Two Medals by Government.

Mrs. Emily C. Heilig scraped lint for the wounded soldiers of the Union army during the Civil war and for more than three years during the World war worked in the surgical dressing room of the American Ambulance hospital at Neuilly, France. She is the oldest member of the American Legion auxiliary to Paris post, her son, Sterling Heilig, author and newspaper man, having served with the American army.



During the Civil war Mrs. Heilig took part in the great sanitary fair at Philadelphia when ladies gave their sheets, tablecloths and napkins from which the lint was unravelled and rolled into tons of bandages. There were no gauze compresses in those days. These last, sixty years after her first war experience, she made at Neuilly. For her work from 1915 to 1918 she was awarded two medals by the French government.

She was eighty-two last April and in a recent letter to Mrs. Gilbert Jones, president of the Paris post auxiliary, she said it was a joy to have been associated with "those noble American women." Mrs. Heilig was born in Wilkesbarre, Pa. She was a sister of Rear Admiral George F. Kuntz, U. S. N., retired, who died a few months ago. Admiral Kuntz was with Farragut in his attacks on the forts along the Mississippi river, but returned to active duty with the World war.

LEGION IS MORE EFFICIENT

Lemuel Bolles, National Adjutant of Organization, Points to Enthusiasm Throughout Northwest.

Swinging from Indianapolis through Minnesota to Washington on the Pacific coast in the northwest, and back through California, Colorado and Kansas, addressing a state convention of the American Legion in each of the five states, Lemuel Bolles, national adjutant, has returned to headquarters with three outstanding impressions, as the result of his trip:

These he catalogued as first, a distinct improvement in the deliberations and personnel; second, one type of American citizen found in each state, and third, general enthusiasm toward educational work and community service, which, of course, includes the proper care of disabled veterans.

"The crowds looked the same," he said. "The men acted the same. There is a distinct type, these Legionnaires. They look one in the eye. They are keen and outspoken, self-confident. They constitute the ideal type of an American citizen."

In speaking of the improvement in delegations to the state conventions, care was taken to explain that subjects were more clearly defined than in the past, the committees stepped forward with their work in more confidence, the machinery ran smoother, and altogether capable leadership was asserting itself, more and more.

An illustration was given:

"In two states factional fights had been waged," the national adjutant said. "They threatened to split the departments, but those fights never got to the floor of the convention. The trouble was ironed out in conferences. Leaders made concessions, all for the general welfare and progress of the legion.

"The spirit of the elections was 'not the best fellow, but the best man,' and this keynote was struck in each of the five conventions."

"There is no question but what the Legion is more efficient today in Minnesota, Washington, California, Colorado and Kansas than it was a year ago," he said.

Paying a tribute to the Kansas department, he told of the American Legion there taking a keen interest in the boys of the state industrial school, acting as guardians and big brothers.

"I was impressed by the independence of the Minnesota Legion," he said. "They never have taken a dollar from any source. Their department is splendidly organized. They are capable of making their own way without outside aid, and they are doing it with a vim."

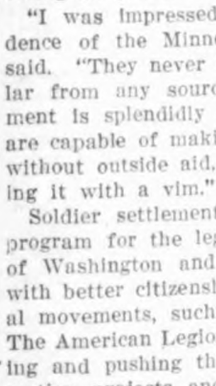
Soldier settlement work is a vital program for the legion in the states of Washington and California, along with better citizenship and educational movements, such as night schools. The American Legion there is advocating and pushing through state reclamation projects and seeing that former service men are given preference not only in the work being done, but in the results. In California, soldier colonies are being established.

The determination of the Colorado legion to see that the hospitals for former service men in that country are properly maintained was outstanding, also the Legion's declaration that the benefits of that department be confined to American Legion members only and to the disabled, always. Along with this the point was made plain that the Colorado Legion department also is the best friend of the efficient hospitals.

BOTH SERVED THEIR COUNTRY

Mrs. Paul Akin of Indianapolis Also Answered Call When Husband Joined the Navy.

Back there in the fall of 1917, when the sadness of parting invaded thousands of American homes, Paul Akin went home to dinner one night in Indianapolis and said to Mrs. Akin:



"Well, dear, the time has come. I'm going to join up—the navy."

"So?" said Mrs. Akin. "Well, I reckon I'll go along."

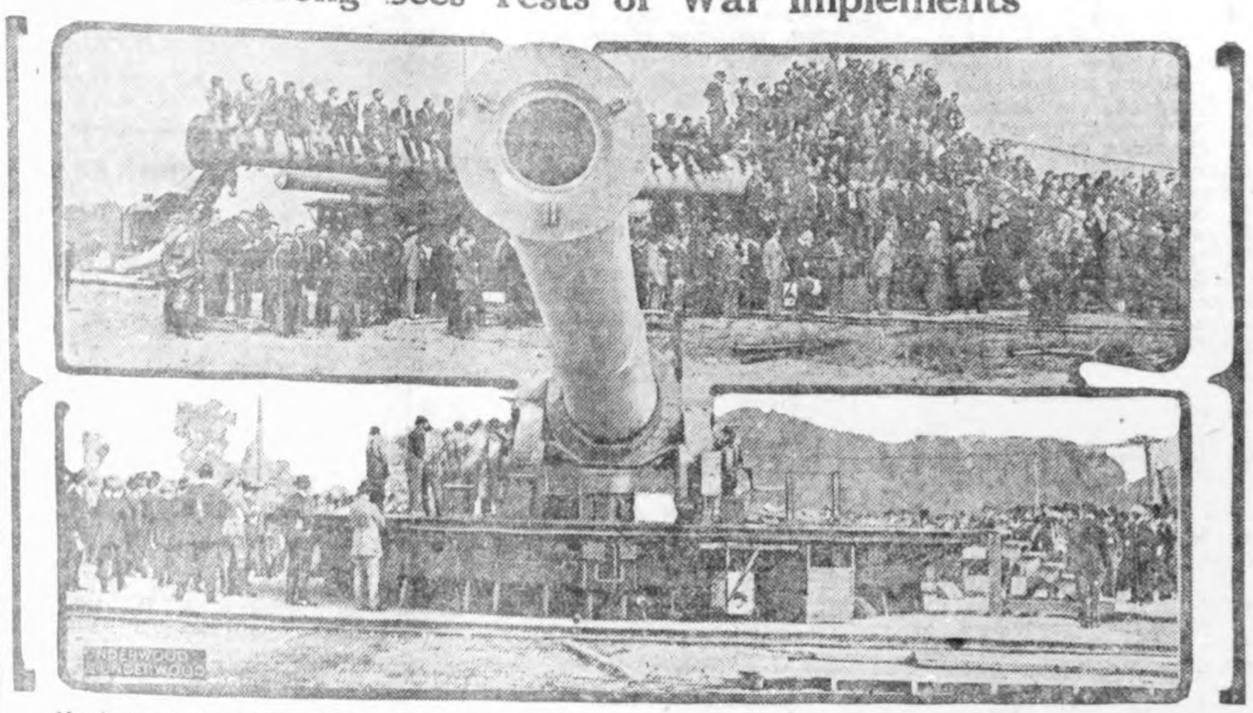
And the two of them enlisted and left Indianapolis together. They took the oath of allegiance and were sworn in together. It was the only couple recorded so.

Mr. Akin went to the Navy department at Washington and was assigned to the office of naval intelligence, later being transferred to the bureau of navigation. She served her full time. And now, back again in the role of housekeeper, she is active in the Woman's auxiliary of the American Legion—one of the most active, in fact. She garnered for the auxiliary to the Admiral George Dewey post of Indianapolis the honor of obtaining the first permanent charter issued by national headquarters, and is president of her organization.

Doubtful.

It always pay to tell a maid,
Hers is the first kiss you've essayed.
But in the kiss I'm not so sure—
It pays to play the amateur.
—American Legion Weekly.

Throng Sees Tests of War Implements



Members of the cabinet, high officials, army officers and hundreds of civilian spectators went to the Aberdeen proving ground in Maryland the other day and were entertained with tests of big guns, aircraft and bombing.

Donates His Pay for War Memorial

To play the chimes at Indiana university for five years and donating his pay of $100 a month to war memorial buildings in memory of the university's soldier dead is the unique pledge of Archie Warner, band leader of the university. The Indiana chimes are among the largest in the country and it is no easy task to play them, but Warner climbs into the tower every evening at 6 o'clock and cheerfully goes through with the program of Indiana songs. His $500 pledge was applied to a fund of $413,000 raised on the university campus within thirty hours.

Unveiling Eugene Field Monument

With pretty ceremony, which included the singing of "Little Boy Blue" and "Sleep, Little Pigeon," a beautiful monument to Eugene Field was dedicated the other day in Lincoln park, Chicago. It is the work of Edward McCarten and was paid for by penny contributions of children.

Scene of Near East Conference

Waterfront of the little town of Mudania where the allied and Kemalist military leaders were in a conference designed to avert war between the Turks and Great Britain. In the foreground is a Turkish ship, sunk at the wharf by the Greeks.

WORTH KNOWING

The Arabs of southern Egypt traded with India 1000 B. C.

Jitneys first appeared in Los Angeles in 1914.

India raises about 5,000,000 tons of seeds from which various kinds of oil are made annually.

Electric machinery has been invented for marking, listing and counting clothing in laundries.

TEN-FOOT RAINFALL

A freak rainfall covering a spot about ten feet square, which continued to fall in Alexandria, Va., for several days, is puzzling scientists. While the weather bureau declares that Alexandria's freak rain is a physical impossibility, the fact remains that in front of 417 South Washington street and nowhere else, it was raining for days. Hundreds of curious persons flocked to the scene, skeptical, but were converted before leaving. The gentle rainfall was a reality without doubt.

WARNS HOUSEWIVES

For the careless housewife who often causes some mishap around the home, leaving a hot iron on the ironing board and causing a fire, pouring kerosene on the stove, etc., Mrs. Lawrence Vail Coleman, chairman of the home society committee of the Safety Institute of America, who is in charge of a study of the accident hazards of the home and of means of their prevention, has issued a list of "Don'ts" for the housewife. Mrs. Coleman has made a careful study of the suggestions and aids for the household to prevent accidents, and hopes that every housewife will observe them.

The Crisis.

"I heered a feller down at the crossroads store telling last night that them people over there in Rooshy are eating the bark off'n the trees, and—" related a neighbor.

"Aw, well," nonchalantly replied Gap Johnson of Rumpus Ridge. "I don't reckon the kind of trees they have over there are much loss, no way."

"He said, too, that they are eating their dogs—"

"Goodgodlemighty! Eating their dogs? By thunder, this country has got to do something for them Rooshians, right away!"—Kansas City Star.

Logic.

The old gentleman was angry and he said to his spendthrift son who had approached him for money, "My father never gave me half as much money as I give you."

"Were you satisfied?" the son asked.

"Of course I was!"

"Well, then, why should he have given you any more?"—Boston Transcript.

HOME TOWN HELPS

TO PREVENT SOIL EROSION

Cities Should Copy Idea of Railroads and Make More Use of Rambler Roses.

Experiments have proved that nothing prevents soil erosion on steep banks more effectually than the rambler roses. These decorative plants spread their root system over large areas, are sturdy in cane growth and establish a mat over a wider surface than any other available plant.

These roses are highly ornamental, a fact impressed on all railroad travelers. The right of way is frequently made gay with blankets of red and pink blooms wherever soil erosion is to be feared. In the rocky cuts a curtain of color is made to give a picturesque touch to the surroundings that under ordinary circumstances do not reward the search for the beautiful. The green of the shelving banks presents a harmonious background for the bright roses whose luxuriant flowering bespeaks the care with which they are tended.

Many railroads have beautified their rights of way and station grounds. Flowers and shrubs are maintained at most of their stations, especially in suburban communities and important towns in which land is not too high in price. In this work the climbing rose almost invariably plays a part, but it is not for beauty alone that it is used on cuts and on steep banks. In such plantings it holds the soil fast, checks earth slides and contributes to the safety of the road. The roses delight the traveler's eye in the blossoming season and protect his life twelve months in the year.—New York Herald.

MOST LASTING OF MEMORIALS

Every City and Town in the Country Should Set Out Trees to Honor Heroes.

Since the day Bryant made the planting of a tree poetical by his famous poem tree planting has taken on more significance. When, at the signing of the armistice, the American Forestry association proposed the idea of memorial trees, the suggestion was received with instant approval. Since then trees have been planted by individuals, schools, colleges, churches, patriotic organizations—not alone for the man who gave his life to his country, but to honor those who offered their lives.

Hundreds of acres have been purchased by some cities, where memorial trees will be placed, a tree for everyone in war service from a given county. "Roads of Remembrance" is another idea of the American Forestry association, which has been taken up by women's clubs, automobile clubs and highway associations. Elaborate instructions have been issued from time to time by the association on the value of planting trees, the best kind of trees for planting, the way to obtain the stock, the preparations for planting, injuries to trees, insect enemies, care after planting and selected lists of trees suitable for planting in the various states, so that the efforts at memorials of this kind may not be made in vain.

Zoning in St. Paul.

It would be futile to attempt to alter the present zoning ordinance so as to make it acceptable to everybody. Any restrictions on the kind of buildings to be permitted in different zones or the laying out of zones that would meet no objection whatever would be worthless. The very idea of zoning involves taking away from some property owners the power to use their property in a way that would be injurious to their neighbors. Some such owners will object in any case, not wishing to have any limitations made. If the restrictions are made so vague that they permit a certain amount of depreciation of values by unneighborly building, there might as well not be any restrictions.—St. Paul Pioneer Press.

Citizenship Pointers.

Greatness is half grit, the other half work.

People today take too much interest in funerals and not enough in life.

Patriotism begins at home. It means loyalty to home, church, school and community.

What is the difference, as a member of the community, between the man who walks five blocks to your store and the man who drives 10 miles?

The biggest liar God ever made is the man who says he is self made. The father and mother and society he rubbed elbows with made him what he is.—Kansas City Star.

Make Public Structures Beautiful.

It is impressing that care should be bestowed on the specifications for every public structure that is erected in a city. Certainly it is no less necessary to make our school buildings as beautiful as we build other structures. It has its lessons for youth as much as formal lessons they are taught in their classes. There is every reason for the beauty of a city increasing steadily with the years where there is a careful avoidance of erecting buildings that would detract from the general appearance of the city.

Gov. Kendall Will Give Memorial Address at Grave of Gen. Grant

May 30th.

The heighest honor within the gift of the Grand Army of New York has been bestowed on Governor Kendall. He has been invited to make the memorial day address at the tomb of General Grant in New York City on May 30th, next. The invitation followed the address the governor made to the old soldiers in Des Moines recently which they praised highly. The New York veterans point to a long line of distinguished speakers who have been the memorial day orators in the past. Governor Kendall has accepted the invitation.

Man Near Menlo Runs Over a Timber Wolf on Public Highway Near That Place.

C. M. Ruggles, of Menlo, Guthrie county, was driving his automobile along the public highway west of Winterset the other night when a wolf made its appearance in the middle of the road, evidently attracted by the bright light. The animal took the road straight ahead at full speed. Mr. Ruggles threw wide open the throttle of his car, and soon ran over the fleet-footed beast, the weight of the car crushing out its life. The wolf was of the timber variety and was evidently an old timer.

STATE OF IOWA
Executive Department
A PROCLAMATION

By the Governor:

Pursuant to law, I, N. E. Kendall, Governor of the State of Iowa do hereby proclaim, make known, and give notice that at the general election to be held on the Tuesday next after the first Monday in November, A. D., 1922, it being

THE SEVENTH DAY OF NOVEMBER, A. D., 1922

the following offices are to be filled by the vote of all the electors of the State, to-wit:

The office of Senator to the Congress of the United States from the State of Iowa to fill the unexpired portion of the term of William S. Kenyon, resigned;

The office of Governor of the State of Iowa;

The office of Lieutenant-Governor of the State of Iowa;

The office of Secretary of State of the State of Iowa;

The office of Auditor of State of the State of Iowa;

The office of Treasurer of State of the State of Iowa;

The office of Attorney General of the State of Iowa;

The office of Superintendent of Public Instruction of the State of Iowa;

The office of Railroad Commissioner of the State of Iowa to succeed Dwight Lewis;

The office of Railroad Commissioner of the State of Iowa, to succeed Chas. Webster;

The office of Judge of the Supreme Court of the State of Iowa to succeed William D. Evans;

The office of Judge of the Supreme Court of the State of Iowa to succeed Truman S. Stevens;

I further proclaim, make known, and give notice that at said general election so to be held on the seventh day of November, A. D., 1922, the following offices are to be filled by the vote of the electors of the several Congressional, Senatorial, Representative and Judicial Districts, to-wit:

By the vote of the electors of the following Congressional Districts:

The office of Representative in Congress from the First Congressional District;

The office of Representative in Congress from the Second Congressional District;

The office of Representative in Congress from the Third Congressional District;

The office of Representative in Congress from the Fourth Congressional District;

The office of Representative in Congress from the Fifth Congressional District;

The office of Representative in Congress from the Sixth Congressional District;

The office of Representative in Congress from the Seventh Congressional District;

The office of Representative in Congress from the Eighth Congressional District;

The office of Representative in Congress from the Ninth Congressional District;

The office of Representative in Congress from the Tenth Congressional District;

The office of Representative in Congress from the Eleventh Congressional District.

By vote of the electors of the following Senatorial Districts:

The office of Senator in the General Assembly of the State of Iowa for the First, Seventh, Ninth, Tenth, Twelfth, Thirteenth, Eighteenth, Twentieth, Twenty-first, Twenty-second, Twenty-ninth, Thirtieth, Thirty-fourth, Thirty-fifth, Thirty-seventh, Thirty-eighth, Forty-second, Forty-fourth, Forty- fifth Forty-eighth, and Fiftieth Senatorial Districts, each one Senator.

By the vote of the electors of the following Representative Districts:

The office of Representative in the General Assembly of the State of Iowa from the First, Thirty-first, Thirty-seventh, Forty-third, Forty-fifth; Forty-eighth; Fifty-eighth; Sixty-sixth and Sixty-ninth Representative Districts, each, two representatives from the Second, Third, Fourth, Fifth, Sixth, Seventh, Eighth, 9th, Tenth, Eleventh, 12th, Thirteenth, Fourteenth, Fifteenth, Sixteenth, Seventeenth, Eighteenth, Nineteenth, Twentieth, Twenty-first, Twenty-second, Twenty-third Twenty-fourth, Twenty-fifth, Twentysixth, Twenty-seventh, Twenty-eighth, Twenty-ninth, Thirtieth, Thirty-second, Thirty-third, Thirty-fourth, Thirty-fifth, Thirty-sixth, Thirty-eighth, Thirty-ninth, Fortieth, Forty-first; Forty-second, Forty-fourth, Forty-sixth, Forty-seventh, Forty-ninth, Fiftieth, Fifty-first, Fifty-second, Fifty-third, Fifty-fourth, Fifty-fifth, Fifty-sixth, Fifty-seventh, Fifty-ninth, Sixtieth, Sixty-First, Sixty-second, Sixty-third, Sixty-fourth, Sixty-fifth, Sixty-seventh, Sixty-eighth, Seventieth, Seventy-first, Seventy-second, Seventy-third, Seventy-fourth, Seventy, fifth, Seventy-sixth, Seventy-seventh, Seventy-eighth, Seventy-ninth, Eightieth, Eighty-first, 82nd, Eighty-third, Eighty-fourth, Eighty-fifth, Eighty-sixth, Eighty-seventh, Eighty-eighth, Eighty-ninth, Ninetieth, Ninety-first, Ninety-second, Ninety-third, Ninety-fourth, Ninety-fifth, Ninety-sixth, Ninety-seventh, Ninety-eighth and Ninety-ninth Representative Districts, each one Representative.

By the vote of the electors of the following Judicial Districts:

The office of Judge of the District Court as follows:

The First Judicial District, two Judges;

The Second Judicial District, four Judges;

The Third Judicial District, three Judges, and one Judge for short term;

The fourth Judicial District, three Judges and one Judge for short termr;

The Fifth Judicial District, three Judges;

The Sixth Judicial District, three Judges;

The Seventh Judicial District, five Judges;

The Eighth Judicial District, one Judge to succeed Ralph Otto;

The Ninth Judicial District, five Judges and two Judges for short term;

The Tenth Judicial District, three Judges;

The Eleventh Judicial District, four Judges;

The Twelfth Judicial District, two Judges;

The Thirteenth Judicial District, two Judges;

The Fourteenth Judicial District, two Judges;

The Fifteenth Judicial District, four Judges;

The Sixteenth Judicial District, two Judges;

The Seventeenth Judicial District, two Judges;

The Eighteenth Judicial District, four Judges; and one Judge for short term;

The Nineteenth, Judicial District, two Judges;

The Twentieth Judicial District, one Judge to succeed James D. Smyth;

The Twenty-first Judicial District two Judges;

I do hereby further proclaim, make known and give notice that at the general election to be held on the Tuesday next after the first Monday in November, A. D., 1922, it being the seventh day of November, A. D., 1922, in pursuance of Article VII, Section 5 of the Constitution of Iowa, there will be submitted the question as to the adoption and approval of Chapter 332, Acts of the Thirty-Ninth General Assembly, which question shall be submitted upon a seperate ballot in the following language:

"Shall the following public measure, being an act of the 39th General Assembly, be adopted and approved?"

SOLDIERS' BONUS LAW

AN ACT authorizing the state of Iowa to become indebted in the amount of twenty-two million dollars, and providing for the issue and sale of bonds of said state in evidence thereof, to procure funds for and pay a bonus to persons who served in the military or naval service of the United States at any time between the sixth day of April nineteen hundred seventeen, and the eleventh day of November, nineteen hundred eighteen, or their successors in interest, providing for a board to administer such payments, providing for an additional bonus for persons under disability, providing for the imposition, levy and collection of a direct annual tax sufficient to pay the principal and interest on said bonds, providing penalties for the violation of the provisions of this act, providing for application of any surplus to the retirement of the indebtedness herein created, and providing for submission of this act to the people to be voted upon at the general election to be held in the year nineteen hundred twenty-two.

Be it enacted by the General Assembly of the State of Iowa:

Section 1. The State of Iowa is hereby authorized to become indebted in the amount of twenty-two million dollars, ($22,000,000.00) and in evidence thereof there shall be issued and sold negotiable coupon bonds of said state, as hereinafter provided, and the proceeds thereof shall be paid into the treasury of the state to be expended for the payment of a bonus to the persons defined in section four (4) of this act or for the benefit of such persons as prescribed by section eight (8) of this act, and for expenses incurred in carrying out the provisions of this act.

Section 2. The treasurer of the state is hereby directed to cause to be prepared negotiable coupon bonds of this state in the amount of twenty-two million dollars, ($22,000,000.00) such bonds to bear interest at the rate of not to exceed five per cent per annum, which interest shall be paid semiannually. Such bonds shall be issued so that said indebtedness shall be payable in twenty equal annual installments, the last of which shall be within twenty years from date of issue. Said bonds shall be signed by the governor, under the great seal of said state, attested by the secretary of state and countersigned by the treasurer of state, and the full faith, credit and resources of the state of Iowa shall be pledged for the payment thereof. The interest coupons attached to said bonds shall bear the lithographed facsimile signatures of said officials. The treasurer of state shall sell said bonds to obtain funds to carry out the provisions of this act, and to make the payments hereinafter provided. Such bonds shall be sold at not less than the par value thereof and accrued interest thereon to the highest and most responsible bidder after advertising for a period of twenty consecutive days, Sundays excepted, in at least two daily newspapers printed in the city of Des Moines. Advertisements of sale shall recite that the treasurer of state, in his discretion, may reject any or all bids received and, in such event, he shall readvertise for bids in the form and manner above described as many times as in his judgment may be necessary to effect a satisfactory sale.

Section 3. The proceeds of such bonds so paid into the treasury of state shall constitute a bonus fund and shall be distributed to the persons entitled thereto, as hereinafter prescribed. Said twenty-two million dollars ($22,000,000.00) is hereby appropriated out of said bonus fund for the purpose of carrying out the provisions of this act.

Section 4. Every person, male or female, including army, navy, and marine corps nurses who served in the military or naval service of the United States at any time between April 6, 1917, and November 11, 1918, and who at the time of entering into such service was a resident of the state of Iowa, and who was honorably separated or discharged from such service, or who is still in active service, or has been retired, or has been furloughed to a reserve, shall be entitled to receive from the proceeds of such bonds as a bonus, the sum of fifty cents (.50) for each day that such person was in active service, such bonus not to exceed a total sum of three hundred and fifty dollars ($350.00). No person shall be entitled to such payment or allowance whose only service was in the students army training corps, or who received from another state a bonus or gratuity of a like nature provided for by this act, or who being in such service, received civilian pay for civilian work. No person shall be entitled to such payment or allowance who being in the military or naval service of the United States, subsequent to April 6, 1917, refused on conscientious, political or other grounds to subject himself to military discipline or to render unqualified service. The husband or wife, child or children, mother, father, sisters or brothers, in the order named and none other, of any person as defined in this section, who died while in the service or who has deceased before receiving the benefits of this act, shall be paid the sum that such deceased persons would be entitled to hereunder if such deceased person had lived.

Section 5. Before receiving any sum under the provisions of this act, the applicant shall file with the clerk of the district court of the county in which he or she resides or resided at the time of induction into service, or with the adjutant general, application therefor on forms provided by the adjutant general, such applications to be so filed on or before December 31, 1924; provided, that when such application is filed with the clerk of the district court it shall be the duty of said clerk to transmit said application to the adjutant general forthwith. Such application shall state facts sufficient to establish the status of such applicant within a class as defined in section four (4) of this act, and shall be duly verified.

Section 6. Who ever knowingly makes a false statement, oral or written, relating to a material fact in supporting a claim under the provisions of this act, shall be punished by a fine of not more than five hundred dollars ($500.00), or be imprisoned for not more than one year, or both, and shall forfeit all benefits he or she might have been entitled to under this act.

Section 7. There is hereby created a board to be known as the "Bonus Board" to consist of the state auditor, the state treasurer, the adjutant general and the adjutant of the Iowa Department of the American Legion. It shall be the duty of said board to examine into such applications and make any other examination necessary to establish facts, and approve or disapprove the same. Whenever any such applicaton is approved by said board, it shall be the duty of the adjutant general to prepare a voucher and transmit the same to the state auditor; said auditor shall issue a warrant for the amount stated therein, and the state treasurer shall pay such warrant out of said bonus fund. No assignment of any right or claim to benefits hereunder made prior to the issuance of the state auditor's warrant herein provided for, shall be valid, and any transfer or attempt to transfer any such right or claim or any part thereof by any beneficiary prior to the issuance of such warrant and the acquiring or attempting to acquire by any other person of any interest in or title to such claim prior to the issuance of such warrant, shall be a misdemeanor and punishable as such.

Section 8. After the payment of all approved claims and expenses of administration of the board herein created, all funds remaining in the hands of the bonus board, after December 31, 1924, not in excess of two million dollars, ($2,000,000.00) shall constitute an additional bonus to be administered by the bonus board for the amelioration of the condition of residents of this state within the classes as defined in section four (4) of this act, who are suffering from disability. All funds remaining in the hands of the bonus board after December 31, 1924, in excess of the two million dollars ($2,000,000.00) disability fund, shall be applied to the payment of the debt herein created.

Section 9. The bonus board is hereby empowered to employ such assistants and to incur such other expenses as may be necessary for the administration and carrying out of the provisions of this act, and the funds necessary for such administration and carrying out of the provisions of this act shall be expended from said bonus fund; such assistants as said board may determine shall give bond in such amount as may be fixed by said board, and shall whenever practicable be persons within the classes as defined in section four (4) of this act.

Section 10. All payments and allowances made under this act shall be exempt from all taxation, and from levy and sale on execution, and all bonds issued hereunder shall be exempt from taxation.

Section 11. To provide for the payment of the principal of said bonds so issued and sold and the interest thereon as the same become due and mature, there is hereby imposed and levied upon all the taxable property within the state of Iowa, in addition to all other taxes, a direct annual tax of each of the years said bonds are oustanding, sufficient in amount to produce the sum of one million one hundred thousand dollars ($1,100,000.00) each year for twenty years for the payment of principal of said bonds and sufficient in amount to produce said additional sums as may be needed to pay the interest on such bonds. The treasurer of state shall annually certify to the executive council, prior to the time for the levy of general state taxes, the amount of money required to be raised to pay the principal and interest on such bonds maturing in the ensuing year and said executive council shall annually fix the rate percentam necessary to be levied and assessed upon the valuation of the taxable property within this state to produce funds sufficient to pay the principal of and interest upon such bonds as the same become payable, and such additional annual direct tax shall be levied, certified, and collected at the same time in the same manner as are taxes for general state purposes.

Section 12. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder of the act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment has been rendered.

Section 13. This law, after publication, shall be submitted to the people of this state at the general election to be held in November nineteen hundred twenty-two, and shall not take effect unless at such election it shall receive a majority of all votes cast for and against it. Separate ballots shall be provided for the electors which shall be in substantially the following form:

(Notice to Voters: For an affirmative vote upon any question submitted upon this ballot, mark a cross (X) mark in the square after the word "Yes." For a negative vote, make a similar mark in the square following the word "No.")

"Shall the following public measure, being an act of the 39th General Assembly, be adopted and approved?"	
Yes	
No	

(Here insert in full this law)

Section 14. This act shall take effect immedately upon its adoption and approval at such election.

Approved March 23, A. D. 1921.

I, Walter C. Ramsay, secretary of state for the State of Iowa, and custodian of the Laws and Acts of the General Assembly, do hereby certify that the foregoing is a true and correct copy of a certain enactment of the General Assembly known as Chapter 332, Acts of the Thirty-ninth General Assembly, and was approved by the Governor on March 23 A. D. 1921.

I further certify that this publication is in compliance with Section 1, Article 7 of the Constitution of Iowa relative to the submission to the electorate of the question of incurring debts by the state.

Given under my hand and the seal of my office affixed this 27th day of June, A. D. 1922.

W. C. RAMSAY,
Secretary of State.

(SEAL)

WHEREFORE, all electors throughout the State and throughout the several districts herein especially enumerated will take due notice and the sheriffs of the several counties will take official notice hereof and be governed accordingly.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Iowa.

Done at Des Moines this sixth day of October, A. D. 1922.

N. E. KENDALL,
Governor.

ATTEST:
W. C. RAMSAY,
Secretary of State

SHERIFF'S PROCLAMATION

To the Electors of Hancock County:

Pursuant to the law and the proclamation of the Governor of the State of Iowa, I, E. P. Hanson, Sheriff of Hancock County, proclaim that in addition to the above named officers to be voted for at the General Election to be held on the Tuesday next after the first Monday in November, 1922, it being the seventh day of November, A. D. 1922 the following offices are to be filled by the vote of the electors of the county of Hancock, to-wit:

One County Auditor
One County Treasurer
One Clerk of District Court.
One County Recorder
One County Sheriff
One County Attorney
One County Coroner
One County Supervisor.

Of which Proclamation and of the holding of such election all persons are required to take due notice and govern themselves as provided by law.

At said election in all precincts in Hancock county, the polls will open at nine o'clock in the forenoon and close at eight o'clock in the evening.

Dated this 22nd day of October, 1922, A. D.

E. P. HANSON,
Sheriff of Hancock County, Ia.

Corner - Iowa

Rev. Charles Koerner and wife, of Kansas were visiting with Klemme relatives a few days last week. Rev. Koerner and A. G. Koerner are cousins.

Mrs. Orr, mother of Mrs. Frank Kluckhohn and Mrs. Harvey Stille, returned from Mason City Saturday where she had been for an operation.

Mr. and Mrs. Frank Ward, and son Chester, of Burt, Iowa, drove to Klemme Sunday, and accompanied by Mr. and Mrs. August Ridder of this place, went out to the Ben Ridder home for a Sunday dinner.

Miss Verona Green and a gentleman friend from Orchard, Iowa, were callers in Klemme Sunday. The Green family lived in this city last year. Verona stated her father and mother were now divorced. She was here to get her school credits.

Arlene, little daughter of Mr and Mrs. John Woods is a patient at a Mason City hospital. The little one was suffering from nose-bleeding and for a time she was quite sick. Late reports say she is now getting along nicely.

The following people all drove to Forest City Sunday for a visit with relatives and friends: Mr. and Mrs. Wes Heifner, Mr. and Mrs. John Suckow, Mr. and Mrs. Ernest Schuldt and daughter Geneive, and Victor Schoenwetter and family.

Mr. and Mrs. G. W. Kluckhohn, accompanied by Mr. and Mrs. Fred Kluckhohn and daughter, Thelma, drove over to Hampton Sunday to visit with Mr. Washburn, of Ventura who is in the Hampton hospital recovering from an operation. Mr. Washburn is a brother-in-law of Mr. Kluckhohn.

Signal—A week from next Tuesday, Nov. 7, is general election day. A word regarding the soldier bonus ballot may save some making mistakes in the marking of the same. The regular election ballot printed on white paper will be marked in the usual way. On the soldier bonus ballot near the top will be found two squares, one after the word "yes" and the other after the word "no." An affirmative or negative vote should be made by marking an "X" in one of these squares. Near the bottom of the ticket are two more squares, but these should not be marked as they are simply a part of the law. We do not know that the marking of these squares at the bottom would invalidate the ballot, but that may be true, and no one should take this chance. Simply mark the square at the head of the ticket opposite the word "yes" or "no," and you have your ballot properly marked.

Box Social

A Box Social and program will be held at school, District, Ell No. 6, Friday evening Nov. 3rd. Ladies please bring boxes, men don't forget your pocket book. All welcome.

RUPTURE EXPERT HERE

Seeley, Famous in This Specialty, Called To Mason City

F. H. Seeley, of Chicago and Philadelphia, the noted truss expert, will personally be at the Hanford Hotel, and will remain in Mason City this Wednesday only, Nov. 1. Mr. Seeley says: "The Spermatic Shield will not only retain any cage of rupture perfectly, but contracts the opening in 10 days on the average case. Being a vast advancement over all former methods—exemplifying instntaneous effects immediately appreciable and withstanding any strain or position no matter the size or location. Large or difficult cases, or **incissional ruptures** (following operations) specially solicited. This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions. Warning—All cases should be cautioned against the use of any elastic or web truss with understraps, as same rest where the lump is and not where the opening is, producing complications necessitating surgical operations. Mr. Seeley has documents from the United States Government, Washington D. C., for inspection. He will be glad to demonstrate without charge or fit them if desired. Business demands prevent stopping at any other place in this section.

P. S.—Every statement in this notice has been verified before the Federal and State Courts.—F. H. Seeley.

Home Office, 117 N. Dearborn St., Chicago. —Advertisement

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Because of the Communion Service at the Liberty Church next Sunday morning, there will be no Sunday school at the church, but we will meet with the Liberty school at 10 o'clock. All our people from Klemme are expected to attend the Liberty church services in the forenoon.

In the evening Rev. L. J. Brenner will preach here in town.

Quarterly Conference in Klemme, Saturday evening at 7:30. All the Quarterly Conference members should be present.

W. C. Bergmann.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning sermon at 10.00 A. M.
Sunday School at 11:00 A. M.
Evening Sermon at 7:45 o'clock.
Prayer services on Thursdaay evening at the church.

The W. F. M. S. meet at the home of Mrs. W. F. Missman and elect officers for thee coming year

The Sacrament of our Lord's Supper will be administered on Sunday morning. Let each prepare for this solemn service and be early and reverent.

We had the unexpected pleasure of a sermon from our District Superintendent last Sunday morning. Those who failed to hear him missed a treat and a blessing.

—Arthur B. Gedye.

Laments Vacant Pulpits.—In an address before the upper Iowa Methodist conference held at Mason City, Rev. J. H. Cudlipp declared that there are 30,000 vacant pulpits in the United States alone. These deplorable conditions, he says, are owing to the fact that ministeers are paid no more than street-sweepers and have no assurance that they will be able to live in comfort and decency after their useful days are over.

PARENTS OF HERO GIVEN MEDAL AND CHECK FOR $600

They Will Invest the Money in Their First Home

Mr. and Mrs. Nicholas Lund, of Cedar Falls, parents of Philip Lund who lost his life in an attempt to save the life of Miss Marie Victor of Ackley, a college student, from drowning in the Cedar River, in May 1921, have received a hero bronze medal and a check for $600 from the Carnegie hero fund. They are going to invest the money in a home, which is something they have never owned having always rented property.

SCOUT NOTES

Last Monday evening the Boy Scouts held their meeting at Rev Gedye's home on account of the Scout room being cluttered up with carpenters materials. It was the meeting held for several weeks on account of the diphtheria epidemic.

The chief business of the troop was registration with National Headquarters and election of officers.

Following are the officers for the coming year:

Patrol Leader	Clarence Elder
Assist. P. Leader	Harl Gimer
Scribe	Andrew Wellemeyer
Sentinel	Frank Gibbs
Assist. Sentinel	John Fuller
Quartermaster	Vernon Turgasen

The assistant Patrol Leader acts as treasurer of the troop.

The Campfire girls have asked permission to use the Scout Room as their headquarters also. The Scouts have agreed to let this organization share in thier club room.

It was decided to hold meetings only twice a month during the winter months. It is hard for the Scouts form the country to attend the meetings during the cold weather and the do not have so many activities during this season of the year.

This meeting ended the first year of the career of the scouts in Klemme. Th Scout work as a whole has been very successful and we hope this worthy organization may see a great many more birthdays in this community.

In Revenue From Motor Vehicle Licenses, Among the Forty-eight States.

Iowa stands third among the forty-eight states in the total revenue from motor vehicle licenses, according to figures compiled by the federal bureau of public roads. The report for last year shows that Iowa took in $7,719,127 from motor license fees. Only two other states passed that mark: New York collected $10,288,858 and Pennsylvania, $9,470,174. Next below Iowa is Ohio with fees amounting tto $6,894,159. California is fifth with $7,834,098; Illinois sixth with $6,803,556; Michigan seventh with $6,751,824, and Minnesota eighth, with $5,672,428. Nevada received only $102,800 from motor vehicle license fees and stands at the bottom of the list. In eighteen states the total revenue from automobile licenses was less than a million dollars. The total revenue for all states was $122,269,071.

Next to Texas, Iowa Has the Largest Number of Hereford Cattle in America.

Two brothers, J. H. and G. S. Burleigh, farmers near Mechanicsville, Cedar county, introduced the first Hereford cattle into Iowa in 1870. Now this state ranks next to Texas in having the largest number of this breed of cattle in America. The past year there were 8,055 transfers placed upon the records from Iowa. Iowa cattlemen who feed Herefords for the commercial market have made notable records during the last few weeks. The first cattle to sell for $12 a hundred weight in the Chicago market this year were six carloads of Herefords fed by Oscar Cain, Frank Smith, and G. B. Hughes, of Bagley, Guthrie county and G. F. Gleason of Villa Grove. On October 4, Herman J. Buck of Westside, Crawford county, set a new record at Chicago, when he sold a load of Herefords at $12.65 a hundred-weight, the highest price in two years.

Advertising Manager of Heart Publication Co., Receives Small Pittance of $26,000 a Year.

Not so very many years ago Merrill Meigs was just an ordinary, average boy, playing about the streets of Malcom, Poweshiek county. He was named after an uncle. Now he is Merrill Meigs, advertising manager of the Hearst publications in Chicago at a salary of $26,000 a year.

Young Man Near New Hampton Is Devoting His Time to Raising Flower Bulbs.

J. F. Grawe, the sage of Waverly, says that W. G. Drewelow, a young man living on a farm three and one-half miles southeast of New Hampton, is a flower and bulb enthusiast. He is using five acres of the home farm to carry out his hobby. The result is that he has raised thousands of bulbs from stock from Holland. He is specializing in high grade products and finds a ready market for all of the bulbs and flowers he can raise. The Azalia Mollus is a rare flowering shrub grown in Holland. None have been coming from that country for five years. They are very rare in the United States. Mr. Drewel has an old plant on the farm and from it he has this year raised about 15,000 seedlings. This flower comes in bloom just before Decoration day and before any leaves are visible. The flower is a common orange and is attractive to the eye from a long distance. The blossoms stay on a long time.

By Spraying and Pruning an Old Neglected Orchard Is Yielding Fine Crops at Clarinda.

Iowa has harvested the largest apple crop in its history. Where pruning and spraying were given attention the quality is excellent and even when this precaution was not taken there are more perfect apples than usual. Some years ago the state got hold of an old orchard in the purchase of some land to be added to the farm at the state hospital at Clarinda. The orchard was badly run down, but experts proceeded to apply correct treatment and now it is one of the most prolific bearers in the country. This season 4,800 bushels of choice fruit were picked. Of this yield 1,300 were placed in cold storage.

THE ELECTRIC COMPANY

The rapid growth of IOWA FALLS ELECTRIC COMPANY, has occurred under the efficient general Management of the same men who have for many years so successfully directed the affairs of the Iowa Railway & Light Company. The direct Managment has been in the capable hands of Mr. H. F. Kellogg, whom most of you know personally.

Mr. Kellogg is constantly endeavoring to make the service more efficient and striving to please our customers in every way.

Some idea of the important service being rendered by our Company may be had by considering the physical work required to adequately serve 24 communities with their diverse requirements of servce, and to realize that there are no "lay-offs," or closing down in the Electric Light & Power business. It must be **On The Job** 24 hours Every Day in the Year.

The personell of the Company are, in every sense of the term, "Public Servants," who desire to serve you.

They are out in all kinds of weather, under all sorts of conditions, and with the one thought always in mind to have the **Power where** and **when** you **want it instantly**

To accomplish this, the generating machinery, the pole lines, the transformers and all the varied equipment must be kept in perfect condition.

This requires frequent inspection and careful, expert work.

When you next **TURN** a **Switch** or **Press** a **Button** give the matter a **moments thot.**

We will tell you more about the Company next week. Respectfully,

Iowa Falls Electric Company

IOWA FALLS, IOWA

Something to Think About

By F. A. WALKER

GRAY AUTUMN DAYS

AFTER the summer with its cheerful skies, charming flowers and airy pleasures, come the gray days of autumn, suggesting in withered leaves and puffs of chilly winds the approach of winter.

If you will open your imagination you may perceive the kinship that exists between human life and the seasons, each season bringing with it a message which few of us stop to interpret.

Mother Nature, like the true mother she is, never forgets her children. Every hour she writes with her own fair hand sweet letters of love and solicitous notes of warning, which if we understand them would take us safely through the shadows.

In the somber woods, in the silver streams, in the blades of grass, in the fields of golden wheat, in the rustling rows of corn, she is trying to make her pleadings comprehended, but we romp along the primrose path with deaf ears, bent upon having a merry time in the sunshine.

Event succeeds to event with just the right touch of variety and levity, so away we go quite regardless of what may befall us in the days to come.

We fall into the smiling habit of mind and build ourselves up in false conceptions of life, which we do our utmost to accept as real. In the chill of the autumn atmosphere there comes a ghost of doubt.

When the first fire is lighted and we turn to the crackling logs for warmth and cheer, our vision clears and we see then the error of our way quite frequently though not in time to escape our self-inflicted punishment.

On the verge of winter, with bent shoulders and a painful tug at the heart, we realize how we have wasted opportunity by fritting away our allotment of precious time.

The summer-span of life is gone forever. Our substance is lost and possibly we are shivering in rags. We are creatures now of another world. The sky is blue no more. The larks are not singing, the trees are bare and the brooks are still.

In your summer-time, Oh happy youth, consider the days of gray autumn. Prepare to meet them by avoiding idleness, by practising thrift, by forming good habits, thus making yourself worthy of respect and unafraid of life's dreaded perils.

YOUR HAND

¶ How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm

ILLNESSES SHOWN IN THE HAND

ILLNESSES that are not severe are shown by a line of life that is cut by a number of small bars. If there is hereditary illness, it will be indicated by an island near the beginning of the line of life. If an illness that is incubating threatens to be fatal, the line of life will be seen to be broken in one hand and continued in the other, with the broken fragment starting toward the interior of the mount of Venus, or ball of the thumb. The disease may be checked or cured if the fragment of the line of life starts toward the palm.

Past illnesses are marked by a cross line on the line of the heart or the line of the head, or both, and a small gap in the line of health. A coming illness is marked on the line of health by a little deep cross line. If the line of health is thick and much cut, it is a sign of illness in old age. Preservation from threatened illness is seen in a bar across the broken ends of the line of life, and recovery from a serious sickness is shown by the line of life broken inside a square.

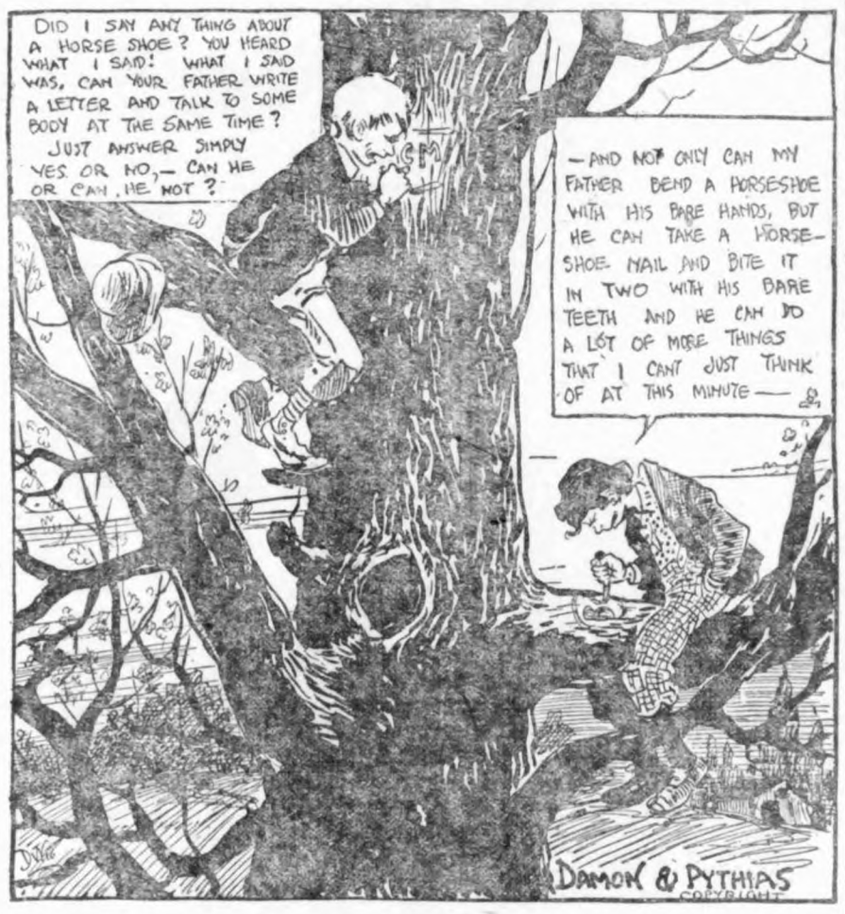
SCHOOL DAYS



KIDDIES SIX

By Will M. Maupin

THE CHEERUPATHIST

WHEN you're feelin' kind o' blue,
An' things comin' bad for you,
Don't give up in blank despair,
Weep or wail or tear your hair;
Grit your teeth an' bow your neck;
Show th' world you're right on deck.
Smile an' say, "Well, here we come—
Stand aside and watch us hum."

You've good reason to be glad
That though things are comin' bad,
They might easily be worse;
So, you're foolish if you curse
'Stead o' tryin' to catch sight
Of th' silver linin' bright.
Grit your teeth an' hustle out
An' you'll win without a doubt.

In your mind th' fable bear
Of th' tortoise an' th' hare.
You may be a movin' slow—
That don't matter—only go.
Don't stand still an' weep an' wail,
But keep pluggin' up th' trail.
Smile your troubles all away
An' you'll land all right some day.

(© by Will M. Maupin.)

ONCE IS ENOUGH

Uncommon Sense . . .

By JOHN BLAKE

MAKE HOURS COUNT

SAVING time is wasted effort unless you utilize the time you save.

Most people are in a hurry. They rush to their offices in the morning. They rush to their homes at night.

When they get to the office they sit around waiting for dinner.

About three-quarters of the average man's time is spent "sitting around." And time spent sitting around is always wasted time.

You are given about eight hours to loaf if you want to and eight hours to work.

Unless you have an unusually easy job, you can save little out of the eight hours working time.

You can save from one to five hours out of the eight, at least once or twice a week, if you are careful.

But unless you use that time, and use it wisely, there will be no sense in saving it.

Most successful men are very careful to save a little time out of the so-called idle eight hours.

They use this either to add to the efforts they put forth on their regular business, or to take up something related to their business which is inconvenient to do during working hours.

In other words, use their time as intelligently as they do their money. They make it earn dividends. And time set to work in that fashion is always a good investment.

Steamships, railroads, rapid transit lines have together effected an immense saving of time for the human race.

No longer does a man need to spend a month, practically idle all the time, going from London to New York. He can go in less than a week, with three weeks saved.

Those three weeks are worth money. They may mean success. Use them and a considerable share of all the time you save, and your output will soon begin to show a gratifying increase.

SOME HUNT

Visitor: Sonny is yer pop home?
Small One: No sir. He's gone hunting.
Visitor: Mem-m-m, did he take

Mother's Cook Book

I do not quarrel with the gas,
Our modern range is fine;
The ancient stove was doomed to pass
From Time's grim firing line.
Yet now and then there comes to me
The thought of dinners good,
And pies and cake that used to be
When mother cooked with wood.
—Edgar Guest.

WHAT TO HAVE FOR BREAKFAST

A SIMPLE though sustaining breakfast is needed to start the day right for the average person. Toast, eggs, bacon with coffee and a cooky or doughnut is the most common breakfast, and these may be so varied by serving in different ways that there may never be a monotony. A little fruit with a small dish of cereal makes a good beginning to the breakfast. Fruits vary as to season, so that course will always find a change. During the cold fall mornings a plate of griddle cakes and sausage is enjoyed.

Bananas are found in the market the year round. The following are some of the ways one may prepare them for breakfast: Serve in the cannot eat bananas ordinarily will find them harmless if the veins and stringy pulp are removed from the fruit. This should be carefully done before serving to a child. Baked in their skins. Baked after peeling, basting with butter and lemon juice, with a little sugar. Sliced with lemon juice and sugar, or sliced, served with cereal and cream.

A good baked apple is a fruit usually well liked for breakfast. Pare and core good flavored apples and arrange in a well buttered baking dish. Sprinkle slightly with sugar and cinnamon; baste often with melted butter and serve with rice or other cereals, using the juice for a sauce.

Apples baked with figs, with bananas, with dates, with currants, cherries, gooseberries or prunes are all delicious. Core and fill the cavity with the fruit, then bake, basting often.

Muffins, waffles, griddle cakes and hot gems of various kinds are always acceptable as a breakfast bread.

Julia Maxwell

Modish Knitted Outerwear;

Turbans Again Are Popular

SPORTS apparel departments and specialty shops are fairly bubbling over this season with new ideas in modish knitted outerwear. As one views these garments, whose novelty and charm is of thrilling interest, the wonderment is that only comparatively in the last few years have we grown into an appreciation of the artistry of things knitted. What with insistent appeal of ingenious design, style motif and intriguing color, we find the inclination grows to plan to a great extent one's autumn and winter wardrobe in terms of knitted outerwear.

With the college girl the cloth skirt and gay colored sweater is taking the place of the sleeveless dress, which was such a vital part of the campus wardrobe last year. Slipons are the kind most called for and these come in an entirely different range of effects from other seasons.

Among the latest types is the blouse with collar, cuffs and tight hip band of black, while the body and sleeves are made of vertical stripes in many well-harmonized colors.

With knitted dresses, scarf sets, also knitted, are very popular. There is a new slynx scarf which has a loop stitch that gives it the effect of knitted astrakhan. Herewith is shown one of the popular brush wool sets, which are admirably worn with suits and sweaters.

Tuxedo sweater coats, all of fine silk, are a happy possession for any time of the year. In woolen knit tuxedos, checkered or plaided effects are attained in the stitch and not by contrasting color, such as is noted in the illustration herewith.

Speaking of knitted hats, these also express extreme novelty. We picture a handsome type which has the effect of the modish Hindu wrapped turban. It is knitted in colors alternating around the crown a section of blue with white.

It is well to know that manufacturers have made provision for cold weather requirements and slipon sweaters are of much heavier weight than those sold in the summer. Some extremely handsome numbers show an embroidery of rich design, and this marks an innovation in sweaterdom. Navajo all-over patterns are in startling colors and this is the sort which appeals to the athletic girl particularly to the tricorn in its several developments.

The turban is a classic in millinery and, while large, irregular and picturesque hats are flourishing like the green bay tree, at the same time new honors are being thrust upon the turban and other small hats. American women like them, especially for the street and in winter time. They are enthusiastic over the spirited and flattering styles which the present season has presented, and are devoted

Interesting Models in Knitted Wear.

A group of five handsome models gives a hint of the varied types of turbans that have been successful. Designers have everything at hand to make brilliant and even gorgeous, bits of headwear, for the small hat can afford to be very rich and ornate.

Velvet is the medium which has been chosen for the two hats at the top of the group. In the hat at the left it is shown covered with shirrings over heavy cord. This is a youthful model finished at the right side with a handsome rosette of silk. A more matronly affair at the right is entirely of velvet with a twisted collar about the crown and an immense chou of shirred velvet at the front, centered with small silver blossoms on each side. Just below, the Hindu model made of malines belongs to any age, and is developed in many colors. For evening a sparkling, upstanding ornament is often added.

One interpretation of the Hindu turban appears at the left of the group, made of silver tissue, but it appears in velvet and in combinations of velvet and metallic fabrics, as well, and there are many ways of adding a touch of trimming to it. Velvet and soutache braid make the charming turban that finishes the group. It differs in shape from all the rest, is becoming to matronly wearers, and is one of those unusual hats that may be worn anywhere.

The future of the turban is brilliant in more senses than one, for it is scheduled to be worn as a dance hat during the coming winter. Made of cloth of gold or silver, it is embroidered with colored silk floss and adorned with gold or silver beads.

Five Handsome Turban Models.

LIFE'S LITTLE JESTS

FORCE OF HABIT, MAYBE

"Who is the fellow in a sport car?"

"That's Harold Heartbreak, the movie star. He gets paid a big salary for just making love to beautiful women."

"In a case like that a man would have some inducement to work overtime."

"He's evidently been working overtime. His wife is suing him for divorce and names six corespondents."—Birmingham Age-Herald.

Has Been About Some.

"Your boy has graduated?"

"Yes," said Mr. Grabcoin. "Now he wants to go abroad and see something of the world."

"Why don't you let him see America first?"

"You couldn't interest him in a proposition like that. He traveled with the football team.

ENVIOUS

Fish: Gee, he's a lucky guy, he can hug eight girls at once!

Censorship.

Soon shall we see some fancy tricks
New moral standards to secure,
When censorship brings politics
Into control of literature.

Apparently.

"Boss, is you connected with de courthouse?"

"Yes."

"Kin you help me out? I wants a marriage license."

"No, I'm a police magistrate. Best I can do is to give you a year in jail. You're after a life sentence."

Can't Fool Her.

The Poultryman—Certainly, ma'am, it's a this-year's chicken. I'll guarantee it.

Mrs. Junebride—I don't see where you get the nerve to tell me that when I distinctly remember they were wearing the same style of head ornaments two years ago.

A Little Bit of Blarney.

Mistress—Maggie, I can't have you entertaining policemen in the kitchen.

Maggie—Sure, mum, an' it's a big heart ye have. I was sayin' to Michael O'Flinn only last night that if he spake th' word ye'd let us have the drawin' room.—London Answers.

The Difficulty.

"He's kinder to his second wife than he was to his first."

"Yes, but his second wife keeps insisting that he's not nearly so kind to her as her first husband was."

Dubious.

"Is your place in the hall of fame secure?"

"Dunno," said Senator Flubdub. "I don't feel any too sure about my seat in the senate."

FRESHNESS OF THE PAST

Wifey: The eggs are stale. Why asked the grocer if they were fresh.
Hubby: What did he say?
Wifey: Absolutely.
Hubby: You must have misunderstood him. He probably said: "Ostoledely."

Wretch.

The barnyard golfer had no shame
Nor sense of right and wrong.
He played a ringer in a game
And boasted loud and long.

At the Concert.

Mrs. Billtop, Sr.—Do you know that beautiful song she just sang? It is one of the old classics.

Mrs. Billtop, Jr.—Yes, indeed, I jazzed to it many a time.

Possibly So.

Her Second Husband—No, I can't go out with you this evening. I have some work to do at the office.

Mrs. Pstinger—You've neglected me shamefully ever since we've been married. If my first husband was alive you wouldn't dare to treat me so.

Signs Tell.

Jack—Hallo, Bert, who's the girl?

Bert—What d'you mean?

Jack—Well, you're not wearing a collar like that for fun, are you?—London Tit-Bits.

GOOD ROADS

TRACTIVE ROAD RESISTANCE

Initial Results Secured Show That Information Will Be of Big Value to Engineer.

(Prepared by the United States Department of Agriculture.)

Initial results secured from an investigation of the tractive resistance of roads indicate that information will be secured of great value to the highway engineer and the user of motor transport. The investigations are being carried on under the auspices of the advisory board on highway research of the national research council with which the bureau of public roads, United States Department of Agriculture, and the quartermaster corps, United States army are co-operating.

One phase of the investigation shows that there is a great difference in the power required of the engine when a truck is traveling over different types of surfacing, the amount being more than twice as great on some of the poorer types when compared with that on higher types. It is also shown that the power required to overcome the road resistance is not proportional to the speed of the vehicle, and after a certain speed is reached increases very rapidly.

The investigation when complete will cover tests with various types of motor vehicles with the load, tire and driving equipment varied on different types of surfacing and at varying speeds. The data will include gasoline consumption, internal engine resistance, wind resistance, and road-surface resistance.

When carefully analyzed it will aid the highway engineer in determining

Great Difference in Power Required of Engine When Truck Is Traveling Over Different Types of Surfacing.

for a given set of conditions what type of surface should be built for a given volume of traffic to result in the least total cost for road and vehicle operation. The same sort of study can be made as to expenditures for tire reduction to reduce operating cost.

The truck operator will be given valuable information on the effect of load and spring equipment, lubrication, effect of load and speed of vehicle on fuel consumption which should aid him in producing cheaper transportation.

STRETCH OF MODEL HIGHWAY

Section of Lincoln Road Under Construction in Lake County, Indiana, Near Chicago.

A stretch of model road, to be known as the ideal section of the Lincoln highway, is under construction in Lake county, Indiana, to the southeast of Chicago.

Besides a 40-foot road bed ten inches thick designed to carry heavy traffic, provisions are made for beautification of the roadside in boulevard fashion. A lighting system is to be installed. The entire cost will range approximately $100,000 a mile.

The strip of roadway is centrally located, as far as traffic on the Lincoln highway is concerned, and is intended to serve as a model for the gradual reconstruction of the entire route as traffic demands increases. The Lincoln Highway association will provide the funds required over the usual costs per mile.

HIGHWAY FOLLOWS AIR LINE

Association Formed to Build Hard-Surfaced Road Between Chicago and Omaha.

A proposed Chicago-Omaha Short-Line highway association, formed in Des Moines, Ia., proposes to build a road that will follow the air mail route between Chicago and the Nebraska metropolis. The highway, according to plans, will be a hard-surfaced highway. Robert N. Carson of Council Bluffs, Ia., has been chosen secretary and general manager.

Highways Affect Milk Supply.

Whether the condition of the highway determines whether the milk supply is brought to our door in the morning is fresh and whether we shall receive it regularly.

Municipal Camp Grounds.

Nebraska has 27 municipal camp grounds along the Lincoln highway for automobile tourists.

Raises Farm Values.

Have you noticed how a good road raises the value of a farm it fronts?

ORCHARD GLEANINGS

PROTECTING YOUNG ORCHARD

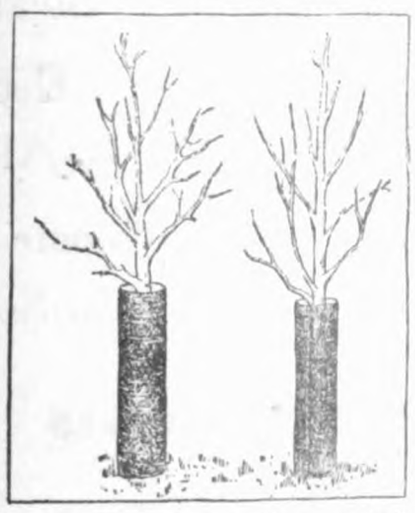
Mice and Rabbits Are Particularly Fond of Young Apple and Pear Trees in Winter.

One of the risks taken by the owner of a young orchard is the gnawing of trees in the winter by mice and rabbits. These pests may not touch a tree in your orchard for several seasons; then, unexpectedly, they may girdle and kill 40 per cent of them. Mice and rabbits usually damage only small trees, although in some cases they attack trees from four to six inches in diameter.

Mice and rabbits are more active in young orchards during the winter months, when the supply of green food is limited, but if there is a mulch about the trees, or if cover crops grow up about the tree rows, both mice and rabbits may do considerable damage during the fall. There is something about the bark of young apple and pear trees that seems particularly attractive to rabbits. During the winter, when snow covers up the grasses and clovers for rabbits, and provides an agreeable cover under which mice can hide, the young trees should have some cheap and effective protection.

The only safe means of preventing these injuries is to provide guards for the trees so that the animals cannot touch the bark. Washes and paints have been tried and recommended, the idea being to cover the bark with substances that would prove repulsive to the animals. But those substances have proved ineffective in affording the desired protection. Such materials as blood, liver, axle grease and other greases have no good qualities to recommend them for protecting young trees.

The only safe and practical means of preventing these winter injuries is to put wire or wood guards about the trunks of the trees. In case you discover that serious damage is occurring, and you want to stop it immediately, wash the trunks of the trees with a lime-sulphur solution, or with ordinary



Wooden Covering Is Shown on Left-Hand Side, With Wire Screen on Right.

whitewash in which arsenate of lead has been mixed at the rate of two ounces to each gallon. This will prevent injury until the next hard rain.

Effective wood guards are made of veneer cut from logs, by special machinery. It comes in flat packages, crated together, and sufficient wood for each tree costs about 1 cent. Before putting them around the trees soak in water and wrap them about the trunks of the trees and tie them with tarred string. When the wood becomes dry it is quite hard and offers little inducement for the mice to gnaw through.

FALL PLANTING ADVANTAGES

Trees Are Placed in New Location With the Least Amount of Time in Storage.

Fall planting has the advantage of getting the trees into their new location with the least amount of time in storage, and trees set out in the fall will make some root growth during the winter and be in good shape to start into growth in the spring. There is generally more time for planting in the fall than in the spring and the work can be done in better shape.

Garden Cultivation.

Sometimes deep cultivation in the garden does more harm than good because it cuts off the roots. All that's necessary is to kill the weeds and make a light mulch to conserve moisture.

Corn Makes Best Silage.

Silage is the best and cheapest form in which to store succulent feed. Many forage crops can be made into silage, but corn, where it can be grown successfully, makes the best silage.

Time to Make Plans.

Now is the time to make plans for planting orchards and vineyards. Select the varieties preferred and find out where they may be obtained.

Protect Young Trees.

Protect the young trees from rabbits and mice, or the whole lot may be killed in one winter.

Time to Prune Grapes.

Prune the grape vines as soon as the leaves fall. They will then be ready to cover with earth.

PREPARING FUEL FOR WINTER USE

Power Saws Enable Farmer to Utilize His Own Wood Lot With Very Little Expense.

GASOLINE ENGINE IS USEFUL

Coal Dealers Are Finding It Difficult to Obtain Sufficient Supply for All Their Customers—Skidway Saves Time.

(Prepared by the United States Department of Agriculture.)

A man, by inking thought, can grow a good tree in a lifetime, but it required all the inscrutable forces in nature's laboratory, working for ages and ages, to make the coal which we now use so generously to run our mills and railroads, to heat our dwellings and drive our ships. By the exercise of care and foresight the farmer can assure himself of a supply of wood, but when the supply of coal is gone it will be gone forever.

Easier to Use Coal.

The large amount of labor required in preparing firewood for the stove has kept many farmers from using wood for fuel. It has been much easier to drive in to the nearest coal dealer and draw home a few tons of fuel already prepared for the stove. This winter, with coal touching top prices, the coal dealers are finding it difficult to obtain a supply sufficient for all their customers. Some of these customers must use coal, for the reason that wood is even harder for them to get; but the farmer with a wood lot is not in this class, and he will find it profitable to see how far modern machinery can replace the expensive hand labor in filling the shed with home-grown fuel.

A gasoline engine is a convenient farm-power unit. This machine will furnish the energy for operating the wood-sawing machines and will earn its original price long before it has been worn out. The greater the length in which the wood can be cut and handled the less will be the cost of getting up the fuel supply. A power saw will make a cut much more quickly and economically than a man can make it with an ax. If a good skidway is built so that heavy poles and logs can be rolled up to the table of the saw, it will save a good many minutes with a man-operated crosscut saw or the slower ax. When the wood is being cut for the market it is usually cut into four-foot lengths, but such lengths are not necessary when the object is to get a supply of split wood for the farm kitchen and "chunks" for the big stove or furnace.

There is always an element of danger about a saw table that cannot be entirely eliminated by any safety devices yet on the market. The careful farmer will have these devices put on his saw, but he will take the additional precaution of keeping his hands and loose pieces of wood away from the moving saw blade. It never pays

Modern Machinery Reduces Hand Labor in Filling the Woodshed.

the sawyer to be hurried or to shove a stick against the blade without knowing that it is firmly held.

Requires Smaller Crew.

The drag-saw his its greatest efficiency when used upon wood over twelve inches in diameter. It does not require as much power to operate, does not cut as rapidly, and requires a smaller crew to manage than does the circular saw. One advantage possessed by the drag-saw is in the fact that its carriage rests nearly level with the ground, and there is less effort required to raise the wood to a position beneath the saw blade. One man can manage the drag-saw, but he will have to stop the saw while he is clearing away the blocks and getting the logs into position.

GIVE BEES CARE IN AUTUMN

After Extracting Honey Beekeeper Should Watch Closely and Replace Poor Queens.

The beekeeper often loses interest in his apiary as soon as the honey has been extracted in the fall. That's often the time bees should be watched carefully, for they frequently need a new queen in late summer and early fall. Now is the time to look after the queens. Poor queens are occasionally supplied during the active season, and in such cases they must be replaced immediately after the honey crop is harvested.

GEORGE WASHINGTON FAVORED PUREBREDS

Sires of Good Quality Are to Be Used for All Stock.

Enrollment of Owners of Estate, Latane Brothers, Regarded as of Particular Interest to Breeders of Live Stock.

(Prepared by the United States Department of Agriculture.)

Wakefield farm, Westmoreland county, Virginia, has been enrolled in the "Better Sires-Better Stock" movement conducted by the various states and the United States Department of Agriculture. This is the farm where George Washington was born in 1732, and the present occupants, Latane Brothers, come from straight Washington stock. It is noteworthy that purebred sires of good quality are henceforth to be used for all classes of live stock raised on this farm which is famous as the birthplace of the Father of His Country. The stock on the historic estate include cattle, horses, swine, sheep and poultry. All sires are now purebred; the females are purebred, crossbred, and grade, and are to be gradually improved.

County Agent L. M. Walker, Jr., interested Latane Brothers in the nationwide movement for improved live stock, and John R. Hutcheson, director of extension for Virginia, regards the enrollment as of particular interest since George Washington was a good farmer and a lover of good stock.

QUAIL DEVOUR MANY BUGS

Bob-White Is Particularly Fond of Beetles or Adults of Pestiferous Corn Rootworm.

(Prepared by the United States Department of Agriculture.)

The bob-white eats the adults or beetles of the corn rootworm which lay the eggs that later become larvae or worms and infest the corn. As many as 12 of the beetles, according to the bureau of entomology of the

Bob-White Relishes Corn Rootworm.

United States Department of Agriculture, have been found in the stomach of one bob-white. The red-headed woodpecker, nighthawk, cardinal, kingbird and phoebe also eat the beetles and reduce the damage done by the corn rootworm.

WEED SEED IN SCREENINGS

Feed for Chickens Should Be Cracked Up So That Germinating Power Is Destroyed.

In many cases weeds are spread about the farms due to the failure of farmers to grind screenings that are to be fed to chicks. Screenings for chicks are valuable as feed, but they often contain many seeds of noxious weeds. Unless the seed is cracked up so that the germination power is spoiled trouble results. In one case they found that wild oats, common mustard, ragweed, corn cockle, European vetch and cowherb resulted from the use of whole screenings. Not only need the screenings be ground, but they ought to be watched, as often they contain poisonous weeds such as corncockle seeds.

WIRE PARTITIONS NOT GOOD

Drafts Permitted Which Are Bad for Young Pigs—Do Not Give Sows Needed Seclusion.

In carrying on experimental work in swine breeding the United States Department of Agriculture has found the use of wire partitions in farrowing houses undesirable and is replacing them with solid wooden divisions about 32 inches high. The wire-fencing partitions permit drafts, which are bad for the comfort and health of the young pigs. Open partitions also permit sows to notice anything going on in adjoining pens, which often causes them to become nervous and irritable, and sometimes to try to fight each other. Sows at farrowing time must be kept as quiet as possible.

DESTROY WEEVILS IN BEANS

Carbon Bisulphide Will Kill Insects if Placed in Tightly Covered Vessel Over Night.

Weevils can be killed in beans and peas by the use of carbon bisulphide. To treat these put them in a jar, tub or other vessel which can be covered tightly. Put into a glass about one teaspoonful of carbon bisulphide for each ter gallons of space in the enclosure and place the glass in with the beans. Allow them to remain in the fumes of the carbon bisulphide over night, then take them out and place in dry storage quarters. Do not take lamps or lighted matches near the na-

LIVE STOCK FACTS

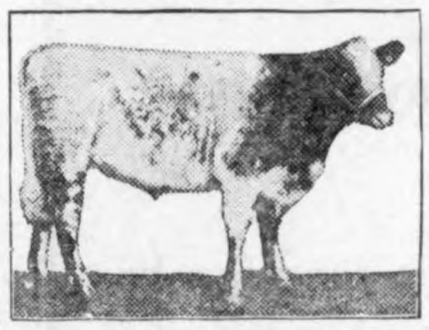
SOUND POINTS ON BABY BEEF

Producer Generally Finds It Necessary to Breed His Own Stock—Well-Bred Cows Best.

The producer of baby beef generally finds it necessary to breed his own stock. Calves with the conformation and quality to finish at 18 months of age are seldom bought on the market in any numbers of uniform type, and at a figure where they can be profitably fed out. Older and plainer stock can be bought for less money, will make larger gains, and sell at about the same price a hundred pounds as the finished calf.

The problem for the producer of baby beef is to get his raw material of the proper quality as cheaply as possible, and in the opinion of N. K. Carnes of the live stock division at University farm, he can generally do this best by keeping a herd of real, well-bred beef cows, and by feeding and caring for them economically. The feed and care of the cow will be charged against the fatted calf.

"The majority of beef producers," says Mr. Carnes, "prefer to have their calves dropped in the spring of the year. The calves can run with their dams on pasture during the summer, and be weaned in the fall about the time they go into winter quarters. By this practice, the beef cows can be wintered more economically. They require less shelter and labor, and less concentrated food than when they are suckling calves. A beef cow of good type will support a calf and keep her own flesh on pasture without any grain. When the pasture is short or dry, silage



A Purebred Bull Builds Up a Herd.

can be generally fed at a profit. Breeding cows can be wintered well on good legume hay or on carbonaceous roughages with some nitrogenous concentrates to balance the ration. The beef cow should utilize the roughage on a farm to maintain her body weight. The high-priced concentrates can be fed more economically to her growing calf.

"Regular care, with plenty of pure water and salt will go a long way toward keeping a cow in condition. Do not let her get down thin, because it always costs money to put on flesh, and she must be in condition if she is to raise a healthy, vigorous calf."

TAKE CARE OF BOAR'S FEET

Many Superior Animals Have Been Ruined Because Owner Neglected His Toe Nails.

Did you ever see a big boar stumbling around with his toes spread out and his pasterns down nearly to the ground? Certainly you have. Many a good boar has been ruined because his owner did not take care of the animal's feet. In trimming the boar's feet, first gain the confidence of the animal. Be patient and quiet with him and you can do almost anything with a boar; but just as soon as you antagonize him, it will be impossible to accomplish anything.

Scratch the boar on the flank and he will lie down and stretch out so that it is possible to get at his feet without causing him any discomfort. At the same time you will have him in a position to do the work with the least effort on your part. Use a sharp knife and pare off the bottom of the foot. Trim the toe back until you reach the quick; you will do no harm if you draw a little blood as it is necessary to trim into the quick in order to get shortness of toe. Each time that you trim the foot you will be able to shorten the toe a little more, so that by patient effort even a bad foot can be shaped up nicely and trained to grow in the correct shape.

SOW-FEED AT WEANING TIME

Object Is to Check Secretion of Milk—Dry Oats Are Safe Feed for Short Period.

When pigs are weaned the feed should be cut down to check the secretion of milk. Dry oats make a safe feed for a sow for a few days. If the udder gets very full, it is a good plan to turn the sow in with the pigs once a day for a few days. By this system the sow's milk supply is reduced, and she is dried up gradually.

Alfalfa for Hogs Is New.

Feeding alfalfa to hogs is comparatively new. A new thing can be injured by its over-zealous friends as well as by its foes.

Light Shoats Money Losers.

The 75-pound and the 100-pound shoats at six months are money losers, not mortgage lifters.

Provide Shade and Water.

Shade and clean water during the summer months are essential to

DAIRY FACTS

IMPROVEMENT OF DAIRY COW

Department of Agriculture Has Six High-Producing Animals on Its Farm at Beltsville.

(Prepared by the United States Department of Agriculture.)

The improvement of dairy cows means a great deal more than increased profits to the dairyman. It means cheaper food and more milk, the best bone and muscle maker for children. What this improvement means is brought out forcefully by a poster prepared by the United States Department of Agriculture and sent free to interested persons.

An ordinary cow or scrub produces only enough milk to feed five chil-

A High-Producing Holstein.

dren a quart a day, while a good cow yields enough to give 20 children a quart a day. The supercow, and there are more and more of them in this class each year, gives enough milk so that a small herd of them might supply this quantity to all the small children in a small town.

On its farm at Beltsville, Md., the department has six cows, the result of its breeding work, that have produced an average of more than 22,000 pounds of milk in 365 days. This little herd of six big producers yields enough milk to provide 170 children a quart a day. One of them could supply nearly 30 children, or six times as many as the ordinary cow could take care of.

Good breeding, first, and good feeding, second, have made the difference.

MAKE COW RATION TEMPTING

Animal Will Not Do Well on Food That Is Not Palatable—Avoid Any Sudden Change.

The good dairy ration must be attractive. A cow is a self-respecting sort of animal and she likes palatable food. In fact, a cow will not do well on food that isn't palatable, and it should be remembered that the condition of the food has the most to do with its palatability. Moldy grains or roughages do not appeal to the appetite of the cow, and consequently are unsatisfactory. Thus the unsatisfactory feed, no matter if it does contain the proper elements, may cause a reduction in the milk supply due to the cow's unwillingness to eat a plenty to keep up a good flow of milk.

At the same time it must be recognized that it is not a wise idea to change a ration suddenly in order to make it better. A cow is a pretty delicate sort of a milk-producing machine and, especially if she is a large producer, sudden changes in the food are quite likely to upset her in one way or another, and the result will be a loss of milk.

KEEP FEED UTENSILS CLEAN

Average Farmer Is Liable to Grow Little Careless About Pails in Summer.

Wide-awake dairymen realize the importance of keeping calf feeding utensils scrupulously clean at all seasons of the year. The average farmer, however, may grow a little careless about the calf pail, especially during the warm summer months. These pails should be of tin or galvanized iron, never of wood, and should not be allowed to get rusty or battered. They should be thoroughly washed, rinsed and sterilized after use, and kept in a clean place. Never use calf pails for feeding hogs, or live stock other than calves.

ESSENTIALS FOR DAIRY HERD

Cows and Young Animals Should Be Provided With Plenty of Pure Water and Shade.

Provide plenty of shade and cool, pure water for the cows and young animals. Spray cows at milking time to keep off flies. Look out for sour milk and cream. Bacteria and warmth cause milk to sour. The modern way to spell bacteria is d-i-r-t. Keep it out of the milk, thoroughly wash and scald all milk utensils. Keep the milk or cream cool, 50 degrees or lower if possible, and it will stay sweet for several days.

Wisconsin in Lead.

Wisconsin now leads in the number of accredited tuberculin-free cattle with 36,183 head. Minnesota is second with nearly 34,000 head.

Metal Milk Utensils.

Milk utensils for farm use should be made of metal and have all joints smoothly soldered. Never allow them to become rusty or rough inside.

OTE 'YES' TUESDAY

our Opportunity Now To Help Soldiers

A "bonus" ballot to every voter o goes to the polls in Iowa, Nov. is the aim of the American Legion its final move to put over the te proposition.

Until then intensive efforts will made to inform the people as to e provisions of the bill, and why approval is so keenly desired by e veterans of this state.

Every one of the 615 Iowa Legion sts has been instructed by State djutant Jamees F. Barton to per- ct precinct organizations, whose ties shall be to use all honorable ans possible to put the measure fore the voters of their respective alities, and see that they vote on e separate "bonus" ballot which ll be furnished those who want it en they go to vote on the candi- tes.

Indications are, state Legion of- ials say, that the bill will carry a comfortable majority, but they int out that the opposition will doubtedly pull its full strength, d that langer might lie in not a- osing voters favorable to the im- rtance of voting. Reports to state adquarters are that many who are djusting the compensation of the -service men and women do not ow that a state issue will be up on ction day, that many know only the bill which was in Congress d was vetoed by President Hard- g, and think the issue is entirely ad.

The Legion has not and will not ake a hullabaloo campaign, the of- ers and members have agreed. here is no real fight in Iowa be- se this state had no war profit- rs during the war like the east d, they say. For that reason they nt merely to put the proposition fore the voters and taxpayers in quiet, friendly dignified manner d leave it to those who must pay e bill by a 1 to 2 mill tax increase say whether or not they will pay wa veterans 50 cents a day each, th a maximum of $350, for the me spent in uniform.

To date, no strong open opposi- n has developed against the bill, hich was enacted by the Thirty- ath General Assembly, and which ovides for a $22,000,000 bond is- e, payable over a period of twenty ars. But it is known to many o think taxes are already much high will vote no, not because ey are against the veterans but cause they feel they cannot af- rd to pay out another nickel in xation, that retrenchment should the state's policy.

To this, a Legionaire has witting- answered, "Let's not start on the ys who dug the trenches."

If the bill is passed it will mean average payment of $200 to each eteran who resided in Iowa who s enlisted or inducted in the serv- between April 6, 1917 and Nov- ber 11, 1918, as the average peri- of service was a few days more an 13 months. Iowa sent 110,- 0 men and women to the country's fense in the various branches of e military service in the war on ilserism.

No Legion man, so far as depart- nt officials know, has ever ques- ned the pension system of veterans other wars, but the Legion is rongly opposed to pensions for orld war veterans. The Legion lieves that if compensation for orld war service is in a measure djusted now in a lump sum that at will remove the possibility of islation providing for pensions in er years. It is pointed out that, $200 will settle the account the terans' believe exists, that that a- ount is negligible as compared with hat the taxpayers would have to y if all World war veterans were anted pensions which would be id over many years.

Eighteen states have already pass- adjusted compensation bills, and ve paid or are paying their veter- s so-called "bonuses." Iowa is al- st completely surrounded by the states that have voted for adjusted compensation. Minnesota has almost finished paying out under its bill; Missouri is handling its thousands of claims which were made possible when the measure was adopted there; Wisconsin's veterans are getting adjusted compensation from that state; South Dakota has made nearly all of its adjusted compensation payments. Illinois will vote on a bill next month, and Ohio and Michigan, who have already passed bills and started paying out the money, report that a pronounced improvement in business conditions generally has resulted.

Besides the precinct organizations the Legion in Iowa is flooding the state with publicity on the proposition. Many speeeches are being made. All ministers in the state will be asked to say something in favor of it in their sermons, Nov. 5. The nearly 1,000 Iowa daily and weekly newspapers have published gladly, it is believed, countless columns of material from the state Legion publicity officer to put all teh angles of the question before the people.

The American Legion in Iowa has come to be recognized as a vital force for community good almost everywhere posts exist. By their own efforts the Legionaires have erected scores of homes and put over many projects of lasting benefit to their respective localities and the state a large. The Legion's work in rying to solve the unemployment problem won the commendation of organizations of all classes, letters on file at headquarters show.

In caring for the disabled comrades, Legionaires of Iowa have an enviable record. Through a perfect organization to handle problems of the disabled, the situation is now so that nothing is being left undone to ease the suffering of the Iowa boys who must live over the Argonne, St. Mihiel, Chateau Thierry and other battles for many years or until death claims them. Aiding the Legion in this is the Auxilliary, composed of the mothers, wives, sisters, and the daughters of Legionaires, and the Auxilliary in this state is solidly supporting the adjusted compensation bil.

Many business men and farmers who were at first inclined to be cold on the measure have been won over by the realization that if the bill carries at the election the sale of the bonds will place $22,000,000 immediately in Iowa banks, to be given to the veterans early next year, and that most of the "bonus" payments will be spent right here in Iowa. Experience in other states where veterans have received "bonueses" shows that 95 per cent of the money they received has gone for necessities of life and payment of debts incurred while they were in the service, or while unemployed after they were discharged. Iowa's fterans, both in service and out, have proved themselves to be as eager to carry on in the spirit of their ancestors as the veterans of any other state in the Union.

A representative o the Iowa Legionaire, official publication of the Iowa department, American Legion, has asked scores of post commanders and adjutants and members generally. "what are you going to do with your bonus?" Every one answered promptly, his reply showing that he had already in mind a useful place for the amount he hoped to get. Iowa has few irresponsibles among its men and women who wore the uniform. The percent of married veterans in this state is said to be as large as that in any of the states. Iowa's colleges and high schools sent more men and boys into the service than the educational institutions in most of the other states. This, according to Legion officials, in icates that the payment of compensation would be in most cases to worthy recipients. The percent of Iowans who went from the fields, the shops, stores, banks, and professional offices was equally as large. In the service, Iowa made an enviable record for exemplary conduct, the men having gone into the service fully believing the cause was just, and determined to give their all to bring speedy victory to the allied armies.

Iowa loads the American Legion because of the great democratic spirit which pervades this state. The Legion here would not have nearly the strength it enjoys did it not have the backing and co-operation of press, pulpit, business, organized labor and every institution of standing and every individual of prominence in Iowa. Just as hte veterans readily admit that they could not have fought as they did without the support of the folks at home, so are they glad to recognize that without the approval of the public their Legion could not occupy the place it does.

The American Legion of Iowa, all the true Iowa Legionaires say, believes fully in the people for whom the veterans offered their lives to defend. If they had not had this confidence they might not have gone into the service in the crisis of 1917-18 with such ardor and nthusiasm. And, because of that confidence in the people of their state, the veterans here do not fear but that the compensation bill will go over with hundreds of thousands of votes to spare. In other states the proposition has carried from 1.8 to 8 to 1. Some Iowans even predict that Iowa will show the biggest majority yet recorded on the issue.

BARN FILLED WITH HAY LOST BY FIRE SUNDAY

A large barn and other buildings on the farm a few miles northeast of Garner and occupied by William Hoeft and family, was the scene of a destructive fire Sunday evening.

The large barn, which was filled with hay is thought to have caught fire by spontaneous combustion.

A stack of straw back of the barn also caught on fire.

It is reported that the farmer also lost a lot of machinery, harness, and other articles in the fire.

The house was saved by efforts of people who were attracted to the scene by the blaze.

MESERVEY ROBBERS ARE NOW SERVING TERMS IN REFORMATORY

John Burke, alias John Guth, Leslie Leroy and Art Anderson, who confessed to having stolen a car at Mason City, another at Des Moines, and having previously robbed various homes and stores a week ago Sunday night at Meservey, are now serving sentences of ten years each at Anamosa.

The boys, all giving their ages as 21 years, were taken to Anamosa Sunday by a deputy sheriff from Mason City. Burke, whose name was found to be John Guth, was wanted for having stolen a car from the Hulsebus garage at Meservey some time ago, it is alleged.

ONE KILLED IN AUTO ACCIDENT AT CLARION SATURDAY NIGHT

Another Received Severe Injuries Is Now In Clarion Hospital

A bad auto accident occured about three miles west of Clarion Saturday night at about 11:30 o'clock when one young man, Albert Johnson was instantly killed, when the big Paige car in which he was riding with three other young men, turned over in the ditch. Gerhart Tegland, driver of the car, and Geo. Fort and Fred Hobson, all young men near Clarion who were in the death car, suffered painful injuries. Hobson received the most serious injuries of the three and is in a hospital.

The new car was a complete wreck as the two front wheels, and one of the rear wheels were broken off; the top was sheared off, the steering wheel and column broken, and the frame twisted and otherwise was all bent up.

The young men were traveling at a high rate of speed westward it is alleged and claim they were blinded by an approaching car which caused the driver to loose control of the machine and it plunged down a five foot embankment and turned over three times, pinning Larson, Tegland and Hobson, but Fort was thrown clear of the wrecked car.

Hobson's injuries were the most severe of the three as he recieved several deep gashes and bruises; the othrs came out of it with a few slight scratches.

DIPHTHERIA CONTINUES TO SPREAD IN WIOTA, IOWA

(From Des Moines Register.)

Wiota, Ia., Oct. 31.—(Special)—Thirteen new cases of diphtheria developed here in a few hours making a total of more than thirty cases. Physicians from nearby towns are assisting local doctors in administering anti-toxine and fighting the epidemic. Mrs. Charles Parker, living four miles from town was stricken while in apparently good health, and fainted. Serious cases have developed from slight attacks that were given little attention.

ARMISTICE DAY LEGAL HOLIDAY IN IOWA

Armistice Day, November 11, is a legal holiday in the state of Iowa, although it is not yet a national holiday. But according to Chapter 62, page 58, Section 1, Acts and Joint Resolutions of the Thirty-ninth General Assembly of Iowa it is declared a legal holiday.

The day will be observed in many towns as a holiday for celebrations and speeches.

Reading ..... Mrs. Paul Stille
Prayer ..... Song

There will be no special collection taken.

Everyone is cordially welcomed to all these meetings.

Do not forget the prayer service on Thursday evening.

—W. C. Bergmann.

Rebuilding Bridge

The old river bridge west of town on the county road near Lemke's place has been rebuilt and improved.

The old structure was in a rather bad condition but since workmen have put in new timbers where they were needed, re-planked the top and raised the bridge and leveled the approach to the bridge, it is now a pretty good road bridge.

OBITUARY—CLARENCE ARNOLD

Clarence A. Arnold was born Aug. 19, 1883, in Clayton County, Iowa. In 1895 he came to Hancock County with his parents, brothers and sisters and settled on a farm a few miles southeast of Klemme. Here he grew to manhood. After completing the public school he attended the Upper Iowa University at Fayette, and the Agricultural College at Ames for some years.

On August 28, 1912, he was united in marriage to Emelia Lenz. They settled on a farm which is a part of his father's home place. Here they built a beautiful house, which is perhaps one of the most modern farm houses in the county; the many large and small conveniences in this house must be seen and understood to be fully appreciated. In fact nearly everything on this farm speaks of scientific knowledge and experiments along lines of modern agriculture, which Mr. Arnold acquired by study, practice and close touch with men devoting their lives along these lines.

Mr. Arnold was not only a hard worker, but possessed a philosophic trend of mind. He was usually quiet and reserved, but a conservative thinker, and his judgement was usually safe and dependable. Because of these good faculties his service was often sought and respected. He was honored with many community and business offices, such as president of the Klemme Creamery; a member of the Live Stock Shipping Association; director of the First National Bank, and others. Also in the church he was always willing to serve and was very frequently placed on important committees, and for a number of years he held the office of a trustee. He early in life attended the Sunday School of the Evangelical church in Clayton county, and later while in this county he affiliated with the Methodist Church. About 24 years ago he experienced the saving grace of Christ in a revival meeting conducted at that time by Rev. G. F. Barslow, and later became a very active and useful member of the church.

Mr. Arnold was blessed with a strong physic and healthy body up to a few years ago, and since then there was nothing to alarm him or his dear wife until he quite suddenly grew worse five weeks ago. He was taken to the Park Hospital at Mason City where he submitted to an operation, which was considered a success and the best of hope was entertained, but various complications set in from time to time and it was a constant struggle between gaining and losing until the final summons came Monday evening Oct. 23. During these weeks, when at times suffering was intense, he was always resigned and patient. He prayed much, and had his wife pray with him. While he was anxious to recover there seemed to be a waining hope in his mind and he frequently expressed his innermost consciousness that if it were not God's Will that he should recover, he was ready to go. Just two days before he passed away he said, with a firm, triumphant voice, "Jesus is right here with me now." His dear wife who was constantly at his side to comfort and do every possible thing to save his precious life, tells us they had many blessed moments together in praper in the hospital, as they committed their future in the hands of their loving Father who does all things well.

He leaves his bereaved wife, two brothers, three sisters and a large number of relatives and friends.

The funeral service, which was held at the home, was conducted by Rev. G. F. Barslow, of Whiting, Ia. He was assisted by the Rev. G. H. Wessel, of Algona, and by the pastor of the deceased.

Not now, but in the coming years,
It may be in the better land,
We'll read the meaning of our tears,
And there, sometime, we'll understand.

Then trust in God through all thy days,
Fear not, for he doth hold thy hand;
Though dark thy way, still sing and praise;
Sometime, sometime, we'll understand.

(Rev. W. C. Bergmann.)

We are now showing by far the finest selection of

Overcoat Values--

FOR MEN AND YOUNG MEN

That we have shown for years at the attractive prices of—

$26.50 $29.50 $34.50

Fine well tailored all wool fabrics in the lighter shades for young men. Smartly styled—garments we are proud to recommend and stand back of.

Heavy all virgin wool coats and ulsters for men.

You can well afford to come to Mason City to see these coats. The roads are fine.

Opportunities Going to Seed--

In watching for big opportunities in life, how many have overlooked a hundred apparently insignificant chances which might eventually have led to success!

Opportunities gone to seed are the real tragedies in life; they could have brought so much more happiness; achievements rather than dissappointments.

Neglecting to save is allowing one of life's greatest opportunities to go to seed.

Have you a steadily growing savings account.

Say has anyone here seen Walt Bloom lately? We have missed him for several days now and we presume he has lit out for sunny California. Oh, well, Walt will be back again next summer and then we will cuss him for not notifying us that he was beating it without shaking our right mitt a fond farewell.

Everybody seemed to have a birth day the past week in Klemme. Our reporter found that Dr. J. L. Hesselhuus had a birthday Oct. 25th, Mrs. LuVerne Smith celebrated the 27th, Mrs. Mille Smith and Mrs. R. A. Jorgenson the 29th and Miss Lola Smith observed Hallowe'en as her birthday anniversary. Oh no! We are not telling any ages.

The weather man switched around the program and instead of the nice warm weather we had been enjoying turned the whole thing upside-down and ordered rain for Tuesday, then more rain Tuesday night and still some more rain yesterday. He then turned off the rain yesterday afternoon as everybody's cistern was well filled by that time and cleared up the weather again.

Druggist Lamer and wife of Goodell and Druggist Kahrs and wife of this city drove to the Little Brown church near Nashua Sunday in the latter's new Buick. They took a picnic dinner at Charles City and on the way back enjoyed a picnic supper at the Mason City tourist park. The Little Brown church has attracted a large number of Klemme folks to Nashua this summer and fall.

Postmaster H. A. Sweigard and Herman Schneider, both of Garner, were the central figures in an auto accident on the Wilson Highway between Garner and Klemme last Friday. Sweigard and Schneider were driving south in the former's Ford roadster and ran to close to the edge of the grade and the car skidded into the ditch and upste. Neither of the gentlemen were hurt. The car came out of the mix-up with a broken top but was otherwise in working order.

Soon Charles Steele and wife will be hitting the trail for sunny California, so "Doc" told us the other day. He is straightening up his business matters so that he can begin the annual trip westward. He will again travel in the Ford truck with the house on it and we understand he will again carry as cargo Art Kuck, augmented by "Bobbie" Henschen and "Swift" Lewis. This should make a happy combination and we bet they have a lot of fun.

"Fat" Kluckhohn looked unusually fed up Monday morning and on inquiring the whys and wherefores of the rotund appearance found that he and family enjoyed a Sunday dinner in the country with the Ben Reemstma family. Now of course we are not casting any reflections o nthe fine cooking of "Fat's" wife by saying he looked 'fed-up' but we are trying to convey the fact to our readers that he must have made an awful big hole in Ben's food supply. These town guys sure do eat when they are turned loose on a country dinner.

KLEMME SCHOOL NEWS

We welcome Leona Lau back to school again after a four weeks absence on account of sickness.

Last Friday some letters were printed by The Times Print Shop and handed to the school children to give to their parents. These letters were about the state-wide diphtheria epidemic. It explained how this disease could be eradicated and what the parents should do to keep them and their children from getting it. The school officials earnestly hope that these requests will be fulfilled. If these requests are carried out as they should be, it will only be a short time before this epidemic will be completely checked. Other near-by towns and cities are taking similar steps to eradicate diphtheria which seems to be in practically all parts of the state.

The American History class have finished studying the critical period after the Revolution and the Constitutional Conventions, and are now beginning the "Development of Nationality."

The American Literature class is reading the interesting classic "The Rise of Silas Lapham," by Howell. They are also writing a review of the story as far as it has been read. Besides studying this classic they have memorized "Thanatopsis," and "To a Waterfowl," this last week.

The Modern History class have finished the study of the "Crusades." In addition to their lessons in their text book they have been studying topics in the "Current Events" which they find very interesting.

The Advanced Civics class at the present time is studying the Democratic and Republican candidates who are opponents in the coming election November 7. As future voters we are glad to study and learn what we can of the principles of the different parties.

The English I. class is studying the classic, "Silas Marner," by Geo. Eliott. We believe the Freshmen find this a very interesting story.

The Mason City Globe Gazette is now a daily paper of the High School. We hope the students will make the most of their opportunity and increase their knowledge in regard to national affairs.

Last Thursday Miss McKahan received word that her sister was ill and that she should come at once. She left that evening and returned Tuesday morning. We sincerely hope Miss McKahan's sister will soon be on the roadl to recovery.

Mrs. Lester Stille was substitute as teacher for Miss McKahan while she was at her home. We think Mrs. Stille is a very capable substitute.

Professor Neese and Arthur Wellemeyer went to Mason City Thursday on school business.

We were glad to see Marie Blank back to school again last Wednesday morning. Marie was absent for about two weeks on account of injuries received in an auto accident.

Card of Thanks

We wish to especially extend our sincere thanks to the school children of Klemme for the beautiful flowers presented in memory of our dear Anna. We also thank all who helped us with kind words of sympathy and flowers.

—Henry Keeper and family.

METHODIST EPISCOPAL CHURCH

Arthur B. Gedye, Pastor

Morning worship at 10:00 a. m.
Sunday school at 11:00 a. m.
Evening worship at 7:30 p. m.

Service for fellowship and prayer Thursday evenings at 7:45 o'clock.

The services on Sunday were well attended and in the morning welcomed some to the altar to partake of Holy Communion for the first time.

The spirit of God is moving manifestly upon our people. Grieve not the Holy Spirit, but seek His blessing. The people of God must have Clean Hands and a Pure Heart.

On Tuesday evening Nov. 7, we are to have a visit from Rev. Corwin Taylor, Missionary from Korea. Mr. Taylor is the missionary supported and sent out by the young people of the Algona district Epworth League, Northwest Iowa Conference. You will want to hear him at the M. E. church Tuesday evening at 7:30. Come and bring some other young people with you.

—Arthur B. Gedye.

THE ELECTRIC COMPANY

We have given you a number of interesting facts regarding IOWA FALLS ELECTRIC COMPANY, and told you about the work of the Management and Personnel, and of the constant consistent effort to provide Dependable Service to EVERY CUSTOMER.

To accomplish this, the COMPANY has not depended entirely on its own Power Plants, but has connected it's lines with the lines of the IOWA RAILWAY & LIGHT COMPANYS Plant at Cedar Rapids This is the largest central generating station in IOWA and has a capacity of over 30,00 Horse Power.

The Contract between the two Companies provides for exchange of power for a period of 20 years.

The growing importance of IOWA FALLS ELECTRIC Company is shown in the number o Cities and Towns served. These consist of:—

Iowa Falls	Alexander	Kamrar
Popejoy	Coulter	La Porte
Dows	Meservey	Mt. Auburn
Galt	Wellesburg	Rowan
Belmond	Alden	Jewell
Goodell	Williams	Ellsworth
Klemme	Blairsburg	Stratford
Garner	Buckeye	Roland
		Stanhope

19 of These Communities are directly served by the Company without competition. The other six are sold the power on a wholesale basis by contracts.

The 19 cities and towns directly served have granted the Company the right to provide ELECTRIC LIGHT AND POWER for a term of Years. Each Community making its own arrangement.

The use of ELECTRICITY for various purposes is growing rapidly and now many of our customers are using ELECTRIC STOVES, WASHING MACHINES, FLAT IRONS, HEATERS, and many other household aids.

The Company's property is kept in fine condition to insure its upkeep, part of the EARNINGS are set aside in a special fund, for that purpose.

EVERY SAFE-GUARD has been placed about the business to INSURE its conservation and provide for its growth.

IOWA FALLS ELECTRIC COMPANY is largely OWNED by its CUSTOMERS.

These HOME SHAREHOLDERS have shown their faith in their Communities by Investment in this Fundamental business of ELECTRIC LIGHT &POWER and helping to make THEIR TOWNS better places in which to live.

MORE about YOUR COMPANY next week.

THE DOCTOR OF OSTEOPATHY

IS A physician and surgeon of the Osteopathic systm of practice? He is a real doctor in every sense of the term. His scientific education is as broad as the "regular" medical school and better than any other school.

The course in osteopathic colleges is four years of nine months each with an additional two years for the course in major surgery every student is required to give a certain numbe of treatments, all of them have hospital training and do minor surgery and many complete the six year course and do major surgery. They are taught to care for all kinds of injuries (dislocations, fractures, burns, wounds, etc.), attend confinement cases,. use antedotes for poisons and anaesthetics and antiseptics; treat nose and throat diseases; take care of all infections and contagious diseases (including colds, influenza, bronchitis, pneumonia, diphtheria, pleurisy, infantile paralysis, cerebro-spinal meningitis, appendicits, typhoid fever, rheumatic fever, small pox, etc.); the osteopath orders diet and regulates hygiene and uses all precaution to prevent diseases and the spreading of disease.

The Osteopath is not alone a diagnostician but preeminently a healer. He is the only physician today that actually possesses a science of general therapy, applicable to the treatment of all diseases, and his therapy is in harmony with nature and the natural healing processes which are constantly going on within the body.

The last statement is supported by the fact that Osteopaths, throughout the country, lost but one percent of their influenza and pneumonia cases during the great epidemic.

Bureau of Osteopathic Educatino

Write for "Facts About Osteopathy," a beautiful and interesting booklet of 48 pages. It will be sent out at once without charge. Address 1103 F. and M. Bank Bldg., Fort Worth, Texas.

Ask Him "How"?

Ask any man of wealth how he acquired his money, and his answer, ninety-nine times out of a hundred, will be something like this:

"I learned early in life to spend less than I earned. Systematically I set aside a part of every pay-check and put it into an interest-earning savings account. When the 'Big Opportunity' came my way I was in position, financially, to grasp it."

Barring unusual and unforeseen contingencies, every man can save part of his regular income if he has definitely made up his mind to do so.

The Misses Lurley Wilson and Annabelle Carlson were among the rural teachers from here who went to Garner Saturday to attend the institute.

Adolph Ridder and family left Saturday in their car for their home at Watertown, South Dakota. They came here to attend the funeral of Mr. Clarence Arnold.

Our reporter caught John Day in the act of scrubbing his store the other day. John says a scrubbing now and then wether ndd or not will do no harm.

The Garner Signal last night reports that there are a number of cases of mumps in Garner and that a number of children are out of school. They must be having a "swell" time.

Mr. Joe Weber, and Mr. Chas. F. Albrecht, of Waterville, Minnesota, came yesterday noon for a visit at the Charles Stiehl home. Mr. Albrecht is Mrs. Stiehl's father. He is very well known in this community as he lived here for a number of years. His many old friends will be glad to see him.

Get your new suit cleaned and pressed before Thanksgiving. Maybe your overcoat needs it too, we do this work here in Klemme. Patronize your home town whenever you can. Wellemeyer's. adv

Mr. and Mrs. Will Kirkwood left early Tuesday morning in their car for Minnesota. "Bill" has a farm up there and went to look after it. They also have many friends there who will be glad to see them again.

Mr. and Mrs. Wm. Smith and Miss Mable, and Mr. and Mrs. John Day and son Dorance. drove over to the town of Fertile, Sunday. There are many people who do not know that at Fertile is a natural park of great scenic beauty.

Mr. and Mrs. A. D. Gimer, accompanied by Mr and Mrs. R. W. Elder, drove to Mason City yesterday. Art took in some sort of a buttermakers' conflab. If there were any prizes to be offered we bet Art brought one home to hang on the wall along with many others he has captured.

Mr. and Mrs. "Bill" Kirkwood are again residents of Klemme. They are no longer connected with the hotel business at Goodell. They conducted the hotel business at our neighboring town for about a year. We are indeed glad to welcome them back to Klemme.

Ed. Jacobs is again leading the life of a bachelor as his wife has gone to Clear Lake to be with her folks for a couple of weeks. Since Sunday she has a new baby brother and of course he is the best little brother. Uncle Ed heads the old Ford Clear Lake-ward occasionally.

The little daughter of Mr. and Mrs. John Woods was brought back from the hospital at Mason City. Sunday. The little girl had been there about a week. She was suffering from nose bleeding and was taken there for treatment. She is still quite weak but is gradually on the way to recovery.

There are quite a number of farmers near here who have corn picking machines in operation this year. The way they make the corn fields look sick is a caution. And then most of them also own elevators so that it is easy to unload. Lot's of fun to pick corn with a machine says the happy farmer now-a-days.

Ye Editor, wife and son "Buster" cranked up the family "Universal" Sunday and headed nowhere in particular and we reached there at about noon when we discovered ourselves chewing beefsteak at Fort Dodge. Then we headed toward Webster City, Blairsburg, Williams, and then decided to ramble over to Iowa Falls for a short visit with the Hocum family—but they must have heard us coming as they were not at home. We couldn't "bum" a supper there so we drove on to Mason City by way of Hampton, Sheffield and Rockwell. We deposited a couple of cart-wheels at Mason City in exchange for supper and then came on home, calling it a day.

STILLE'S IMPLEMENT NEWS

VOLUME 1. Thursday, November 2, 1922 NUMBE

The rate of depreciation of farm machines depends very largely on the kind of repairs that are used. The right kind of repairs add new life to a machine, but the made-for kind are like patches. The International Harvester Company makes repair parts from the original patterns for every McCormick-Deering machines. Parts sold for repairs are made exactly the same as for new machines. You naturally want to make your farm machines last as long as possible, and the next time you need I H C repairs, or John Deere repairs, be sure to get the genuine from us.

Anyway it's easier to lengthen a skirt to conform with the new styles than a bobbed head o'hair.

By the time a man has saved enough money to afford a wife, these days, he's so old that nobody will have him.

A Positive and Automatic Oiling System

Primrose owners appreciate the simple oiling system. Oil cups are unnecessary on the Primrose—the glass panel on the back of the gear case tells instantly when new oil is needed. Running in a bath of oil, the spindle driving gear throws a spray of oil to each bearing and gear tooth as soon as the crank is turned. When fresh oil is added, an exclusive and patented Primrose

devise drains off the dirty worn oil—just add fresh oil when needed and the Primrose oiling system insures perfect lubrication at all times—it is positive and automatic. Come in and see how well the oiling system of the Primrose works.

We still have a good line of w boxes on hand. If you are in of a box better come in and yours or get it now, as boxes little harder to get. We also good springy spring seats, an course if you haven't anything the new box on, why we have a wagon here too. Then we also the grease to grease the wagon and extra eveners and neckyo and that way down the line we nearly everything you need in chinery and heavy hardware.

We also have pipe in the diffe sizes. a good assortment of fitti pumps, pump cylinders, and a able service truck to come out do your pump and windmill with.

One reason why so many men leaving home is because they to stay there alone.

GIMER WINS GOLD MEDAL AT ANNUAL CONVENTION

GIMER'S BUTTER TAKES FIRST PLACE AT IOWA CONVENTION OF BUTTER-MAKERS

After Many Close Contest Gimer At Last Lands The Gold Medal For State Honors

A. D. Gimer, manager and buttermaker of the Klemme Co-Operative Creamery, has brought honors to himself and put the creamery on the map when his tub of butter was judged to be the best butter at the 13th Annual Convention of Buttermakers held at Mason City last week. Mr. Gimer was awarded the Gold Medal in the cream class, with Mr. C. R. Conway, of Garner a close second with the Silver Medal.

The convention was held at the new Hanford Hotel at Mason City this year. The prizes were awarded after a banquet at the Hotel and a little joke was played on the men who won the prizes. None knew who would be the lucky man and all were wondering whose tub of butter was being served at the banquet. Just as the chairs had been pushed aside to enjoy the program a burley policeman came into the room with warrants for the arrest of A. D. Gime of Klemme, C. R. Conway of Garner, Otto F. Weger of Strawberry Point and N. J. Spurbeck of Denver, Iowa. It looked like the men had gotten into some serious trouble. As it happened the judge was also at the banquet and he then ordered that the trial should be held at once and right there. The above men were given a good talking to by the judge but the only charge he could get against them was that Mr. Gimer had "copped" the Gold Medal and C. R. Conway the Silver Medal and likewise he sentenced Weger to recieve the Gold Medal and Spurbeck the Silver Medal in the milk class. It caused a little excitement but was a novel way to award the honors.

Following is the score of the four men for both classes, and it will be noted the exceptionally high scores:

A. D. Gimer, Gold Medal, 95½
Otto F. Weger. Gold Medal 95 1-8
C. R. Conway, Silver Medal 95¼
W. J. Spurbeck, Silver Medal, 94 1-8

Mr. Gimer can well feel proud of the showing his butter made at the convention. He has worked hard to win the first prize and he has come so near to it a number of times that it almots seemed certain that he would soon "bring home the bacon." And that is just what Gimer has accomplished by sticking to it. His scores have always been right up with the topnotchers and it was only by the small fraction of a percent that he had heretofore lost out on the gold medal.

But Gimer is willing to share the honors with the farmers who took special pains with their cream that he might have the very best cream to churn into prize winning butter; and these farmers deserve special mention and credit for their part. The eight farmers who supplied the cream for Gimer's Gold Medal tub of butter are C. E. Schaefer, Wes Lenz, Oscar Carlson, Herman Paul, Henry Stromer, Becker Bros., Albert Johnson and Albert Lassahan.

If all the farmers would take more pains in handling their cream for the local creamery then that concern could keep up a score that would soon entitle them to use the Iowa State Brand, a priveledge enjoyed by only a small number of creameries in the state. The effort would be well worth while—all it costs is only the effort to put it across and the reward would be state-wide recognition that would put this community on the map as an up-to-date and wide-awake farming and dairy community.

Success to the Klemme Creamery!

Dreaming of Writing.

To dream that you write with a pen denotes good luck; with a quill, loss of health; with a stick, firmness of purpose; with a pencil, warns you of secret enemies. To dream of writing a letter foretells good news; a bill, an accusation.

OBITUARY—ANNA KEEPER

Memorial Service Held At The First Methodist Church Sunday

Anna, daughter of Mr. and Mrs. Klaus H. Keeper, was born in the Province Hanover, Germany, November 16, 1905, and passed out of this life in the early hours of Sunday morning, October 22, 1922.

When a babe of six months her parents came to this country, and, with the exception of one year in Goodell, they have since lived here in Klemme.

Anna attended the Klemme school, finishing the eighth grade last spring. She was quite regular in attending the Sunday School and the Epworth League. She was of a quiet and reserved disposition, yet friendly to all and ever ready to help wherever needed. Her departure out of our midst has left a vacant place, and will be greatly felt in church, in school, in the circle of her young friends, but most in her home where she was a great help and comfort to parents, brothers and sister. Because of the contagious nature of the disease, the body was lain in its last resting place shortly after death, with a very brief burial service, attended by few relatives and friends. Sunday morning, November 5th, a memorial service was held, conducted by her pastor.

The deceased leaves her parents, three brothers, one sister, two grand parents, eight uncles, six aunts, besides other relatives and many riends.

Jesus, while our hearts are bleeding,
O'er the spoils that death hath won,
We would at this solemn meeting
Calmly say, "Thy will be done."

—Rev. W. C. Bergmann.

RESOLUTIONS

While we do not understand the providence of God that took from among us Clarence A. Arnold, yet we are grateful that we were privileged to know him and to have had his inspiring help in our labors.

His death is a personal loss to each of us as well as to the coutny which he loved so well. He was a man whom we sadly could spare. He was pleasing in personality, clear in thought, high in ideals, generous in spirit, wise in council.

As Directors of the Farm Bureau of Hancock County, we wish to express our appreciation of his character and to extend our sympathy to the bereaved who loved him most.

May his memory inspire us to seek the best things in life, and to cary on in the cause which he espoused.

RESOLVED: That a copy of this be spread upon the minutes of the Farm Bureau, and that a copy be sent to the bereaved wife and to the newspapers of the county.

Signed by Committee on Resolutions.

Wilbur Sparks.
Anthony Baker.
T. R. Riehm.

Ernest Helps leaves tomorrow to begin his trip to England where he will visit with his parents and many other relatives and friends in England this winter. Ernie sails from New York the 21st on the Berengaria, one of the three largest ships in the world, of 52.022 tons capacity. Six days later he should be at Southampton, England. He lives at Lattisham Baltonsborough, Glastonbury, Somerset, England. It will be a fine trip for him and he will surely enjoy it as he has not been home for ten years. He intended to go home last year but in some way he had misplaced his citizen papers and it took him several months to get them again. Ernie is a true American and says he wouldn't leave the good old U. S. without his citizen papers and rather than do that he waited a year to get them again. He will be back in the spring.

FLOAT THE STARS AND STRIPES ARMISTICE DAY

Its A Legal Holiday In The State Of Iowa

Get out Old Glory and float the stars and stripes on Armistice Day.

Four years of peace. The World War ended on November 11, 1918 and we have enjoyed four years of peace and prosperity.

Saturday, November 11, a number of towns will observe with a celebration. Garner will celebrate the day this year.

Float your flag Saturday.

NEW CAFE TO BE OPENED IN THIS CITY

R. B. Irving and family have moved to Klemme from Floyd, Iowa, where they have been in the cafe business for the past two years, or since they left Klemme.

Mr. Irving has leased the new brick building of August Baack and has moved into the building. He has installed practically all of his restaurant fixtures at this writing and expects to be open for business early next week, or possibly Saturday.

"Scotty" is well known here as he was at one time proprietor of the Crystal Cafe. He is a good restaurant man and will no doubt give this city a first class cafe.

THEY LEAVE FOR CALIFORNIA ON ANNUAL TRIP

Charles Stiehl To Make Second Trip To Land of Sunshine

Tomorrow Charles Steihl, and wife, accompanied by John Henschen and Charles Lewis will leave in the Stiehl house-truck for California.

They will take the southern route going down this year and will go down through Kansas City, Oklahoma and on down south through the State of Texas. They intend to get to Long Beach for Thanksgiving.

"Bobbie" has promised to act as reporter on the tour for the Times, so we expect to get some thrilling news occassionally.

"DAD" YAHNKE IS SOME DUCK HUNTER

He Bags A Mallard Without A Gun On Klemme Street

We heard a good duck story the other day that puts "Dad" Yahnke in the limelight as the best hunter this season.

Charlie Busch and Art Kuck had been out hunting Monday and were successful in bagging six or seven mallards. One of these was slightly crippled in one wing and injured but a very little. He made a fine decoy and would swim around the pound in a contented manner and squacked a great deal which naturaly attracted more ducks. When the boys were through hunting they got the crippled duck and tied his feet so he would stay in the car coming home, and intended to keep him.

All went well and Mr. Duck enjoyed the car ride, but just as they drove past the Times Office the door of the car came open and the duck fell out of the back seat onto the street. Just then "Dad" Yahnke came along and saw the duck, not noticing his feet were tied. He gave him a look and patted himself on the back for being so lucky to get a duck without a gun right in town. "Dad" grabbed him by the neck and started swinging him around or a merry-go-round ride and off came his head—the duck's of course. Just then Art discovered the duck was among the missing and they turned around—just in time to see the head come off of their decoy. We saw no more, the air got blew—the duck is no more—he decorated the frying pan. What's the use going hunting out in the creek when you can pick 'em up in Klemme?

Gov. Allen Tells Farmers U. S. Ships Will Aid Them

By HENRY J. ALLEN
Governor of Kansas

HARRIS & EWING

THE establishment of the American merchant marine is an element of transportation and is vital, in my opinion, to the continued economic welfare of the agricultural states. World conditions now make the sale of goods in competitive foreign markets more difficult than ever. The American farmer, miner, merchant and mechanic can not compete in selling their excess products abroad unless we have our own delivery system, owned and operated by Americans.

I believe that the only practical way of establishing the Merchant Marine is to pass the pending Shipping Bill which provides an encouragement of from one-half to two and six-tenth cents per ton, per hundred miles, based on speed and distance. The bill also preserves the established trade routes and gives ample protection to the Mississippi Valley, in its ability to acquire at its respective ports, the necessary ships from the government, in order that private operators who understand their business may take care of the commerce of the Valley.

The creation of a permanent merchant marine by means of this act will furnish additional employment to over one hundred thousand Americans on board ships and in shipyards, the steel mills, the iron mines and in many other industries which are necessary to build and operate ships for foreign trade. Every man thus employed must be well fed and the American farmer will be benefitted by raising and selling foods to them and their families.

The Shipping Bill and the Merchant Marine are by way of establishing a sound, national policy—which we have been discussing for fifty years. Of course the fact that we have the ships now in possession of the government, most of them standing idle, should at least demand careful consideration and settlement of this issue once and for all. Of course the fact that we now pay an indirect subsidy of $50,000,000 per year for making up the deficit in the Shipping Board is an incentive to the establishment of a direct subsidy whose maximum would be only $30,000,000 per year.

I believe thoughtful men realize the benefit and advantage from the merchant marine. The wheat of Kansas and of other Upper Valley states; the corn and corn products and livestock, and meat products; the output of industrial institutions entering foreign trade, must find orderly processes of transportation if a reasonable measure of prosperity is to come to this section.

Foreign trade has already interested this great producing section of the country, not in any spirit of romance or artistry, but as a practical business transaction for the disposal of our domestic over-consumption. The legislation now before Congress giving assistance to the shipowners and operators of the country and providing for the disposal of the ships now operated by the United States Shipping Board, will prove valuable to all producers of agricultural and manufactured goods. In Kansas and other farming states, continued prosperity must come from new markets for agricultural products and lowered transportation costs to those markets. Foreign trade is the answer to the question of new markets.

I have given reasonable study to the transportation question. I believe Merchant Marine is part of it. I believe the Shipping Bill is the only way of getting a Merchant Marine. I believe our people, the more they study the question, are inclined to feel the same way about it.

Our rivals for the world's trade view with great alarm the prospects of the passage of the bill and their representatives are spreading insidious propaganda and doing their utmost to defeat the measure. This is the strongest evidence possible why the bill will benefit America and why it should receive the support of patriotic Americans.

As a supporter of the claims of the Middle West for greater opportunities in all matters pertaining to transportation and accessibility to the sea, I hope this Jones-Greene Shipping Bill will be passed by our national Congress this session.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship 10:00 A. M.
Sunday School 11:00 A. M.
Evening Worship 7:30 P. M.
Service for fellowship and prayer 7:15 Thursday evenings.

Sunday evening service will be installation of officers of Epworth League, followed by an address by he pastor.

Our young people are invited to attend the Epworth League and be enrolled as members and help make the young peoples' society a success.

The Win One class will hold their monthly meeting and good time at the home of Wm. Bell on Friday evening next. Come early and have a good time.

Arthur B. Gedye.

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

The memorial service was attended by a large audience last Sunday morning. The church was beautifully decorated with ferns and flowers. We wish to thank all who took special part in this service.

In the evening the church was almost filled to its capacity, side-room and all. The program presented by members of the Womans Foreign Missionary Society was full of good things for head and heart. Those present were well paid for coming out and we hope the Society will give us another such a treat in the near future.

As it was thought best not to hold service at the burial of Brother Henry Lau, and because of sickness in the family, a memorial service could not be held until now. This service will take place next Sunday morning at ten o'clock at the church. Rev. G. H. Wessel, of Algona, who for many years was Brother Lau's pastor, will conduct this service.

The Sunday school, tkhe Epworth League and the evening worship will all take place at the usual time. Rev. Wessel will again preach in the evening. All members and friends should come out to hear him.

Remember the prayer service on Thursday evening. Bring your Bibles.

—W. C. Bergmann, Pastor.

IOWA GOES SOLID REPUBLICAN; BONUS LAW CARRIES!

Election Very Quiet This Year; Not A Large Vote Cast

Fall a general election, Tuesday November 7th, passed very quietly and there was little excitement at the polls.

There were practically only two points of interest and that was the fight for Senator and the Soldiers Bonus Bill.. But even these seemed to cause very little excitement over the state. It was almost a certainty ha Brookhar would win over Herring, and many had predicted that Col. Brookhart would win 2 to 1. It was also generally thought that the Bonus would go through by a safe margin; so it seems for these reasons perhaps that the voters did not flock to the polls as they did in the primaries.

Smith W. Brookhart was elected over Clyde Herring for Senator by over 175,00 majority, according to late reports. The Bonus Bill also went through very safely. The result of the Bonus going through will mean that Iowa ex-service men will receive approximately $22,500,000. The Soldiers Bonus is carrying about by a two to one majority.

Here is how Hancock County voted on Brookhart and Herring:

	Brookhart	Herring
Ellington	121	10
Madison	134	19
Crystal	100	20
Orthel	50	16
Britt	402	122
Garfield	103	32
Concord	363	120
Ell	154	37
Liberty	69	4
Erin	67	9
Boone	44	9
Magor	119	39
Twin Lake	45	7
Amsterdam	305	22
Avery	109	32
Forwith Precinct	34	13

This is how the Soldier Bonus arried in Hancock County:

	Yes	No
Ellington	78	53
Madison	96	58
Crystal	79	11
Orthel	47	16
Britt	340	169
Garfield	62	66
Concord	309	168
Ell	111	71
Liberty	37	31
Erin	38	32
Boone	41	12
Magor	119	44
Amsetrdam	252	65
Twin Lake	22	23
Avery	85	46
Forwith Precinct	28	12

TOCK SELLING IS CONSERVATIVE

Selling of pure bred live stock at he Iowa State Fair at speculative prices, which was in evidence two ears ago, was not indulged in at the g exposition this year.

In place of the hectic dealing in ure bred pigs, immature colts and alves with pedigrees which characterized the fair following the close f the war, there was a substantial ale of high class animals at good prices, but trading on the whole onservative.

Superintendents in all the live stock departments report that reeders see a great future ahead fo he middle west and in Iowa particularly in helping all the world i- tock its depleted stables and pens. Like other industries, the live stock business has taken its losses and is now going forward on a sound and onservative basis.

All live stock sold at Iowa State Fair this year brought highly re- factory prices, breeders declared.

Report from other fais throughout the mid-west indicate that the Iowa live stock shown at these expositions surpasses that exhibited even by the home breeders. One of the Nebraska farm papers says that the showing of draft horses made by Iowka at the Lincoln fair was the outstanding feature there. Similiar comment was made by papers on several of the classes at the Minnesota State Fair.

"Killed" Soldier Is Given D. S. C.

Hero Reported Dead Is Decorated for Meritorious Service on Field of Battle.

LEFT ON FIELD FOR DEAD

Wounded Forty-Four Times in Attempting to Clean Out Machine Gun Nest at Chateau Thierry—Wife Insisted He Wasn't Dead.

Omaha, Neb.—Lieut. "Big Jim" Hanbery, formerly a teacher in Kansas Manual Training Normal at Pittsburg, Kan., who was "killed" at Chateau Thierry, and for whom funeral services and memorial exercises were held in Pittsburg, Tulsa and Enid, Okla., and several other places, was called before the commandant at Fort Crook and before 1,000 soldiers decorated with the distinguished service cross for meritorious service on the field of battle in France.

Before pinning the cross on his breast the commanding officer read to Hanbery a personal letter from General Pershing and another from Governor Allen of Kansas, each commending him for the service he had performed. Although he was officially "killed" at Chateau Thierry, Hanbery is now a newspaper reporter in Omaha.

Wounded Forty-Four Times.

Briefly, this was the service for which Hanbery was decorated:

At Chateau Thierry he undertook, with a platoon of men, to clean out a German machine gun nest. He was wounded 44 times, left for dead on the battlefield for 36 hours, crawled and rolled three miles to the American lines, spent many months in a hospital and today carries one bullet in his body and four pieces of a high-explosive shell in his head.

"Big Jim" (he stands six feet two inches in his bare feet) was teaching at Pittsburg when the war broke out. He didn't wait for the draft, but enlisted at once. He went through one of the training camps, was commissioned lieutenant and married to Miss Nellie Crane, teacher in the same school at Pittsburg. He was lieutenant of Company L, Fifty-ninth infantry, Fourth division, and in this capacity went to France.

The War department cabled his wife in Pittsburg and his parents in Enid of his "death." When the funeral services were arranged Mrs. Hanbery refused to attend.

"Jim is not dead," she insisted. Everybody pitied her. But she insisted "Jim is not dead."

Papers Played Up His Death.

Kansas and Oklahoma papers played up his "death."

"Big Jim's" family got all the clippings they could. They wanted to keep them to read in after years. Now "Big Jim" has them all nicely pasted in a scrapbook and can read his own obituary whenever he pleases. In addition to the clippings there are half a hundred telegrams of sympathy, the official notice from the War department and several soliciting letters from dealers in tombstones and monuments.

But Mrs. "Big Jim" insisted Jim was not dead.

One day a couple of months after "Big Jim's" funeral services, Mrs. Hanbery received a letter from Lieutenant Hanbery. He was all shot to pieces and in a hospital in France, but getting along pretty well.

"I told you Jim wasn't dead," was about her only comment.

In time Hanbery was brought back to the States, spent many months in a hospital and finally was well enough to get back to work. He came to Omaha and became a newspaper reporter.

And that's why he was called down to Fort Crook and in the presence of the entire garrison, officers of the Seventh army corps area, officers from Fort Omaha, members of the War Mothers, Overseas Girls and other patriotic organizations had pinned to his breast the bronze distinguished service cross.

Thirst Saved Life When Fireworks Plant Blew Up

Frank Danaise, owner of the Danaise Fireworks company, near Lorain, O., owes his life to his thirst. He left his one-story wooden factory building to go to a nearby house for a pail of water for drinking purposes. He was just 100 yards away when powder in the building exploded and blew the plant to atoms. The force of the explosion stunned Danaise, but he escaped injury. The cause of the explosion is unknown.

Finds Two Pearls in Oysters.

Philadelphia, Pa.—Albert Franks, proprietor of an oyster house, has released thousands of bivalves from their shells, but not until recently did he find a pearl. Then he found two large ones. Estimates as to their value vary, but it is generally agreed that Franks could close his establishment, go to Palm Beach for the winter, and still call it a profitable season.

Escapes Smyrna; Tells of Fire

Greek, Saved by American Sailors, Saw His Parents Killed by Turks.

COMES HERE AS STOWAWAY

Band of Cutthroats Fire Buildings That Were Not Already Burning and Kill Inhabitants and Loot Houses.

New York.—Constandinos Skatziris, a Greek, twenty-seven, a refugee from Smyrna, saved by sailors from the United States destroyer Litchfield, arrived here from Naples as a stowaway on the steamship Guglielmo Peirce. He told immigration inspectors that his parents had been slain before his eyes, but that his sister, whose whereabouts he does not know, had been saved.

Skatziris said that he had kept a small grocery store in the Greek section of Smyrna near the plague hospital. On October 16, three days after the town had been fired, a Turkish bandit, a giant in stature who had been a hamel, or porter, on the customs quay before the war and who had acquired fame as a wrestler, had entered Smyrna at the head of a band of cutthroats and had set fire to any buildings that were not burning. Then they had started to kill the inhabitants and loot houses.

Father and Mother Killed.

"They rushed into my store in the forenoon," said the stowaway, "brandishing long, broad-bladed knives, and attacked my father and mother and my brother Thomas, who were trying to keep the Turkish robbers from taking goods. My parents were killed. One bandit seized my sister Katherina and bore her away on his shoulders. I pursued him while my brother fought desperately in a corner of the store.

"I searched everywhere for her. At last I was told she had been carried off by the brigands to their caves in the mountains back of Smyrna, where they had been hiding and preying on the country people since the Greek army had entered in the spring of 1921.

"After hiding all day, I went to the American consulate, where I found some naval officers and sailors from the destroyers in the harbor which were taking off the refugees to the steamships bound for Greece.

"I got to the waterfront with great difficulty, as the heat from the burning ruins was intense and the smoke from the tobacco warehouses was suffocating. Because the streets are very narrow in Smyrna it was impossible to pass down them. The flames had spread across from side to side, and the roadway was piled with debris.

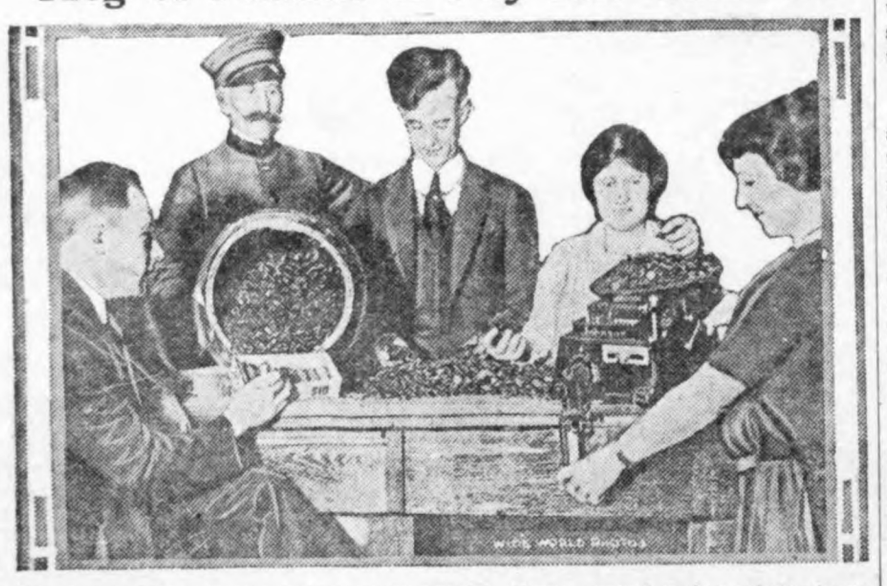
Sailors Save Sister.

"At the custom house steps I met a boatman who knew my family. He told me that Katherina had been saved by sailors from the American destroyer, but could not inform me which steamship she had been taken to. There were fully 2,000 refugees, men, women and children, on the quay when I was there, five days after the fire started. The last news I had was that the American consulate had been fired by the Turkish bandits, or irregulars, as they were styled."

The stowaway said the Turks had not attempted to interfere with the Armenians, Greeks, Jews and other refugees when they had come under the protection of the American sailors, but that many had been killed in the streets before they could reach the waterfront. Their bodies had been thrown into the flames in order to hide all traces of the crimes committed by the invaders.

He said an Italian steamship had taken him to Brindisi. At Naples he had hidden away on the Guglielmo Peirce to get to America, where he says he has friends, although he does not know where they live.

Keg of Pennies to Pay Her Taxi Bill



A wealthy woman residing in Greenwich, Conn., moved to her winter home in New York the other day, leaving a bill of $420 owing a Greenwich cab company for taxicab fares. A representative of the company had visited her estate several times in an effort to collect, but was unsuccessful. The woman sent a taxicab from New York to the cab company's office in Greenwich with a large keg containing 42,000 one-cent pieces. With it she sent $1 to pay for the taxi that had made the two trips to her home, and her photograph, under which was written, "O la la." It took four men to carry the keg into the Putnam Trust company office. The photograph shows bank officers counting the pennies.

SCIENCE SEEKS THE TRUTH GIVER

Doctor Would Experiment on Convicts With Twilight Sleep.

Believes That Under Influence of Anesthetic Subjects Will Tell All Facts About Crimes of Which They Are Accused.

Hot Springs.—Dr. E. E. House, Ferris, Tex., physician, will probably continue his efforts to secure permission to conduct experiments on prisoners at the federal penitentiary at Leavenworth, Kan., to demonstrate his theory that while under the influence of scopolamine anesthetic, or during "twilight sleep," subjects will tell the facts regarding crimes of which they are accused.

In addressing the convention here of the Medical Association of the Southwest, Doctor House said that he intended to use every effort to secure permission to make experiments on 1,800 prisoners, taking the stand that this number of experiments will prove his theory to the satisfaction of both physicians and criminologists.

The medical association failed to give its official indorsement to Doctor House's plan, but the subject was widely discussed in an informal manner, and much interest was expressed in the continuation of the experiments, which Doctor House says have been under way for several years and have brought invariable satisfactory results.

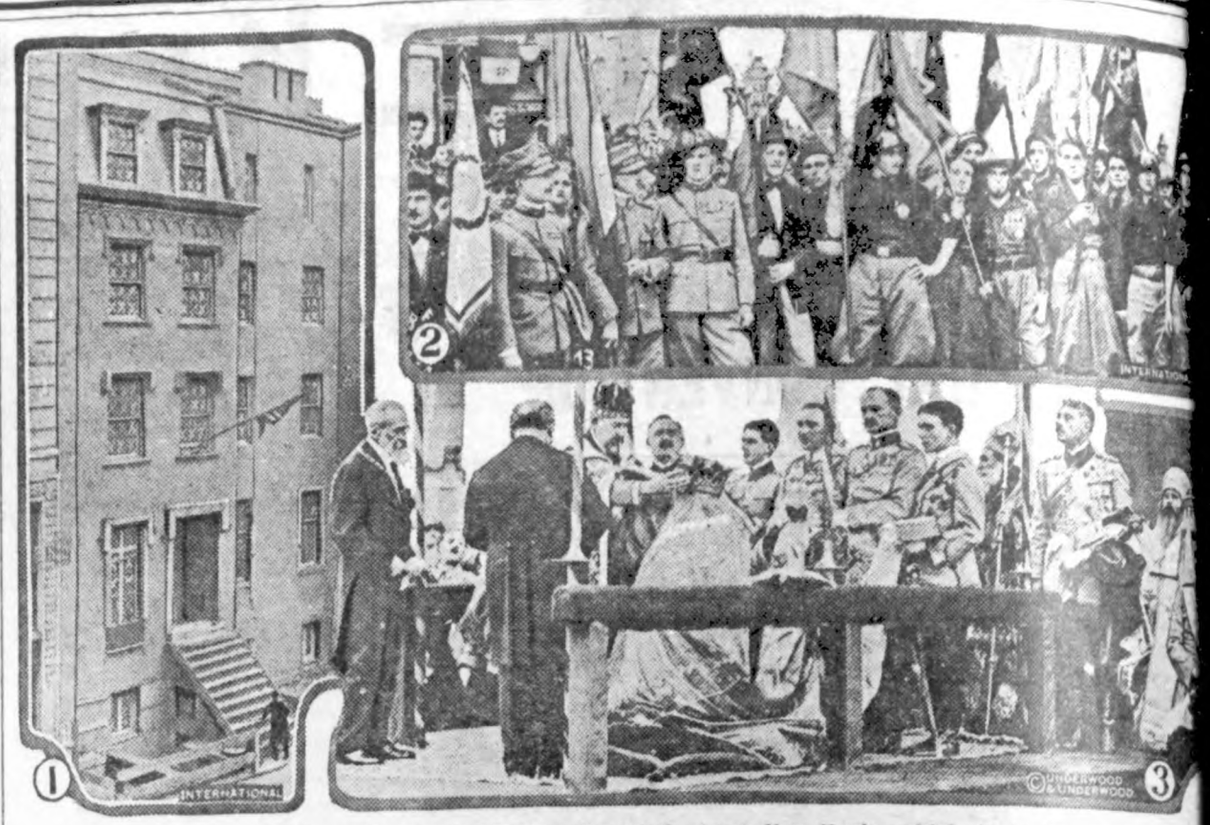
In the informal discussion of his paper the physician emphasized that the results of his experiments could not be expected to stand as evidence in any court, but claimed that the facts obtained through questioning of accused persons or witnesses during the period of "twilight sleep" could be advantageously used by authorities in the solution of many mysterious crimes, and in dozens of instances would prevent a miscarriage of justice, even if the real criminal was not brought to justice.

In one experiment in Dallas, which he cited to the association, he said that a man under arrest, charged with a serious crime, seemed almost certain of conviction on circumstantial evidence. "Twilight sleep" was induced without the prisoner's knowledge, and he gave information which, when checked up by the Dallas police, proved the man's innocence and resulted in his acquittal.

The physician held that, when his theory has been adequately proved by thorough experiment in hundreds of cases, a new field in criminal investigation will be opened up, which will not only prove a powerful aid in the detection of criminals, but will also become a great protection to those unjustly accused of crime.

Science Reduces Fatigue.

Scientific methods for cutting down the fatigue of factory workers is proving successful, the result in one large factory being a 27 per cent increase in efficiency.



1—Birthplace of Theodore Roosevelt, 28 West Twentieth street, New York, which is to be preserved as Roosevelt museum. 2—Some of the Fascisti, carrying their standards, who have won control of Italy. 3—King Ferdinand of Rumania, himself just crowned, placing the crown on the head of Queen Marie

NEWS REVIEW OF CURRENT EVENTS

Fascisti in Complete Control of Italian Government With Mussolini as Premier.

JUGO-SLAVIA TALKS OF WAR

America Declines to Participate in Near East Conference but Names Her Interests — Turkish Nationalists Dethrone Sultan — Marriage of Former Kaiser Wilhelm.

By EDWARD W. PICKARD

THE United States has declined the invitation to participate in the Near East peace conference at Lausanne, Switzerland, but will be represented by observers who will keep tab on "certain subjects of particular American concern." Do you think the United States could or should do anything more than this in the settling of the tangled affairs of the Near East?

NO VICTORY could be more complete than that won by the Fascisti in their peaceful revolution in Italy. They are now in absolute control of the government and their chief, Benito Mussolini, is premier and minister of foreign affairs and of the interior. Giolitti declined the premiership, so Mussolini at the invitation of the king took the place and promptly announced the new cabinet. Most of its members belong to the Fascisti, but several places are given to the Nationalists, one to the Democrats and one to the Catholic party. From all over the country the Black Shirts flocked to Rome where 100,000 of them paraded before the king and premier, and then, at the order of their leaders, they dispersed to their homes to resume their vocations.

Italy seems to have supreme confidence in Mussolini, believing that he will put an end to the conflicts of political factions that have sadly hindered its development during the last three years and that under his rule economic prosperity will be restored. He is young, vigorous and unpretentious and already has buckled down to hard work. Once he was a revolutionary Socialist and was expelled from Switzerland and from what was then the Austrian Tyrol. But he broke with his old associates when in his paper, Popolo Italia, he urged Italy to enter the war on the side of the allies. To the world at large the victory of Mussolini and his Fascisti is most important because it was a victory over the Communists, radical Socialists and "Reds" generally. These forces of disruption and disorder were so badly whipped that the Communist party in Italy has announced its own dissolution, which presumably means that the Communist deputies will resign from the chamber.

Mussolini, denying that his program has any chauvinistic plans, said: "Italy needs peace at home as well as abroad. I never believed in a bellicose attitude, and therefore no clash is possible between Italy and Jugo-Slavia or any other power. We want to prove that our sole ambition is to make the country a true friend toward friends and of a people strong, fair and laborious, a people worthy to live alongside the greatest nations."

Nevertheless Jugo-Slavia was greatly excited by Mussolini's triumph and talked wildly of mobilization and war. Her frontier guards were re-enforced and some fighting was reported. In Rome it was said the alarm of the Serbs was groundless.

WHEN envoys of the nations most concerned gather in Lausanne, Switzerland, on November 13, for the Near East peace conference, the United States will be represented only by "observers." We were invited to full participation, but Secretary Hughes declined, stating:

"The conference proposed for the purpose of drawing up a treaty of peace with Turkey will have primarily to deal with the problems resulting from the state of billigerency between the allied powers, Turkey, and Greece. The United States was neither at war with Turkey nor a party to the armistice of 1918, and does not desire to participate in the final peace negotiations or to assume responsibility for the political and territorial adjustments which may be effected."

At the same time Mr. Hughes said his observers would keep watch over the disposition of "certain subjects of particular American concern."

Soviet Russia was invited to take part in that portion of the conference which has to do with the Dardanelles, and while she is indignant at the limitation, she probably will accept.

THE Angora national assembly has declared the sultan of Turkey dethroned and also has condemned to death the Turkish signatories of the treaty of Sevres and the members of the cabinet of former Premier Damad Ferid Pasha. Thme sovereignty of the nation is declared to rest in the hands of the people, and the name Ottoman Empire is changed to the State of Turkey. This is virtually the proclamation of a republic, but another sultan may be elected later.

EXCEPT among the German monarchists, the marriage of the former kaiser and Princess Hermione of Reuss on November 5 has caused only amusement. Really it is entirely unimportant, but Wilhelm spread himself so far as he could, with ludicrous pomp and proclamations in which all his lost titles appear. The ceremony was performed at Doorn and was attended by a considerable number of the faithful, including George Sylvester Viereck, the notorious pro-German-American publicist. Wilhelm wanted to take his bride for a honeymoon trip outside of Holland, but the allies and the Dutch government wouldn't permit that. The "queen of Prussia," as Hermione now styles herself, seems to be a determined lady and she has announced that she will spend several months each year away from Doorn which would be too dull for continuous residence. But hubby must remain there.

ATTORNEY GENERAL DAUGHERTY, who has been attacked repeatedly because of his alleged slowness in prosecuting the "war swindlers," has announced that preliminary investigation into 425 wartime contracts has disclosed evidence on which the government will take action. In every one of these cases, he says, either civil or criminal suits or both must be brought by the government. "Legal civil action will be taken in every case in which it has been discovered that fraud, collusion, or dishonesty was practiced," said the attorney general. "While great numbers of cases indicate on their face the worst kind of fraud and thievery, the government cannot, of course, go into court until it has established absolutely on the face of records in its possession that its case will stand the acid test. The government must be fair to itself, and fair even to those whom it would brand as crooks and profiteers, yet, every single individual, firm, or corporation involved in the cases now in the possession of the department, must satisfy the government's claims to the last penny."

PRESIDENT HARDING celebrated his fifty-seventh birthday last Thursday by going through with his usual round of official duties. The day was not forgotten, however, for telegraphic greetings came from many rulers and leaders of other countries and from innumerable friends in America. The President spent the evening quietly with Mrs. Harding, who, though recovering from her recent severe illness, is still confined to her bed.

FINAL ballyhooing for the elections this week demanded much attention from Americans during the week just closing. To predict results would be foolish. Down in Texas there was a seemingly inextricable tangle that, it was believed, would leave both major parties without any candi for the United States senate on ballot. The Democrats had G. E. Peddy, fusion candidate, barred f the ticket because he participated the Democratic primary. This fected the 150,000 Texans who v for Harding. Then charges w brought against E. B. Mayfield, D ocratic candidate, because he was s to have been a member of the Klux Klan. This has resulted in legal complication which at this w ing seems likely to keep Mayfie name off the ballot. The fight may carried to the senate.

MUNICIPAL elections in Engla which were taken as indicat of the results in the coming gene elections, turned out very badly the laborites, usually classed there Socialists. They lost 149 seats wh they had held in London and ab 160 seats they had held in 80 borou outside the capital.

Cuba also had elections and Liberal party scored a sweeping v tory, increasing their representatio the lower house of congress so m that the administration majority imperiled. It is worthy of note t no disturbances were reported.

PRESIDENT OBREGON of Mex got rid of one of his most dan ous enemies last week. General M guia, leader of the latest revolt, caught asleep in a church at Te huantes and within a few hours been court-martialed, condemned executed by a firing squad. The ha was explained by the fact that he seeking legal restraints to prevent immediate trial. It was felt in M ico City that Murguia's death brou appreciably nearer the general pa cation of the country.

THREE notable men died last we Father Bernard Vaughan, fame Jesuit preacher and brother of Ca inal Vaughan, passed away in E land. Thomas Nelson Page, w known American author and form ambassador to Italy, died in Virgi Thomas DeWitt Cuyler of the Pen sylvania Railroad company and cha man of the Railroad Executives' as ciation, was found dead in a priv car at Philadelphia.

THE mixed claims commissi named to adjudicate war cla between the United States and G many, is now busy in Washington. the first sessions, with Justice I presiding as umpire, the working s tem for presenting the claims was s tled. The American commissioner Judge Edwin B. Parker and the G man commissioner, Dr. Wilhelm K selbach.

RECENTLY the federal railway bor board rendered a major opinion rejecting "the living wa theory advanced by spokesmen railway unions. If given strict ap cation, it would give common labor a minimum wage of about 72 cents hour, and as a step toward this maintenance of way men asked a cent minimum. The labor board, creasing the prevailing rate 2 ce an hour, granted a minimum rang from 25 to 37 cents an hour. It in connection with this decision th the living wage opinion was giv the board asserting that the wa theory of labor if given applicati "would wreck every road, and if tended to other industries, would c ry them into communistic ruin." Sa uel Gompers, Edsel Ford and Willia Randolph Hearst all assailed th view. Their attacks roiled Ben Hooper, chairman of the board, a he retaliated with a stinging sta ment. He gave Mr. Gompers cre for sincerity, marveled at the attitu of the Hearst papers and poked fu at young Ford. He continued:

"One of the expert economists w presented the matter to the board t the employees stated that this wou 'throw a monkey wrench into the dustrial machinery' and that t theoretical living wage should not established all at once, but the mi mum should be made 48 cents p hour. This would likewise create deficit of several hundred million d lars.

"The swelling tide of prosperity our country cannot be hastened methods of this kind."

THE LEGION OATMEAL COOKIE

Recipe Submitted by Mrs. Frederick Gehlman, Springfield, Ill., Wins International Contest.

Mrs. Frederick Gehlman of Springfield, Ill., presents the national cookie to the country. Of the 400 recipes which have been pouring into national headquarters of the American Legion Auxiliary during the past two months, the Gehlman "Oatmeal Cookie" has been selected to fill the jars in military hospitals throughout the United States.

Mrs. Herbert Pinnell.

Although no prize whatever was offered in this unique contest, recipes came in from every state in the Union and from Hawaii, Alaska, Canada and Paris besides. So it was really an international contest, but the winner is from our own Middle West. The jury selected Mrs. Gehlman's cookie recipe for use in the hospitals, because it best combines food value with low fat content. It makes a mighty good tasting cookie, too. Here it is:

- 1 cupful sugar
- 1 cupful flour
- 1 teaspoonful soda
- 2 teaspoonfuls baking powder
- 2 cupfuls rolled oats (ground)
- 1 cupful raisins (cut with scissors)
- 1 cupful lard or butter
- 1 cupful sour milk
- 1 egg (well beaten)

Process: Flour the raisins. Cream the fat in a mixing bowl, adding the sugar gradually. Add the egg, then the milk, then the dry ingredients after sifting them together, then the oats, and lastly the floured raisins. Drop a teaspoon, put onto a greased and floured baking sheet. Put into a moderately hot oven (350 degrees) and bake 10 to 15 minutes.

Mrs. W. J. Marks of Indianapolis, nationally recognized domestic science expert, and the members of her "flour" board acted as judges for the contest. The cookie selected as an alternate to the Gehlman hospital cookie, another "oatmeal cookie" which they would also commend for general use. It contains a larger percentage of fat and milk. Mrs. A. O. Wiggin, Lima, Ohio, sent it in.

The vote gave Mrs. Mary B. Snodgrass of Highland Park, Mich., second place without a rival. She sent in an "orange cookie" recipe.

The Judges selected as the third winning recipe a "cream cookie" with medium fat content, sent in by Miss Mary E. Robinson, Walla Walla, Washington.

Mrs. Herbert Pinnell of Indianapolis is shown mixing the dough for the Oatmeal Cookie. She was one of the board of judges and—secret—she hasn't been mixing dough for Husband Pinnell very long.

NO LEGION MAN MISSING

Clair A. Anthony Is Being Sought by Toledo Post, No. 319—His Family Needs Him.

Joseph Baker Post, No. 319, Toledo, Ohio, is seeking the whereabouts of Clair A. Anthony, who disappeared from his home in that city, and whose wife and children are in destitute circumstances. Anthony is described as being twenty-nine years old, five feet six inches in height, weight 180 pounds, ruddy complexion, dark-brown hair, blue eyes. He walks with a slight limp in the left leg.

Clair A. Anthony.

Anyone having information concerning Anthony is asked to communicate with Leland M. Beatley, commander of the post, 4112 North Haven street, Toledo, O.

Circumstantial Only.

In the complaint of a farmer, old Si Slim had been haled into court charged with chicken shooting. His lawyer had made a fairly good case for him and for a clincher had the plaintiff recalled, hoping to make him contradict his own testimony.

"Now here," he said, scowling savagely, "will you swear that it was Slim who shot your chicken?"

"Well," said the farmer mildly, "I couldn't swear to it, but I suspect him."

"That's not enough to convict a man. What makes you suspect him?"

"Why, I saw him in the chicken yard with a gun, then I heard the gun shoot, and then I saw him putting the chicken into a bag—and it didn't somehow seem sensible to figger the chicken committed suicide."—American Legion Weekly.

SQUARE DEAL, THEIR SLOGAN

Commander and Buddies of Portland, Oregon, Post No. 1, Insist on Fair Treatment of Men.

"We ask no favors, only the square deal." James J. Crossley, former major in the World war, and commander of Portland Post No. 1, Portland, Ore., declares the foregoing is the only platform on which he and his buddies have based their battles—and they've not been few—in behalf of former service men. Since the boys came back to set their feet once more in the paths of peace, some of them bewildered by the changing conditions, all having lost several precious years from their lives in the matter of competing successfully in their work or professions, Mr. Crossley has spent much time and energy seeing to it that his comrades did receive a square deal, did have an opportunity to earn a livelihood unhampered.

James J. Crossley

Recently Commander Crossley took up the cudgels for two former service men who had passed the civil service examinations for a municipal position with grades higher than the man whom the mayor and city commissioners had decided to name. The successful candidate was undertaking, it was charged, to persuade the two former service men to withdraw, and seeking to use political influence gained through a considerable city service to aid him. Crossley immediately took the matter up for his post. He carried the fight straight to the mayor and commissioners. And the appointment went to the highest competitor—the former service man.

"We have been unusually fortunate in Portland," the commander is quoted as saying, "in placing our buddies in positions of trust they are capable of filling. Our municipal judge, the superintendent of the womens' bureau of the police department and the chief clerk of the park bureau, saw service in the World's war. I believe one of the greatest duties of the American Legion is to fight for its members as against political influence which seeks to deprive them of positions and give them as plums of politics. Legion officers should be ever on the alert. Often those with authority to make appointments are glad to choose Legion men, if only the Legion shows an interest and asks that it be done. We must always be ready to present our case whenever it is necessary. The American public wants to see its former soldiers receive justice. The Legion is the public's representative as well as the veterans'."

PRAYS FOR BOY'S RETURN

Gray-Haired Mother of Leo Crete, Fisherville, Mass., Seeks Help of American Legion.

There's a mother in Fisherville, Mass., who says she has only one hope, one joy in life left to live for—and that's to see her son again. He has not written to her, nor has she heard from him for more than two years. And daily she prays, she writes the American Legion national headquarters, that Leo Crete, the son, be returned to her.

Leo Crete.

"Now I am writing you, with a mother's prayer, to try and locate my son," the mother, Mrs. Wilfred Crete, Providence Road, Fisherville, says, in her letter. "I have prayed and prayed for the last two years with no reward. I keep worryiug and worrying over him, and now I am a gray-haired mother, longing for my boy. My heart is filled with anguish. I want him so; want him to come home to me."

The accompanying picture of Leo was taken when he was overseas, with the Army of Occupation in Germany. His mother describes him as being five feet five and one-half inches tall; weight 140 pounds. He is dark-complexioned and has dark brown eyes. The mother heard from him last at Conneaut, O., where, after he had started home from Salt Lake City, Utah, he wrote he was going to work on the Great Lakes boats. Leo enlisted in the regular army when fifteen years old and, after serving in France, returned to the United States and reenlisted, serving one year.

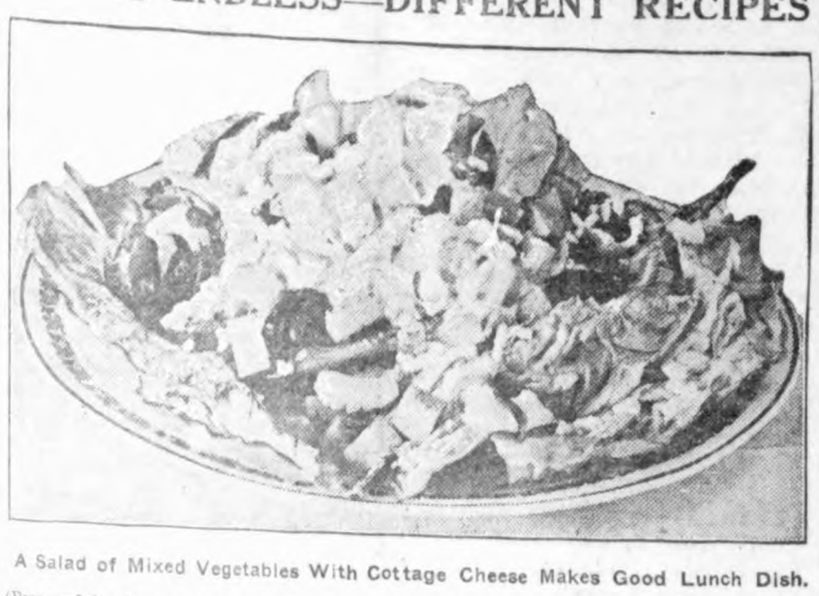
War Scholarships to 2,798.

War scholarships amounting to $500,000 have been given 2,798 young Methodist former service men through the board of home missions and church extension of the Methodist Episcopal church. These men are in 209 schools, colleges and theological seminaries and have been receiving from $50 to $250 a year as a gift from the centenary fund to enable them to finish their studies interrupted by the war.

Legion Men Everywhere.

The world seems very small or the American Legion mighty large when one reads in the Panamal Canal Legion Post publication that "cards have been received from Mrs. Grace Townsend of American Legion Auxiliary, who is representing the department of Panama, American Legion, at the memorial services at Mammoth Cave."

NUMBER OF SALAD COMBINATIONS IS ENDLESS—DIFFERENT RECIPES



A Salad of Mixed Vegetables With Cottage Cheese Makes Good Lunch Dish.

(Prepared by the United States Department of Agriculture.)

Sometimes a housekeeper finds she has everything necessary for a salad except the lettuce. In such a case the United States Department of Agriculture suggests that finely shredded cabbage, either red or white, will answer for the "bed" for the salad, or that any cooked or canned vegetables, as well as many fresh ones, may be served with salad dressing without the customary lettuce leaf. Fresh celery is an appetizing addition to most salads when it can be obtained, but it is not necessary. Cabbage for use as a salad foundation should be finely shredded, not chopped, and put in cold water for about an hour to become crisp. Canned vegetables should always be heated to the boiling point and then cooled before using in salad.

Different Salad Dressings.

There are three basic salad dressings of which most other dressings are adaptations. The following recipes are tested and recommended by the United States Department of Agriculture.

French Dressing.

- 3 tablespoonfuls oil
- 1 tablespoonful vinegar
- Cayenne
- ½ teaspoonful salt
- ¼ teaspoonful pepper
- Paprika

Blend the oil with the seasonings and add the vinegar slowly. French dressing may be made in quantities, kept in a cold place and stirred or shaken in a bottle vigorously when needed. French dressings are preferable for dinner salads.

Vinaigrette sauce is made by adding to French dressing a teaspoonful each of chopped capers, olives, parsley and small cucumber pickles.

Mayonnaise Dressing.

- 1 egg
- 1 teaspoonful mustard
- ½ teaspoonful salt
- 2 tablespoonfuls vinegar
- 2 cupfuls oil
- Cayenne

Place the egg, mustard, salt, cayenne and vinegar in a bowl. Beat well with a Dover egg beater till thoroughly blended, then add one tablespoonful of the oil and beat again. Continue adding the oil gradually until one cupful has been used, then add in larger amounts.

Mayonnaise is liked for luncheon or supper salads, where the salad is the principal dish or is preceded by a very light course. It is considered too rich to be appropriate for a hearty dinner.

Boiled Dressing.

- ¼ to ½ tablespoonful salt
- 1½ tablespoonfuls sugar
- 1 teaspoonful mustard
- ¼ cupful vinegar
- 1½ tablespoonfuls flour
- Yolks 2 eggs
- 1½ tablespoonfuls melted butter
- ¾ cupful milk

Mix dry ingredients, add yolks of eggs slightly beaten, butter, milk, vinegar very slowly. Cook in a double boiler until it thickens. Strain and cool. This dressing is useful in a family where oil is not liked. Sweet or sour cream may be used instead of milk.

Many of the cooked vegetables, such as carrots, peas, cabbage, beets, cauliflower, kohlrabi, or Jerusalem artichokes make a good salad when served cold, either alone or in combination with celery, or with several other vegetables; canned string beans, asparagus, beets, peas, peppers and okra all lend themselves well to use in salads. Asparagus is particularly good when served hot with hot vinaigrette sauce described above.

Soup meat, which is often discarded because it has little flavor, still contains much nourishment. If cut in pieces and mixed with a hot vinaigrette sauce it makes an excellent luncheon or supper salad. When cold it is good in sandwiches.

Fish and meat salads are almost complete meals. Cottage cheese salad with mayonnaise dressing is an improvement to many vegetable and also to fruit salads. A spoonful may be served on one side of the salad, or it may be mixed with chopped nuts and mayonnaise and made into balls for garnishing.

When one considers that the salad list also includes oranges, berries, bananas, either fresh or canned peaches and pears, and other available fruits, it is easy to see that the number of possible combinations is endless.

COOK CUTS OF BEEF IN APPETIZING WAY

Less Gas Needed for Stews Than for Broiling.

Some Dishes Are Not in Favor Because of Haphazard Manner in Which They Are Prepared—Much Meat Is Wasted.

(Prepared by the United States Department of Agriculture.)

With a properly regulated flame, less gas is needed to prepare a stew or a tongue or to "boil" (simmer) a piece of corned beef, or other cheaper cuts of beef that is required to broil a thick steak properly, says the United States Department of Agriculture.

Stews.

Meat stews are not in great favor. This may be because they are so often prepared in a haphazard way. Try selecting lean beef from the neck, brisket, the shoulder clod, or the heel of the round and making a brown stew.

Cut the beef into inch cubes. Season each piece, dredge thoroughly with flour, and brown on all sides in a frying pan using suet or drippings. Avoid having too much fat. Then add just enough hot water to cover the pieces and when this has boiled up once pour all into a double boiler and cook for three hours. The gravy may need to be thickened at the last with a little flour. Serve with baked potatoes, plain cooked rice, or hot biscuits.

Boiled Beef.

Strictly speaking, no meat is ever cooked satisfactorily by being actually boiled in water. To prepare so-called "boiled" beef, plunge the meat into boiling water to harden the surface a little and prevent too rapid an escape of the juices. Finish the cooking by simmering, allowing plenty of time for the process.

Corned Beef.

Too often corned beef is served underdone and a great deal of good meat is wasted because of this. Try cooking a piece of corned beef by simmering it in a liberal amount of water for from three to six hours according to the cut. The water in this case should be cold when the process is begun. Beef tongue and heart are also much better when cooked by simmering for several hours or until thoroughly tender.

And one of the tougher cuts of beef may be prepared satisfactorily if well seasoned, browned in a little fat, placed in a covered casserole or roaster and cooked slowly for some hours. A little water should be added to keep the meat moist.

It should be remembered that it is the long cooking at a low temperature that brings success in the preparation of the tougher cuts of meat.

MONEY SAVED MAKING TAPE

Many "Tricks of the Trade" Taught in Home Dressmaking Classes—Idea of Iowa Woman.

There are many little "tricks of the trade" taught in home dressmaking classes conducted by extension workers, which are much appreciated by mothers who must also learn how to economize in every way. One such trade practice of value in home-sewing is the making of bias tape. An Iowa woman found she could make 46 yards of bias tape from a yard of 36-inch material. She picked up three remnants of gingham and percale, each piece a yard long, and at a cost of 48 cents and a time investment of 45 minutes made 104 yards of tape which was one-half to three-quarters inch wide when finished.

Household Questions

Novel slip covers are of Turkish toweling, calico and linen.

* * *

Rubber fingers are excellent to wear when slicing vegetables.

* * *

Wood ashes will remove flower-pot stains from window sills.

* * *

If a corner is chipped off a gilt-edged frame camouflage it with chewing gum. Gild with gold paint.

* * *

Do not empty bean water in the sink, as it will always leave a disagreeable odor which lasts a long time.

* * *

People who are troubled with moths should shake the clothing which is in the closets once a week, as the moths lay eggs in the creases.

* * *

Save your bread scraps in a bag suspended near the stove. The heat will dry them out and you will find them easily crushed when in need of bread dust for frying fish.

Pretty Home-Made Gifts

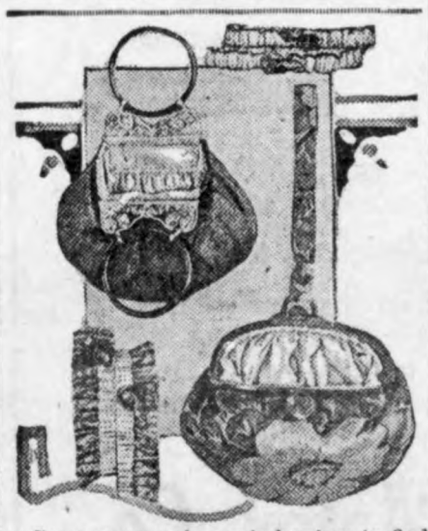
Among Home-Made Toys

Among the things that delight little folks are dolls and small animals made of elderdown flannel or Turkish toweling, and painted with water color paints. The doll and dressed-up kittie pictured here, are among them. The doll's face may be made of a piece of ribbed stocking and the kittie's face and clothes are painted on.

To Frame Fair Faces

Every Christmas brings new breakfast caps. Here are three of them made of net, lace and ribbon in different shapes and decked with tiny ribbon flowers. Each has a short, elastic tape set in a casing across the back, to fit it to the head, and they are among the welcome gifts that can be made by their donors.

Lovely Ribbon Gifts

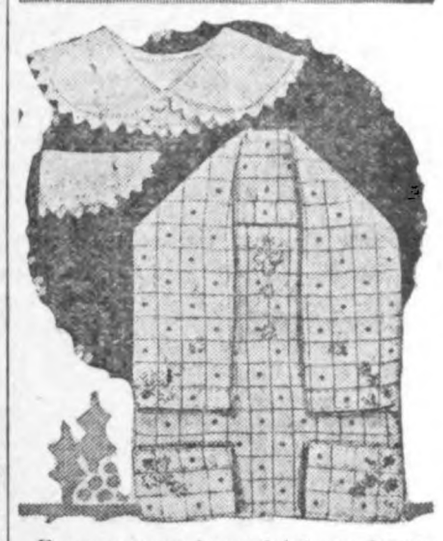


Some one you know is hoping to find a new pair of garters or a rich ribbon bag in her Christmas stocking and here are garters and bags that are guaranteed to please. One pair of the garters is made of narrow silver ribbon finished with tiny ribbon roses. Satin ribbon and narrow black lace make the other pair. Black moire ribbon with silver filigree mounting and ring handles serve for the handsome bag lined with rose colored satin. The other bag uses black and silver brocade with a tortoise shell mounting.

Things That Men Like

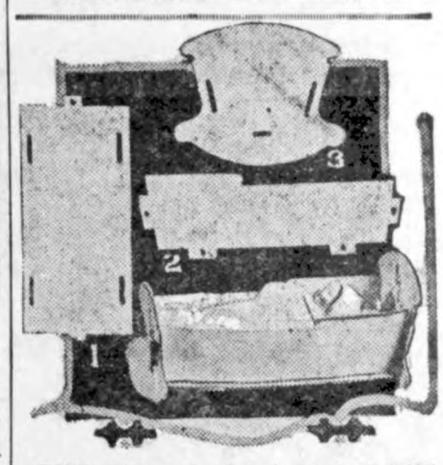
Here is a decorative bag, of printed cotton challie 25 inches long and 17 inches wide. A scalloped edge turns up over a straight edge at the bottom and each scallop has a buttonhole, fastening over a glass button. The bag is supported by a coat hanger, faced at the top and bottom with plain challie and French knots made of heavy zephyr decorate it. Hung in the closet it makes a handy receptacle for soiled collars and handkerchiefs, which are thrust in at the top and fall out at the bottom when the bag is unbuttoned. Men like such conveniences.

Pretty Neckwear Sets



Every woman loves dainty neckwear and it is twice welcome when the donor herself has made it. There are many pretty sets this year made of white or colored organdie and other sheer fabrics. A collar, vestee and cuff set is shown here of white organdie cross-barred with black. Little flowers in red, green and purple floss are embroidered on the pieces in lazy-daisy stitch. For girls Peter Pan collars and cuffs to match are made of checked tissue gingham, edged with ready-made, scalloped trimming of plaited organdie, or other edging.

Cardboard Doll Cradle



Little girls get much joy out of dolls' furniture. A Dutch cradle and the pieces that make it are shown here, in heavy cardboard. The tabs on the side pieces (Fig. 2) are perforated and slip through slots in the bottom piece (Fig. 1) and through the head and footboards (Fig. 3). Little wood pegs, thrust through the perforations, hold the pieces together. Fig. 1 is 8⅝ inches long and 4 inches wide. Fig. 2 is 9⅜ inches wide at top, 8⅝ inches at bottom, 2⅞ inches wide at head, 2⅜ inches at foot. Fig. 3 is 5⅜ inches high and 5⅞ inches wide. The rocker measures 6⅜ inches across. The cradle may be finished with painted decorations.

A Graceful Lantern

No decoration will be more effective in dressing up the house at Christmas time than lanterns and candle shades of crepe paper and tinsel. A graceful lantern is illustrated here, made on a wire frame over which the paper covering is pasted and cut-out figures are pasted to the sides. The long tassel may be of tinsel or crepe paper. Festoons of flower petals, strung on cords, finish this pretty decoration.

Rich Table Scarfs

Very handsome scarfs for the library table are made of black velvet with an applique of wide brocaded ribbon down the center. They are a little shorter than the table and have fish-tail ends with a silk tassel pendant from each point.

DRAINAGE NOTICE

Hearing On Establishment of Drainage District Number 6 petitioned for by Frank Sprague et al.

DIPHTHERIA SCOURGE IS

OVER AT SIOUX CITY, IA.

(From Des Moines Register.)

Sioux City, Ia., Oct. 29.—(Special)—It is hoped that the quarantine for diphtheria, which was placed on South Sioux City a few days ago, may be lifted next Tuesday, according to Mayor A. O. Eggenberger. The epidemic has been raging for nearly two weeks.

The mayor said today that unless new cases develop before Tuesday the ban preventing meetings, church services and school sessions will be lifted.

More than fifty homes have been quarantined for the disease with two to three new cases each day during the height of the epidemic. Work of fumigating the grade and high schools was completed Wednesday.

BELMOND'S BOY PASTOR

ASSIGNED TO CHURCH

Preached In Klemme A Number Of Times Last Fall

Harry Webb, Belmond's "boy preacher" has just been assigned as student pastor of the M. E. church at Woden, Iowa.

This is Mr. Webb's third year at Morningside College, Sioux City.

He receieved a license to preach when only 18 years of age and has quite successfully filled a number of charges during his vacations..

Mr. Webb preached at the M. E. church here several times last fall when that church was without a minister.

IRVING CAFE

We announce the opening of our Cafe in the Baack Building next week.

It is our desire to merit your patronage and friendship on the basis of service.

We will endeavor to make our new Cafe a dependable, well conducted establishment with all the advantages offered by similiar lines of business.

We Extend a Cordial Invitation to all Patrons and new ones Invited

U. S. IS RICH IN OIL SHALES

New Source of Motor Fuel Awaits Development by Chemists, Says Dr. McKee.

USE MORE THAN WE PRODUCE

Shortage of Petroleum Is Made Up by Large Importations From Mexico —Big Sources of Supply Seen in Shale.

Washington.—In the last six years the gasoline used in the United States per automobile has decreased from 600 gallons per year to approximately 400 gallons per year, owing not to a decrease of mileage per car, but to an increased efficiency of carburetors and engines. Were it not for this increased efficiency we should already have reached our limit of gasoline consumption and with it probably a price of at least 40 cents a gallon.

Since 1921 the United States has been consuming more petroleum than it produces. The excess has been largely provided by Mexico and last year showed an importation of more than 120,000,000 barrels, that is, approximately 26 per cent of the American production. Moreover, about a year ago the geological survey called attention to the fact that we should not expect to find any more large fields of petroleum in the United States—in other words, that practically all of the possibilities in the way of large petroleum fields in this country have been well protected and that now we can calculate fairly closely what the production will be in the future.

Continually Increasing.

On the other hand, the use of motor vehicles in this country is continually increasing. At present there are about 10,000,000 passenger cars, trucks and tractors in use, and it is certain that the saturation point is more than 15,000,000, and perhaps will exceed 20,000,000 machines. With this expected larger demand for gasoline on one hand, and on the other, even less petroleum available in a few years than we have at present, there arises a question as to how the motor fuel deficit is to be met. Of course, importations of oil can be made from Russia, Persia, Mesopotamia, and South America. The consumer will purchase his gasoline at from 60 to 75 cents a gallon. We must have a domestic supply of motor fuel and at a price more reasonable than 60 cents a gallon. Thirty-five or forty cents a gallon will probably be considered a fair price by the consumer.

Alcohol and benzol and the synthetic motor fuels having a mixture of these two as their base, will meet a small, but only a very small portion of the needs. The total amount of these two motor fuels available in America is but a small percentage of the 20,000,000 gallons of gasoline now used daily.

Oil Shale Resources.

In the last two years another source of motor fuel has begun to be considered seriously in America. In Europe oil shale has been used for nearly a century for the obtaining of petroleum. Indeed, the word "petroleum" was used for shale oil for a generation before Colonel Drake drilled the first oil well (Titusville, Pa., 1859). Oil shale does not contain petroleum, but by heating oil shale a petroleum distils from which a motor spirit similar to ordinary gasoline may be obtained.

The European oil shale yields 20 to 22 gallons of oil per ton of shale mined. In this country we have large deposits of shales that give double this yield of oil. The largest of these are the Green River deposits in Colorado, Utah and Wyoming, but there are also deposits in Kentucky, Indiana and Ohio, and some of equal extent in New Brunswick and Nova Scotia. Many of these will yield a barrel (42 gallons) of oil per ton of rock. It is not commonly appreciated how large these oil shale deposits are. In the Green River section alone there are known deposits yielding a barrel or more of petroleum per ton. These are sufficient to furnish more than five times the total world production since the commercial development of well petroleum 60 years ago.

Experimental Work.

In the last two years "conversations" regarding shale oil possibilities have been followed by real experimental and small plant operations, so that today we have several processes in course of trial. It is as yet a question whether we have found the best method of obtaining oil from the shale. It should be said in passing that the

"Mushrooms" Soon Hatch Blacksnakes in Jar

John Witmer of Lancaster, Pa., now knows that blacksnake eggs and mushrooms are much alike. He recently found six big "mushrooms" while walking through a field, but laughed at a friend who told him they were snake eggs.

To prove his informer was wrong, John put the eggs in a jar. Several days later three tiny blacksnakes broke out of the eggs. A few days later the other eggs hatched six-inch reptiles.

School News

Dolores Koerner— Editor
Clarence Elder— Assistant Editor

Junior Debate

Last Thursday the economics class held their first debate of the year. The question for debate was; RESOLVED: Tha wood is more beneficial to civilized nations than iron. The team for the affirmative was Clarence Elder, Dolores Koerner, and Bernice Tanner. The negatve was represented by Mariee Blank, Maybelle Johnson and Bertha Johnson. After the seen of battle had cleared away and the judge had given his decision, it was found that the negative had 46 points and the affirmative 40 points. Both sides had very good arguments but the negative seems to have "put it over" the affirmative.

Last Wednesday afternoon Rev. Bergmann was a pleasant caller at the High School and Intermediate rooms. He made plans for the memmorial service which was to be held for Anna Keeper. He and Proffessor Neese also found time to talk politics awhile and of the election to be held November 7th. Call again. The High School likes to have visitors.

Elvira Stille was pianoist for last week. She gave us some real peppy marches and the school enjoyed them immensely. Bertha Johnson is presiding at the piano this week.

Baseball practice has apparently been abandoned by the boys during this cold weather. They have stayed by the work pretty steadily but have lost interest in the sport when it is so cold.

Practice on basket ball has not been started because of the lack of a good court and proper material.

Swabbing, or taking cultures is now history in the Klemme schools. The diphtheria epidemic has subsided so much that it has become unneccessary. We will hear no more the exclamations of delight (???) when the doctors appear. We are very glad the disease has been eradicated for it has not only been a draw back on the community but on the school as well.

No school Thursday and Friday!! Teachers' Institute takes place at Britt and both grade and high school are excused these two days. A vacation, no matter how short, is always welcomed by the students.

There are still a great number of absences in the High School. Adela Schroeder, Glenn Busch, Lenora, Clara and Ralph Larson are absent on account of sickness. Faith and Richard Ax are also absent but we do not know for what reason.

Grade Room Notes

Alvin Lauden is back in school after a three weeks absence.

The Grammar Room is using a part of the history period once a week for the study of current events

The Fith Grade had a perfect attendance last week.

Edna Begmann was a welcome visitor Friday afternoon in the Intermediate room.

Elmer and Irwin Schwartz are absent on account of work.

Esther and Elmer Larson are absent this week.

The Intermediate Room have been enjoying a visit from a mouse occasionally. It creates a great deal of excitement but always disappears before it can be caught.

Primary Department

The First Grade are very sorry to lose Howard Baack from their classes. He is moving away.

Last week the Primary Room enjoyed a Halloween party, given after recess. In a contest for pinning eyes on the pumpkin, first prizes were won by Earl Kelley and Verl Keraus, and booby prizes by Elden Kessler and Mildred Lemke. After this game the shades were pulled down and jack-o-lanterns were lit. Then all participated in a lively scramble hunting or peanuts. Animal cookies were then served and all departed after having had a jolly time.

The Primary Room welcomes a new scholar, Virginia Irving, who entered the first grade this week.

MAKE YOUR OWN HOMINY
A Delicious Dish and Easily Made Right on the Farm

Hominy, one of the best dishes of corn as a table food, can be made easily and cheaply on any farm, according to the home economics extension service of Iowa State College. After it is made there are many attractive methods to serve this dish, which is not only a cheap food, but a good one.

To make hominy, first prepare a solution composed of two tablespoons of lye in a pint of cold water. After the has been dissolved add a gallon of boiling water. Place this mixture in an iron kettle and add two quarts of shelled corn. Stir in corn and bring to a boil for about 20 minutes or until the germ part of the kennel comes ou easily. Remove from the fire and wash thoroughly with cold about four times.

Work the corn over until the germ or "eyes" come out. Put the corn on in cold water and bring to a boil again, repeating this process at least three times. As the corn swells, add more cold water.

A fine scheme is to remove the "eyes" one day and allow corn to stand over night. Next day put it thru the three boilings and wash. These boilings should remove all the lye and the hominy will be ready to use.

Use only an iron kettle, as the lye is likely to damagee others. Do not handle the corn until after the lye has been boiled out or sore hands will result.

The hominy can be drained and kept for some days after preparation and can be served in many different manners.

FIRE AT THORNTON
Several Store Buildings Go Up In Smoke

Thornton, Iowa., Oct. 26—Three buildings in the center of the busibuildings in the center of the business district here were lost by fire early last Friday morning. The buildings are:

The Nels Kalstead barber shop building owned by Walter Carish.

Postoffice building owned by Mrs. Cora Alberty, postmastress.

Warehouse of the Thornton Hardware & Implement Company, building owned by J. L. James and business managed by Joe Courtney and Joe Berkshire.

The burned buildings are on the south side of the street, the hardware store being in the middle of the block and the barber shop and postoffice to the east of it.

The total loss is placed at $10,000. most of which is covered by insurance. Damage to the implement stock is placed at $6,000 and each of the three buildings was valued at $1,000. Some $500 in fixtures were lost in both the barber shop and postoffice. The fire is believed to have originated in the rear of the barber shop.

Happiness Not Al

There is in man a higher than love of happiness; he can do without happiness and instead thereof find blessedness.—Carlyle.

RENEW MARRIAGE LICENSE, IDEA OF CLEAR LAKE MAN

"Why not", suggested a muchly married Clear Lake man the other day, "make marriage licenses renewable as a hunting license is, and eliminate the worries of the divorce court?"

The man, who for obvious reasons wishes to remain unknown, had evidently thought about the subjeect thoroughly and had all details worked out. "Let the man wishing to get married take out a license for five years, say and at the end of the time if he and his wife find themselves congenial, take a second license which could not be revoked.

"That is all very well", said his campanion, who haad the earmarks of a man of the world and a confirmed cynic, "but why fuss with a marriage license. Make some of these here wimmin take out a hunting licence, and it wouldn't do no harm to make the price pretty steep either. Maybe if it cost 'em something for the priveledge of going after a man with a powder puff in one hand and determination in the other, they would leave us alone."

So that's what men talk about when women are out of hearing.—Globe-Gazeette.

Something to Think About

By F. A. WALKER

AVOID THE RUTS

IF YOU would surmount obstacles, travel the great highway which takes to sure success, and write your name in lofty places, where future generations may see, you must be careful as you go to avoid the ruts.

All about you are numerous mines and pits, seemingly waiting to engulf you, or put an air-brake upon your progress when your safe passage seems assured.

They are hidden in a thousand places, many of them within your own heart, which, if you would frequently examine with an impartial eye, you would discover to be the most threatening and dangerous of all.

A bad habit unconsciously formed through months, and possibly years of use, may finally wreck your fondest ambition upon the very threshold of success, and land you helpless on your back among the briars and brambles.

You may be passably well educated, you may have good looks, the manners of a Chesterfield, wear fine clothes and even be capable of smiling and counterfeiting the grand air of kings, but if you have become habituated to ugly moods, sudden bursts of anger in which you spout poisonous words, you will find as the passing years leave their imprint upon you, that you are in a terrible rut, down in the sticky mire, from which no one can possibly pull you except yourself.

And at this period of your life you will awaken to the sad truth that you are a little bit shaky on your feet, lack youthful imagination and courage, and, worst of all, have lost your faith, the most helpful asset a man or woman can possibly possess, in spite of the opinions of the skeptical and those thoughtless individuals who openly deride its potential power.

To travel the devious ways of life without faith, is like trying to sail a ship without a rudder, or ride an untamed bronco without a bridle.

You may smile at such danger when in company, but when you are alone you may be likely to become supremely serious, as millions of others have done before you, when they found it was too late.

There is no possibility of writing your name on the eternal skies while you remain in the ruts, which have threatened the downfall of man or woman since the sorrowful day Eve bit into the fatal apple, but if you walk in the light and accept wise counsel, nothing but death can keep you from the heights.

LOUIS AND RUTH

By Will M. Maupin

I'VE GOT a brand new daughter now,
And proud I am of her;
Although it rather seems, somehow,
As if she really were
A sign that I am growing old,
That many years have sped;
That oft the bells dead years have tolled—
The "Biggest Boy" has wed.

It seems that only yesterday
I bound his wounded toe
With yarn in the old-fashioned way—
'Twas really years ago!
It seems but just a day or two
Since off to school he ran;
But "Biggest Boy" now looms to view
As a new married man.

Gee whiz! How tempus fugits by—
I've got a daughter-in-law!
It seems so short a time since I
Was playing "Boston taw";
So brief a time since, free and glad,
I'd gaily romp and run—
And now to think that I'm the Dad
Of a big married son!

Well, I admit my shadow turns
And points the eastward way;
That memory's incense sweetly burns
To many a yesterday.
But, praise the Lord, although the gray
In my hair has a start,
I can with truth stand up and say
I'm keeping young of heart.

So, daughter, you've a welcome here
Like blooming flowers of May;
To us you'll be both near and dear
Forever and a day.
But I'll admit it seems quite queer,
When all is done and said,
That I've a brand new daughter here
'Cause "Biggest Boy" is wed.

COSTUMES FOR MOURNING; STYLES IN STREET DRESS

ANY observer who has been conversant with fashions in America for a period of years has noted a change in the attitude of women toward the wearing of mourning. It would be interesting to analyze the motives which have led so many of them away from the use of deep mourning apparel to that which is as inconspicuous as it can be made—but this change in costumes and customs reveals a progress during which women have learned to be governed by judgment rather than to be led by sentiment.

In America the matter of wearing mourning, or not, is left to the judgment of the individual, without criticism of the decision one way or the other. Usually black is worn for brief periods and American mourning apparel is distinctive and elegant. It is unobtrusive and tasteful, following the most conservative lines of mode.

French mourning appears to be more dramatic than ours, if one may judge by the costume made by Poiret, as pictured here. It is designed for a widow and reveals a straight-line dress, with full skirt. The vogue for beaded girdles is appropriated and a wide one ornamented with square beads and ending in a long bead fringe, makes a wonderful point of interest in the gown. The beads are dull black. There is a full cape and long, ample scarf of the dull silk crepe used in the dress and the scarf is trimmed with bead ornaments and fringe.

The coat dress has made a permanent place for itself apparently, returning, along with other apparel for wear on the street, with each new season to find devotees waiting to welcome it. It arrived this season made of the same materials as suits and cut on lines suggestive of coats, with those of the Russian blouse held in especially high regard. As in all street dresses, its lines are simple.

Poiret twill, tricotine, men's-wear serge, velours, gerona, marvella and other suede-like cloths share favor for street dress. Brown, in many shades, gray, taupe, castor, navy blue and black are the dominant colors. The coat-frock becomes more coatlike when it appropriates a wide fur collar and the becomingness of fur causes this to happen very often. An example appears in the handsome model illustrated here, made of gray velours. Its plain, flat belt with sash ends is a point one finds frequently repeated in suits and coat-frocks—but occasionally sash ends are omitted and a handsome metal clasp replaces them, or a silk ornament with long fringe terminates a belt of plaited silk braid.

One of the latest arrivals in street dresses is a model with a smart military cape which falls only over one shoulder, leaving the long sleeve, on the right arm, uncovered. The model has been developed in duvetine with the cape and lower portion of the skirt made of the duvetine and the bodice and sleeves of matelasse.

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

WIN, BUT ENJOY GAME

GENTLEMEN who play golf will tell you that the man who tries too hard, never does very well at it.

Incidentally, he never gets any fun out of the game.

There are many parallels between golf and life, which is doubtless the reason that so many people are devoted to it.

Golf, of course, is a game, and only a game. Yet there are many of its followers who can see only the advantage of winning, and who come in sour and ill tempered if they lose.

Others, while they try to win, get just as much fun out of it if they don't. And they never stamp on their clubs or throw them away, or swear at the caddies.

It is very important to win in anything. But it is more important to get your allowance of fun out of it as you go along.

Sitting wheezily in any rich man's club you will find old gentlemen who wanted to win more than anything else, and who did win fortunes, but lost their health and their happiness in the effort. And with all their money, you can set them down as losers.

There is good sportsmanship in all human effort. There are things the good sportsman will not do, even to win. One of them is cheating, another is becoming so absorbed in the pursuit of victory that he forgets everything else as he goes along.

John Burroughs, who probably never had more than the necessities of life in all his existence, got full measure of enjoyment that was denied to many who made a thousand times as much money. Incidentally, he was a very successful man, for he added to the sum of human knowledge.

Win if you can. Get a fortune if you can. Money means independence, and the ability to do good in the world.

But never forget that there is enjoyment as well as trouble in life, and that if you are not too intent on winning what the world calls success, you will be happier as you go along, and stand just as good a chance of making your life worth while, and the world better off because you lived in it.

ROMANCE OF WORDS

"ABRACADABRA"

TO DISCOVER the genesis of this term, formerly used in incantations and now utilized as a symbol of "gibberism," one has to go back to the Hebrew words signifying Father, Son and Holy Spirit—Ab, Ben, Rauch Acadosh. The initials of these words give "Abra," the syllables which are twice repeated in the supposedly ritualistic invocation.

The earliest known occurrence of the word is in a poem written in the Second century by Q. Serenus Sammonicus, but it was in comparatively recent times that the term gained fame on account of its supposedly mystical powers of healing, particularly when written in the triangular form:

ABRACADABRA
ABRACADABR
ABRACADAB
ABRACADA
ABRACAD
ABRACA
ABRAC
ABRA
ABR
AB
A

According to the popular superstition, the paper upon which these letters were written was to be folded so as to conceal the writing, sewed up with white thread and worn around the neck, thus protecting its wearer against fever and ague.

Mother's Cook Book

I toil at homely tasks the whole day through;
The food, the linen and the household needs,
And all the little things that mothers do,
And still am worried by unfinished deeds.

Then evening comes, the quiet, velvet eve;
I gather to my breast my baby son,
And tenderly his small moist fingers weave
A charm on all that garish day has done.

The toil, the fret, the subtle discontent,
He covers with a cobweb bright with pearls,
And weariness is perfumed by the scent
And silken clinging of his warm brown curls.

He gazes at me, dreamy, filmy-eyed,
And every homely task is glorified.

—Eleanore M. Jewett.

A FEW DESSERTS

A SIMPLE sweet for a finish to the dinner is missed if omitted. A few stuffed dates, a plate of cookies with a bit of fruit, or fresh fruit itself, is easy to prepare and usually available. For desserts which are more elaborate and take time to concoct the following will be suggestive:

Chocolate Crumb Pudding.

Take one cupful of cake and bread crumbs mixed, add one and one-half cupfuls of milk, one and one-half squares of unsweetened chocolate and three-fourths of a cupful of sugar. Cook in a double boiler until a smooth paste is formed. To three well-beaten egg yolks add one-half cupful of milk, two tablespoonfuls of butter, one-fourth teaspoonful of salt; stir and cook until it thickens. Add vanilla and put into a greased pudding dish. Bake in a moderate oven 25 minutes. When slightly cool, spread with a meringue made with the three egg whites and one-half cupful of powdered sugar; replace in the oven until the meringue is a light brown. Chill before serving.

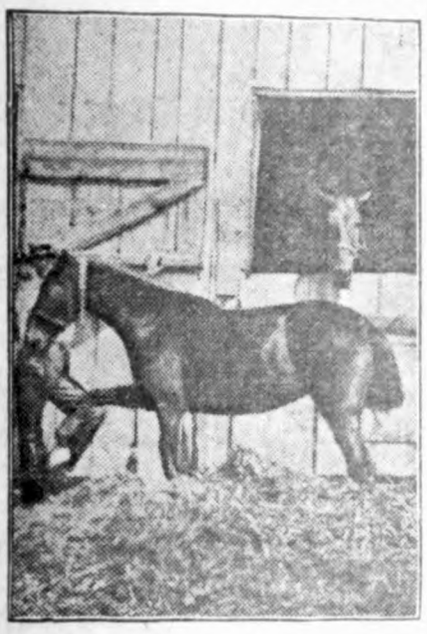
FARM STOCK

CARE FOR IDLE WORK HORSE

Roughages Furnish Large Amount of Energy and Are Cheaper Than Concentrates.

"Economical feeding," says J. G. Fuller of the animal husbandry department of the University of Wisconsin, "is the important thing in caring for the idle work horse during the winter months. Roughage such as hay, corn stover and straw, furnish a large amount of net energy. They are usually far cheaper feeds than the concentrates, and when they are of sufficiently good quality, the animals may be maintained on these feeds alone.

"Next to feeding, sufficient exercise and proper shelter are most important. The Arabs have a saying, 'Rest and fat are the greatest enemies of the horse.' The horse is par excellence the creature of motion, and in its feeding and management this fact should always be kept in mind. A mature horse should receive regular exercise, traveling not less than five or six miles per day to maintain health. Horses can be turned into the pasture until it



A Well-Ventilated Stable.

snows or the ground becomes too soft, and then into the yard so that they may have exercise. Cool, well-ventilated quarters are far preferable to warm, close stables. In all cases horses must be protected from drafts and extreme weather.

"If good quality roughages are not available in sufficient amount, a small grain ration may be added. In any event," says Mr. Fuller, "no more than one-half a work ration should be given which ordinarily ranges from 5 to 8 pounds of grain a day. At the approach of spring, the grain ration must be gradually increased in proportion for spring's work. A good ration for a 1,400-pound horse in full work is 13 to 15 pounds of oats and 15 pounds good-quality mixed hay."

FAVOR FLUSHING EWE FLOCK

Big Advantage to Have Lambs Dropped Within Comparatively Short Period in Spring.

When the ewe flock is gaining in weight rather than losing at the breeding season, they will come in heat more nearly at the same time and should breed within three or four weeks. This is a big advantage in the spring for then the lambs will all be dropped within a comparatively short period and careful attention can profitably be given the flock at that time. When ewes are in a gaining condition they drop more twins. This has been proven time after time on the western range where the lamb crop is largely determined by conditions at the breeding season.

With the beginning of cool weather, healthy ewes will have a better appetite and if feed is provided will naturally gain in weight. Ten days before the ram is to be turned into the flock the ewes should be given a little grain—about half a pound a day—or else have the run of a good pasture. Chopped pumpkins and rape make excellent stimulating feeds at this season.

GROWING SWINE ON ALFALFA

No One but a Greenhorn Would Attempt to Raise Hogs on Corn Alone—Grass Needed.

The feeding of corn to hogs is a custom so old and well established that no Midwest farmer would think of raising swine without this greatest of all cereals. While corn is the best and cheapest grain for fattening hogs, no one but a greenhorn would attempt to raise pigs on corn exclusively.

Feeding Growing Horses.

Proper feeding will accomplish much where growing horses are concerned. It is false economy to give a liberal diet to the best-looking animals only. One can never tell how the plainer ones may develop or how they may turn out if well fed.

Hogs Are Most Important.

Hogs are among the most important animals to raise on the farm for meat or for profit, and no farm is complete unless some are kept to aid in the modern method of farming.

SMOKEHOUSE IS FARM ESSENTIAL

Late War Responsible for Revival of Old Custom of Farmers Curing Meat Supply.

CONCRETE IS MOST DURABLE

Good Type for General Purposes Is Shown in Illustration—Has Been In Use Three Seasons and More Than Paid for Itself.

The old-time custom of home curing meats, revived during the war has been given added impetus in the last few years and many farmers are actively engaged in preparing their surplus supply for table and sale.

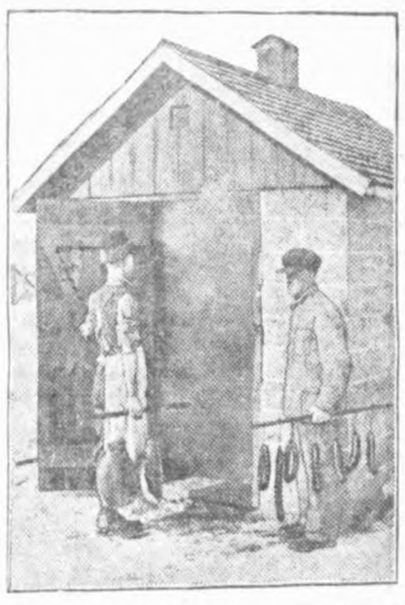
There is no reason why every farm should not have a modern smokehouse and the resulting supply of well-cured meats on hand through the winter season. Prices for old country hams make it worth any farmer's time to lay in as big a supply as possible.

Solid Concrete Is Best.

Many types of smokehouses are in use, ranging from the old type of a barrel with one head knocked out to the most modern and pretentious affairs of solid concrete with double padlocked doors. The latter type is growing steadily in popular favor because of its many natural advantages. A concrete smokehouse affords permanency, protection, better quality products and has a big economic advantage through the fact that it is fireproof and requires no upkeep expense from one season to the next.

A good type for general purposes is shown in the accompanying illustration. The smokehouse has been in operation for three seasons and has more than paid for itself already with many more years of usage ahead.

It is built of concrete blocks with a wooden peak roof. Many other farmers, however, are building the roofs of



A Concrete Block Smokehouse—Smoking Sausage and Hams.

concrete as well because of the danger of burning the wooden roofing and the effects of severe weather on the boards.

A foundation is laid by excavating to a depth of two or three feet and setting a footing, 18 inches wide and 8 or 10 inches thick. Upon this the wall rests, starting with concrete bricks laid upon a firm mixture of cement mortar. It must be remembered that only as much mortar as will be used in an hour's time should be mixed at one time as it will "set" in less than that time.

Racks and hooks are provided for hanging the meat in the upper part of the structure so that the smoke will have free circulation during the curing process.

Experts in meat smoking hold that fresh green hickory chips are the best fuel for flavor and the market value of meat thus prepared will exceed that where ordinary methods are employed.

An added feature of this smokehouse is the fact that it is absolutely safe from the depredations of mice and rats and can be locked to keep out two-legged visitors.

GIVE HARNESS PROPER CARE

Mixture of Neat's-Foot and Castor Oil Is Recommended With Application of Grease.

Neat's-foot or castor oil or a mixture of these with wool grease is good for driving harness. For heavy harness use a mixture of any or all of these with wool grease to make a paste, having about the consistency of butter. Apply the grease lightly to driving harness and liberally to work harness. Rub the oil or grease, warm to the hand, thoroughly into the leather while it is still damp from washing. After the harness has hung in a warm room overnight, remove with a clean dry cloth the excess of oil which the leather is unable to take up.

LAND FOR ORDINARY FAMILY

Alfalfa, Garden Truck, Poultry, Pigs and Pasture Will Be Found Amply Sufficient.

Three or four acres of alfalfa, with an acre devoted to garden truck and another acre to poultry, and cow pasture, with a few cows, a hundred chickens, and three or four brood sows will support the ordinary family of five, with enough left over to pay taxes.

EFFECTIVE PLAN TO BETTER LIVE STOCK

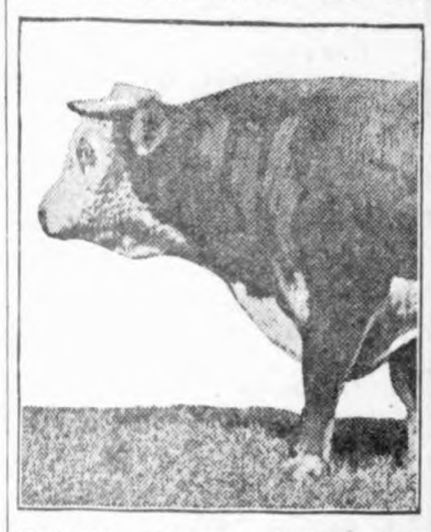
Tried Out With Much Success in Many Tennessee Counties.

More Profitable Results Obtained From Community Sales Than Those Covering Larger Sections —Big Aid to Better Sires.

(Prepared by the United States Department of Agriculture.)

A method that should be found effective in improving live stock in all parts of the country has been tried out with much success recently in Tennessee, says a report to the United States Department of Agriculture. It consists of a series of county sales of purebred sires of all kinds.

The sales have consisted largely of beef bulls, dairy bulls and boars, although a few rams also have been included. The sales are advertised intensively in the counties in which they are held. Small advertisements and posters are used, and for some time



Registered Hereford Bull Used to Build Up Herd.

before the sale the local papers run articles on the value of purebred sires.

In that state it has been found that better results are obtained from the county sale than from sales covering a larger section or from state sales. Farmers are more apt to attend these sales where they can haul the purchases home or ship only a short distance. At a number of these sales the number of sires sold has varied from 20 to 60. One of the big advantages is that good blood produced in the county remains there and improves the general run of live stock instead of being scattered far and wide.

The department looks upon this plan as an important aid in the Better Sires —Better Stock movement.

PROPER CARE OF MACHINERY

Various Implements Should Be Kept in Repair and Breakage Reduced to Minimum.

Nowadays when a machine breaks it is not only the cost of replacement to be considered, but the machine may be out of service for several days or weeks because the dealer's stock of parts is low and completely out on some items.

And it isn't the dealer's fault, either, in most cases. He has orders in for short stock parts, but ordering is one thing and getting orders filled is something else, as all machinery dealers and their customers know to their sorrow.

All farm machinery should be kept painted. Reduce breakage to the minimum. Parts will break often enough when machines are handled with the utmost care, but just now, when replacements are so expensive and so difficult to get promptly regardless of price, the least the farmer can do is to guard against this unnecessary weakening of essential equipment, by allowing rust to set in on it.

PASTURES OF TILLABLE LAND

Erroneous Impression That Rough, Thin Soil Is Good for Grass to Feed Animals.

More pasture and better pasture is the paramount need on many farms where there are animals. There has been an erroneous impression that farmers must have rough, very thin or otherwise cheap land for pasture. The facts are some of the most expensive and most fertile land on some farms would pay better in pasture than in the ordinary field crops now being grown on it, simply because producing feed and harvesting and feeding is too expensive. Why not let the animals do their own harvesting and feed themselves, using crops that need no cultivation? It will pay on some farms.

CLUB MEMBERS AS FARMERS

Eight Boys in Minnesota County Become Successful—Producing Live Stock and Crops.

That many farm boys who enroll as club members in the production of live stock and crops become successful farmers is demonstrated in the case of eight young men living in Itaska county, Minnesota, who carried on club demonstrations from three to four years. According to a report to the United States Department of Agriculture four of them are now engaged in general farming, three of whom are growing certified potato seed, one is a dairy farmer, two are students at Minnesota College of Agriculture, and one is studying for the ministry.

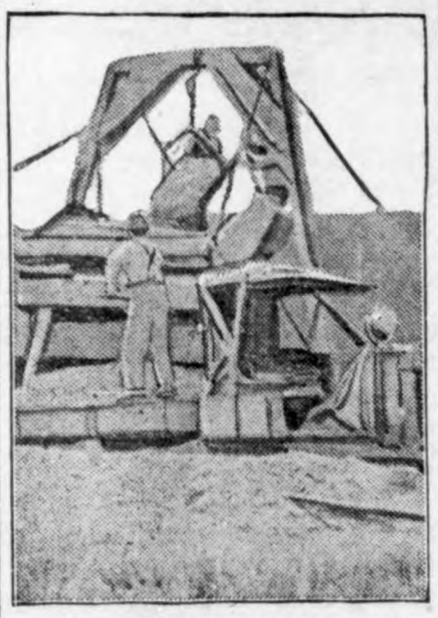
IMPROVED ROADS

LOW RATE ON ROAD MATERIAL

Shipment of Surplus War Articles Permitted by Ruling as "Contractor's Equipment."

In the shipment of surplus war materials transferred to them by the bureau of public roads, United States Department of Agriculture, state highway departments will be saved a great deal of expense as a result of a ruling of the Interstate Commerce commission permitting the shipment of this material as "contractor's equipment," thereby giving it the advantage of a low rate.

The railroads previously required the states to pay less-than-carload rates on the various items included in such shipments, even when together they made up a carload. The contention of the bureau is that since the bulk of this material has been used and none of it is new, and since it is all intended for use in road construction, it should be given the advantage of the low rate allowed to contractor's



Unloading Road-Building Material by Use of Lavor-Saving Device.

equipment. This contention, which was opposed by the railroads, was upheld by the Interstate Commerce commission.

The low rate is now applicable to some 1,200 carloads to be shipped from Camp Grant, Ill., and large quantities from other points. On a carload shipment from Schenectady, N. Y., to Boise, Ida., $720 recently was saved, and $500 on another from San Antonio, Tex., to Salem, Ore.

DISCUSS BUILDING PROBLEMS

Standardization of Specifications and Tests for Road Materials Are Being Made.

(Prepared by the United States Department of Agriculture.)

The committee on tests of the American Society of State Highway Officials met with the officials of the bureau of public roads of the United States Department of Agriculture, in Washington, to consider standardization of specifications and tests for road materials. The purpose of this meeting of representatives from all sections of the country was not so much to lay down rigid rules as to harmonize the general practice. Standardization taking into account local conditions is being brought about by a series of meetings between officials from groups of states and engineers of the bureau.

The present activity of highway officials along this line is most encouraging for road building. A few years ago the general tendency was toward individuality in each state, without much opportunity for exchange of ideas and knowledge. Today the tendency is in the other direction, and a better solution should be reached when the problems are discussed at meetings of the best highway engineering talent of the country.

ROAD SAFETY LAWS FAVORED

Highway Accidents Could Be Greatly Decreased by Requiring Mirror on Trucks.

Accidents on the highways, according to M. V. Eldridge, road director of the American Automobile association, could be greatly decreased by the passage of uniform state laws requiring every truck to carry a mirror giving a view of the road to the rear and by requiring every horse-drawn vehicle to display some sort of light when using the roads at night.

Mr. Eldridge states that 12 states and the District of Columbia have laws requiring the mirror on trucks, but that few have any regulation for horse-drawn vehicles. The states requiring mirrors are Vermont, Washington, California, Connecticut, New York, Indiana, Kentucky, Maryland, Massachusetts, Michigan, Missouri and New Jersey.

Hogs Are Overlooked.

Hogs might be kept profitably upon thousands of farms where they are not found today. As a general proposition it is safer for the average farmer to handle a small number of hogs in connection with his other farm business.

Cost of Footpath.

How much more would it cost to build a cement footpath alongside of the cement country highways—and thus keep pedestrians out of the roadway?

DAIRY

KEEP DAIRY UTENSILS CLEAN

Bacteria Increase in Astounding Numbers When Conditions Are Right—Must Be Kept Dry.

(Prepared by the United States Department of Agriculture.)

Because bacteria increase in numbers at such an astounding rate when conditions are favorable, it is necessary not only to kill as many of them as possible in order to keep dairy utensils clean and insure a good product; but utensils must be kept dry, so that the few organisms that are left after sterilization will not multiply greatly. In addition to the proper temperature

All Dairy Utensils Should Be Thoroughly Sterilized Before Use.

it is necessary that moisture be present for these germs to grow, but only a very thin film of water is needed.

It is particularly important that milk cans be thoroughly dried and kept dry until used again, says the United States Department of Agriculture. In addition, they must be protected from contamination with dust, other dirt and flies. Experiments carried on by the department show that in milk cans which were covered before being dried the number of bacteria increased 700 times in 24 hours. An average of seven tests showed that the count increased from 1,111,514 to 775,751,429. Milk put into cans in which the bacteria have been permitted to multiply to such an extent will cans that were dried before being covered.

To secure rapid drying the cans must be sterilized with steam or boiling water. If a sterilizer is used the cans may be left in it until time for them to be used again, but there must be some means of ventilation to carry off the moisture. Cans may be set on a rack to dry, but they should be protected from flies and dust, preferably in a well-screened milk house.

Producing Clean Milk

Factors to be observed in producing good clean milk:

Clean, healthy cows in clean, well lighted and well ventilated quarters.

Plenty of pure water for the herd and milkhouse.

Clean utensils, thoroughly washed, steamed and sunned.

Small-top milking pails. Milk with dry hands.

Remove milk from stable as soon as drawn from each cow.

Have a separate milkhouse for handling milk and dairy utensils.

Cool milk to 50 degrees F. or lower as soon as drawn.

Keep milk at a low temperature until delivered and deliver regularly.—G. E. Morton, Colorado Dairy Commissioner.

EXCELLENT CALF PEN HINTS

Should Be Located on South Side of Barn and Arranged So that Sunlight Enters Freely.

Calf pens are preferably located near the south side of the barn and so arranged that sunlight enters them. Exercising yards to the south of the barn connecting with the pens are desirable in order that calves may be turned out for exercise even on cold days and be protected from the north winds. Cement floors are satisfactory from the standpoint of durability and cleanliness, but are cold in winter unless covered by an abundance of dry bedding.

Beware of Moldy Silage.

In opening the silage it is necessary that all moldy silage be removed or silage poisoning may result and sometimes it may cause death of live stock.

Silage Not Balanced Feed.

Silage is not a balanced ration. It should always be supplemented by other feeds.

Poor Feeding Practices.

Unwise feeding practices will produce bad results in feeding silage or molasses. A systematic study indicates that the losses have been due to the manner in which silage is fed or to an excess of dirt.

A Silage Pointer.

The dairyman will have a hard time to get along without a silo and a clover or alfalfa field. What he lacks in feed from these will have to be made up for by smaller production or more grain feed.

THE DOCTOR OF OSTEOPATHY

IS A physician and surgeon of the Osteopathic systm of practice? He is a real doctor in every sense of the term. His scientific education is as broad as the "regular" medical school and better than any other school.

The course in osteopathic colleges is four years of nine months each with an additional two years for the course in major surgery every student is required to give a certain number of treatments, all of them have hospital training and do minor surgery and many complete the six year course and do major surgery. They are taught to care for all kinds of injuries (dislocations, fractures, burns, wounds, etc.), attend confinement cases,, use antedotes for poisons and anaesthetics and antiseptics; treat nose and throat diseases; take care of all infections and contagious diseases (including colds, influenza, bronchitis, pneumonia, diphtheria, pleurisy, infantile paralysis, cerebro-spinal meningitis, appendicits, typhoid fever, rheumatic fever, small pox, etc.); the osteopath orders diet and regulates hygiene and uses all precaution to prevent diseases and the spreading of disease.

The Osteopath is not alone a diagnostician but preeminently a healer. He is the only physician today that actually possesses a science of general therapy, applicable to the treatment of all diseases, and his therapy is in harmony with nature and the natural healing processes which are constantly going on within the body.

The last statement is supported by the fact that Osteopaths, throughout the country, lost but one percent of their influenza and pneumonia cases during the great epidemic.

Bureau of Osteopathic Education

Write for "Facts About Osteopathy," a beautiful and interesting booklet of 48 pages. It will be sent out at once without charge. Address 1103 F. and M. Bank Bldg., Fort Worth, Texas.

News of Klemme and Vicinity

Mrs. Lew Lewis has been on the sick list the past week.

Mrs. Hake was a Belmond visitor last Thursday, returning Friday.

Allie White started to shred corn yesterday.

M. O. Barr and wife were Sunday visitors at Clear Lake.

A great many ducks have been shot here this week.

R. W. Elder made a business trip to Clear Lake last Friday.

The Klemme teachers are attending the Institute at Britt which is being held today and Friday.

Fred Ortmeye, of Garner, was in Klemme Tuesday. visiting relatvies and friends.

Mr. and Mrs. Ed Hughes of Goodell, were business callers in Klemme, Monday.

Mrs. Frank Carpenter returned Monday rom Mason City where she had been visiting.

Mrs. Gilbert Schafer came down from Garner for an over Sunday visit at the Ben Swalve home.

Mr. Wm. Voiles, of Belmond, was a business caller in Klemme last Friday.

Mary Becker was visiting at Garner between trains last Thursday morning.

A. D. Gimer and R. W. Elder attended the Butter-Makers Convention at Mason City last week.

Mrs. Geo. Vance, of Goodell, was shopping in Klemme last week on Wednesday.

Mrs. Anna Anderson, of Garner, was visiting Klemme friends a few days this week.

Miss Mable Olson, of Garner, was a Klemme visitor yesterday afternoon.

Henry Church drove over from Garner Tuesday to look after some work about his fam near Klemme.

Mr. Herman Miller went to Iowa Falls last Friday evening and spent the night visiting M. O. Hocum.

Sheriff E. P. Hanson, of Garner, was in town on business this morning.

Mrs. Herman Stille returned from Colorado, Saturday, where she had been called by the illness of a relative a few weeks ago.

A new barn has been built on the Whitesell place north of Klemme 4 miles to repace the one that burned down a few months ago.

A missionary, Rev. Corwin Tayler, of Korea, spoke at the M. E. Church Tuesday evening to a large audience.

Paul Granges new house is nearing completion. He will soon be able to move into it.

Mrs. E. A. Fuller, and laughter, Mavis, of Clear Lake, were visiting Klemme relatives and friends this week.

Mrs. Anthony Ahrenkeil and little son, of Goodell. visited at the Tom Blank home last Friday between trains.

O. B. Anderson, of Forest City was in Klemme on business Tuesday afternoon. He was formerly owner of the Ford Garage here about a year ago.

The R. B. Irving family moved to Klemme from Floyd. Iowa, last week and live up stairs in the new Baack building. We welcome them back to Klemme.

If your Phonograph is sick or out of order bring it to our Tinker Shop. We have main springs and parts on hand to repair all makes of phonographs. Wellemeyer's. adv

Laundry basket leaves every Wednesday morning and returns Friday night. Wellemeyer's. adv

Frank Gruetzmacher drove over to Algona last Thursday to attend a harness makers' convention. He was elected president of the association for the northwest Iowa district.

Wellemeyer's cleaning department does nice work on Ladies' furs and muffs. adv

Let us repair your leather vest, and put on a new knit neck and new knit wristlets. Wellemeyer's. adv

Mrs. Philip Bock returned today from California, Penn., where she had been for about a month visiting with her parents and other relatives and friends.

Mrs. Mary Fuller returned last Thursday evening from Buffalo Center, Iowa, where she had been visiting at the Walter Yahnke home.

NOTICE: I have spent a lot of money buying Antitoxine and other drugs. I must collect in order to meet my obligations. Pay at once. Geo. Zinn, M. D. adv

Radio Bugs in Klemme were the first to begin receiving returns on Tuesday's election. They began to get reports from eastern states at five p. m.

Mr. and Mrs. August Baack. and son Howard, will leave in their car tomorrow to begin a trip to California. They will make up an auto party with the Chas. Steihl party and the two parties will travel together on the trip.

Last week we ran a notice in the paper that a gold watch had been found. It proved to belong to Ed. Jacobs. He is a watch ahead and we are 50c ahead for the adv. It pays to advertise alright.

Art Wellemeyer and son Andrew, moved Fred Bernhard and family to Mason City the latter part of last week. Mr. Bernhard and family had been tending beats for Leonard Sampson.

Get your new suit cleaned and pressed before Thanksgiving. Maybe your overcoat needs it too, we do this work here in Klemme. Patronize your home town whenever you can. Wellemeyer's. adv

Mr. and Mrs. R. A. Jorgenson and son, "Buster," went to Iowa Falls last Thursday evening and spent the night with the M. O. Hocum family. Mrs. Jorgenson and Buster went on to Lincoln, Nebraska, from there the next morning for a week's visit with her parents and relatives. They will return to Klemme Sunday.

Dr. W. F. Missman is going to make a trip to Iowa City the latter part of this week to look up and find out the correct method of giving the Schick Test, and incidently "Doc" will take in the Iowa-Minnesota foot ball game. Now the doctor perhaps mixed this a little in teling it to our reporter. He probably is going to Iowa City to take in the foot ball game, and—incidently look up the Schick Test—if he has time.

STILLE'S IMPLEMENT NEW

VOLUME 1. Thursday, November 9, 1922 N

We have a surprise for you this week, something you maybe aint expecting. We got some "Twins", yes real live twins; good looking, dandies. Some people say they wouldn't be without them and others say that there's nothing like them; but wait a moment, maybe we'd better explain more fully. What we mean is what they call the "Twin" Dry Cell Battery. The reason they call them the "Twin" I guess is because they last about twice as long as any other battery. They are made in single cells or in hot-shot style, but the inside construction is on the same plan as a storage battery. The zinc is placed in the battery like plates, instead of making a container out of it, and consequently it uses thhe zinc from both sides and doubles the life of the battery. It uses all of the active material. It is waterproof, you can set them in a pail of water in a rainstorm and have good results. Come in and try a set.

Some flappers remind us of those store keepers who put all their stock in the window.

Made to Deliver

The International Kerosene Engine was made to deliver an abundance of power cheaply, dependably and continously. The reason it does these things has been told in these columns before. There's another reason why the International Kerosene

Engine is one of the best hired men you could have, and that's because there is always some one near to take care of any repairs it may need. When parts become worn, it's a matter of only a day to get the new repairs, replace them and be ready to go again. This service is part of the engine itself and something you can expect to get when you buy an International from us.

A good worker is the first characteristic of a good citizen.

Now you'll need hog waterers with lamp in and tank heater. We have both, and believe as good each as you can find any will pay you to look them fore you buy others, but you bigger if you buy one

If your car misses this starts hard—or I should start—why just come in tell you in a few words it easy.

Lightning never strikes the same place—it isnt ne

COST OF EDUCATION COMPARED WITH COST OF LUXURIES

THE COST OF LUXURIES vs. THE COST OF EDUCATION IN THE U. S.

(By Prof. L. Neese)

In 1921 the United States blew away in smoke of cigars and cigaretts $300,000.000 more than the total cost of education in 1919, according to P. B. Claxton, U. S. Commissioner of Education.

The total cost of tobacco in all its forms, in 1929, was five times the total of teachers' salaries in 1919, and almost exactly the same as the total cost for elementary and high school education for the three years, 1916. 1917, and 1918. If these people who use tobacco had smoked two cigaretts instead of three, two cigars instead of three, taken two "chaws" of "terbacker" instead of three, and two dips of snuff instaed of three, and had paid to the support of the schools of the United States the money thus saved for the year, the salaries of the teachers in the schools of the grades, public and private, could have been increased more than 120%.

According to government returns from 1920, the people spent twenty-two times as much for luxuries that year as they spent for education, or approximately 30 per cent more than we have spent for public education in all our history.

The amount paid for face powder, cosmetics and perfumes is only $12,000,000 less than the total amount expended for public elementary and high school education in 1918, and within $50,000,000 of twice the total amount paid teachers in public grades and high schools.

In food luxuries, we ate up in a single year more than the salaries of all school teachers for the first 18 years of this century. We are prone to think of the high school tax levied to support public education in the U. S. but never taking time to rehearse the enormous sum of dollars that we spend for foolish luxuries that is not necessary to support life; but pass the matter by as a joke because we spent the sum as a voluntary act.

Something To Think About

Out of every hundred pupils who enter the public schools only fifteen get through high school and fewer than three out of a hundred ever finish college.

More than five million persons, three million of whom are native born, over ten years of age can neith er read nor write the simplest words.

Illiteracy is costing the United States $825,000,000 annually thru accidents and inefficiency.

There are more than thirteen million foreigners born in the U. S. today, five million of whom can not read or write the English language and two million of whom are illiterate.

At least 40 per cent of our grade school classes are so large that the individual child can not be given necessary care and personal instruction.

The average child enrolled in the public schools attend 120 days during the school year, or about three fourths of the time. Absence from school costs the U. S. $195,000,000 annually.

About 125,000 teachers out of a total of 650,000 leave the proession annually and their places must be filled by inexperienced young teachers, some of whom are very deficient in child psychology. The percentage of men teachers in the U. S. has fallen from 43 per cent in 1880 to 20 per cent in 1919.

The public schools costs the U. S about $760,000,000 a year.

Ed. Jacobs has made some fine improvements in his hardware store the past week. He has an office compartment built in the rear part of the store on a raised platform, and enclosed with about a four foot wall. He has also built a new rack for shovels. forks, etc., which also partly shuts off a little room on the back where he can unpack goods. Our verdict is that the improvement is O. K.

THE ONLY COMPLETELY REPUBLICAN STATE

Iowa has the distinction since the recent election of being the only state in the whole United States which has returned a full senatorial and congressional republican delegation to the national congress. There are many states whose representative in Congress is overwhelmingly republican but Iowa alone has no other party represented in its delegation.A number of southern states have solid democratic delegations. Well, that is some distinction. Lots of democrats in Iowa for one reason and some republicans for another reason do not see any reason for pride in that distinction. In fact some republicans will strenously deny that with Brookhart elected the delegation is not all republican. Whatever the views of others as to this distinction the Herald-Press will go on record as well satisfied with the fact as it is.—Belmond. H. Press

GOODELL NEWS ITEMS

Martin Kearney and daughter, Margaret, attended the funeral of the latter's aunt at Boone last Tuesday.

Mr. and Mrs. Tony Bollar have moved to Garwin, Iowa.

The teachers all attended the institute at Britt Thursday and Friday.

Earl Clark and family moved to Garner last week.

A few from here attended the celebration in Garner Saturday.

Clifford Chase and Fernon Griggs are assisting Leon Sherwood in picking corn this week.

Jay Griggs was a Garner caller Friday.

"Speck" Houghton returned to Goodell, after spending several week working with the road gang near Garwin.

High School Notes

Thomas Quigley was absent from school last Tuesday and Wednesday.

The pupils all enjoyed two days of vacation this week, due to the teachers Institute at Britt.

Basket ball practice is in full swing now, having rented the hall it enables the girls to practice from 3:30 to 4:30 on Monday and Wednesday; and the boys from 7 to 8 on the same days. A new basket ball was purchased.

The high school was sorry to lose Pearl Engeseth, a freshman, who moved to Blue Earth, Minnesota last week.

The Physic Clas performed a very interesting experiment on the movement of tones, last Tuesday. They now have laboratory work on Tuesday and Thursday, and text book work on Monday, Wednesday and Friday.

Some very good, and interesting themes were written this week by the American Literature Class. The subject matter being taken from the Literary Digest.

Margaret Kearney was absent from school Tuesday and Wednesday.

Lucille Miller was absent from school Monday.

The Seniors received their class rings, which are blue and gold and

The High School received their pictures, which were taken a few weeks ago and which prove to be satisfactory.

FIRES IN U. S. EVERY MINUTE

Due to Carelessness of Men Who Heed Neither Warnings Nor Experience

FIRE BELL CLANGS CONSTANTLY

Each Clang Announces That a Useless Waste Is Being Added to Burdens of Community—Fire Prevention Campaigns.

Chicago.—More than two and one-half centuries have passed since the great London fire. This fire was considered to have been an "act of God," and lawyers have since drawn contracts to relieve contracting parties of any obligation that could not be fulfilled because of an "act of God."

No longer, however, do we charge the Diety with causing conflagration. Humanity has progressed far enough away from superstition to place the blame where it belongs; that is, on the carelessness, thoughtlessness or "penny-wise-pound foolish" policy of men who heed neither warnings nor experience. But humanity has not progressed far enough to prevent recurrence of disastrous and death dealing fires.

In spite of national, state and local fire prevention campaigns and more or less pointed legislation, fires rage in the United States at the rate of one every minute of every hour of every day. The clang of the fire bell never ceases, and each clang announces that a useless waste is being added to the burdens of the community.

Losses Increase Yearly.

Of course, a reason can readily be found for the never ending increase in yearly fire losses. Each year more buildings are constructed, contents increase, there are more people, and both buildings and contents are worth more in dollars and cents. But people are no more careful.

The National Fire Protection association devotes 365 days out of the year to fire prevention. Chambers of Commerce, Women's clubs and other civic organizations give a portion of their time to educating the public to form those simple habits which in the aggregate would greatly reduce the innumerable number of small fires. While all of this work is important and valuable, experience has demonstrated beyond a shadow of a doubt that these fires will continue and that at any time one of them may develop into a conflagration unless the one great safety consideration becomes general; namely, the construction of buildings that won't burn.

The pessimistic say "there is no such thing as a fireproof building" and cite as proof some fireproof building that has suffered fire damage. What might have happened had the building not been fireproof, or if neighboring buildings likewise had not been fireproof, is left unanswered.

It can no more be expected that a perfectly healthy tree will remain healthy in an orchard of diseased trees than that a fireproof building will pass through heavy fires in its combustible neighbors without damage. The fire hazard of a fireproof building is found almost entirely in combustible buildings adjoining it.

Stops Spread of Fire.

This fact was driven home in a startling manner in the fire which destroyed an entire block near the site of the new Union station in Chicago last spring. The Burlington office building was a fireproof building, but the six-story building across the street was not. When the walls of the Austin building, opposite the Burlington building, fell into a roaring inferno, the entire eastern side of the Burlington building above the ninth floor was smothered in a wave of gases of blast furnace temperatures which melted wire glass and instantly ignited every bit of combustible material in the top six stories of the building.

Building ordinances in cities throughout the country are being revised, and an opportunity is thus afforded to prevent the construction of anything but fireproof buildings within the main business district of our cities and towns. Those who have heeded the warnings of fire prevention experts, and who have sufficient regard for protection of their own investment and that of their neighbors to build fireproof structures for themselves have a right to the protection of laws prohibiting the construction of fire traps next to their fireproof buildings.

BASKET SOCIAL

There will be a Basket Social at Liberty No. 8 School, Nov. 29. Ladies please bring baskets.

CELIA BROUWER Teacher.

(N16-23c.)

LINCOLN'S FIRST CLASH WITH DAVIS

Interesting Historic Incidents Recalled by Rock Island's Seventieth Anniversary.

FIGHT OVER RAILROAD BRIDGE

Davis, as Secretary of War, Opposed Building of First Bridge Over Mississippi—Lincoln Was Attorney for Railroad.

Chicago.—When the Rock Island railroad celebrates, early in October, the seventieth anniversary of the operation of its first passenger train one of the features having unusual historic interest will be the placing of a memorial tablet on the only remaining pier of the first railroad bridge to span the Mississippi river.

Abraham Lincoln and Jefferson Davis figured importantly in this early project, Lincoln as counsel for the railroad and Davis as secretary of war.

The bridge was bitterly opposed by the river interests, who condemned it as a menace to navigation, and went so far as to attempt to burn it by setting fire to an ancient packet and permitting it to float downstream and lodge against one of the piers.

Construction of this vital link, definitely hooking up the Atlantic seaboard with the great West to which the tide of emigration that was to open a new empire was already flowing, was practically completed when Jefferson Davis, then secretary of war, instructed the United States district attorney for the northern district of Illinois to obtain an injunction forbidding its use for the passage of trains. This action was defeated by the railroad, and then came the incident of the packet, one span of the structure being destroyed.

Lincoln's Prophetic Words.

Owners of the packet sued the bridge company, the railroad and several officers and stockholders as individuals, alleging that the bridge had so altered the river currents as to cause the packet to drift back down the stream. Lincoln defended the suit in the United States Circuit court, and the jury disagreed and was discharged. In his argument to the jury the then country lawyer made the prophetic statement that "more traffic would cross the river on this bridge than would ever pass beneath it," a pronouncement that was regarded as more visionary than sound.

Then "Long John" Wentworth, Chicago's famous mayor and congressman, pushed a resolution through congress directing the committee on commerce, the predecessor of the interstate commerce commission, to investigate and report "whether this structure constituted a serious obstruction to the navigation of the river." The committee reported that it did, but recommended that the controversy be left to the courts for decision.

Then James Ward, a St. Louis steamboat owner, filed a bill in the United States District court, Southern division of Iowa, in 1858, praying that "the bridge be declared a nuisance and ordered removed." Judge John M. Love rendered a decision declaring the bridge "a common and public nuisance," and ordered the railroad to "remove the three piers and their superstructure which lay within the state of Iowa.

The case was appealed to the Supreme court of the United States. Before it reached there Lincoln was removed from the case by his election to the Presidency, but the argument was prepared along the lines he had laid down in the lower courts, and in December, 1862, the Supreme court reversed the District court and forever settled the controversy, saying, in the words of Associate Justice Catron:

"According to this assumption, no lawful bridge could be built across the Mississippi anywhere. Nor could harbors or rivers be improved; nor could the great facilities to commerce, accomplished by the invention of railroads, be made available where great rivers had to be crossed."

Abandoned Years Ago.

The bridge was abandoned and disintegrated years ago, and all traces of it were thought to have been lost, until Charles Davis, who drove the first engine taken into the state of Iowa, and the first pensioner of the Rock Island lines, was rambling over the arsenal grounds at Rock Island, Ill., one day after his retirement. He came upon the old stone pier, crumbling away and overgrown with vines and underbrush. He recognized the locality at once, and communicated his find to railroad authorities, with the result that the pier was restored by the government arsenal officers, and is now in condition to stand as a permanent memorial to the first crossing of the Mississippi by a railroad.

While the observance of the railroad's anniversary will be general on the system, special exercises will be held at several points on the railroad

One of these will take place at Joliet, the first terminus of the road to which regular passenger service from Chicago was established. The first passenger train reached Joliet on the morning of October 10, 1852. This run will be duplicated on October 10 by a special train carrying railroad officials and invited guests to Joliet where a monument will be unveiled to Samuel B. Reed, the engineer who built the line in Illinois.

DROPS DEAD WHILE AT INITIATION RITES

Wife of Postmaster at Britt Succumbs Suddenly; Two Children Are Left Motherless

BRITT, Nov. 15.—Mrs. C. F. Wigton, wife of the postmaster here, dropped dead from heart disease Monday evening at 9 oclock as she was taking part in the initiation services at the Memorial building where the Women's Auxiliary was in session. Mrs. Wigton was a charter member of the Women's auxiliary and her death comes as the first within the ranks of the local organization.

Mrs. Wigton was a woman of noble character, well liked by all. She leaves her husband and two small children, a girl and a boy.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship 10:00 A. M.
Sunday School 11:00 A. M.
Evening Worship 7:30 P. M.
Service for fellowship and prayer 7:45 Thursday evenings.

The Methodist people of Klemme are anticipating the visit of Rev. M. L. Metcalf, Centenary Evangelist, who will, with his singer Professor Peterson, hold two weeks of special service commencing Sunday, November 26th. The Methodist churches will co-operate in bringing a blessing to this town and community. Your sympathy and help is invited irrespective of creed or church. Pray for the success of the meetings, that precious souls may be saved. come yourself and get a blessing, and be a blessing to others.

—Arthur B. Gedye.

The Klemme Co-Op. Grain Company reports a heavy movement of coal for the month of October, despite the mild weather. During the month they delivered 286 tons and 1070 pounds. This is the most coal the company has sold in any one month since they have been in business.

This section of the U. S. has had a lot of rain since the last issue of the Times. The weather again became clear Tuesday and is somewhat better. The nights have been quite cold and there is ice on the water and freezing every day. (This item is for the benefit of our subscribers in warmer climates.)

Mrs. L. R. Parsons, and daughter Doris, and Miss Gertrude Ely, of Belmond, came last Friday and remained until Sunday visiting with Mrs. W. F. Missman. Miss Ely is a sister of Mrs. Missman. Sunday afternoon Dr. Parsons drove over from Belmond and they all returned with him.

The practice of ringing or sounding sick and wounded soldiers is said to have been started in England by Oliver Cromwell

ABOUT WAR SAVINGS STAMPS

John Will Swap You Some Treasury Savings Certificates For 'Em

Although 1918 War Savings Stamps do not mature until January 1st, 1923, Postmaster John Waterman announces that he will accept them on and after November 15th in exchange for the new 4% Treasury Savings Certificates.

Every 1918 Stamp presented now will be accepted at its maturity value of five dollars if used as part payment for one or more new Certificates, dated January 1, 1923.

This opportunity should appeal to everyone who holds War Savings Stamps bought in 1918—whether he holds one Stamp or two hundred.

Postmaster Waterman is anxious to handle the bulk of these exchanges before the usual Christmas rush begins at the postoffice. All owners of 1918 War Savings Stamps should take notice and govern themselves accordingly.

PETIT JURORS FOR DECEMBER TERM OF COURT

Geo. Ahrenkeil, Goodell.
Sam Harvey, Klemme.

World Weather Station Urged

Internationally Owned and Operated Wireless Bureau at Baffin Bay Is Planned.

U. S. OFFICIALS ENTHUSIASTIC

Would Help Observers Who Are Often Handicapped by Unforeseen Weather Changes, Originating in Northern Canada.

Washington. — An internationally owned and operated wireless weather observation station on the shores of Baffin bay, to supply data for the world's weather services, has been proposed, and steps are being taken to insure its installation.

Baffin bay is pretty far north, as a glance at a map of the top of our continent will show. Cold winds blow cheerlessly much of the time, ice and snow hold sway over the land and sea for a good portion of the year, and the life of those stationed there, cut off from the world except by radio, would not be of the easiest, but the values of their services to the world would be inestimable, it is said.

U. S. Officials Enthusiastic.

Officials of the United States weather bureau are enthusiastic over the proposal and will urge the participation of the government in the co-operative scheme. They point out the valuable work of the international weather observation station on the lonely little island of Jan Mayen, off the southeast coast of Greenland, where reports are sent to all the European government meteorological services, as well as to the Canadian and United States weather bureaus. V. Bjerkus Ekerold, a Norwegian scientist and meteorologist, through whose efforts the Jan Mayen station was erected, has been in the United States and Canada for some time in the interest of the proposed Baffin bay station.

The great value to this country of such a station is shown by observers in the fact that they are often handicapped by the sudden arrival of unforeseen weather changes, originating in northern Canada, where there are few stations. Thousands of miles of the continent, up to the Arctic seas, hold no observation posts, nor means of messaging observations if any were made. The northernmost weather station in Canada is almost 40 degrees from the northern edge of the continent, which puts it far south, close to the international boundary line. Consequently, officials say, much weather which originates in that vast stretch of land is unobserved until it is right down upon us. For this reason, it was added, cold waves often bear down from the north in winter, and our weather bureau can give only scant warning.

A recent example of this sudden and unforeseen change occurred in a series of showers that ended the long country-wide drought that gripped the country during August, September and early October. Continued dryness was predicted for some days because conditions were sluggish and no changes were observed within the scope of the reporting stations. Between two days, however, sudden showers swept down from the uncharted regions, freshened up the entire Atlantic seaboard and the Southern states, quenched destructive forest fires in Canada and brought an end to the drought.

If there were more stations farther north, it was said, the change could have been foreseen far ahead of its actual arrival, instead of in about two days or less, and farmers and others to whom weather conditions are important could have had longer warning to prepare.

It must be explained that through general interchanges the weather observations of nations are made available to all other countries having weather services, and to whom the data are important. Canadian stations therefore make observations which are as important to this country's weather service as though those stations were owned by the United States. The Baffin bay station would be financed and operated by the countries of the northern hemisphere to whom the data would be of value when reported by wireless.

Jailed for Stealing One Kiss as He Helped Girl

Frank Dunn, of Brooklyn, N. Y., was sentenced to 15 days in the workhouse by Magistrate Ellpern for kissing Margaret Swenson.

Something lodged in the girl's eye while she was walking along the street and Dunn offered to remove it for her. He removed the irritating object and, without asking for his recompense, he gave the girl a resounding kiss. She then had him arrested.

Yanks Rescue Wrecked Japs

Save Forty-Five Sailors From Drowning or Death From Bites of Centipedes.

WENT ASHORE OFF MINDORO

Men of the Ryokai Maru Had Battle of Life on Coral Ledge—Vessel Comes to Grief in Treacherous Channel.

Manila.—Forty-five Japanese sailors, rescued through the efforts of an American destroyer and a naval tug from the wreck of the Japanese freighter Ryokai Maru, arrived at this port after a thrilling battle with death by sea from drowning and by land from giant centipedes, which infested the coral ledge on which they had found refuge.

The Ryokai Maru, bound from Java to Yokohama with a cargo of sugar, ran upon the deadly coral ledges of Panagatan Cay, in the straits of Mindoro, three nights ago, according to the story told by Captain Mizuno of the wrecked steamship. The vessel was proceeding through the treacherous channel, he stated, with a heavy fog hiding the shore, and a strong wind from the south that threw the vessel off her course and sent her suddenly crashing upon the reefs. As soon as the steamship struck the wind and tide swung her around, with her starboard side upon the reef and 150 fathoms of water on the port.

Radio Damaged.

The shock of the collision damaged the radio so much that it was not for three hours that it could be used. An SOS was then sent out and was picked up by the naval radio station at Cavite. Captain Crose, commandant at Cavite, sent the destroyer Whipple racing for the scene at daybreak, followed by the naval tug Wompatuck.

When day broke the position of the vessel was so precarious that Captain Mizuno decided to abandon ship. The forepeak was stove in and the vessel was grinding badly with every breaker and threatening to slide back into deep water, where she would have sunk like a plummet. Volunteers of the crew scrambled out on the reefs and managed to carry lines to the narrow ledge of the cay that seemed to offer refuge. As the men clambered up on the rocks a nest of giant centipedes was discovered and several men were bitten, one of whom died shortly after.

That afternoon the Whipple hove in sight and the destroyer sent a boat in through the boiling surf to the stranded steamship. By clever seamanship the boat's crew managed to round under the Ryokai Maru's stern into a bit of shelter and the officer in charge boarded the freighter, where Captain Mizuno still remained. It was decided that the crew of the steamship were in comparative safety and that it was not necessary to risk the eggshell destroyer in the swirling waters of the straits. The Whipple accordingly stood off and on until the Wompatuck arrived.

Rescued the Japanese.

The stanch navy tug, under the guidance of Capt. "Dan" McGrew, ran in as far as she dared and, with her boats, rescued the Japanese from their precarious shelter on the ledge and then left the freighter to her fate. Wrecking experts say the chances of saving the vessel herself are very slim.

The Ryokai Maru was formerly the Oristano, launched at Newcastle, England, in 1911 for the Gulf line. She was sold this year to the Yamamoto Kisen Shokai and was during the present voyage under charter to the Mitsui Bussan Kaisha.

There is a marked resemblance between the dwarf chameleon, the little eight-inch long reptile which lives in the Kamerun of Africa, and that gigantic prehistoric reptile called Tricoratops, which was 20 feet long and eight feet high.

Campaigning Against Vivisection

The children of California are up in arms against the movement to subject all dogs to vivisection, which is planned as a state law and proposed as an amendment up for decision at the coming elections. The children oppose the law, and have arranged a strenuous campaign urging their elders who vote to cast their vote against acceptance of the law. Placards decorate the family pets, and outside of school hours the youngsters are not slow to let the voters know how they feel about it. Here are some of the young campaigners and their pets.

FIND SOME USE FOR WASTE FRUIT

Uncle Sam Shows Ways to Convert Culls Into Money.

Bureau of Chemistry of Agricultural Department Devises Methods of Using Citrus Fruits That Are Now Total Loss.

Washington.—How to turn waste into profit is the subject of a circular of the Agricultural department, prepared by the bureau of chemistry, to aid producers of oranges, grapefruit, limes and lemons, who yearly suffer great loss in bruised, undersized or oversized fruit.

The circular gives directions for the commercial manufacture of grapefruit juice, orange vinegar, citrate of lime, candied grapefruit and orange peel, marmalades of various kinds, jellies and butters, which can be obtained from the department.

Since vinegar made from oranges is quite as satisfactory as that made of apples, orange vinegar might well be substituted, it is shown, especially in regions where many cull oranges would otherwise be wasted.

Grapefruit juice is a favorite among the refreshing juices on the market. It is not so well suited to home manufacture as other citrus fruit by-products, because of the necessary apparatus. However, it should be possible to prepare grapefruit juice on a small scale in the home, if desired, by means of utensils usually available.

Citrate of lime is an article of commercial importance which can be made from cull lemons or limes.

Candied grapefruit or orange peel makes an excellent center for chocolates and also serves as a substitute for citron in baking. Candied orange peel may be mixed with icings for cakes or with dough for cookies. It may also replace shredded coconut in home-made candies, and fresh orange peel in marmalade. Many firms now use similar products instead of citron in making mincemeat.

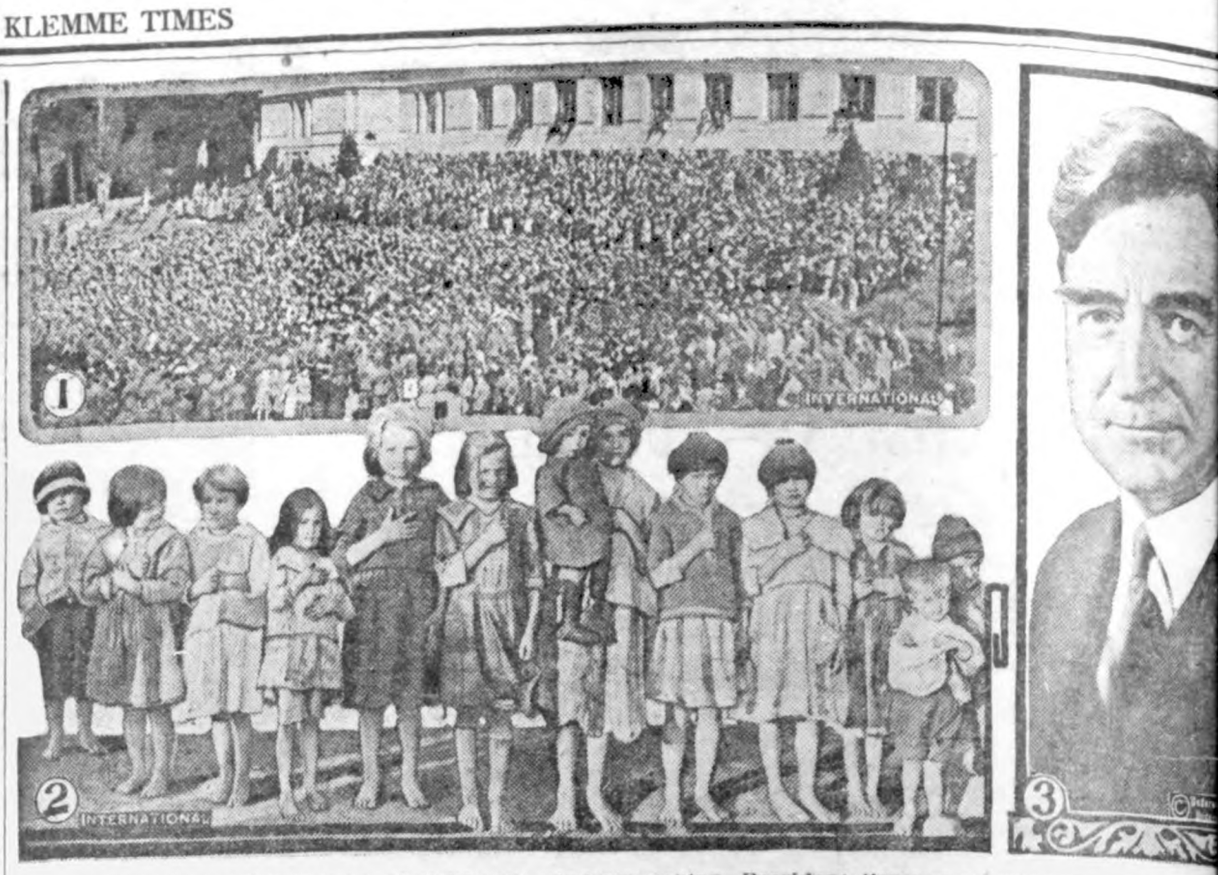
Orange butter, especially with a small amount of pineapple pulp added, may be a new product to many people. All the recipes have been tried out in the laboratory and have proved successful.

Pried Mule's Jaw Open.

McKee's Falls, Pa.—When a vicious mule seized the leg of John Fry in its jaws the other day, the animal was lashed with a black-snake whip for several minutes in vain. Then a mallet was procured, but blows with this failed to induce the animal to let go. Finally it was beaten into unconsciousness and then its jaws pried open. Fry's lower leg was torn almost to the bone.

Ring Up Loot on Cash Register.

Metamora, Mich.—The cash register in Julius Ludwig's public garage read "$200 paid out" when he opened for business one morning recently. Julius was puzzled until he discovered that $200 worth of tires had been stolen during the night.



1—Ten thousand University of California students asking President Barrows to withdraw his resignation. 2—Wretched, ragged children of the tent city of evicted miners near Johnstown, Pa., for whom aid is sought. 3—Dr. Royal S. Copeland, health commissioner of New York city, who was elected United States senator by the Democrats.

NEWS REVIEW OF CURRENT EVENTS

Democrats Score Great Victory and Almost Capture Control of Congress.

EIGHT G. O. P. SENATORS OUT

Al Smith's Success in New York Starts His Boom for Presidential Nomination—Turkish Nationalists Goading the Allied Nations to Drastic Action.

By EDWARD W. PICKARD

AL SMITH, former governor of New York, has been elected to that office again by a huge plurality and already is being boomed for the Democratic nomination for the presidency in 1924. Regardless of party affiliations, do you think he would make a good nominee, and a good President if elected?

REPUBLICAN control of congress was almost swept away in the Democratic landslide at the election on November 7. According to the returns at this writing, the G. O. P. in the next congress will have 53 senators, compared with 60 now, and the Democrats will have 42 compared with 36 now. Doctor Shipstead, who defeated Senator Kellogg in Minnesota, represents the Farmer-Labor party.

The lower house of the Sixty-eighth congress will be composed of 225 Republicans, 207 Democrats, one Socialist, one Independent and one Farmer-Labor member. If these figures are not changed by the revised returns, the Republicans will have a majority over all of 15.

Nine senate seats were lost by the Republicans, by the defeat of Senators DuPont in Delaware, France in Maryland, Townsend in Michigan, Kellogg in Minnesota, Frelinghuysen in New Jersey, Calder in New York, Poindexter in Washington, and Sutherland in West Virginia, and of Albert J. Beveridge in Indiana. The Democrats lost two seats through the downfall of Senators Hitchcock in Nebraska and Pomerene in Ohio.

Among the outstanding results of the election was the great victory of Al Smith in New York. He defeated Miller for the governorship, which he once before held, by a plurality of more than 390,000. This makes him a logical possibility for the Democratic nomination for the presidency in 1924, and already his enthusiastic admirers are booming him for that honor. One possible rival, Senator Pomerene, is removed by his defeat for re-election by Fess, Republican, but it is likely Cox will want to try again. Another man who may be put forward by the Democrats is S. M. Ralston of Indiana, who defeated Beveridge for the senate and who is very popular among the Hoosiers.

Necessarily the election has its effects, also, on Republican presidential probabilities. Some politicians in Washington think President Harding will not seek another nomination because the great reverses sustained by his party are interpreted as the expression of dissatisfaction with his administration. However, if he should wish to lead the ticket again, two likely contenders for the place are now out of it—Beveridge of Indiana and Miller of New York. But there are other strong Republican possibilities. Senator Hiram Johnson of California was returned with a big plurality; Gifford Pinchot won the governorship of Pennsylvania by 255,000 plurality; and Senator Pepper of Pennsylvania easily won re-election. Any one of these may reasonably ask the presidential nomination, and so, too, might Governor Allen of Kansas. There is some talk even of Senator McCormick of Illinois as the choice of the progressive Republicans; and Jim Watson, now restored as the boss of his party in Indiana, might get ambitious and offer himself. His followers, as well as those of Senator New, are accused of having knifed Beveridge at the polls, and the charge seems to be true, as Republican congressmen were elected in nine of the thirteen Indiana districts.

Senator Lodge of Massachusetts just managed to weather the storm. His plurality over Gaston was about 8,000—a fourth of what it was in 1916. W. N. Ferris, who defeated Senator Townsend in Michigan, announces that his first effort when he gets to Washington will be to unseat Senator Newberry.

Irrespective of partisan feeling, there will be widespread regret over the defeat of Senators Kellogg of Minnesota and Poindexter of Washington, for both have proved themselves able, honest and industrious servants of the people. The same may be said for Hitchcock of Nebraska. Senator James A. Reed of Missouri, who was repudiated by his party two years ago, goes back for a third term with a majority of 34,000. Shortly before the election former President Wilson wrote a letter saying that if Reed were returned to the senate he would "of course be there a man without a party."

FOES of prohibition were considerably elated by certain features of the election. Illinoisans voted two to one for amendment of the Volstead act to permit beer and light wines; California defeated the proposed state enforcement law; Massachusetts rejected a proposal to harmonize the state prohibition law with the federal enforcement act; Governor Edwards of New Jersey, "wettest of the wets," was elected senator; New York Democrats won on a platform with a light wine and beer plank; and in Minnesota Congressman Volstead, author of the enforcement act, was defeated. The wets believe they have gained at least 30 and maybe 60 votes in the house.

On the other hand, the drys won a test vote in Ohio by 100,000, and their leaders insist they will still control congress. While Volstead was retired, the man who beat him, Rev. O. J. Kvale, Independent, says he is "drier than Volstead." However, Volstead will normally be succeeded as chairman of the judiciary committee by Graham of Pennsylvania, who is decidedly liberal in the matter of prohibition.

It was a sad day for the once weaker sex. Of all the woman candidates for seats in the senate and house, only one was elected, and her term will end on March 4 next. She is Mrs. Winnifred Mason Huck, who will fill out the unexpired term of her father, the late Congressman-at-Large William E. Mason of Illinois. Moreover, as Representative Alice M. Robertson of Oklahoma was defeated by a mere man, there will not be one woman in the Sixty-eighth congress.

PRESIDENT HARDING still hopes to have the ship subsidy bill passed by this congress and therefore has called an extra session to begin November 20. The measure is almost certain to encounter stubborn opposition in the senate, and many leaders of both parties believe it cannot get through.

MUSTAPHA KEMAL PASHA and the Turkish national assembly are not satisfied with the victories they have already won and are threatening to stir up a lot more trouble in the Near East. The sultan's ministry having resigned, Rafet Pasha, nationalist governor of Constantinople, assumed power there, and the allied high commission accepted the new regime. But about the same time the Angora government demanded that the allied troops be removed from the city at once, stating that its occupation by foreign soldiery was inconsistent with Turkish independence. The nationalists also announced that foreign warships could not enter the straits without permission and then only one at a time, and that only one vessel of each nation should be stationed at Constantinople. These demands were firmly rejected by the allied high commission, the French agreeing with the British that no such concessions should be made and that the allies must retain military control over the city until peace had been established and that terms of the Mudania agreement be observed. The request of the tionalists that the Turkish rali in Europe and Asia that have under temporary allied control handed over to them also was ref Thereupon the Turks, reiterating demands, called three addit classes to the colors and mob large forces near Constantin Lieutenant General Harington wa Rafet Pasha he would permit usurpation of allied authority.

The allied governments adm the situation was acute and gro dangerous. The British sugge postponement of the Lausanne ference, but M. BOTH WERE IN THE SERVICE

Dr. William C. Speakman and His Wife, Department Heads, Continue Work for Legion.

When the war call came, Dr. William C. Speakman of Wilmington, Del., told Mrs. Speakman that he couldn't stay at home.

Dr. William C. Speakman.

Mrs. Speakman said: "All right, I'll find plenty of war work to do at home."

And when the war was over Doctor Speakman returned to his home, and he and Mrs. Speakman took up a work of peace—the care of war's disabled, the furtherance of the ideals and purposes for which the American Legion stands. And now both are working side by side in the cause, Doctor Speakman, who was a major in the army, as department commander of Delaware, and Mrs. Speakman as department president of the American Legion Auxiliary of the department of Delaware.

During Doctor Speakman's absence Mrs. Speakman headed numerous organizations for soldier welfare, and won fame for her labors. Born in Neufchatel, Switzerland, and speaking several languages, her efforts were particularly valuable among the soldiers who had not learned English well. She was known as an indefatigable worker, and after the war was ended she was one of the first to join in the organization of the American Legion Auxiliary, as Dr. Speakman was one of the first to realize the value of the American Legion.

Mrs. William C. Speakman.

"And we find it mutually advantageous to be department heads at the same time," Dr. Speakman says. "We have a constant interchange of ideas and plans, which we try to make of value to our organizations."

A FAMILY OF LEGIONNAIRES

Grandfather, Mother and Two Sons Connected With Organization at Redwood Falls, Minn.

"Grandpa is a Legionnaire, so are the kids Legionnaires, and "Ma" is a Legionnaire, too—or rather a member of the Minnesota American Legion Auxiliary. "Ma" is Mrs. Maude G. Winter of Redwood Falls, Minn., and, besides being a member of the state executive committee of her organization, is noted for her efforts throughout the state on behalf of the former service men, particularly the disabled.

Mrs. Maude G. Winter.

And "Grandpa" is Mrs. Winter's father, the oldest Legionnaire in the state. He is seventy-three years old and his name is Dr. G. P. Gibson of Redwood Falls. He served Uncle Sam during the war at Fort Benjamin Harrison.

And the "kids" are Mrs. Gibson's two sons, who were under twenty-one years when the United States entered the war, but they enlisted, anyhow. They are John and Leigh Winter.

"It is mighty proud I am to have two sons members of the American Legion, and my father a member, and that I am eligible to be a member of the American Legion Auxiliary," Mrs. Winter said. "It is an organization, the American Legion, that has been found to stand for all that is worth while in our country, and the implacable enemy of all that is bad. And we know that it always will be so.

"It was hard to give up my boys—mighty hard. And, as every mother does who went through that agony, I pray that never again will mothers have to give up their sons to war. The American Legion and the women who make up its auxiliary are building against war every day, all the time. We are educating, Americanizing all against future war and for permanent peace."

Hot Dogs!

"An' dat," concluded Sam, who was arguing with Snowball about the relative merits of dogs they had once owned, "was a wonnerful houn'. Why, one day he come foolin' roun' mah daddy's blacksmith shop an' mah daddy got mad an' chucked a hammer at him, an' dat dog—you know what he done? Well, he done made a bolt fo' de do'."

"Humpf!" sneered Snowball, "Nuffin' 'tall, nuffin' 'tall! One time Ah throwed a hammer at mah dawg an' he started makin' tracks fo' de Atlantic Seaboard railway an' maybe he's makin' tracks yet, fo' he sho' was de wonnerfulest dawg."—American Legion Weekly.

195,000 Auxiliary Members.

The rapid growth of the American Legion Auxiliary was shown in the national convention bulletin. The members totaled approximately 195,000, an increase of 74,000 the first year of the auxiliary's organization.

Uncommon Sense . . .

By JOHN BLAKE

MANAGE YOURSELF

A GREAT singer, who has to spend about eighteen hours a day taking care of his health and his voice, which are his capital, needs a manager, and has one.

A great actor, whose every minute is required to continue being a great actor, also needs a manager.

We take it that you are neither a great singer nor a great actor, because you belong to the vast majority of human beings.

Therefore, while you need a manager, too, you don't need to hire one. You can be your own.

This is true, whether you are your own boss, or what the socialists call a wage slave.

If you are a wage slave you will to some extent have to submit to the management of the man who is set over you.

But he can only manage you in working hours, and he can't manage your mind at all. And it is your mind, and the way it is managed, that will make or break you before you get through.

Take over that job yourself. If it is an unruly mind, make it law-abiding. If it is a roaming mind, given to wandering over all sorts of subjects when it ought to be confined to one, discipline it.

Keep it on the job it ought to be doing. Teach it to concentrate and make it practice this new accomplishment.

If it is a lazy mind, force it to work and to work hard. If it objects and acts as if it might crack under the strain, don't worry about it. Keep it working and it will soon learn to do its work without getting fagged.

While you are managing your mind, manage your body, too. Make it control its appetites, and take cold baths, and tackle hard work without flinching.

Don't let it overeat or neglect to get plenty of sleep, or do any of the foolish things that bodies will do if they are permitted to have their own way.

Mind and body well managed will soon be worth more to your boss and, consequently, more to you. If your boss won't pay the extra value, get another boss; but be sure first that the extra value is there. It is easy to think you are worth more than you are, and to underestimate the boss' judgment in that respect.

After you have been managing yourself for a while you will know how to manage others. Then, when you get a chance, you will be able to improve it. You will find the job difficult at first, but pleasant and profitable afterward. Try it and see if this isn't true.

Something to Think About

By F. A. WALKER

THE GREATEST ART

IF YOU will look around you with undarkened vision, without prejudice in your heart, and with a mind bent upon getting at the truth quite regardless of the pang it may cause your pride, you will discover that the greatest art of all arts is the art of pleasing others.

And this art, though simple as it may appear on the surface, is the most difficult are in the whole world of human practice.

It means at the very beginning of its acceptance the subjugation of spirit and passion, the conformation of will, talent and effort to the free reception of others who shall eventually pass upon your work and give it approval.

Like you, the judges are human, but their judgment, however it may affect your purse or temper, is final, inasmuch as it opens the door to hope or imprisons you with despair.

You may paint a beautiful picture, but if it fails to please others nobody will praise or buy it. And you proceed to nurse your disappointment with ill-humor, oblivious to the fact that the painting is deficient somewhere in color, drawing or atmosphere of the quality that gives satisfaction.

But the true artist, in whatever field of human endeavor he may be seeking success, turns each failure to account by studying it good-humoredly and checking up its defects.

He turns the first canvas to the wall and begins to paint again, carefully avoiding previous mistakes.

And it is in such action as this that there is shown the true mettle of the man or woman who is determined to forget self by pleasing others.

It may be a difficult lesson to learn, and it may take years to comprehend all its intricacies and minute details, but when it is once mastered, old heartaches disappear like the hoary frost in the shining morning sun.

To please others ought to be the chief purpose of every young man and woman dependent on his or her physical or mental effort for livelihood and success.

Though an extremely trying thing to do, calling for patience and sometimes great humility, it frequently bestows upon those who have the fortitude to overcome rewards far in excess of their greatest expectations, and a joy whose gladness cannot be expressed in words.

(©, 1922, by McClure Newspaper Syndicate.)

Carelessness and Poverty.

Childish, imbecile carelessness is enough to render any man poor, without the aid of a single positive vice.—Francis Wayland.

Mother's Cook Book

The Christian doctrine that we should love each other is not merely a command laid upon us by a God utterly and unintelligibly superior to us all; it is also the counsel of our own hearts, and that is why we know that it is divine.—Arthur Clutton-Brock.

WHAT TO EAT

A DELICIOUS breakfast fish is mackerel; with a nicely seasoned sauce it may be served for a luncheon dish. Soak the fish over night skin side up, adding one tablespoonful of vinegar to the water. In the morning remove the fish, rinse well, remove the backbone and cut the fish into fillets. Parboil five minutes before cutting up, drain and cook in a hot frying pan with a little fat until a golden brown. Arrange on a warm platter, garnish with parsley and pour around the fillets.

Oatmeal Rolls.

Take one-half cupful of hot mashed potatoes, add one cupful of scalded milk, two tablespoonfuls of sugar and a teaspoonful of salt. When lukewarm add one-half of a yeast cake, four cupfuls of flour, one and one-half cupfuls of rolled oats which have been scalded with one-half cupful of boiling water. Knead to a smooth dough and set to rise in a greased bowl for three hours. Knead down, cutting well with a knife; as it rises repeat the cutting down, then when risen turn out and mold into rolls. If prepared in the afternoon the rolls may be set in the icebox over night, then brought in and allowed to rise and be baked for breakfast. Bake 45 minutes in a hot oven.

Corned Beef Hash.

Chop two parts of cooked potatoes and one part corned beef very fine, season with grated onion, pepper and salt, heat thoroughly, adding a little butter and a grated pepper shredded. Spread thickly on thin slices of buttered toast and slip a poached egg on each; sprinkle with pepper and salt and minced parsley.

Perfection Fruit Cake.

Take the following ingredients: two cupfuls of brown sugar, one cupful of butter, one and one-fourth cupfuls of buttermilk, four cupfuls of flour, three eggs, one teaspoonful each of cinnamon, soda and nutmeg, one-half teaspoonful of cloves, one and one-half pounds of raisins, one pound of currants, one-fourth pound of citron, one-half cupful of good fruit juice, one-half cupful of New Orleans molasses. Wash and dry the raisins and currants and slice the citron very fine. Mix the fruit and flour well. Cream the butter and the sugar a little at a time, beat the egg yolks and add them to the creamed butter, then the beaten whites. Add the molasses, buttermilk and flour mixed with the spices and soda. Beat well; now add the fruit, stirring it in well, but do not beat. Bake in two large loaves in a slow oven for one and one-half hours.

No Escape for the Rogue.

There is no den in the wide world to hide a rogue. Commit a crime, and the earth is made of glass.—Emerson.

Daily Thought.

We always may be what we might have been.—Adelaide Proctor.

ABSENCE

By WILL M. MAUPIN

HOW big a little house can be
When all have gone away
And left no one at home but me;
How dreary, grim and gray
The shadows are at eventide,
When lone and tired I come
And have no one to sit beside
Me when at last I'm home.

The hall seems leagues of distance wide,
Each room a vast estate;
Dark forms in dusky corners hide
And terrors lie in wait.
Deep silence reigns, and over all
The lonesome shadows creep;
I list to hear a soft footfall
From out the silence deep.

No welcome laugh, no smiling face,
No eager, running feet
To meet me as I near the place;
No kiss from lips so sweet.
A barren isle in widespread sea;
A rock in desert wide:
No hands that beckon unto me
Near home at eventide.

And yet, ere morning sun awakes
I feel a presence sweet;
Dream faces dreary fancy breaks
And bring a joy complete.
I feel the touch of little hands,
See smiles of childish glee;
And as from far-off Fairyland
My children come to me.

O'er low-flung hills and valleys wide,
Far from the city's strife,
Midst country scenes where joys abide
Are children dear and wife.
So what care I if dark and drear
The cottage seems to be,
If brown and strong my kiddies dear
Soon hasten home to me!

(Copyright by Will M. Maupin.)

SCHOOL DAYS

Just a Little Smile

HIS PROFESSION

She was very curious about things. "They tell me your husband is a hydraulic engineer," she said to her best friend, "but I always understood he was something in the city. I didn't know he was a technical expert, or anything wonderful like that."

"He is a hydraulic engineer," said her friend, "but it's not wonderful. He just waters mining stock."

Mum.

Bill—Is it possible to confide a secret in you?

Phil—Certainly. I will be as silent as the grave.

Bill—Well, then, I have pressing need for two bucks.

Phil—Worry not, my friend. It is as if I had heard nothing.—American Legion Weekly.

The Farmer's Advantage.

"You cut a face in a pumpkin to make a Hallowe'en decoration."

"You do," said Farmer Corntossel, "if you can afford the pumpkin. If you live 'n town, you have to use some kind of paper imitation."—Washington Star.

A Way Out.

Hub (with newspaper)—I see a judge has ruled that a woman should not spend more on clothes than for rent.

Wife—Well, then, we shall have to pay a bigger rent.

Ears Probably Closed Also.

Mrs. Judd—Science tells us now that we hear much better with our eyes closed.

Mr. Judd—Yes. I noticed quite a number trying the experiment last Sunday evening in church.

Choice of Two Evils.

Mr. Crabshaw—What is that horrible smell?

Mrs. Crabshaw—It's either the cook singeing the chicken or daughter smoking her favorite brand of cigarettes.

AN UNDERGRADUATE

Mr. Groundling: Here's my apartment. Rather stiff climb—four flights up.

Mr. Winger, the Aviator: Call these flights? Guess you must still be in the ground school.

Eccentric.

There was a famous ath-a-lete,
Eccentric sort of mope.
He did not fill the sporting sheet
With autumn baseball dope.

The Trump of Fame.

"Don't you want to be heralded by the trump of fame?"

"Of course, I do," answered Senator Sorghum. "What I regret is that the fellow who manipulates the trump of fame has to be hired, same as the saxophone player in a jazz band."

Considering Health.

"You insist on shaking hands with as many of your constituents as possible?"

"Yes," answered Senator Sorghum. "Campaigning interrupts my golf and I need the physical exercise."—Washington Star.

Couldn't Be Literature.

"You were not very complimentary in speaking of Scribson's new book."

"Didn't I say it would sell by the trainload?"

"That's just the point I'm making."—Birmingham Age-Herald.

A Large Order.

"I want a dress to put on around the house," said the lady in the department store.

"How large is your house, madam?" inquired the new clerk.—Hollywood High School News.

Automatic Filler Needed.

Podunk Pete (at store)—This here fountain pen is no good. All of a sudden it wouldn't write no more.

Clerk—Have you filled it?

A Stranger.

"Can you vouch for this young man you brought to my party?"

"I think so, but why? Surely he has not proposed to your daughter so soon?"

"No, but he wants to give me a $4 check to cover his losses at bridge."

A Hen-Pecked Bird.

"What's Henpeck feeling so cheerful about?"

"He's found someone worse off than he; he's just read that the male ostrich hatches the eggs."

MIZPAH:—The Lord watch between me and thee, when we are absent one from another.—Genesis 31:49.

Friday

MY STRONG HABITATION:—Be thou my strong habitation, whereunto I may continually resort; thou hast given commandment to save me; for thou art my rock and my fortress.—Psalm 71:3.

Saturday

THE APPLE OF THE EYE:—Keep me as the apple of the eye; hide me under the shadow of thy wings.—Psalm 17:8.

Sunday

GLORY AND HONOUR AND POWER:—Thou art worthy, O Lord, to receive glory and honour and power: for thou hast created all things, and for thy pleasure they are and were created.—Revelation 4:11.

Monday

HUMILITY:—The sacrifices of God are a broken spirit: a broken and a contrite heart, O God, thou wilt not despise.—Psalm 51:17.

Tuesday

HEAVENLY TREASURES:—Lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through and steal.—Matthew 6:20.

Wednesday

POWER AND MAGESTY:—Bless the Lord, O my soul. O Lord my God, thou art very great; thou art clothed with honor and majesty:

It is better to lend than to borrow. Lend a helping hand but don't borrow trouble.

—

Nobody loves a grouch—yet it's well to remember that nearly all idiots are cheerful.

—

Compared to the universe, we are a lot of germs living on an atom. Why not behave?

—

The more some people have the less they seem to think the other fellow should want.

—

The man who is going somewhere doesn't stop just because a little dust blows into his face.

—

It always hurts a young man a little when some girl he knows tells him that she is engaged.

—

Pity the man who can see nothing more in a beautiful sunset than its resemblance to a fried egg.

—

There's one kind of wealth that can't be stolen: A knowledge of the best in books, pictures, and music.

—

Uncle Wiseacre says in his day the girls liked to pluck flowers, but now they prefer to pluck eyebrows.

—

We are perfectly willing to accept the rule of the majority, providing the majority says what it ought to say.

—

Joe the Plodder says the only fellow who ever gets anywhere by letting things slide is the trombone player.

Dr. W. F. Missman, of this city, and Dr. L. R. Parsons, of Belmond are both graduates of Iowa University and of course when the big Iowa Minnesota game was on they were right there in the front row of spectators. It was the largest crowd that ever attended a football game in Iowa and it was estimated that there were 25.000 people present. Luckily the local men went on the 'rain as the heavy rains there mir

about a thousand cars between Iowa City and Cedar Rapids who had to stay in the mud until Sunday.

The Charles Steihl party left Sunday for California. This year they are again making the trip in Stiehl's Ford truck and with Mr. and Mrs. Stiehl are John Henschen and Charlie Lewis. Mr. and Mrs. Aug. Baack and son Howard are also making the trip. They are driving their Ford touring car and will follow the Steihl party. It was raining hard when the party pulled out of Kle ten o'clock Sunday morning b were game to start and figur would get away from the ba in a few days. They travel south from here, through De es and Kansas City.

M. & St. P. R. R. and all roads and highways included within the watershed of the district.

You and each of you are hereby notified that on June 3, 1921, there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district AND that a system of drains be constructed for the relief of said district.

You are urther notified that on June 8, 1921, A. J. Lilly was appointed Engineer to make a survey, plat and profile and field notes of said proposed district, and that on March 3, 1922, said engineer filed his report recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said county and may be ammended at any time before the final action is taken thereon by the Board of Supervisors, and that December 14, 1922 at 10:00 o'clock A. M. has been fixed as the time of hearing thereon. All objections and claims for damage must be filed in writing in the office of the County Auditor not less than five days before said hearing.

Witness my hand and official seal at Garner, Iowa, this 6th day of November, 1922.

CHRIS JACOBS,
Auditor of Hancock County, Iowa.

CAUGHT ON THE FLY

Joy is the happiness of love.

—

A lump of dirt can be neutral.

—

Make your head save your heels.

—

Do not dodge a new idea. Let it hit.

—

The last man to starve will be a farmer.

—

The man who pays cash often sleeps on tick.

—

Any pretty woman's tears are worth their salt.

—

The difference between see and saw is in tense.

—

The best men practice better than they preach.

—

Help yourself by making a fine art of your work.

—

We are all strong for free speech—for our side.

—

Public opinion, being human, is frequently wrong.

—

A bank teller always has something of interest on hand.

—

Wise is the man who refuses to take his trouble seriously.

—

Co-operation diffuses wealth and minimizes profiteering.

—

Love is like seasickness—it can be felt but not described.

—

The rising young man eats a cake of yeast now and then.

—

Smiles that won't come off are apt to become monotonous.

—

Consistency may be a jewel, but a girl prefers a solitaire.

—

It is useless to be good unless you are good for something.

—

Poverty may pinch—but maybe it's only to keep you awake.

—

Folks who really practice self-denial don't talk much about it.

—

Love is sweet because a principal ingredient thereof is taffy.

—

Some men's wishbone is where their backbone ought to be.

—

We live and learn. But sometimes we live faster than we learn.

—

Pay day comes pretty often for the man who works for the devil.

—

One must not only speak charitably, but must also feel charitable.

—

No woman can hide all her imperfections from her dressmaker.

—

Some people will believe anything you tell them, if it's bad enough.

—

No man is quite as good as he thinks his son-in-law should be.

—

Some men give most of their attention to things that never happen.

—

Some people are so sympathetic they're always sorry for themselves.

—

How many times do we thank the person who shows us our mistakes?

—

It is well to understand that it is sometimes well to stand from under.

Quality vs Price

In the retail business it is very tempting for stores to exaggerate their standards now and then.

Readers of newspapers are too often influenced into beleiving things are a little too wonderful.

We have never made any claims above our one guiding principle—that of offering always quality merchandise at fair prices.

Vaule is something you get—not the sum you pay.

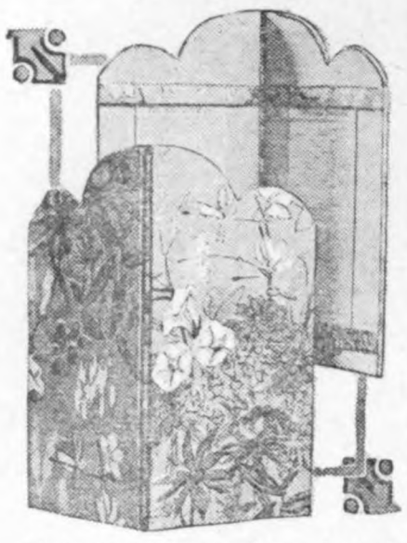
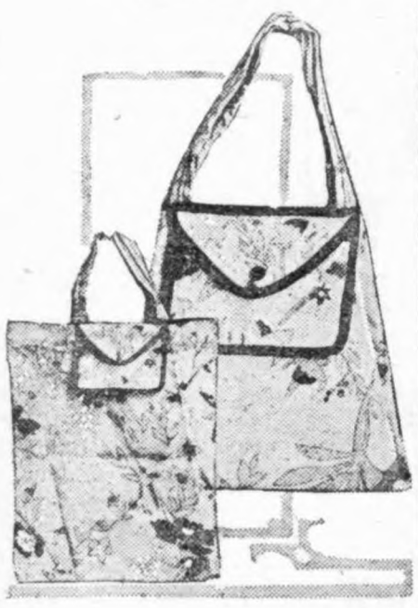
Deft Fingers Help Santa

To Screen the Phone



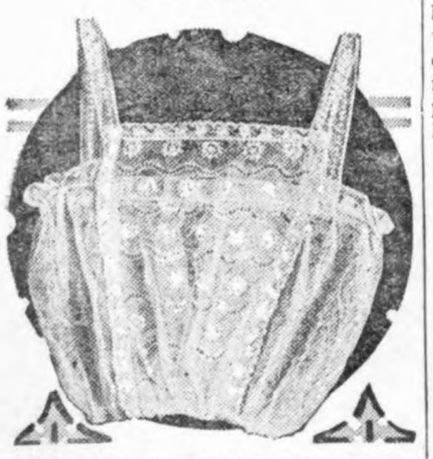
Little conveniences that adorn the house carry messages of good will at Christmas time. A phone screen covered with plain and figured cretonne, and providing a place for records of telephone numbers and calls will be welcome to men and women alike.

Ever Welcome Bags



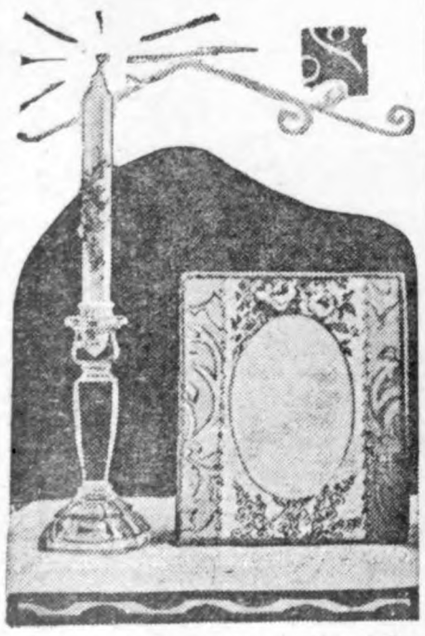
Christmas time is the springtime of bright cretonnes when they blossom out into all sorts of ingenious and beautiful gifts. The picture shows a work or shopping bag folded and unfolded. It is merely a capacious oblong bag of cretonne, with small envelope, bound with braid, sewed to one side, and, by means of snap fasteners, it can be folded and converted into a pretty shopping bag.

This Year's Camisoles



Every Christmas brings its camisoles and this year's are the daintiest ever. Many of them are made of net and lace, like the model pictured here; others, less transparent, of crepe de chine satin, wide ribbons or georgette. Baby ribbon adjusts them at the bust line and flat elastic at the waist. They are easily made and are lovely gifts from woman to woman.

For Men or Women



Christmas brings its pretty candles gayly decked out this year with sealingwax flowers, or painted and gilded. They make lovely gifts for men or women, and so will the ribbon or cretonne-covered picture frame, fastened to a glass front and cardboard back with gold braid binding. The cardboard back is cut out to form an easel support.

Gay Little Pin Trees

THE APPLE OF THE EYE: Keep me as the apple of the ey hide me under the shadow of t wings.—Psalm 17:8.

Sunday

GLORY AND HONOUR AND POW ER:—Thou art worthy, O Lord, t receive glory and honour and pow er: for thou hast created all things and for thy pleasure they are and were created.—Revelation 4:11.

Monday

HUMILITY:—The sacrifices of God are a broken spirit: a broken and a contrite heart, O God, thou wilt not despise.—Psalm 51:17.

Tuesday

HEAVENLY TREASURES:—Lay up for yourselves treasures in heav

sharpened at both ends, make the foundation for the pin tree illustrated. The large cork—of wood—is painted green and the smaller cork is gilded. They are joined by the long pin, and into the gilded cork many pins, with colored heads, are thrust, to form a tree. A band of baby ribbon, tied about the larger cork, holds small safety pins.

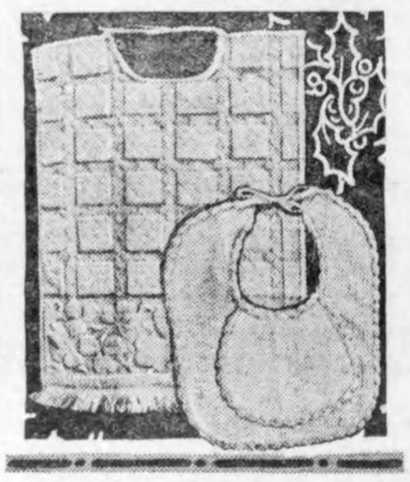
Smart Nanette Fans

These brilliant little Nanette fans began their careers humbly in France, one of them, as a plain, small palm leaf and the other as a plaited fiber fan. By means of paint, satin ribbons, organdie or millinery flowers they have graduated into the smart set and will accompany gay frocks to joyous parties. One of the fans pictured has a shirred binding of ribbon in green. Its handle is bound with ribbon, finished with a loop and organdie roses in soft colors adorn it. Painted flowers or millinery flowers and foliage adorn the plaited fan and ribbon covers its handle.

Among House Slippers

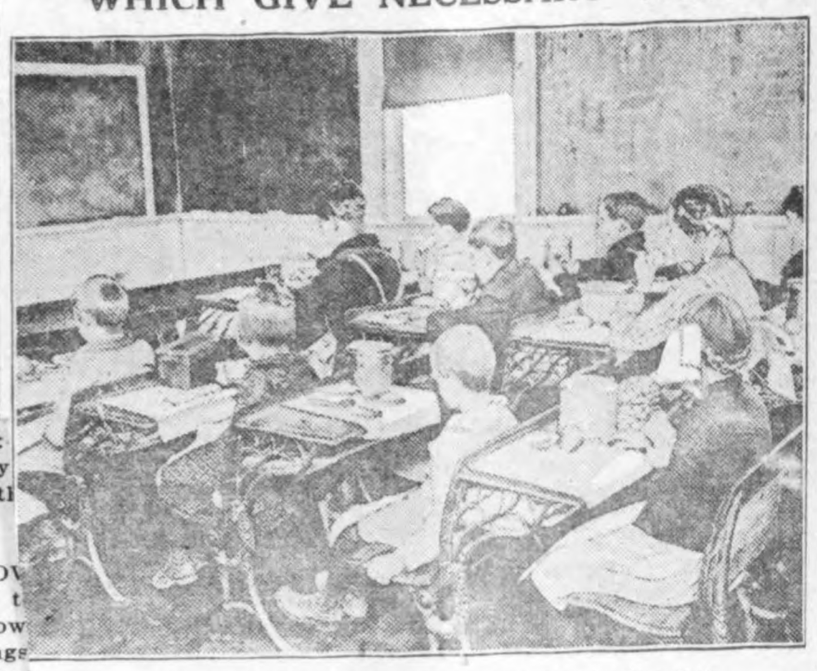
Most people look to Santa Claus to provide them with house slippers and he always carries a generous supply of all kinds in his pack. This year you will find among them beautiful bedroom slippers, like those shown above, that are made of ribbons and adorned with little ribbon flowers.

To Remember the Baby



Everyone wants to remember the baby and here are two bibs for him, one of them made of pink and white Turkish toweling and the other of honeycomb cotton. The square bib is bound with tape which provides the ties and the edges of the smaller bib are finished with a shell crochet of mercerized cotton.

CHILDREN HELP SUGGEST FOODS WHICH GIVE NECESSARY VARIETY



School Children at Lunch—Waiting for the Hot Dish.

(Prepared by the United States Department of Agriculture.)

If the children are interested in their own school lunches and are taught how to pack them properly, they will not only take this task off the mother's hands, but help to suggest foods which give the necessary variety for a well-balanced diet. Children should be taught to prepare sandwiches well and to pack them neatly in waxed paper so they will neither fall to pieces nor dry out before they are to be eaten. An occasional discussion of foods suitable for the school lunch will lead to surprisingly good suggestions from the children themselves, as to what they like to have or what other children bring.

When hot cocoa, milk, or soup can be obtained at school the children are better off. Efforts should be made by groups of parents to establish the serving of at least one hot dish with the school lunch.

Sandwiches Most Substantial.

Sandwiches, because of their convenience, are usually the substantial part of the basket lunch. By varying the bread occasionally, using whole wheat, graham, Boston brown bread, raisin, date or nut bread, or split buttered rolls or biscuit, cinnamon or other buns, the lunches will not seem so monotonous. In addition to sliced roast or boiled meat, bacon, chicken or rabbit may be used. Chopped meat or ground meats of any kind, chopped hard-boiled eggs, moistened with salad dressing, cottage-cheese, peanut butter, nut meats, or cooked fish are good filling for sandwiches and also supply small amounts of protein for the midday meal; lettuce, tomatoes, and other salad materials with dressing make palatable moist sandwiches and introduce some vegetables into the lunch; while sweets may be supplied by a jam, jelly, or fruit butter sandwich, honey, brown sugar or maple sugar filling, or by cookies, cakes, dates, raisins, figs, sweet chocolate, or other sweets easily carried. Fruit should be included as often as possible.

Children sometimes have a prejudice against salads. This may be because the first salad tasted was not just right. If they have been accustomed at home from an early age to salads with dressings containing very little vinegar or acid, and made with good oil in perfect condition, they will cultivate a liking for them and enable the mother to provide both salad vegetables and salad oil, two valuable foods in their diet.

Prepare Lunch Carefully.

In packing the lunch basket every precaution should be taken to keep the foods clean and in good condition. Foods that spoil easily should be avoided in warm weather. Paper napkins or towels and thin waxed or parchment wrapping paper are inexpensive, especially if bought in large quantities. These not only protect the lunch but the children's clothing. Washable napkins may be used instead, but they are more troublesome and are likely to be lost.

Sandwiches, sweet foods and fruits should be wrapped separately and the heaviest things put at the bottom of the lunch box. Cup custards, apple sauce, jelly and other soft foods can be carried in paper cups or cartons, in small screw-top jars or covered jelly glasses. Milk from home is desirable whenever it can be carried, if no provision can be made for serving it at school.

RECIPE FOR MAKING PURE PORK SAUSAGE

Suggestions Made by Department of Agriculture.

To 65 Pounds of Fresh, Lean Meat Add 35 Pounds of Fat—Spices Should Be Mixed and Added Before Meat Is Ground.

(Prepared by the United States Department of Agriculture.)

Good pork sausage is always in demand. The following recipes for making it are recommended by the United States Department of Agriculture: Take 65 pounds of fresh, lean meat and 35 pounds of fat. Add to this 1¾ pounds salt, 2 ounces fine sage, 1 ounce ground nutmeg, and 4 ounces black pepper. The spices should be mixed together and added to the meat before it goes through the grinder. Cut the meat into small pieces and put through the grinder, using the small plate. After it is well ground, mix thoroughly, to be sure that it is uniformly seasoned. No water should be added if the sausage is to be stored away in bulk. If it is to be stuffed in casings, a little water may be necessary to soften the meat, so that it will slip easily into the casings.

Smoked Sausage.

The following ingredients are used in making smoked or country sausage:

- 85 pounds lean pork.
- 15 pounds beef.
- 1½ to 2 pounds salt.
- 4 ounces black pepper.
- 4 ounces red pepper.
- 1 ounce sweet marjoram.
- 1 ounce mace.

Cut the meat into small pieces and sprinkle seasoning over it, then run it through the grinder, using the small plate. Put it away in a cool place for 24 to 36 hours, then add a little water, and stuff into hog casings and smoke in a very cool smoke until a dark mahogany color is obtained.

Corn Meal Mush With Pork.

- 1 pound lean pork, part meat and part bone.
- 1 cup corn meal.
- 1 teaspoonful salt.
- ½ teaspoonful powdered sage.
- Water.

Cook the pork in water until the meat can be removed easily from the bone. Remove the meat, cool the broth, and remove the fat. Reduce the broth to about a quart, or add water enough to bring it up to this amount, and cook the corn meal in it. Add the meat finely chopped and the seasonings. Pack in granite bread tins. Cut into slices and fry. Beef may be used in the same way, the United States Department of Agriculture suggests

RIGHT CREAM FOR WHIPPING

Should Be From 24 to 48 Hours Old and Contain at Least 30 Per Cent of Butterfat.

The best cream to whip is good, rich cream, from 24 to 48 hours old, says the United States Department of Agriculture. It should contain at least 30 per cent butterfat to produce ideal results, and be kept very cool. Pasteurization tends to lower the whipping quality of the cream, and homogenization is very harmful to it. Combined they practically destroy the value of cream for whipping.

Use for Breadcrumbs.

Breadcrumbs may be used instead of flour in many dishes, the United States Department suggests. Bakers often use stale bread and dried, finely ground cake in place of part of the flour in making fancy breads, cakes, and cookies, and the housekeeper can often avoid waste by using them in this way in griddlecakes, cakes, cookies, gingerbread, brown bread, etc.

Washington Oilcloth.

Wash oilcloth with warm water and milk. Use one cupful of skim milk to one gallon of water. Wipe dry with a clean cloth.

OF INTEREST TO THE HOUSEWIFE

Panned chicken is delicious served with currant jelly sauce.

* * *

Bury the yeast cake in salt if you wish to keep it a while.

* * *

Folding wardrobes made of chintz or cretonne can be secured ready made, but any woman can make one for herself.

* * *

Children who are inclined to be constipated should be allowed to eat five or six figs a day. This helps a great deal.

* * *

If plain clothes are folded immediately after being taken from the line, they can be ironed twice as quickly and need little sprinkling.

* * *

Clotheslines should never be left out of doors when not in use; they should be carefully dried and put away, otherwise they will soil and mark the linen.

* * *

Woolen stockings that are past repair can be put to many uses. Cut off the feet, draw one stocking over the other, fold and sew up one end, and you have an excellent glove for polishing anything.

Smart Frocks for Juniors; Sweaters for Girl Athlete

FOR girls from about eight to fourteen, there are any number of pretty winter frocks in wool fabrics and in velveteen. There is much uniformity in the smart styles designed for juniors, but unending variety in the details of making and trimming them. One-piece, straight-line frocks divide popularity with those having a long-waisted bodice and a gathered skirt and frocks of a single material are not more plentiful, in the displays, than those having a body made of a plain fabric with skirt of a plaid or checked material. A feature of the mode is the cleverness with which these skirts and bodies of different materials are merged into one another. They are not merely joined, but the skirt is extended by tabs or scallops that are stitched to the body, or else the bodice finds its way in points, scallops or battlement edges, to the upper part of the skirt. Medallions of the plain goods are applied to the skirt also and needlework of silk floss or wool yarn is important in placing these medallions, in joining body and skirt and in decorative stitchery that carries out the color combination in the frock.

A velveteen dress, typical of the styles, is shown in the picture. It is of dark blue velveteen with bright red satin, in folds and pipings, and in the prim little bow with ends at the front of the neck opening. Little crocheted balls of silk finish these ends. This touch of bright red is a feature of the styles for young girls and is very effectively used on national blue, brown and black frocks. Brown and blue, in various shades are greatly favored and combinations of brown and tan, brown and red, blue or black and red, are everywhere approved.

Preserving a physical as well as a mental balance is the big thought in modern education. Athletics and outdoor sports are as much a part of the school curriculum as are l er mathematics and the langua This insistence for physical cul and open air sports is not without effect in fashion's realm.

With women prominent in te court, golf grounds, playing boc basket ball and the like, style explo tion has become part of the play. take delight in dressing to "look part," pictorially speaking, and it without saying that one's wearing

Velveteen Dress for Young Girl.

parel must be carefully chosen from the standpoint of comfort and protection.

It is a fact that no class of apparel can compete with knitted outerwear in measuring up to the requirements of modern athletic dress. Thus knitted toggery is the triumph of modern sports fashion. While entire outfits are the order of the day including knitted knickers, jackets, dresses, hats, scarfs, capes, stockings, gloves and the latest of all, the knitted muff, yet the one outstanding figure in knitted wool wearables is the sweater.

To be strictly up-to-the-moment one's sweater must be monogrammed. Varsity girls and women given to athletics have taken up this fad enthusiastically, and now it is considered the proper thing to order your initials monogrammed at the time of purchasing your sweater.

A sweater, varsity style athletic slipon, with generous collar (see illustration in circle) is a wanted kind. Note the attractiveness of this same garment, collar thrown back, topped with a matched knitted cap. Of lighter weight is the woman's athletic slipon with half-length sleeves.

Isolate the first hen that shows signs a cold and it will help to prevent her cases. Place the sick bird where e will not be forgotten and neg ted feeding time.

FARM LIVE STOCK

Charcoal for Swine

To prevent worms, keep the following charcoal mixture before the pigs all the time:
Charcoal, 1 bushel.
Hardwood ashes, 1 bushel.
Salt, 8 pounds.
Air-slaked lime, 8 pounds.
Sulphur, 4 pounds.
Pulverized copperas, 2 pounds.

First mix the lime, salt, and sulphur thoroughly, and then mix in the charcoal and ashes. Dissolve the copperas in two quarts of hot water and sprinkle it over the whole mass, mixing thoroughly. Store this in a barrel under shelter, and keep some of it in an open shallow box where the hogs can get it as they wish.—Bureau Animal Industry, United States Department Agriculture.

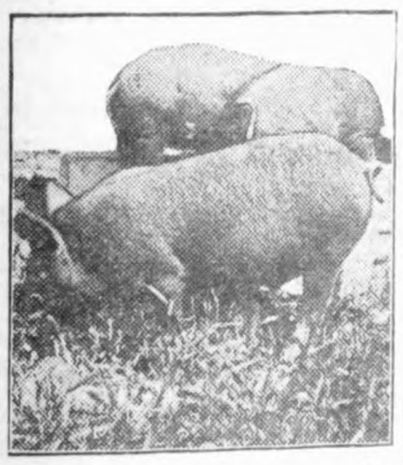
GUARD AGAINST HOG CHOLERA

If Herd Is Treated Immediately or First Sign of Disease Loss Will Be Small.

(Prepared by the United States Department of Agriculture.)

Watch for the first hog to show signs of cholera, advises the United States Department of Agriculture. If the herd is treated immediately it is generally possible to save the herd with but few losses. If the disease, however, is allowed to reach all the animals before the serum preventive treatment is applied heavy losses may be expected. Hog-cholera serum is a preventive and not a cure for hog cholera, the department points out.

Whenever a hog dies of an unknown cause the owner should watch his herd closely for at least a week, and if any more hogs in the herd begin to show signs of sickness a veterinarian should be called immediately, for the chances are that hog cholera has reached the herd and prompt action in applying the serum treatment is the only thing that will save the well animals. A high temperature, ranging from 105 degrees F., to 108 degrees F., in a hog that staggers when it walks, is a pretty good indication of hog cholera. Such hogs should be segregated and not allowed to mingle with other hogs or to wander about, for they will spread the disease wherever they go, sometimes in places where it is impossible to disinfect. Hogs that die on the farm should be buried, or, preferably, burned, in order to prevent birds, insects and animals that visit the carcass from spreading the disease.



Hogs With Strong Constitutions Are More Able to Withstand Disease.

Usually the disease is most prevalent during the fall months and losses are invariably heavy in herds where owners neglect to immunize their hogs before the disease reaches them, or fail to call a veterinarian immediately on its first appearance.

MEDIUM STEERS PROFITABLE

De Kalb County (Ill.) Farmer Is of Opinion That Grade Stuff Is Superior.

The prime feeder steer, so often cited as the best beef-making machine, is sometimes a less profitable animal, according to a De Kalb county (Ill.) cattle feeder, than the steer of poorer quality. This man has had experience with both kinds and regularly feeds eight to ten carloads a year.

The prime steer undoubtedly will produce a somewhat better killer than the poorer quality animal, but it is his belief that the difference in price is less on the finished animals than it is on the feeders. The kind of steers he now buys it has been possible to purchase as feeders at about 1 cent less than the price of the best ones. When finished and put on the market these steers ordinarily have sold about half a cent lower than steers of the other quality. He figures that his cost of gain is about the same as that of the others. Thus there is an advantage of one-half cent a pound in feeding this second-grade stuff instead of the very best.

Time to Wean Pigs.

Pigs should not be weaned until they are at least eight weeks old, and if the sow is not to have a second litter, or if there is time enough in case she is, it is better to let the pigs suckle until they are from ten to twelve weeks old.

Keep Lambs Growing.

The lambs must be kept growing, and the breeding stock must be thrifty. Ewes in poor condition in the breeding season will usually bring single lambs and have a small milk flow.

PROTECTION FOR FARM MACHINERY

Many Valuable Implements Are Left in Shelter of Broad Skies All Year Around.

LIKE THROWING AWAY MONEY

Few Farmers Following This Practice Realize Great Loss They Sustain—Covering of Common Axle Grease Is Good.

How many farmers would leave $25, $50 and even $100 in bills out in the open during an entire winter? Sounds absurd, but scores of such bills, in their equivalent of farm implements are left in the shelter of the broad skies all the year. Few farmers who follow this practice do so with a realization of the great loss they are sustaining on the money invested.

A $100 machine left out of shelter over winter, means a loss of from $5 to $15. At this rate it is quite evident that a machine shed would be paid for in two or three years, even at present building costs.

Store Implements Properly.

A suitable shelter having been provided, it is now essential to store the implements properly. If the shed has a dirt floor, keep the machinery from resting directly on the ground. Place a board at least under all supporting parts. In order to prevent rust, thoroughly cover every polished surface, such as plowshares, mold boards, cultivator shovels, power knives and the like with common axle grease. All adjusting screws and nuts should be thoroughly oiled with ordinary machine oil. Every wheel hub and bearing, after a careful cleaning, should be packed with hard grease and replaced. Drills in which lime or fertilizer are used must be carefully cleaned, kerosene oil being liberally applied to all parts exposed to the fertilizer. Binder canvases should be hung up by wire to prevent damage from mice.

Poor Way to Treat Valuable Machinery

Liberal use of paint is the next step in keeping machinery in the best condition. Of course all parts must be freed from dirt and grease. Then paint the wood with a good grade of paint pigment mixed with linseed oil. All metal parts, except those greased, must be well covered with the best metal paint; this applies especially to steel parts.

Note Parts Needing Repairs.

When the cleaning, greasing and painting is being done, one can also make note of each broken or worn part that needs to be replaced. These can be secured during the winter, and when the spring and summer work calls for the various implements, they will be ready for duty. How much more satisfactory than to be compelled to sacrifice a day or more for repairing at a time when the machine is needed most! Any farmer who has followed the above suggestions will gladly affirm that dollars are thus saved on each and every implement. Try it and you will heartily agree.

BEES THRIVE ON SIRUP DIET

Every Colony Should Be Given Ten Pounds of Pure Material—Honey Is Not Favored.

"After the breeding season is over and there are no eggs or larvae in the hive, bees should be winter fed," says Francis Jager, chief of the division of bee culture at University farm. "Every colony should receive ten pounds of pure sugar sirup, no matter how much honey they have. Those that are light should be fed more. Bees do best on sirup in winter, because the best of honey contains pollen grains which fill the intestines of the bees in winter, causing dysentery if they eat too much or if the winter is too long. According to University farm experiments the proportion of winter mortality of sugar-fed and non-sugar-fed bees stands three to five in favor of sugar-fed bees."

RAT MOST DANGEROUS ENEMY

No Other Pest Inflicts So Much Damage Upon Humanity—Menace In City and on Farm.

No other animal or insect is so dangerous and persistent an enemy, or inflicts so much damage upon humanity, as the common brown or gray rat. He destroys and injures vast quantities of grain, destroys young chicks, fruits, vegetables and flowers. He causes enormous losses in warehouses and freight terminals, is a menace both in cities and farm districts.

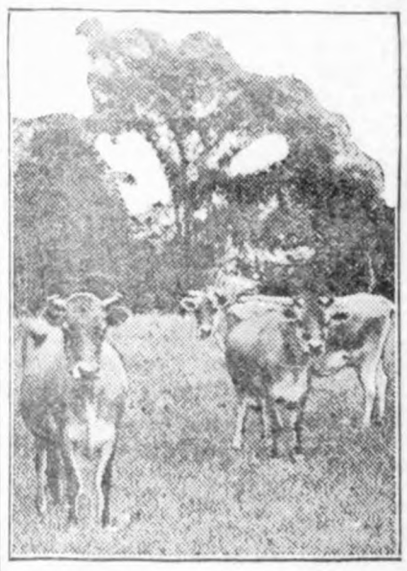
DAIRY COW IS LARGE FACTOR IN OKLAHOMA

Cream Stations, Creameries and Plants Tell Story.

On Account of Cattle Tick Such Development Was Formerly Impossible—Pest Eradicated From 43,255 Square Miles.

(Prepared by the United States Department of Agriculture.)

A recent map of Oklahoma indicating by marks of various shapes the location of cream stations, ice cream factories, creameries, pasteurizing plants, and combination plants, shows the dairy cow now as a big factor in the prosperity of the state. Formerly, on account of the cattle tick, such a development of dairying was impossible, but the antitick activities of the state and the United States Department of Agriculture for the past six or seven years have resulted in the eradication of the pest from 43,255 square miles, or about 90 per cent of the infested territory.



These Cows Are Healthy and Make Profitable Returns.

As a result of these strides in eradication the figures on dairy production show large totals, and in 1921 milk and butter were imported products. During that year 9,939,895 pounds of butter fat in the form of sour cream was produced, selling for a little more than $4,000,000, and 9,529,722 pounds of butter, valued at $3,240,000. More than 10,000,000 pounds of sweet milk was bought for making ice cream. Pasteurizing plants reported handling 62,261,983 pounds of milk. The figures are from reports received from 26 creameries, 44 ice cream plants, and 30 combination plants operating in Oklahoma or just outside its borders and buying from Oklahoma farmers.

FARMERS MUST AVOID WASTE

Increasing Price of Land, Feed and Labor Make It Advisable to Use All By-Products.

With the increasing price of land, feed, and the higher cost of labor, it is becoming necessary that the farmer eliminate, as far as possible, any waste. He must make use of all the by-products of his business much the same as the manufacturer does. Corn is produced in practically every section of the country, primarily for the grain, and frequently the stover is disregarded.

Properly cured stover is relished by live stock, but that which is left in the open during disagreeable weather is far from being palatable or nourishing. Stover protected from the time it is cut in the field is a valuable feed for young stock, idle horses, and cattle that are being carried over the winter on a cheap ration.

The best way to handle corn stover is by means of the shredder. This method makes it possible to get it in the barn before the feeding qualities have been injured by the weather. Enough room should always be reserved in the barn to accommodate a good supply of stover. Hay may be safely stacked out, but it is unsafe to try to stack shredded stover. Care must be taken to give the corn ample time to cure before it is shredded, for it may heat in the mow and become worthless through subsequent molding.

FEEDING PULLETS FOR EGGS

Overfat Fowl Is Not Satisfactory Layer and Will Eventually Become a Drone.

In feeding a lot of pullets heavily for egg production, should any individual become overfat and threaten to break down, it is a good plan to take her out of the general pen and feed her more lightly. In fact, it may be a good warning that you are feeding all of them too heavily and should slow up a little. Remember that an overfat pullet makes no better a layer than an overfat hen. She will become a drone in her class.

TO REDUCE FERTILIZER BILL

Much Money Can Be Saved on Farms Where Live Stock Is Kept by Caring for Manure.

On farms where there are live stock—and most farms should have live stock—it is possible to eliminate much of the fertilizer bill. For the manure from the animals, if taken care of, is rich in those elements which make plants grow and produce food for man and beast.

DAIRY POINTS

BUTTER RATED FOR QUALITY

Producers Lose Much Money Because of Imperfect Conditions and Methods in Making.

(Prepared by the United States Department of Agriculture.)

If you are a producer or manufacturer of butter, were you disappointed in the price you received for that last shipment? Quality is the chief factor in determining butter prices, and according to United States Department of Agriculture circular 236, just issued, even small defects in quality may result in the loss of a sale or a cut in price.

Several million dollars annually are lost to producers and manufacturers because of imperfect conditions and methods in production, manufacture and marketing of dairy products, the circular states. During 1920 the marginal difference in the prices of high and low quality butter amounted at times to as much as 15 cents between 37 score and 92 score. Lack of proper attention or care in the creamery in grading the cream, or in churning, working, salting or packing the butter are stated to be mainly responsible for this condition.

The circular enumerates and describes the various factors such as flavor, body, color, salt and package that influence price. These factors are given specific ratings by local and federal butter inspectors, and receivers, in determining the final score of the product, and the ratings are governed by the absence or presence of certain defects described in the circular.

It is stated that there has never before been a time in the history of American butter making when it paid so well to produce high-quality butter as during recent years. But to secure an active demand and the largest net return not only high quality and uniformity of the product are necessary, but a knowledge of market requirements and good marketing methods are required.

Taking Butter From Churn.

Circular 236, entitled "Defects in the Quality of Butter," has been prepared so that producers and manufacturers may know precisely how butter is rated for quality in the markets, and how the defects which lower the price may be obviated. Copies of the circular can be obtained free upon request to the United States Department of Agriculture, Washington, D. C.

Influence of Breed

The breed of a dairy cow has a distinct influence on the water content of her milk. For example, Jersey milk as an average contains 14.7 per cent total solids, of which 5.35 per cent is fat, while Holstein milk contains, on the average, 11.85 per cent total solids, of which 3.42 per cent is butterfat. In other words every 100 pounds of Jersey milk contains 85 pounds of water, while every 100 pounds of Holstein milk contains 88 pounds of water. The difference in feeding value amounts to 2.61 pounds of milk solids per 100 pounds of milk in favor of Jersey milk.

There's Money in Milking.

The greatness of the dairy industry is more appreciated now than for several years past. Dairying actually shows a gain during the past year of several hundred million dollars, while most of the other farm branches show losses into the billions.

Dairy Improvement.

Replacing the low producing cows with better ones and later with purebreds is only one of the ways in which a dairy improvement association helps a community.

Proper Feed for Calves.

After a calf is four weeks old it must have bulk in its ration, skim milk and grain will not nourish it properly. At this age the calves should have all the clover or alfalfa hay they want.

Weed Out Unprofitable Cows.

Even in the leading dairy states, probably one-fourth or more of the dairy cows fail to pay for their care and feed, due chiefly to the fact that the owners do not know which return a profit and which are "boarders."

Home Town Helps

ROCK MAPLE FIRST CHOICE

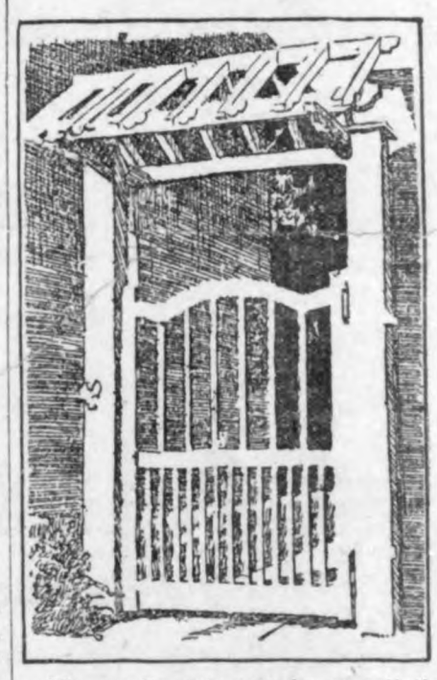
Good Reasons for Its Being the Favorite Tree for Streets of the Small Town.

Roughly speaking, trees are used for one of three purposes. The first, street planting, is that which is most apt to come within our ken. Frequently, especially in new towns and "developments," certain trees are to be planted along certain streets; and householders are asked to "do their bit" by purchasing and setting out trees to stand before their homes. The selection is generally made by a committee, often upon a slight knowledge of the subject, based, perhaps, upon other plantings which have been made elsewhere under their observation, perhaps not particularly successful plantings. The argument is that one must have something, and as there are not so very many kinds of trees one must stick to those one has seen, since anything out of the common probably will not grow. And so the decision is made.

This method of selection, perhaps, may account for the widespread planting of the rock maple in American small-town streets. The choice of this tree is one against which the tree lover should, and the tree knower will, protest. The rock maple is not particularly fast growing. It is awkward in its habit, and is brittle and frail. It is not as decorative as many of its sturdier brethren, and when so many better trees may be had at no greater trouble and expense, its popularity is difficult to understand.

For streets there is no tree superior to the Norway maple. With its symmetrical form and luxuriant foliage, which turns so beautiful in the fall, no other maple surpasses it. It grows with fair rapidity and it is sturdy and resistant.—Amelia Hill in Art and Decoration.

ARTISTIC GATE



The garden gate may be as artistic as a front door, even if gates are tucked away at the foot of the flower garden. The design from the Builders' Age offers many suggestions. It is, perhaps, better looking without the pergola effect if used for the small garden.

Apple Trees in Parkways.

In Flossmoor, Ill., apple trees were planted in the parkways when the subdivision was laid out years ago. The trees have been neglected both as to spraying and pruning, but they have grown well and are now bearing. When the suburb is built up the home owners will be able to take care of the trees and reap a harvest each year from their parkway space.

While the ornamental value of an apple tree in such a place may be open to debate, there is no question about its being superior to the Carolina poplars which most subdividers plant, and the apple trees ought to be a better selling point. They are good for 50 years, and begin to bear fruit just about the time the Carolina poplar is ready to cut down.—Chicago Daily News.

New Roofs for New Houses.

New ideas in roofs are being adopted everywhere. No longer do we see two or three types or roofs, to the exclusion of others. The Gothic, pointed and daring, with long sloping roof with its appearance of being thatched; the low dormer with its many mullioned windows; the roof with a touch of Moorish in its lines—these are only a few of the types seen in the new houses.

"Dail Eireann."

The meaning of "Feisire Dail Eireann" (or F. D. E.), commonly called "Dail Eireann"—according to a statement made in one of the new volumes of the Encyclopedia Britannica—is "Members of the Assembly of Ireland," a title given to themselves by members of the Irish republican party. With the signing of the Irish Free State treaty, however, republicanism has been dropped by a majority of the members. The pronunciation of "Dail Eireann" is "dahl eerahn."

"Scotty" Irving opened up his new restaurant in the Aug. Baack building last Saturday. He does not yet have all his fixtures that he intends to install, but he is able to give the public service.

Get your new suit cleaned and pressed before Thanksgiving. Maybe your overcoat needs it too, we do this work here in Klemme. Patronize your home town whenever you can. Wellemeyer's. adv

We are in receipt of a card from Clint Mann, asking us to send his Times to Grimes, Iowa. This would indicate that the family have moved to that place from Boone, Iowa, their former address.

If your Poultry is sick with Cholera, Roup, or any other disease get a bottle of "Poultry Kura;" use it and if not satisfied money will be refunded. E. S. D. Kahrs, Druggist. adv-2

Mrs. Fred Musfelt returned Friday from Clarion where she had been visiting for about a month at the home of her daughter, Mrs. Dewey Rice and at the homes of her sons Oscar and George.

We stated in last week's issue of the Times that Mrs. Phil Bock returned to Klemme that morning. We erred, in that she missed a Chicago train and did not arrive until Friday morning.

Quite a number from this vicinity went over to Garner Saturday to attend Armistice and Legion Day Celebration. The parade was good and they had a good football game but outside of that there was little going on.

Mrs. R. A. Jorgenson and son, "Buster," returned Sunday from a ten day's visit at Lincoln ,Nebraska, with her parents and other relatives and friends. "Jergie" drove to Belmond to meet them Sunday afternoon.

Miss Glenna Gruetzmacher came over from Britt last week to spend a few days at home here with her parents, Mr. and Mrs. F. Gruetzmacher. The Britt school was enjoying a few days vacation. She is attending the Britt high school as a Senior this year.

..R. W. Elder and family left here last Friday noon for a few day's visit with relatives and friends at Vernon Center and Mankato, Minnesota. They returned Monday and found the roads in bad condition and they had to pull in mud most of the way to Klemme.

The diphtheria has evidently run its course in Klemme and vicinity as there have been no new cases now for about three weeks. Only a couple of cases are under quarantine but these are expected to be released in a few days and then the epidemic will b a thing of the past.

Mr. and Mrs. Will Kirkwood returned from their Minnesota trip Monday. They dove up to the vicinity of Milaca where Bill owns a farm. All was rosy going up, but not so much so coming back as the roads were very bad and their Universal Kar battled on until within a few miles of Klemme when the mud got too thick. We hear that Bill then drove the rest of the way—behind two old Dobbins.

STILLE'S IMPLEMENT NEWS

VOLUME 1. Thursday, November 16. 1922 NUMBE

Look ahead, you have eyes in the front of your head for that purpose.

Buscuits and Buscuits

All refiners make Motor Oil, just as all cooks make biscuits, yet there is as much difference in Motor Oil as there is between the delicious, light, flaky biscuits Mother makes and the heavy, soggy apologies for biscuits some restaurants serve. In each case the raw materials are practically the same, but the "making" is different. Yet, all motor oils are made from crude petroleum. just as the same ingredients go into biscuits. En-ar-co Motor Oil is refined with such painstaking care and such scientific accuracy that it is considered everywhere the best to be had. The use of En-ar-o Motor Ol will keep your engine remarkably free from engine trouble, repair costs and other similar annoyances. It will make your motor run sweetly and prolong the motor's life.

If you need a new windmill head we have one in stock yet . Better have it put on your tower for this winter's use. We'll sell this one at the same old price, but it will cost us more to replace it. This one is a Sampson Hyatt Roller Bearing. the easiest running, longest lifed, quiet-est mill made. But if you figure on pumping with an engine get an International, with the enclosed crank case and removable cylinder lining. They sure run smooth.

What's the matter with the world? Just the faults of you and me.

We have one little matter to touch upon this week that is quite familiar to some of you. We would like to speak to you right from the heart, or rather very heartily, in other words "by hand." Of course it does not concern you personally but you know there are some others personally interested. Now you know this matter is but a trifle, yet it means a lot—a lot of littles makes a big—In plain words, it's this: If you bought it before November 1st, it's due. Will you please give it prompt attention? If we didn't need it, you know, we wouldn't bother ourselves to run a business. or rather, your credit is good, but our's is not, so we need the money. Call again.

If it's a feed grinedr you're looking for, and want one that will grind small grain and ear corn equally well, come in and get it. We will let any responsible person take one of our grinders out—if he is interested in a good grinder—and if he doesn't think its the money can buy he may return without cost. We are that sure will give satisfaction. Ask those are using them, that's the best vertisement.

Linseed oil, raw or boiled. a gallon.

If you're interested in a wash machine, either electric or power hand, come in and select one. W order it now so it comes in time Xmas. You'd be surprised how reonable we can get you one.

Or if you want a real coaster on for the boys, get a Kelly-Kar.

Funny, how a man will drop in a theatre to see what's on, and th spend most of his time observi what's off!!

In the last two years farmers ha been spending 2% of all the mon they take in for machinery, inclu ing tractors. If it only takes 2% your gross income for machinery y can afford to buy the best.

And by the way. you have just little time left to buy a new narro track bob-sled, don't wait too lon

PHTHERIA EPIDEMIC A THING OF THE PAST IN KLEMME

EW CASES IN KLEMME FOR OVER FOUR WEEKS

Quarantine Tag Was Removed Monday Morning

best news that we have re- for many a day is now our dge to report in this week's of the Times. The diphtheria ic here is now a thing of the nd there is cause for much re- with the passing of the dread ease.

now four weeks ago last Mon- nce the last case of diphtheria uarantined, almost five weeks nce we have had a case here emme. The last quarantine as removed Monday morning. re are still many towns in the where the epidemic still ex- s the diphtheria epidemic was ally state-wide.

epidemic meant a great loss business men of Klemme as seemd afraid to come here de, although they hkad no for alarm as at no time was idemic considered to be seri- s compared with other places. ple can again feel free to come emme to do their trading as is positively no diphtheria in e now and we are also a city rom other diseases.

h the epidemic safely over the g business should pick up now oom. Everybody is happy in ntire community and Klemme ave one great thing to be thank r on "turkey day" and that is OE DIPHTHERIA HERE!

AUTO LICENCES WILL CARRY SIX FIGURES

re will be six figures on Iowa license plates for the year 1923. figures will start with number thus: "000001." The figures be orange in color, and they be on a background of black. will be easily distinguished 1922 plates.

e new plates are said to be hand and durable, and promise to be plates than were used in the of 1922. The counties will be ered the same as this year.

e new auto plates will be ready istribution by the County Treas- on or after December 1st.

MPT TO ROB FARMER BALKED

ell Man Drives Off One Robber With Pitchfork; Horses Run Away

ODELL, Nov. 21.—A pitchfork ed with considerable dexterity rted an attempted holdup on a n mile east of here at 6 o'clock night when Henry Christensen eturning to his home in a hay-

e growling of his dog warned of the approach of a man from a clump of trees on one side road. The stranger ignored the ion: "Who are you?" and pro- d to climb on the wagon. At me time another man approach m the other side of the road rabbed the horses by their bits. a sudden Chistensen's instinct lf preservation was aroused and ok a long swing at the man ing on the wagon. It landed and the man dropped off be- the rack. The noise frightened rses and they broke away from n at their heads. The attempt- ldup turned into a runaway and a mile before the farmer could the horses to a stop.

icials wre notified and scoured eighborhood, but without re- Two strangers who were pick- a train by the train crew yes- y are suspected.

IN KNEE PANTS ENTERS COE COLLEGE

EDAR RAPIDS. Nov. 23—Col- students usually are thought of earing long pants, but Coe has th in knee trousers—bona fide trousers, too, and not the golf y. Wayland Osborn, a fresh- coming from Walker, Ia., high l, is the boy. He was 16 when tered Coe. His early entrance college was made possible by kipping from th fifth to the h grade.

NEWS NUBBINS

"The time has come," the Walrus said, "to talk of many things—of shoes and ships and sealing wax; of cabbages and kings."

Kossuth County farmers are organizing a protective association against chicken thieves. They are perfecting their organization by townships and each township is asked to put $25 into a county fund when joining the association. Rewards will be paid for catching the thieves and such other means as will prove effective will no doubt also be taken. It is time that statewide action was taken to catch chicken thieves. They have always been quite numerous.

By a new ruling of the postoffice department it is now possible for the sender of a letter to recover it any time before it is actually delivered, provided he can furnish the postal authorities ample proof that he sent the letter. The rule even permits post masters to telegraph postal clerks to fish letters from mail bag in the course of delivery and have them returned to the place where they are postmarked.

The only way for a small town to hold its own is to get out and fight for its trade and the only way to make a paying fight is to use lots of printers' ink. Do your sare in keeping the trade at home and not leave it to a few to stand the entire expense. There is not a single firm in Klemme but what can increase its business by alvetrising; but by reading the Times each week you will find a few whose names are "conspicuous by their absence." Do your share in bringing trade to this town. Do not be a sponge and absorb business that the advertiser is bringing to town.

The business men and citizens of Garner are interesting themselves in a big Dairy Day which they have planned to take place December 7th. The day will be held as a part of the program of the district buttermakers meeting, who have selectel the county seat town as their next place of meting. The buttermakers will have dairy experts on hand to give speeches and suggest new ideas in buttermaking and dairying.

Christmas is just twenty-five shopping days away. Have you stopped to realize it? That means that the merchants are busy getting their merchandise for the holiday display. It has long been admitted by merchants that the shopping public try to crowd the buying season into a few short weeks, and that the holiday buying season should be lengthened. I everybody would begin to look about them for gift selections about Thanksgiving time, then the frantic buying of the last two or three weeks would be greatly eliminated, and Christmas would be a time of comfort and ease, coupled with a certainty that the selection of every gift would be a token of Love, instead of merely a parcel of "something or the other." There is a great deal more of pleasure in making your selections leisurely and with plenty of time to think of your purchase, therefore, when you are in town let your thoughts turn to the Holidays, soon here. The merchants will appreciate early buying.

Under the Wilsonian "New Freedom" we reached a point where the government continually had its hand in every man's pocket and its nose in every man's business and so long as that situation continues the 'outs' will continue to have a tremendous advantage over the 'ins' in every general election.

Industrial conditions are steadily improving, and a labor shortage is beginning to develop, according to a review of business, industry and all general economic conditions from the point of view of organized labor, made public in New York by the Labor Bureau, Inc., economic adviser to leading national labor unions in this country. The review which will be issued monthly to keep labor unions advised of the trend of economic conditions, declared that as a result of the improved industrial situation the "bargaining power of labor is increased and wages in more occupations have begun to move up."

THANKSGIVING

Turkey in the oven,
Biggest bird we've got;
Pies and cake a baking,
Kitchen piping hot.

Everybody hungry,
Children wild as hares;
Mother very happy—
Angel unawares.

Dinner on the table—
Naught to do but eat;
Father asks the blessing,
Rising to his feet.

Boys have both the drumsticks,
Girls the wings and breast;
Baby takes the wish bone;
Older folks the rest.

All the family happy,
Crackin nuts and jokes;
May says—"Pass the candy."
Dad hands out the smokes.

Mother starts the singing,
Quaver in her voice—
"Praise God for his mercies,
Let us all rejoice."

SOME NEW FEATURES ADDED TO THE TIMES THIS WEEK

A New Story Starts In This Issue; Other New Features

Since becoming publisher and owner of The Klemme Times a little over five years ago, we have always had one thought in view—that of giving the people of Klemme and vicinity a better weekly newspaper. And, with that idea in view at all times, we have spent a great deal of time and a large sum of money in an endeavor to reach our goal.

First we made a great many changes in the mechanical part of the printing equipment, such as installing a new and larger printing press, a large, new variety of type of all description and junking all old out of date type, also we added many other conveniences about the shpo, and perhaps our biggest and best investment was when we installed the big Linotype machine a little over a year ago—that put the shop on a basis with the best printing plants in this part of the country and enabled us to handle more and larger printing orders. So much for the equipment part of the business.

Our next point in view was to put out a live, interesting paper, and we believe we have succeeded in that as our subscription list has tripled in the past three or four years about what is was when we took over the paper. The increase must be due to the fact that the people like The Klemme Times.

To make the paper of still more interest to our readers we have decided to run one full page of interesting serial story each week, beginning with this week and we will continue to run a story throughout the year, and will start a new story as each one ends. For our first continued story we have selected an interesting story by Opie Read, entitled "Periwinkle House. It is a gool clean story and will be enjoyed by the whole family. It will appear in the Times each week and will be completed in about six installments. As soon as this story is completed we will run another good story. The stories we will run the coming year if bought by our readers in book form would cost from $1.50 to $2.00 a volume, so you see you will get more than your money's worth in a year's subscription to the Times in these stories, as at that rate you will be getting about $10 worth of stories for a $1.50, or a year's subscription, besides all the other regular news features.

Another feature we are beginning this week is a column of jokes under the title "Kickin' the Dorg Around," and a column of general news and views under the heading "News Nubbins." These will also appear each week as features.

Begin the story now and read each installment of "Periwinkle House," then hand the paper to a friend you think ought to be a Times reader each week.

And remeber we appreciate having you send in news of company you may have, or anything of interest in your neighborhood. Our telephone is No. 12, use it please.

—The Publisher.

In a sanctimonious statement on the election result Wm. J. McAdoo in imitation of father-in-law's best style, declared that the Republicans in the recent campaign failed to make the "moral and spiritual appeal" offered by the Democrats. Maybe our best known railroad wrecker was thinking of New Jersey, New York and a few other damp spots and meant "spirituous."

Are you preparing your Christmas Greetings to your friends? Don't put it off until the last minute and rush it thru. Select a beautiful card from our line of Christmas Cards now so they can be completed before the Christmas rush. You will be assured of more careful printing and will have the cards ready for early mailing. Satisfaction is guaranteed at the Times Print Shop.

Famous Battleship Iowa To Be Used For Target

DES MOINES, Nov. 21—The old battleship Iowa, once the pride of the navy, but now outdated by the swift progress of naval armament, will go down before the guns of the newer ships of the Pacific and Atlantic fleets at target practice near Panama this winter, according to advices from the navy department received by Lieutenant J. W. Gregory in charge of the naval recruiting service here. The old Iowa will be towed to Panama and used for a target.

The ship was fitted up a few years ago as a radio experiment ship, according to Lieutenant Gregory. She is controlled entirely by radio, no crew being aboard, and her fires, engines, pumps, and steering gear being controlled by a ship at a distance. At Panama she will be taken out to sea where a search will be made for her by the fleet with destroyers and aircraft. When found she will be attacked and sunk. When in active service the old Iowa had four 12 inch guns mounted in two turrets. These have been removed, according to Lieutenant Gregory, with the rest of her armament, and she is now covered with a network of radio antennae.

TWO KLEMME BOYS IN GARNER DECLAMATORY CONTEST

They Are Survivals of the Elimination Held Friday

GARNER, Nov. 22.—The declamatory elimination contest held all of Friday afternoon and evening developed excellent results and a program of merit. The lineup for the contest proper consists of five seniors, one junior, one sophomore and five fresh men.

Fred Arnold, a young man from Klemme who is attending the Garner high school this year will appear in the oratorical class at the contest.

Adolph Lauritzen, also another student from Klemme won a position in the dramatic class.

This contest will be held either Wednesday or Friday of Thanksgiving week. The winners in this contest will represent the Garner school in the county declamatory contest.

Citizens of the Philipines would be required to pay on annual salaries ranging from $300 upward a graduated income tax by the terms of a bill introduced in the Phillipine Senate. Persons receiving $300 a year would be taxed one-half of 1 percent, according to the bill, and those who earn more than $9,000 would pay 10 percent. Differences between Governor Gneral Wood and leaders of the Phillipine legislature concerning bills prepared by members of the cabinet have been compromised.

A SQUIRREL-TAIL ROPE

A rope 19 feet long, made of 2,000 ground squirrel tails, was recently shipped to the Bureau of Biological Survey of the United States Department of Agriculture. It was made by the Blackfoot Indians who live near Browning, Montana. Fifteen hundred of the pests were killed by the Indians during the spring and summer.

BONUS PAYMENTS START JANUARY 1st

Payments of adjusted compensation to Iowa soldiers, approved by the voters of Iowa, are expected to begin shortly after Jan. 1.

The state printing board already has bids for the printing of the bonds, and plans for their sale, thru which the bonus money is to be raised as soon as they are delivered, have been made by the state treasurer's office. Printing of the $22,000,000 of bonds will require from six weeks to two months time, it is calculated.

The bonus payments are to be administered without cost, except clerk hire, by the adjutant general, state auditor, state treasurer and state adjutant of the American Legion.

Maximum Set at $350.

The act provides compensation for Iowa service men and women at the rate of 50 cents a day with a maximum of $350 to any one person, and a disability fund of $2,000,000 out of the $22,000,000 authorized for the benefit of the former service men and women. The bonds will be retired by a tax levy estimated to be one mill per year for twenty years.

REASONS FOR GIVING THANKS

As a Nation, the American People Has Ample Cause for Rejoicing at This Period.

It is three hundred years since Thanksgiving day was first celebrated on the American continent. The Pilgrim band, though they had lost half their numbers during the first winter at Plymouth, and tho they were beset by hardships and by the fear of their savage neighbors, found in the survival of the little colony and in the hope of a gradually ameliorating lot just cause for thanksgiving to God. Have we, who inherited the institutions and the spiritual ideals that they labored to establish, less reason than they to be thankful?

Like the other nations of the world the United States has reached a great social and political crisis. We have passed through a great war, and we begin to feel the burden of debt and disaster that the war laid upon mankind. Our trade is disarranged; neither financially nor economically are we so prosperous as we were wont to be. We are a little afraid of the future, for we have been shaken out of the easy and comfortable confidence in our own efficiency in which we have been used to live.

But great material prosperity is not always a matter for thanksgiving. It sometimes softens and dissipates the strength and virtue of a nation. Perhaps nations like men should echo the prayer of Agur: "Give me neither poverty nor riches." We have enough and, like the Pilgrims, we can reasonably hope for an increasing store of comforts in the coming years. Is there not ample cause for thanksgiving in the fact that, altho the nation has been tried by adversity and loss and assailed by doubt and misgivings, it shows no signs of losing its heart or its head? The gospel of hard work and cheerful courage still counts most Americans as its adherents. We are working our way out of the depression that the war has caused.

We do not thank God because our way is the way of fatness and of peace, but because, in the time of testing and trial, our people are able to quit themselves like men.

—Youths Companion.

TWO HUSBANDS TOO MANY

In Algona a woman recently got a divorce from her husband, and in a short time took another. However, when the chill winds of autumn began to blow, husband No. 1 hastened home to his domicile, and put on the skids under husband No. 2. That is, he chased him out of the house with a butcher knife and took over the duties of husband to his erring spouse, and she efidently made no violent objection.

In the mean time, husband No. 2 is wandering disconsolately about, wondering where he is to spend those long winter evenings, and pondering on the uncertainty of life in general.

—Humboldt Republican.

SCHOOL NOTES

Adela Schroeder, Editor-in-chief.
Mabel Schaefer, Clarence Elder
Associate Editors

The Question This Week

To flunk, or not to flunk? This is the question before the Klemme students this week, for this is the end of the second six week's period and with it comes the examinations. A great many students are burning the midnight oil in order not to flunk. Some of the students are working in order to be exempt from the half yearly tests. In order to get out of writing these tests the student must have a grade of ninety in both the subject he is to be exempt from and in deportment. An honor roll will probably be prepared for the six weeks also.

Last week the high school elected school editors to write the school news for the rest of this semester. Clarence Elder was elected from the Junior class and Adela Schroeder from the Sophomores. Fred Albers was chosen by the Freshmen to represent their class, but he declined the honor and another ballot had to be cast. Mabel Schaeffer was chosen on this ballot. Adela Schroeder was chosen Editor-in-Chief.

The Juniors seem to be very much worried about their coming examinations in American History. For the last week Miss McKahan has been showered with questions something like this: "Will we have to know the dates of the Revolutionary War?" "Do we have to know when Patrick Henry was born?" "What did Henry Clay's great grandmother die of?" "What did Columbus discover America for?" "Will we have anything in examination about the French and Indian War?" "Do we have to know all our outlines by heart?" "Will you ask us this date?" Miss McKahan always has a few very enlightening answers for these questions. "I don't know," "Isn't it in the book?" "I'm sorry, but I can't tell you." These bright and industrious Juniors take Miss McKahan for a walking dictionary, encyclopedia, and a ten volume American History combined. She appreciates people to ask her questions but we are inclined to think the Juniors ask too many.

Absences in the school have become fewer in the last week. Keep up the good work! Most of the boys who have been picking corn picking corn are again back among our ranks. When all the students are present it makes school work much more interesting and the class can advance faster.

Singing has again been resumed in the High School and Graamar rooms under the able leadership of Miss Smith.

Henry Brandt has returned to school after several weeks absence.

The Freshmen have been studying the Solar System, which has proven to be very interesting.

Grammar Room

The seventh grade are making books of South America. They are making maps, writing stories about the products, resources, and animals of the country. Later they will bind these under covers which they will make themselves.

The seventh and eighth grades are staging a "Good English" contest. Sides were chosen and all mistakes noted are marked against the opposing side. It will continue until Christmas time when the losing side entertains the winners. The object is to correct poor and careless habits of speaking.

Intermediate Room

John Francis entered the fifth grade last week.

CAMP FIRE GIRLS

The Camp Fire Girls held their regular meeting at the home of our Guardian, Mrs. Wiles, on Thursday evening of last week.

Mrs. Stille. the Assistant Guardian, and nearly all of the members were present.

Our flag, which we ordered at our last meeting was received.

The Secretary, Marie Blank, has received the record book. Each girl has a page and we are striving hard to kep a crditable record.

The membership rings and manuals came. All feel that we are now full fledged members and we are beginning to work for ou rhonors.

All were very glad to welcome our Treasurer, Adela Schroeder, back again. She has been absent from our meetings for several times on account of sickness.

(Editor's Note: The Camp Fire Girls is a new organization in Klemme; it is for the girls what the Boy Scouts is for the boys. We are glad to publish any items the Camp Fire Girls may give us and hope to make this news a regular department.)

North Avery Progressive Club
November Meeting

The members of the North Avery Progressive Club enjoyed their monthly meeting at the home of Mr. and Mrs. D. A. Marshall, Friday evening. November 17th. Despite the pattering rain and splashing mud, he attendance was large.

The usual business was disposed of. Wm. Johnson's family was voted in as new members of the club.

The ladies contemplated taking the sewing course offered by the extension department at Ames.

A good program had been arranged of music and reading, also an interesting paper on "Diphtheria and how Antitoxine is manufactured" was read by Miss Griggs. The program was followed by a delicious lunch and the balance of the evening was spent in a real social time. No one regreted having braved the stormy weather after having spent so enjoyable an evening.

The next meeting will be held at the home of Mr. T. Nelson, December 8th.

Resolutions of Respect to Clarence A. Arnold
From North Avery Progressive Club

Whereas, the great and Supreme Ruler of the universe has in his infinite wisdom removed from among us. one of our worthy and esteemed members, Clarence A. Arnold,

Whereas, the intimate relation held with him in the faithful discharge of his duties in this society makes t befitting that we record our appreciation of him.

Be it resolved, that the wisdom and ability which he has exercised in the aid of our organization, by service and counsel, will be held in grateful remembrance.

Be it further resolved, that the sudden removal of such a life rom among us leaves a vacancy and shadow that will be deeply realized by all the members and friends of this organization, and will prove a serious loss to this community and the public.

Be it further resolved, that with deep sympathy with the bereaved relatives of the deceased, we express our hope that even so great a loss to us may be overruled for good by Him who doeth all things well.

Be it further resolved that a copy of these resolutions be spread upon the records of this organization, a copy be printed in the local paper. and a copy forwarded to Mrs. Arnold.

—Signed:
T. C. Nelson, Jr.
W. L. Sherwood.
J. J. Cook.

AVERY TOWNSHIP

Quite a number in this vicinity finished picking corn last week.

The Win One Class of the English M. E. Church held its meeting Nov. 10th at the home of Miss Myrtle Bell. After the business meeting was held games were played. Then last of all refreshments were served, consisting of sandwiches, cake, coffee and apples. All present report a good time, and are looking forward to the next meeting.

The Community Club hell its meeting at the D. A. Marshall home Friday night, November 17th. All present report a good time.

Russell Bell was absent from high school Wednesday and Friday on account of corn picking.

Mr. and Mrs. Robert Roths were Goodell callers last Thursday evening.

Prominent People

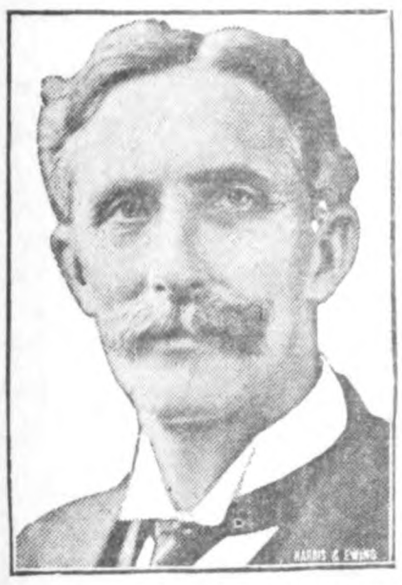
Bonar Law, Britain's Prime Minister

Andrew Bonar Law (portrait herewith) who has succeeded David Lloyd George as premier of Great Britain, divides the attention of English-speaking peoples with his predecessor. Incidentally Law is the first Canadian-born premier; he was born in 1858 in New Brunswick. He was at one time an "iron merchant" in Glasgow.

Law is an excellent parliamentarian. He plays the game keenly, but according to the rules of it. As a Scot, he clips his words, clean and short, and has the somewhat perilous habit in these days of depending, as far as he dare, on memory alone for his speeches. On the whole, for a speaker without notes, his indiscretions have been curiously few.

During the war he suffered several terrible bereavements and worked himself almost to death, whence arose blood pressure, so sudden that it was assumed, for the moment, that he had been more seriously stricken. Amid universal sympathy he resigned, and while there was nothing diplomatic about the doctors' orders, nor any suggestion that Bonar Law was playing other than a straightforward part, the fact remains that had he continued in the cabinet he could not have taken the independent line which he did take at the Carlton club and would not have been, as he is today, prime minister.

"Reducing Whole World to Bankruptcy"



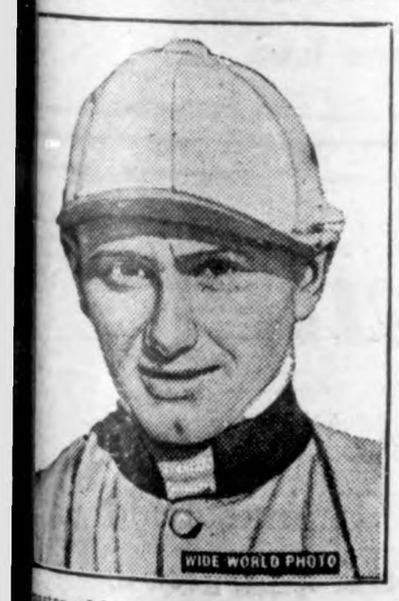
Insistence by the people of all nations that statesmen change their political and economic policies is the only means of averting an approaching world catastrophe, Sir George Paish, English economist and former adviser to the British treasury said in an address to the thirteenth annual convention of the American Manufacturers' Export association.

"The statesmen of all nations," he declared, "are engaged in a common effort to prevent the nations from meeting their obligations to each other and thus reducing the whole world to bankruptcy. Already the policy of the statesmen of Europe is fast bringing the strongest nations to ruin and before long the statesmen of the other nations, if permitted to do so, will bring their countries into a similar condition.

"It is therefore of the greatest possible moment that the business men and peoples of all nations should seek to understand and to realize the disastrous consequences that must ensue from the present policies of those responsible for national and international affairs and should insist upon such changes of policy that will avert the catastrophe towards which the entire world is now moving, with ever increasing rapidity."

Sir George charged that the United States was contributing to the general economic chaos by its new tariff law and by refusing to accept payment for obligations in any medium except gold. He declared that he was not criticizing the United States which, he said, had done during the war "and until recently" everything the civilized nations could expect of her.

Sande, Crack American Jockey of 1922

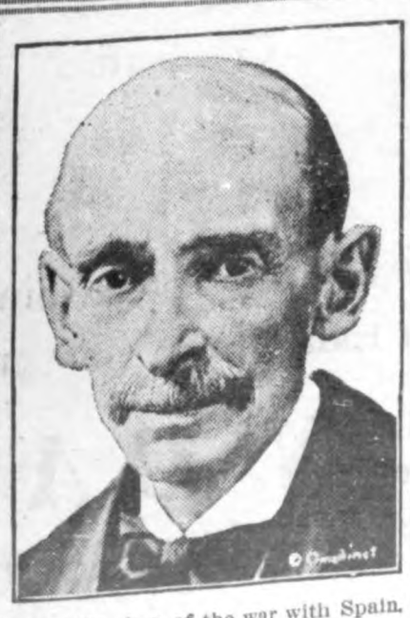


You may look in vain for Earl Sande in "Who's Who," but his name is a household word among racing enthusiasts the country over. Also he makes more money in a year than most of those who are listed. It's the old story of the man who can do one particular thing superlatively well. Probably common consent among American race goers will put Sande at the head of the jockeys for the 1922 season.

Sande rides for the powerful Rancocas stable; so he has good horses to ride. And "good horses make good riders"—which is a turf adage as old as racing. But Sande has so often brought a poor horse home in front of better ones that he stands out as the jockey of the year—and perhaps of his time in this country.

Sande is a master in the saddle. From the time he is lifted to the saddle until the race is over Sande is master of his mount and it is a long day since there was another such rider that so closely studies his horse. At the barrier, no matter how fractious his mount may be, he is usually straight and he is invariably off in the first flight. He is a pastmaster in judging pace and he knows how and when to use the whip. And when it comes to the finish no rider in many a day has used the same skill and energy.

Day Resigns to Be War Claims Umpire

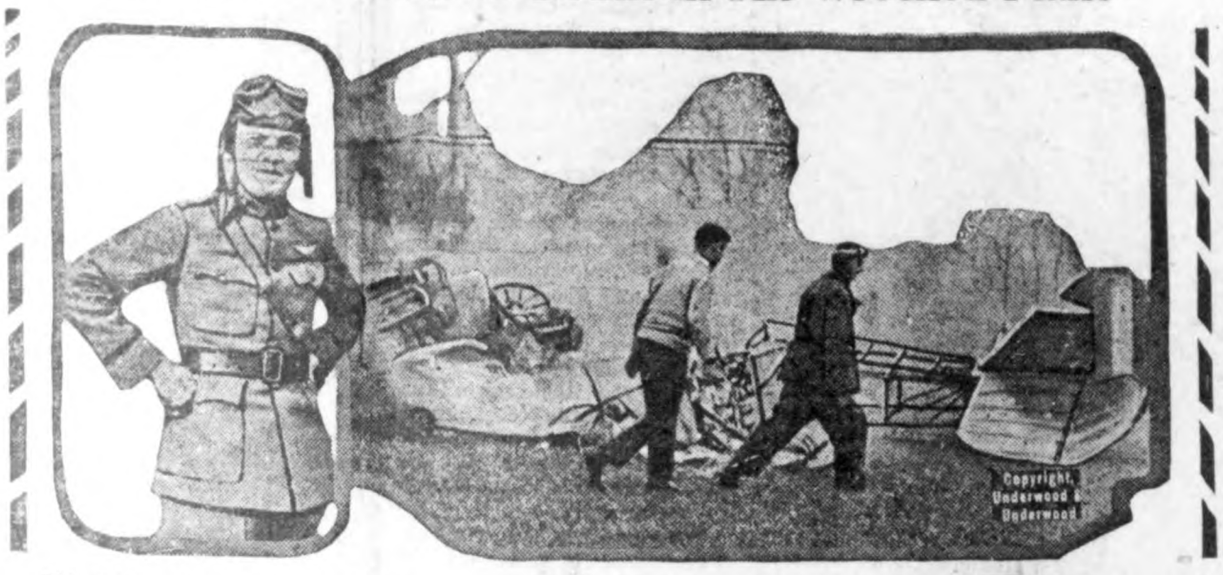


Here is an up-to-date portrait of William Rufus Day who has resigned his position as associate justice of the United States Supreme court to be able to devote his entire time to his duties as umpire on the American-German war claims commission. His action will have the effect of placing him upon the retired list of the court on full pay.

Associate Justice Day was born in Ohio in 1849, the son of a chief justice of that state. He is a University of Michigan graduate and received the degree of LL. D. from that institution and the college of the city of New York. He was introduced to national life by President McKinley, who brought him to Washington in 1897 as assistant secretary of state. He soon succeeded to the post of secretary of state, serving between John Sherman and John Hay, but in a few months resigned to become chairman of the American peace commission at Paris at the close of the war with Spain. He was appointed to the Supreme court by President Roosevelt in 1903.

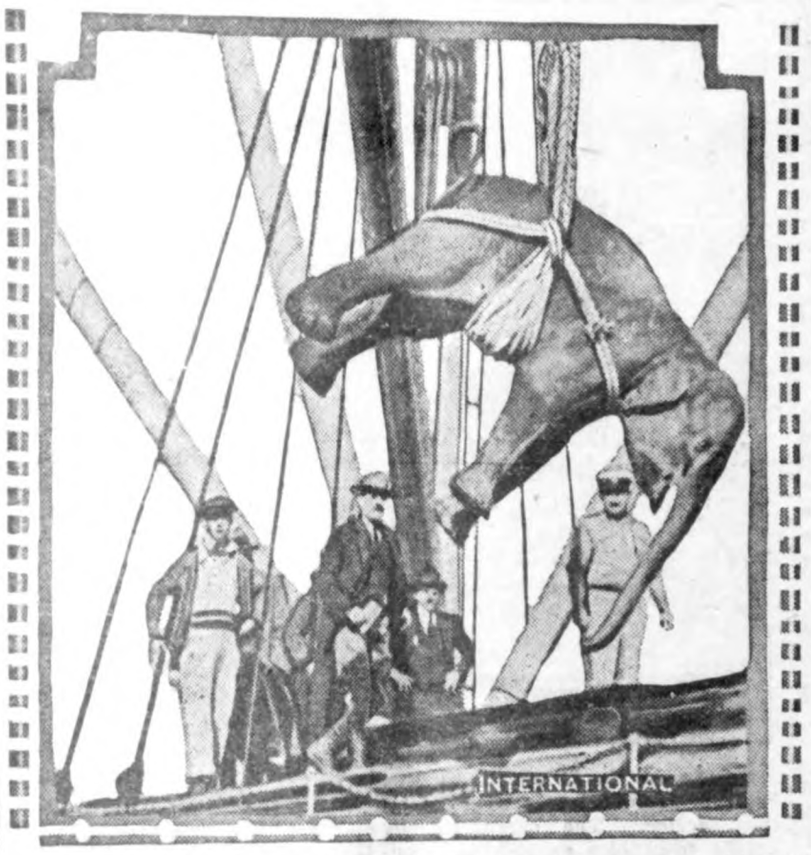
His work on the war claims commission is important, hundreds of millions of dollars being involved. In case of disagreement between the commissioners, he will have the final word.

Aviator Is Burned to Death in His Wrecked Plane



This photograph was taken a few seconds after Lieut. John Blaney, contestant in the aviation races at Hartford, Conn., had struck a tree, crashed to the ground and perished in his burning plane. At the left is a photograph of Blaney made just before he "hopped off" in the race.

No Joke for This Little Elephant



It may be funny to some people but it's not funny for me, quoth this baby elephant being derricked out of the ship that carried it and lots of other animals to Los Angeles. The shipload of animals was collected by Frank H. Buck, noted trainer.

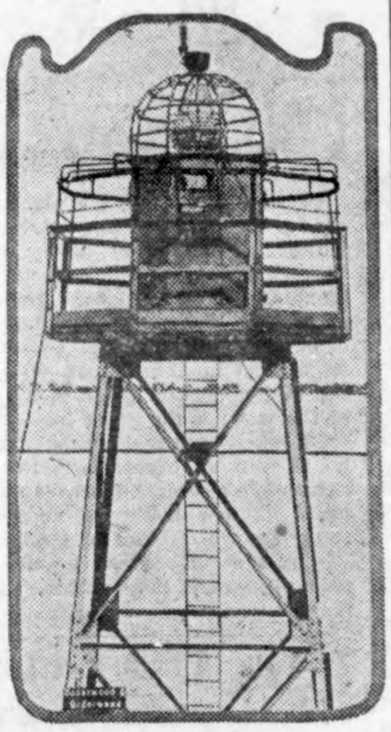
Twins to Enter Society Soon

Elizabeth and Katherine Woods, beautiful twin daughters of Representative and Mrs. James P. Woods of Virginia, who will be presented to Washington society this winter.

President at Unknown Hero's Tomb

President Harding laying a wreath on the tomb of the Unknown American Soldier at Arlington cemetery. Detachments of sailors, marines and regulars took part in the ceremony.

GUIDES NIGHT FLYERS



Have you ever heard of an aerial lighthouse? It is really something new that the United States navy has built at the naval air station at Hampton Roads, Virginia, to guide pilots of airplanes at night. The light is visible at an altitude of six miles above the station. By day the platform is used as a lookout station during flying operations.

RECTOR HALL'S WIDOW

This photograph of Mrs. Frances Stevens Hall, widow of the rector of New Brunswick, N. J., who was killed with Mrs. Eleanor Mills, was made while she was giving her first interview to newspaper men.

HAS GEM IN HER TUMMY

Elizabeth Walsh of East Syracuse, N. Y., had an operation about two years ago in which her tonsils and adenoids were removed. The surgeon soon discovered a diamond had been lost from the setting of his ring. A short time ago Elizabeth had a severe pain in her side. She was taken to the same hospital and X-rayed. The doctor's diamond was discovered. He will get it back again as another operation will be necessary to relieve the little girl of the pain which is caused by the diamond shown by the X-ray as having taken up an abiding place near the appendix.

POULTRY

ROUP IS DANGEROUS DISEASE

Delicate Fowls Have Very Severe Attacks and Recover Slowly—Isolate Sick Birds.

(Prepared by the United States Department of Agriculture.)

One of the worse results of the wet and inclement weather of fall and early winter is the disease of chickens commonly called roup. It resembles the more malignant forms of influenza in larger animals and in man, attacking principally the membranes lining the eye, the sacks below the eye, the nostrils, the larynx and the trachea. It is attended with high fever and is very contagious, but the nature of the germ is not yet known. However, it is known that contagion is brought into the poultry yard by infected birds. Outbreaks of roup in the fall occur most commonly where the growing chickens are overcrowded in the coop or where the coops are not waterproof or are poorly ventitlated. Sometimes these are birds purchased from other flocks, and sometimes they are birds from the nome flock which have been on exhibition and exposed to contagion. Again, they are wild birds or pigeons which fly from one poultry yard to another.

Delicate birds have very severe attacks and recover slowly, as pointed out in Farmers' Bulletin 957, published by the United States Department of Agriculture. Often a chronic condition persists for a long time and birds so affected give and spread the disease for a year or more, becoming a starting point for many new outbreaks.

At first symptoms are similar to an ordinary cold, but there is more fever, dullness and prostration. The eyelids are swollen and held closed most of the time. The birds sneeze and shake their heads in their efforts to free the air passages. Sometimes the eyes are entirely closed and birds are prevented from finding food. This, of course, results in rapid loss of strength, and many of the birds die within a week

Comfortable, Roomy Winter Lodgings for the Hens Means Plenty of Eggs.

or ten days. Some of the affected ones recover and others continue weak and have a chronic form of disease for months.

The best treatment is to place sick birds in a warm, dry, well-ventilated room free from drafts, and away from the rest of the flock. An antiseptic and healing mixture should be applied to the affected membranes. Lacking a spraying apparatus, a small syringe and oil can, or even a medicine dropper, may answer the purpose, or the bird's head may be plunged into a basin of the mixture and held there for a few seconds. The most suitable remedies are: Equal parts of hydrogen peroxide and water; boric acid, 1 ounce, water, 1 quart; or permanganate of potash, 1 dram, water 1 pint.

WINTER SHELTER FOR GEESE

Shed Open on South Side With Plenty of Straw or Shavings Is Most Satisfactory.

Except in stormy weather or in the winter mature geese seldom need a house. A shed open on the south side, a poultry house, or a barn usually is provided by breeders in the North, and is used by some breeders in the South, says the United States Department of Agriculture. Coops, barrels, or some other dry shelter should be provided for the young goslings. But wherever they are the geese should have a clean place, with plenty of straw or shavings for the floor during the winter.

KEEP POULTRY FROM CATTLE

Unless Herd Has Been Found Free From Tuberculosis Fowls Should Be Separated.

Poultry kept on dairy or general live stock farms should not be allowed to run with cattle unless the herd has been tested and found free from tuberculosis. Poultrykeepers are beginning to realize that if they are to buy healthy birds they must get them from places where the live stock is known to be free from tuberculosis.

News of the Wandering Jews

McPhearson, Kansas,
Nov. 19, 1922.

Friend Jergie:

We got this far today. We spent one day at Des Moines for the roads were too bad, so we had to go by the way of Omaha. There to Lincoln and Fairmont. Then we took the Meridian Highway south, which is pretty good so far.

We got another truck with us now. There are three peopl in the other truck, one newly married couple on their honey moon trip, and one single chap is with them. They are from Staples, Minn., and are fine people.

You can send the paper to Chas. Steihl at Santiago, Cal.

We picked the first oranges today —but they were osage.

All well.

Respectfully,
Chas. Stiehl & Company.

THE NOBLEMAN FARMER

Count Ilya Tolstoy, the well known son of Leo Tolstoy, famous Russian author and philosopher, like his father believes that manual labor is the best stimulant for mental labor. Tolstoy is at present in America and likes this country so well that he has bought some land in Connecticut, where he has built a summer home, doing much of the work on the house himself.

He takes much pride in the fact that he is also an expert carpenter and automobile mechanic. There is no well near his new home, so he fetches water from a distance of a mile in a keg on his auto. Many people come from all parts of the world to visit the famous man.

TO TOIL IN PACIFIC ISLANDS

British Youths Plan to Develop Fruit Growing and Cattle Breeding Industries.

London.—Discouraged at the outlook in this country, dissatisfied with the after-war Britain, but actuated mainly by a love of adventure, about a dozen engineering students of Loughborough college have set out for an uninhabited Pacific island belonging to Ecuador.

Most of them are ex-officers. Among them is an author, D. L. David, who wrote "Ya Brot." He expects to find in the new settlement work for his pen as well as his hands. A 90-ton vessel is being made ready for the expedition.

The chief means of existence they hope to find by utilizing the resources of the island itself; the development of fruit growing and the breeding of cattle.

All hands will be required to work, although climatic conditions, it has been ascertained, are ideal, and all they will need for food can be obtained without working, if they are content just to "loaf and invite their souls."

Their destined home, the adventurers say, is about 500 miles from the Panama canal.

ROOSTER'S CROW SAVES MAN

Guides William Warner, Lost in Pennsylvania Cranberry Swamp, to Farmhouse.

Stroudsburg, Pa.—The crowing of a rooster saved the life of William Warner, who became lost in a cranberry swamp near Tannersville. Warner wandered for a long time and finally was caught in the soft, boggy land up to his waist. After he succeeded in dragging himself out and got on to firmer land he was so tired and weary that he realized that he might again be mired. Hardly daring to move, he heard the rooster crow and followed the sound until he reached a farmhouse.

Every Meal Means a Banquet.

Rouen, France.—When the family of Frederic Eliot, gardener, sit down to dinner they have to put at least a dozen extra boards in the table. They are father, mother and 32 sons, daughters and grandchildren. The parents recently celebrated their golden wedding anniversary.

Rides 3,000 Miles to See His "Long-Lost" Sisters

Lynn, Mass.—Like a character out of a Western painting, George Morin, cow puncher, swung out of his saddle in front of the rectory of St. Jean Baptiste's church and saluted Father Lacroix with a query as to where the Morin sisters might be. It was the end of a 3,000-mile journey on the back of Skeeter, a cayuse full of tricks, from Rawlins, Wyo. Morin came to meet his sisters, whom he had not seen for 38 years.

The priest did not know, but a neighbor said one of the sisters might be Mrs. Annie Morin Roussin. Mrs. Roussin recognized the brother, who ran away from his home in Suncock, N. H., and went West with an uncle after the father died.

Another sister, Mrs. Ida Kennedy, lived a short distance away, while three others live in Suncock, N. H. There was a family reunion.

THE QUEEN'S BARGAIN

Ex-sergeant E. J. Ellis of Fulham, Eng., is paralyzed as a result of his war service. The queen recently bought from him an elaborate four-panel screen made of 1,500 old prints, Christmas cards and cigarette pictures.

EARLY MONASTERY IS FOUND

Excavations Near Belfast, Ireland, Reveal Site of Church Built in 699.

Belfast.—The site of one of the earliest Christian monasteries in Ireland has been found at Mahee island, Strangford lough, near Belfast. The ruins have been identified as those of Nendrum monastery, mentioned in Muircha's "Life of St. Patrick," written before 699 A. D.

Extensive excavations have been carried out and valuable material, including some stones with writing, the exact meaning of which has not yet been ascertained, have been unearthed. Some of the writings are believed to be of Danish origin.

In Gede's "Ecclesiastical History" it is recorded that in 634 Pope Honorius wrote to certain bishops of the Irish church about the Paschal controversy and Pelagian heresy, and one of the bishops mentioned in this letter is Cromous, bishop of Nendrum. The island of Nendrum was afterwards named Mahee, after a bishop of the monastery.

PEAR TREE STILL AMBITIOUS

Thirty Years Old, Blown Down and Propped Up, Continues to Bear Crop.

Grand Rapids, Mich.—Miss May L. Godfrey's pear tree, old and wabbly, is still ambitious.

This tree is between thirty-five and forty years old, has been blown down and propped up again, and seems to have the greater part of its roots almost on top of the ground. But it produces heavily.

The tree, according to the caretaker, H. Randall, originally was a crab-apple tree, and the pear shoots were grafted to it. Mr. Randall expects the tree to live many more years yet and to bear many more bushels of pears. This year, he says, the yield was from six to eight bushels.

MAN READS BIBLE 46 TIMES

Surpassed Only by the Late Evangelist Dwight L. Moody, Who Has Record of 50 Times.

Mount Carmel, Ill.—Capt. W. P. Haberton of this city is believed to have read the Bible through more times than any person since the evangelist Dwight L. Moody. He has read it through forty-six times, and has now more than half completed his forty-seventh reading. Nearly half a century ago he learned that by reading three chapters on each week day and five on each Sunday the reader just gets through in a year. He adopted the plan and has followed it every year since. Mr. Moody is said to have read his Bible through fifty times.

Will Found Written on Paper in Watch

Palo Alto, Cal.—The will of "Dad" Moulton, veteran Stanford athlete, was taken to San Jose for filing, and it is one of the strangest, in form, ever filed.

Moulton cut a piece of paper into a circle that fit the back of his watch and wrote the will on it.

It reads:

"September 14, 1921. At my death I will everything I have to my wife, Ida L. Moulton. I wish her to help Edwin, our adopted boy, if he deserves it.

"E. W. MOULTON."

Near Enough

The curator of the museum was classifying Egyption curios. He observed a perplexed expression on the face of his young assisstant,

"Whkat is the matter?" he asked. "Is there anything you don't understand?"

"Yes, sir," answered the helper. "Here is a papyrus on which the characters are so badly traced that they are indecipherable. How shall I classify?"

"Let me see," said the curator, examining the piece. "Just call it a doctor's prescription in the time of Pharaoh."

The total output of coal in the country for last week, the geological survey estimated, was 12,600,000 tons, of which 1,900,000 tons was anthracite. This is approximately 200,000 greater than the out-turn the previous week, and was taken as further evidence of the passage of the fuel crisis which impended during the early fall as a result of the prolonged miners' strike. The production rate, the survey estimated, is allowing consumers to put into stock as much as 6,000,000 tons monthly after filling their current needs.

NOTICE TO AUTOMOBILE OWNERS.

After December 1st, 1922, this office will begin issuing 1923 licenses. Please bear in mind that unless your last registration number is given in applying for 1923 licence it will be necessary for us to return your application for that information.

(Nov. 23-J 1.) Treasurer.

GIRL'S STATEMENT
WILL HELP KLEMME

Many women will profit by the following statement of one of their sex: "I was afraid to eat on account of stomach trouble. Even rice did not agree. After taking Adler-i-ka I can eat anything." Adler-i-ka acts on BOTH upper and lower bowel, removing foul matter which poisoned stomach. EXCELLENT for gas on the stomach or sour stomach. Guards against appendicitis. It brings out poisonous matter you never thought was in your system. E. S. D. Kahrs, Druggist. (advertisement.)

Announcement--

We take pleasure in announcing that Mr. D. J. Thornton became associated with our Securities Department on Nov. 20th.

Mr. Thornton will be glad to be of service to our Patrons in Investment matters.

Respectfully,

Iowa Falls Electric Co.
H. F. Kellogg, Manager.

Notice--

As I have sold out my interest in the GRAM & COOBS AUTO CO. to Mr. Harry Buss, (who now has possession) I ask all who are indebted to me or the old firm to please settle up the account at once.

I also wish to thank the many friends of the firm for their liberal patronage of the past, and while I was in business.

Respectfully,

KICKIN' THE DORG AROUND

A Colyum O' Humor By the Office Divvil Hisself

Misunderstood.

A number of young women were taking lessons in fending from a professionall instructor.

"Now, madamoiselle," said the teacher to one girl whom he had been trying to impart the first principles of fencing, "how would you use your foil if an opponent feinted?

After due deliberation, the girl replied:

"I think Id just tickle her with the point of it to see whether she was faking."

One In a Million.

"I see where another young woman has won a beauty prize."

"The stage or the movies?"

"She says she is contemplating matrimony."

"I'd like to see that girl."

Family Economy.

"So you are going to have your boy study law?"

"Yes," answered Farmer Corntossel.

"Josh is always getting into some kind of trouble and instead of hiring lawyers for him I might as well teach him to protect his ownself."

Following Directions.

His Neighbor" Why are you wearing so many coats on such a hot day?"

Pat—"Well, ye see, Oi'm goin't to paint me barn, an' it says on the can, 'To obtain the best results put on at least three coats.'"

Might As Well Stayed Home

Wife—Did you notice the chinchilla on the woman sitting in front church this morning?

Husband—Er—no. Afraid I was dozing most of the time.

Wife—Um. A lot of good the service did you.

Needed Excitement

"Why are you growing those sideburners, Gilbert?"

"Oh, I got so bored with doing nothing at all."

Eyes Bigger Than His Belly

"Hi Jimmie, come on! I got two tickets to de newsboys' dinner.

"Nope. I done et five free feeds an' now I gotter go home an' tackle me own toikey."

Experimenting

The Biology Professor—Have you done any research work this year?

The Sophomore—Lots, I spent all my spare time trying to find out if bacteria is propagated by kissing!

Little Magic.

The new teacher was having a bad time of it. The class was very dull—or pretended to be—and seemed incapable of answering the easiest of questions.

"What is a person called who steals?" asked the teacher persuasively.

There was no answer.

"Now, Herbert," said the teacher, "suppose I was to put my hand in your pocket and take out a dollar, what would you call me?"

"A sure-enough magician," replied Herbert, with conviction.

Argument

"It is charged that your car scared several horses."

"Now, y'honor, everybody testifies the car was going so fast you couldn't see it."

"Well?"

"If they couldn't see it, how could they be scared?"

Same Old Story.

"Say, pard, what put you on the bum?" asked one hobo of another.

"It's a short story," replied the other. "Once I was happy and tried to get rich. What's the answer in your case?"

"About the same, answered No. 1. "Once I was rich and tried to be happy."

Preparing For Battle

This was at a solemn conference preceding a church wedding. There were present the groom, the best man, the ushers and the guest list.

"You understand," said the best man. "you meet 'em when they come in and ask 'em if they are friends of the bride or the groom."

"And then what?" asked the head usher.

"Why, you seat the friends of the bride on one side of the church and the friends of the groom on the other. It's the custom."

"I can't see the use o' that," said the head usher. "They'll take sides soon enough."

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Morning sermon at 10 o'clock.

Sunday school at 11 o'clock.

There will be no service in the evening on account of the evangelistic meeting at the M. E. Church, which takes place beginning on Sunday evening. I would urge all our people, members and friends to take active part and make the greatest possible use of these meetings from night to night. Let us work unitedly for the salvation of our own and the souls of others.

Thanksgiving Day

On Thanksgiving morning at 10 o'clock there will be a union Thanksgiving service held at the church. Let us all come to hear Rev. Metcalf, who will preach the Thanksgiving sermon. It behooves us all to unite in a service of praise and thanks-giving to the Giver of all good and perfect gifts, for His great mercy, grace and love which He has so freely bestowed upon us.

—W. C. Bergmann.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship 10 a. m. by Rev. M. L. Metcalf.

Sunday school 11 a m.

Evening worship 7:30 p. m. Evangelistic service by Rev. M. L. Metcalf, solos by Mr. John Peterson.

The Sunday services next Sunday Nov. 26th, will be the first of our Evangelistic Services. Rev. M. L. Metcalf, Centenary Evangelist, will be the preacher; Mr. John Peterson, chorus leader and soloist.

Mr. Mtcalf is a fine gospel preacher—sympathetic, kindly, and eloquent, yet forceful. He is out, not to wound or censor, but to lovingly plead the cause of Christ and personal submission to Him and service in His Kingdom.

Mr. Peterson brings the message of the gospel in song—his call is to sing, and he sings with voice and soul, he has been described as a very whirlwind of song.

You will want to hear both of these evangelists. They are seeking to bring the Kingdom of God to many souls in this city. We ask all Christian believers to help us in this work. Pray for thee success of the meetings; come yourself and come again. Bring your friends, tell them about the meetings. Speak to your loved ones, urge them to accept salvation, for "This is the acceptable day of the Lord," "The Kingdom cometh," and is at hand.

Thanksgiving Day

Thanksgiving Day services will be held in the First M. E. Church. Sermon by Rev. Mr. Bergmann. Every good citizen should be thankful for Gods mercy and good providence, and show the same by assembly in the appointed place to give thanks.

Evangelistic service in the evening in the M. E. Church conducted by Evangelist Metcalf and Peterson.

—A. B. Gedye.

BIBLE THOUGHT —FOR TODAY—

Bible Thoughts memorized, will prove a priceless heritage in after years.

TAKE NO THOUGHT:—Take no thought, saying, What shall we eat? or, What shall we drink, or, Wherewithal shall we be clothed? For your heavenly Father knoweth that ye have need of all these things.—Matthew 6:31, 32.

WISDOM AND UNDERSTANDING—Whence then cometh wisdom? and whre is the place of understanding? Behold, the fear of the Lord, that is wisdom; and to depart from evil is understanding.—Job 28:20.28

SONS OF GOD:—For as many as are led by the Spirit of God, they are the sons of God.—Romans 8:14.

THE TEMPLE OF GOD:—Know ye not that ye are the temple of God, and that the Spirit of God dwelleth in you.—1 Corinthians 3:16.

TEACH ME:—Teach me to do thy will; for thou art my God: thy spirit is good; lead me into the land of uprightnss.—Psalms 143:10.

WISDOM OF GAMALIEL:—Now I say unto you, Refrain from these men, and let them alone: for if this counsel or this work be of men, it will come to nought: but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God.—Acts 5:38, 39.

REWARD IS SURE:—The Lord with you, while ye be with him. Be ye strong therefore, and let not your hands be weak: for your work shall be rewarded.—2 Chronicles 15:2, 7.

More Light Needed

It was a sleepy village and its fire company was anything but up to date.

One night a fire was announced by the violent ringing of the alarm bell and the sleepy fire fighters arrived at the scene of action to find the building wreathed in curling black smoke. No flames were visible from the outside.

The captain of the company made a careful survey and then calmly lit his pipe.

"We'd better leave it alone and let it burn up a bit," he said, "then we'll be able to see what we are doing."

We are going to order a carload of

WIRE

before long. We will take your order forany kind of wire-- give you the car lot price if taken off the car, and will carry the account until April 1, 1922.

The AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

TO FIGHT FOR WORLD PEACE

Interallied Veterans' Association Asks Assistance From Ex-Service Men in All Countries.

Recommending the establishment of an international court followed by universal disarmament, the Interallied Veterans' association at its convention in New Orleans has called upon ex-service men in all allied countires to take up the fight for world peace. Charles Bertrand, a member of the French Chamber of Deputies, was re-elected president of the organization.

Chas. Bertrand.

Another prominent delegate was Julien David, a member of the Belgian chamber of deputies one of the few men to be captured by the Germans who escaped and returned to their old regiments. Ezio Gioja, head of the Italian delegation, was wounded four times with the loss of one leg.

Sessions of the convention were attended by twenty-eight representatives from the following powers: United States, represented by five members of the American Legion; Great Britain, France, Italy, Belgium, Rumania, Czechoslovakia and Serbia.

Ezio Gioja.

A manifesto issued by the convention delegates embodies the hopes for international amity. "It seems providential," the statement, in part, declares, "that we, representing fifteen million former service men should be assembled at the very hour when the distracted world most needs a unifying word. The burden of our duty to speak our deepest convictions to governments and the public rests heavily upon us. Surely the voice of the men who stood shoulder to shoulder in the trenches to save civilization, and who know the hearts of the allied armies, should be heard equally with the utterances of professional statesmen and office holders.

"From this international reunion of allied war veterans, we send to our comrades and to the world a message in behalf of restoration of peace, order and well being. It is our deliberate judgment after admitting the failure of repeated international conferences and councils, and the steady growth ever since the armistice, of influences that make for distrust, disunion and disaster, that the only way to tranquility and prosperity for mankind as a whole, lies in a return to a sacred observance of those principles upon which we achieved our victory—the allied war aims. The calamities which have since overtaken civilization have been primarily due to recreancy to those pledges."

Julien David.

Among the other definite steps recommended by the war heroes were: Full publicity for all international agreements; faithful observance of treaties; opposition to territorial aggrandizement, suppression of movements to overthrow governments by force; clarification of exchange rates and resumption of international commerce, with a proviso for suspension of trade relations with countries maintaining armies organized for aggressive purposes; and organization of a news disseminating bureau to offset destructive and inflammatory propaganda.

Medal for French Girl.

Miss Olga Appleby, nineteen-year-old daughter of Capt. William Appleby, British representative to the recent Interallied Veterans' association convention at New Orleans, was decorated by France in "recognition of her filial devotion in the hour of her father's greatest affliction." She has been his companion since he was blinded at Ypres in 1915. The medal was bestowed in the salon of the steamer Lorraine on the voyage to America. The presentation was made by Charles Bertrand, president of the Interallied Veterans' association. Miss Appleby is said to be the only woman to receive the medal "Le Merit de L'Union Nationale des Combattants."

Post to Have Building.

An old school building at Bandon, Ore., is being remodeled and put into shape for use as an American Legion clubhouse there. The Bandon post is spending about $4,000 in putting the

THE NEW LEGION COMMANDER

Alvin Owsley, Texas Man, Chosen at National Convention—Anticipates No Harm From Sawyer.

"The national convention of the American Legion has expressed itself, so far as retaining Brigadier General Sawyer as head of the federal hospitalization board is concerned, and until I have had a personal conversation with President Harding I cannot believe that he would do any World war veteran any harm."

This answer was made to queries by the new national commander of the American Legion, Alvin M. Owsley, as he passed through Indianapolis, national headquarters, on his way to New York to bid bon voyage to the Fidac, five days after the Legion convention in New Orleans. Mr. Owsley had spent a day with his parents in Denton, Tex., received a big hug from his mother and a hearty handshake from "dad," been carried on the shoulders of his home-town admirers, then hurried to New York for a last meeting with the distinguished foreign visitors, who, as delegates of the interallied veterans' organizations, held a peace conference in New Orleans in conjunction with the Legion convention.

In Denton, Tex., after Commander Owsley had been carried to the public square, the inevitable occurred for this outstanding orator of the Legion—a speech. He said:

"Any personal honors which I have received I bring to you now and lay at your feet."

Mr. Owsley's career is interesting. He was born in Denton June 11, 1888. He attended the public schools of Texas and later graduated from the Virginia Military institute, Lexington, Va., in the class of 1909, where he merited the honor as first captain of his class. Following his graduation he entered the University of Texas and there graduated in 1912. During this time he instructed in the schools of Texas.

He entered the firm of lawyers of Owsley & Owsley, which was founded by his grandfather, and practiced law in Denton, Tex.

He was elected a delegate to the thirty-third legislature of Texas from Denton county in 1913, gaining great prominence by his persuasive oratorical ability in this legislature which brought him to the front as one of the outstanding young men of his state.

ALVIN M. OWSLEY
New National Commander of the American Legion.

Upon his return from the legislature he was elected district attorney for Denton county and served with great honor until the outbreak of the war. He entered the first training camp at Leon Springs, Tex., in May. Due to his previous military training he was commissioned major and assigned to the One Hundred and Forty-second infantry, Thirty-sixth division, Camp Bowie, Tex. He was detailed as divisional insurance officer, then was assigned as senior instructor to the Third Officers' Training school at that camp. He was later promoted to a lieutenant colonel of infantry and assigned adjutant of the Thirty-sixth division, A. E. F.

He was in two offensives, the Aines-Champaigne and the Meuse-Argonne. He was discharged in July, 1919, at Camp Dix and returned to his home in Texas and was made assistant attorney general of Texas shortly afterward, in which capacity he served until February, 1921, when he accepted the position of assistant national director of the American Legion's Americanization commission.

He helped to organize and was first post commander of the Arthur McNitsky post of the Legion in Denton, Tex. He was appointed national director of Americanism in June, 1921, in which capacity he has served until the present time.

Will Probe.

Some insidious force is filling American histories with stories reflecting on the continental leaders who founded this republic, it is claimed by the American Legion's Americanism commission. Members of the first constitutional convention are described as "ignorant man"; George Washington was said to have sided with the American revolutionists because of failure to get a commission in the British army; Patrick Henry was "an ignorant country lawyer," and other heroes were mentioned with veiled slurs. The Americanism commission will launch an investigation.

1—Valparaiso harbor, Chile, where earthquake and tidal waves caused havoc. 2—Mrs. Belmont and other leaders of Woman's National party signing "declaration of independence" calling for equal rights for women. 3—John J. Blaine, re-elected governor of Wisconsin, and Mrs. Blaine on 3,000-mile tour to tell about Wisconsin products and enterprises.

NEWS REVIEW OF CURRENT EVENTS

German Socialists Force the Resignation of Wirth and His Government.

CUNO IS NEW CHANCELLOR

Assurances of Turk Nationalists Relieve Tension in Near East—Bonar Law Wins Control of British Parliament — Supreme Court Says the Japanese Can't Be Naturalized.

By EDWARD W. PICKARD

PRESIDENT HARDING, in a letter to Mrs. Corinne Roosevelt Robinson, said the public mind is shifting somewhat in regard to the prohibition enforcement, and prophesied that the Volstead act will be "liberalized." Do you think his interpretation of the signs of the times is correct?

DR. JOSEPH WIRTH, chancellor of Germany, and his entire cabinet resigned last week, practically forced out of office by the failure of Wirth's plan for reorganization of the ministry to meet the impending crisis concerning the stabilization of the mark, the reparations program and the general economic condition. He desired a coalition ministry in which the German People's party should be represented. But the united Socialist parties refused to participate in such a coalition because, mainly, the industrialist leaders of the People's party insisted on their stand in favor of the ten-hour day for the workers. The abandonment of the eight-hour day, according to Hugo Stinnes and other industrial magnates, would be the solution of the problem of paying the reparations and restoring the country's industries.

Wilhelm Cuno, general manager of the Hamburg-American steamship line, accepted the task of forming a new government.

Wirth's downfall was not unexpected for his position had been growing rapidly weaker for some months and his influence was waning because of his evident lack of initiative. He failed to devise any way of carrying out his policy of fulfilling the reparations agreement and last summer he virtually abandoned it, adopting a new slogan of "bread first, then reparations." The united Socialists had been growing more and more restive and dissatisfied with the government's attitude relative to financial and economic problems, especially the grain requisition bill, and with its failure to curb speculation in the dollar and check the collapse of the mark.

SO FAR as reparations go, the new cabinet has a program already formed, contained in the recent note to the reparations commission. This received the approval of the Socialists, the Democrats and the People's party. In this note the government expressed its willingness to fulfill the program for payment of reparations in kind and the stabilization of the mark on condition that it be granted a moratorium of from three to four years and that a finance syndicate be established as recommended by the international experts to restore Germany's credit. The note says the reichsbank will make a loan of 500,000,000 gold marks ($125,000,000) to the German government if allied bankers will furnish an equal sum. This money will be used to sfabilize the mark. Germany says it will make an internal gold loan, but it asks that in order to facilitate the nation's ability to pay it be given the same rights of trade as specified in favored nations treaties.

Early in the week serious food riots broke out in Dusseldorf and Cologne, where many shops were looted and soldiers and police were compelled to fire on the crowds. Smaller riots took place in Berlin and elsewhere, and it was feared the disorders would spread to the Ruhr district. There is no doubt that the food situation in Germany is very serious. The reparations commission when in Berlin recently learned that the country must get 800,000,000,000 marks' worth of grain during the next year.

FOLLOWING some days of genuine alarm lest war break out between the allies and the Turks, the latter gave assurances that eased the situation. Postponement of the Lausanne conference until November 20 made them decidedly suspicious of the good faith of the allies, and the insistence of Lord Curzon that Great Britain, France and Italy reach a preliminary accord on matters to be discussed, still more angered the Turks. The allied military chiefs at Constantinople were so disturbed by the prospects that they sent messages to their respective governments urging them to begin the conference speedily and quit playing politics, intimating that otherwise they declined to accept responsibility for what might happen. All the time Rafet Pasha, governor of Constantinople, under orders from Angora was pressing the demand for full control of that metropolis without allied interference. Conditions were decidedly threatening. However, on Wednesday the allies received a note from the Nationalist government stating that it would respect the terms of the Mudania armistice agreement and would not insist on the withdrawal of allied troops from the zones delimited by that pact. The note continued: "The national government, seeing that it has assumed the duty of insuring order and security in the capital, requests the cessation of interference in the shape of control by allied troops in our internal administration."

Secretary of State Hughes instructed Ambassador Child at Rome and Minister Grew at Berne to go to Lausanne as observers of the peace conference for the United States government. Rear Admiral Bristol also will be there when his duties as American high commissioner at Constantinople permit. The cruiser Pittsburgh, bearing Rear Admiral Long, commander of our naval forces in European waters, arrived at Constantinople.

FULL returns from the British parliamentary elections held last Wednesday are not in at this writing, but it is certain that Prime Minister Bonar Law will have a Conservative majority in the commons of about 87 over all other parties. The Labor party made extensive gains, mainly in the manufacturing counties and northern towns in England and in Scotland. This despite the fact that both the Conservatives and the Georgian Liberals directed a strong campaign against the Laborite candidates. The four leaders of the chief parties, Bonar Law, Lloyd George, Herbert Asquith and John R. Clynes, chief of the Labor party, all were elected to the house. The prime minister's plurality was rather slender, and so was Asquith's. Lloyd George's group of Liberals in the house will not be large but may serve him in the making of opposition combinations.

Of the 33 women nominees the returns so far show that only two were elected. These are Viscountess Astor, former American, and Mrs. Margaret Wintringham. Both are present members of parliament. Among the men defeated was Winston Churchill, former secretary for the colonies.

PREMIER MUSSOLINI is losing no time in putting Italy on the road to recovery of her prosperity. Last week he asked and obtained from King Victor Emmanuel full power to make radical bureaucratic and tributary reforms without awaiting for parliamentary sanction. These include rearrangement of the taxation system and reduction of salaries and number of government employees, and the leasing of railroads and telephone and telegraph lines to private concerns. On Thursday the chamber of deputies began a session which the premier hoped would last only a few days. He outlined the policy of his government to the deputies and announced a reform of the electoral laws decided on by the council of ministers. It was said if the chamber did not pass the law for this reform promptly, it would be dissolved and the present law would be modified by royal decree.

The success of fascism in Italy has prompted the organization of similar movements in other lands. In Bavaria and Hungary it appears likely to take the form of royalist revolution if it comes to fruition. Recent dispatches tell of the spread of the movement in Mexico, where, as in Italy, it is designed primarily to stamp out communism.

ONE of the most important decisions handed down recently by the Supreme Court of the United States was that read by Associate Justice Sutherland last week denying to the Japanese the right to be naturalized in the United States and to become citizens of this country. One case from Hawaii and two from the state of Washington were decided together. The court held that the naturalization act of June 29, 1906, was limited by the provision of section 2, 169 of the revised statutes, authorizing the naturalization of "free white persons" and those of African birth and descent, and that the Japanese are not eligible to naturalization.

It was added in the decision that "there is not implied—either in the legislation or in our interpretation of it—any suggestion of individual unworthiness or racial inferiority. These considerations are in no manner involved."

NOT in many years before has South America experienced so severe an earthquake as that which devastated large sections of Chile. The most destructive of the tremors lasted but a few seconds, but the shocks recurred during several days, each one adding to the destruction and to the terror of the inhabitants. The worst results were on and near the coast, and great tidal waves increased the devastation. A number of towns and villages were wholly or partly razed, and the loss of life may reach 1,500 or 2,000. The American Red Cross responded immediately to the call for aid, and in addition President Harding ordered two vessels to take cargoes of food, clothing and medical supplies from the Canal Zone to the stricken region. Thousands of families are homeless and destitute, and already pestilence has broken out among them.

This disaster gives sharp point to the annual roll call of the American Red Cross, now in progress. The organization is always ready to meet such emergencies, but they make sudden and enormous demands on its financial resources. For that reason every American is urged to buy a yearly membership.

SO-CALLED Progressive Republicans who are members of the present congress or who were elected members of the Sixty-eighth congress, together with other prominent members of that wing of the party are said to be arranging a conference at which they will plan for open revolt against the leadership of President Harding and dictation of the "conservatives." According to dispatches from Washington some of the issues upon which they expect to unite are: Repeal of drastic provisions of the Cummins-Esch transportation act; revision of the tax laws, levying higher rates upon big incomes, both corporate and individual; radical curtailment of governmental expenditures; recognition of the soviet Russian government; curbing of the powers of the federal reserve board; revision of the recently enacted tariff; amnesty for political prisoners; living wage guarantee for labor under the jurisdiction of the government; legislation to curb the use of the injunction in labor disputes; a more liberal policy in the extension of credit to farmers.

WILLIAM BROSS LLOYD, millionaire, and eighteen other members of the Communist Labor party, convicted of violating the Illinois espionage act, lost their last chance to evade punishment when the state Supreme court refused to extend the stay and issued a mandate directing execution of the prison sentences imposed on them two years ago, and collection of the fines.

Attendance records at the cancer week clinics of the Des Moines health center were broken by the examination of fourteen cancer patients from all parts of the state.

A Caesarian operation was performed on Senora Elorintino Ruez, aged ted of Gen. Profirio Diaz, of Mexico who, with her husband, is at a local hospital in Mason City.

Apropos of Iowa City's Home Coming, it is estimated that from 500 to 1000 autos were stalled in the mud within a few miles of town, endeavoring to make the return trip.

A deal is being consummated at Knoxville for the purchasing by Marion county farmers of 2,400 head of feeding cattle belonging to a banking company in Eureka, Kan.

N. G. Graschel of Harlan has cried a good many sales in that section. In the past ten years selling of Durocs at 794 sales, 35,930 head were sold for the sum of $5,359,191.

Work on the new $30,000 steel and concrete bridge across the English river on the Kalona-Washington road near Kalona, which is known as primary road No. 11, will be started at once.

The fourth annual midwest horticultural exposition was held in Council Bluffs recently, was said to be a marvel of beauty and utility, and the finest ever shown in the United States.

On the farm of David Savage, north of Salem, is a three acre field of alfalfa which is nine years old. The field has been cut three or four times every year and is still making a vigorous growth.

Disregarding the protests of residents and property owners an undertakers' company some weeks ago opened an establishment at Morningside. Sioux City, and has since refused to move.

Dan Phelan, deputy U. S. marshal for the Fort Dodge district has been removed from office, for alleged usurpation of power during the recent rail strike. In a speech, he shouted "I am the law" and threatened to shoot.

Iowa's 1922 corn crop will exceed the 1921 crop by 11,000,000 bushels according to the latest estimate on the yield compiled by C. F. Sarle, agricultural statistician for the state and federal crop reporting service.

Another industry for Newton promises to add to that city's already established reputation as a manufacturing center. The newest addition to commercial products is caskets, which are to be made by the Skow Mfg. Co.

Henry Field of Shenandoah had a successful hog sale recently in spite a heavy continuous downpour of rain. Mr. Field introduced an innovation by employing an orchestra. The hogs offered, brought good prices.

Seven hundred fifty miles on horseback on twenty-five days, arriving and camping at the S. J. Nash home in Indianola about 10 o'clock with time waking the family, was the record of Mrs. Minnie Bowers and her 14-year-old son, Arnold, who left Cheyenne, Wyo., Oct. 5th with two saddle horses and a pack mule.

Farmers around Storm Lake, who had been forced to haul water for their stock considered the drenching rains of last week more than welcome.

Mrs. Mathias Miller, 92 years old, voted a straight republican ticket at the recent election, and helped her grandson, E. M. Lichty, to the legislature.

On Saturday, November 18, at o'clock p. m. there was held a public wedding in the bandstand at Kalona on the closing day of the week of Harvest Festival

Periwinkle House

by OPIE READ

ILLUSTRATED BY R.H. LIVINGSTONE

COPYRIGHT, THE BELL SYNDICATE, INC.,

Supposing you were a young man who had served in a war and escaped its perils and that the future were gay with promise, excepting that fate had called upon you to execute a grim and terrible purpose; the circumstances being that during the conflict, an outlaw operating under the semi-sanction of guerrille warfare had raided your home and murdered your father, and then, hanging his body to a tree, had insolently pinned a card to it bearing the outlaw's name! Would not you likely do as Virgil Drace did—swear a solemn vow to find that outlaw, hang him as high as Haman, and decorate his corpse with your own card? Then, while you were setting about to execute that vow, suppose you met a fascinating girl with whom you fell in love and had the satisfaction of finding your affection sincerely reciprocated. Then supposing it developed that the girl were the daughter of the man upon whom you had sworn to wreak vengeance. What would you do? Is it not a satisfactory web upon which to weave an intensely interesting story of romance, especially when the incidents occurred in the South following the Civil war, the young man a northern officer, the girl a beautiful, fiery southerner, and all the other characters and episodes of the South and that turbulent period which marked the days of reconstruction? Would it not be more absorbing if, as in this case, the author were one of the greatest of American novelists? You will find this stirring romance worked out in the most charming way in "Periwinkle House," by Opie Read.

Opie Read

No man in the United States has written as many stories as Opie Read, and no author has had a larger number of readers. He was born in a small town in Tennessee in 1852, followed newspaper work for awhile in Kentucky, and then moved to Little Rock, Ark., where he edited the Arkansas Gazette from 1878 to 1881. He was next on the staff of the Cleveland (O.) Leader and then returned to Little Rock, where he established the Arkansaw Traveler, a humorous paper which attracted the attention of the entire English-speaking world. Mr. Read furnished most of the material that went into the publication. He conducted it from 1883 to 1891 and then moved to Chicago, where he has since resided, engaged in literary work.

It is doubtful if Opie Read himself could recall the titles of all the books he has written, without referring to a list. One or more of them is in nearly every home where fiction is indulged in throughout the land. They form a conspicuous part of the fiction section of every public library, and are carried in stock by every enterprising book dealer. During late years he has been less prolific, due to the fact that he has not had the leisure for writing, for he has become one of the most sought after lecturers, and his time is practically filled with Chautauqua, Lyceum and special platform engagements. In this work he has covered practically the entire nation and has visited some sections several times, for there always is a demand for his return.

CHAPTER I

Out upon the sheen of the mighty river the pine-torch flames fell in rippling streams, and the full moon, peeping over the tall timber, made mouths at herself in the wrinkled mirror of flood. On the steamboat Leona the negro deck-hands were chanting the buoyant anthem of the tune rise. In the gilt, enameled saloon, a sweet-stringed waltz, centuries removed from the melodic bellow of the black bucks below, swelled out upon a breeze that seemed eager to mingle with it, while sentiment smiled and gallantry bowed in the studied graces of a floating ballroom on the Mississippi. All ceremony was precise with the inherited observance of precedent, save when some hair-greased and less refined dandy of the woods, having lingered too long at the bar, set liquor fly to his heels to cut a rebellious pigeon-wing.

The boundless ranch of the West was unknown, and along the lower Mississippi lay the great plantations of America. Except for the toil of the slaves, industrial life had been only a sort of happy indolence; but society held many a thrilling charm, and with its libraries from Europe, intellectual life indulged the luxury of ceremonious romanticism. This atmosphere was still breathed on the big Mississippi steamboats, for fantasies which render poetic the condition of us all linger on the water after having been driven from the land.

In the ballroom of the Leona the dress of the men and the women was variegated with the odd ends of different periods of style. Old chests, hidden during the Civil war, only a few years past, had been opened to give up the faintly scented fluffs and gourd-flowered vests of Andrew Jackson's day; and the brigadier in ruffled shirt poured gallantry's extravagant figures of speech upon the graceful young dame arrayed in the silk that had adorned the form of her grandmother when in the village of Washington she waltzed with Lafayette.

During a lull in the music-measured capering a tall, handsome young man, garbed in the fashion of the day, passed with long and careless strides from one end of the saloon and out toward the upper deck.

Admiring eyes were bent upon him; and one lady turned to her partner and said:

"Oh, please, Colonel, tell me who he is."

The Colonel placed his right hand on the bosom of his ruffled shirt and bowed. "Miss Lucy," he said, "it would be one of the satisfactions of my life to gratify your more than natural curiosity, but that pleasure is denied me. I can't tell you who he is."

And then—because the Colonel had sighed his own sentimental distress in the presence of Miss Lucy and because her curiosity concerning the young stranger stirred a jealous qualm—he added: "He looks like a Yankee to me."

The young man was a Yankee. And because he was journeying to the South upon a grim and terrible mission, the gayeties of the ballroom had grated upon him and he had sought the solitude of the upper deck. Yet it was this moment that Fate chose to bring him face to face with one who was to change the whole course of his life.

For as he turned into a long passageway, aflame with light but deserted, there suddenly entered at the far end a girl thrilling in lithesome and almost barbaric dress. In swift unconsciousness of him she approached, a great handful of roses in red glare hiding her features. She lowered her hand; he caught full view of her face; and it seemed to him that his heart ceased to beat, like a pendulum caught and halted, then thrown again into motion. She did not look at him as he slowly passed her. He gazed into her eyes as she bent them upon the roses held out in front of her; and then he wheeled about to follow her. She turned into a cross-passage, was gone; he ran to the entrance, but she had vanished.

In the young man's heart was a struggle to call her, but there was no appropriate word; and then, sobered, the Yankee smiled at himself. But the smile did not balm his delicious wounds, and he continued his search into the ballroom. There were many handsome women, belles of proud villages, but to none did he give a second glance. Again he passed out toward the upper deck.

For a time he stood gazing down upon the never-solved mystery of night on the Mississippi. The fiddles were going again, and he heard slippered feet whispering over the floor, but it seemed to him that this scene of gayety was forced, like a melancholy laugh; it reminded him of a book of poems in tatters, of a love-letter in faded ink.

Built about one of the smokestacks was a shanty of boards called the "dog house." Turning a corner of the shanty, the young man stumbled against some one; a man growled in resentment.

"I beg your pardon!"

"I should say you do!" A young fellow of unusual height and of humorous slimness came forth out of the shadow. The boat was landing, and a turpentine-torch on the shore revealed him, pale and long of face, with collar cut low and chin standing high.

"Yes, sir," he added, "and although it may not be necessary on this occasion, yet if you knew who I am, you would apologize some more."

"Ah, you don't say!" replied the Yankee, smiling. "And as you seem to be fond of the music of apology, will you please tell me who you are?"

"I can do that easy enough, but I don't wish to frighten you."

"You are considerate. But the fact is I rather enjoy the sensation of fright."

"Then tremble: I am Liberty Shottle."

"What, you don't mean that you are really Liberty Shottle!"

"I swear it."

"Well, well! And now will you please enlighten me as to who Liberty Shottle is? And why do you suppose that people who have heard of you, tremble in your presence? What have you done?"

"Sir, modesty puts a clamp on me. . . . And now would you mind telling me your name?"

"Not at all. My name is Virgil Drace."

"You don't say? Well, well! But I never heard of you, either." Now they laughed, the joyous and unsuspicious laughed, the joyous and unsuspicious mirth of youth. They stood looking down upon the deck-hands, loading freight, listening to the stream of the second mate's profanity, who swore his emotion by the stars, the moon, the river, the universe; and when the Leona was on her way again, the fiddles going, the muddy roustabouts singing, Liberty Shottle and Drace seated themselves on campstools, eagering toward swift acquaintance, the friendship of two natures far apart in aim and principle.

"If you've got two cigars, I'll join you in a smoke," said Shottle. "Thank you. You see, my people, what few of them are left, say that I don't exist. They haven't cast me off, or anything of that sort, but being of staid habits themselves, they swear that I am too unreal to exist. Lord, what is the world but queer? What's your game?"

"I haven't any—any game," parried the Northerner. "But what are you doing on this boat yourself?"

"I'm going down to New Orleans," replied Liberty, "to see how long I can stay there. I had a pretty fair job a couple of months ago teaching a school near Memphis. They liked me, too. I've got a sheep's hide from Chapel Hill university, North Caro-

"Then Tremble; I Am Liberty Shottle."

lina, with all the wool singed off and the board acknowledged my qualifications, but they caught me shaking dice with the boys and told me that as there were some branches of learning they didn't care to have instilled, I'd better get a professorship in some higher institution. Have you been in there?"

Liberty Shottle waved his hand; and Drace, thinking he meant the ballroom, answered him:

"Only passed through. I've been rather worn with that sort of thing."

"Oh, you think I meant the ball? I meant the poker-room."

"Yes, I sat in there for a time."

"How did you come out?"

"Not very well. Lost two hundred."

"You speak of losing two hundred as lightly as if it were a matter of breath instead of blood. Would you mind holding my hand till you say it again? Two hundred! Why, you know, a fellow would teach bullet-heads and sissies for two months for two hundred dollars . . . . Now, let me lay down a proposition: I am lucky tonight. I lost fifteen dollars, all I had, but I'd just got up to the point of winning when I lost my last dollar. Just one more ante, and it would have come my way. I saw it coming, but a blundering fool headed it off. Now, here's my scheme, and it's a good one: you want your two hundred back; you stake me to a hundred, and I'll go in there and make a cleaning. Don't refuse, now, until you have let your mind digest the situation. Most of the errors in this life come from snap judgment."

"Ah, you think you can win, because you lost?"

"My dear Virgil, there is, you might say, a psychology in everything. Who wins a fight? The man who believes he can't? No, the man who knows he can. And I know right now. Why, I'd stake my life on it. You give me the hundred and stay right here and wait. As for my honesty, I can give you references—the mayor of New Orleans and Judge Hebbins of Memphis—but he died last week. No matter — I'd jump into the river and let the paddle-wheel beat me into sausagemeat before I'd deceive you. Liberty Shottle, that's my name!"

Drace leaned back and laughed. "Liberty, a thing astonishing to me is going to happen. I'll stake you to the hundred."

No superstitious devotee ever received from the priest of the gods a libation with more of emotional strain than Liberty Shottle evinced when he closed in tight clutch on Drace's adventurous hundred. Then he bowed and disappeared.

Drace sat musing, and soon he began to wonder why he had been so weak as to give $100 to this peculiar fellow, a stranger. Well, Liberty had amused him. Made him laugh, and in this world there is more money spent for the promotion of laughter than for the relief of tears.

Presently Shottle returned. He sat down and though physically he was light, the camp stool groaned beneath him. Drace waited. The Leona blew her great horn and all the world seemed to tremble. When the sound had died, echoing miles away, the gambler coughed lightly and groaned. Drace wondered why he should be tickled over any one's misfortune, but he felt a merry tingling in his blood.

"This boat's got a good bass voice," he remarked.

"Bass voice! Do you know what I'd like to do? I'd like to bore a ten-inch hole in her bottom and let her go down."

"You must have lost, Liberty."

"Don't call me Liberty. Call me Lib—just Lib; that's enough. But let me tell you something. Never in all my life have I ever come as near being a rich man as I was just now. I had won—by George, I had so much money stacked up in front of me that a mulatto from the North called me 'marster.' And then a cog slipped. We could have split and had a small fortune apiece."

"Blundering fool again?" Drace inquired.

"Yes, sir, and I was the fool. I wanted to be a rich man—and came within one of it. You know, sometimes Fortune hesitates as to whether she shall crown you or slap you."

"In your case, she didn't seem to hesitate long, Lib."

"No the hair-tangled hag! And then do you know what she did just as I was forced to get up from the table in as hot a fever as ever scorched a man's blood? She smiled at me. Now, I'll swear to that. But it's all over. A fellow has his little day, and then stretches out and lets the undertaker measure him."

"Yes, Lib, and I'd advise him to bring along extra tape when he comes after you."

Shottle attempted to smile, but the fever within him was still so hot that his effort ended in a grim tightening of the mouth.

"That's all right, Virgil, but you must remember that you are one out of a million. How a fellow can lose $200 at poker and get up from the table with money still in his pocket is beyond me. However, it means that you haven't got poker in your blood, which of itself is a marvel. But I want to tell you that every man is food for some sort of desperate passion. If it isn't gambling, it may be love. How about that?"

"Hasn't caught me yet," answered Drace, stoutly, even though the picture of the girl in the passageway was at the moment floating bright before his mind's eye. "Of course," he added, "I may marry, Liberty; that sort of thing runs in our family, you know. But I don't think the subject very interesting."

"I grant you. In this we walk shoulder to shoulder. But there is something of vital interest. Just now—I lost."

"Yes, and a very natural thing," Drace agreed.

"No, it wasn't natural. It was unnatural that I should lose just at that time. It was an accident. Listen to me for just a minute. Anybody can do the natural and expected thing. A dog or a cat or any other animal always does. It is doing the thing that nature didn't intend that marks the progress of civilization. Now, I have a proposition to make that may seem unnatural. Perhaps no man you ever met before would make it. But you never met such a man as I am, before. You couldn't look forward and see me. Could you?"

"I didn't," Drace cheerfully admitted.

"And it would have been hard for you to believe that I exist, which I don't, according to the belief of some of my folks. Now, then, what are we getting at? Another stake? No, I am not going to ask you to risk any more of your money. But this is my proposition: You let me have $100; if I win, I'll pay back all I owe. And if I don't, I'll belong to you—your property, body and soul — but with this understanding, I am not to perform any menial service in public. And it is further understood and agreed upon that if by any chance I can raise $100, I am to have the privilege of buying my freedom. The first $100, you understand, was a stake and not a loan. Before you decide, weigh the advantages of owning a man. I will be your Greek, your enslaved philosopher, be your Epictetus and turn your mill. We will revive the ethics of ancient society. Won't that prove that history really does repeat itself?"

"Yes," answered Drace, "but I don't care any more whether history repeats herself than I do that a stammering man repeats himself."

"Now my dear friend soon to be my master, I hope—I ask you; isn't it something to own a companionable slave?"

"Yes. By the way, do you know New Orleans very well?"

"What! Does a bloodhound know the scent of a darkey?"

"All right, Lib—here's $100. And I believe that within an hour from now you'll be my property."

CHAPTER II

Drace sat musing over the strange creature who had just left him, but soon his mind flowed down another channel, far different from a whim or an amusement—his mission in the South, secret, grim and desperate. But life on a river steamboat in that day left little time for brooding for, a few moments after Shottle left to risk his liberty and Drace's hundred, a roustabout thrust his head in at the door and announced that down on the deck there was to be a throwing and tying match. The big fireman of the Leona was about to encounter Vicksburg Joe for the championship of the River.

In an instant Drace was on his feet, all his instincts keen and ready to jump. He was something of a boxer and wrestler, but he had not been taught in this peculiar art of tying an adversary once one has thrown him. And there was that in his mind which made the acquisition of this knowledge seem to him desirable indeed.

As he joined a group of men making their way below, he overheard the Colonel, Miss Lucy's admirer, explaining the gentle pastime. "Tying a man once you have thrown him," the Colonel was saying, "is the climax of prowess. I saw Cal Blodgett throw and tie Nick Pavin at a barbecue at Mount Zion campground, and I have cause to remember it, for the young lady I went with deserted me for the hero, sir—actually stuck flowers into his hair. Here we are."

Two enormous fellows were struggling, while nearby lay a convenient rope. Finally Vicksburg Joe tied the fireman, and he lay helpless, unable to get up.

"I will give you five dollars if you can throw me and tie me that way," called Drace to the victor when the excitement had a little subsided.

Joe looked at Drace a moment. The young man looked powerful enough to be dangerous, but—five dollars was five dollars. He smiled, bowed, spread out the wrinkled rug and took Drace by the hand to lead him forth. To the astonishment of all, Drace threw Master Joe; but he could not tie the champion.

"Show me how it's done," said Virgil, "and I'll give you the money."

For a long time, and until the Colonel and Shottle were worn out with waiting, the two struggled; and so apt was the student that he succeeded finally in turning the master over and tying him. But it seemed that the burly champion was too willing, and Drace insisted on another fall. And now, though the struggle was genuine on Joe's part, Drace tied him. Still more, another five promised, and Virgil was willing to quit.

"Finest sport I ever had!" he said as he turned away to the upper deck again to avoid the questions and felicitations showered upon him. . . .

Drace was musing—not, it must be confessed, upon the serious purposes which had brought him to the South, but upon that girl of the red roses—when Shottle appeared again. Liberty stood in his presence, not with a droop but straight in the manly resolution to discharge the duties an adverse fate had thrust upon him. In the belief that it would make him look more like a slave, he now wore his coat turned wrong side out.

"Master, I salute you," he remarked.

"All right," said Drace. "But turn your coat. I want my slave, the grinder of my mill, to appear respectably clad. You may sit down."

"I thank you, sir."

"You didn't last long."

"No, master. The tangled-haired hag kicked me sidewise, like a cow. In only two pots! But what can you expect of a man that has an ace-full beaten? How long can a man preserve his freedom at that rate? And a fellow with a spindle chin and a nose no bigger than the average wart beat me with four jacks. Crushed me! And he would have crushed Julius Caesar just the same. Well, after all, freedom has many responsibilities. As a slave I'll cultivate what virtues I can get hold of, and look toward old age and a cabin on the hillside. And now as it is natural for every man to hide his degradation, will you permit me to call you Virgil in the presence of other people?"

"I thought you didn't believe in the natural thing! But all right; I grant your request. And now I suppose I'd better give you some pocket-change. It isn't well for even a slave to be broke."

The slave's face brightened with hope. "You couldn't make it as much as five dollars, could you?"

"No, thirty cents."

Shottle took the money and sat drooping. Drace gave him a cigar, and they smoked for a time in silence. At last Shottle looked toward Drace, his face guiltless of the whimsical humor that had hitherto possessed it.

"Master," he said, "I don't want to be inquisitive, and if I'm prying into what's none of my business, I won't mind your saying so. But I want to be a faithful slave, and I can serve you best if I know what—what are my master's purposes in life. For example, was there any special reason for your learning to throw and tie that way? Is there anybody in particular I could help you to put the rope on?"

Drace made no answer for a moment, but bent a searching eye upon his new servitor. Somehow the man's soul seemed to shine transparent in his face; and through it Drace saw sincerity; moreover the longing of youth for comradeship was strong within his lonely soul and won him from reticence.

"Liberty," he said, "did you ever hear of a man named Stepho la Vitte?"

Liberty nodded. "Yes, I've heard of him; they say he's an outlaw, a smuggler."

"And worse," said Drace. "He's the man who—Liberty, give me your word, your oath, that you'll keep this a sacred secret!"

Liberty gave his word and his oath with a certain quaint dignity, and Drace went on:

"Liberty, before the war my father, Alfred Drace, was manager of a line of steamboats on the Ohio. In his employ was the creole Stepho la Vitte. After a time it came to my father's knowledge that Stepho was not only dishonest in ordinary dealings but had been guilty of piracy along the Gulf coast. And so my father dismissed Stepho from a position which the creole's dishonesty had made lucrative and valuable to him.

"Just after that," Drace went on, "the war broke out. La Vitte became a guerrilla—one of the men of Quantrell's stamp, who kept out of the army but who gathered in bands and lived by rapine along the border. I was only a little boy, Liberty, when La Vitte's band of guerrillas crossed the Ohio near Cincinnati and raided the little town where we lived. But the horror of that night still burns like a flame in my brain, Liberty."

Drace stopped, drew from a breast pocket a card and handed it to Shottle. On it was written in bold black characters: "Stepho la Vitte, with the compliments of Alfred Drace's son Virgil."

Shottle read the card, then looked inquiringly at Drace:

"Liberty," the young man explained, "those guerrillas under La Vitte burned our little town and killed nearly every grown man in it. For word was brought of their coming, and the men—nearly all of them married men or old—who had not gone to the war seized weapons and went out to defend their houses.

"They were massacred almost to a man. . . . And it was not plunder alone that led them to choose our little town for outrage, Liberty, but a passion for revenge. For next morning my father was found hanging to

And on His Breast Was Pinned a Card That Read: "Alfred Drace, With the Compliments of Stepho La Vitte."

a tree. And on his breast was pinned a card that read: 'Alfred Drace, with the compliments of Stepho la Vitte."

Liberty looked again at the card he held in his hand, then handed it back to Drace. "I reckon I understand now, master," he said. "You are huntin' this Stepho to—"

"To hang him as high as Haman and to pin that card on his breast," declared Drace passionately. "While my mother lived, Liberty, I could do nothing. You know how women are in such matters. But—she died this spring. Liberty, after long years of grieving for the man that d—d outlaw foully murdered. Now I am free to strike for my honor and my father's memory—to carry justice to that murderer."

With an awkward gesture Liberty stretched forth a hand, caught Drace's and wrung it warmly. "You're like—like Hamlet!" he exclaimed. "I'll do my best to help you, Hamlet. Let me be your Horatio as well as your slave."

Drace returned the fervent handclasp. "My Horatio!" he agreed. And then, solemn again, he added: "It's a worthy cause, Liberty. It's not alone my private vengeance, but the wrongs of a whole community that the ordinary machinery of justice can never right. Why, Liberty, dozens of men were murdered by those drunken fiends; little children were trodden under the hoofs of their horses, and women— Near our house, Liberty, an old couple live in poverty. At the time of Stepho's raid their son and his young wife lived next door to them; they were well-to-do and prosperous. The day of the raid the son had received ten thousand dollars from the sale of some lands. When rumor of the raiders came, he hurriedly hid the money somewhere in the neighborhood, scribbled on a piece of paper the location of that treasure and gave it to his wife before he went out with the other men to fight. Next morning he had been shot; and the young wife had been carried off by those devils—her child with her, after the Indian custom, to keep her from suicide. No one knows what became of her. Nor has that money ever been found. Liberty, if I could find Stepho, get him in my power, I believe I could at least learn what became of that poor young woman—possibly find that paper and learn where to find the money those poor people so sorely need; for once some years ago, a mysterious fellow was caught digging about their yard. . . . But I've talked enough, Liberty. Action! Do you know any more about La Vitte?"

"Not much," replied Liberty. "I believe he is often seen up the River and sometimes down on the coast. He has his friends, and nearly everybody else is afraid of him. So you—we—must keep dark till we get our chance.

"I Never Knew That Before"

Just the other day a customer explained that he had a certain amount of money which he did not need for six months. He asked our advice in placing this money to best advantage.

When we explained that, as a time deposit, his money would begin earning 5 per cent interest imediately, he replied "I never knew that before."

Time deposits offer other advantages also. We will be glad to explain them to you.

The Times Print Shop had sewer connections put in this week. Gunnar Iverson was the map who made the big hole in the ground.

Revival meetings will begin at the English M. E. Church next Sunday. A Rev. Metcalf is the evangelist and he will be assisted by a singer, Mr. Peterson.

Mrs. S. M. Darner came Monday evening from Minneapolis for a visit of a bout a month at the home of her daughter, Dr. and Mrs. J. L. Hesselhuus.

Mr. and Mrs. Ed. Jacobs and Mr. and Mrs. LuVerne Smith drove over to Mason City Tuesday night in Ed's "mud-hen" to see the show "Jiggs On His Vacation."

George Stokesbary went to a hospital at Mason City the other day to have one of his eyes treated. He injured the optic while picking corn when a corn stock flew up and hit him in the eye.

Get your new suit cleaned and pressed before Thanksgiving. Maybe your overcoat needs it too, we do this work here in Klemme. Patronize your home town whenever you can. Wellemeyer's. adv

Miss Mabel Thompson, a former Klemme girl and daughter of Mrs. C. J. Thompson who, a few years ago conducted the hotel in Klemme, and now of Waterloo, was married Wednesday, Nov. 8, to Mr. Mr. Otis Burk at the Little Brown Church at Nashua, at high noon, according to announcements received in Klemme.

Verl Keraus was six years big last Saturday and accordingly he had a fine birthday party at which all of his cousins took part in celebrating the happy event with all kinds of games. Then the biggest part of the party took place when his mother served the refreshments, and the way those kids jit into the eats was nothing slow. Vrl says he'll celebrate another birthday in about a year.

BASKET SOCIAL

There will be a Basket Social at Liberty No. 8 School, Nov. 29. Ladies please bring baskets.

CELIA BROUWER
(N16-23c.) Teacher.

Ominous

Overheard and reported by an enemy-friend of the bride:

"Her fourth venture?"

"Yes, and she's just as superstitious about it as she can be. She just knows it won't turn out well. Her husband gave the minister $10."

"Well, why not?"

"Well, it seems her three former husbands each gave $1, and that makes 13."

STILLE'S IMPLEMENT NEWS

VOLUME 1. Thursday, November 23, 1922 NUMBER

We have seen some mighty big ears of corn this year, and we just got to wondering how big corn really would grow in this country. So if you'll bring in the corn, the largest ear you have we'll give the man with the largest ear $1.00, and the man with the next largest ear 50c. This don't just mean the longest ear, but also the heaviets ear. We'll work it something like this: We will figure 5 points for every inch in length and five points for every ounce in weight, add the points and the ear scoring the highest number of points will win the dollar and the next highest number of points fifty cents. In case of a tie we'll give two prizes. Bring them in now, we'll give the prizes on Saturday p. m., December 2nd. No entries after 2 o'clock on that date. Bring 'em in, looks like corn's going up!

The hardest thing to make many people believe is the truth.

Walt Bredlow took out a new McCormick-Deering feed grinder to grind the feed for his fattening cattle with. Walt feeds a lot of stock and is a successful feeder and he says it pays to grind the feed. He also got a wagon box elevator with it. all he needs to do is shovel in and the outfit will grind and elevate the ground-meal into the wagon or bin. He got a model B. 10 in., which will grind from 48 to 96 bushels an hour, according to conditions.

When a man wants to find something around the house he doesn't look for it; he looks for his wife!

You don't need to drive miles to a sale, stand around all day "a-freezin'." just to get a bid on a second hand feed grined and watch somebody else run it "way up," and buy it. We have feed grinders here second hand ones as well as new ones, we will sell cheaper than you can buy them for at a sale. Somebody's going to get a bargain on one here.

A Vote for prohibition of high prices would be unanimous.

We have a car load of White Rose Gasoline (that famous winter gas) and National Light Kerosene, a high test, non-sooting, gassless, ordorless burning Kerosene coming in the latter part of this week. We also have a variety of other oils in that carload, such as a non-evaporating, non-freezing oil for your radiator, cream separator oil and a large variety of oils and geases. By getting it in carloal lots we can furnish you the gas and kerosene and other oils at a very reasonable price. Come in and get your from the carload.

We have some of the most dependable little engines for running your washing machine you ever saw. Or an engine that will run alone; one that doesn't need to be engineered all the while.

"By th way, Hank, there's a little bill o' 90 cents agin you on my books."

"By gum! Abner, you're the durndest feller to start an argument ever seen."

Ode to the Spreader

This is the ideal season of the year for the thoughtful farmer to buy a manure spreader, the surest profit taker in the whole worll of agriculture. The manure spreader is the ugliest, yet the most important of all secondary farm implements. Buy a manure spreader and make fair ful use of it, and it will buy a water and electric light outfit for your home, an automobile for the family and a radio for entertainment and information.—Jewell Mayes, Secretary Missouri State Board of Agriculture.

WIVES OF FARM BUREAU MEMBERS STUDY SEWING

FARM BUREAU NEWS

The women of six townships of Hancock County have recently become organized and the first of October started definite work on the five months clothing project.

This work is being put on by the Hancock County Farm Bureau with the assistance of Miss Mildred B Elder, Clothing Specialist from the Extension Service at Ames, as supervisor. Miss Elder is well trained for this line of work and is especially good in giving the training. Those who attended the October meetings praised the work very highly and received considerable benefit from the work given.

Erin, Crystal, Twin Lake, Concord Garfield and Ell Townships are the six which are organized and it is hoped that several of the others may become organized soon, for considerable interest is being shown by them

The Clothing Course consists of five all day meetings, conducted in the form of a training school for local leaders. Each township when it becomes organized, selects a township project leader, and twelve local leaders, one or more rom each school district in the township.

The local leaders attend the training school each month, and during the following month hold meetings in their own school district or some other community, passing the work along to other women who may be interested.

Miss Elder was in Hancock County the first week in October, and held training schools on Alterations of Commercial Patterns at the six townships. This lesson included a study of various patterns, and the altering of them to fit the individual figures. It also shows how this method of altering can be used for cutting childrens patterns. During that week, 119 women attended the meetings and there were 59 patterns altered. Mrs. E. J. Schneider, the county chairman, reported that many other women of the county were becoming interested in the work and are being helped by the local leader.

Mrs. A. R. Lewison is the project leader in Erin Township; Mrs. Wilbur Sparks in Crystal Township; Mrs. Will Hoeft in Concord Township; Mrs. Chas. Grau in Garfield and Mrs. Chas. Smith in Ell Township, who with their twelve local leaders, hope to carry on the work successfully in the following months so that as many women as posisble will benefit by it.

Miss Elder will return to Hancock County the week of December 4th, to hold the training schools for the second leson, which is the Making and Fitting of a Foundation Pattern which can be used as a basis for home sewing.

Short Cuts in sewing is the subject of the third lesson, emphasizing the important uses of machine attachments such as the binder, hemmer and tucker. It also takes up the making o tailored pockets, bound buttonholes, various types of plack ets and other helpful suggestions for the busy woman.

The fourth lesson in the five months training course is on Decorative Stitches and Trimmings. This includes both instructions for making the trimmings and some study of the application of them on clothing.

The fifth lesson is Making a Simple Dress, using some o the suggestions gained from previous lessons.

Another group of five townhips will be started in this work in January, which will make eleven taking the work. The other five will be given a chance to take the course some time during the coming year.

Kanawha Creamery Day

Arrangements have been made at Kanawha to hold a Corn, Dairy, and Poultry show on Friday and Saturday, Dec. 8th and 9th. Many will remember the successful show held there last year and it is planned to make this one even better than that. The poultry show has been added this year as a new feature. Good prizes are also going to be offered for the Dairy Heifer Club. The dairy cattle and corn show will be held practically the same as last year. Good prizes will be offered and a good program is being arranged.

NEWS NUBBINS

"The time has come," the Walrus said, "to talk of many things—of shoes and ships and sealing wax; of cabbages and kings."

Americans justly deserve the reputation which they have of being the greatest nation of letter writers in the world. October was the largest month in the history of the Bureau of Engraving in connection with the printing of postage stamps. The number of postage stamps issued by the bureau during that one month will run approximately 2,500,000,000. The largest single day's output was 315,265,000. This is in addition to the issuance of over 307,000,000 stamped envelopes and over 188,000,000 postal cards.

Christmas is a very expensive time for the Postoffice department. In order to accomodate the extra rush of Christmas mail, Uncle Sam spends about $1,000,000 for extra space on trains to transport the mail; $500,000 for extra motor vehicle service;; $1,000,000 for adlitional clerk hire in the postoffices; $350,000 for additional carriers; $275,000 for additional railway mail clerks, and an extra amount that is difficult to estimate for miles of extra twine, millions of additional money order blanks and rental for additional warehousing space to accomodate the package and parcel post matter. All told, the Christmas season costs the government in round numbers $4,000,000 extra. It is roughly estimated that the increase in receipts during December over a normal month is about $8,000,000.

The concentration of stocks of bonded liquor in the United States in 14 warehouses will result in a great saving in the administration of the prohibition and internal revenue laws. At present there are over 800,000 barrels of whiskey scattered over the country in over 300 bonded warehouses. By the concentration of this liquor in a small number of warehouses at least $300,000 is annually saved the storekeeper charges and expenses of guarding the liquor. There is further saving of $157,000 by the readjustment of salaries of warehouse agents and still and additional saving of $250,000 in rental of storage space.

Henry Ford strenuously objects to our financial system. But the fact that Henry has managed to skimp and save until he has a little checking account of $143,000,000, ought to be some argument for the system, at least from Henry's standpoint.

A community without a newspaper is always wishing it had one, and some communities with newspapers far too good for them do nothing but stigmatize them and with hold support. Nowadays there are many small towns that have newspapers without fields from which to draw adequate support. Their publishers could make much better money working for wages, yet they go on working and hoping for the growth of the place and a better day when there will be more paronage for them. Nearly a hundred papers in Iowa have ceased the struggle in the past four years, and in the United States the report is that over 2,000 have thus ceased to operate for the beneit of the stagnant communities.

Says Tierney of the Garner Leader in the last issue: "It has been a great many years since the delinquent tax lists of the several counties of Iowa, have been as large as those published during the past three weeks. We happened to notice the lists as published in some of the counties in this section. Calhoun county, one of the richest and best in Iowa, required a total of nineteen columns to get all delinquents in. Palo Alto's list made up a total of fifteen columns, Winnebago county was considerably better off. Only four columns were required to publish the list of that county. Our own county's delinquent list made nearly six columns—which is fully double the space required in an ordinary year. We take it that the reason for the large lists of delinquents is that the people are short of cash.

MAN WAS NEAGLY CHOKED

Coat Caught in Belt, and Then Tightened Around Neck

LeMars, Ia., Nov. 29.—Phil Mackay, aged thirty-six, a farmer residing twelve miles south of town, was the victim of a peculiar accident which nearly cost him his life. Mackay went into the basement to start a gasoline engine which supplies the light.

Mrs. Mackay a few seconds later noticed the engine had stopped running. She went down to the basement and found her husband nearly strangled to death. His heavy luck coat had caught in the drive belt and wrapped around his neck. His calp was cut open and his face was gashed and his right arm broken in two places. She cut him loose from the belting and summoned help. He was taken to a local hospital. His injuries are serious.

BOLD, BAD, BANDITS HOLD UP CORN HUSKERS

Humboldt Republican:—The road bandits are performing a new stunt. Last week two of them held up a farmer who was husking corn beside the road. They stopped their auto and walked into the field. Suspecting nothing, the farmer greeted them pleasantly, and they lined him against the wagon and relieved him of his husking peg and mitt and gloves, and some handy cash. Then they hastened back to the road and hiked away in the direction of West Bend. They were described as a pair of youngsters about twenty-two years old. They are probably farm boys who are too lazy to work, and have taken this means of securing a livlihood.

AGED LADY INJURED BY AUTO

Mrs. George Nelson of Eagle Grove Struck by Passing Automobile Thursday

Mrs. George Nelson of Eagle Grove was struck by a passing automobile last Thursday while crossing in Eagle Grove street, and received severe injuries. Partial paralysis followed the accident

The driver of the car knowing he had struck the woman, refused to stop, but hurried out of sight. The authorities there are endeavoring to locate him, and will prosecute him if they can get proof as to his identity.—Wright County News.

GAS FUMES ARE DANGEROUS

Clarion Man Thought to be Dead But Manages to Awake Before Undertaker Arrives

(From Wright-Co. News, Clarion.)

To hear his father declare he was dead, possessing his mental faculties but being unable to speak or move to dispel the grave dread of the father, was the lot of Eldon Sumners, son of Mr. and Mrs. Harry Sumners of near town, on Tuesday evening. He was overcome by gas fumes escaping from a furnace in the basement of the home, but is now up and around as lively as ever.

Tuesday evening Eldon and the hired man were sitting in the smoking room in the basement of the Sumner home in the country, waiting for the return of one o the teams.

When they left the basement the hired man complained of a headache which he thought was due to escaping gas from the furnace.

Eldon went to the barn, but refore he could unharness the horses he became deathly sick and called to his father. Before Mr. Sumners could reach him he fainted and stopped breathing completely.

Altho his parents thought he was dead they called for a doctor, and two arrived within twenty minutes. With the aid of lung pumps and pulmotors they were able to remove the gas from his lungs. He says that he could hear his ather say he was dead and he tried to speak but could not even move his lips.

He is now up and feeling as fine as ever. This is the second accident that Eldon has had this fall. the other being when the gas tank on his tractor exploded and burned his hair and head.

Next to the United Kingdom, Italy is the largest importer of American wheat, having received over 32,000,000 bushels in 1920. France ranks next, with 26,000,000 for the same year.

LET'S COP BRITT'S TURKEYS!

Here's Chance For Klemme Sharps To Bring Home Britt Gobblers

Here's a little item which appeared in last week's issue of the Britt News-Tribune which might look like and easy turkey dinner for some of our crack shots:

"On the morning of Thanksgiving, Nov. 30, there will be a poultry shoot staged by the Britt Gun Club at the fair grounds in Britt, starting at 9 o'clock. Turkeys, geese, ducks and chickens will be the prizes. Competition will not be alone at clay pigeon targets but at stationary targets. The shoot is open to everyone and promises some real sport for toters of guns."

This should be easy stuff for you Klemme sharp-shooters. As "Dad" Yahnke is proclaimed the champion duck hunter of Klemme perhaps he can also "pick" up a few ducks and geese at Britt; and, of course, Art Kuck and Chas. Busch would have to go along to see that he did not wring their necks off.

FOUR CLASSES WILL NOT GET IN ON BONUS

There are four classes of former service men who are not entitled to share in the soldier bonus voted by the people at the election.

They are:

No person whose only service was in the Student Army Training Corps.

No person who has received a bonus from another state.

No person who, being in service received civilian pay for civilian work.

No person in military or naval service after April 6, 1917 who refused on conscientious, political or other grounds to subject himself to military discipline or to tender unqualified service.

METHODIST EPISCOPAL CHURCH

Arthur B. Gedye, Pastor

Morning worship 10 a. m. by Rev. M. L. Metcalf.

Sunday school 11 a m

Evening worship 7:30 Rev. M. L. Metcalf.

Evangelistic services each night in the week at 7:30 prompt. Song service led by Mr. John Peterson, singing evangelist. The services of last Sunday were much enjoyed by a large number of people, and resulted in much profit to many.

Mr. Peterson, or "John" as he is known by his many friends whereever he goes, besides leading the singing with "pep", rendered solos at each service, and will sing at each service during the campaign. You will be missing a great treat if you fail to hear John while he is with us.

Bro. Metcal's messages are a

Brother Metcalf's messages are straight from his heart and from the word of God.

Friday evening's service will be specially dedicated to the young people of our community and every one is invited, all young people between the ages of 9 and 90. Come and fill the church. We shall be glad to see the faculty of our high school and all the student body. Subject of the sermon will be: "Making a living vs Making a life."

The Thanksgiving service wil lbe held on Thanksgiving Day in the First Methodist Church, the pastor and congregation having kindly invited the Rev. Metcalf to preach the sermon. Let us all attend to give thanks to the Giver of all Good, the Father of us all.

Evangelistic service in the evening in the M. E. Church at 7:30.

—A. B. Gedye.

A 40-acre tract adjoining the elk refuge near Jackson, Wyo., has been established as a new national bird reservation by Executive order. It will be known as the Flat Creek Reservation, and will serve throughout the year as a breeding and resting place for the wild fowl and other birds of the region. Late in fall and winter it will serve another purpose in affording additional pasturage to the elk herds coming down from the mountains in and about the Yellowstone National Park to winter in the Jackson Hole region. Both the elk refuge and the Flat Creek Reservation are under the purisdiction of the Biological Survey of the United States Department of Agriculture.

GARAGES IN KLEMME UNDER NEW MANAGEMENT

KLEMME SCHOOL NEWS

Basket Ball

Basket Ball has been started in the High School. The girls' team has met and elected a captain and secured a coach. Maybelle Johnson has been elected captain and under the able coaching of Mrs. S. Harvey the team is progressing.

Following is a list of the girls who contemplate playing basket ball this year and the positions they are playing at the present time.

Jumping Center—Marie Blank and Bertha Johnson.

Forwards—Maurine Hake, Dolores Koerner, Elvira Stille, Beatrice Busch.

Guards—Bernice Tanner, Mable Schaeffer, Neota Ridder, Leona Lau nd Ruth Johnson.

Running Center—Maybelle Johnson, Florence Behringer.

The first team has not been selected, but there certainly is some very good material for a fast first team.

The boys have been practicing a little but they have not organized. The services of a coach are needed badly. Volunteers or this will be received gladly.

The problem for a place to play has not yet been solved. It is hoped that the board will try to secure a place for them to play.

Professor Neese gave a very interesting lecture Thursday morning on "Why a student does not make his grades." He showed that the trouble when he does not make his grades is, that during recitation period the student is inattentive and when he should be studying he is thinking of something else.

Literary Association

The Literay Association of the Klemme High School was organized Monday. This is an organization of the High School which will transact all the business of the student body of the school and promote literary activities.

The following officiers were chosen:

President—Clarence Elder.

Secrtary—Andrew Wellemeyer.

Treasurer—Gerald Koerner.

The various committees were also formed and appointed by the president. Each of these committess have a teacher as chairman. Programs will be given in the High School assembly every ew weeks.

One of the first duties of the association is to settle up all standing debts of the school.

Well, those examinations are over for another six weeks. Some didn't flunk—others did.

Ralph Larson has been absent from school for several weeks. He is helping husk corn.

The tenth grade civics class are reading the Constitution of the U. S. They wil read the Constitution of Iowa in addition to the regular civics.

Intermediate Room

Charles Busch is absent from the sixth grade on account of sicknes.

Albert Keeper was absent from school Monday.

SCOUT CORNER

The Boy Scouts held their meeting last Friday night at the Scout Headquarters. Membership cards had been received and gave out. Each scout took the oath again when he received his card as an evidence that he would try to promote scouting. After this the scouts talked of different business.

The troop charter has also been received. You will find this charter in the west window of Kluckhohn's store. This shows that the Klemme troop is in good standing. Look it over and find out a little more about scouting.

Last Friday at the meeting a new candidate, Alden Klotzbach, was questioned as to scouting. At the next meeting he will be examined for the Tenderfoot tests and upon passing them will become a fullfledged scout.

Next meeting on the second Monday in December, or December 10th.

Don't miss it Scouts!

AARON GREIMANN NOW OWNER OF FORD GARAGE

Big Deal Was Closed Tuesday; New Owner Now in Possession

Another big business deal took place in this city Tuesday, when the Ford Garage and buisness belonging to Mr. Albert Erickson, was sold to Aaron Greimann of near Klemme.

Thus we could briefly state the matters of the case but we will give further details of this transaction.

Several months ago Mr. Albert Erickson, of Swea City, purchased the business from Olaf M. Twedt and has since been doing a good business here. Mr. Erickson is a fine fellow and he has made a great many friends who will regret to see him leave the community and the business circle of Klemme. But Al says the garage business was a little out of his line, so took the opportunity to sell.

Everybody in this community is well acquainted with Aaron. He is one of the community's best young men and has been following up the farming industry a great deal of the time. But, he is without a question one of the best mechanics in this part of the state and has had some years of experience in repairing cars, tractors and gas engines—in fact he knows machinery like a frog knows all about water, and naturally a garage business is just where he belongs. We have known him for a number of years and we find that he is an upright, square young man in every sense of the word and we can vouch for him that he will live up to what he said when we interviewed him, "I intend to give all an absolutely square deal, and will conduct this business in an honest and fair manner and will give best service at fair prices," he said.

Mr. Greimann purchased the entire business—the building, lots, equipment, tools, and stock of the garage.

We welcome him to Klemme as one of the business circle and we are we have a good booster for the best interests of Klemme.

HARRY BUSS BUYS INTEREST OF GRAM IN GARAGE

New Firm to be Known as the Coobs & Buss Auto Company

Last week we briefly mentioned that C. M. Gram had sold his interest in the Gram & Coobs Auto Co. to Harry Buss.

Mr. Gram has been connected in the automobile business in Klemme for some time. At first he and Walt Shultz purchased the garage business from Henry Beier. Later Mr. Shultz sold his interest to Ben Coobs who had been employed for some time as a mechanic.

Then last week an agreement was reached between Mr. Buss and C. M. Gram whereby the latter sold his half interest in the business and at his time Harry Buss is well established as one of the proprietors.

Hary is a good mechanic and has had a lot of experience in this line. He is a good square young man and will make a good pardner for Mr. Coobs.

Chris has always been popular in his city and we would all regret to see him leave and hope that he may see fit to remain here.

OLD DOBBIN BUMPS BIG SEDAN

Team Puts Franklin Sedan Out Of Commission at Eagle Grove Last Week

Eagle Grove, Nov. 29.—A runaway team owned by F. L. Hunt of Eagle Grove, crashed into a Franklin sedan owned by Ed Evans of Osage, visiting in Eagle Grove last week. One of the horses struck the car, and the tongue of the wagon rammed into the body. The horse that struck the car was torn loose from the wagon and harness and skidded about fifty feet, but beyond a temporary stunning, was unhurt. The sedan wil need a ned body.

SEIZE BEGGAR'S COSTLY CAR

Horten Malone After Day's "Work" Dresses in Tuxedo and Silk Shirt.

New York.—Under an attachment for $100 City Marshal Hirsch seized the costly automobile in which Horton A. Malone, legless street beggar, rides about with his wife after he has done his day's work collecting money.

Malone has a bank account and an apartment. When he is not "working the streets" here, he and his wife attend country fairs where she runs a concession and he sells pencils, shoving himself about on a board fixed on roller skates.

At home he dresses in tuxedo, silk shirt and diamonds.

The $100 attachment followed a suit which Henry Frank, lawyer, brought for services in connection with trouble Malone's chauffeur got into. Malone said he would fight the lawsuit.

THIEVES STEAL FAMILY BIBLE

Force Open Cellar Window and Loot Philadelphia Home of Valuables.

Philadelphia.—A family Bible was included in the list of booty stolen from the home of Mrs. Thomas Dungon at 2153 North Uber street. During the absence of the family thieves forced a cellar window and rifled the lower floor, where clothing and jewelry valued at $100 were stolen.

Most Deadly Snake in London.

London.—London's Zoo park is now enriched by the most deadly snake known to science. The reptile is known as the Indian hamadryad and measures more than 14 feet. Its bite will kill an elephant in five minutes.

The Safest Plan.

"How did the criminal evade the detective so long?" "Why, he rented a room in the same flat with him."

Preparedness.

"Can you fight?"
"No."
"Come on, then, you scoundrel."

Her Bent.

"Hasn't Alice a decided leaning towards the men?"
"Yes, she is matrimonially inclined."

How the Fight Began.

"The doctor says I must keep my mouth shut in the cold air."
"I'll open the window immediately."

Impossible.

"What happens when an irresistible woman meets an immovable man?"
"She never does."—Life.

Has Nine Lives.

Naylor—"Of course, it is possible to kill time." Taylor—"But tomorrow will bob up just the same."

Before the Police Came.

One Man to Another—There's something about you that I don't like. I believe it is your face!

What, Indeed?

He—What does a movie hero think about?
Bo—What does he think with?

No, We Wouldn't Look.

"Did you ever see a salad dressing?" inquires a waggish correspondent.—Boston Transcript.

Light Conversation.

A man wished to introduce a friend to his wife who was at the seashore. When the pair got to the resort they found the wife in the surf.

Entering the bath house the men donned their suits and went in the water.

The husband introduced his friend. A week later the friend observed the woman he had met in the water sitting opposite him in a street car. He bowed. She looked puzzled for a moment and then exclaimed:

"Oh, how do you do? I didn't know you with your clothes on."

They had to leave the car at the next corner.

Of Another Race.

Mrs. Subbubs had hired a green country girl whose looks reflected the benefit of plenty of fresh air and wholesome country food. One morning Mrs. Subbubs entered the kitchen just after the grocer's boy had been there and she said to the girl, "Why, Hester, what a rosy, happy face you have this morning. You look as if the dew had kissed you."

Hester's face grew still rosier and her eyes sought the floor.

"Please'm," she murmured, "he isn't a Jew, his name is Michael."

His Answer.

Crossing the street the Woman dodged the motor cars, taxis and wagons. She was almost safely on the other side when a very young boy on a bicycle almost steered into her.

The Woman turned around. "Why don't you blow your horn instead of almost knocking a lady down?" she called out crossly.

The boy grinned. "Lady," he yelled, "you can't blow what you ain't got!"—Chicago Journal.

Useless.

"Great men," said Chief Justice Taft at a dinner, "are usually taciturn men. Look at Edison, Henry Ford, Lincoln. All strong, silent fellows.

"Talkative men, after all—" and Mr. Taft chuckled—"Well you know the Mark Twain story:

"'Isn't Gabbell a splendid talker, though?' a friend said to Mark Twain.

"'Best I ever escaped from,' Mark answered."

First Aid.

"The lady has fainted."
"Somebody supply first aid."
"Here's a powder puff."—Louisville Courier-Journal.

THANKSGIVING DAY
November 30

REMEMBER YOUR BLESSING:—Bless the Lord, O my soul: and all that s within me, bless his holy name.

Bless the Lord, O my soul, and forget not all hisbenefits:

Who forgiveth all thine iniquities; who healeth all thy diseases;

Who redeemeth thy life from destruction; who crowneth thee with loving kindness and tender mercies;

Who satisfieth thy mouth with good things; so that thy youth is renewed like the eagle's.—Psalm 103: 1-5.

SHORT SMILES

The Splendid Matches.

"She's making a splendid match."
"So? How much is the man worth?"

A Dove of a Girl.

"Has your typewriter a billing attachment?" "No; but she has a cooing attachment."

Attending Her.

Wilson—"Does your wife drive your car?" Trimm—"Only when I'm at the wheel."—Answers.

They Can't Help It.

Reggie—"Every stage has wings, has it not?" Archie—"Yes; that's what make the chorus girls fly!"

By Comparison.

"I used to think Ta-ra-ra-ra-boom-de-ay was a fool song." "Well?" "Now it's a classic."—Judge.

In One Issue.

He (romantically)—"Shall I tell you the story of my life?" She (bored)—"Yes, if you make it snappy."

Also Make Good Wives.

Mrs.—It says here that clergy make the best husbands.
Mr.—They make the most, anyhow.

His Motive.

"So you are trying to get up in your rich uncle's estimation." "Yes, I want to get down in his will."

George Gruetzmacher and amily will spend Turkey Day at Mason City. We presume many other of our readers will be out of town for dinners with relatives and friends.

Mr. and Mrs. G. A. Kahler and Mr. and Mrs. Earl Kahler, drove down from Dexter, Minn., Saturday for a short visit at the Chas. Velau home and with other relatives and friends. They returned Sunday evening. Earl expects to move back to Klemme in the spring and will farm near here.

Mr. and Mrs. Chris Jacobs, from Garner, accompanied by a relative from South Dakota. were Sunday visitors at the Ed. Jacobs home. After the first of January Chris will step out of the County Auditor's Office and so we hope to see him in Klemme more frequently after that date. We suggested to him that he move to Klemme and the idea sems to strike him quite favorably.

The Mad Race

"Dress! Dress!" the deacon impatiently exploded. "That's all the modern girl thinks about—dress. It's a mad race after fashion."

"Verily," replied the pastor. "Every girl is trying to outstrip the other."

What's the Use?

Sam boarded a trolley, and after a few whispered words with the motorman, shuffled to the exit door at the middle of the car, where the conductor collected fares.

The conductor asked: "Why do you want to get off so soon, Sam?"

"Well, suh, Ah wants ter go ter Sixty-seventh an' Cedah Avenoo, and de motah man he say dey ain't no Sixty-seventh an' Cedah Avenoo!"

The conductor replied: "Well, there isn't!"

"Well," continued Sam, "den' what's de use of me goin'?"

THE PORT OF MISSING MEN

The United States Veterans' bu- has requested the American Legion to help find Robert Carter Page who disappeared recently from St. Elizabeth's hospital in Washington, D. C.

Robert C. Page.

According to a letter from C. W. Swan, chief of the division of information, Page is a neuro-psychiatric case and may have suffered from aphasia. His ther is very anxious to get in touch h him.

Page enlisted in the army as a pri- , Flying School Detachment, Air rvice, January 9, 1918, at San Diego, t. He was honorably discharged e 20, 1919. He is twenty-five years age, about five feet six inches tall; blue eyes, dark brown hair, and a deep scar in the rim of his right . His complexion is sallow. It is ered he went to California.

He has been employed at the follow- places: Sellers Manufacturing pany, Chicago; Cuyahoga Works, yahoga, Cleveland, O.; 1234 Wash- ton street, Chicago, and 168 Car- ter street, Chicago.

Page is a claimant of the United tes Veterans' Bureau. Information to his whereabouts should be for- ded to his father, W. H. Page, 150, Portner Apartments, Washington, C., or to the Information Section U. Veterans' Bureau.

The Thirteenth Post No. 513, Brook- , N. Y., of the American Legion, requested that y information arding the hereabouts of rederick Pasch e sent to it, 357 umner avenue, adquarters at he Thirteenth oast Defense ommand armory. asch disappeared ly 25, having ft home in ap- rent good alth. He is a orld war veteran, having served verseas with the One Hundred and ourteenth infantry, Twenty-ninth di- sion. He is five feet nine inches tall, eighs 165 pounds, has brown eyes d hair, and is twenty-five years old. is wife's address is 312 Myrtle ave- e, Brooklyn.

Frederick Pasch.

Headquarters, department of Texas, Dallas, requests information as to e whereabouts of Cecil T. Lavender, st heard from at Bakersfield, Calif. is brother, William Irving Lavender, r. 96, Lancaster, Tex., is anxious bout him. The missing man is de- ribed as six feet one inch tall, has own hair and eyes, weighs 190 ounds, is thirty-six years old, and as wounded while in France.

A man by the name of Powers, lled accidentally in the Aloah log- ng camp in Washington, was buried Hoquiam Post No. 16 of the Amer- an Legion, which is seeking the ad- ess of his relatives. The following formation was obtained from Ot- wa, Canada: "No. 334744; Clar- ce Raymond Powers; served with e Canadian overseas forces. Broth- , John Powers, last address known, 3 Arch street, Philadelphia." The esent address of John Powers could t be found in Philadelphia.

GOOD USE OF HIS TRAINING

Former Soldier, New Merrill (Wis.) Legion Member and Policeman, Disperses Robber Band.

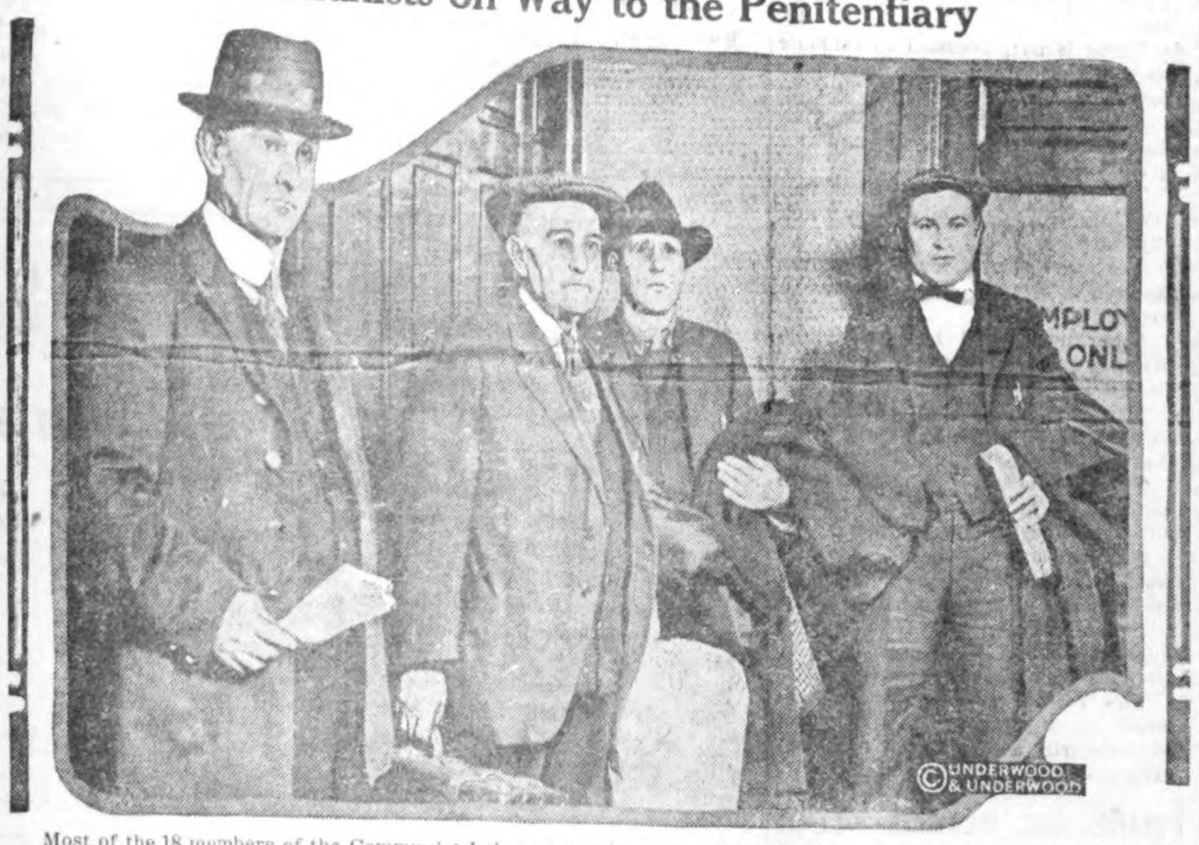
George Severt of Merrill, Wis., is an- ther of those fighting men whom Uncle Sam trained for fighting and who has in peace times proved he was trained well.

George Severt.

Severt is a member of the Merrill police force. A gang of yeggmen, in the darkness of night, attempted to rob the post office. Severt discovered the outlaws, several in number at work on the vault. He challenged the lookout, as the American doughboy used to challenge on the firing line, and his answer was a hail of bullets. Drawing his revolver, Severt engaged in a battle of bullets, driving the robbers to cover behind a corner of the building.

Then the policeman, who is a member of the Edward Burns Post, American Legion, at Merrill, ran around the building to attack from the rear. And his attack was so hot that the yeggmen fled precipitately.

Communists on Way to the Penitentiary



Most of the 18 members of the Communist Labor party who were convicted in Chicago two years ago of violating the Illinois espionage act surrendered to the sheriff the other day and were promptly taken to Joliet or the county jail to begin serving their sentences. Here are Joe Miesler, Harry Shippman and Charles Crumbien with a guard leaving for the penitentiary.

We'll Be at the Big Live Stock Show

All over the country raisers of fine live stock are giving the final touches to the animals they are sending to the International Live Stock show, which will be held in Chicago Dec. 2 to 9 and which promises to be the biggest thing of its kind ever held. One of the exhibits and his pretty friend are shown above.

Mr. Herrick Shoots at Rambouillet

The American, British, Spanish and Italian ambassadors to France were the guests of President Millerand at the first official hunting at Rambouillet, hunting grounds of the French government. United States Ambassador Myron T. Herrick is pictured here at the meet.

Turks Can't Use These Cannon

Greek army officers dismantling the cannon at Rodosto, eastern Thrace, before leaving that territory as the Turks took possession.

SENATOR FOR A DAY

Mrs. W. H. Felton, the lady from Georgia nominated to fill the unexpired term of the late Senator Watson, being assisted down the steps of the United States capitol by a newspaper man. Mrs. Felton claimed the right to be sworn in and seated, and Senator-elect George agreed to waive the presentation of his credentials for one day, in order to enable Mrs. Felton actually to serve.

HER VOICE AMAZES

Marion Talley, the fifteen-year-old daughter of a railroad telegraph operator of Kansas City, Mo., who had her voice judged by Otto Kahn, chairman of the board of directors of the Metropolitan Opera company, New York, and Director Giulio Gatti-Casazza, and amazed the opera conductors by her wonderful lyric soprano. She was advised not to appear before public audiences for at least three years and to study under a good teacher.

Auto Industry Enormous.

Figures recently published by a Detroit plant show that there are 82 passenger car manufacturers in this country, and 51 truck makers. Of this number there are only 30 passenger car plants which are classed in the major industrial field, while the other 52, mostly assembled cars, showed but a slight volume of business during the boom months of this year. Of this total more than 50 cars and trucks are made in Detroit and more than 40 in Michigan.

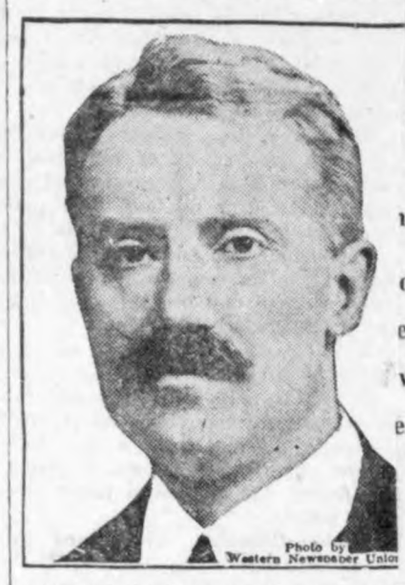
These figures do not take into consideration the body, radiator, and equipment factories which would boost the figures materially.

Autumn Days Inspire.

"A round of pure delight" is fallitime weather to that fine philosopher, "Uncle John," who writes of it:

PEOPLE TALKED ABOUT

Wilson & Colby Have Nation for Client



ld out my interest in the AUTO CO. to Mr. Harry has possession) I ask all to me or the old firm to ıe account at once.

o thank the many friends eir liberal patronage of the was in business.

Chris Gram

posed of the three provinces or pal nopol—is not recognized by the Uni try. Should any international comp and the east Galician palatinates, t the Polish legation here, for Poland although a degree of autonomy is al

Major Astor to Se ing to order of

Maj. John Jacob Astor, contestin for a seat from Dover, was interrup ed by a heckler who inquired whethe he was going to expose his wealth t British taxation. In reply he said, "I am transferring my wealth from America to this country." Naturally the London newspapers made much of the incident. One headline read: "Astor millions coming here." By some it was assumed the major, who is a brother of Viscount Astor, merely referred to his recent investment in Lord Northcliffe's share of the London Times stock, which he and J. A. Walter purchased for more than $6,000,000, but others gave the remark a more sensational turn.

New York is quite excited over the incident—and naturally it is. The realty and personal holdings of the late Baron (William Waldorf) Astor in the United States totaled more than $80,000,000, according to a referee's report filed last March in Supreme court. Of this vast fortune, in which Major Astor participated with Viscount Astor, his elder brother, $50,000,000 is represented in realty.

The property was conveyed to the two sons in trust in 1919, and the income from that source is placed at $5,291,260. In addition Major Astor was given outright by his father Manhattan realty valued at more than $7,000,000.

Premier Mussolini's Very Lively Career

Benito Mussolini, whose spectacular rise to the Italian premiership has excited world-wide interest, has had a lively career. For instance, when he was about thirty he had a narrow escape from arrest by fleeing to Switzerland. His entrance into that country was dramatic. He was pursued over the frontier at Chiasso by Italian gendarmes who had a warrant for his arrest, but won his race for freedom by a scant hundred yards and the Swiss customs officers refused to surrender him.

Penniless, he crossed the St. Gothard pass on foot and upon his arrival in Lucerne was arrested as a vagabond without visible means of support.

Later he entered the University of Lausanne, but as he was a revolutionary Socialist and wrote many fiery articles for the Swiss and Italian Socialist press he was finally expelled from Switzerland after several police warnings which he refused to heed.

Then he went to Trent, in the old Austrian Tyrol, whence he was also expelled in 1911. Upon the declaration of a general amnesty he left Trent for Milan where he founded the newspaper Popolo d' Italia, which is now the organ of the Fascisti, of whom he organized the first unit shortly after the close of the war.

He aroused the hatred of the Socialists in the conduct of his paper, however, by his campaign in favor of Italy's entrance into the World war on the side of the entente, and later fought with the Italian forces at Monte Nero and Carso where he was severely wounded.

A. M. Owsley, Head of American Legion

Alvin M. Owsley of Denton, Tex. (portrait herewith), was elected national commander of the American Legion at the New Orleans convention. The young major outdistanced his competitors early in the balloting, and when the end came was more than 300 votes ahead.

Owsley, who is thirty-three years old, is one of the most popular soldiers ever honored with the biggest job of the Legion.

A lawyer, Owsley resigned as a district attorney in Texas at the outbreak of the war and recruited a battalion. After serving as division insurance officer and senior instructor for the third officers' training camp at Camp Bowie, Tex., he went overseas and took part in two major operations.

Illinois turned the tide of the election. Opposing Owsley were William F. Deegan of New York, Joseph Thompson of Pennsylvania, and John A. McCormick of Colorado. Each nomination brought equal cheers, and the result was doubtful. The first ten states scattered their votes. Then Illinois was called. The leader of the delegation rose and shouted: "Sixty votes for Owsley." The final result was that the election was made unanimous.

NOTICE TO AUTOMOBILE OWNERS.

After December 1st, 1922, this office will begin issuing 1923 licenses. Please bear in mind that unless your last registration number is given in applying for 1923 licence it will be necessary for us to return your application for that information.

JOHN SUURBALLE,
(Nov. 23-J 1.) Treasurer.

apartment. When he is not "working the streets" here, he and his wife attend country fairs where she runs a concession and he sells pencils, shoving himself about on a board fixed on roller skates.

At home he dresses in tuxedo, silk shirt and diamonds.

The $100 attachment followed a suit which Henry Frank, lawyer, brought for services in connection with trouble Malone's chauffeur got into. Malone said he would fight the lawsuit.

THIEVES STEAL FAMILY BIBLE

Force Open Cellar Window and Loot Philadelphia Home of Valuables.

Philadelphia.—A family Bible was included in the list of booty stolen from the home of Mrs. Thomas Dungon at 2153 North Uber street. During the absence of the family thieves forced a cellar window and rifled the lower floor, where clothing and jewelry valued at $100 were stolen.

Most Deadly Snake in London.

London.—London's Zoo park is now enriched by the most deadly snake known to science. The reptile is known as the Indian hamadryad and measures more than 14 feet. Its bite will kill an elephant in five minutes.

The Safest Plan.

"How did the criminal evade the detective so long?" "Why, he rented a room in the same flat with him."

ART IN CUTTING DIAMONDS

Peculiar Properties of the Precious Gem Must Be Thoroughly Understood by the Lapidary.

A diamond cutter, writing for the London Mail, relates some interesting facts as to forms into which diamonds are cut to enhance their luster. A diamond is the hardest substance in nature and cannot even be scratched except with another diamond, while some stones can be cut only with their own powder.

Yet the hardest of all can be cleft by a heavy blow delivered in the right direction; that is, parallel to the faces of the eight sides which its crystal shows. It is this property that permits the very large stones, such as the "Cullinan" diamond, to be worked.

In spite of this, a diamond has the simplest composition of all precious stones, for it is only crystalized carbon, and a near relation to ordinary graphite, usually called "blacklead."

But it has been formed by enormous pressure in the remotest depths of the earth's crust, and probably forced toward the surface by steam.

The principal forms into which a diamond is cut are:

Brilliants, with an octagonal face surrounded by many smaller facets.

Rose diamonds, with a flat base above which are two rows of triangular facets, the uppermost terminating in a point.

Table diamonds, which are thin stones cut with triangular facets.

What makes the diamond so precious is the presence of inward "fire"—the mysterious gleams of blue and red that change with every movement, and which makes such an appeal to our sense of beauty.

The charm of precious stones lies in their brilliancy and luster, the intensity of the latter depending upon the polish of the surface; for if the stone is dull or uneven the light is scattered and not reflected.

The only stones at all approaching it are zircon and the green garnet called "olivine." The luster of all other stones is vitreous, such as seen on the surface of broken glass. And the third type is that shown by resins.

In order to bring out the full beauty of a stone it must be cut in such a way that the facets reveal its splendor, and the art of the lapidary rests upon his knowledge of what becomes of the light when it falls upon the stone; so he must understand the laws of reflection and refraction.

When a white light is refracted into a colorless stone it changes and is split up into a spectrum. Since the refractive index increases progressively as the wavelength of the light decreases, a normal spectrum is violet at one end and passes through green and yellow to red at the other end; for instance, in the familiar rainbow. The width of the spectrum also varies, and it is this "dispersion" that determines the "fire."

It would be difficult to name any substance around which has been woven such a web of romance.

Safety Deposit Free.

The story comes from Scottsburg and it shows all the shrewd persons are not in the large centers of population. A stranger of ordinary appearance and apparently of moderate means walked into the bank and asked to borrow $5. He was told the bank did not loan such small sums, but when he insisted that the business of a bank was to loan money, that he needed the sum mentioned, and that he had good collateral, the note was made out, the banker regarding it as a good joke. Then the stranger pulled out $10,000 worth of Liberty bonds as collateral and left them, remarking that at another bank they had wished to charge him $5 for a safety deposit box to keep them in, but now the bank would keep them for him free, and he would have the bank's $5 to amuse himself with.—Indianapolis News.

Thinking and Doing.

"It is perfectly easy to write '1922' if you only think what you are doing," remarks the Boston Globe.

That is one of the great Ifs that continually interpose hazards and obstacles in the path of the weary mundane pilgrim. Possibly it is the most important one of all. The majority of our errors and sins of omission, especially those of a minor character, are due to our failure to think what we are doing. But the mere recognition of this failure and the earnest desire to correct it will not prove sufficient in most cases as an effectual remedy. The great trouble is that it is practically impossible to think what one is doing in very many particulars.

Valuable Phosphate Fumes.

Millions of tons of phosphates previously wasted will be saved potentially as a result of the perfection of a new reclamation system devised by the United States Department of Agriculture.

Heretofore heavy annual wastes of valuable phosphatic material have occurred during the mining and manufacturing processes. The new method of controlling these losses consists in mixing the "run-of-mine" phosphate with sand and coke and smelting the mass in an electric or fuel-fed furnace. In this process the phosphoric acid is driven off as a fume and may be readily collected in concentrated form.

Chilean Oil Field.

The most promising petroleum field so far discovered in the Province of Antofagasta, Chile, is that in the pass of Siglia, near the Argentine frontier; but it remains to be seen if the petroleum will be found in paying quantities.

JUST JOTTINGS

If you would become a student of human nature begin by studying your own.

There is no possession so valuable as good habits, and none worse than bad ones.

A man who owns a good cow is almost as conceited as a man who has a good garden.

The trouble with some girls is that they are only giddy when they think they are gay.

The average man doesn't know the difference between a dimple and a crease of fat.

Some men spend half their time framing promises and the other half in making excuses.

Gratitude is the most inexpensive commodity of which the world never had an over-supply.

We know of some fellows who are howling for justice who would be surprised if they should get it.

Any woman who hasn't seen her husband fishing doesn't know what a patient man she has married.

It is a pleasant task for a man to pull the weeds that grow upon a pretty widow's bonnet—sometimes.

The reason a man scratches his head when puzzled has never been satisfactorily accounted for by scientists.

MADE HIS MEANING CLEAR

Old Darky's Description of Wife's Failing Aptly Spelled Out Word He Didn't Understand.

Moses Diggs, an old Alabama darky, had been arrested for having more than one wife, the last woman being the complainant. He happened to be well known locally and considered an orderly character.

"How many wives have you had?" demanded the examining judge.

"Six, yo' honah," was the reply.

"Why couldn't you get on with them?"

"Well, suh, de fust two sp'iled de white folks' clo's when dey washed 'em; de thu'd worn't no cook; de fo'th was ject nacherally lazy; an' de fifth—I'll tell you', jedge, de fifth, she—"

"Incompatibility?"

"No, yo' honah," said the negro, slowly, "it worn't nothin' like dat. Yo' jest couldn't git on with her onless yo' was somewhars else."—Harper's Magazine.

HAD ANOTHER THINK COMING

Bill Was Sadly Mistaken Concerning the Proper Classification of Apple His Mates Enjoyed.

Bill Symes drew a large, pink apple from the side pocket of his coat and prepared to attack it, when another of his workmates reached over and took the apple, saying:

"What kind of apple is that, Bill—Cox's Orange Pippin?' Then, as he munched, he said: "No, it hain't!"

Another loafer reached for the apple, saying:

"Cox's Orange Pippin, my happy aunt! Don't yer know a Beauty of Kent when yer sees it? Lemme taste it. No, 'tisn't that!"

Still another grimy paw reached out and took the fruit, deploring:

"You fellows act as if you'd never seen apples before! That hain't no Beauty of Kent, it's a Dutch Mignon. No, 'taint!" as he took the last bite of it. "What was that apple, Bill?"

"I thought," replied Bill sadly, "that apple was my lunch!"—London Answers.

He Was Two of a Kind.

The marine was six feet five inches in height, and the quartermaster sergeant at Parris Island was a bit worried for fear he would be unable to find a uniform to fit him.

"You sure are a whopping big marine," he said at last. "I'll bet your father and mother were giants."

"Nope," said the husky. "Father was a little guy, only five feet four, and mother only came up to father's shoulder."

"That's odd—very odd!" commented the Q. M. How do you account for your huge size?"

"Well, sarge," explained the husky, "just between you and me I think I'm twins."—The Leatherneck.

Out of the Mouths of Babes.

You've heard about the little girl who was given a woolly bear that she would name "Gladly," after the bear in the hymn—"Gladly, my cross-eyed bear."

Another little girl was asked if she knew who Nero was.

"He's the Good Man," she answered, in awed tones.

"The Good Man? What makes you think he's the Good Man?" said her teacher.

Then, in answer, the little girl, still in awed tones, quoted the hymn, "Nero My God to Thee!"

Costly Language.

In one of the palatial homes of the new rich, a man sat before a blazing fire, a cigar between his teeth, a liqueur at his elbow. His friend sat opposite, likewise fortified.

The host was bewailing the enormous cost of keeping his son at college.

"Such expenses!" he cried. "And the worst of all is the languages."

"Languages?" repeated his friend. "How's that?"

"Well," said the host, "there is one item in the bill which runs, 'For Scotch, $250.'"—London Answers.

They Knew.

"Eggs are cheaper than they have been in years."

"Yes, I know it; my hens are laying."

BIBLE THOUGHT —FOR TODAY—

Bible Thoughts memorized, will prove a priceless heritage in after years.

Thursday

FORGIVE AND BE FORGIVEN:—When ye stand praying, forgive, if ye have aught against any: that your Father also which is in heaven forgive your trespasses.—Mark 11:25.

Friday

SAFETY FROM EVIL:—The fear of the Lord tendeth to life: and he that hath it shall abide satisfied; he shall not be visited with evil.—Proverbs 19:23.

Saturday

IT CAN'T BE DONE:—No man can serve two masters: for either he will hate the one, and love the other; or else he will hold to the one, and despise the other. Ye cannot serve God and mammon.—Matthew 6:24.

Sunday

EARTHLY TREASURES:— Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal.—Matthew 6:19.

Monday

TEACHING TRANSGRESSORS:—Restore unto me the joy of thy salvation; and behold me with the free spirit. Then will I teach transgressors thy ways; and sinners shall be converted unto thee.—Psalms 51:12, 13.

Tuesday

GOD KEEPS HIS COVENANT:—Know therefore that the Lord thy God, he is God, the faithful God, which keepeth covenant and mercy with them that love him and keep his commandments to a thousand generations.—Deuteronomy 7:9.

Wednesday

IN SPIRIT AND IN TRUTH:—God is a spirit: and they that worship him must worship him in spirit and in truth.—John 4:24.

Nearly two thirds of the butter produced in the United States in the year 1921 was made in creameries.

Production o potatoes this year in 16 countries is estimated to be 675,000,000 bushels more than last year and 40,000,000 more than the average production for the five years of 1909-1913. The total acreage of potatoes in 1922 for the 24 countries for which estimates are available is 20,261,000 acres.

There was considerable moving in Klemme the fore part of the week. Paul Grange moved from the Tom Nelson place into his new home in the west part of Klemme; Ed. Jacobs then moved into the house vacated by the Granges. Lee Klotzbach moved into the Wilkins house vacated by Jacobs. Now you will know where to ind your neighbors.

Rev. Metcalf and Mr. Jo... son came Saturday evening... gin the evangelistic campa... They had conducted meeti... little town near Algona.

Mr. and Mrs. Lew Samp... turned from Des Moines S... While there Lew had an op... on his eye. He is getting a... fine shape now.

KICKIN' THE DORG AROUND

A Colyum O' Humor By the Office Divvil Hisself

A Good Reason

"Jimmy," said the teacher, "why is it that lightning never strikes in the same place twice?"

"Because," said Jimmy confidently, "after it hits once, the same place ain't there any more."

Try Cabbage, Ann.

Teacher (to history class) "What makes the Tower of Pisa lean?"

Fat Anna, "If I knew I would take some myself."

It Was a Good Report at That

Mrs. Murphy (to teacher) "What do ye mane by writin' 'Poor Nut' on me Patrick's report car-rud?"

Teacher, "Oh, that's the visiting physician's report, meaning Poor Nutrition."

An Easy Examination

When was the war of 1812?

Who is the author of "Well's Outline of History?"

In what season of the year do we have winter?

What is the name of the state in which Indiana is located?

Correct

"What do you know about Czecho-Slovakia?"

"It's hard to say."

Cuckoo Has the Flu

Little Ethel had spent the day at her aunt's and had been much interested in the new cuckoo clock. Telling her father about it that evening she cried excitedly: "Oh, Daddy! Aunty has a new clock and every little while there's a bird comes out and sneezes!"

Then What?

Mother, "Jessie, the next time you hurt that kitty, I am going to do the same thing to you. If you slap, I'll slap you. If you pull its ears, I'll pull yours. If you pinch it, I'll also pinch you. There now."

Jessie, (after a moments thought) "Mamma, what'll yo udo if I pull its tail?"

A Fast Worker

She frowned on him and called him Mr.

Because in fun he'd merely Kr.

And then for spite

The following night

This naughty Mr. Kr. Sr.!!!

Don't It?

"Father, what does the American eagle stand for?"

"Anything."

Unpardonable

Artist—"How do you like my portrait of the judge?"

Friend—"How much is he going to give for it?"

"What do you think he ought to give me?"

"Six months!"

Nobody Do

Prosecuting Attorney—"You say that on the evening in question you went to this cafe for dinner. What did you have?"

Witness—"I don't know."

"You don't know? Don't you remember what you ordered?"

Oh, sure! I ordered beef hash."

A Happy Thought

A lady who kept a little curly poodle lost her pet and called on the police to find it. The next day one of the force came with the dog very wet and dirty.

The lady was overjoyed, and asked a number of silly questions, one being:

"Where did you find my darling?"

"Why, ma'am," said the officer, "a fellow had him on a pole and was washing windows with him!"

Confidential

He—Do you like my moustache?

She—Well, just between you and I, yes!

Echo Answers

She—"'Fess up, now, that you men like talkative women as well as you like the others."

He—"What others?"

Rapid Fire Repartee

"Hey! You there with the sorrel top!" snarled a customer in the rapid fire restaurant. "My order's been in twenty minutes and I don't want to wait all day for it. See?"

"What you want ain't what you need!" retorted Claudine, the waitress. "You need a book of etiquetee. If manners had been raining down from heaven forty days and nights, you'd still be a rube. Try that on your canary!"

A Touching Matter

Pastor—"Don't you think I have touched them rather deeply this morning?"

Deacon—"I don't know, sir. I haven't counted up yet."

Which Served Very Well

"This check is doubtless all right" said the bank cashier politely, "but, have you anything about you by which you could be identified?"

The pretty young thing faltered: "I have a mole on my left knee."

Tackled the Wrong Man

"A burglar got into my house about three o'clock this morning as I was on my way home from the club."

"Did he get anything?"

"He certainly did. The poor fish is in the hospital. My wife thought it was me!"

Mrs. George Stokesbary and son returned from Mason City Monday where they had been for a visit with Mr. Stokesbary who is in the hospital there receiving treatment for one of his eyes. He is much better now.

Christmas Goods are now on display at Wellemeyer's—what's the use to wait? Buy now and get first choice. Wellemeyer's display of Christmas Gift Goods is better than ever before. Buy now. adv

Notice--

As I have sold out my interest in the GRAM & COOBS AUTO CO. to Mr. Harry Buss, (who now has possession) I ask all who are indebted to me or the old firm to please settle up the account at once.

I also wish to thank the many friends of the firm for their liberal patronage of the past, and while I was in business.

Respectfully,

Chris Gram

We are going to order a carload of

WIRE

before long. We will take your order forany kind of wire-- give you the car lot price if taken off the car, and will carry the account until April 1, 1922.

HARDING ASKS CONGRESS FOR SHIP SUBSIDY

Special Session Hears President's Plea for Aid for U. S. Merchant Marine.

SPEAKS TO JOINT SESSION

Declares It Would Be Most Discouraging Should a Measure of "Such Transcending National Importance" Have Its Fate Depend on Partisan Objection.

Washington, Nov. 22.—Enactment of the administration merchant marine bill was urged upon congress by President Harding as necessary to relieve the government of present "staggering losses" in operation of the war-built merchant fleet, and to establish a program of assured shipping to serve the nation in war and give a guaranty of commercial independence in time of peace.

Personally addressing a joint session of the house and senate, the executive declared an actual monetary saving to the government would result from the proposed law. He challenged every insinuation of favored interests and the enrichment of the special few at the expense of the public treasury. The legislation, he asserted, automatically guarded against enrichment or perpetual bestowal. The President said:

Text of Message.

"Members of the Congress: Late last February I reported to you relative to the American merchant marine, and recommended legislation which the executive branch of the government deemed essential to promote our merchant marine and with it our national welfare.

"Other problems were pressing and other questions pending, and for one reason or another, which need not be recited, the suggested legislation has not progressed beyond a favorable recommendation by the house committee. The committee has given the question a full and painstaking inquiry and study, and I hope that its favorable report speedily will be given the force of law.

Would Clear Atmosphere.

"It will be helpful in clearing the atmosphere if we start with the frank recognition of divided opinion and determined opposition. It is no new experience. Like proposals have divided the congress on various previous occasions. Perhaps a more resolute hostility never was manifest before, and I am very sure the need for decisive action—decisive, favorable action—never was so urgent before.

"We are not now dealing with a policy founded on theory; we have a problem which is a grim actuality. We are facing insistent conditions, out of which will come either additional and staggering government losses and national impotence on the seas, or else the unfurling of the flag on a great American merchant marine commensurate with our commercial importance, to serve us as carrier of our cargoes in peace and meet the necessities of our defense in war.

"There is no thought here and now to magnify the relation of a merchant marine to our national defense. It is enough to recall that we entered the World war almost wholly dependent on our allies for transportation by sea. We expended approximately three billions, feverishly, extravagantly, wastefully and impractically. Out of our eagerness to make up for the omissions of peace and to meet the war emergency we builded and otherwise acquired the best merchant fleet, which the government owns today.

Gives U. S. Figures.

"The war construction and the later completion of war contracts, where completion was believed to be the greater economy to the public treasury, left us approximately 13,200,000 gross tonnage in ships. The figures are nearer 12,500,000 tons now, owing to the scrapping of the wooden fleet.

"More than half this tonnage is government owned, and approximately 2,250,000 tons are under government operation in one form or another. The net loss to the United States treasury—sums actually taken therefrom in this government operation—averaged approximately $16,000,000 per month during the year prior to the assumption of responsibility by the present administration.

"A constant warfare on this loss of public funds, and the draft to service of capable business management and experienced operating directors, have resulted in applied efficiency and enforced economies. It is very gratifying to report the diminution of the losses to $4,000,000 per month, or a total of $50,000,000 a year; but it is intolerable that the government should continue a policy from which so enormous a treasury loss is moreover, attends operation of less than a third of the government-owned fleet.

Would Diminish Burden.

"It is not, therefore, a question of adding new treasury burdens to maintain our shipping; we are paying these burdens now. It is not a question of contracting an outlay to support our merchant shipping, because we are paying already. I am not asking your authorization of a new and added draft on the public treasury; I am appealing for a program to diminish the burden we are already bearing.

"Let us omit particulars about the frenzied war-time building. Possibly we did full as well as could have been done in anxious circumstances. Let us pass from the moment the vital relationship between a merchant marine and a commercially aspiring nation. Aye, let us suppose for a moment the absurdity that with one $8,000,000,000 experience and with the incalculable costs in lives and treasure which may be chargeable to our inability promptly to apply our potency—which God forefend happening again—let us momentarily ignore all of these and turn to note the mere business problem, the practical question of dollars and cents with which we are confronted.

Urges Change at Once.

"When your executive government knows of public expenditures aggregating $50,000,000 annually, which it believes could be reduced by half through a change of policy, your government would be unworthy of public trust if such a change were not commended, nay, if it were not insistently urged.

"And the pity of it is that our present expenditures in losses is not constructive. It looks to no future attainments. It is utterly ineffective in the establishment of a dependable merchant marine, whereas the encouragement of private ownership and the application of individual initiative would make for a permanent creation, ready and answerable at all times to the needs of the nation.

"But I have not properly portrayed all the current losses to the public this year.

"We are wearing out our ships without any provision for replacement. We are having these losses through deterioration now, and are charging nothing against our capital account. But the losses are there, and regrettably larger under government operation than under private control.

"Only a few years of continued losses on capital account will make these losses through depreciation alone to exceed the $50,000,000 a year now drawn to cover losses in operation.

U. S. Builded Poorly.

"The gloomy picture of losses does not end even there notwithstanding the known war cost is $3,000,000,000. For the present tonnage I will not venture to appraise its cash value today. It may as well be confessed now as at some later time that in the mad rush to build in establishing shipyards wherever men would organize to expend government money when we made shipbuilders overnight quite without regard to previous occupation or pursuits we builded poorly—often very poorly. Moreover, we constructed without any formulated program for a merchant marine.

"The war emergency impelled and the cry was for ships—any kind of ships. The error is recalled in regret rather than criticism. The point is that our fleet costing approximately $3,000,000,000 is worth only a fraction of that cost today. Whatever that fraction may be, the truth remains that we have no market in which to sell the ships under our present policy, and a program of surrender and sacrifice and liquidation which is inevitable unless the pending legislation is sanctioned, with post scores of millions more.

Sees Future Loss.

"When the question is asked, why the insistence for the merchant marine act now? The answer is apparent.

"Waiving every inspiration which lies in a constructive plan for maintaining our flag on the commercial highways of the seas, waiving the prudence in safeguarding against another $3,000,000,000 madness if war ever again impels, we have the unavoidable task of wiping out a $50,000,000 annual loss in operation and losses aggregating many hundreds of millions in worn-out sacrifices, or scrapped shipping. Then the supreme humiliation, the admission that the United States—our America, once eminent among the war-time nations of the world—is incapable of asserting itself in the peace triumphs on the seas of the world.

"It would seem to me doubly humiliating when we own the ships and fail in the genius and capacity to turn their prows toward the marts of the world.

"This problem cannot longer be ignored, its attempted solution cannot longer be postponed. The failure of congress to act decisively will be no less disastrous than adverse action."

OLD OPERATOR TO RETIRE

J. C. Ward, Friend of Edison, Has Been Sixty Years Manipulating the Keys.

Visalia, Cal.—"Thirty" soon may be sent over the wires by J. C. Ward, veteran telegraph operator, and in his youth a friend of Thomas A. Edison. Ward, whose 60 years of telegraphing make him probably the oldest operator in point of service in the United States, has had charge of an office here for more than 35 years and he wants to retire.

Ward started telegraphing back in 1862, working for the Grand Trunk at Mount Clemens, Mich.

During the Civil war Ward served as a telegraph operator on General Grant's staff. Later he came west for a commercial firm and worked at Sacramento in the pioneer days. Siberia called him and he worked for a while on construction jobs there.

Age has only slightly affected his skill with the keys

BREAKDOWN OF DRY LAW SEEN

President and Cabinet Talk of Prohibition Enforcement Failure.

REMEDIES ARE DISCUSSED

Harding Sees Peril in Violations of the Volstead Act—Public May Be Appealed to for Support of Law.

Washington, Nov. 25.—Complete breakdown in liquor law enforcement, bringing with it a contempt for all law and, graver still, a lack of full-measured respect for American institutions, is giving President Harding and other administration leaders grave concern. The entire time of the cabinet session Friday was given to consideration of the failure to make the country measurably dry.

The cabinet concluded that the people were to be held accountable for the failure rather than the law. An official statement made after the cabinet meeting as to the situation throughout the country as far as prohibition is concerned created a mild sensation in Washington because it was so in contrast with official announcements made over a long period of months by Prohibition Commissioner Haynes, which in every instance proclaimed a growing respect for the law and an increase in sentiment for law enforcement.

The concern of the President and his advisers is primarily with the menace to the country seen in the disregard for the prohibition law by otherwise law-abiding citizens.

The cabinet discussed ways and means of strengthening law enforcement and regard for the prohibition laws and the eighteenth amendment. The conclusion was that some form of appeal to the people was necessary. A means is being sought to get the support and help of the conscience-driven, government-loving members of the community that they will not permit or countenance violations of the liquor laws any more than other laws.

STARTS QUIZ ON KU KLUX

Reported Klan Invaded Capitol at Washington in Full Regalia—Congressman Demands Probe.

Washington, Nov. 25.—Congressional investigation of published reports that the Ku Klux Klan had invaded the United States capitol building and in full regalia staged an initiation ceremony was demanded by Representative John W. Rainey, Illinois.

He introduced a joint resolution providing for an investigating committee of three senators and four members of the house. The committee would inquire also into assertions that the state, war and navy and other government buildings have been made use of for Klan ceremonies.

COAL DISTRIBUTION STAYS

Federal Control Must Continue Until January 1, the President Tells Director C. S. Spens.

Washington, Nov. 25.—Federal control of coal distribution must be continued until January 1, President Harding decided. C. S. Spens, federal fuel distributor, called on the President to resign his office, but after discussing the situation agreed to remain in service until that date and to continue in effect the present supervision or a modification of it until the first of the year.

WILL RETIRE GOV. HARDING

President Decides Not to Reappoint Head of the Federal Reserve Board.

Washington, Nov. 25.—Following the filing of formal protests by members of the senate farm bloc against the reappointment of W. P. G. Harding as governor of the Federal Reserve board, President Harding has assured members of the bloc that he will defer to their wishes and will not reappoint Mr. Harding.

FORMER PASTOR HANGS MAN

Iowa Preacher-Sheriff Springs the Trap on Second Murderer Since Taking Office.

Fort Madison, Ia., Nov. 25.—Sheriff W. E. Robb, former pastor, performed his second legal execution, springing the trap hanging Orrie Cross, convicted slayer of George Fosdick, a Des Moines grocer. Eugene Weeks, who was implicated in the murder of Fosdick, was hanged by the former pastor September 15.

Old Hotel to Close.

St. Louis, Mo., Nov. 25.—The Planters' hotel will be closed next January 1 to be converted into an office building. When the doors close the hotel will have completed 105 years of hospitality.

Steel Corporations Consolidate.

New York, Nov. 25.—Announcement was made here that the Bethlehem Steel corporation had purchased the Midvale Steel and Ordnance company and would take over the physical assets and dissolve the latter company.

CLARENCE J. DILL

Clarence J. Dill of Spokane, Wash., who was recently elected to the United States senate, will be the youngest member of the senate when he takes his seat on March 4. He succeeds Senator Poindexter.

BLAST ENTOMBS MEN

Eighty-Five Miners Killed by a Dust Explosion.

No. 3 Mine of the Woodward Iron Company Near Birmingham, Ala., Is Wrecked.

Birmingham, Ala., Nov. 23.—Eighty-five miners are dead, 75 are injured, as a result of the Woodward Iron company mine explosion.

The 75 injured are among 125 men who were removed later through a manway connecting mines 2 and 3. The 85 dead were found in the entries nearest the manway. One group of workers reported bodies were strewn all along the main passageway.

The injured men who were rescued were rushed to Bessemer hospitals. Fifty per cent of them are white.

The explosion was followed by a fire, which obstructed the work of rescue. Many men are believed to have perished in the flames. All the doctors and nurses in the vicinity are caring for the wounded.

AUTO WRECKS TRAIN; KILLS 3

Locomotive of Fast Mail Train Upsets After It Hits Stalled Car at Elmhurst, Ill.

Elmhurst, Ill., Nov. 24.—Two young men and a girl were killed here in an automobile-train collision. The automobile in which they were riding got beyond control and, crashing through the gates at the York street crossing of the Chicago and Northwestern railroad, came to a stop on the track in the path of an approaching fast mail train. The train itself was upset, the engine turning over and the engineer and fireman having narrow escapes.

The dead, all of Elmhurst, are: George Gleck, twenty-three years old, the driver; William Ehlers, twenty-five years old; Miss Ella Heinemann, twenty-two years old, Ehler's fiancee.

JAPANESE YIELD TO CHINA

Troops to Leave Shantung Dec. 1—Military Operations Begun Against the Chinese Bandits.

Peking, Nov. 25.—Japan will vacate Shantung on Dec. 1, making heavy concessions to China.

Military operations have been begun against the band of bandits terrorizing Honan province, and the brigands have threatened to kill the missionaries they have in captivity. The bandits have retreated from the railway zone on the approach of troops. An early release of the foreigners therefore is unlikely.

TIERNAN IS GIVEN DIVORCE

Gets His Two Daughters, but "Baby Billy," Repudiated Child, Goes to Wife.

South Bend, Ind., Nov. 24.—John P. Tiernan, former Notre Dame university professor, was granted a divorce from his wife, Augusta, together with the custody of their daughters, Irene and Mary, five and four years old, respectively, while his wife was given the custody of "Baby Billy," the repudiated child, by Judge Chester Montgomery in Superior Court No. 1.

Battle Rages in Dublin.

Dublin, Nov. 24.—The whole center of Dublin was in a fierce uproar at midnight as fighting broke out between Free State forces and irregulars. Three Free State soldiers were killed in the first hour of the shooting. The streets have been cleared of all civilians and Free State troops have been called out in large numbers to take possession of the situation.

Harding's Hands Off Alien Law.

Washington, Nov. 25.—It was stated at the White House that President Harding had no intention of discussing modification of the immigration law in his forthcoming annual message to congress.

Senator Attacks Liberian Loan.

Washington, Nov. 25.—Senator Harrison, Mississippi, charged in the senate that five negroes prominent in the Republican party will get $650,000 from the Liberian government if congress passes the loan bill.

NEW RED M. P.'S ROIL COMMONS

Labor Party Opposition in British Parliament Takes Leading Part.

PROUD OF THE LENIN FLAG

Leader Newbould, Interrupted by Ministerial Members, Said the Interruption Did Not Affect Him—Used to Rowdy Houses.

London, Nov. 24.—Labor, the new party of opposition in the British commons, took the floor in earnest in a commons debate, indicating that the Labor members intend in the future to take a dominating part in discussions and decisions. Besides Mr. Newbould, Scottish communist member, hoisted the red flag in a long speech reminiscent of Moscow oratory.

"I am proud to think I belong to the same movement and under the same flag as Nicoli Lenin," he said.

This drew the retort: "Why don't you go to Russia?"

Whereupon the member from Lansbury snapped: "Why should he? Why don't you go?" to the interrupter.

Mr. Newbould said the interruption did not affect him, as he had been in rowdy houses before. "If the working men do not get satisfaction we will have to deal with you as Cromwell dealt with your predecessors."

To the ministerial laughter which greeted this Mr. Newbould taunted: "you wish tranquillity. Yes, because your master's voice in Wall street says tranquillity. You are not going to get it."

Lady Astor drew considerable interruption from Labor by her statement that immorality in Russia among young children was appalling under Lenin, asking Mr. Newbould to bear that in mind. To further interruptions Lady Astor said she could answer back, but she was tired of the Labor party assuming that the thinking people were not interested in the progress of the country.

"I have much sympathy with them," she said, to which Labor retorted: "We don't want your sympathy. Keep it."

"Keep a civil tongue in your heads until I have finished," she said.

To which the Laborites shouted: "Keep a civil tongue yourself, miss."

ALLIES REJECT TURK DEMAND

Conference Fears Ottomans Will Stand Upon Request for Mosul Oil Fields.

Lausanne, Nov. 23.—Turkey's demand for a plebiscite in western Thrace was unanimously rejected by the allies. On their other boundaries in Europe the Turks show no signs of making serious trouble, but it is their demand for the Mosul oil fields which is worrying the conference. Everything here indicates that upon this point the Turks, in view of their recent victories, are prepared to stand more determinedly than upon any of their other territorial claims.

ALLIED OFFICERS ATTACKED

Bavarian Civilians Armed With Clubs Injure British Officer at Ingolstadt—Not Soldiers.

Berlin, Nov. 24.—British and French officers of the interallied control commission were attacked on their arrival for an inspection of a munition depot at Ingolstadt, Bavaria, by a band of civilians armed with clubs.

A British officer was injured in the attack. No German soldiers were concerned in it.

SENATOR FELTON NOW AN EX

First Woman to Sit in Upper House Closes Senatorial Career of 22 Hours' Service.

Washington, Nov. 23.—The first American woman senator, Mrs. W. H. Felton of Georgia, closed her senatorial career after answering once to her name and making a brief address. Her successor, Walter F. George, was sworn in, and Mrs. Felton became a former senator after an actual service of 22 hours and 25 minutes.

FOOD RIOTS IN GERMANY

Troops and Police Fight Rioters at Brunswick and Hanover—Several Wounded.

Berlin, Nov. 23.—Food rioting broke out in Brunswick. Police fired on the rioters, wounding several. Troops in Hanover were called on to suppress riots against the high cost of living.

Caliph Takes Throne.

Constantinople, Nov. 25.—Prince Abdul Medjid Effendi became supreme caliph of the Moslems Friday. In the famous Topcapou palace he was invested with the sacred mantle of the prophet Mohammed.

Ward Bakery Fortune to Daughters.

White Plains, N. Y., Nov. 25.—Mrs. Catherine Ward, widow of Robert B. Ward, former head of the Ward Baking company, left most of her $2,000,000 estate to her four daughters. Her will was filed here.

Virgil's heart flew the hope that e's cousin might be the bar- l with the roses; there could staking her, after meeting her, that brief gaze he had carried a master's painting of her, in his mind. So he was quick n below with Shottle, the Colo- ing behind them.

Lucy had just left off dancing. was not the thrilling barbar- Drace swallowed his disap- t dry, like a swamp man tak- ine. Shottle might have re- that never before had his kins- been so glad to see him. On she hung as she cooed, but were on Drace, and he lis- not to her words, but to the her accent, soft as the notes e. Like a frost-bitten Shang-

"She Takes to Him Like a Duck to Water," Said the Slave, Looking After His Master and His Third Cousin.

hai, the Colonel stood first on one foot and then on the other. Drace politely asked Miss Lucy to dance with him, and the Colonel dropped onto a chair. Shottle sat beside him.

"She takes to him like a duck to water," said the slave, looking after his master and his third cousin.

The Colonel sighed. "Liberty Shottle," he said, "I am going to tell you something."

"Out with it."

"It is not a matter to be spoken of so lightly, sir."

"All right; go ahead."

"Liberty Shottle, it is this: I am deeply in love with your cousin, and before the dawn of another day I shall pop the question to her."

"Pop the deuce! Lend me ten dollars."

"You shock me, sir."

"Tell you what I'll do," persisted Shottle. "Let me have ten, and I'll make her a speech in your favor that will kink her hair."

"Shottle!"

"And I can do it. They've got my speech on the Perlclean Age hung up right now at the university. The governor of North Carolina said to the governor of South Carolina, just after making his historic remark about its being a long time between drinks, that it was the most powerful speech he ever heard."

The Colonel scowled, and swore his refusal to enter into any financial transaction involving his heart; and Shottle, realizing that his efforts were vain, sank down into melancholy silence. Miss Lucy, meanwhile, was introducing Drace to some of her friends, not to young women, but to men and to ladies well advanced along the path. Drace soon realized that this society was far from the caricature that Shottle and Colonel Josh might reflect; for the most part it was composed of ladies of exquisite refinement, and men strong in the dignity of medicine or the law.

"You have not chosen an opportune time to visit New Orleans," an old judge remarked to Drace. "We are forced to live under the infamy of a carpetbag government, sir. Political scoundrels, who in the North could never attain to even the meanest office, come down here where we are disfranchised and elect themselves legislators, governors—representatives of parishes that they have never seen. Heavy taxes are levied, and they pocket the money. The governor was not elected, but named by a gang of freebooters. The real citizens of the state have no vote. Their former slaves and the crooks who now manage them control the ballot-box. This is the true state of affairs. Wait till you see New Orleans, sir."

This talk was too serious for Miss Lucy. She plucked Drace away to walk with her, and she hung laughing on his arm as everywhere his eyes searched for the girl with the roses in vain! And presently he excused himself and went disconsolately to bed.

CHAPTER III

Next day the Leona reached New Orleans. To Drace his first look into the countenance of the famous old city was a disappointment; it had not the quick throb; its pulse was slow and rhythmic. The levee was too broad and diffuse to appear active. The buildings looked mean and low. Romance and history had painted for him a picture too lively to color. But soon the charm of this half-lazy delta life began to reveal itself to him. The town was ruled like a true French city, it sang. Paris minuetted in the terror of the Revolution, and her youngest daughter in America, singed with powder, and with bloodstains on her dainty feet, danced to the music of her own improvised gayety. Drace saw the carpetbag governor driving through the street, surrounded by an escort of black and mulatto cavalry. From a balcony came a gunshot, and an enormous negro in white gloves, sitting beside his political master, tumbled out upon the ground but the carriage did not halt in its speed, and the hoofs of the cavalry beat upon the murdered wretch. In a doorway an old man sat fiddling for his grandchildren to dance on the flagstones.

"Oh, you'll find drama enough here that hasn't been rehearsed," said Shottle as they turned toward the old St. Charles.

"They appear to have set the stage for us," Drace answered him, wondering if ever again he should find the girl with the torch of roses.

In connecting rooms and amidst the luxury of old French furnishings they were quartered.

Leaving Drace writing a letter, Shottle went out, but he soon returned with more of light than usually beamed from the sad stretch of his countenance.

"Well, sir," he cried with astonishing enthusiasm, "I want to tell you that life is not composed entirely of ingratitude. Last year when I was down here I saw an old fellow about to get into trouble with a Mexican roustabout on the levee. I wasn't in any particular hurry, so I stopped, took up a piece of scantling and knocked the Mexican down. It was no particular trouble on my part, but the old man took it as a favor and urged me to eat dinner with him, which I did, being broke at the time. Now what does he do? I met him out there, and he gives me two tickets for the French ball at the St. Louis tonight."

"All right; we'll take it in."

"I should say we will! Why, there's likely to be a half dozen duels arranged for. We can see them bursting into bloom. But you'll have to liven up, you know. You are just a trifle stern. It strikes me. There is too much of—of your mission showing in your face. I don't know of anything better calculated to correct it than an hour at the roulette wheel. Suppose we go over and give it a whirl."

"Hope springs infernal in the human breast," Drace paraphrased the poet. "Just as well curb yourself, old fellow. I'm not going to feed your passion."

A tap at the door and Colonel Josh announced himself from the outside. Invited to enter, he came in with a sweeping bow, his beard and mustache waxed, his hair darkened with dye giving to it a tinge of blue. He bore and with ceremonious hesitancy, an invitation from Miss Lucy. She was at the delightful old home of a relative where choice guests would assemble that evening to hear Prof. L. Bannock Pettigrew read a paper on the origin and character of the ancient Scythians.

"I'm very sorry, Colonel," Drace cheerfully lied, "but we have another engagement."

The Colonel gleefully replied that he was put into a position of deep regret. He knew that Captain Drace would so much enjoy the professor's paper would not take up more than three hours of the evening. [illegible] to Miss Lucy that [illegible] Drace found it impossible to [illegible] Capt. Jo assured him that such [illegible] situation and brightening Colonel gladdened himself out of [illegible]

The ballroom which Drace entered that night was as fantastic as a gypsy's vision. It seemed that all civilization had lifted the lids of its worm-eaten chests to array in whimsic reminder of its former self. There was evident poverty making itself neat in old linen, and war victims proud in threadbare coats. In rags there is history, but no ancestry attached to cloth fresh from the mill. No unfriendly eye was supposed to look upon this gathering, no antagonistic politics permitted to view it. The walls were draped in the colors of France, and enshrined in a corner was a Confederate banner, its staff splintered, its folds darkened with sacred blood.

As Shottle no longer held the hope of raising a speculative table-stake he bent himself to the less interesting life of the dance. But not without mishap! The floor was smooth with wax from the ends of marriage-altar candles; and Liberty's feet, more accustomed to the rough matting, and ragged carpets of the gambling-room, flew from under him. Catching right and left in his fall, he came down with a bit of lace in one hand and a comb in the other, while women shrieked at the devastations he had wrought, grouping about the severest sufferer to screen her into a retiring-room.

"That's what comes to a horse that wanders from his stable-lot out on the frozen pond," said Shottle as Drace came up to laugh at him.

"You've made a rip in the skirt of the ball sure enough," Drace replied, taking him by the arm. And then suddenly he halted, for he caught sight of a girl coming toward him. A moment before, there had been numerous young women in the room, but now there was only one—the barbaric rose maid, the girl who had touched his heart with a torch.

walked a tall, handsome [illegible]ssed young man. Her hand [illegible] arm, and she seemed [illegible] pleasure to his evident[illegible]ooing. She looked at [illegible]ace, one glance, and then turned her eyes back to her cavalier and passed on. And a flame of jealousy was added to the turmoil that already held possession of him.

"Who is she, Shottle?" demanded Drace.

"I don't know, but I'll find out. Lord, but she is a fetcher."

He moved off, dodging the dancers here and there, while Drace sat alone in a window, waiting.

The orchestra struck up the supper-march, and Shottle, stalking his prey, saw the lady who had so excited Drace's interest seated with her cavalier in an alcove and supping daintily.

Possessing Himself of a Plate and a Goodly Portion of Chicken, Shottle Returned and Brazenly Seated Himself Near Them.

Possessing himself of a plate and a goodly portion of chicken, Shottle returned and brazenly seated himself near them, listening with all his ears.

"Nadine," the cavalier was saying, "you wrong me in thinking I seek to influence you through my friendship with your father. It is true he owes me much; and it is true that if I were to become a member of his family I would forget that. But I want to make you care for me for myself. If—"

"Hush, Mr. Boyce," said the girl. "There are people near—this is no place to discuss such things."

The young man lowered his voice, and Shottle could hear no more. He calmly finished his chicken and then sought out Drace, whom he found pacing up and down impatiently.

"Well?" demanded Drace.

"His name," announced Shottle, "is Boyce. Frederick Boyce, probably—or maybe John. It would be John, I'd think."

"Hang his name!" exclaimed Drace. "Did you find out hers?"

"Nadine," replied Shottle with a triumphant air.

"Nadine," repeated Drace, and caressed the name with his lips. "But what's her last name?"

"Brown probably, or maybe Jones. Or it might even be Smith."

Drace scowled his wrath at such flippancy. "Look here, Lib," he said, "I'll give you twenty-five dollars to find out her full name and where she lives. I'll give you a hundred if you'll find somebody who'll introduce me to her."

"It's a bet," said Shottle. "But I must warn you you're late. Boyce wants her to marry him, and he's got a hold on her father. But she stood him off."

"H'm—she stood him off? My offer stands, Lib. She couldn't possibly throw herself away on a low-looking fellow like that."

Shottle asked for the twenty-five in advance, was denied and took himself off, grumbling. He found Boyce and the girl called Nadine just leaving the little alcove, and stopped them, bowing low. "Sir," he said, addressing Boyce, "I have been directed to inform this lady that she has been awarded a prize as the best waltzer in the room. If you will be so good as to give me her name and address in order that it may be delivered to her?"

Boyce regarded Shottle suspiciously. "Well!" he exclaimed. "I didn't know they did that sort of thing here. What is the prize and who is giving it?"

"The prize," replied Shottle blandly, "is a—turkey. It is given by the—by a leading butcher of the town."

Boyce laughed, and the girl added her silver merriment. "I'm sure I'm flattered," she said. "The name is Nadine la Vitte, and the address—"

She broke off, and flushed a little. Shottle's jaw had dropped; then he gulped with an extraordinary contortion of his face in the endeavor to mask his astonishment. "And the address?" he pursued.

The girl and Boyce exchanged a troubled look. "I think," interposed Boyce, "it would be better to take the —the fowl home tonight. Perhaps you would be good enough to deliver it to our carriage. It is ordered for one o'clock—Number 297." Bowing with pelican grace, Shottle departed, but he delayed some ten minutes in dark thought before he sought Drace again. For Shottle wanted the hundred dollars, and if he were to tell Drace that her name was La Vitte. Could it be possible that she was Stepho's daughter?

He presented himself before Drace at length. "Master," he announced, "her name is Nadine Brown and her address is Carriage Number 297."

"Carriage Number Two— But that is no address. And—"

"Listen, Master," went on Shottle hurriedly. "I have a scheme—a magnificent scheme. Not only shall you be introduced to this lady, but you shall be presented to her in the role of a protector and rescuer."

"How in the world will you manage that?"

"Very simple. At ten minutes past one, you are to be standing on Blank street just beyond the lamp at the corner of X street. Carriage 297 will drive past. From out the shadow of a garden wall two men will spring out and stop the carriage—attempt to rob this Boyce fellow and that girl. You will rush up with a cane—a cane, Virgil, no pistol—and drive off the robbers! You are a hero—the lady thanks you. Tableau!"

"But—but—"

"Leave it all to me—but give me that twenty-five dollars. I know fellows who'd hold up the devil himself for five."

At ten minutes past one o'clock Virgil Drace was standing in the shadow of a tree near the street-crossing decided upon, cursing himself for a hair-brained fool and Shottle for an addle-pated rogue. A rattle of wheels came to his ears, and a cab approached him. As it came under the lamp at the corner, Virgil was sure he recognized the flamingo neck of Liberty Shottle rising from the turned-up collar of the cabby on the box.

"Good Lord!" gasped Drace. "He's done it. Pray heaven Boyce carries no pistol."

The cab passed him. And then from the shadow of a well a hundred yards or so distant two dark figures darted out. There came a hoarse command, a stifled scream, a cry for help. Drace ran forward and found Boyce, Nadine and the supposed cabman standing with uplifted hands beside the vehicle while a masked desperado threatened them with a pistol and a second robber demanded their valuables.

Now Drace played his part right gallantly, rushing upon the robbers with uplifted cane. The fellow with the pistol fired once—then a blow on the wrist from Drace's stick sent the weapon flying. The pain of the blow enraged the fellow, however, and as Drace made at the second robber, the first one struck him heavily, momentarily dazing him. The two supposed robbers now took to their heels, pursued half-heartedly by Cabman Shottle and energetically by Boyce, who had been robbed in good earnest.. And to complete the melee, the poor cab-horse, frightened by the pistol-shot, galloped off with the ramshackle vehicle lurching behind it.

Nadine turned to Drace, her face lighted with gratitude. She held forth her hand. With a grace that would not have mocked a Highlander who, schooled in France, had followed home the Queen of Scots, he bent over it and reverently touched it with his lips. Wild was her nature, this half-barbaric maid, and she snatched her hand away, but repenting instantly, smiled and spoke.

"I thank you much. You are brave. You are like one on the stage, the hero."

Her words came freely, and with just enough of accent to convince that [illegible] were sweeter than if there were [illegible]. Drace asked her if she remembered him, and her black velvet eyes flashed dark in astonishment.

"How could I when never have I seen you? You must mistake me. No."

"I saw you on the boat, at the ball at the St. Louis," Drace said. "But come to think of it, I know that it would be vanity on my part to believe that you have seen me."

"No, it would not be vanity," pleasantly she contradicted him, shaking her head, her cloud of hair. "The brave do not be vain, but I did not see you. I am so sorry. You sorry, too, ha?"

She laughed, and Drace thought that never till that moment had he heard music in its sweetest purity. Then Boyce and Shottle returned, panting—Shottle to disappear again in pursuit of his vanished vehicle.

"Sir, I thank you most heartily for your assistance," said Boyce, grasping Drace's hand. "My name is Boyce—Rupert Boyce. May I—"

"Mine, sir, is Virgil Drace," responded that young man. "I am only too glad to have been of help. I'm afraid however, you'll have to finish your journey on foot. May I have the pleasure of walking with you?"

This suggestion, however, Boyce declined. And although Drace insisted as far as the bounds of courtesy would permit, both Boyce and the girl evaded consent. And they left him standing thunderstruck on the street corner—for the girl had said, giving him her hand again in parting: "I thank you once more for your help, Mr. Drace. I hope I may see you again some time. My name is Nadine la Vitte, and I am often in New Orleans."

Drace passed an uneasy night, his mind torn by his suspicion that Nadine la Vitte was the daughter of old Stepho. And when Liberty came to his room next morning, eager for praise and reward, the truth came out. Nadine was indeed the daughter of old Stepho; Liberty had overheard enough while disguised as the cabman to confirm that. But where she lived in New Orleans, Liberty had failed to learn; he had planned to drive them home, but the runaway of the cab horse had sent that plan agley.

CHAPTER IV

Now more than ever was Drace resolved to find where the girl lived, to find old Stepho, to— What would he do when he found them? He was bent on revenge upon his father's murderers, on solving the secret of that buried money; yet he was in love with that arch-scoundrel's daughter. Or was he? He must find her, make sure. And he said as much to Shottle.

"There are some things that can't be done by mere determination," said Shottle, his mind on filling a flush.

"No, but judgment ought to be the master and director of determination. I tell you what we'll do. This afternoon we'll take the French quarter by streets and knock at every door."

That afternoon they set out on their quest. But the scheme of knocking at every door soon seemed foolish and impertinent. They decided to halt only in front of habitations that seemed to invite inquiry, consult their instinct; but as repeated failure blunts instinct dull, hope became a critic without creative adventure, and advised a return to the hotel. Then they thought that night would be a fitter time. They might catch sight of the girl or Boyce at the theater.

They went to one, and from a stage box gazed through rented glasses at every face. Not there. They went out, walked a short distance, talking not of disappointment but of hope, and turned into a narrow and dimly lighted street. Suddenly there broke the noise of a rising tumult, yells and

Some One Gave Him an Old Carbine and Another Gave Drace a Cavalry Saber.

gunshots. And over walls and from dark recesses came pouring excited men. Drace and Shottle found themselves in the midst of a mob, surging toward another mob rushing into an open space where torches discovered a band of executioners hanging some poor wretch to the limb of a tree. Where there were no houses, the garden walls were too high to offer a means of escape, and as they could not fight their way back, Drace and Shottle were swept onward. Torches flared, and all sorts of weapons were revealed in the pitiful yellow light—old muskets, swords, pistols with brass barrels from ancient Spanish armories, clubs and pikes that must have served Cromwell. Some of the men looked respectable, others desperate; they were of many nationalities, all anger-smitten and excited.

"What's it all about?" Drace inquired of a bare-headed old man who panted beside him.

"The carpet-bag devils. They hung a citizen."

"We are on the right side, anyway," Shottle cried. "Give me a gun—give me something."

Some one gave him an old carbine, and another gave Drace a cavalry saber. The man from the North grasped it, feeling that he was to fight the scoundrels that cast discredit and reproach upon his native state.

At this time of man's madness nature could not restrain the introduction of her own grim humor. Dogs gathered in the open space between the bands of advancing rioters, and fought, howling, the victims of wounds without cause.

Not many shots were fired. The authorities made a criminal of the citizen who carried a gun or concealed it in his house. It was a hand-to-hand strife, the breaking of heads, the cutting of throats. A big, red-shirted negro with razor gleaming in the smoky light made a grab at Drace, who had just room enough to leap back and strike with his saber; but the agile negro dodged, the blow was caught by a brick wall and the blade was broken off at the handle. But with the hilt a boxing glove of steel, Drace knocked the negro down and then passed over his body, striking right and left, pushing onward to the front, where the jagged ranks saw-toothed one into the other.

The struggle now was to save the hanging man, who, without fall enough to break his neck, was strung up to strangle. Drace was the first man to fight his way to him. He dropped his steel boxing glove, grabbed out his knife, leaped up, caught hold of the limb of the tree with one hand and cut the man down.

Klemme Co-Op. Grain

STILLE'S IMPLEMENT NEW
VOLUME 1. Thursday, November 30, 1922 NU

We sold a number of elevators, inside elevators, the last week or two for next spring delivery. The reason we sold the elevator at this time o the year is. first: we are selling a good elevator at the right price and second: because the price is guaranteed, that is, should the price drop the purchaser is entitled to the drop, but should the price raise the purchaser does not need to pay the raise. The elevator does not need to be paid for until after it is installed. If you are in the market for an inside elevator better come in and talk it over.

A loving son is one who lets his father use his own automobile once in a while.

Did you ever look at the fly-wheel on a McCormick-Deering Feed Grinder? If you haven't, keep this in mind so that when you come into our shop the next time you can see something you never saw before. The fly-wheel on the McCormick-Deering feed grinder supplies the necessary momentum to take care o the sudden and heavy grinding. Even when the corn or grain is damp, it holds no terrors for the McCormick-Deering. The fly wheel revolves at a high rate of speed, makes the grinding uniformly even and the capacity unusually large. This feature of the McCormick-Deering grinder is just one more of the many points of construction that makes it the best grinder on the market today. Make every pound of feed produce the utmost in feeding value—buy a McCormick-Deering Feed Grinder from us.

Some women should be more careful of the color line; many a blush is higher on one cheek than on the other!

A FULL LINE

McCormick-Deering Corn Shellers are built in eight styles with capacities varying from the limited requirements of a hand sheller to the large cylinder sheller handling 4.000 bu. per day. The line includes one-hole wood and one-hole steel shellers. 2-hole wood hand or power shellers, 2-hole stationary sheller, 2-hole and 4-hole all-steel power shelers, and a large and small cylinder sheller. All of them have unusually large capacity considering the power required to operate them. We sell 'em all.

It don't pay to haul sh in an old box and scatter the road. Better get a now , it will soon pay fo the grain it saves, and time

School Made Money

Basket Social held in Liberty No. 8, November 29, was a s in every way. The house acked. A fine program was in connection with the sale kets. The handsome sum of was realized frfom the sale kets and lunches. The man- ment wishes to thank those who in attendance for their good on and liberal patronage.

EVERYONE IN U. S. COULD GO RIDING AT SAME TIME

The Bureau of Public Roads of the United States Department of Agriculture states thatthere are enough mo or vehicles in heUnited States to take he enire population for a ride at one time.

At the beginning of 1922 there were 4.2 motor vehicles for each mile of road in the United States.

One hundred and twenty vehicles a minute was the rate at which motor vehicles passed an observing station on a trunk-line highway in Massachusetts, accordingto the Bureau of Public Roads of the United States Department of Agriculture. This rate was kept up from noon to 10 o'clock P. M.

SOMETHING NEW IN HIGH SCHOOL CANTATA

GARNER, Dec. 7 — Something quite new along school activities is being worked out by the two music teachers of Clear Lake and Garner. In place of contesting for honors the two schools under the direction of Miss Lorna Bishop of Garner and Miss Lettie Keerl of Clear Lake, are colaborating in the rendition of the cantata, "Ruth."

This musical treat will be put on by the two schools in each of the two towns the week preceding Christmas. One rehearsal will be held at each of the two towns previous to their public appearance. A chorus of about 100 voices will support the four soloists, Jeanette Newcomer of Clear Lake and Eva Sunrballe of Garner will both acompany on pianos.

POULTRY SHOW DATES SET FOR JANUARY 10 TO 14

Will Be Held at Mason City This Year

January 10 to 14 has been set a the days for the annual poultry show of the Upper Iowa Poultry Association. The show will be held in Mason City and according to the officers in charge it will be bigger and better than ever before. Five ribbons will be awarded in each class and this year merchandise prizes will be given in addition to the usual awards.

It s the desire of the association to interest farmers especially in the show and just now a membership drive is being launched so that by show time many additional Iowa farmers will feel that the annual show is something worthy of their attention.

Meetings of the association are being held every Tuesday in the feed store of J. W. Hare, Mason City, and every popular raiser is invited to be present.

MARSHALLTOWN PAYS $37,700 FOR PUMP

MARSHALLTOWN, Dec. 7—At its meeting Tuesday morning the city council bought from the Allis-Chalmers Manufacturing Co., Milwaukee, Wis., a 6,000 gallon pump for the water works, paying $37,700, with reductions of $2,400 possible if the city installs at its own expense the suction discharge connections, and a $400 reduction if a duty test is not required.

The Allis-Chalmers Company in its contract agrees to deliver and erect and connect both suction and discharge mains and test the pump for $37,700. Shipment is to be made within ninety days and erection to be completed within forty-five days after delivery. The pump chosen by the council is a horizontal, cross-compound engine.

WAS REAL JOB TO BURY HIM
It Took 12 Pall Bearers For Giant

NEW YORK, Dec. 7.—A misfit in death as he was in life, Capt. Geo. Auger, 8 feet 4 inches tall, was carried to his grave Tuesday by 12 pall bearers instead of the customary six.

So huge was the coffin that a special derrick was rigged to lower it into the ground. The giant's dog and inseparable companion followed the body to the cemetery. The dog tried in vain to jump into the grave.

The Prince of Good Fellows

$100 WAITING FOR FIRST PERSON WHO NABS A HEN THIEF

(From Globe-Gazette, Mason City.)

The Globe-Gazette again calls attention to its offer of $100 for the arrest and conviction of any one found stealing poultry from a farmer in Cerro Gordo, Floyd, Franklin, Hancock, Worth, Howard, Mitchell, Butler, Chickasaw, Wright, Kossuth and Winnebago counties. It wants to help put a stop to such depredations and it hopes some one will "go over the road" for what it considers the meanest small crime—that of taking the results of a summers work on the part of a farmer's wife and daughter without any compensation.

KLEMME STUDENTS MAKE GOOD GRADES AT GARNER

Klemme students who are attending the Garner school are again in the race and leading with highest honors.

Fred Arnold has the honor of having the highest average for the past six weeks in the Garner High school, having an average of 95 per cent. Fred is an excellent student and has worked hard for the coveted honor which is his. Other Klemme students in the Garner high school who received grades above ninety per cent and who ranked with the highest ten are: Edwin Bock, Adolph Lauritzen, George Bergmann and Howard Wiles.

The following Klemme students attending the Garner high school received 100 per cent in spelling for the past six weeks: Ella Barz, Edna Bergmann, and Adolph Lauritzen. Now here is where Ye Editor wants to kid "Abe" a little—glad you are improving "Abe" as we can never forget those jumbled-up words you used to run thru our Linotype machine and then expect our readers to figure them out—but we are willing to forgive you as long as you will pull down 100 per cent grades at the Garner school.

Klemme should be proud of the showing these young people are making in the school at Garner. Every student who has ever gone out of the Klemme school into the Garner high school has made an excellent showing and we are glad the "1923" class are keeping up the good work.

Woman Turns Booze Sleuth

BELMOND, Dec. 7.—There is a report well authenticated that a Belmond woman purchased liquor at a home in town and turned the evidence over to the authorities and this evidence is to be considered by the grand jury now in session.

KLEMME BARBER MARRIED

Clarence Bachman Was Married To Ventura Girl Thanksgiving Day at Ventura

Little did we suspicion when we saw Clarence Bachman going to the depot with a traveling bag last week Wednesday that he was going away to get married. We just supposed that he was going away to spend Thanksgiving with friends, but later we learned different.

Clarence Bachman, of this city and Miss Maude Henry, of Ventura, were quietly married at Mason City at 11:45 o'clock Wednesday morning of last week, and from there they left for Dubuque to spend their honeymoon at the home of the bride's sister, Mrs. Harm Aries.

Mrs. Bachman has been a resident of Ventura practically all her life and is a very fine young lady and will be an ideal helpmate for the man she has chosen.

As for Clarence, everybody knows him and he is well liked by everyone for his pleasant ways. We will venture to say that the bride could not have picked a better young man than Clarence. He is conducting a barber shop in Klemme and enjoys a good business.

The Times extends congratulations to the happy couple.

FAMOUS SINGER ESCAPES WITH SMALL INJURIES WHEN CAR HITS ROCKS

PASSAIC, N. J., Dec. 7.—Madame Galli Curci, the opera singer, escaped with slight injuries just before midnight Friday, when her car struck a pile of building rocks on the roadway, narrowly missed an open drawbridge over the Passaic river, and rolled on its side against the bridge approach.

She was returning to New York from a concert at Orange.

Her manager reported she was "only badly shaken up and very nervous," as a result of the experience.

A Recipe

To avoid a colorless existence, keep in the pink of condition; do things up brown, treat people white, be well read, and get out onto the golf green under the blue occasionally.

Belmond Steps Out in Style

Belmond not only has a barber shop owned by a lady but has a lady barber, who succeeds the man formerly employed in the shop recently sold to Miss Larson of Minneapolis. Belmond whiskers won't grow so long hereafter.

RADIO AERIALS MUST BE CAREFULLY ERECTER; DANGEROUS

OKOBOJI FISHERS WANT CHANGE IN LAW ON SEINING

SPENCER, Dec. 7.—Residents of Arnold's Park, many of whom depend for their living in the winter on seining buffalo, carp and other soft fish from the lakes in Dickinson county, are trying to have gill-net fishing allowed again this winter. There was a great deal of complaint about this form of fishing in the bpast, as only the soft fish could be shipped, and it was said that tons of game fish caught in the nets were allowed to die instead of being replaced in the water.

There is no doubt that there are too many gar and buffalo fish in the lakes, and that they are a menance to the game fish. It is claimed that the gar and buffalo were very numerous in Lake Minnewashta this summer. The people of Arnold's Park are backed by the Spirit Lake commercial club in their petition. These fish can be sold cheaply enough to materially reduce the cost of living besides giving work to a number of men.

SCHEDULE TRAINING COURSES

Non-Collegiate Work With Free Tuition Open to Iowa Boys and Girls Who Want Education

Iowa young men and women who did not get a chance to finish high school, but who now feel the need of further education, have an opportunity, tuition free, for additional training in the winter term of the non-collegiate courses at Iowa State College. These are very practical courses, intenled especially for those interested in farming, in trades and industries, and in home economics. There is also a special short course for herdsmen and another for those who want to follow dairying.

No tuition is charged to Iowa boys and girls for these courses, as the fundamental law of the college says that tuition at Ames shall be "forever free" to those who live in Iowa.

The winter's work in these courses will open January 2. The student may remain for twelve weeks, only or continue thru the remainder of the college year. The work the student completes is credited on a two year course for which a graduating certificate is isued.

In the ten years that this non-collegiate work has been going, more than 2,000 have been enrolled in the agricultural work alone, and of this number 99 percent are now on farms. The large number of men enorlled in the vocational engineering courses in the same time are in responsible positions in engineering and industries.

A letter to J. C. Cunnngham, head of the non-collegiate work at Ames, will bring desired information.

EVELYN WALLER IS FIRST OVER ALL AT GARNER DECLAMATORY CONTEST

Klemme Boy Wins Second in the Oratorical Class

GARNER, Dec. 7.—The declamatory contest held in the high school auditorium last Wednesday night was well attended and proved an event of interest and entertainment. Everyone of the thirteen contestants made a good impression on the audience and the judges had close work in coming to a decision.

Evelyn Waller won first over all. She was in the dramatic class and gave "The Sign of the Rose," Naomi Frisbee, in the oratorical class gave "Iowa and the Nation," and won second over all. Theodora Tierney won first place in the humerous in "Miss Slicer at the Beach," and Carl Conway was a close second in the "De Debating Society." Fred Arnold of Klemme, won second place in the oratorical class in "Americanism."

The judges were Miss Griffin, Mason City; Miss Thomas, Belmond, and Mr. Paulson, Clear ake.

The winers in this contest are to be Garner's representatives at the county contest, which is held in the spring in connection with the athletic meet.

Never kick about what other people say of you. It might be worse if the whole truth were known.

YOUTHS WARNED OF DANGERS OF DEATH STRINGING AERIALS

Should Keep Away From Electric High Lines

DES MOINES, Dec. 7—The alarming increase in the number of deaths due to the contact of amateur radio aerials with high tension electric lines, has prompted the light and power industry in this state to take up the matter and impress on the men and boys he dangers they encounter in stringing aerials.

The National Electric Light Association and the National Safety Council are co-operating to eliminate the danger. Electric light companies are cutting down aerials strung too dangerously close to high power lines. It is significant that where most amateurs string their wires with bare hands, the skilled electricians in the employ of the utility companies use every precaution possible to prevent electrocution in taking down those dangerous wires.

The Iowa committee on public utility information has received data from various parts of the country showing accidents typical of those occuring daily. Some of these are as follows:

A Detroit boy asisting a friend to erect an aerial was instantly killed when a slender pole to which the wires were attached, fell.

Stretching an aerial from a neighbor's tree to the gable of his own house resulted in the death of a Detroit man. The bare aerial wire was pulled over insulated 4,600 volt wires.

A Cleveland boy was killed trying to string an aerial. His father attempted to rescue him and was also killed.

A man in New Jersey was killed when he attempted to rescue a boy who had run into an aerial lying over a 220 volt wire on the ground. The boy was badly burned and all persons who tried to extricate him were severely shocked.

In Madison, Wis., a man was killed when his head came in contact with a broken telegraph wire which had been put up between two houses by some boys to operate a telegraph instrument. It fell over a street lighting circuit and when current was turned on the man was killed while investigating the wire burning in the grass.

A Milwaukee man was instantly killed when he came in contact with high voltage lines while shifting wireless apparatus on the roof of his house.

* * * * *

There are quite a number of radio outfits in Klemme, and no doubt there will be many more before the winter is over. In stringing your aerial wire it would be well to locate it where it will not be near an electric light wire, so that in case of a storm there will be no possibility of it blowing loose and falling across any electric wire, and thus endangering any passersby.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship 10 a. m. by Rev. M. L. Metcalf.

Sunday school 11 a m

Evening worship 7:30 Rev. M. L. Metcalf.

Group prayer meeting every morning at 10:00 o'clock in the homes, as announced each evening.

Evangelistic services 7:30 o'clock each night. Come early and take part in fellowship before the crowd gathers.

Friday evening the second Young People's Service, subject, "A Noble Purpose, and Clean Living."

Special seating room will be reserved as formerly for all the young people—everyone, young and old are invited.

Saturday evening—sermon subject of special interest to parents, "Knowing God and Serving Him." Everyone come.

Subject of sermon next Sunday—"The New Birth." Morning service.

Solos each night by John.

Friday Ladies' Quartette of the First M. E. Church.

KLEMME SCHOOL NEWS

Adela Schroeder, Editor-in-chief.
Mabel Schaefer, Clarence Elder
Associate Editors

Last Thursday and Friday the Klemme school again enjoyed a vacation. Of course you can guess the reason. There were not many absences on Monday, so we are lead to suppose that none of the students or teachers were seriously sick from the effects of a big Thanksgiving dinner.

John Baumgartner was a welcome visitor at the school Monday. John has been a student of this school until this year, when he moved to Mason City.

Declamatory Contest

Plans are being made for a Declamatory Contest, which will probably be held some time in January.

A great many of the students are interested in this, work has been done toward the selection of suitable selections. All students participating in this contest will be exempt from other literary programs that will be held in the school. Watch for further information in this paper.

Glee Club

Miss Smith, teacher of the Grammar Room, has volunteered to organize a high school Glee Club. The school has some very good material for this, and under the able leadership of Miss Smith ought to form a very good Glee Club.

Educational Week

Perhaps you know that this is educational week. Every day of this week is set aside for some special thing.

Tuesday was a day set aside for Patriotism. Professor Neese gave us a very interesting talk on this subject. He told of the different kinds of government that are a menance to our government, such as bolshevichism.

Don't say its the Government's fault if things are not run the way they ought to be. It is the fault of the individual himself. Don't knock your government. You may be partly to blame for it if its not a good one.

Be Patriotic! If you do this, things will go much smoother than if you are continually knocking.

Program of American Educational Week

Sun., Dec. 3—For God and Country
Mon. Dec. 4—American Citizenship.
Tues. Dec. 5—Patriotism Day.
Wed. Dec. 6—School and Teacher.
Thurs. Dec. 7—Illiteracy Day
Fri. Dec. 8—Equality of Opportunity
Sat. Dec. 9—Physical Education.

Ralph Larsen returned to school Monday after several weeks absence.

Maurine Hake was absent Tuesday.

Russell Bell has returned after a few days absence.

Grammar Room

The Grammar Room is so industrious that they remained one half hour after school Monday night.

The Grammar Room drew names for giving each other Christmas presents this week.

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

On account of the Communion Service at the Liberty Church next Sunday morning, there will be neither preaching service nor Sunday school here in the Klemme church. Those who possibly can, are expected to meet with theh Liberty congregation for that special service. Rev. L. J. Brenner, our district superintendent, will be with us to conduct both the morning and evening service. Sunday school at 10:15. Sermon at 11:30. Evening services as follows: Epworth League at 7:30, sermon at 8:00 o'clock.

On Saturday afternoon at 1:00 o'clock Rev. Brenner will preach at the Liberty church. Right after the sermon the quarterly Conference will take place. Every member should be present. Am very glad to see so many of our people attending the evangelistic meetings at the M. E. church. May still more come. Let us all feel that we are one in Christ working for the salvation of Klemme.

—W. C. Bergmann.

COUNCIL PROCEEDINGS

Klemme, Iowa,
Aug. 28, 1922.

Regular meeting of the Town Council of Klemme, Iowa, held at the office of Mayor F. J. Wenck.

Meeting called to order by Mayor F. J. Wenck, presiding.

Members present: Joe Johnson, Wm. Smith, Wm. Bachman, C. W. Wiles and A. D. Gimer.

Members absent: None

Motion made and seconded that he following bills be allowed:

Lloyd Lau, hauling gravel	$12.00
Standard Oil Co. gas	$19.90
League of Municipalities	$10.00
Matt Parrot Sons Co.....	
Supplies	$4.00
Art Kuck. work on roads	$4.00

Motion made and seconded that street crossing be put in from north west corner of Lot 8, Block 21, to south west corner of Lot 5, Block 13. Carried.

Moved to adjourn.

F. J. WENCK, Mayor.
J. N. DAY, Clerk.

Help!

(Swiped from the Signal of last night.) Merle Kluckhohn, Hattie Gutterman, and Bert Mathews of Klemme were entertained at Mable Schuldt's home Sunday.

Mr. and Mrs. LuVerne Smith were at Belmond to spend Thanksgiving Day with relatives, returning to this city in the evening.

Mr. and Mrs. Ed. Jacobs spent Thanksgiving at the home of Mrs. Jacobs' parents, Mr. and Mrs. Wistey at Clear Lake.

Fred Henschen showed us a letter the other day which he had received from his brother, John, and written Nov. 28th at some point in Texas. The Steihl party were then 1600 mi. from Klemme and were going good. They had only one blow-out, but Aug. Baack had three blow-outs. All fine and having a big time says Bobby.

Opportunity passes the man who waits for it.

Rev. and Mrs. Buriff took advantage o the beautiful day last Friday and so accordingly cranked up their Universal at Goldfield and headed it in the irection of Klemme to visit their many friens here. The Times force acknowledges a pleasant call from our former neighbor and only wish that he could have stayed here longer.

Miss Sara Smith left Thursday morning last week for her home at Spencer, Iowa, to spend the Thanksgiving week-end with her parents. —And by the way "Happy" Johnson also had a vacation from his duties at the meat market and incidently he also took the train for Spencer, Iowa, and incidently again he returned at about the same time as Miss Smith, of course, no doubt "Happy", who is an expert meat cutter was called to Spencer to supervise the carving of the Smith turkey.

And again Elko Buss is flirting with the county hoodoo. Elko has no fear for bad omens—or the devil himself, or he would not have secured Number 13 to adorn the front and rearof his old gas buggy. Elko had auto license number 13 last year and says its a lucky number and so he wanted it again this year and got it—and most people say he is welcome to it. We suppose the next thing he will do will be to carry a black cat, a broken looking glass and a few other signs of bad luck—just for luck.

Maybe Erick Josten can't run fast enough to catch a woman but, by the great horn spoons he can make a jack rabbit shake a leg. The other day while he was picking corn Erick caught a jack rabbit, but how we do not know. Perhaps he put salt on the rabbit's tail (we tried to catch birds that way when we was a kid) and maybe Erick hypnotized him, we cannot say. Anyway he caught the jack rabbit and therfore Dad Yahnke must take a back seat and is no longer the champion hunter, for we proclaim to the world it is harder to catch a jack rabbit in a cornfield than it is a decoy duck with his legs tied, on Mainstreet. Therefore the belt and brass medal goes to Erick.

...e," the statement added, "we ...e three functions of the pilot; ...roscopes functioning as the ...e relay valves and tubes as the nerves, and the power pneumatics as the muscles."

True in Bumpy Weather.

In actual work, the announcement said, hundreds of automatic takeoffs and a number of automatic flights of ninety miles and more have been made. This "pilot" is capable of being mounted in any type airplane and in bumpy weather will hold a plane much steadier than a human pilot and will carry it in an absolutely true course regardless of fog or adverse weather conditions.

In the tests just concluded the machine used was one of the small type, having a span of only twenty feet, a sixty horse power motor, capable of carrying 250 pounds.

RUSS TO BANK IN SWEDEN

Soviet Government Attempts to Establish Guaranteed Bank Connections.

Stockholm.—A new Russian effort to establish closer financial and commercial relations with Sweden is seen in the arrival in Stockholm of Aron Scheinman, head of the Russian State bank.

Mr. Scheinman has declared the bank which he heads may place its foreign assets and clearing funds in Swedish banks, providing a safeguarding agreement can be arranged between the two countries. He has come here, he says, to enlarge the financial co-operation between Russia and Sweden. He considers Sweden one of the safest countries for the deposit of money, owing to its independent position and its well-ordered conditions.

The Russian State bank, declares Mr. Scheinman, has acquired 36,000,000 gold rubles ($12,540,000), and the end of the present year will add 50,000,000 to the total figure.

Father and Son Marry Sisters.

Schenectady, N. Y.—Father and son became brothers-in-law and sisters assumed the relation of mother and daughter-in-law here the other day when Herbert A. Davenport, forty-three years of age, married Rebecca Graham, thirty-five years of age, and Anson Davenport, nineteen years of age, took Helen Graham, twenty-one years of age, as his bride.

The son, a minor, was required to gain from his father permission to marry.

Clerk Had Nose for Cash, Postal Inspectors Say

Post office inspectors, in bringing charges of tampering with the mails against Edmund F. Donnelly, a clerk in the office at Manchester, N. H., said Donnelly was able to smell money in envelopes. They describe how, with each of two test letters, he tore a small opening in the edge of the envelope, put the slit to his nose, sniffed, and took bills out.

To Make Man Boss of Home

Daring Emancipators Seek to Charter Society for Regulating the Household.

RUN IT ON MASCULINE BASIS

Promulgates Bill of Rights for Husbands and Declares for Divers and Sundry Reforms — Regulates Visits of Wife's Relations.

New York.—If they never do another thing in their lives, the names of Edward Bonns of 424 East Eighty-fourth street, William R. Ferguson of 33 West Seventy-seventh street, and Hugh J. Connelly of the Knickerbocker building are likely to be remembered forever as among the foremost emancipators of the married man. Messrs. Ferguson, Bonns and Connelly have collaborated in the promulgation of a bill of rights for married men that seeks to revolutionize the oldest traditions of household management by making the husband the judge and jury not only in the matter of his own life, but also the undisputed boss as to the conduct and habits of his wife, even to the determination of the question whether the wife should have her hair bobbed and also how long or short her skirts should be.

"Brothers Under the Skin."

The three men, heretofore unknown to fame, have organized what they call the "Association of Brothers Under the Skin." The association filed an application with Justice Marsh of the Supreme court for a certificate of incorporation. The trio, who said their headquarters were at 1537 Third avenue, also filed a list of the association objects, as follows:

"To establish, maintain and operate the household primarily as a masculine institution.

"To protect the husband from the performance of any and all household duties, such as sweeping, marketing, cooking, washing dishes and nursing the kitchen or furnace fires.

"To prevent any purchases by the wife, whether for cash or credit, except after consultation with the husband and with his consent.

"To prevent the entrance into the home of mothers-in-law and all relatives on the wife's side, except upon written permit signed by an officer of the association, which permit shall not be issued for use on Saturdays Sundays or holidays.

Bars Delicatessen Meals.

"To prevent the delivery into the home of all so-called 'delicatessen meals' and to compel the serving of regular food, home cooked.

"To prevent any reference, however much justified, by the wife to any past faults or deficiencies of the husband.

"To establish the right of the husband to absent himself from the home for a specified number of evenings each month to attend business, lodge and club meetings, and to establish his right to return therefrom at any reasonable hour—to be fixed solely by himself.

"To develop 'cave man' methods for the better discipline of jealous, nagging or unreasonable wives.

"To establish the exclusive right of husband to determine the brevity of the back hair and the length of the wife's skirts.

"To compel the wife to share in the troubles as well as the pleasures of married life, and to establish the fact that the wife's place is at home and that her duty is to co-operate to make the home happy."

Glider Raynham Making a Record

...SCOVERS SECRET OF LONG LIFE

...ist Finds Fountain of ...uth in White Corpuscles.

...rrel Describes Work of White ...d Corpuscles, Which Experi- ...ts Had Shown, Stimulated Growth of New Tissue.

...York.—Discovery of the tissue- ...g activities of the white blood ...cles, believed by scientists to ...the way to the indefinite pro- ...n of human life, were outlined ...Alexis Carrel of the Rockefel- ...titute, in an address before the ...al Academy of Sciences.

...Carrel's statements were ...by many prominent scientists in ...ience to indicate that the se- ...of longevity might be found ...the discovery of a means of ...ing the activity of these cor- ...

...Carrel described the work of the leucocytes, or white blood corpuscles, which experiments had shown, he said, protected the body against infection and also stimulated the growth of new tissue and the regeneration of dormant cells.

He told of his experiments with animals which had indicated that the white blood corpuscles stimulated the growth of new tissue "by setting free growth activating substances in the tissues." He pointed out that in extreme old age new tisue grew to heal wounds and broken bones.

Hideyo Noguchi, a Japanese scientist, who is also a member of the Rockefeller institute, announced he had developed an anti-serum for Rocky Mountain spotted fever, which now has a mortality rate of 70 per cent in the Rocky mountain and Pacific coast states.

He said his serum would prevent the disease if the victim was inoculated within four days after he contracted it. Human beings, he declared, caught the disease through the bite of the wood tick and usually did not know they had the fever until six days after they were bitten.

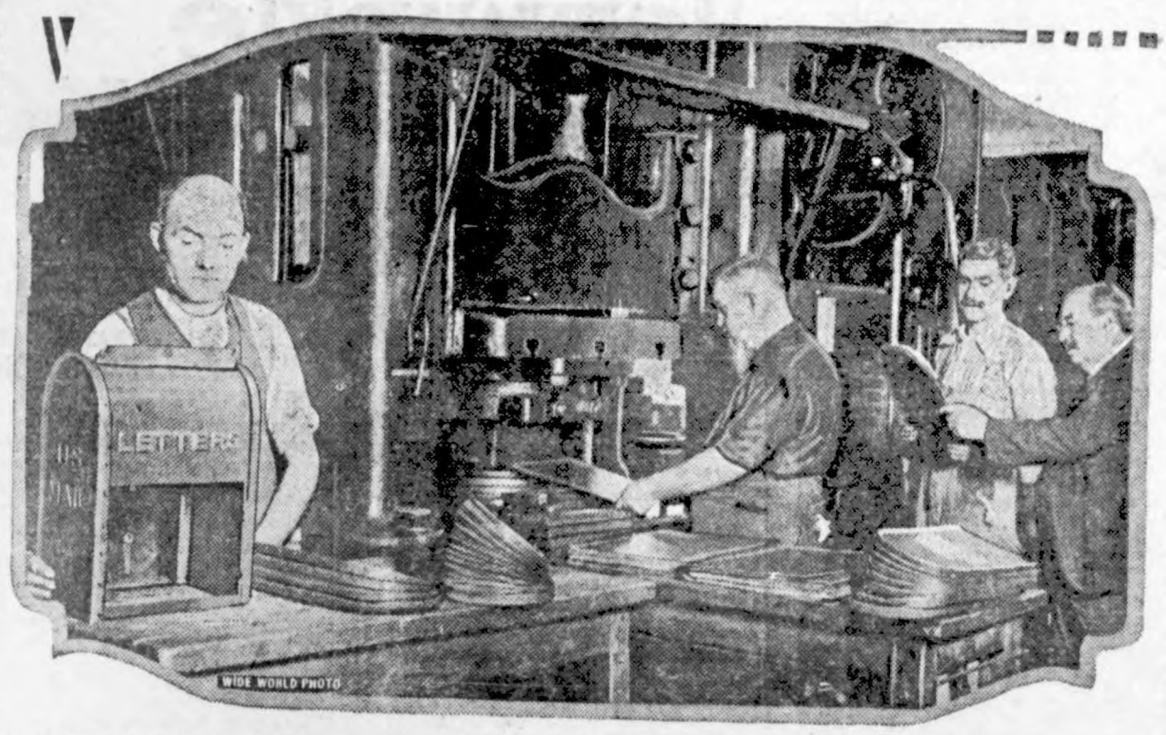
Worms Dined on Savings of Man Afraid of Banks

Two years ago Peter Pullos, railroad section foreman of Toledo, O., became worried over financial conditions of banks and withdrew his life's savings, $1,350, and buried it in an earthen jar.

Recently Pullos decided that banks were all right again and dug up the jar. In the bottom of the partly disintegrated receptacle was a mass of bill fragments, chewed by worms until they were past redemption.

Some suppose Hebrew to have been the language spoken by Adam.

Peace Use for the Instruments of Warfare

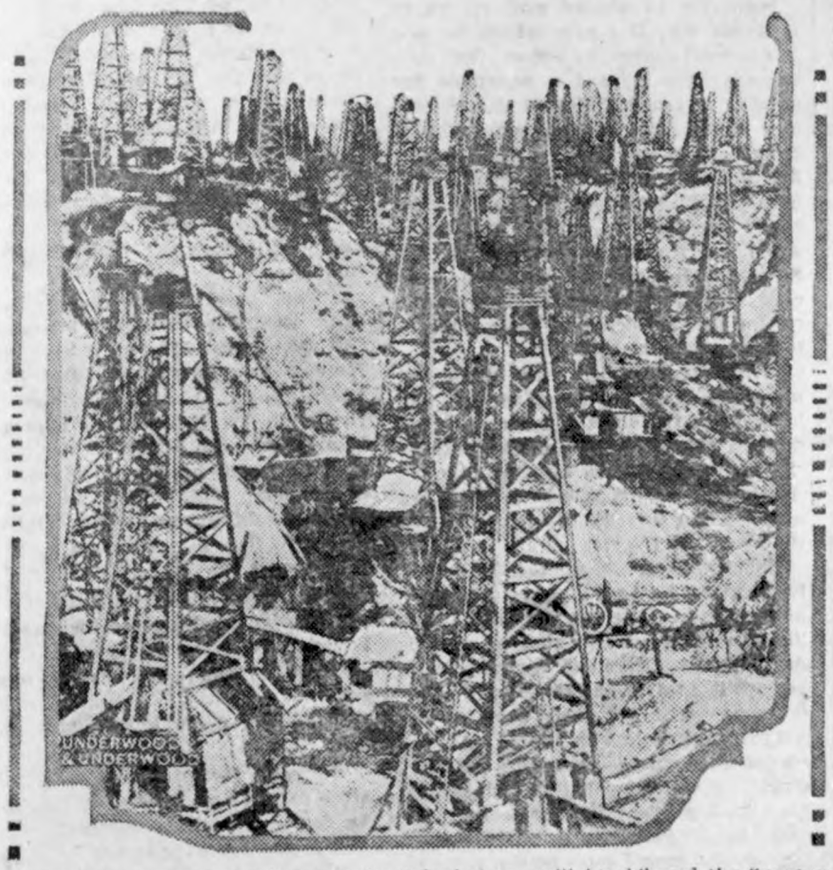


In the gun shop of the Washington navy yard they are making letter boxes for the Post Office department out of discarded shell cases and other ordnance material.

Biggest X-Ray Apparatus in World

Garfield hospital, Washington, D. C., has installed the largest X-Ray apparatus in the world for the treatment of cancer. This machine is so designed that it is unnecessary for the patient, attendants and operator to be protected. A jacket of lead, one-half inch thick, lines the cylinder, effectually preventing the escape of the rays. A six-inch aperture in the bottom permits the rays to play upon the parts of the body selected for treatment. The equipment delivers 200,000 volts, which is 100 per cent greater than has been produced in America by any other such apparatus.

Lots of Oil Wells in Burmese Field



This is Burma, but where are the "elephants a-pilin' teak" and the "neater, sweeter maiden"? It is a view of the Burmese oil fields, where the wells are so close together that the workmen interfere with one another. According to John Park, a former Dayton (O.) man, who is manager for the British oil company controlling these wells, the number of wells to the acre on this field is from 75 to 150.

Costly Strawberry Plant and Buyer

Frank E. Beatty, president of the R. M. Kellogg company, fruit growers, and the Rockhill strawberry plant, for which he has just paid $50,000, gaining the exclusive right to propagate the berry. The plant was originated by Harlow Rockhill of Iowa and is almost as large as a bushel basket.

MAKES RIOTERS WEEP

Before you start a riot, examine the above photograph. Capt. L. M. McBride is showing the new tear gas gun with which Washington police will be equipped for riot squad duty. The gun has two cylinders and a nozzle. Compressed air in one cylinder draws tear gas from the other and throws a stream through the nozzle. The stream breaks up into a fine mist, and if it ever reaches you, you are going to cry and cry hard, no matter how stony your heart may be. The gun weighs seven pounds.

POLES HONOR PERSHING

Gen. John J. Pershing being decorated with the Polish "Virtuti militari" and "Polonia restituta," awarded him by the Polish government for services during the World war. The presentations were made by Dr. Wroblewski, the new minister to this country from Poland.

Trailing Aurora.

Incidental to his voyage of discovery in the Arctic, Captain Roald Amundsen plans to make movie pictures of the aurora borealis—that wonderful phenomenon, now known to be electrical in its nature, which manifests itself in the form of light-streamers that ascend into the sky all around the Arctic circle.

Occasionally in our latitudes we get a glimpse of it, but only a glimpse; and it seems to us as if the streamers sprang from the surface level of the earth. But they do not. They start from 40 to 50 miles up.

It is the sun that makes the aurora, which varies in size and intensity with solar activity. Once in a while, when it reaches a maximum, its streamers may be seen stretching clear across our night sky, and there is so much electricity let loose that all our telegraph instruments go on strike.

NOTICE TO AUTOMOBILE OWNERS.

After December 1st, 1922, this office will begin issuing 1923 licenses. Please bear in mind that unless your last registration number is given in applying for 1923 licence it will be necessary for us to return your application for that information.

JOHN SUURBALLE,
(Nov. 23-J 1.) Treasurer.

NOTICE OF APPOINTMENT OF ADMINISTRATRIX

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Administratrix of the Estate of Clarence A. Arnold late of Hancock County, State of Iowa, deceased.

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, [illegible] verified, to the undersigned for allowance.

Dated this 23d day of A. D. 1922.

EMILIE ARNOLD,
(11-21 '22) Administratrix.

IS IT PAY TO WORRY ABOUT APPENDICITIS

Can appendicitis be guarded against by preventing intestinal infection? The intestinal antiseptic, Adler-i-ka, acts on BOTH upper and lower bowel removing ALL foul, decaying matter which might start infection. EXCELLENT for gas on stomach or chronic constipation. It removes matter which you never thought was in your system and which nothing else can dislodge. One man reports it is unbelievable the awful impurities Adler-i-ka brought out. E. S. D. Kahrs, Druggist. adv

HERE'S THE STORY SO FAR

SYNOPSIS

CHAPTER I—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They form a singular compact.

CHAPTER II.—Drace gets his mind off his mission by entering into deck sports in which he exhibits an unusual athletic prowess. Liberty Shottle is again unlucky at cards and attempts a financial negotiation with Drace. The latter, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination announced to his new chum, to hang La Vitte as high as Haman. Drace has become enamored of a mysterious beauty aboard the boat.

CHAPTER III.—The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. Shottle becomes possessed of two tickets for the French ball, a great society event, and proposes that Drace accompany him to the affair. The young men attend and Drace unexpectedly meets the girl who had fired his heart aboard the steamer. She is accompanied by one Boyce, whose proprietary interest indicates that he is her fiance. Through stratagem Shottle learns that the name of the girl is Nadine la Vitte and that her companion of the evening is the man who is seeking to marry her.

CHAPTER IV.—Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. In one of their nocturnal pilgrimages they come upon a mob intent upon hanging a poor wretch from the limb of a tree. It is a typical carpetbag execution and aroused the resentment of an opposing mob of citizens. Drace takes a hand in the fight which starts and is instrumental in preventing the execution. From a window opposite the scene, he catches a glimpse of one he is sure is Nadine.

NOW GO ON WITH IT

Catching up his weapon, he was about to mix in the fight again when the sharp scream of a woman caught and held him for a moment. He glanced hurriedly about; at various windows were lights and silhouetted figures of onlookers. But as if drawn by some lodestone instinct his eyes went to a second-story window just beyond the tree; and there, in the strong light of a lamp just behind her, he saw again the face of the barbaric rose maid, Nadine la Vitte.

Instantly he whirled and strove to fight his way to a gate which he saw in the wall before the house. But now came a new cry and a scramble for safety. A troop of United States cavalry came sweeping the thoroughfare from curb to curb, their drawn sabers flashing, the aroused anger of Uncle Sam rebuking a riot. Not to run was to be trampled to death, but Drace stood an instant to look about for Shottle. He could not find him, however, and he had to seek his own safety, for the cavalry were near, spreading out upon the sidewalk.

With divers others, he stood not upon the order of his going but ran back down the street and then hurried down a side street out of the path of the troopers. There he waited until the tumult had subsided—perhaps an hour. Then he made his way back to the scene of the riot.

The house at the window of which he thought he had glimpsed the face of Nadine la Vitte was now dark. But in spite of the curious glances of sundry loiterers, Drace took a careful survey of it and of the three oak trees in front—even felt their bark to familiarize himself with them. At the corner he sought the name of the street, on the lamp, but the glass had been broken, leaving only a red "L" and the fragments and "e." But no matter—he would know where to turn. would know the house when abreast of it.

Now Drace hastened toward the St. Charles. The streets were quiet. But a wagon rattled by, and he saw that it was filled with wounded men. He thought of Shottle and his spirit was oppressed with sorrow. Shottle's escape must have been impossible, and tomorrow they would take his body, throw it into some oozy hole and cover it with mud.

In the lobby of the St. Charles men stood in groups, talking of the fall in the price of cotton. The riot, which to Drace had meant so much, was not even known, so accustomed was the town to scenes of violence. Drace asked the clerk if Shottle had come in. No; his key was in the box. Then Drace thought that surely Liberty must be dead or wounded, hauled away to suffer. He went forth again, to the department of police, to the cavalry barracks, but nothing could he learn. Then in his room he sat sorrowing over his friend and yet thrilled with a selfish happiness, for he had found the barbaric rosemaid. He went to bed, tossed, slept, dreamed in a mingling of distress and gladness, and awoke. Shottle was standing in the room.

"Thank the Lord!" cried Drace, and sprang out of bed.

"That's what I say, friend Virgil. But you will please address me as Colonel Shottle. I am a free man. Here!"

He held forth an envelope; opening it, Drace took out a hundred-dollar banknote.

"What does this mean, Lib?"

"I am Colonel Shottle, sir, and not Lib."

"I beg your pardon, Colonel; but what does this mean?"

Shottle sat down and crossed his long legs. He took out a cigar and lighted it.

"Virgil, I fought as long as I thought it was of advantage. The old carbine I had wouldn't shoot, and I want to tell you that mauling darky heads with a piece of iron is hard work. I looked about for you but couldn't find you, and knowing that you knew how to take care of yourself, I began to sniff for a way to get out, found a hole in a wall, ducked through and scooted. That was all natural enough. Anybody could have done that. But now comes the inspirational part. I got around into Royal street and met a steamboat captain who asked me to have a drink, and I needed it, for I had been hard at work.

"So I went in with him. And then up I hops to a gambling house with the money you'd paid me for introducing you to Nadine la Vitte. The poker tables were full, so I nipped in modestly at the faro-bank. That's not a very swift game, but sometimes it is as sure as buying houses and lots, if you've got the patience. I invested cautiously till about daylight, cashed in exactly two hundred, and here I am as refreshed as a horse grazing on clover."

"Colonel, I congratulate you!" said Drace.

The two breakfasted together, and then Drace set out to find again the house at the scene of the riot—the house at the window of which he had seen the face of Nadine la Vitte. At length he found himself in the side street where he had taken refuge the night before, and turning out of this he came to the tree from the limb of which he had cut down the half-strangled victim of the mob. There opposite was the house and there was the window at which he had seen Nadine's face; but across the window, boards had been nailed! The other windows, too, and the doors, were nailed up; the place was deserted. Could that face at the window have been only a creature of his imagination?

An old negro in nondescript livery came down the walk from a house a few doors away. He might have been footman to a harlequin. But when Drace spoke to him, the dignified change in his countenance appeared to alter even the aspect of his attire; and now he might have been usher to a governor. This quick change had been brought about by his intuitive discovery that Drace was a man of consequence.

"Do you know anything about the people who lived across the street?" Drace asked.

"Wall, no sah; da wus po' folks, sah."

"Then you don't know where they went."

"No sah. My 'ployment is ter look after folks ob er higher 'dition, sah. An den ter preach on Sunday."

"Oh, you are a preacher."

"Called, sah, wid er blast from de trumpet."

"Does your church ever need money?" In a moment he lost his dignity.

"Look yeah, boss, whut's er nigger church fur ef it ain't ter need money? Co'se it need money. But what you gwine do erbout it?

"Yassuh," he said, when Drace had warmed him with a greenback, "I reckon dey done moved away. There was er kind of rumpus last night. And I reckon they-all thought it wasn't no place foh dem no mo'; dey lef' mighty sudden-like, uhly dis mawnin'."

And that was all Drace could learn; no one in the vicinity would admit that they knew them or their destination. Disliking to call too much attention to himself, Drace walked away heavy-hearted. For a long time he wandered the streets. He came to the levee, and the French market. He went into the old St. Louis cemetery, and looked upon the novel sight of bodies sepulchered in a wall with doors like a furnace. These compartments, he learned, were rented by the month to the poor; and a short tenancy it was for many a son and daughter of penury answering Eternity's call, for when the grim agent failed to collect the pittance promised by sorrow, the shrouded renter was evicted—an old Spanish custom, Drace was told.

Recalled by these grim surroundings to the purpose that had brought him to the South, Drace now determined to give himself wholly to his quest for Stepho la Vitte. He returned to the hotel, and found Shottle nervous in a cloud of smoke. The floor was covered with burned matches and the stubs of cigars.

"Lib, I'm crushed," announced Drace.

"So am I. But how does it happen that the dust-cart drove over you too?"

"Nadine is gone. The place is nailed up."

"That's tough, all right. But what are you going to do about it? Are you going to come to your puritanic senses and give the whole thing up, or do you expect—"

"I expect to fulfill my sacred mission. I must find Stepho la Vitte."

Shottle got up and shook hands with his friend. He swore that he would make the search the aim of his life. "Suppose you hire me by the day," he suggested. "A man does better work by the day. He always has fresh stimulus every time the sun rises."

"Very well—ten dollars a day."

"That's liberal, Virgil, and I'll take it. And let's get Old Josh to help us. He is more or less acquainted with Stepho's habits."

(Continued on page 5)

Never be too hasty in treating another person with silent contempt. He might buy up the mortgage on your home.

COUNCIL PROCEEDINGS

Klemme, Iowa,
July 24, 1922.

Regular meeting of the Town Council, of Klemme, Iowa, held at the office of Mayor F. J. Wenck.

Meeting called to order by Mayor F. J. Wenck, presiding.

Members present: A. D. Gimer, Vm. Smith, Joe Johnson, C. W. Viles, and Wm. Bachman.

Members absent: None

Motion made and seconded that the following bills be allowed:

Fred Henschen. Salary for June and July..... $150.00

Standard Oil Company.....
Gas..... $19.40

Motion made and seconded to adjourn.

F. J. WENCK, Mayor.
J. N. DAY, Clerk.

This country has dolled up for Christmas as the weather man sent us a mixture of snow, rain and sleet late yesterday afternoon. But why wory, the winter has been fine so far and California had nothing on us for nice weather.

Friday "Jack" Wellemeyer put on the finishing touches on his radio receiving set which he had moved from the house to the store. The latest Jack added to the equipment is a Magnavox, an instrument enabling a number of persons to listen in on the concerts. The outfit works fine.

Our neighbor, John Day [illegible] had a housefull of company [illegible] key Day, when they entertai[illegible] following: Mr. and Mrs. D. [illegible] and daughter Bernice, of Gar[illegible] Mr. and Mrs. Wm. Smith and [illegible] ter Mable, of this city.

The share holders of the [illegible] Co-Operative Creamery wi[illegible] their annual business meetin[illegible] Idle Hour theatre Saturday [illegible] noon at one o'clock. At th[illegible] they will have a re-election [illegible] tors and officers and will a[illegible] over matters of business pe[illegible] to Klemme's butter factory.

Capital--

Even a man who goes into business with a pushcart must have some capital, else he cannot buy the cart nor his stock of goods.

In the early days John D. Rockefeller kept a record of every cent he spent, and he never spent a cent unnecessarily.

Andrew Carnegie got his start by saving what he could out of his small wages and investing it wisely.

Men are starting fortunes today in exactly the same way.

Are you spending or saving?

Let us help you to success. Come in today.

—5 per cent paid on time deposits.

CHAPTER V

An hour later Drace and Shottle returned to their hotel after a ceremonious visit with Colonel Josh. The Colonel knew of Stepho, had indeed met him once, and he promised to make discreet inquiries that should without fail disclose the creole's whereabouts.

Hardly had Drace reached his room, however, before a visitor was shown in—a visitor who introduced himself as an agent of the New Orleans police department and who had a most distressing communication to make:

It was known that Mr. Drace and his friend had taken part in a recent riot. Mr. Drace was one of the leaders, had severely wounded more than one man, and without cause, being from the North, just arrived, and having no possible interest in the city. However, he was to be treated with more of lenity than would rhyme with his crime, for instead of punishment he was only to be banished, along with his friend. A steamboat, the Bumblebee, bound northward, would leave next morning. The chief of police would grieve if Mr. Drace and his friend failed to register among the passengers.

With scarcely twelve hours left in which to find Stepho la Vitte, Drace paced the streets in an agony of anxiety, making a hundred plans to find Stepho or to outwit the New Orleans officials and prolong his stay, but all in vain.

Colonel Josh did not appear, but he seemed to have embarked upon the quest, for when the distracted Drace called at his quarters about midnight the old fellow was still absent. Dawn brought Drace back again, for all his other endeavors had been unsuccessful, and but two hours remained before the Bumblebee's departure.

Routed out of bed, the Colonel kept Drace waiting a full half hour before he put in an appearance. Then, however, he offered a faint ray of hope. He had discovered that a certain Frenchman, a wine dealer, living at an address he produced scrawled on paper, was reported to be an intimate of Stepho. Possibly from him Mr. Drace might—

Drace hurriedly explained the decree which had banished him; then he "presented" the Colonel with a check on account, asked him to convey his respects to Miss Lucy and took his departure.

On his way to the Frenchman's he stopped at the hotel, where he found Shottle strapping up their baggage—and a police official paying an informal but suggestive call. An hour's grace remained. Drace paid his score at the desk, sent his baggage to the boat and then, summoning a cab, drove off with Shottle to the house of the Frenchman. It proved to be a mean abode, both wineshop and dwelling. Drace knocked eagerly. A small man, his mustache dyed, came to the door, blinking.

"I beg your pardon, sir, but I am a friend of Mr. la Vitte, and—"

"Pardon, monsieur, but you do not look like him, ze friend."

"But I am. And I came with word that will be of advantage to him. The police are after him—"

"Aw, he know zat. Monsieur would trouble himself for nothing. Good morning."

"Just a moment, please. You have no need to look on me with suspicion. I am his friend—and—"

"If you his friend," interrupted the man, "you know he gone—to Europe, on steamer to France."

Drace was about to abandon the man in despair when Shottle, who had been staring at a case of wine which stood by the door ticketed and sealed for shipment, suddenly interrupted.

"Ah," he cried, "can this be the famous Chateau Yquem?" And brushing past the Frenchman, he leaned over as if to examine the bottle. With a cry, the wine merchant shoved him rudely away. "Zat is ze private stock," he snarled. "He is not for sale. I am not yet open for business, sirs. Good morning."

Shottle grasped Drace's arm and drew him away. A cart had halted outside, and as they entered their cab they saw the carter shouldering the case of wine and bearing toward his vehicle.

As they turned the corner, a deep-throated blast from the Bumblebee sounded a warning. Shottle turned upon the disappointed Drace with a gleeful countenance. "Master," he said, "I'll thank you for that money again. I've found him."

"Found him!" exclaimed Drace. "How?"

"That case of wine was addressed to Stepho la Vitte at Farnum's Landing, Mississippi. That wine is going to Stepho on the Bumblebee. And so are we!"

An hour later Drace sat with Shottle on the deck of the Bumblebee, watching the ever-changing panorama of the Mississippi and musing upon the sudden shifting of his quest.

"Liberty," asked Drace presently, "how far up is this Farnum's Landing? Do you recall it?"

"Yes," said Liberty. "I know this river. Farnum's Landing is—by golly!" he exclaimed, breaking off, "Farnum's Landing is the next stop below Bethpage's Landing! And General Bethpage is my uncle! We'll go there."

"But," Drace said dubiously, "he's not my uncle, and I'm afraid it would be intruding somewhat on his hospitality to—"

"Zat Is Ze Private Stock," He Snarled.

"Nothing of the sort," averred Liberty. "Any friend of mine would be doubly welcome. You can't know much about the General. Taming, now, but he used to be the most remarkable character, in a quiet way, along the river. And when I tell you about him, Virgil, you'll laugh. Before the war he was professor at Newsome, a little college up in the scrub-oak country. He entered the army as a colonel and came out as a brigadier."

"I don't see anything to laugh at in that."

"No, but wait. He had considerable money, and at times used to come down to New Orleans to enjoy himself. On one occasion he lost all his money at roulette."

"Still nothing to laugh at."

"No? All the property he had with him was a bodyservant, a Guinea negro named Dip. So what does he do? He says to the proprietor of the gambling house: 'I wish to play this negro, sir.' 'All right; I'll take off the limit and let you play him. How much is he worth?' says the gambler. 'I don't want to play his value in money, but him, I tell you,' says the General. 'Say the word, and I'll bet him on one of these numbers.' He had been losing every bet, and the proprietor knew that it would be safe. So he says: 'All right, go ahead.'

"The General wasn't sober, so he calls the darky and says: 'Dip, stand here with your forefingers on number twenty, right here.' The darky did so, and they turned the wheel, everybody laughing. Well, sir, if twenty didn't win, the world is a puffball! Won, and

(Continued on page 7)

Arlene Woods spent several days the past week in Klemme, visiting with her aunt and uncle, Mr. and Mrs. G. P. McCullough. We are glad to report that Arlene is much better since her recent illness.

Mr. and Mrs. John Schachterle and family, of Ackley, Iowa, were over Sunday visitors at the home of Mr. Lewis Newberger. Mr. and Mrs. Garland Hoffman were also guests at the Newberger home Sunday.

Christmas Suggestions

Christmas will soon be here and it is not too early to think of buying you Xmas Candies, Nuts, Cigars, etc. You will find a nice selection of Xmas Candies here, in both bulk and fancy boxes. Always a nice, fresh line of cigars—give him a box of "smokes" for Christmas, there is nothing better. A fine box of Candy for her will be just the thing.

Then we always have ice cream, nuts and fruit for your table. Call on us—

Conrad Quandt

We are going to order a carload of

WIRE

before long. We will take your order for any kind of wire -- give you the car lot price if taken off the car, and will carry the account until April 1, 1922.

Take advantage of this offer

Norhern Lumber Co.

A Cheery Message

Means Much
Costs Little

Nothing truer could be said of the splendid line of Christmas Cards we are showing.

A special feature being that when you have made your selection we take that sample out of our list, so there be will be no orders duplicated. Your selection will be strictly exclusive.

We are featuring a complete line of cards suitable for personal greetings.

An Early Selection is Advisable

THE AMERICAN LEGION

(Copyright, 1921, American Press League.) the American Legion News Service.)

TRIBUTE TO THE LEGION MEN

New Orleans Times-Picayune Praises Conduct of Visitors During the National Convention.

New Orleans is proud and glad to have had the opportunity to entertain the American Legion national convention and heartily congratulates San Francisco upon its capture of the honor for 1923, according to an editorial in the Times-Picayune, a leading New Orleans newspaper, printed several days after the departure of the Legionnaires.

"The Legionnaires as a body earned the good opinions even of those few Orleanians who because of rumors of misdoings at Kansas City were slightly prejudiced against the gathering," the editorial states. "Throughout American Legion week good humor and good order prevailed. The rare instances of minor rowdyism or ruffianism served only as exceptions going to prove the general rule of splendid behavior—and of these exceptions some, perhaps the majority, were chargeable to local hoodlums who took advantage of the Legion festivities to misbehave in the hope that their offenses would be charged to the visitors' account. In so large an assembly some impostors, crooks and evil-doers are almost invariably found but the careful work of the Legion officials and the local police simply restricted the activities of these undesirables.

"Of harmless 'high jinks' there was, of course, a joyous abundance. New Orleans, with its carnival traditions, shared in the fun of it all and rejoiced in the hilarity which testified that the lads of the Legion were having a good time. Of wanton offense and of malicious mischief, American Legion week was remarkably free. The wish expressed by the Times-Picayune last Saturday morning—that the Legionnaires would carry to their homes 'recollections of the convention as pleasant as those they leave with us' —came straight from the heart."

In a previous editorial the Times-Picayune stated:

"The American Legion convention closed yesterday afternoon will be long and pleasantly remembered by New Orleans. Accustomed as this city is to great conventions and impressive parades, the Legion assembly and the inspiring review staged last Wednesday made a distinctive appeal, an impression of sturdy Americanism and militant patriotism not soon to be effaced, and wholly favorable."

And another editorial in the same newspaper reads:

"Their visit to us will lead, as we hope, to the return of many of these stalwart young Americans, to live and grow with us."

HEAD OF LEGION AUXILIARY

Dr. Kate Waller Barrett, Virginia Woman, Originator of Idea for World Peace Body.

Dr. Kate Waller Barrett, newly elected president of the American Legion auxiliary, was one of five women sent from the United States to the signing of the Treaty of Versailles.

Dr. Kate Barrett

While she was in Paris, Dr. Barrett developed the idea of an international organization of women relatives of ex-service men to work for world peace. The outgrowth of this conception is a proposal to form an auxiliary to the Interallied Veterans' association, which was received enthusiastically by association delegates at their recent meeting in New Orleans. The international auxiliary is expected to be formed at the same time as the next Legion and auxiliary convention.

Doctor Barrett lives in Alexandria, Va., and has served as president of the auxiliary in that state. Her ancestors came to Virginia with Capt. John Smith. Doctor Barrett is serving her fourth term as state regent of the Daughters of the American Revolution and was president of the first club organized in Virginia whose members were the mothers and wives of soldiers. This club later became the auxiliary unit of the Alexandria Legion post.

Maj. Charles Barrett, U. S. M. C., her son, was chief of staff to General Neville at Coblentz and was afterwards sent to make a survey and relief map of Chateau Thierry and Belleau Woods. This map, which is pronounced to be one of the finest works of its kind in existence, is a permanent exhibit in the rotunda of the National museum in Washington.

Helium in the Air.

Helium, the non-explosive gas used in the new United States airships, exists in the air you breathe in the proportion of one part by volume in 185,000.

ALL PROUD OF HER SUCCESS

Mrs. Joseph Fischer Directed Social Activities of Recent Auxiliary National Meeting.

For excellent services rendered as chairman of the American Legion Auxiliary's recent national convention in New Orleans, Mrs. Joseph L. Fischer was asked to accept a high office in that organization but refused because she felt that the success of the convention was ample reward for her endeavors.

Mrs. Jos. Fischer.

Mrs. Fischer directed the activities of scores of New Orelans society leaders who put their shoulders to the wheel to entertain the thousands of women visitors to the national gathering.

A daughter of the late Judge Frederick Hooker of Minneapolis, Mrs. Fischer spent the early part of her life in that city. She was educated in a private school at Washington and in the University of Minnesota. Following her marriage she went to New Orleans where she became a leader in women's clubs and social activities. She was elected vice president of the Louisiana League of Women Voters. During the war Mrs. Fischer raised a large sum of money in Louisiana for the American Red Cross. Her only son served with the American forces in Italy.

Mrs. Fischer is a lineal descendant of Fighting Joe Hooker, the famous Civil war hero.

MADE BIG MEET A SUCCESS

T. Semmes Walmsley, New Orleans, Served as General Chairman of the Convention Committee.

To T. Semmes Walmsley of New Orleans goes the credit for the success of the American Legion's fourth annual national convention. Mr. Walmsley was general chairman of the convention committee.

T. S. Walmsley.

Mr. Walmsley was educated in the public schools of New Orleans and Spring Hill college at Mobile, Ala., and was graduated from the law school at Tulane university. He played on 14 'varsity teams, was captain of the football and track teams and hung up a record as Southern Athletic association quarter-mile runner.

Commissioned a captain at the Leon Springs officers' training camp at Leon, Tex., Mr. Walmsley remained there as instructor until December 29, 1917, when he was detailed to take charge of the first training battalion at Kelley field, San Antonio, Tex. In April, 1918, he was placed in command of the Forty-sixth aerial squadron and sent to Ellington field at Houston, Tex., for bombing instruction. From Ellington field he took his squadron to Mineola, L. I., and built the first hangars on President Roosevelt field.

He has been state hospitalization officer since his term of office expired as national committeeman. Nominated for the office of national commander, Mr. Walmsley withdrew his name on the convention floor because he felt that New Orleans had already been honored sufficiently in being the host city to the convention.

PLANNED THE OLYMPIC MEET

James Murphy, Iowa, Legion's National Athletic Commission Chairman, Arranged Big Program.

As chairman of the American Legion's national athletic commission, James R. Murphy of Iowa planned the recent Olympic meet at New Orleans, in which ex-service athletes from all parts of the country competed in track and field events, amateur boxing and wrestling, aquatic sports, golf and tennis tournaments and marksmanship contest.

James Murphy.

Hanford MacNider, past national commander of the Legion, appointed Mr. Murphy chairman of the commission last June when the national executive committee authorized the formation of the athletic body.

Mr. Murphy was a distinguished all-round athlete during the years 1911-1913, while attending the University of Iowa. He was captain of Iowa's football team. After leaving college he continued athletic activities until the beginning of the World war, when he was made a captain in the Fourth division and served overseas with that organization.

The Legion's attention was first drawn to athletics when Provost Marshal Crowder's report on the physical condition of the men who were drafted for the service was made public. The report indicated that less than one-third of the men drafted were actually fit for military service.

MANY KILLED IN MEXICO CAPITAL

Crowd, Demonstrating Against Lack of Water, Is Fired Upon.

CITY HALL BURNED BY MOB

Charge of Inefficiency and Graft on Part of City Government Cause—Troops Called to Make Way for Firemen.

Mexico City, Dec. 2.—More than 25 persons were killed and 200 were wounded when mounted police fired on a crowd of working people who were demonstrating in front of the city hall against the lack of drinking water.

Infuriated by the first fusillade from the police, the workers rushed at the city hall and succeeded in gutting it by fire.

More than 20,000 persons had gathered to demonstrate vigorously but peacefully against the mayor and the city council, which were charged with dishonesty and the general inefficiency that had culminated in the lack of water. The crowd marched to the Zocalo, which is the central plaza.

Without warning the mounted police, who were lined up in front of the city hall, fired on the crowd, which scattered, but soon reassembled in a furious mood. The mob seized great beams from the city hall scaffolding, where repairs were being made, and smashed the great doors and the iron grating which protected the windows. Many then scrambled into the courtyard. Meantime the mob in the plaza, in front of the cathedral, was fired on by machine guns stationed on the palace roof and in the open galleries.

Once more the mob gave way, and once more returned. Now many of them carried gasoline and blazing, gasoline-soaked cotton and cloths, which they hurled through the open windows of the building, and also dashed against the scaffolding.

Immediately the fire flared up. Firemen came, preceded by federal troops, who cleared the way for them. But only the walls of the municipal building remained standing. The official documents were destroyed.

SAYS INTOXICANTS MYSTERY

Leader of the Drys Holds Science Cannot Determine What Is Intoxicating Liquors.

Washington, Dec. 2.—One man can get drunk on a glass of 2.75 beer while another man may carry a quart of white lightning with comparative comfort, Wayne B. Wheeler decided in announcing the Anti-Saloon league would oppose any move for the establishment of a "scientific commission" to determine what is intoxicating liquor. "No scientific commission can determine accurately what is intoxicating liquor for 100,000,000 people," Wheeler said.

LAKE BOAT SINKS; 11 DROWN

Nine Members of Crew of Canadian Steamer Rescued as Vessel Breaks Up.

Calumet, Mich., Dec. 2.—Capt. Nason Bernard and ten members of the crew of the Canadian steamer Mapleburst were drowned when the ship broke up a mile west of Portage Lake canal during a heavy gale. Nine others of the crew were rescued, one at a time, jumping from the bridge into a lifeboat.

NEW DISORDERS IN SMYRNA

Five Hundred Persons Killed or Hurt When Turk Troops Break Up Meeting.

Athens, Dec. 2.—As a result of an encounter when Turkish troops in Smyrna tried to break up a meeting which was attended by many different nationalities, 500 were killed or injured, according to reports in Athens newspapers. The meeting was held to protest against driving out Greek merchants, who are said to be essential to commercial life in the city.

OPEN WAR ON OLD PARTIES

Progressive Republicans and Democrats Organize—Plan Radical Steps in Government.

Washington, Dec. 2.—A "progressive bloc" to fight for an extensive program of government reform and innovation was organized here by the 34 Republican and Democratic senators, senators-elect, representatives and representatives-elect who met at the call of Senator LaFollette (Rep., Wis.).

Bavarian Towns Fined.

Paris, Dec. 2.—The allied governments have imposed fines of $125,000 each on the two Bavarian towns Passau and Ingolstadt for recent attacks on French and British military control officers.

Capt. George Augur Dies.

New York, Dec. 2.—Capt. Geo. Augur, said to be the largest man in the world, died suddenly here. For several years he had toured the country with a circus. He was eight feet four inches tall and weighed 360 pounds.

KING GEORGE OF GREECE

A very recent and excellent portrait of King George of Greece, who acceded to the throne following the abdication of his father, King Constantine.

READY TO TAKE RUHR

France Is Expected to Act on January 1.

Reparations Payment Falls Due on That Date—Paris Cabinet Notifies the Allies.

Paris, Nov. 29.—Premier Poincare's plans for seizing German property and invading German territory were formally approved by the French cabinet in preparation for the reparation crisis now considered unavoidable.

A notification of the French decision has been sent to the allies.

France's move is likely to take place when the next German payments fall due in January. It will involve seizure of the Ruhr and the setting up of a nominally independent regime on the left bank of the Ruhr.

It is understood that Marshal Foch and Major General Buot, chief of staff, could execute the plan for the expansion of the military occupation of the right bank of the Rhine within twenty-four hours.

The civil administration, Tirard, the French high commissioner for the Rhineland, says could be extended almost immediately.

SURVEY FAVORS 8-HOUR DAY

Harding, Reviewing Report, Says Longer Period Has Outlived Usefulness.

New York, Dec. 2.—The twelve-hour day and the type of worker it produces have outlived their usefulness in American life, President Harding declares, commenting on the report of the committee on work periods in continuous industry of the Federated American Engineering Societies.

The committee, after two years of investigation of more than forty continuous industries, including steel and iron, found that the twelve-hour day was not an economic necessity. These findings, President Harding says, represent his "social viewpoint."

CAR LOADS BIGGEST KNOWN

Revenue Freight Is Heaviest in History for This Time of the Year.

New York, Dec. 1.—Loading of revenue freight continues to be the heaviest in the history of American railroads for this time of the year, reports just received from the car service division of the American Railway association show. For the week ended November 18 loading of all commodities totaled 969,094 cars an increase of 178,731 over the corresponding week of 1920. There was also an increase of 15,181 cars over the week ended November 11, when loadings were affected by observance of Armistice day and election day.

GREEK KING'S AIDS SLAIN

Former Cabinet Members Charged With Defeat by Turks Executed —British Quit Greece.

Athens, Nov. 29.—Six members of the Greek cabinet that fell when King Constantine abdicated were executed here, it was officially announced. They were shot by a firing squad. The entire six stood side by side before several platoons of soldiers. The bodies were given to relatives.

The British minister, F. O. Lindley, has notified the Greek government that because of the executions Great Britain has broken off relations with Greece, and that he is leaving Athens.

Radio Links Honduras and U. S.

Washington, Dec. 2.—Direct wireless communication between the United States and Honduras began with the receipt of a message by President Harding from President Gutierrez at Tegucigalpa, Honduras.

Mexico Bars "Bad Man" Films.

Mexico City, Dec. 2.—President Obregon has ordered that moving pictures showing Mexicans as villains are to be barred from this country. Most of such pictures are "western" stories, produced in the United States.

IRISH EXECUTE 3 MORE REBELS

Action Is Government's Answer to Opposition Protests in the Dail.

CAPTURE REBEL DOCUMENTS

Papers Show the Irregulars' Intention of Destroying Communications Throughout Ireland Within Next Six Weeks.

Dublin, Dec. 1.—The government's answer to the opposition protests in the Dail Eireann was the execution of three more rebels here. The men were captured October 30 after participating in an attack on Oriel house, headquarters of the criminal investigation department. They were tried by a court-martial on November 14. The rebels executed were Joseph Spooner, caught with a revolver; Patrick Farrell, caught with a bomb, and John Murphy, caught with three bombs.

Minister of Defense Mulcahy announced to the Dail that the Free State forces had captured documents showing the irregulars' intention of destroying communications throughout Ireland within six weeks. Roads were to be blocked, canals rendered useless, railroads cut, railroad bridges and stations destroyed and trains wrecked.

Treaties and constitutions have failed to convince many Irishmen, always suspicious of England, that the old enemy is really leaving. However, a small advertisement in the morning papers has awakened Dublin to the approaching historic event. A firm of accountants announces that all claims against the lord lieutenant must be presented before December 6. The military unit makes a similar announcement.

The British evacuation of Dublin will begin December 12 and will be completed before Christmas. No other British are stationed in southern Ireland except in the Pettigo and Beleek sectors, which were occupied last June. These will be evacuated on January 5 and will be reoccupied by the Free State.

SOUTH FIGHTS LYNCHING BILL

Dixie Senators Term It "Force" Act and Unconstitutional—Will Filibuster Against It.

Washington, Nov. 29.—Denouncing the Dyer anti-lynching bill as proposing the most daring and destructive invasion of state rights in history, southern Democratic senators set out to kill the measure, even if it should be necessary to halt the entire legislative machinery indefinitely.

The bill passed by the house empowering the federal government to intervene to punish lynchers and local governments which fail to enforce the law against lynchers was termed a "force" bill and unconstitutional by its bitter southern opponents.

BRITAIN REPAYS $132,000,000

That Amount Has Been Received by the U. S. Since Last April, Says Exchequer.

London, Dec. 1.—Since last April Great Britain has paid the United States $30,500,000 of interest and $101,500,000 on the principal of her debt, it was stated to commons by Stanley Baldwin, chancellor of the exchequer. It has not been decided whether the $50,000,000 paid November 15 will apply on interest or principal, he added.

MAN WITH NEW GLANDS WINS

"Lifer" in California Prison, Seventy-Three Years of Age, Winner of Thanksgiving Race.

San Quentin, Cal., Dec. 1.—John Ross, seventy-three, won the 50-yard dash for men past sixty-five years of age at the annual Thanksgiving day track and field meet at the state prison here. Ross underwent a gland transplanting operation last year. Seven men condemned to death witnessed the festivities.

NO NEGROES ON THE RHINE

United States Army Officers Declare Not Single One Has Been There Since Early Summer.

Coblenz, Nov. 29.—Not a single French negro soldier or laborer has been in occupied Germany since early summer, American army officers here say.

The French occupationary forces, numbering 90,000, include about 20,000 Algerians, Moroccans and Arabs.

Must Pay for Mixing Numbers.

Minneapolis, Minn., Dec. 2.—George S. Griggs, attorney, was awarded $1,000 by a jury in District court here for delays to his business due to wrong numbers given him by operators of a telephone company.

Five Die of Typhoid; 95 Ill.

Franklin Furnace, N. J., Dec. 2.—In a typhoid epidemic here five persons are dead and 95 are seriously ill. The epidemic is attributed to seepage of unfiltered water, used for fire fighting, into drinking water mains.

MAJ. GEN. C. J. BAIL

When he is retired on Dec. 20 forty-six years of soldiering, Maj. Charles J. Bailey, now comma the Third corps area, will ent field of art. General Bailey is three years old, but declares th proposes to study art. Most intimate friends know that duri service in the army he has, wh opportunity afforded, followed favorite avocation.

Large Japanese Bank Suspend

Tokyo, Dec. 1.—The Osaka Ni Sekiden Ginko suspended pay after large losses by speculation. bank has eleven branches in K and Osaka, and its deposits are 000,000 yen (about $5,000,000).

(ntinued from page 5)

of the place turned pale! that he'd have to pay or close ose. So he says: 'All right, value, and I'll pay the bet.' ries the General. 'I didn't alue, but him. I want thirty- negroes. Size them up to

a farce!" commented Drace. Well, I reckon not. They go out and buy thirty-five egroes. It took quite a while, General waited. And when all been sized up, the General the River, with his thirty-five egroes trailing after him."

Drace could see the picture of n laughed. This was the man going to visit!

Bumblebee was jointly owned ted by Major Pewitt and a low named William Hawkins, fine steamer, but while it was masked as a public carrier, was quick to discover that it with a nomad gambler, profuse tainment that taxed not the for the entertainment sought pelican, as the gamesters Shottle, was not of wine from the fish-egg from Russia or from America's native woods, s, hearts, diamonds and clubs, the Bee still lay at the wharf, breathing low and blubberously through her nostrils. Shottle had put in operation a quickly contrived "touch," presenting himself to Major Pewitt before he had taken the time to introduce his friend to that well-known character.

Now, however, Major Pewitt strolled up; and Shottle, keen to get to the gaming table, introduced Pewitt to Drace and then a moment later himself slipped away.

"We are on our way to visit Shottle's uncle, General Bethpage," explained Drace.

"What, my old friend and fellow-soldier, Bethpage! Never a nobler man drew sword in defense of what he conceived to be right. If you like a genial atmosphere and a company that never tires, you will remain with him as long as possible and still too short a time. I earnestly hope that you may find inducement to settle among us."

"Possibly I may. I like the River. I like the study of character. In character there is all history, all philosophy, all—"

"Just so," the Major agreed. "And we have some remarkable characters here, sir, and some of the most beautiful women in the world; to some people it may appear a little singular, but interesting character among men always develops in an atmosphere pro- ducive of beauty among women."

"And naturally, Major, you are acquainted with both characters and beauty. And by the way, did you ever meet an old fellow—let me see, what is his name? Oh, I think they call him Stepho — something. Oh, yes — La Vitte?"

The Major cleared his throat and gently laid his hand on Drace's shoulder.

"My young friend, they have told you about the most implacable and desperate of men, sir. I know the man, and while nature did not intend —and I beg your pardon for what might seem a want of modesty—that I should fear any human being, yet I confess to an occasional uneasiness in the presence of old Stepho la Vitte I have never had any words with him —that is, strained words; but if I should, I'd await no move on his part but shoot him instantly. Ha, I wish you to meet my dear young friend and much esteemed partner, William Hawkins."

Drace was much taken with Hawkins, his quiet manner, his athletic mold, and passed some time with him in talk, the Major having given to Hawkins a scheming wink.

The boat was now lifting her ruffled way up the river. At a table beneath a great shaded lamp, Shottle sat, not a-[illegible] not staring into vacancy but intent to the expressionless countenance of men merciless in vivisection. Luck at first had cajoled him, let him swell the fire he had obtained to near five hundred, but a yellow-looking swab of whiskers entangled with him and leeched him down to twenty-five. Shottle looked at him, his caterpillar eyebrows, heard his slight hacking cough, his request for a glass of ice-water, and said to himself:

"One of these days I may have a chance to set fire to you as I would any other patch of dead grass."

Slowly and with an economy painful for him to practice, Shottle with many ups and downs built up again toward two hundred; but at length in the afternoon an old citizen who sat high and who looked like a steer, hooked him and horned him broke.

Shottle came stumbling over the doorsill and found Drace in conversation with Major Pewitt and William Hawkins. With a wink the Major enjoined a humorous silence, and mutely they sat attendant on the loser's mood. Shottle sat down, took out a card, wrote on it, put it back into his pocket, tapped his teeth with the pencil and spoke:

"I have just written a resolve, and whenever I do, it becomes a law of my being. It has just been enacted and recorded that never again on this earth am I to bet another cent. I may go to houses where there are card parties, but never again am I to shuffle a deck. My career as a fool is ended . . . Who was it that wrote, 'If at first you don't succeed, try, try again'? A prison sentence would be too good for the hatcher of such a fallacy. If at first you find you're wrong, quit. That's my course for the future."

"I congratulate you. But what are you going to do?" Drace inquired.

"I will drag a surveyor's chain and squint at the landscape. I'll lug a tripod and eat a raw turnip in the wind. Or, if compelled to be humbler, I can curry horses."

"And bet some fellow that you'll have your horses curried first," said the Major.

With his pencil Shottle slowly tapped his teeth.

"The first squirt of cold water generally comes from one as much afflicted as yourself. But no matter. Cold water chills, but at the same time it cleanses. And from this time on, gentlemen, Liberty Shottle, the vague and unreal, will become the obvious and the actual. If I had a thousand dollars right now, I wouldn't bet that the sun will rise tomorrow. Oh, there is such a thing as redemption."

CHAPTER VI.

About four o'clock in the afternoon the Bumblebee passed Farnum's Landing, and later touched at Bethpage Landing. From the crest of the high embankment was an endless view of spreading cane fields. The General's h[illegible] of old trees [illegible] river. Leading [illegible] in the [illegible] ing live [illegible] puppies [illegible] and in [illegible] color of darker

The Major Cleared His Throat and Gently Laid His Hand on Drace's Shoulder.

blood. In clumps of feathery grasse insects sang, while from everywhere came the low and drowsy murmur of the cane.

Drace was enchanted with the scene the sweet air. Beside him Shottle long-legged his way, his neck stretched out.

"Yonder comes Uncle Howard, the General," he said.

Toward them, with a slow but firm and emphatic step, came a tall, spare erect old gentleman; and as he drew nearer, Drace saw that he wore a mustache and whiskers trimmed neatly down to a sharp point. The soldier within him predominated, the professional soldier, who is often gentler and more kindly than the volunteer. Shottle hailed him, and he quickened his pace.

"Well, well, Liberty Shottle! Welcome, sir, and your friend—"

"Uncle, this is Virgil Drace, my best friend."

The old man straightened, held out both his hands and made Liberty's friend welcome most hospitably.

Now they walked toward the house the General with his hand on Drace's arm. Over the yard fence poured a stream of hounds, and an old 'possum dog "barked up" Shottle as if he had treed. The double hallway doors stood open. The General conducted Drace into the library, a room that looked big enough for a tennis court. Then he hastily withdrew, and Shottle spoke:

"Gone to find Aunt Tycie. You'll like her. No hickory tree sap is any sweeter than her disposition. She was a Shottle, my father's young sister. She's young, as I told you. And she looks younger now than when she married. Did you ever notice that when a young woman marries an old fellow, she always tries to look younger? Here they are."

Presently the great plantation bell on a tower in the yard rang time for the evening meal. The General arose and bowing to his wife, gracefully offered her his arm. To Drace it was a pretty ceremonial, and he contrasted it with the more brusque customs of everyday life in the North.

When an opportunity offered, Drace inquired of the General, as casually as possible, if he knew anything of an old fellow named Stepho la Vitte, who was reputed to live somewhere in the vicinity.

The General seemed somewhat surprised at the inquiry. "Yes," he said, "I know something of him. And I believe there are rumors that he is sometimes seen across the River near here. During the war he was a guerrilla and cast much blame on the Confederacy. I met him once, after the war—near your father's house, my dear. My mules were tired, and I had halted in the shade to let them rest, when up came two men; one put his hand on the wheel of my buggy and said that my mules were his—that they had been stolen from him. I laughed, but meantime I had the muzzle of a pistol between his eyes. He didn't flinch or wink. He looked at me and said that he may have made a mistake. I told him I thought he had. Then, taking his hand off my wheel, he bowed himself back and said that he would see me again, to apologize. But I haven't seen him since."

In the evening how still and sweet was the air! From the quarters came the weird drone of the negro's chant, for the habit of the slave had not fallen with his chain. In the parlor Aunt Tycie sang, in this house a custom to be dreaded by the learned ear; but Drace's ear was not learned; Shottle's was as an oyster-shell clapped to his head; and in music the General could not distinguish intention from accomplishment. It was a song of love, "Hast Thou No Feeling to See Me Kneeling?" and when its last note had found a dark corner wherein to die Drace requested her to sing it again. She gave him a grateful look; the General smiled at him; and as the song began again to mourn its way, Shottle said to himself:

"If [illegible] will lend virtue to a [illegible] will cost you money, Virgil. [illegible] to rest after going through more than Stonewall Jackson could stand, and this is what I get? Oh, it's [illegible] and ought to be [illegible] and so is a casket lined with [illegible] but it doesn't suit me. Lord, [illegible] there is unsympathetic!"

If you have patience to wait, bedtime always comes; history is strewn with bedtime. It came slow-footed for Shottle, but quickly enough for Drace, with his nerves of steel wire. And how delighted he was with his room, a museum of antiquity, a great four-poster bedstead with a canopy heavy enough to have served as deadfall to some medieval giant. A chair that looked like the oaken throne of an ancient Briton, a wardrobe wherein Bluebeard might have hanged his wives, a rough-hewn mantelpiece remindful of a beetling cliff—these were featured in the light of a hanging lamp big enough to turn the ashes of a cremated dragon.

The night was warm, and through the windows the air came cool and lulling from the Gulf; but Drace lay until daybreak before he slept, and when he awoke the noontime bell was ringing. A negro knocked to tell him that dinner was ready. The General and Tycie were seated, but Shottle was not at the table with them; and following Drace's look of inquiry, came explanation from the General:

"I gave him the five hundred dollars that he was to put in with the five hundred furnished by you to be invested [illegible] in that cotton-bagging factory at Vicksburg, and he took an early boat for that city. I think it

Is a fortunate thing for the South that they discovered a wild plant, a sort of jute, really better for making ropes and bagging than either flax or hemp. I had seen nothing about the discovery, but I am not a very close reader of [illegible]. But Shottle assures me that the wild jute can be grown on the poorest land and that it needs no tending. I am naturally cautious, Virgil, and I did not myself invest, but heeding your judgment in the matter, I loaned Liberty five hundred. When do you expect active operations toward building the factory?"

Tycie forestalled Drace's answer:

"Oh, I am sure it will succeed, and it will be [illegible] especially for Liberty. He has [illegible] so hard, but somehow [illegible] haven't been properly [illegible]. And he is so capable!"

She was confident, and so hopeful for her [illegible] kinsman, that Drace played protecting villain to Shottle's purpose.

"Well, I don't know exactly when they are to begin work, but soon, I trust."

The fellow who [illegible] looking for [illegible] generally gets all [illegible] to.

Some, at least, a[illegible] that the public does [illegible] vote intelligently.

Gay old New York [illegible] to the long skirt. It [illegible] to the short ones.

You can get plenty [illegible] life if you are willing [illegible] you get as joyful.

A close fisted woman [illegible] quite liberal in giving [illegible] her mind.

Your best friends [illegible] the ones with whom you are intimate.

BIG PUBLIC SALE

I will hold a closing out sale on the old Gillett farm, which is located 5 miles east and 3-4 mile north of Klemme; and 8 miles south and 3-4 mile west of Ventura, the following property, to-wit: on—

Thursday, Dec. 14th

SALE WILL BEGIN PROMPTLY AT 1:00 P. M. FREE HOT LUNCH AT NOON

7 Head of Horses 7

RADIOLITE
In Your Battery
Means Dependability, Service, Satisfaction
Pour It in - Step On Her - She Goes

RADIOLITE always keeps your battery fully charged.
Preserves the life of your battery.
Removes and prevents sulphation.
Will not freeze in any temperature.
Will charge any make of battery.
Will not over-charge.
Prevents corrosion.
Prevents shedding of plates.
Prevents plates buckling, warping, cracking.
Prevents muddy and soft positives.
Preserves plates and insulators.
RADIOLITE gives you better lights.
Gives better ignition.
Gives better starting.
Gives you more power.
Never need to store your battery in winter.
RADIOLITE WILL DOUBLE the life of a New Battery.
RADIOLITE is a liquid, not a jelly.
After a battery is charged with RADIOLITE just add distilled water about every twenty days.
RADIOLITE will prolong the life of an old battery from six months to a year.
Anyone can charge a battery with Radiolite in 10 to 20 minutes.
To charge battery with RADIOLITE: First, dump battery; Second, pour in RADIOLITE, put battery back in car. (If necessary crank by hand.) Third, DON'T WORRY ANY MORE!
Owing to the peculiar chemical qualities of RADIOLITE, a Hydrometer is not an accurate test.
RADIOLITE was discovered in 1920 and is thoroughly proven electrolyte.
RADIOLITE will help any battery and injure NONE.
With RADIOLITE you should never have to remove your battery for re-charge on the line.
We will stand behind our product in every county where RADIOLITE is marketed.
RADIOLITE is not a cure for generator troubles, defective wiring or other ignitionand starter troubles outside the battery, and in order for RADIOLITE to function right these things must be corrected.

STILLE'S IMPLEMENT NEWS

VOLUME 1. Thursday, December 7, 1922 NUMBER 1

My neighbor says the other day hat ice-cold water doesn't pay; he says a heater in the tank is good as money in the bank. He likes to warm the water so the stock will all fill up and grow. They stand around and drink and drink, and then just chew their cud and think. They think that life is mighty nice, with water free from snow and ice. He always knows where they eat at, just eatin' hay and getting fat. He says that he has found the way to make his hogs and cattle pay. Just give them water nice and hot, and they would rather grow than not.

Now that may be all right for him but my stock's always lean and slim; ice-water fills them full of pep and makes them hop around and step. They warm themselves by exercise while I eat Jane Mirandy's pies and rest myself up mighty good, while neighbor's packin' coal and wood to ...'d that little fire of his, to warm the water up; gee whiz! When morning comes I chop the ice and let the stock drink once or twice, and then the critters have all day to warm themselves by eating hay, while I just sit around and rest. My way of farmin's sure the best!—Borrowed.

Well, we ound some mighty big ears of corn in the contest but of course the biggest ears didn't come in. But just the same some ears weighed a pound and a quarter. Will Hemple run off with the money. Bill says the way to raise those big ears is to plant it with a John Deere planter. and plow it with a John Deere corn cultivator; now we didn't give Bill the prize just because he said that. the fact is he didn't say it until he had gotten the prize. Well anyway we'll have to leave it to him he had some mighty big ears of corn. John Woods had the longest ear but it had been placed in the house near a stove for several weeks and was well dried out which cut its weight down some. Chas. Ax had about the nicest looking ear and it was a big one too.

Good feed grinders make good feed grinder business. Edwin Josten came in and loaded up a 10 in. grinder. He's going to hitch his tractor to it and grind for his stock.

Oscar Carlson got an 8 in. grinder he pulls it with a 9 h. p. gas engine, and it makes a mighty fine outfit.

Geo. Albers took one o the 10 in. mills, he pulls his with a tractor. Mr. Albers is feeding a lot of stock and wants to grind ear corn. Grinding ear corn is the McCormick-Deering "long suit." The above were all McCormick-Deering grinders.

J. H. Terhufen took out a new Nesco Spreader last week.

We have a half carload of inside elevators sold for May delivery; if you are interested better get protected on the price.

Imitation repairs give imitation results. If you don't beleive this, ask the man with a wooden leg. Buy the genuine I. H. C. and John Deere repairs from us.

You won't see 8 percent beer right away again; and there is considerable doubt about 6 percent beer.

Many machines on your farm will last the rest of your days if you will give them the proper care. Proper care, among other things, means careful inspection during the winter months of every machine in your shed. Look over every machine, replace weak, worn and broken parts with strong, new repairs. When you buy your repairs, buy them where you get the genuine I. H. C. repairs that will help your machines to give you life-long service.

Debate

riday afternoon Dec. 15, 1922, :45 o'clock, the Literary Associa- will hold their first program in form of a debate. The subject debate is "Resolved: That the unions should be abolished." wing is a list of the debaters: gative— Andrew Wellemeyer, ld Koerner, Bertha Johnson. firmative—Neota Ridder, Leona Harvey Barz.

e would like to see a great many rs at this debate Friday. Don't it.

della Schroeder has resigned her ion as editor-in-chief of the ol News. Andrew Wellemeyer been elected to fill the vacancy.

e American History Class at present time is studying the Civ- War. They fiund remembering very interesting.

della Bock is school pianoist this k.

onday morning the High School Garmmar rooms did not sing as Smith, our leader, was not in singing mood.

he Freshmen finished reading r clasic entitled, "Silas Marner," ch has proven very interesting. next classic they will read is ken's "Christmas Caral."

The American Literature Class take up 'Hamlet" as their next ic. They finished 'The Rise of Silas Laphan."

Grade Room Notes

There was considerable loud talking and angered faces among the 7th and 8th grades last week. We have learned the cause was the drawing of names for Xmas presents. We presume that all the young gentlemen were exchanging names so they wouldn't have to buy two presents.

The two lower rooms also drew names this week.

The eighth grade are dramatizing "Evangeline."

This week Friday the Grammar Room will write themes on "The Care of Good Teeth." The person submitting the best paper in the 7th grade will receive five packages of Colgates Tooth Paste. The person writing the best paper in the 8th Grade will also receive five packages of Colgates Tooth Paste.

IT WAS OUR "HOODOO DAY"

Times No. 13 Got Ye Editor's Royal Nanny Goat

As a rule we are not superstitious and black cats crossing our editorial path does not bother us; many a time have we broken a mirror but the promised seven years of bad luck did not follow in our trail; and we are not afraid to walk under a ladder, a thing many people will not do under any circumstances. Friday the 13th has usually been an ordinary day with us and never brought us any great amount of bad luck. But No. 13 alone seems to raise Cain in general with us and it certainly did last week when we made an attempt to publish Klemme Times No. 13. That got our goat and to put it mildly we had a hellofa time getting the sheet to press.

The nine devils of hoodoo started their work early in the week and everything connected with getting out old Number Thirteen seemed to go wrong. Just about the time we had Old Hoodoo by the Neck about Thirteen Farmers came in to pay us a subscription and consumed 13 minutes each of our valuable time but anyway those silver cart wheels they deposited in our till made us as happy as a thirteen year old kid hanging thirteen black cats in a grave-yard, so we forgive the farmers this time. Then when we at last had the paper "made-up" and ready for the press on Thursday p. m. the dog-goned Iowa Falls "juice" went off exactly 13 minutes after 4 bells, our very busiest time. It did not go on again for Thirteen hours and thirteen minutes, so we had to hang up Old Man Jinx until the confounded 'juice' took a notion to run our motor—which was not until at ten o'clck Friday morning. We had during that time learned the gentle art of swearing in thirteen languages and were just going to let out another string of it in Chinese when in walked "Sky Pilot" Metcalf and that made us feel like thirteen cents on Friday.

When we finally got the paper in the postoffice about Thirteen delinquent subscribers called up and all wanted to know why they didnt get their paper yet. We told them all to go to a warmer climate.

Never again will we try to print Number Thirteen—it's a hoodoo at this newspaper office and even the office devil threatens to quit if we ever try it again. Next year we will publish number 12 and then jump to No. 14 and thus beat Old Man Hoodoo out of a lot of sport—at our expense.

Ye verily, I say unto you printers who know not, "He that attempteth to print number thirteen shalt be calleth a damphool."

THORNTON GETS "JUICE" FROM IOWA FALLS

Was Connected Up To High Line Last Thursday

Thornton is now connected up to the Iowa Falls Electric Company's high tension line. Reports from our neighboring city are to the effect that they have been using the juice for power and lighting since last Thursday and everything seems to work like a top.

Our Christmas Tree

SHOULD HAVE BEEN GIVEN DUE CREDIT FOR WORK

Adolph Lauritzen Was Near Winner In Garner Declamatory Contest

Last week we made mention of the declamatory contest which was held at Garner and in which Klemme students, who are attending the Garner high school, made some excellent showing.

We have later learned that we should have given more of the details of the contest but the news was not available at the time of going to press.

As stated last week Evelyn Waller of Garner was given first place over all by the judges. She was a speaker in the dramatic class. Her score was 92. Adolp Lauritzen, a Klemme boy attending the Garner high school, was also an entrant in the contest and in the dramatic class. His score given by the judges was 91½ and so Miss Waller only defeated him by one-half point. Had their score been a tie Adolph would have been given the first position as he is an upper classman. And as he is in the dramatic class in which Miss Waller holds first, he will not be priviledged to enter the county contest. If Adolph had been in another division, either oratorical or humorous, he would have been entitled (with his points as second the highest) to enter the county contest.

Tough luck, "Abe" but it is no disgrace to be defeated on such a small margin.

CAMP FIRE GIRLS

The Guardian called a special meeting of the Camp Fire Girls on Tuesday evening of last week. The meeting was held at the home of Beatrice Busch.

The purpose of the meeting was to arrange for attending the special meeting at the church, on last Friday night. The girls were to appear in uniform. Directions were given for constructing head-bands, which proved to be very becoming. At the close of the meeting Mrs. Busch served light refreshments, which were enjoyed by all.

On Friday evening the girls met at the home of the Guardian. They marched from there to the church, where they listened to the helpful sermon by Rev. Metcalf.

It is better to do your duty than to explain why you didn't.

All the world loves a lover—until he begins to get silly.

WOULD FIGHT ON U. S. MONEY

Europe Will Spend Every Penny She Gets Getting Ready for More Fighting

Washington Correspondent)

WASHINGTON, Dec. 14.—The closest watch is kept upon the Near East situation by all officials. It is pointed out in connection with America's attitude toward the Near East, toward the cancellation of the European debts or the making of any new loans to European nations, that the more help this country gives Europe the longer will Europe engage in war.

Proof of this is offered in the recent Associated Press dispatches which contain the statement:

"Greece is already seeking loans whereby it will be able to equip its army and make up th munitions losses which it suffered during the retreat in Asia Minor."

Agitation has already been started for the United States to give Greece the remainder of the loan authorized during the war but which was never completely exhausted. It is being urged that Greece needs this money in order to recover from the effects of the war but such advices as the above more nearly approximate the truth.

With possibly the exception of Belgium and Italy, there is not a European country which is not expending vast sums of money in military and naval equipment and increasing their supplies of munitions and otherwise preparing for more war instead of peaceful reconstruction. It is felt that every dollar America gives to Europe now, either directly in the form of new loans or indirectly in the form of cancellation of old loans, will be immediately re-invested by European nations for the purpose of continuing their own destruction.

NEARLY EVERY FARMING COUNTY HAS FARM AGENT

WASHINGTON, Dec. 14.—Over 2,100 of the 2,850 agricultural counties in the United States employ at least one agricultural extension worker, who acts as a joint representative of the United States Deparment of Agriculture and the state agricultural college in conducting demonstrations of farm and home practices found most successful by experiments of these institutions. They also give advice and assistance in farming matters by personal visits, correspondence, telephone messages, and articles in the local press.

Family jars are hard to produce when only one makes the noise.

ROAD IMPROVEMENT NOT CAUSE OF TAX INCREASE

COAL PRICES HELD DOWN AND SUPPLY FURNISHED DURING LONG STRIKE; HOOVER

Action of Commerce Department Prevented Profiteering and Kept Industries Going

In the forthcoming annual report of Secretary Hoover of the Department of Commerce he discusses the very important part the Department (as representative of the administration) played during the recent coal strike—the longest in history. Secretary Hoover's commentis, in substance,as follows:

The departments of Commerce and Labor, anticipating the expiration of the biennial coal agreement in Mar. 1922, joined in an effort during the month of October, 1921, to determine if some arrangement coult not be arranged at by which, in case of failure of agreement between operators and miners, arbitration or some othr device of settlement couldt be secured which would insure the country against strike, with its great losses to commerce and labor. The representatives of the operators accepted such proposals; but the workers considered they would be sacrificing their opportunities if they acceded thereto.

As it was evident from the situation that a strike was inevitable, this department warned the public of the to make provisions in coal supplies against such an event, and undertook ageneral campaign to increase the stocks of coal as security of continued industry.

As a result of these activities the country entered the strike with far the larges stock of coal ever known, and the fact that we were able to maintain all commerce and industry throughout the longest strike in history was due to this effort.

The strike began April 1, 1922. By the middle of May spot coal was selling at about $3.60 a ton at the mine. Spob bituminous had risen to $12 per ton at the minein 1920, when production was atthe rate of 12,000,000 tons a week it was evident that some action must be taken if a worse situation were not to arise, with production limited to 4,200,000 tons a week from the non-union miners.

In the absence of any legislation or any constitutional basis for controlling profiteering, a conference of the producing operators was called at the Department of Commerce. As a result of these conferences it was agreed that coal prices should not be advanced beyond the Garfield prices plus a reasonable allowance in each district for the difference in wage scales and costs which had ensued since the war. These agreed maximum prices varied from $2.25 to $3.50 for spot run-of-mine coal at the mine. Approximately 85% of the producing districts voluntarily undertook this arrangement. In districts which had refused to enter the agreement prices rose to as high as $10 per ton at the mines.

At the end of July some districts withdrew from the agreement, although some 65% of the nonunion operators held to it until August 15 when the strike was settled and the agreement automatically expired.

Despite the districts which refused to co-operate and the occasional bootleggers in coal, the average price of spot coal for the entire period of the strike, as shown by the Coal Age, was $3.70, while the average price of contract coal was about $2.60. During the same period of 1920, even with three times the volume of production but without any attempt at restrain, the price of spot coal averaged $6.20.

GETTING READY TO HANDLE RUSH OF HOLIDAY MAIL

In order to speed up the handling of Christmas mails the Postoffice Department at Washington has purchased 200 automatic parcel post scales which figure zone rates. They will be sent to the larger offices of the country and will greatly expediate the handling of parcel post matter during the holiday rush. The department is also purchasing 100 stamp-cancelling machines with a minimum capacity of 300 letters a minute.

ROAD WORK NOT CAUSE OF TAXES

Need Is For More Highway Construction, Says White of Ames

AMES, Iowa, Dec. 14.—Charges that have been made to the effect that the increases in the state taxes can be atributed directly to the increase in road making are false according to Fred R. White, chief engineer of the state highway commission. The present need is not for a curtailment of the activities of the highway commission, but for a more comprehensive road building program for the state, he asserts.

"Highway taxes constitute only 15 per cent of all taxes and they are responsible for but one-eigth of the increase which has been made in the state levy since 1910," he states.

Like Growing Boy

Mr. White says that Iowa's road system may be compared to a growin boy.

"In 1910 there were 10,422 motor vehicles registered in the state, and this year that number has been made insignificant by a half million registration. Examine the appropriations and the financial support given the highway commission from 1910 to 1922 and it will be discovered that the figures have remained practically stationary. Our highway traffic in Iowa has increased eleven times as fast as the highway revenue."

Comprehensive tests which have been carried on by the engineering experiment station at Iowa State college in co-operation with the highway commission show that there is a decided increase of efficiency of concrete pavements over dirt and gravel highways. Compiled results show that the cost of transporting a ton mile on dirt roads is $1.71, on gravel roads $1.15, and on concrete pavement the cost is but 77 cents per ton mile.

Pays For Itself in Ten Years

"In general it can be stated that whenever traffic on a dirt road exceeds 110 tons a day the saving on the cost of fuel will pay the annual interest and retire the original cost of a gravel road in ten years," Mr. White says. "Or whenever traffic on a dirt road exceeds 610 tons a day, and traffic on a gravel road exceeds 1,450 tons a day the total cost of putting in paving will be made up in fifteen years," Mr. White says in summing up the needs of the state.

While no official report has been filed by the highway commission, the following are figures showing the work which has been done in the past year:

Dirt roads	807 miles
Graveling	265 miles
Paving	80 miles
Tiling	42 miles

Through the work of the highway commission the condition of the Iowa road system has been improved a high percentage in the past ten years. Mr. White says.

METHODIST EPISCOPAL CHURCH

Arthur B. Gedye, Pastor

Morning worship 10 a. m. by Rev. M. L. Metcalf.

Sunday school 11 a m

Evening worship 7:30 Rev. M. L. Metcalf.

Cottage prayer meetings in the homes each morning at 10:00 o'clock. Places of meeting announced each evening.

The Revival Services have been extended in a splendid way. Everybody co-oprating to make them a success and much good has been the result.

The Young People's evenings have been well attended, and much interest shown. An invitation is again tendered to the Faculty and the High School to attend the service on next Friday evening. Subject of the sermon "The Prodigal Son."

Sunday services will be the closing of this present campaign, but let Christ have the "Right of Way in our hearts" and "Believe onto Salvation."

—A. B. Gedye, Pastor.

Opportunity keeps moving along, but a hustler can always overtake it.

HAD HIGH SENSE OF HONOR

Punctilious to a Degree, to Satisfy His "Presbyterian Conscience."

Mark Twain, it is well known, labored in his older years to repay the debts incurred by his publisher; but probably a great many persons, basing their opinions on Twain's own jests, supposed him to be rather happy-go-lucky in smaller affairs. But he was not, shows Gamaliel Bradford in his sketch of Twain in "American Portraits."

The most obvious instance of his rectitude, says Mr. Bradford, are in regard to money. In spite of his dreams and speculative vagaries, he was punctiliously scrupulous in financial relations, his strictness culminating in the vast effort of patience and self-denial necessary to pay off the debt of honor which fell upon him in his later years. But the niceness of his conscience was not limited to broad obligations of this kind.

"Mine was a trained Presbyterian conscience," Twain says, "and knew but the one duty—to hunt and harry its slave upon all pretexts and all occasions. I don't wish even to seem to countenance anything which can invite suspicion," he said, as to a matter so trivial as taking advantage in a game.

GIVE BEAUTY TO LANDSCAPE

Wilding Apple Trees, at Certain Seasons, Clothed in a Veritable Glory of Blossoms.

Glossy-cheeked apples, red, green and yellow, are known to every child. All that apples grow on apple trees also is known. But just how much annual cultivation, pruning and grafting is required to produce the large, attractive apples one finds displayed in the fruit stalls many children do not realize.

On New England hillsides are to be found plenty of own cousins to the trees that now live in well-kept orchards and that bear beautiful big apples. In the most forlorn, neglected, out-of-the-way spots, nature has planted wilding apple trees that in spring and fall add much to the beauty of what would, otherwise, be a barren landscape.

In the spring, for an all-too-brief time, these apple trees are a veritable glory of blossoms. Then the petals fall, and for the summer months the nondescript, unsymmetrical trees add little to the beauty of the surroundings.

In October these wilding apple trees once more become decorative, the gorgeous flaming red of the scrubby little thorn apples giving a brilliant note of color till long after every leaf has fallen.—Christian Science Monitor.

ITALY BUYS U. S. WHEAT

WASHINGTON, Dec. 14.—According to the United States Department of Agriculture, Italy is the largest importer of American wheat with the exception of the United Kingdom. This is very interesting in view of thefact that Italy is now undergoing fiscal reconstruction under the new Mussolini ministery whereby it will beable to increase its purchases abroad. Within the past 30 days due to the new ministery, Italian exchange has increased the equivalent of 30 cents a bushel for wheat.

Dreaming of Writing.

To dream that you write with a pen denotes good luck; with a quill, loss of health; with a stick, firmness of purpose; with a pencil, warns you of secret enemies. To dream of writing a letter foretells good news; a bill, an accusation.

* * * * * *

THE WHITE MULE BRAYS

The following sprasm must have been the result of too freely imbibing of the hooch when it is green from the still. and is credited to exchange:

It was midnight on the ocean
Not a street car was in sight;
The sun was shining brightly,
And it raned all day and (night.
It was evening and the rising sun
Was setting in the west;
The fishes in the pine trees
Were cuddled in their nest.
'Twas a summer day in winter,
The snow was raining fast,
A barefoot girl with shoes on
Was sitting on the grass.
The rain was pouring upward
The woon was shining bright,
And everything that you could see
Was hidden out of sight,
While the organ peeled potatoes
Lard was rendered by the Choir;
While the sexton rang the dish rag.
Some one set the church on fire.
'Holly smoke!' the parson shouted.
And the poor guy lost his hair
Now his head is just like Heaven
For there is no parting there.

Tucson, Arizona,
December 4, 1922

Friend Jergie:

I will write you a few lines again. The weather down here and the roads are good. We spent the 4th at Besbea. Taht is some town, it is built in the mountains. There is plenty of work there if you want to dig. copper. The streetsare crooked and narrow and some of the people live up on the mountains and some under them, but it is a pretty plase at that. We also was at Douglas. Arizona and walked over to Columbus, Old Mexico. There we had to go through the custom house both ways going over to see if we were caring guns and coming back to see if we had anything stronger than water, of course we didn't.

Chas. said that he was in El Paso on the first day of March in 1922 and back the first of Dec. the same year. Arizona is the most beautiful state we have been in; quite a lot of irrigating done here and they have some dandy crops. They claim two bales of cotton to the acre, thatis 500 lbs to the bale and at 27 cents a pound that sounds good to me. We went through a cotton gin at Barstow, Texas. That was quite a sight to us being that we had never seen one before. Well Jergie I guess this is about all of the news for this time. You can send the paper to San Diego California for I guess that we are going straight through from here, so I will close for this time.

Respectfully,
Chas. Lewis and Bunch

Had Seen Lots of Them

"Grandfather," said little Johnny, "what is an angel?"

"An angel is a messenger," replied the grandfather, who was a professor in theology.

"Why," Johnny said, "I've seen lots of them riding around on bicycles downtown."

PRACTICAL XMAS GIFTS 1919

THIS CHRISTMAS WE SHOULD GIVE GIFTS THAT HAVE REAL VALUE, AND THAT WILL LAST A LIFE TIME. WE HAVE A FULL LINE OF MANY USEFUL ARTICLES THAT WILL MAKE IDEAL CHRISTMAS GIFTS FOR EVERY MEMBER OF THE FAMILY. COME IN AND SEE OUR BIG LINE OF CHRISTMAS GOODS.

LADIES' and GIRLS' OXFORDS
—Visit Our Shoe Department—

When looking for a suitable Gift for a Lady or Girl, for Christmas, you can give her no better present than a pair of Oxfords or a pair of Comfy Slippers.

We have received our winter line of Oxfords for ladies and you can find just what you want here. A pair of our oxfords and a pair of wool hose will solve the question.

Comfy Slippers make desirable Christmas Gifts for either ladies or men. We have a very nice offering this year in the latest Felt and leather; felt and soft chrome soles in a variety of styles. Make your selection early while the choice is best.

Give Shoes or Oxfords this year

CHRISTMAS CANDIES and NUTS
In Our Grocery

We have just received a large, fresh shipment of Holiday Candies and Nuts, in a big variety of assortments—every kind of the best, pure Candy for the Christmas Holiday period. We also have a nice line of Nuts of all kinds that are especially good this year. Look no farther for your Xmas candies and nuts—we have only the best.

And then we have seasonable fresh vegetables and fruits for the big dinners that will be much better when garnished with an assortment of fresh vegetables and fruit.

What is Christmas without Apples? We are fortunate to have on hand a fine stock of New York Eating Apples. Get a basket for Christmas. They are dandies.

HARDWARE SOLVES THE GIFT PROBLEM

We have a beautiful line of Gifts in this section of our store such as Silverware; Pyrex Ware in a large assortment; Casseroles are always good gifts; Roasters in a large variety of styles, a gift mother would like; and then we have Dishes, both plain and in fancy styles, a nice line of hand painted china that "she" would like. Glassware is always a welcome gift—we have the best. For the Children we have a large line of toys and all kinds of play things as wagons, sleds, kiddy-kars, skates, aluminum kitchen sets, etc.

SPCIAL—Until Xmas only! We have a large assortment of Heavy Aluminum Dish Pans at Special Prices. Get one of these bargains today!

WARM GLOVES and MITTENS
Make Appreciated Gifts

We have a nice line of Gloves and Mittens in a great number of styles, both for Men and Boys, Ladies and Children. There is no better Gift to give for Christmas.

CHRISTMAS TREES—WE HAVE A FINE LINE OF NATURAL CHRISTMAS TREES; ALSO A FULL LINE OF CHRISMAS TREE DECORATIONS. ORDER YOUR CHRISTMAS TREE NOW AS THEY WILL GO FAST. WE HAVE EVERYTHING YOU WILL NEED IN THIS LINE. DON'T WAIT—BUY NOW.

Useful Presents That Ple

Census Cuts Prison Score

Federal Institutions Have an Increase, but State, County and City Jails Show Decrease.

80 INMATES IN 1,390 CITIES

Figures Were Obtained as Preliminary to Complete Decennial Census of Prisoners to Be Taken in 1923.

Washington.—The Department of Commerce announces that, according to returns received by the bureau of the census, the number of prisoners confined in federal penitentiaries, state prisons, county jails, state and county chain or road gangs, city police stations, and other penal institutions on July 1, 1922, was 163,889.

Of this number 5,540 were reported for three federal penitentiaries, 78,673 for 104 state prisons, 44,283 for 2,451 county penal institutions (principally jails), 12,717 for 296 chain or road gangs in certain southern states, and 21,635 for 1,319 city institutions, while the remaining 1,041 were women committed by the courts to the care of other institutions (24 in number), mainly under the control of religious or charitable organizations.

Similar data were collected for July 1, 1917, but the total for that date does not include all prisoners in chain or road gangs, nor women committed by the courts to the care of institutions under the control of religious or charitable organizations. Excluding these from the figures for 1922, the comparable totals for the two years are: 1922, 151,172; 1917, 150,186. These figures include prisoners awaiting trial and a few persons held as witnesses, as well as prisoners serving sentence.

Report Part of Big Census.

The returns were obtained in response to a circular of inquiry which the bureau of the census mailed to the various institutions, as a preliminary to the complete decennial census of prisoners, which will be taken in 1923.

The number of prisoners in federal penitentiaries increased from 3,018 on July 1, 1917, to 5,540 on July 1, 1922. During the same period the number of inmates of state prisons increased from 71,442 to 78,673, and of county jails from 41,871 to 44,283, while persons confined in city penal institutions (including police stations) decreased in number from 23,855 to 21,635.

The data as to prisoners in federal and state penal institutions, presumably, are complete and accurate for both 1922 and 1917. The combined total of persons in such institutions increased from 74,460 in 1917 to 84,218 in 1922, the rate of increase being 13.1 per cent.

The rate of increase in federal prisoners was 83.6 per cent; in state prisoners, 10.1 per cent. The ratio of federal prisoners per 100,000 population increased from 3 in 1917 to 5.1 in 1922, and the corresponding ratio for state prisoners increased during the same period from 72.4 to 74.5.

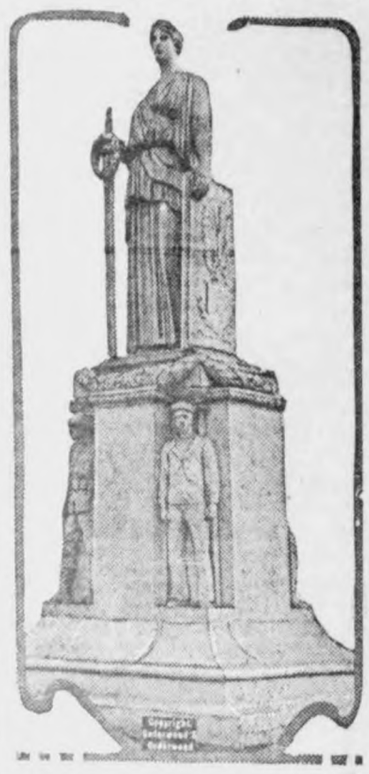
The returns for counties and cities are not comparable for the two years, for the reason that in each case a larger number of institutions is covered for 1922 than for 1917.

The only fair comparison between the county and city figures for the two years is that made with averages based on the total number of institutions for which reports were received (including those reporting no prisoners).

For county institutions the average number of prisoners decreased from 16.2 in 1917 to 14.7 in 1922, and for city institutions it fell from 10.1 in the earlier year to 8 in the later.

The number of empty county jails and other county institutions decreased from 623, or 24.2 per cent of the total for which reports were received, in 1917, to 570, or 18.9 per cent of the total, in 1922. On the other hand, the number of city institutions reporting no prisoners increased from 1,168, or 49.7 per cent of the total, in 1917 to 1,390, or 51.3 per cent of the total, in 1922.

UNVEILED AT DANVILLE



This handsome memorial to the soldiers of the World war was unveiled in Danville, Ill., on Armistice day. It is the work of Lorado Taft of Chicago. The entire memorial includes a concrete bridge across the Vermilion river and will cost $400,000.

Corn in Lead As Farm Crop

Only 10 Per Cent of the Entire Product Is Consumed by Human Beings.

IMPORTANT GIFT TO WORLD

Consumed Either Directly or in Form of Meat It Is the Principal Source of the Nation's Food Supply.

Washington.—Corn, the red man's gift to the white man, has come to be the nation's most important farm crop. Consumed either directly or in the form of meat and other animal products, it is the principal source of the nation's food supply.

The 1921 year book of the Department of Agriculture shows just to what extent the 300,000,000,000-bushel crop forms the basis of the live-stock industry. Forty per cent of the crop is fed to swine on farms, 30 per cent to horses and mules on farms and 15 per cent to cattle on farms. Only 10 per cent is used direct for human food.

Corn was one of the most important gifts America made to the rest of the world. The United States now produces about three-fourths of the world's corn crop. That corn also is an important crop in Argentina, Brazil, Mexico and some of the southern European countries, is shown in the report.

Disease Regulates Crop.

Weather, insects and plant diseases have a great deal to do with regulating the size of the crop in the United States. The estimated loss caused by common smut alone during the period 1917-1920 was placed at about eighty millions of bushels annually. Of insect pests the corn-ear worm, where abundant, causes a loss of at least 7 per cent of the grain on the ears attacked. The European corn borer also threatens to take a heavy toll.

It is stated the production of the corn crop is financed with less borrowed capital than is the case with other staple farm crops. The reason for this is that the farmer's income is distributed throughout the year more evenly than is the case in many other sections, and because the direct investment in the crop consists more of the farmer's own labor and less of purchased material and equipment than is the case in many other crops.

Get Book From Congressmen.

The year book, which is obtainable through congressional representatives from the department, contains much data of interest and value to producers, including chapters on production costs and figures, financing and advice on production according to seasonal supply and demand.

He Buries $1,350 in Jar; Worms Dine; Cash Gone

Toledo, O.—Two years ago, Pete Pullos, railroad section foreman, became worried over national financial conditions and withdrew his life's savings, $1,350, from a local bank and buried it in an earthen jar.

The other day Pullos decided the banks were all right again, and dug up the jar. In the bottom of the partly disintegrated receptacle was a mass of bill fragments, chewed by worms.

Pullos hurried to a downtown bank with the remnants of his small fortune, where expert money handlers tried to patch up the pieces, but to no avail.

Steamers Burned at Cincinnati

Great crowds witnessed the destruction by fire of the Ohio river steamers Island Queen, Chris Greene and Tacoma at Cincinnati recently.

CAVE MAN OF THE ORIGINAL TYPE

Wife Charges Him With Series of Forgotten Crimes.

Human Enigma in Jail in New Jersey Is Now Blamed for Shooting for Which Half-Brother Served Sentence.

Philadelphia.—Like a "hairy ape," both in appearance and in his rebellion against society, like a Robison Crusoe in his self-sufficiency, with something of a cave man's characterstics in his disregard of clothes and comforts, William Ware, dragged from his cave near Stratford, N. J., is an enigma in Camden county jail.

He is a veritable human riddle, the solution of which may mean the unraveling of a number of long-forgotten crime mysteries in New Jersey ranging from petty thievery to heinous outrages.

Most of the allegations of crime against Ware of the woods are made by his wife.

For some time the county authorities had been receiving complaints from farmers of a "wild man" who terrorized them and their women folk, although no specific acts were alleged against him.

When they saw Mrs. Ware she showed them a letter she had begun, setting forth the complaints against her husband. Among the things she alleges is that about eight years ago Ware shot a man, but eluded detectives. His half-brother, a man named Hinkle, was blamed and served a sentence for the shooting. She also avers her husband had some connection with a jewel robbery, 18 years ago, in which the jewels were afterward recovered from an underground cache. She is, however, weak on details. Her husband, she said, was the brother of John Ware, the first man hanged in Camden county's old jail.

William Ware is intelligent and talks well. He says he is no criminal and resents being taken to jail, although he did not offer physical resistance.

He wore only trousers and shoes when they found him in his cave. The hair on his chest is two inches long and few chimpanzees can boast more furry forearms. His torso and upper arms bulged with great muscles. He is one of the most skillful wielders of an ax among the woodsmen of south Jersey.

Washing Fluid Poor Seasoning.

Fall River, Mass.—Walentz Nowacki knew that something was wrong with him when "his stomach began to burn," according to the story he told the South end police.

He bought what he thought was a bottle of vinegar from a neighboring grocery store and later used some of the contents to season his supper. Investigation showed that the fluid he had swallowed was a washing fluid and a stomach pump was put into operation.

The American Legion

(Copy for This Department Supplied by the American Legion News Service.)

DR. BLOOD WON ARMY HONORS

National Vice Commander of Legion, Only New Hampshire Physician Who Was Decorated.

Advancing with the first wave of infantry and establishing his first-aid dressing station only a few steps from the fallen doughboys at Chateau-Thierry, Dr. Robert O. Blood of Concord, N. H., national vice commander of the American Legion, was awarded the D. S. C., Croix de Guerre and a divisional citation for bravery. Dr. Blood is the only New Hampshire doughboys at physician who was decorated. He rose from first lieutenant to major during his World war service.

Dr. R. O. Blood.

Placed on active service August 7, 1918, Dr. Blood sailed for France in September with the One Hundred Fourth Field hospital attached to the Twenty-sixth division. He was transferred to the One Hundred Third Machine Gun battalion and later to the One Hundred Third infantry, serving on the Chemin des Dames with the latter organization early in 1918. As battalion medical officer, Dr. Blood was with the One Hundred Third infantry when it drove the Germans from Belleau Woods to Trugny.

Later Dr. Blood was sent to Base Hospital No. 9 at Chatereaux, to the American Red Cross Military hospital at Paris, and then returned to the Twenty-sixth division near Verdun, acting as divisional orthopedic surgeon.

Dr. Blood organized the Concord Legion post and commanded it for two years and one-half, with such success that it became the largest post in New Hampshire. He has served on the state executive committee and has been department commander and national executive committeeman since January 1, 1922.

ELECT LEGION MAN GOVERNOR

James G. Scrugham, Leader in Fight for Adjusted Compensation, Victorious in Nevada.

James G. Scrugham, a leader in the American Legion's fight for adjusted compensation and a former national vice commander, has been elected governor of Nevada.

Jas. G. Scrugham

Born in Lexington, Ky., in 1880, Mr. Scrugham was graduated from Kentucky State university in 1900, and received a degree in mechanical engineering in 1906. He was a professor of mechanical engineering until 1914, when he was made dean of the Engineering college of the University of Nevada. He was named state engineer of Nevada in 1917.

Commisioned a major of artillery in December, 1917, Mr. Scrugham was assigned as production engineer in the ordnance department at Washington. He served on various special assignments connected with artillery production until after the signing of the armistice.

Mr. Scrugham is a member of Darrell Dunkle Post No. 1 of the Legion at Reno, Nev., and served as state commander from May until August, 1920. He was a member of the national executive committee and was chairman of a special committee that drew up the Legion's plan for adjusted compensation which was later embodied in the Fordney bill.

LEGION SHOWS RAISE FUNDS

Carnivals and Other Entertainments Produce Revenue to Aid Sick and Wounded Men.

From one end of the country to the other summer means the open season on field days, carnivals and tent shows. All of these attractions have their booths and probably the most universal of all the booths in all the shows have been those conducted by posts of the American Legion and the Legion Auxiliary. With 11,000 Legion posts, most of which have auxiliary units, in nearly every community in the country it couldn't well be otherwise.

A booth conducted by the Auxiliary to Brownshilde post of Buffalo, N. Y., at a recent community field day in that place, closed within a few hours after being opened—sold out to the last drop of pink lemonade and ounce of candy. The proceeds from the sale of the drinks and eatables went into the Auxiliary's fund for helping sick and wounded ex-service men, the place where most of the auxiliary funds go.

CHRISTMAS TREES READY for SHIPMENT

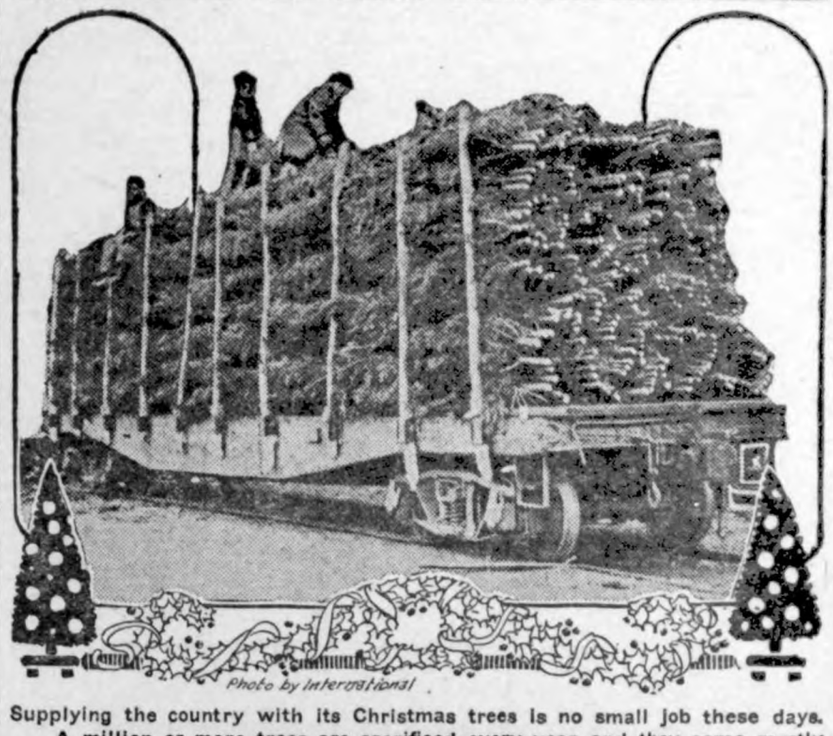


Photo by International

Supplying the country with its Christmas trees is no small job these days. A million or more trees are sacrificed every year and they come mostly from the woods of northern Vermont, and are of two species of pine, the Norway spruce and the balsam fir. People of the Middle West and southern states demand the Norway spruce, while eastern people want the balsam. Here are the trees ready for freight shipment, 2,500 of them to the car, tied up in bundles of three to five trees, according to size.

WILL the Christmas tree become a thing of the past? There are tendencies which would seem to indicate that a substitute may usurp the throne this green harbinger of merriment and good will has held in the hearts of the people for many decades. One of these influences is the danger of a conflagration in the home where Christmas trees are lighted with candles, although this danger is being partially overcome by the use of electricity for illuminating purposes. Another restrictive tendency is the cost of Christmas trees and the growing difficulty of obtaining them.

Moreover, a conviction is growing in the public mind that it is poor economy to cut Christmas trees from the tops of mature trees or take down a tree that has been growing for 15 to 30 years for a one day's celebration. The availability of artificial substitutes and the natural trend toward a change in the customs of the people also bear on the possibility of the disuse of the natural tree.

The Yule log succumbed to the greater attractiveness of the Christmas tree. And the Yule log had its predecessors in the various celebrations that occurred at the close of the old and the beginning of the new year during the first centuries of the Christian era.

The Christmas tree is believed to be a German institution, but the Romans celebrated the birth of Christ about the middle of the Fourth century by the display of tree decorations, and in some sections of Europe the festival was observed by the employment of pyramids decorated with green twigs and ornaments. Christmas trees should not be cut except from dense growths where thinning of young trees can be made with benefit to the forest. The New York State College of Forestry in the interest of conservation of the forests urges the adoption of artificial substitutes for trees in the observances of the Yule-tide festival.

THE INVISIBLE GIFT

THERE'S a gift on the Christmas tree that we cannot see, but we know it's there. There's something that gives value to all the rest and we feel it. With the rich there are fifty gifts to one baby; with the poor, fifty babies to one gift; with both there is this something that makes an equal happiness, something that gives riches nothing over and poverty nothing lacking, something that gives light without candles and warmth without fire. The tree itself springs from it, the Christmas festival sings of it. We are all excited by it and about it. It fills the shops with beautiful things, gathers crowds to buy them, hangs garlands in the windows, carols on the air. It makes the church bells ring and kindles devoutest worship. It is love that hangs upon the Christmas tree. Without the Cross the Christmas tree had never been.
—C. G. Hazard.

(©, 1922, Western Newspaper Union.)

Unknowing Christmas Cheer

By Mary Graham Bonner

(©, 1922, Western Newspaper Union.)

SHE was neither young nor old. But life had been pretty rough with her, taking many whom she so dearly loved, leaving more and more gaps which could not be filled.

Yet it was Christmas time and she must think of the Christmas presents she should give and the Christmas letters she must write. How could she put cheer into her letters when she did not feel it herself? Sternly she reproved herself for this. She must feel Christmassy. She simply must.

So, quite by herself, she went to a big toy shop. There she mingled with the crowds, heard the children's cries and shrieks of delight and surprise, saw their eager excitement. Her children were grown up, they had gone away, some would never come back. But it all brought the wonderful Christmas memories back to her. She felt again the glow and warmth of Christmas cheer. Tears came to her eyes, but there was happiness in their hot blur. It wasn't the same as one's own, to go and see happiness as though it were a play, but Christmas happiness was different. It touched those who even stood on the outskirts. Yes, all unknowing these many stranger children had given her the echo of their laughter and of their delight, and it was singing a little Christmas melody in her heart!

The Wishing Buttons

By CHRISTOPHER G. HAZARD

(©, 1922, Western Newspaper Union.)

TO US children there was a mysterious charm about old Mr. Uplook. He used to spend a good deal of his time in the back part of his shop, turning bits of mahogany into little boats and telling us stories while he chipped and polished. He had a small person in his throat whom he called Pedro, and he would make him grunt out answers to our questions in a wonderful manner. His vest buttons were connected with several insects, and when we touched them there would come out now a bee, then a mosquito, and once in a while a bug that would snap off our noses. The buzzing of the bee, the piping of the mosquito, and the dangerous assault of the snap bug gave us many a thrill and him much enjoyment.

One Christmas time, being rather short of rich relatives and very long on hope, we conceived the idea of drawing upon the fairy resources of our good friend, by suggesting a button that would connect with the good genius of the holidays and bless our wishes. So we asked Mr. Uplook if he thought the first two buttons on his coat could by any possibility have anything to do with the Christmas case. He said that he would have to go into his back room and see about it first, but when he came out we knew by his looks that it would be all right.

We wanted to press the buttons several times, but Mr. Uplook thought that once would be enough, and said that in each case we might whisper two desires, whispering loud enough for him to hear, so that he might be sure we were getting the thing straight. So we pressed and whispered in that perfect faith that Mr. Uplook always inspired in us.

We were not surprised on Christmas morning when things happened just as we had expected, and kind Mr. Uplook seemed just like a real Santa Claus as he stood by the roadside with his camera, taking a picture of one boy with red-topped, copper-toed boots, riding on a new sled; and of another who was trying a pair of shining skates on the wayside pond and trying to keep a fur cap in its place. And we boys were painting upon our hearts a picture of this good friend that has lasted until now.

How Did Auntie Know?

It was their second Christmas and the young wife was proudly displaying the big Christmas remembrance, an electric washer, from "friend husband" to the relatives gathered, when one auntie remarked: "Isn't that just typical of married life—the first Christmas a talking machine and the second Christmas a washing machine!"

HERE'S THE STORY SO FAR

SYNOPSIS

CHAPTER I—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They form a singular compact.

CHAPTER II.—Drace gets his mind off his mission by entering into deck sports in which he exhibits an unusual athletic prowess. Liberty Shottle is again unlucky at cards and attempts a financial negotiation with Drace. The latter, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination announced to his new chum, to hang La Vitte as high as Haman. Drace has become enamored of a mysterious beauty aboard the boat.

CHAPTER III.—The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. Shottle becomes possessed of two tickets for the French ball, a great society event, and proposes that Drace accompany him to the affair. The young men attend and Drace unexpectedly meets the girl who had fired his heart aboard the steamer. She is accompanied by one Prince, whose proprietary interest indicates that he is her fiance. Through stratagem Shottle learns that the name of the girl is Nadine la Vitte and that her companion of the evening is the man who is seeking to marry her.

CHAPTER IV.—Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. In one of their nocturnal pilgrimages they come upon a mob intent upon hanging a poor wretch from the limb of a tree. It is a typical carpetbag execution and aroused the resentment of an opposing mob of citizens. Drace takes a hand in the fight which starts and is instrumental in preventing the execution. From a window opposite the scene, he catches a glimpse of one he is sure is Nadine.

CHAPTER V.—The escapade, the fight, the interference with the execution get Drace and Shottle into bad standing with the authorities, but instead of punishment are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned. Through Colonel Josh, an emissary employed at the suggestion of Shottle, he gets a faint clue in the discovery that a certain Frenchman, a wine dealer, is reported to be an intimate of Stepho la Vitte. There is only a short time before the departure of the steamer when Drace and Shottle go to call on the Frenchman. The latter is too keen to be inveigled into giving up any information, but Shottle, spying around among the casks and bottles, especially the articles made up for shipment, makes an important discovery. So as not to arouse the suspicions of the Frenchman, he casually draws Drace away from the place and onto the steamer. On board he informs Drace that one of the cases was addressed to Stepho la Vitte at Farnum's Landing, Mississippi. It is the next stop below Bethpage's Landing and Colonel Bethpage is Liberty Shottle's uncle.

CHAPTER VI.—Drace and Shottle are received with genuine hospitality by Colonel Bethpage and find the plantation and its environs delightful. After a brief stay and a characteristic financial transaction with the colonel, Shottle goes away ostensibly on a business trip to Vicksburg, but in reality to seek his favorite form of amusement. Drace makes the plantation his headquarters and from pieces of information gathered from various sources, becomes convinced that La Vitte has a haunt in a great wood of cypress and a tangle of salt cedar, a sort of everglades, a marsh with hundreds of knoll islands rising here and there among the bayous. A shrewd old negro had told him that the outlaw lived in a house built of periwinkle shells. Day after day Drace takes a canoe and goes farther and farther into the moss-hanging wilds. At his feet lies a rope, one end of it a hangman's noose.

NOW GO ON WITH IT

She gave him a grateful look for his trust, now perfectly assured of Shottle's useful future. But the General did not appear to be easy in his mind, and a little later when he and Drace were walking about the yard, beneath the trees, he referred again to the investment. Drace would have shuffled away from it, but the old gentleman cornered him with a question:

"I want the truth. Did Liberty lie to me?"

"Yes, sir, he did."

"I began to think so the moment he left me. Well, it is a singular thing,

"I Want the Truth. Did Liberty Lie to Me?"

that when he is with me, I believe in him, but the moment he is gone my faith has gone with him. I have had much experience with men, Mr. Drace, in the army and elsewhere, but my wife's nephew is the most—I don't know how to define him. Let me thank you for protecting him in the presence of my wife, and I regret that I may have seemed in doubt. But Drace, that fellow makes me angry with myself. Confound him, he almost convinces me at times that I have no stability of character. And yet I am fond of him. I am always glad to see him come. And let me say that he illustrates one truth very clearly—that ability consists mostly in the fervor with which we go at a thing. I suppose he has cost you considerable."

"Oh, not very much. I am fond of him too, and I believe he is going to be of much help to me."

"Well, I've lost five hundred this morning, but I can stand it. I have ordered the mules hitched up, and am going to drive with you about the plantation. I am going to show you a government here in the delta."

During the drive the old gentleman was talkative, sometimes with the school man's hesitating precision, but more often as the free companion, agreeable rather than discursive. Drace evinced in everything a keen interest, but it was not real. His heart was not with him. It was in New Orleans, in a narrow street where boards were nailed across a door.

From what he had been able to gather from the General and by talking in seeming idleness to boatmen and to men along the River, Drace confirmed the information snatched by Shottle from the label on the Frenchman's wine case—namely, that old Stepho had a haunt somewhere in the neighborhood. A shrewd old negro had said that the outlaw lived in the swamp, in a house built of periwinkle shells. On the opposite shore, and several miles below the General's home, there lay a great wood of cypress and a thick tangle of salt cedar, a sort of everglade, a marsh with hundreds of knoll-islands here and there rising among the bayous. Here was indeed an outlaw's paradise, for Drace was told that not nearly all its lanes and crooked byways of brown water had been explored. Herein he began his search for old Stepho, day after day penetrating farther and farther into this moss-hanging wild. He did not confide in General Bethpage, for his mission was sacred unto himself alone, and by himself alone must it be accomplished.

At his feet in the canoe lay a rope, one end of it a hangman's noose, and he smiled at it, grim and firm of faith. Sometimes his canoe would stall in the carpet of scum. But he forced his way through into a narrow and unobstructed channel. Now he paddled swiftly. In front of him a great alligator arose and sank, the canoe grazing his scaly back. With a shriek great birds flew, flapping low, their long legs stretched out behind them. Drace was armed with a revolver, but did not wish to fire it, caution warning him. When he ceased for a time to paddle, how still everything was!

The adventurer liked to feel that no one had ever been there before. But now suddenly something caught his eye. In the green tangle on a low bank he saw a pole with wires strung to it, a sort of gate. The wires were covered with vines, trained about them. But for what purpose, here in this brushy tangle? He caught hold of a weed and pulled the canoe up closer, took hold of the pole and now he found a lower slat to which the wires were also attached. Farther along he discovered a sort of hinge attached to a snag almost hidden by briers.

"I'll open this gate and see what lies beyond," he mused, drawing the canoe back to the other end. He pulled at the pole, and it yielded. The gate opened, and through the weeds that appeared to have been bent by the passing of a boat, he saw a narrow channel.

It was easy enough to shove through the weeds and to enter the new canal. Soon it broadened, winding about among the enormous cypress trees. Now he came upon a widening that looked like a millpond, except that in the midst of it arose an island of tall cane. It was an attractive sight, and he ceased paddling to look. Slowly he drifted toward the island's shore. He took hold of a cane root and pulled the nose of the canoe hard into the bank. Then he got out, parting the stiff and stubborn cane in a shade as dense as night. But now through this parting hallway he could see sunlight beyond, and knew that he was about to come into an open space. And out into it he looked with a start; for there, a few feet from the edge of the fringe of cane, stood a small house made of minute shells cemented—periwinkles. Its roof was of thatch, the long rushes gathered from the swamp; and about the door was a cypress vine, its red blooms dazzling in the sun. And then a bended cane Drace held was crushed in his hand, for through the door and out beneath the vine came the barbaric rose-maid, Nadine la Vitte.

Periwinkle House

By Opie Read

Illustrated by R. H. Livingstone

Copyright, The Bell Syndicate, Inc.

Through the Door and Out Beneath the Vine Came the Barbaric Rose-Maid, Nadine La Vitte.

not run into the house; she stood dazed, her marvelous eyes in wide stare. Slowly he came forward, gazing, his hat in his hand. He dropped the hat, stooped, caught it up and now stood before her.

If she were agitated, he could not discover it. She stood where the red blooms brushed her brow. He held forth his hand, and slowly she shook her head.

"Monsieur, how foolish to come! If you do not go now, in a short time you will die. My father! He will shoot you. I should like it not to see you dead, you are so brave. My father, he will think you come for him."

"But I will tell him that I did not. I—"

He moved nearer, but with her hand raised, palm toward him, she motioned him away.

"You do not know what you talk. Nothing could you tell him, for the gun fire, and you will be no more. Please go away now."

"Oh, it is because you want to get rid of me."

"No, no, no. It is not that. I like you much. You are so brave — and handsome. It is because I fear for you. My father would be angry to have me talk with a northern man. Go now, and for my sake, come no more."

"Mr. Boyce," said Drace then, "is not a northern man?"

She shot a sudden startled look at him. "Mr. Boyce—but he is my father's friend. My father expects me to marry Mr. Boyce. And if my father should come back and find me here talking with you, he would—Please, Mr. Drace, go at once, before it is too late. See, the sun is almost set. The stars come soon, and then through the cane he come. Oh, won't you please be kind to me and go at once!"

"Kind to you? God bless you, I would die for you."

"Oh, you make love soon! But won't you please go now! Quick, I hear something."

"You hear my heart. Let me stay ten minutes, and then I go."

"Ah, but why would you give me ten minutes of fear?"

He saw that her anxiety was real, and his heart smote him for cruelty to this dazzling creature whose father he would hang with a rope brought from the North.

"Yes, I will go. I wanted to tell you something, but my regret at going is so deep that I forget what it was. But I must come again when the sun is not so low. No, tell me please, when that shall be?"

"Never would a man before talk like this to me . . . But if you must come when I beg you no, let it be next Thursday. My father then will be in the hills to buy cattle."

"This is Friday, and that will be a week, lacking one day. You have set doomsday for my return."

"If you come before, you will not find me. And now it is the good-by."

She drew back quickly through the door, and down into the fringe of tall cane he went, parting his way to the canoe that lay nosing the mossy bank.

Only now that she was gone and night had come did he remember—remember that this girl who had bewitched the swift minutes with him was the daughter of his sworn enemy Stepho la Vitte.

A voice called him as he was cursing himself for a traitor to his father's memory. On a point of land he saw three men standing. One of them beckoned him, and he turned in toward them. One of them spoke:

"Would you be kind to set us across? The night he comes, and we would not be lost in the swamp. We will get to the river. Would you, please?"

"Yes, but I don't know that my canoe will hold four. We may get a ducking."

He pulled alongside and steadied the canoe while they got in. Now he paddled carefully. The man who had talked, and whom the other two addressed as Tonez, requested to be set on a bushy shore where the water was so shallow that the canoe was almost stuck in the ooze. With his paddle Drace propped his craft steady, for them to get out. Tonez got out—and with the quickness of a cat snatched a rope from beneath his coat and threw a noose about Drace's arms. Then the two men in the boat threw themselves upon him. There was a hard struggle in the canoe and then out into the water, but they brought him ashore, wound about with the rope.

Now they made haste to tie him securely. The canoe was dragged ashore; Drace stretched out in it, and now they took it on their shoulders and hastened through the tangled underbrush. He had fought hard, but had not cried out. But as he was carried along, he swore bitterly at himself for not looking at first with suspicion on the brutes who now had him in their power.

"Ah, you would steal about and spy," said Tonez. "But you steal about no more. The carpetbaggers, they say, 'You brave?' and you say, 'Yes, I am brave.' Then they say, 'You find old Stepho.' And you go to find him. He is not at home. But his men, they come just in time."

"You are liars. I was—"

"Ah, you come with the joke. Tomorrow, we will laugh. Will you? No, you will not laugh."

. . . . . .

Drace lay quietly tugging at the ropes that bound him. If he could spring out free, what a scattering he would make of them! They stopped, entering some sort of doorway, and rested the canoe on the ground. Tonez lighted a candle, and Drace saw that he was in an old cabin, almost ready to fall. They rolled him out on the floor, face down, and beneath his arms they passed the paddle of the canoe, so that he could not turn over. Then the others went out, leaving Tonez holding the candle.

"Does the kind gentleman know why they gone? They go to get the dry rushes and the dead bark. For why? To make the fire. It is not cold, no? But they will make the fire of the cabin, and when the morning come, there will be the ashes of the kind gentleman; and the people they will say: 'Ah, he lie down to sleep, and burn up.'"

Drace heard them piling their murderous fuel into a corner. Again he appealed to them, tried threats, told them that his friends would hang them; but they laughed, Tonez bending over him with the candle.

"In a few minutes I light the blaze and take the candle away . . . You talk of Stepho's daughter. Remember she may love me some, too."

"You Spanish devil!"

"The kind gentleman he come close. I'm Portuguese. But no matter. When Stepho come, we tell him what we do, and he pat us on the back and give us money. But the light would hurt the kind gentleman's eyes when he lie that way on his jaw. I will not stoop so low with the candle . . . Oh, what a fine pile they get! It will make the blaze beautiful. All ready, yes? I will touch it off."

Drace could not see him, but he heard the first crackle of the dried rushes, saw the flame dim the candle light. Now he cried aloud, the men laughing, the mounting flame crackling louder. Tonez came back to him.

"We leave you now. You will not need this candle to light you to bed; so I blow it out, see? And I take it with me."

They hastened out, and he heard them laughing as they ran through the underbrush. With all his harnessed might he strove to break the paddle so that he might roll toward the door, but it was strong, and he broke only the tip of the blade. A louder crackling told him that the dry boards above were catching. Soon the roof would fall in; great sparks would fly upward, fall and hiss in the water.

Why should he lie there, seeing all this in his mind, he wondered. He had read that men approaching death sometimes speak foolish words, and here he lay, with his mind on trivial things. Soon he would writhe in a furnace. How all about him glared! He wondered how long it would be before a tongue of flame should lick him with its agony . . .

And then something touched his hand, something cold and swift. A knife cut the ropes that bound him; and in his great and sudden joy Drace almost lost his reason. But he did not cry out; no word was spoken. Just one look, and then he screened her from the flames as they fled through the door, out through the light, into the shadow of the trees. And then he spoke: "God bless you, Nadine!"

He had held her hand, leading her as they ran, but now in the shadow safe from danger, she withdrew it from him, and when he reached again to take it, she shook her head.

"No, it must not be. I told you to go quick, but you did not go quick enough. Then Tones he see your boat.

MANY PROBLEMS ARE NAMED BY THE PRESIDENT

Outstanding Among Them Prohibition, Farm Credits and Transportation Troubles.

WOULD ENFORCE DRY LAW

Agricultural Relief Given Foremost Place, While Abolition or Revision of U. S. Railroad Labor Board Is Urged—Would Raise Immigration Limit.

Washington, Dec. 8. — President Harding appeared before congress with his annual message on the state of the Union. The following is a partial text of what he said:

"There never again will be precisely the old order; indeed, I know of no one who thinks it to be desirable. For out of the old order came the war itself, and the new order, established and made secure, never will permit its recurrence.

"It is no figure of speech to say we have come to the test of our civilization. The world has been passing—is today passing—through a great crisis. The conduct of war itself is not more difficult than the solution of the problems which necessarily follow.

Considers Home Problems.

"I am not speaking at this moment of the problem in its wider aspects of world rehabilitation or of international relationships. The reference is to our own social, financial and economic problems at home. These things are not to be considered solely as problems apart from all international relationship, but every nation must be able to carry on for itself, else its international relationship will have scant importance.

"Doubtless our own people have emerged from the World war tumult less impaired than most belligerent powers; probably we have made larger progress toward reconstruction. . . . Had we escaped the coal and railway strikes, which had no excuse for their beginning, and less justification for their delayed settlement, we should have done infinitely better. But labor was insistent on holding to the war heights, and heedless forces of reaction sought the prewar levels, and both were wrong.

"The railway strike accentuated the difficulty of the American farmer. The first distress of readjustment came to the farmer, and it will not be a readjustment fit to abide until he is relieved. The distress brought to the farmer does not affect him alone. Agricultural ill fortune is a national ill fortune. . . .

Saved From Disaster.

This congress already has taken cognizance of the misfortune which precipitate deflation brought to American agriculture. Your measures of relief and the reduction of the federal reserve discount rate undoubtedly saved the country from widespread disaster. The very proof of helpfulness already given is the strongest argument for the permanent establishment of widened credits, heretofore temporarily extended through the war finance corporation.

"The farm loan bureau, which already has proved its usefulness through the federal land banks, may well have its powers enlarged to provide ample farm production credits as well as enlarged land credits.

"In the last half of the year now closing the railways, broken in carrying capacity because of motive power and rolling stock out of order, though insistently declaring to the contrary, embargoed the farmer's shipments, or denied him cars when fortunate markets were calling.

Rail Problem Vital.

"I know of no problem exceeding in importance this one of transportation. . . . We have built 40 per cent of the world's railroad mileage, and yet find it inadequate to our present requirements. When we contemplate the inadequacy of today, it is easy to believe that the next few decades will witness the paralysis of our transportation-using social scheme or a complete reorganization on some new basis.

"Manifestly, we have need to begin on plans to co-ordinate all transportation facilities. We should more effectively connect up our rail lines with our carriers by sea. We ought to reap some benefit from the hundreds of millions expended on inland waterways, providing our capacity to utilize as well as expend. We ought to turn the motortruck into a railway feeder and distributor instead of a destroying competitor.

"This transportation problem cannot be waved aside. The demand for lowered costs on farm products and basic materials cannot be ignored. Rates horizontally increased to meet increased wage outlays during the war inflation are not easily reduced. When some very moderate wage reductions were effected last summer there was a 5 per cent horizontal reduction in rates. I sought at that time, in a very informal way, to have the railway managers to go before the interstate commerce commission and agree to a heavier reduction on farm products and coal and other basic commodities and leave unchanged the freight tariffs which a very large portion of the traffic was able to bear. Neither the managers nor the commission saw fit to adopt the suggestion. Railways are not expected to render the most essential service in our social organization without a fair return on capital invested, but the government has gone so far in the regulation of rates and rules of operation that it has the responsibility of pointing the way to the reduced freight costs so essential to your national welfare. Government operation does not afford the cure.

"The labor board itself is not so constituted as best to serve the public interest. With six partisan members on a board of nine, three partisans nominated by the employees and three by the railway managers, it is inevitable that the partisan viewpoint is maintained throughout hearings and in decisions handed down. . . . I am well convinced that the functions of this tribunal could be much better carried on here in Washington.

Offers New Plan.

"The substitution of a labor division in the interstate commerce commission made up from its membership to hear and decide disputes relating to wages and working conditions which have failed of adjustment by proper committees created by the railways and their employees, offers a more effective plan. . . . .

"This suggested substitution will involve a necessary increase in the membership of the commission, probably four, to constitute the labor division. If the suggestion appeals to the congress, it will be well to specify that the labor division shall be constituted of representatives of the four rate-making territories, thereby assuring a tribunal conversant with the conditions which obtain in the different rate-making sections of the country.

Most Demoralizing Factor.

"Constitutional prohibition has been adopted by the nation. It is the supreme law of the land. In plain speaking, there are conditions relating to its enforcement which savor of nation-wide scandal. It is the most demoralizing factor in our public life.

"Most of our people assumed that the adoption of the eighteenth amendment meant the elimination of the question from our politics. On the contrary, it has been so intensified as an issue that many voters are disposed to make all political decisions with reference to this single question. It is distracting the public mind and prejudicing the judgment of the electorate.

"The day is unlikely to come when the eighteenth amendment will be repealed. The fact may as well be recognized and our course adapted accordingly. If the statutory provisions for its enforcement are contrary to deliberate public opinion, which, I do not believe, the rigorous and literal enforcement will concentrate public attention on any requise modification.

"Such a course conforms with the law and saves the humiliation of the government and the humiliation of our the destructive forces engaged in widespread violation, official corruption, and individual demoralization.

Plans Governors' Meet.

"The eighteenth amendment involves the concurrent authority of state and federal governments for the enforcement of the policy it defines. A certain lack of definiteness, through division of responsibility is thus introduced. In order to bring about a full understanding of duties and responsibilities, as thus distributed, I purpose to invite the governors of the states and territories, at an early opportunity, to a conference with the federal executive authority. Out of the full and free considerations which will thus be possible, it is confidently believed will emerge a more adequate comprehension of the whole problem, and definite policies of national and state co-operation in administering the laws.

"There are pending bills for the registration of the alien who has come to our shores. I wish the passage of such an act might be expedited. . . . Before enlarging the immigration quota, we had better provide registration for aliens, now here or continually pressing for admission, and establish our examination boards abroad, to make sure of desirables only.

Wants to Be Prepared.

"The proposed survey of a plan to draft all the resources of the republic, human and material, for national defense may well have your approval. I commended such a program in case of future war, in the inaugural address of March 4, 1921, and every experition of war claims and the settlement of war obligations persuades me we ought to be prepared for such universal call to armed defense."

MAKES DEFENSE OF SENATE

Pennsylvania Statesman Urges That Citizens Study Workings of the Upper House.

New York.—The United States senate was defended against some of the criticism directed at it and held up as a proper subject of study by patriotic Americans in an address delivered by Senator Pepper of Pennsylvania before the Association of Life Insurance Presidents.

"Learn more than you know know of the senate's functions," he advised. "It is not enough to choose good senators from your own state. You must be interested in all senatorial campaigns—because to be effective your senators must have like-minded colleagues."

This done by wealthy American fathers, the senator said, would remove the present danger that "the sons of privilege in America will degenerate into little snobs who think themselves too good for politics."

DUBLIN SHOCKED BY EXECUTIONS

Bitter Clash in Dail Over the Infliction of Death Penalties.

NEAR UPRISING IN PRISONS

First Attempt by Opposition to Censure New Government Is Defeated Following Statement by Minister of Education.

Dublin, Dec. 7.—Horrified by the assassination of Sean Hales and the shooting of Patrick O'Malloy, Dublin is appalled by the execution of Rory O'Connor, Liam Mellowes and two comrades. Everywhere people are asking when and how it is all going to end.

A special meeting of the cabinet was called to discuss the assassination of Hales. None of the cabinet members except Minister of Home Affairs O'Higgins appeared in the Dail, so the body adjourned at once.

Meanwhile President Cosgrave and the cabinet took their decision regarding drastic action against the Republicans.

Rory O'Connor and his comrades were tried by a courtmartial and learned their fate an hour later.

Liam Mellowes wrote all night, working on a document which will soon be published. O'Connor and the others—MacKelvey and Barrett—wrote letters to their relatives.

The four Republicans were executed at 9:20 in the morning and all faced the firing squad calmly.

O'Connor and Mellowes were leaders of the Republican forces that seized the Four Courts building in Dublin last June and were captured after a three-day siege. O'Connor shipped munitions from America, traveling as a stoker week after week. When Ireland was fighting England, Mellowes organized the boys' division of the Sinn Fein.

In many of the Free State prison camps when the news of the assassination of Hales became known it was all the officers and priests could do to prevent the soldiers from running amuck and attacking their prisoners.

The new government carried the vote on the first attempt by the opposition at a vote of censure.

The heated wordy battle was brought to a close by Professor John MacNeill, minister of education, whose son was killed fighting with the irregulars ,after Tom Johnson and Laborite Shannon had bitterly denounced the executions.

"My son followed De Valera," said the professor. "He was brought to his death by vain promises made by vain men."

ASKS FREEDOM OF STRAITS

America Demands Right to Send Armed Vessels Anywhere at Any Time.

Lausanne, Dec. 7.—Ambassador Richard Washburn Child, America's observing delegate at the Near East conference, before the assembled delegates declared on behalf of America that America demanded the right to send warships anywhere it so desired, and further demanded the complete freedom of the Dardanelles both for merchant ships and war vessels.

The ambassador served notice that American warships should be in a position to go anywhere American citizens might be.

MORE AIRCRAFT IS URGED

General Pershing Would Have America Prepared to Take Immediate Defensive.

Washington, Dec. 9.—Expansion of the army air service to the point where America would be prepared to "take the immediate defensive," and ultimately the offensive, is urged by General Pershing in his annual report as chief of staff of the army.

The air service, which General Pershing described as vital to the army, at present is inadequate and lacking in facilities, he declared.

U. S. MARINES AT TSINGTAO

American Destroyer Asheville Arrives at Chinese Port to Protect Yankee Interests.

Peking, Dec. 9.—The American destroyer Asheville has arrived at Tsingtao and it is understood here that the vessels will not not hesitate to land marrines if the bandits infesting the district endanger the lives of foreigners after the Japanese evacuation.

Wood Quite "U" Job.

Washington, Dec. 9.—Maj. Gen. Wood has resigned as provost of University of Pennsylvania in order that he might "comply with the expressed wishes of the administration and remain in the Philippines.

House Asks Ship Scrapping Data.

Washington, Dec. 9.—The house adopted a resolution asking Secretary Denby what progress had been made by the United States, Great Britain and Japan in scrapping naval equipment under the arms treaty.

MRS. JOHN I. NOLAN

Mrs. John I. Nolan, widow of the late Labor-Progressive congressman from California, will seek the seat made vacant by his death.

ASKS TAX REDUCTION

Secretary Mellon Urges Cut in Income Surtax.

Hard to Stop Gaps Through Which Avoidance of Payments Are Made.

Washington, Dec. 7.—Secretary of Treasury Mellon, in his annual report to congress, urged a reduction of the maximum income surtax rate from the present 50 per cent to not more than 25 per cent, and the closing up so far as possible of existing avenues of escape from federal taxes.

Some of the outstanding points in Secretary Mellon's report follow:

1. He urges a 50 per cent cut in present surtax levies on big incomes.

2. He says the country is suffering from a scarcity of labor.

3. The railroads are suffering from undermaintenance and inadequate equipment.

4. Farm products are selling too low at the farm and too high at distributing centers.

5. The increased gold supply has tended to increase speculation and unnatural expansion of business.

6. Unsettled European conditions endanger our foreign markets.

7. Further issuance of tax-exempt securities should be prohibited by constitutional amendment.

8. The value of Liberty bonds has increased $2,500,000,000 since the low levels of 1920.

SIX ARMY AIRMEN PERISH

Martin Bomber and Fokker Scout Meet In Midair Near Newport News.

Norfolk, Va., Dec. 7.—Two army officers and four enlisted men perished in the explosion and gasoline fire that followed a midair collision between a Fokker airplane and a Martin bomber near Langley field.

The bodies of five of the victims were taken from the steel skeleton of the two machines, while the sixth jumped from one of the planes as the collision occurred, meeting instant death. The casualty roll is: Maj. Guy Gearhart, Capt. Benton A. Doyle, Staff Sergeant Marsick, Private F. J. Blumka, Private Thomas Jordan, Private Leon Rolas.

MAY CLOSE HOUSE GALLERIES

Extra Police Guards for Commons in London After Row With the Communists.

London, Dec. 8.—Threat to close the public lobbies of the house of commons, as the dail eireann closed its lobbies in Dublin when the irregulars threatened to create disturbances, was made by the government owing to disturbances raised by communists. Extra police guards manned all entrances and the public lobbies because of trouble following the communists' refusal to doff their hats during the passage of the speaker's procession and insistence on singing the "Red Flag."

U. S. RAIL BILL $100,000,000

Interstate Commerce Commission Report Shows Sum Due as Federal Control Sequel.

Washington, Dec. 8.—Approximately $100,000,000 still is payable to the railroads as a sequel to federal control. The interstate commerce commission's annual report discloses that $85,926,954.19 remains due to the carriers for the six months' guaranty after termination of federal control, and that $9,906,650 yet must be paid out as reimbursement of deficits incurred during federal control.

War Service Honored.

Washington, Dec. 9.—Lieut. Col. Dean D. Lewis of Chicago, who served in the medical corps, has been awarded the distinguished service medal "for exceptionally meritorious and distinguished services."

Kills Golden Eagle.

Pana, Ill., Dec. 9.—A golden eagle, measuring six feet six inches from tip to tip of wings, was killed by David Colonius on his farm northwest of Pana, when the bird flew down into a flock of chickens.

BIG INDUSTRIAL ACTIVITY SHOWN

Sale of Basic Commodities on Increase, Says Commerce Department.

RETAIL BUSINESS IS BETTER

Figures for the Month of October Point to Great Improvement—Export Trade Largest Since March, 1921.

Washington, Dec. 8.—Further figures received by the Department of Commerce, in connection with its monthly survey of current business, show even greater industrial activity in October than previously reported, it was announced here. The output of almost all basic commodities showed large increases, sometimes even in the face of an expected seasonal decline.

The following list, among others, showed the largest output for October for any month since 1920: Pig iron, steel ingots, coke, copper, zinc, cement, brick, maple flooring, North Carolina pine, petroleum, knit underwear, and the consumption of cotton, silk and news print paper. Increases are shown in the activity of all distributive movements.

Sales by department stores, chain stores and mail order houses show large increases, and far ahead of the same month last year. The same is true of wholesale trade. The larger volume of bank clearings and the greater demands for money clearly indicate the country's expanding business. Export trade, at $372,000,000 for October, is the largest for any month since March, 1921.

PENSION OUTLAY $225,501,662

Approximately $5,000,000 Less Paid Out Than During Previous Twelve Months.

Washington, Dec. 8.—Cost of the American pension system during the year ended last June 30 was $225,201,662, according to the annual report of the commissioner of pensions, sent to President Harding. Maintenance of the system cost $1,394,709, according to the report. The amount paid was $4,908,259 less than during the previous fiscal year.

NAVY UNDER ONE COMMAND

Department Announces General Order Approved by the President, for New Organization.

Washington, Dec. 8.—The Navy department announced a general order putting into effect a plan for organization of the navy under one commander in chief.

The fleet is organized under the title "The United States Fleet" and is divided into four sections, the battle fleet, the scouting fleet, the control force and the fleet, base force.

U. S. WIFE PETTY TYRANT?

British Author Says the American Husband Is Reduced to Bondage to His Mate.

New York, Dec. 7.—Lady Susan Townley, in her recently published book, "Indiscretions," calls the American male "the superior of his mate," but adds:

"In New York he allows himself to be reduced to bondage by a petty tyrant—his wife. I have heard him alluded to as 'the purse.' He apparently counts for nothing in the house."

BLUE SKY LAW IS URGED

Need of Protecting Public When Government Securities Mature Stressed in Senate.

Washington, Dec. 8.—Speedy passage of the so-called blue-sky bill, designed to regulate interstate sale of securities, was urged before the senate interstate commerce committee, by Director G. A. Canright of the Wisconsin Securities board, to protect the holders of war certificates and Liberty bonds.

U. S. MARINES AT TSINGTAO

American Destroyer Asheville Arrives at Chinese Port to Protect Yankee Interests.

Peking, Dec. 9.—The American destroyer Asheville has arrived at Tsingtao and it is understood here that the vessels will not hesitate to land marines if the bandits infesting the district endanger the lives of foreigners after the Japanese evacuation.

Mob Burns a Negro.

Perry, Fla., Dec. 8. — Charlie Wright, colored, accused of the murder of Miss Ruby Hendry, was taken from the sheriff and burned at the stake at the scene of the crime by several thousand men.

Big Fire at Astoria, Ore.

Astoria, Ore., Dec. 9.—The business district of Astoria was laid in ruins by a fire which, despite efforts of the local fire department and re-enforcements from Portland, caused a loss estimated at $15,000,000.

and with the others, he wait to. I run around and I watch him, with the knife to stab him if he hurt my brave friend. Then in dim light I see them carry the boat, and I think they have killed you; and I steal along to stab, but then I know you are in the boat. All I do then was to watch till they go, and then I go in. It was not hard to do. No."

"You are an angel."

She laughed, shaking her head.

"Angels do not go into the fire. They do not belong there . . . Now, I tell you. I show you the crooked way, through the woods and out to the river. The moon has come, and we can see. If you know the way, you are safe; but if you do not, you mire down and die in the ooze, and not in the flame. You would please follow me now."

He followed her, hoping that she might be slow, to prolong the joy of his being with her, but she was agile, walking swiftly. Sometimes she would turn slightly about to warn him of a dangerous place, and once she smiled, the moon full in her face. "Tell me," he inquired then: "What has passed tonight, I hope, does not change what was set for Thursday."

The land was beginning to rise, and she was walking faster.

"Thursday you may come."

She halted in an open space and pointed toward the river.

"The bird, I hear him sing now. The magnolia trees are over there. And now it was again good-night."

She gave him no chance to detain her, for in an instant she was running; and he stood looking till in the deep shade her form was lost.

. . .

Old Stepho had not come home when the Creole girl reached the house in the swamp. She sat down to think and to listen to his footstep. He did not come; and undressing, she lay down, mused a long time and slept . . . A knocking on the door and Stepho's voice called her:

"The sun he was high, but the leetle gel she sleep."

Soon she came out, and he drew her to him and pressed his sandpaper cheek against the coil of her hair.

They sat where the house threw its cool shade. Slowly he rocked in his big chair, looking up at the cane that hid his home.

"This air, he good. He comes through salt marsh from the Gulf, with not the malaria. You bloom always like the flower."

"But, Father, why do we ever here? It must not be that we are here to live all the time?"

"Ha! The little bird wish to leave the nest, to try her wings? That is the way of birds and women. Soon, I suppose, you will wish to marry some fine man and leave your old father."

"No—it is not that. I love you . . . But it is lonely here, and—"

"Mr. Boyce, he is a fine young man. If you marry him, you would not so much leave me. I see him often. He buy from me the mules and cattle which I bring down from the hills. Why you no wish to marry him?"

"But I do not love him."

"You would soon learn; he is a fine young man. I owe him much; and he know much about my business that he would keep quiet about if—if he was of the family. And he would take you often to the city and give you rich dresses and diamonds."

"My dresses they are fine enough. I have the diamonds, too. But you must know that I get lonesome here. I cannot play with the book all the time . . . You are going again to buy cattle in the hills, are you not?"

"I will buy them, yes."

"And you must on Thursday go to the hills?"

"Yes, on the Thursday, I will go."

He fell asleep, for he was tired; and when the sun came about, she drew his chair into the shade. He opened his eyes, patted her hand and slept again. She heard a slight sound, and looking, saw Tonez coming through the cane. Swiftly she advanced toward him, with hand upraised, cautioning him.

"You must make no noise. He is asleep."

"But I have come to tell him that the carpetbagger spy he gone to come back not again."

"Go away, and you can come back and tell him."

"No, I stay and talk to you."

Stepho's voice called out. "Tonez, come. I am here."

She did not wish to hear them talk. She looked at the Portuguese and mused as she walked away: "You do not know, you scorpion, how close you come to the stab. Your time will come, and I watch you."

CHAPTER VIII

It was a long time before Drace found a boat to set him over to the opposite shore. It was so late when he reached the Bethpage place that he did not go up to his room. The house was so quiet, the hounds themselves asleep, that he stole into the garden to pass the remainder of the night on a couch in the summer house. The air was heavy with roses breathing in through the lattice, and as he straightened out, grateful for repose, this thought came to him:

"Pale they call death, but to me it will ever be red. And I have looked into its red countenance, and was not afraid. I thank God that He gave me that strength. . . . But what a melodrama!"

"We Leave You Now. You Will Not Need This Candle to Light You to Bed."

At the breakfast table, Tycle, with mother tenderness, upbraided Drace for sleeping out for fear of arousing the house. Afterward Drace and the General strolled out under the trees.

"By the way," the General said presently. "I have an engagement to deliver an address before a teachers' meeting in Natchez, and I should much like to have you bear me company. We can leave this evening on the Black Hawk and reach there early in the morning."

"I'd like very much to go," answered Drace. "But can we get back before Thursday?"

"Easily by Wednesday morning. Anything important for Thursday?"

"Oh, no. An old fellow down at the ferry wants me to go fishing with him Thursday, and I gave him my word that I'd be on hand. Most remarkable old man, full of fun; quite a character."

"You must mean old Spence. But are you sure it is not that pretty daughter of his that attracts you? You'll have to be a little careful, my son. We may associate with men out of our social running, but not with women. . . . Ah, Tycle! Mr. Drace has just consented to give me his company to Natchez."

Dr. R. M. Thomas was bitten by a radio bug last week and now Doc is an enthusiastic radio fan and is listening in on the world's doings via radio.

Call at Wellemeyer's Furniture Department Department andl hear the new Christmas Records on the New Phonographs. A Special Sale on Phonographs during December.

Forest City had quite a fire Monday morning when a variety store, a barber shop and a millinery store all went up in smoke. Two small fires also started there Sunday but they were easily extinguished.

Christmas Tree programs will be held at the churches of Klemme on Saturday evening, Dec. 23. Programs are now being planned and rehearsals have begun. We wil publish the programs in next weeks issue and we ask the program committees of the various churches to hand in their programs early as possible.

The new county officers will soon take their chairs at the court house. John Madison succeeds Chris Jacobs as Auditor. Mrs. Clarissa Abel will be the next Recorder in place of Mrs. Aldridge. There are no other new officers as the old oneswere all re-elected.

Rev. M. L. Metcalf and singer John Peterson were in bad company Monday, when they went toMason City with Ye Editor in the Editorial Henry. However, we consider we were in good company but since the Reverend has been traveling around with an editor he has learned a bad habit—yes, he found a pipe in his overcoat pocket—we didn't have the nerve to claim it, and John knows nothing of the deal either! And to make things appear worsefor Metcalf he was found to be toting around a gun!

RADIOLITE

In Your Battery

Means Dependability, Service, Satisfa[ction]

Pour It In - Step On Her - She Goes

RADIOLITE always keeps your battery fully charged.
Preserves the life of your battery.
Removes and prevents sulphation.
Will not freeze in any temperature.
Will charge any make of battery.
Will not over-charge.
Prevents corrosion.
Prevents shedding of plates.
Prevents plates buckling, warping, cracking.
Prevents muddy and soft positives.
Preserves plates and insulators.
RADIOLITE gives you better lights.
Gives better ignition.
Gives better starting.
Gives you more power.
Never need to store your battery in
RADIOLITE WILL DOUBLE the life of a New Battery.
RADIOLITE is a liquid, not a jelly.
After a battery is charged with RADIOLITE just a[dd] tilled water about every twenty days.
RADIOLITE will prolong the life of an old battery fr[om] months to a year.
Anyone can charge a battery with Radiolite in 10 to 20 m[in]
To charge battery with RADIOLITE: First. dump battery ond, pour in RADIOLITE, put battery back in car necessary crank by hand.) Third, DON'T WORRY MORE!
Owing to the peculiar chemical qualities of RADIOLITE, drometer is not an accurate test.
RADIOLITE was discovered in 1920 and is thoroughly electrolyte.
RADIOLITE will help any battery and injure NONE.
With RADIOLITE you should never have to remove your b for re-charge on the line.
We will stand behind our product in every county where R[A]LITE is marketed.
RADIOLITE is not a cure for generator troubles, defectiv[e] ing or other ignitionand starter troubles outside th[e] tery, and in order for RADIOLITE to function right things must be corrected.

THE PRACTICAL BLACKSMITH KLEMME, I[A]
"We Repair Anything but Broken Hearts."

STILLE'S IMPLEMENT NEW[S]

VOLUME 1. Thursday, December 14. 1922 NU[M]

Well if here's anybody that needs a new Bod Sled in the new few years and wants a narrow track sleigh he had better buy it now. This month is the last month to buy narrow track sleigh he'd better buy it now. This is the last month to buy narrow track sleighs as they willnot be for sale thereafter. We have sold some and have a few left that we are making a special price and special terms on, if you are interested don't put it off seeing us about it too long.

We don't always associate "crushers" with feed grinders because we'd probably be put in jail if we did. But the Cob Crusher of the McCormick-Deering Feed Grinder does some very necessary work. As the ears of corn reach the bottom of the hopper the cobs are broken into small bits and fed with the shelled corn to the grinding plates. Thus the effective work of the cob crushers makes the work of grinding plates easier. It's one reason why McCormick-Deering Feed Grinders will grind corn on the cob, shelled corn and grain, as fine or as course as desired. Besides having efficient cob crushers, grinding plates that are self-sharpening and self-cleaning, there are many othehr features about the McCormick-Deering that you will want to know about. Find your way down to our store and let us demonstrate.

The less a man is influenced by his past the more he can influence his future.

"Gosh Hang the Durn Thing!" . .

Wait a minute now! Before you go swearing around at that farm machine because it went on the blinkety-blink just when you needed it most stop to think if it isn't your own fault. Just because it worked all right when you bought it is no indication that it will do so always. Farm machines as well as everything else need inspection and repairing. While your machines are in the shed —NOW—is the time to replace worn and broken parts with genuine IHC repairs. Save your cussings and get your machines ready for the season's work before the season starts. We sell Genuine repairs for Genuine machines.

Women are said to be increasing in height. Do you suppose it is from standing up for their rights?

We took a ten inch McCormick-Deering feed grinder out to Ben Katter's the other day; Ben is going to pull it with his tractor. He got one of the special hoppers for grinding ear corn and small grain at theh same time. Small grains will not stay mixed withear corn in thhe hopper. so the McCormick-Deering people make a special hopper [for] ing this mixture.

Albert Burgess is gettin[g] ternational 6 h. p. gas engi[ne] McCormick-Deering 8 inch [fe]der. That 6 horse is about th[e] est running thing that ever gasoline. It's about as st[ea] steam.

John Miller is getting a Spreader. Mr. Miller says one that will spread manur[e] ground so smooth that he have to go over it again wit[h] and respread it before he can The best advertisement we the Nesco Spreader is, "Ask who has one."

We sold a grain binder t[o] day for July delivery, 1923. T[he] who bought this binder sho[ws] good amountof sound judg[ment] He is protected on the price, there is a drop he gets it, binders go up he has saved th[e] Now we're no fortune telle[rs] gloom spreaders, but we bel[ieve] saved paying a raise.

A certainrich man, we've ten his name just now. said rich by buying his straw hat er and his overcoat in summ[er]

THE KLEMME TIMES

Twenty-seventh Year—Number 15. Klemme, Iowa, Thursday Afternoon, December 21, 1922. $1.50 In Advance—$2.00 Outside of County

NEWS OF THE WEEK REPORTED BY THE KLEMME SCHOOLS

The High School certainly had a very dissappointment last Friday morning. Mr. Peterson failed to come as he had contracted to do. Great were the lamentations when it was announced that he was unable to come. We excused him, however, when we learned that he was invited out to the country for the important task of doing justice to a fine country dinner.

The following were absent from school Tuesday: Fred Albers, Neota Ridder, Dolores Koerner, Maybelle Johnson and Gearald Koerner. It is not known why so many wree absent on this lay, but it certainly reduced the Sophomore and Junior classes.

Martin Barz was absent from the school Monday.

Elvira Stijle is acting as school pianoist this week.

Owing to the cold weather causing a congestiion in the hall, the high school has been dismissing a few students at a time. It takes a little longer for the school to get out bu i releives he congestion when so many are trying to get on their wraps.

For the past week the Economics Class has been studying Problems of Exchange. Such problems come under the head as Value and Prices; Price and Monopoly; Money Problems; Credit and Banking; and many others. The class finds this part of their Economics very interesting.

Debate

The first literary program was held Friday, and proved to be a debate which the whole high school enjoyed. The question was, Resolved: That labor unions should be abolished. Neota Ridder, Leona Lau and Harvey Barz upheld the affirmative and Gearald Koerner, Bertha Johnson and Andrew Wellemeyer upheld the negative. Mr. Fred Arnold and Rev. Depping were the judges. The debate proved to be very interesting and exciting. When the judges retired into the recitation room to draw up their decision they left the asembly witness the first critical period of the year. The judges' decision was that the negative side had won in regard to points and preparedness, but the affirmative delivered their arguments in the lightest and clearest manner.

We were honored by one visitor, Mrs. Fred Ridder. Here's hoping we'll see some more at our next literary program.

We hope the high school will give another program soon.

Grade Room Notes

The "Good English" contest in the Grammar Room was drawn to a close Monday morning. The side which Ethel Johnson was captain of were the victors. The side that lost now plan to entertain the winners next Friday afternoon with a Christmas party. The object of the contest was to make all those taking a part to use better English. The teacher reports this has been accomplished to a great extent.

The Seventh Grade completed their books on South America. In these books they put maps and also wrote brief accounts about the products of the South American countries. They made covers for these books which makes them look very neat.

The Intermediate Room will have a Christmas Party this week Friday. There will be no program but some goodies for the children and then the distribution of the Christmas presents. The children showed their ability as handy boys and girls by fixing up a nice tree for Friday.

The first room will also have a party Friday. But they also plan on having a short program. A nice Christmas tree will be found in their room, too. After the program the Christmas presents will be given out.

No schools news will appear for two weeks, as the school board is giving us a two weeks holiday vacation. Hurray!

AVERY TOWNSHIP

Merry Christmas and a Happy New Year!

Mrs. John Bachman's mother left last Saturday for Waterloo, Iowa, where she will make her home for the winter.

Mrs. Robert Roths visited at the home of Mr. and Mrs. Frank Roths Monday.

Miss Wava Bachman who is attending school at Goodell, visited at the home of her parents from Friday until Sunday.

Albert Fuller shelled corn last Monday.

Ivan, son of Mr. and Mrs. Sylvan Johnson, is suffering with a sore arm.

Jeff Bell is shelling corn and sawing wood at the home of Mr. Walter Reed's a few days this week.

G. A. Goll and son are still hauling tile for tiling his farm.

David Anderson from Kansas is visiting at the home of Wm. Bell.

MR. AND MRS. BELL CELEBRATE 30th WEDDING ANNIVRSARY

About Thirty-five Friends Tender Them Happy Surprise

On Friday evening, December 15, a number of friends and neighbors called on Mr. and Mrs. Wm. Bell, surprising them by coming to help them celebrate their 30th Wedding Anniversary. There were about 35 people present.

The old folks spent their time by spinning yarns about olden times; and the young folks played games.

After partaking of a bountiful lunch the guests departed at a late hour, wishing Mr. and Mrs. Bell 30 more wedding anniversaries.

Mr. and Mrs. Bell received several beautiful and useful presents.

—By a Guest.

Little Mavis Fuller came over from Clear Lake to spend the week visiting with her grandmother, Mrs. Philip Behringer and daughter, Miss Florence. The house in which Mr.

Her Christmas Dolly

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

Sunday morning service at 10:00. Pastor will speak on subject "The Unspeakable Gift," II Cor. 9:15.

Sunday school at 11 o'clock.

Epworth League at 7:30 o'clock, an evening, foloved by a short address and song service.

We would urge all our people, especially the new converts, to attend one or more of the cottage prayer meetings every week. The south side prayer service will be held at the parsonage on Thursday evening of this week, and at the home of Mr. Wellemeyer, on Thursday evening, December 28.

The Christmas program of the Sunday School will be given on Monday evening, Dec. 25th, or on Christmas day, beginning at 7:00 P. M.

The program will be divided into two parts with the primary department taking up the first part of theh program with songs, recitations, drills and dialogues. The second part of the program will feature the play, "Pilgrims of the Night," interspersed with musical monologues, tableaus, pantamines, etc. Singing by the choir and mens' chorus, and music by orchestra at both opening and closing of the program. There will also be proper decorations and lighting effects for the occasion.

The Liberty Sunday School Christmas program will take place on Saturday evening at 7:30 o'clock. You will all be delighted to hear it.

—W. C. Bergmann.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

Morning worship at 10:00 o'clock.
Sunday school at 11:00 o'clock.
Evening worship at 7:30 o'clock.
Cottag eprayer meetings Tuesday and Friday evenings at 7:30 o'clock. You will be welcomed.

Sunday sermons will be preached in keeping with the season.

The Christmas program and Tree will be held on Monday night at 7:00 o'clock.

Practice Thursday and Saturday afternoon, 3:30 on Thursday and 2:00 on Saturday, at the church. The parents of the children taking part are respectfully asked to have the children at the church on time each day.

SOME LETTERS OF INTEREST TO FOLKS AT HOME

News of the Wandering Jews

Zuma, Arizona.
December 11, '22

Friend Jergie:

We got to Yuma today and picked our first oranges. The grove was well loaded with them, but when we crossed the line into California they inspected the car and wouldn't let us carry them over with us. So we had to eat them right away.

Tonight we are in the middle of the desert by the Oasis, so it isn't bad as long as the wind don't blow. These mountains of sand seem to move very easy. We have found good copper and a little gold so far, but not enough gold for pay dirt yet but hope to some time.

Bob killed a cayote Sunday and I skinned his tail for a relic.

It is pretty warm here, about 80 in the shade now.

We will go on to San Diago now, but will probably drop back here a little later.

August Baack is at Ajo; he is a going to work at one of the mines for awhile. That climate seems to help his asthma.

We will try to send you a sample of this desert sand for there is plenty of it. One man came in with a piece of mica rock Saturday about as big as your head. He thinks that the vein is a good one to develop, but we don't intend to do much prospecting for awhile, but Bob and I expect to try it for awhile anyway. You can get a claim by digging a hole six by eight and eight foot deep, but we won't put down a hole until we find something that looks like it will pay.

There was a fellow went down to a dry creek for a little recreation of his own and thought that he heard a strange noise and looked around and saw two bright eyes. Then he saw it was a large tasseled eared lynx and came into camp in a hurry. Bob said that you should have seen that bird come from the cactus, he was agoing some!

Charles is getting tired of hanging around for us any longer so we will have to get out of here. But Bob hates to leave the Yuma Indians for I believe that he is kinder sweet on a nice half-breed, and don't blame him either. Bob said that she is a peach, a little dark but not too shady.

Respectfully,
Chas. Lewis & Chas. W. Stiehl.

Bobbie Writes To Fred

December 11, 1922

Brother Fred:

I thought I would write you a few lines to let you know that we are all well yet, but have a h——l of a time this week when we got between Tucson, Arizona, and Ajo, Arizona. Them two towns are 120 miles apart. August Baack broke a rear axle half way between them two towns. He caught a ride with a tourist car that came along. He went to Ajo, that was 70 miles from here. We got started again the next day about 3 o'clock and then we got on some darn rough roads. There are lots of deep wash outs that come from the mountains and lots of sand here. There are mines here, they are gold and silver mines and copper and zinc mines. There is a copper mine in Ajo and August Baack and that other tourist that was with us stopped there to work awhile in he mines. This mine is all open work, it is a copper mine. They are getting $5.23 or 8 hours a day work. But Charley and me and Charley Stiehl went on through. We are now in between Yuma, Arizona and El Centro, California. They are about 70 miles apart and every inch is desert. There are mountains of sand here, they are waves of sand 100 to 250 feet high and the roads are planked for 12 miles and 40 miles of roaming in sand half way to the axle deep. We go about from 2 to 4 miles an hour now. We was told by tourists that we had about 16 or 17 miles to go yet until we hit a paved road. I will be tickled to death when we get there for I am getting tired of pushing and digging sand. I think we will get into the Imperial Valley by tomorrow night and then in the mountains again. We figure on getting to San Diago, Caliornia about Thursday if we have good luck.

There are lots of cayots here. Charley and I went after two day before yesterday but they got away from us. But this morning I saw one in a dry creek bottom and I got my shotgun and headed him off. When I got back to the truck he came out about 30 yads from me and I got him the first shot. Then Charley Stiehl and I run one but he got away from us. We have to be careful where we go or there are wild-cats and lynx and mountain sheep here and they are mean devils, so they told us.

You can give this letter to Ray Jorgenson. Tell Herman Miller hello for me, and all the boys.

Yours truly,
John Henschen.
(In the desert.)

A. F. BOCK WRITES

Beulah, N. Dak.,
Dec. 14, 1922.

Mr. R. A. Jorgenson,
Klemme, Iowa.

Dear Sir:

Six inches of snow here and quite cold for a week now. 29 below zero was the coldest this winter.

Three new coal mines were opened up this fall. There are also many small mines on some farms, where farmers mine their own coal, and sell to other farmers at two dollars per ton. I pay six dollars for a double wagon box full, hauled in coal bin. For two dollars a ton a person has to get them at the mine.

The Buelah Coal Mine has started a mine two miles north of town. The entrance is along a side hill. Coal is 40 feet from top and 18 feet deep on the average. They have several sections of this coal. Eastern coal strike did not strike us.

Yours truly,
A. F. Bock.

We have a letter from Walt Bloom and he says they have had no frost at Los Angeles yet and everything is in full bloom there now. He says it sure looks good to him when he reads the Klemme Times and reads about how cold it is here. Write again Walt.

Christmas Again

Christmas again, and hearts aglow
And songs and merry times;
New friends to make, old friends to greet;
And over all the silver-sweet
Unchanging Christmas chimes.

A YULE MESSAGE

Christmas Spirit, Peace and Good Will Should Prevail.

Time to Be Happy and to Aid Others in the Enjoyment of the Season's Cheer.

On earth, peace, good will.—Luke 2:14.

SURELY there is a mystic tie between spirit and nature, between heaven and earth, between God and man. Not strange is it, then, that on the night of the most wondrous birth time has seen, the age sealed skies should part and song of angels entrance the watchers on Bethlehem's plains.

What is the secret of the unwonted charm brought by this brightest day in time's calendar? Why is the season charged with such gladness? Why do men and women feel that they can lay down their vexing burdens and their faces smile again with the faith and joy of childhood's care-free days?

It is the rapt influence of the angelic song on the natal night, "Peace on Earth." To a humanity distracted, troubled by doubts and fears, wounded by sin and smitten by conscience, God sends a message: "Fear not, I am your Father. I give you a Savior from sin and misery. You are my children. My heavenly peace I breathe upon you." And in this sweet pledge of divine remembrance and Fatherly love—of God at peace with men—a wave of tranquil joy floods the world.

But, again, it is an evangel to man of peace with himself. Every man finds discord in his own being. His innermost personality is the seat of antagonisms. He is an instrument out of tune. The primal harmony of his spirit is broken. He is at war with himself. His baser strives with his higher nature. Soul and body war against each other. But "on earth peace," chants the seraphic choir. Regard the image of God stamped upon you. Put down the low and base. Let the spirit rule and the body serve.

Finally, the Christmastide should breathe the spirit of peace in our business and in all the relations of life. Especially in our homes we can cultivate the Christmas spirit, displacing their frequent discontents, fault findings and contentions with peace and good will.

For this glad time, at least, let us all be better men and women; less selfish, more kindly, easier to live with. And how much happier will we be if this Christmas spirit—its cheery glow and kindly warmth—stay with us all through the year!—Junius B. Remensnyder.

THE ROSE OF JERICHO

Pilgrims Told of Its Power to Bloom on Christmas Day.

Blossom Given the Name of Resurrection Flower; Also Called St. Mary's Rose.

SEVERAL varieties of the so-called resurrection plant have appeared among the novelties offered by florists but the original is the rose of Jericho. Along the shores of the Dead sea, far enough away to be out of reach of the death-dealing vapors and the salt spray, grows this rose, a little plant famed in many a legendary story, which, when ripened, rolls up its sprays and branches into a curious little brown ball.

The desert winds snap off its dry stem and whirl the seemingly dead little ball away over sandy plains, like a feather-weight. After it chances to reach some damp place, in about ten days, the moisture has wrought a miracle for the once dead is alive again, green and growing.

The old-time pilgrims who brought back this plant with them from the Holy Land, told wonderful tales of its power to bloom out on Christmas day and gave it the name of resurrection flower. Another old legend names it from every spot where they halted to rest.

The dry ball when unfolding drops its seeds, and from these it may be cultivated as an annual. To resurrect these dry balls it is simply necessary to keep them standing in glasses of water, immersed about halfway to the top of their branches. The expansion is merely a mechanical spongelike process.

The botanical name of the rose of Jericho is anastatica, from anastasis, resurrection. There are other species of resurrection plants, but they are not so attractive as their Dead sea relative, which, although it has very little beauty, has an honored place among flowers because of the many fancies and associations it calls up and its peculiar development.—Argus.

THAT PESTIFEROUS BOY.

"A Merry Christmas, old man. But why are you limping?"

"That pestiferous boy of mine set a steel trap for Santa Claus."

HAD HIGH SENSE OF HONOR

Mark Twain Punctilious to a Degree, in Order to Satisfy His "Presbyterian Conscience."

Mark Twain, it is well known, labored in his older years to repay the debts incurred by his publisher; but probably a great many persons, basing their opinions on Twain's own jests, supposed him to be rather happy-go-lucky in smaller affairs. But he was not, shows Gamaliel Bradford in his sketch of Twain in "American Portraits."

The most obvious instance of his rectitude, says Mr. Bradford, are in regard to money. In spite of his dreams and speculative vagaries, he was punctiliously scrupulous in financial relations, his strictness culminating in the vast effort of patience and self-denial necessary to pay off the debt of honor which fell upon him in his later years. But the niceness of his conscience was not limited to broad obligations of this kind.

"Mine was a trained Presbyterian conscience," Twain says, "and knew but the one duty—to hunt and harry its slave upon all pretexts and all occasions. I don't wish even to seem to do anything which can invite suspicion," he said, as to a matter so trivial as taking advantage in a game.

GIVE BEAUTY TO LANDSCAPE

Wilding Apple Trees, at Certain Seasons, Clothed in a Veritable Glory of Blossoms.

Glossy-cheeked apples, red, green and yellow, are known to every child. And that apples grow on apple trees also is known. But just how much careful cultivation, pruning and grafting is required to produce the large, attractive apples one finds displayed in the fruit stalls many children do not realize.

On New England hillsides are to be found plenty of own cousins to the trees that now live in well-kept orchards and that bear beautiful big apples. In the most forlorn, neglected, out-of-the-way spots, nature has planted wilding apple trees that in spring and fall add much to the beauty of what would, otherwise, be a barren landscape.

In the spring, for an all-too-brief time, these apple trees are a veritable glory of blossoms. Then the petals fall, and for the summer months the nondescript, unsymmetrical trees add little to the beauty of the surroundings.

In October these wilding apple trees once more become decorative, the gorgeous flaming red of the scrubby little thorn apples giving a brilliant note of color till long after every leaf has fallen.—Christian Science Monitor.

Postmaster John Waterman and his office force are getting into the holiday rush and each mail brings in sack after sack of Christmas parcels. He says that the Klemme people, as a rule, have mailed their annual holiday packages early this year, and for the past two weeks or more they have been busy sending out packages.

Christmas Is Come!

Now Christmas is come
Let us beat up the drum
And call all our neighbors together,
And when they appear
Let us make them such cheer
As will keep out the wind and the weather.

How can you keep warm, hauling crops to town in zero weather? Buy a good Fur Coat from Wellemeyer's and be snug as a bug in a rug all winter. Wellemeyer's is the one Store in Hancock County that sells Fur Coats. Dog Coats and Half-weight Horse Coats are the most popular. When once you own a good Fur Coat you will wonder how you ever stood it in a cloth coat. adv

Dr. and Mrs. J. L. Hesselhuus enjoyed a lot of company the week-end. Mr. Darner, of Minneapolis, father of Mrs Hesselhuus, drove in Saturday night; Miss Mary Darner, a sister of Mrs. Hesselhuus, came from Marshalltown. Ia., and was accompanied by her little nephew, Marston Darner; and then later a brother of Mrs. Hesselhuus, Charlie Darner drove in from Minneapolis also. They all returned to their respective homes Sunday evening, except her father, who remained until Tuesday and then left for Ames to spend a few days with his parents when he will return to Klemme to spend the holidays with his wife who is here and with Dr. and Mrs. Hesselhuus.

GIFTS of DISTINCTION

Farming.

THE CULTIVATED CHRISTMAS TREE

BY CHRISTOPHER G. HAZARD

© 1922, WESTERN NEWSPAPER UNION.

NCE there was a boy named Peter Mephibosheth Onondaga Cologos Cadwalader. It was such a long name that he would get out of sight before his mother could finish calling him, so she shortened it into "Pete." "Oh, Pete," or "You, Pete."

e right time of year Pete want-
ristmas tree, so he went to the
to get it. Selecting a mountain
e, he was about to cut it down,
flock of starlings disputed with
iming it as their Christmas tree
its bright berries as their own.
e considered a nut tree, but the
s were furious and wanted to
here their Christmas would be
ook it. So the boy concluded
one else would want the ever-
tree, with nothing on it but
and took that.

cting, however, that his tree did
m likely to have anything on
th while, Peter remembered what an old woodman had once told him about a wild tree that had responded wonderfully to cultivation, and resolved to see what could be done in his own case. His mother smiled when he made his plan known, but offered no objection as her son set the tree up in a box, supplied it rth and enrichment and wa- from day to day. His frequent ons did not much reward his ndeed, the tree seemed to be g, and yet, on Christmas there it was, all adorned and pplied with gifts as beautiful rberry bush.

s strange, however, that withal d not seem to be much happi- ong the branches. Indeed, be- , Peter seemed as dissatisfied tful as though his tree had m nothing more than its wild His mother felt a good deal ted, for she had hoped that so wonderful a surprise would be as happy a thing for him as it had been for her; but she could think of nothing better, so that the Christmas celebration began to seem like a failure. Mr. Cadwalader, however, had a suggestion to make. He said that he thought that the tree had not been cultivated enough, and that if Peter would invite some of his young friends in he thought they might get a good deal of pleasure out of things even yet.

When the little company had assembled and Mr. Cadwalader had distributed some packages that he had placed on the tree there was a merry time over the games that he knew how to play, and a wondering when he disappeared into the hallway, promising to come back all dressed up in a minute and take the three gifts off that were left on the tree and see what they were and who they were for.

They hardly knew the jolly man who came back, after a little, all in red, with white whiskers and paper snowflakes in his hair and on his coat, as though he had come in out of a snow storm. Little Dorothy Avery, the smallest of them all, jumped up and leaned on her crutch as she exclaimed: "I know him, he's a friend of mine," mistaking him for Santa Claus, but the older ones did not correct her mistake.

Whoever he was, he made them a little speech and wished them a merry day and began to take off the three remaining gifts.

In his speech he said that he felt sure that there must be a good deal of happiness on that tree, because God had made it, hope had planted it in the box, faith had watered it, affection had filled it with fruit, but, as they had not yet had the best things that cultivation could produce, he was now going to let them have them.

The first of the three gifts was a small box, all done up in tissue paper. When Dorothy had taken off the paper and undone the box there was another little box, and when she opened this box there was another little box in that, then there was another little box, then there was another little box, then there was another little box, then there was another little box; and so it went on until, in the last box, she found a gold dollar. The second gift was a bayberry candle, with these words on a piece of paper:

Set me in the window some dark night,
Many will not see me, someone might.

Madeline got this second present and seemed very glad of it. Then the third gift was taken down and presented to Peter. It was only a note, all done up in an envelope, but it helped him to see why the party had made him happier than he had been when he was all alone with his tree, for he could not only read the note, but also the sweet meaning when it said:

All trees are Christmas trees that bear
The care of love and love of care.
To cultivate a Christmas tree
Plant it in love and let it be.
Gold for misfortune it will keep,
Light in the darkness it will give,
Its truth will blossom while you sleep,
Its happy kindness while you live.

So Peter found out all that the old woodsman had meant when he told him about cultivating trees.

Raisin Quick Candy.

One and one-half cupfuls sugar, ½ cupful chopped raisins, ½ cupful roasted almonds.

Heat the sugar in frying pan over a low fire, stirring constantly until it becomes a golden brown sirup. Remove from fire and quickly stir in raisins and nuts. Pour on inverted ungreased pans. As it is beginning to harden mark into squares.

PACK GIFTS WITH CARE

CHRISTMAS PRESENTS SHOULD BE WRAPPED WELL.

Parcels to Go by Mail and Express Need the Careful Attention of the Sender.

IT IS all very well just to wrap an ordinary package in paper and tie it securely with string, but with a Christmas gift it's different. Somehow the Christmas sentiment oozes out even to the outside of the package, and we must take just as much care in "doing up" our parcels as in making or buying them in the first place.

Let us be practical, however, first of all. Let us wrap the parcels, especially the ones which have to go by mail or express, very securely indeed, registering them if they are valuable. Tissue paper first, and then good, strong wrapping paper, tied with stout cord or heavy elastic, is the best method. Reserve ribbons and fancy cards for the inside of the package, and remember that putting a seal over the fastening of a parcel prevents its being sent third class. For perishable objects use cardboard boxes.

As for the packages which are to be delivered in person, however, or the inside of those to be sent by mail or express, you may exhaust your ingenuity to make them pretty. With a box, of course, it is always easy to use holly tissue paper and green and red ribbon and a sprig of holly or mistletoe; but a wrapped parcel always looks more clumsy.

Wrap the gift first in white tissue paper; then roll it in white bristolboard; and then cover it with green or red crepe paper. Tie around it a bow of ribbon in the contrasting shade, stick through this a sprig of holly and a card of good wishes, fasten at the ends with Christmas seals, and there you are!

These seals, by the way, although they may be purchased very cheaply, still have a further touch of individuality when made at home. Do them on glazed paper and coat them, before cutting out, with mucilage that can be allowed to dry and then wet again when necessary. Three suggestions for designs are the bell and star, the Christmas tree with presents and Santa Claus with his pack. Many more to be drawn, touched up with watercolor and cut out, will suggest themselves to the reader.

The very ribbon with which your gifts are tied can be stenciled with a design more original than the inevitable holly of the shops. The red border and the mistletoe wreaths and stars make one pretty pattern. The process is the simple one of ordinary stenciling.

With your gift send some pretty card expressing your affection for the recipient. A good idea, especially with a book or some other gift of the sort, is to send instead of a card a little blotter calendar. It consists of two or more blotters tied together with a bow of holly ribbon, a calendar pad for 1922, and a picture (a post card will do, but the subject must be suited to your friend's tastes) fastened to it on the other side. The fastening may be done by clips or by sealing wax. A slip of paper with a Christmas greeting should also be added. The blotters may be red and green or they may give the colors of some club or college in which the donor or recipient is interested.

Finally do not forget to weigh all packages you mail. Nothing is more annoying than to have to pay for a package sent out by some careless friend. And keep a card catalogue of your Christmas presents. Then you will avoid the two pitfalls of forgetting some one or duplicating a gift—both horrible to contemplate.

Above all, wrap your presents with a kindly thought—or do not give any at all.

Removing Water Spot.

Some silks and wools are spotted by water. A satisfactory method for removing such spots is to dampen the entire material evenly and press it while still damp. Either sponge the material carefully with clean water or shake it in the steam from a briskly boiling tea kettle until it is thoroughly damp, then press it.

Her Happiest Day

Dollars Torture to Germans

Sent by Friends in the United States, Relatives Hesitate to Exchange Them.

CROWD BANK LOBBIES DAILY

Watch Fluctuations in Doubt Whether They Should Sell or Wait—When Rumor of Rise Starts Line Thins Rapidly.

Berlin.—Moralists seeking to prepare sermons upon the curse of riches might find convincing material daily in the crowded lobbies of Berlin banks. There are gathered the most unhappy people of Berlin—the poor with American dollars.

Perhaps there is nothing more coveted today than dollars. All Germany has literally gone wild over the desire to possess them. Imagination has placed their value far above their actual worth and as a result of this palpitating anticipation realization brings the bitter fear that the precious dollar in hand is not buying every possible mark. The magic coin changes over night the German who has been railing at the visitors from countries with high "valuata" to a theoretical capitalist hoping that on the day he cashes his dollar the mark will go utterly to pot.

Large Sums Sent From America.

And it is the poor who are now receiving the coveted currency. Hundreds of Germans in America, hearing of the crash of German marks, have sent checks, drafts and postal orders for sums from $5 to $50 to poor relatives. They flock to the banks when the doors open in the morning, watch the figures on the bulletin boards announcing the fluctuations of the exchange, tremblingly approach the cashiers and then decide to wait for one more hour in the hope that the trend may be upward again. Perhaps the next hour brings a drop of one or two points. Panic-stricken the holders of small checks besiege the windows to unload their holdings before there is a further drop.

A prosperous stranger who has no dollars to cash, however, enters. He is overheard by a timid seller telling some friend that he had it straight from the ministry of finance that the mark is going to drop heavily in a few days.

Rumors Cause Tortures.

The dollar holders nearest the window swallow rising lumps in their throats and the line begins to thin out rapidly. At this moment the bulletin board shows an encouraging rise and the perspiring dollar holders go through a living torture. They either end by cashing their checks for whatever they can get or by leaving the bank completely crushed by indecision. Likely they have lost a half or a whole day's work and still hold their crumpled checks and their deep determination to get all the marks possible for them. If the mark falls the next day they wait for a still further drop. If it rises they experience a little more mental anguish until the tide turns backward.

Another phase of the wholesale receipt of presents from abroad is that bricklayers and hodcarriers of yesterday have turned into students of economics. The pages of financial papers, so strange to the ordinary workman, now assume the interest of popular novels. They are perused vainly for authentic information as to whether or not the mark is going up or down on the morrow, in spite of the fact that financial prognostications are not like those of the weather bureau. It is a futile search, however, and in the end the holder of dollars merely goes deeper into the mire of indecision and in the end learns the unhappiness that can come from the possession of the world's greatest currency.

WAR RECORD WINS $750,000

Minneapolis Vet Gets Legacy Despite Father's Stipulation That He Work Two Years.

Minneapolis, Minn.—While his war record with the British army in the World war won him a share of his father's millions, although his career did not comply with the terms of the will, Capt. George C. Douglas will not have his legacy of approximately $750,000 to spend as he pleases, according to a decision of the local probate court.

Probate Judge Dahl has ordered that Charles R. Fowler, attorney, continue his guardianship over Douglas' affairs, despite the latter's petition that he be declared competent to manage his estate.

Walter T. Douglas, his father, provided in his will that Captain Douglas must earn $2,500 a year for two successive years before he could claim his legacy. The trustees held, however, that Douglas' war record was equivalent to the demands of the will, although he did not earn the specified amount.

Squirrel Stored Golf Balls Instead of Nuts

A squirrel's cache, holding 31 golf balls, was discovered recently on the grounds of the Augusta Country club, at Augusta, Me. The place near the cache is one of the most difficult drives of the course and something psychological swerves the balls into the woods, where they are lost.

Mr. Squirrel apparently thought they were a new kind of nut, so he gathered them for his winter hoard. Some of the balls are in good condition, while others bear the teeth marks of the little hoarder.

Arkansas Town Owned by Man

Robert E. Lee Wilson Rules Small Village Like Baron of Feudal Times.

PLACE HAS NO POLICEMEN

Wilson City, Ark., With Population of 1,800, Gets Along Without Ordinances and All Courts, But Everybody Must Work.

Little Rock, Ark.—Wilson, in Mississippi county, Ark., is a one-man town. It has no courthouse or city hall, no ordinances, no police force. When taxes fall due, the collector has only to go to Robert E. Lee Wilson and say: "Mr. Wilson, give me a check for taxes on everything in sight."

Wilson writes the check, covering all of the land and physical assets in a town of 1,800 population and enough of the surrounding farm and lumber country to total more than 40,000 acres of territory, said to be rivaled in productiveness only by the valley of the Nile.

The town of Wilson has only one law and that is unwritten. It is that everybody must work. There are no idle men in the town and vagrants are not tolerated. There can be no undesirable citizens because Wilson, who owns all the houses, will not rent homes to undesirables.

Homes Are Modern.

Everybody in Wilson is a renter. Even the one man who owns and runs the town writes a check, payable to himself, every month for $45. That is the highest rent paid, and only two other citizens pay that much. Other tenants pay $12.50 to $27.50 a month, with a few exceptions, where the rentals are $30 to $40.

Every home in Wilson, whether it is a three-room cottage or a mansion, is equipped with electric lights, tub and shower baths, hot and cold water, telephone, hedge, flower garden, truck patch, and chicken yard.

Wilson has industries that represent a total investment of $1,000,000. These produce annually nearly $2,000,000 worth of manufactured hardwood lumber, ginned cotton, flour meal, and mixed feed. The raw material for these products comes from a 40,000-acre tract of cultivated and timbered land, all owned by Wilson. The principal agricultural products are cotton, corn, wheat and alfalfa.

Wilson's 18 cotton plantations, with a total area of 8,000 acres, will produce this year 6,600 bales of cotton. Corn was harvested from 6,000 acres, wheat from 1,200 acres, and alfalfa from 800 acres. The farm is so big that Wilson employs his own agricultural expert and a general plantation manager who has supervision over 18 zone managers.

Got Start in Sawmill.

There is no season of idleness in the town. When the harvest is over, the farmhands are put to clearing land or working in the logging and timber industry. Wilson is now reputed to have a fortune of more than $10,000,000. He began operations with a small sawmill on the site of the town which bears his name.

With the profits from the sawmill he bought up land a parcel at a time. Now, at fifty-seven years old, he owns timbered and cultivated land enough to make a fair-sized county. His territory is 27 miles long and eight miles wide.

In this section of the country Wilson was one of the first to take up diversified farming.

Then, too, Robert E. Lee Wilson has a hobby—education. He has sent many young men and women to college, financing them all the way through.

Lincoln Statue Given Louisville

Scene at the dedication of a new statue of Abraham Lincoln in Louisville, Ky. It is the work of George Grey Barnard and was given to the city by I. W. Bernheim, whose little granddaughter is seen unveiling the figure.

Man Ends Life by Sitting on Shell; Blown to Bits

London.—A Cologne telegram quoted by "The Westminster Gazette" states that at the village of Opladen a man, tired of life, sat on a shell, lit the fuse and waited the explosion by which he was blown to fragments. His fiancee, mother and friends who saw what he was doing tried to stop him and were all severely injured by the explosion.

Thirty Letters in Student's Name.

London.—In the list of matriculation examinations in Ceylon, Colombo, for the University of London, appears a name which can be written, with care, but which, outside of Ceylon, has not yet been properly pronounced. It is "Nanayakkaragodakandearachchige Harmanis de Silva Wijesekera."

MORE MEN ARE NOW ON FARMS

Sex Ratio Is 109.1 Males to 100 Females, Statistics Show.

Census Bureau Figures That Larger Number of Women Than Men Are Leaving Farms for Other Fields of Endeavor.

Washington.—Larger numbers of women than men are leaving the farms in search of more lucrative fields of endeavor, the census bureau says, basing its statement on an analysis of the 1920 census statistics.

The enumeration shows the ratio of males to females was higher for farm population than for the total population, despite the fact that the foreign-born element, in which the males considerably outnumber the females, is found mainly in the cities.

The sex ratio of farm population on January 1, 1920, was 109.1 males to 100 females, while the ratio for the entire population was 104 males to 100 females.

Of the number of farm dwellers, totaling 31,614,269, males number 16,496,338 and females 15,117,931. Of the total farm population 49.5 per cent was twenty-one years and over, 24.7 per cent between ten and twenty years, and 25.7 per cent under ten years. Those twenty-one years and over numbered 15,632,098. For the country as a whole those 21 years and over compromised 57.6 per cent of the total population.

The farm population, therefore, includes a relatively large proportion of persons under twenty-one and a relatively small proportion twenty-one years and over.

The difference in age distribution is declared by the census bureau to be due largely to the fact that the majority of persons who leave the farm to take up their residence also

HERE'S THE STORY SO FAR

SYNOPSIS

CHAPTER I—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They form a singular compact.

CHAPTER II.—Drace gets his mind off his mission by entering into deck sports in which he exhibits an unusual athletic prowess. Liberty Shottle is again unlucky at cards and attempts a financial negotiation with Drace. The latter, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination announced to his new chum, to hang La Vitte as high as Haman. Drace has become enamored of a mysterious beauty aboard the boat.

CHAPTER III.—The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. Shottle becomes possessed of two tickets for the French ball, a great society event, and proposes that Drace accompany him to the affair. The young men attend and Drace unexpectedly meets the girl who had fired his heart aboard the steamer. She is accompanied by one Boyce, whose proprietary interest indicates that he is her fiance. Through stratagem Shottle learns that the name of the girl is Nadine la Vitte and that her companion of the evening is the man who is seeking to marry her.

CHAPTER IV.—Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. In one of their nocturnal pilgrimages they come upon a mob intent upon hanging a poor wretch from the limb of a tree. It is a typical carpetbag execution and aroused the resentment of an opposing mob of citizens. Drace takes a hand in the fight which starts and is instrumental in preventing the execution. From a window opposite the scene, he catches a glimpse of one he is sure is Nadine.

CHAPTER V.—The escapade, the fight, the interference with the execution get Drace and Shottle into bad standing with the authorities, but instead of punishment are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned. Through Colonel Josh, an emissary employed at the suggestion of Shottle, he gets a faint clue in the discovery that a certain Frenchman, a wine dealer, is reported to be an intimate of Stepho la Vitte. There is only a short time before the departure of the steamer when Drace and Shottle go to call on the Frenchman. The latter is too keen to be inveigled into giving up any information, but Shottle, spying around among the casks and bottles, especially the articles made up for shipment, makes an important discovery. So as not to arouse the suspicions of the Frenchman, he casually draws Drace away from the place and onto the steamer. On board he informs Drace that one of the cases was addressed to Stepho la Vitte at Farnum's Landing, Mississippi. It is the next stop below Bethpage's Landing and Colonel Bethpage is Liberty Shottle's uncle.

CHAPTER VI.—Drace and Shottle are received with genuine hospitality by Colonel Bethpage and find the plantation and its environs delightful. After a brief stay and a characteristic financial transaction with the colonel, Shottle goes away ostensibly on a business trip to Vicksburg, but in reality to seek his favorite form of amusement. Drace makes the plantation his headquarters and from pieces of information gathered from various sources, becomes convinced that La Vitte has a haunt in a great wood of cypress and a tangle of salt cedar, a sort of everglades, a marsh with hundreds of knoll islands rising here and there among the bayous. A shrewd old negro had told him that the outlaw lived in a house built of periwinkle shells. Day after day Drace takes a canoe and goes farther and farther into the moss-hanging wilds. At his feet lies a rope, one end of it a hangman's noose.

CHAPTER VII.—Drace penetrates into the wilderness, discovers Periwinkle House and finds Nadine alone. She is much alarmed and warns him her father will shoot him. He makes love to her and to get him to go she agrees to meet him again the following Thursday. On his way home Drace is accosted by three men who ask to be set across the river. They overpower him and bind him with ropes. Led by Tony they throw Drace into an old cabin. Tony taunts Drace and avows his love for Nadine, while the others collect fuel. Tony sets fire to the cabin and the three go off laughing. And then his bonds are cut and with Nadine's help he gets safely out. She tells him how she was led to come to his rescue.

NOW GO ON WITH IT

The Black Hawk's band played a welcome, and the captain came down the plank to conduct the General on board. From a quiet, lazy and almost deserted landing the place leaped into the full throb of life. Negroes and shiftless whites came from their hovels to gaze upon the magic splendor of this journeying palace, and the three-shell man stepped ashore to gather up dollars.

Dinner was a state occasion, and after it, the ball. Then their staterooms—then morning, and Natchez.

The address was to be delivered in the afternoon, and when the time came the General led him over to the hall to hear the speech, imprisoned him without bail in a corner, and there he had to sit. The address was long, academic and dull, and the sufferer mused:

"I don't see why Shottle ever called you a remarkable character."

Everybody came about the General to take his hand. Young women told him that they had never been so thrilled. Drace lied to him, too, swore him an orator.

"Let us walk off alone," said the General.

Slowly they walked at first, but after a time the old gentleman struck a brisker pace, toward the River.

"Now, my boy, as we've got through with those beaters of dust out of old carpets, we'll have some fun. Old Colonel Pemberton wanted me to go home with him, and he has a delightful house, a gracious wife and handsome daughter, but I had to decline. I've stood about as much now as I can. We'll go down to old Tobe Mason's tavern, under the hill. Tobe is a gentle old fellow, never killed but three men. One of them shot Tobe's leg off and now he wears a peg; and I want to tell you that when he unstraps it and hops around in a fight, he's right meddlesome. At a trial in the courthouse here not long ago, the judge issued an order that all deadly weapons must be left with the deputy sheriffs at the door—and sir, they made old Tobe take off his wooden leg."

The tavern was as tough a place as river men could make it. Built of logs, bricks, stone and clapboards, it looked like an architectural stagger, trying to climb the hill. In the main room was the bar. Herein Tobe gave his famous 'possum feasts and dances, when the spirit of liquor mounted high enough to swing its partner off the ground.

"Well, I'll be knocked in the head for a steer!" old Tobe cried out, stumping toward the General. "I haven't seed you since the River tuck fire. Well, well! Thinkin' about you the other day. . . . Glad to shake your hand, Mr. Drace. Set right down."

"Tobe, I'm glad to see you," said the General. "And fetch us about two quarts of that summer-grape wine. Let me tell you about it, Drace. We have a wild grape here that gets ripe along in August. It's much larger and is not sour like the fox-grape, and its vine likes to climb about a sassafras sapling. And then you see an umbrella of grapes. Now don't say a word till you've had a good taste of it. Tobe makes it himself, and he'll fetch us some that's at least twenty-five years old. Here we are."

The wine was as red as blood, cool and yet warm. Its flavor was the ripened sweetness of the spirit of autumn, it was as mellow as the scent of the apple at harvest time.

"What do you think of it, hey?"

"Uncle Howard, are you sure that this was not made by Bacchus instead of Tobe?"

"Good, my boy! Enjoying yourself?"

"Yes, I'm doing fine, General. You see, I can't express myself as well as you can. I haven't as much to draw from. You've not only book-knowledge but experience, worth more socially than all the libraries in the world."

"You hit it off well. But what is better than it all? Moral freedom. This table here is rough, with one rheumatic leg slightly drawn; these chairs we sit in, bottomed with strips of hickory bark, would be scorned at a sheriff's sale; but sir, Mark Antony, in his first triumph, his chariot drawn by lions, was not more regal than we are at this moment, enthroned and sceptered with moral freedom. Pour out, for as that same Antony said: 'Scant not my cups.'—Tobe, where's that old scoundrel who used to play 'The Arkansaw Traveler'?"

Tobe stumped his way over from the bar.

"You mean old Slithers?"

"That's the man. What's become of him?"

"Nothin'. And I reckon he's playin' right now down at Cadman's joint, that ought to be wiped off the earth. Want him?"

"Need him, Tobias. Send a boy after him."

Old Slithers, bald and wrinkled, came with his home-made fiddle. The

Old Slithers, Bald and Wrinkled, Came With His Home-Made Fiddle.

General greeted him warmly, introduced him to Drace; and the most comfortable chair in the house provided him, he sat down to play the famous old tune and to recite the dialogue, improvising where his memory failed him.

The General roared his delight, said that he would go on the stand to swear against Sour Socrates in favor of the fiddler's dialogue. "Tobe," he shouted, "fetch in the buck-and-wing dancers."

Tobe went to the door, yelled as if calling hogs; and in came two big negroes, a throng of idlers following them. At it they went, shaking the house, and when weariness threatened to seize them, for refreshment they drew off, and leaping, butted their heads together like goats. After a time the General gave them a dollar apiece, dismissed them—gave the fiddler five, with an order to play that old tune again. Old Tobe was now lighting his evening lamps. The General called to him.

"Toby, what have you for supper?"

The old fellow closed one eye.

"'What have I got?' he says. Ah, that's it. An' I'll tell you. I've got hoe-cake and roasted doves."

"No, you don't mean it!"

"Hoe-cake and roasted doves, I said."

"Good, by Gideon's Band. Fetch us, Tobias. And mark you, along with it all bring about a trowel full of that wild plum jelly.

The doves and the strips of bacon and the hoe-cake and the jelly came on, and arising the General saluted the repast.

"Talk about quail! Quail, sir, is insipid, white, dry and tasteless compared with the dark richness of the dove. And look at this bread, made of mealed pearl. You never tasted any bacon like that, my son, fed on acorns showered down from Olympus. . . . The sweet of the night!"

They had finished the meal and were sitting back, smoking, sipping wine, when Drace noticed a sudden change in the General's countenance, a tightening, a grimness; and turning about, he saw standing against the wall a strange figure—a man not tall, but broad of shoulder, his body sloping lithely down to feet expressively of sinewy restlessness. His mass of hair was like tangled flax straw, dark and yet gray. Like the bristles of a wild boar, his short mustache stuck out and his heavy eyebrows looked like great hairy caterpillars crawling across his lower forehead. In his dress there was a wild touch, a barbaric aspect. Slowly he came forward.

"This is General Bethpage, heh?"

"That is my name, yes. What do you want with me?"

"Whut I want; heh? I come to 'pologize to think them mule be mine."

"Well, go on away. I don't want any apology from you."

"No? You put pistol at me. That was in Louisiana. This is Mississip'. An' I tell you here you haf turn' carpetbagger."

"What! If General Andrew Jackson should arise out of his grave and tell me that, do you know what I would say to him?"

"You would beg hees pardon as you will mine, heh?"

"I would say to him as I now say to you: You are an infamous liar."

Drace sprang between them and seized the man by the wrist; a dirk fell from his hand.

"Stand back, General," cried [illegible] "There is not going to be a fig[ht] Stand back, Tobe!"

The dark-faced man looked [illegible] the eye.

"Monsieur was ver' strong. [illegible] see him some other day."

Turning, the fellow made o[ff] "Now, who the devil was [he]" asked Drace.

"That, my dear Drace," repl[ied] General, "was the fellow you [met] about the other day—Stepho la [Vitte]"

To Drace this encounter with [Stepho] la Vitte, the father of the [girl he] loved—and the outlaw upon w[hom he] had sworn to wreak vengeanc[e] disturbing indeed. The Genera[l] ever, was not at all upset by t[he fact] that he had been barely save[d by] Stepho's knife, and when a sh[ort] later they boarded the Bumble[bee] their return, he gripped Major [Bethpage] hand and said:

"Major, Mr. Drace and I have [a] precious possession three quart[s of] Tobe's wild grape."

"Ha—which is as much as [to say] that you have three quarts stew[ed] of the heart of Venus. I'll find [Tobe] kins and the four of us will go [to] the Texas and—and flatter the[m] by gad! But Tobe lied—said he [would] have any of the old stock left."

"And a liar's wine is sweet, [my] Major. Come, Virgil, my boy, [you're] brooding out of your mind. Bed [time] is for the poet when the nag [is] and not for us. We'll have a [drink] it, and then we'll return to resp[ect] servitude and slow moral decay, dear Major, lead on. We follow."

The remainder of the trip [to] Bethpage was a matter of mom[ents] dom at the gaming table for the [Gen]eral. For Drace it was occupied [with] the hot struggle between thoughts his grim mission against Stepho [and] his longing for Nadine. For the [time] being, however, the beautiful girl had rescued him from the burning triumphed. She had promised to [meet] him once more on Thursday [and] would keep the tryst.

Presently the Bumblebee made Bethpage Landing. And the General's hospitality was at once so warm and gracious that Drace felt no hesitation in remaining for the time being under his roof—until Shottle's return at least. That night after dinner [with] his wife, Tycie, had left, the gentleman lit a cigar and for a long time sat smoking in silence; and Drace was silent, too, looking through the [open] at the moon, love's slow [time] stopped and stagnant in the sky.

"Virgil?"

"Yes, General."

"Have you a pistol, sir?"

"No; I had one, but I lost [it]

Happy New Year

for 1923 and solicit a share of your business the coming year

Klemme Co-Operative Grain Co.

The Rag Doll's Christmas

THERE was once a very, very old rag doll who lived in a nursery. She was so old that she had seen all the children grow up—the boy who wore trousers now, the girl who had her hair done in braids, the middle-sized child who had so often left the rag doll out in the garden at night. There was only the baby left—bless his pink toes!

But the rag doll was very, very old, and one beautiful Christmas time she began to show her age.

Her hair had been combed so much that it had come out dreadfully, and her nose, from a great deal of kissing, was entirely gone. Her pretty pink cheeks had been washed away when the boy tried to teach her to swim in the bath tub, and all her clothes were very untidy indeed.

The baby never noticed all these things, but the toys did; they all made the most unkind remarks to the rag doll the day before Christmas.

"Look at your dirty face," said the large French doll. "You'll be put in the attic tonight. That's where the old dolls go." "Look at your dress," said the jumping jack. "It is all torn. I wouldn't walk across the nursery floor with you."

"Did you ever see such thin hair?" asked the hobby horse. "I thought my tail was thin, but it isn't to be compared with that!"

But just then the nursery door opened, and the Christmas Angel came in. You could be perfectly sure that it was the Christmas Angel even if she did have on a gingham apron, because her face shone so through the dark.

"The French doll must go up to the attic," said the Christmas Angel. "There is a more beautiful new best doll coming."

"Why, the jack-in-the-box has forgotten how to jump."

You see the jack-in-the-box had been so excited about the rag doll's dress that he had broken his spring.

"The jack-in-the-box must go up to the attic, too," said the Christmas Angel.

Then she went over to the hobby-horse.

"Poor, old hobby-horse!" she said. "Your leg is very badly broken. I will take you up to the attic until you can be mended."

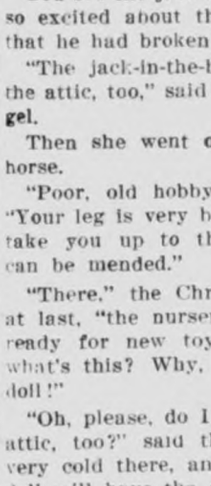
"There," the Christmas Angel said at last, "the nursery is all tidy, and ready for new toys—but, dear me, what's this? Why, it is the little rag doll!"

"Oh, please, do I have to go to the attic, too?" said the rag doll. "It's very cold there, and I know the best doll will have the chimney corner for herself—and I don't want the mice to gnaw my toes!"

"Why, you dear old thing!" said the Christmas Angel. "You're the same rag doll that I used to play with when I was little. You go to the attic? Why, I just guess not! We couldn't get along without you in the nursery. You do need a little mending, but I am going to sew you, and then you shall sit on the very tiptop of the Christmas tree."

The Christmas Angel lighted one of the Christmas candles so that she could see to sew. Then she took the rag doll in her lap and opened her workbag and set to work.

First she stuffed the rag doll's insides with plenty of cotton so she could sit up. Then she sewed her toes and put new little white stockings and black shoes on her feet. She took a piece of clean, white cloth and covered the rag doll's dirty face, and painted in blue eyes and a smiling red mouth and vermilion cheeks. She sewed on a new yellow wig; and then she made a pink-and-white checked gingham dress with puffed sleeves, and a white apron with strings to keep the dress clean, and a pink-and-white checked sunbonnet to tie under the rag doll's chin and keep her hair tidy.



"I think you will do now, you dear old thing," said the Christmas Angel.

So it came Christmas morning, and there on the tiptop of the tree sat the rag doll quite made over. The children thought her really the most beautiful of all the Christmas things. As for the rag doll herself—why, all the pleasure of her old days was as nothing to the happiness that was hers now.—Carolyn S. Bailey, in Kindergarten Review.

JOY OF CHRISTMAS

Season Proves That Men and Women Are Friendly Beings.

Desire to Make Presents and to Be Cheerful Shows People Wish to Be Congenial.

ONE of the finest things about Christmas is its trueness, the joyous reality of it. At Christmas time no exhortation is necessary to make it go; Christmas never has to be made a "success," as a parade or a pageant.

Christmas is in a certain sense an institution; it comes at a certain date each year; it always has its Christmas tree, its stocking, its poultry dinner colored with cranberries. But it is one of those institutions that has never been institutionized; it exists in the nature of man.

Christmas proves to us that men, women and children are at heart friendly beings. The spontaneity of Christmas giving and Christmas cheer proves what people really want to be—good friends.

Wars go on at other times; men and women quarrel among themselves over property or over other men and women; artificial requirements are imposed that incite to greed, dishonesty and bitterness. But at Christmas time there comes over the broad surface of our western civilization, which is pretty much like other civilizations, a great reversion to type. Man wants most to be happy, he wants to dance and sing and to make other persons happy. At other times than Christmas something seems to be wrong, and man reasons that someone else is to blame.

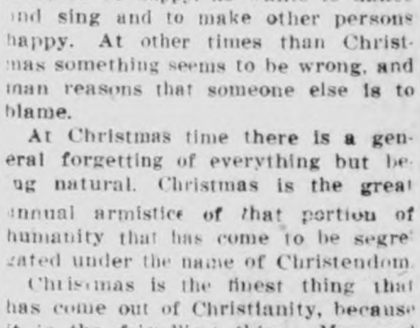
At Christmas time there is a general forgetting of everything but being natural. Christmas is the great annual armistice of that portion of humanity that has come to be segregated under the name of Christendom.

Christmas is the finest thing that has come out of Christianity, because it is the friendliest thing. Men and women are not naturally and healthily meddlers; the best part of their lives and the most of their happiness does not come from the tyranny they exercise or the repressions they set up or the reformatory cruelties they inflict on others.

At Christmas time men and women forget to be anything but children again.

Perhaps some day there will be a sort of Christmas every day of the year. Perhaps men and women will be able to forget more often and more completely, and thereby live more completely, the elimination of bitterness and artificial antagonisms being both the cause and the effect of this happy state.

Perhaps one of the lessons of Christmas is that we have more to forget than to learn.—Detroit News



VERY USEFUL

"Say, wouldn't Mr. Spider be useful to tie up bundles during the Christmas rush?

Imperative.

Crawford—Does your wife beg you for Christmas money?

Crabshaw—I wouldn't put it exactly that way. She issues an ultimatum.—Judge.

Present and Future.

The wise youth prepares for the future,
But during the holiday whirl
He should also remember the present
That's expected by his best girl.

Santa Claus Did Come

Santa Claus' Books

WHEN the evening shadows gather
and the time is eight o'clock
You can hear, if you will listen, Mr.
Sand Man's gentle knock.
Then you'd better hustle lively—time your
evening prayers were said
And each boy and girl well tucked in
their cozy, downy little bed.
For when Mr. Sand Man's knocking
sounds the signal, you may know
Santa Claus is closely watching from his
palace built of snow,
And the children that are naughty and
don't mind their ma's and pa's
Get their names down in the "Bad Book"
that is kept by Santa Claus.

Boys who never split the kindling, and
the girls who always cry
When they're asked to wash the dishes—
Santa Claus has got his eye
On such boys and girls, and watches with
a sad and sorry look
As he writes each name in sorrow on the
pages of his book.
And the girl who never hurries, but lets
mamma do the work,
And the boy who's always scheming all
his little chores to shirk—
They may think no one pays notice when
they don't help ma's and pa's
But their names are on the "Bad Book"
that is kept by Santa Claus.

But old Santa keeps a "Good Book"—it's
the bestest book of all,
Where he writes the names of children
who are prompt at duty's call,
And the boys who split the kindling and
the girls who never shirk
But rise early in the morning and help
mamma with the work;
And the boys who never grumble when
there's work for them to do,
And the girls who help their mammas
till the housework is all through—
Oh, they needn't ever worry when it's
Christmas time, because
All their names are in the "Good Book"
that is kept by Santa Claus.

Is your name down in the "Bad Book?"
Well, there is still a chance for you,
And if you will listen to me, I will tell
you what to do.
Don't act naughty, don't talk rudely, don't
be noisy, be polite;
Get up early in the morning, and into bed
early at night.
Cheerfully perform each duty, do your
work before you play,
Never put off till tomorrow work that
should be done today.
If you do these things, dear children,
it will please your ma's and pa's,
And your names go in the "Good Book"
that is kept by Santa Claus.

Little Johnny's Fears

WHERE we use' to live, we had
A fireplace big an' wide,
An' all that Santy had to do
Was hold his breath an' slide,
An' squeeze hisself until he fit
The hole, an' then est drop—
An' he knowed where the stockin's was,
'Cause that was where he'd stop.

Where we use' to live, it was
No trick for him to climb
Up to the chimbley on the roof
An' find us, Christmas time;
But now I'm worryin' for fear
He won't know where he's at,
Or mebbe can't get in at all!
We're livin' in a flat!

We're livin' in a flat, an' say,
You mus' be most polite,
Or else the janitor he'll go
An' lock you out at night!
There ain't no chimbley to our house,
Where Santy Claus can slide—
There ain't no fireplace—just a pipe
About two inches wide.

They heat our flat with steam—that's why
I'm afraid he can't get in
With all his toys an' drums an' things,
Unless he's awful thin;
An' how's he go' to wriggle out
When he gets in? Gee whiz!
There's such an awful little hole
There where the sizzle is!

—Chicago Tribune.

HOLLY MAY SOON BE EXTINCT

Popular Christmas Decoration Is Growing Less Bountiful Each Year, According to Reports.

Christmas holly, that merriest and most beloved of all growing bushes, is threatened with extinction, according to a warning sounded by lovers of a red Christmas. Once growing profusely in southern New Jersey and Maryland, it has been swept from those states by the ruthless cutters for the city markets, and must now be sought in the swamps of Virginia and North Carolina, where already the supply is growing less bountiful each year. The Gulf states have been similarly shorn to make holiday for the large cities.

Within another generation, botanists say, holly will be as rare as mistletoe, which used to grow in abundance on the Atlantic seaboard, as far north as Raritan bay, but has now practically ceased to exist as a Christmas decoration. When will the American people learn that the bounty of their fields and woodlands is not limitless?

With sinking hearts nature lovers have long since recorded the disappearance of the delicate trailing arbutus, flower of the Pilgrim maidens, from all woods near large cities. The mountain laurel, which once swept the hills of June with pale pink drifts like naughty clouds running away from the sunset, has now retreated to the remote mountain sides.—New York Tribune.

Cow Lassoes Aged Man in His Yard

Freehold, N. J.—Lassoed by his cow, Frederick Carton of Everet, oldest Civil war veteran in Monmouth county, was nearly dragged to his death by the animal before his son saw his plight and came to his rescue. The aged man, who lost an arm in battle, was pulling weeds in his front yard when the cow, fastened by a chain to a stake, circled around him.

THE AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

BLIND MAN MEETS OLD BUDDY

British Hero, Here to Attend Interallied Veterans' Convention, Recognizes Voice of Former Comrade.

Although he is totally blind, Capt. William Appleby of Great Britain was one of the most cheerful delegates to the Interallied Veterans' association convention which met in New Orleans in conjunction with the American Legion national gathering.

Capt. Wm. Appleby

Captain Appleby was especially happy when the delegation of war heroes stopped in Indianapolis on the way from New Orleans, for only a few minutes before his arrival there he had met, by strange coincidence, a man whom he had not seen nor heard of for twenty-two years, but who was in his regiment, Lancashire Fusiliers in 1900, and who was born only ten miles from him in England. Captain Appleby recognized him by his voice.

As Alfred Ernest Evans, an Indianapolis engineer, walked through the train as a member of the Indianapolis committee to welcome the heroes, he was stopped by an Englishman who asked his name.

"My name, sir, is Evans," he replied.

"Alfred Evans, of the Lancashire Fusiliers?" he was asked.

"Yes, sir. Who are you?"

"Captain William Appleby, your former regimental commander."

And then they began, busily recalling incidents of the South African battles they fought together in 1900.

"I recognized Mr. Evans' voice the minute I heard it," the English hero said.

Captain Appleby lost his sight in the second battle of Ypres. He has also been wounded 29 times. His pretty nineteen-year-old daughter Olga, his constant companion and his "eyes" since he lost his sight, accompanied him on the American trip.

GUDE IS AN EXPERT OARSMAN

Washington (D. C.) Legionnaire, Carries Off Junior, Intermediate and Association Prizes.

It takes years to produce a good oarsman, rowing experts claim, but Granville Gude, a Washington, D. C., member of the American Legion, won one of the biggest national contests after he had been rowing only six weeks, thereby establishing a precedent in the sporting world.

Granville Gude.

Gude won the junior, intermediate and association events in one afternoon with only short intervals of rest between races at the Middle States' regatta.

The Washington Legionnaire is at his best in the sculling races and is expected by his buddies to win a national championship one of these days.

RADIO OUTFIT FOR HOSPITAL

Government Institution at Colfax, Ia., Equipped With Set Provided by Members of Auxiliary.

Patients in the United States Government hospital 75, at Colfax, Ia., are enjoying daily, and nightly, all the good things which come through the air from many broadcasting stations, with a large radio outfit women of the American Legion auxiliary have presented them. And disabled veterans who are at the Bellevue Vocational school near Omaha, Neb., are taking delight in a saxophone, a set of bells, a trombone and a cornet, presented by the same auxiliary—the Department of Nebraska—to complete their orchestra.

In the Iowa hospital, in which there are many Nebraska boys, each bed has been fitted with a receiver, so the patients may listen in at any time, and a magna vox has been installed in each corridor so that all in the rooms off the corridor can hear all the programs.

The Nebraska women also have sent boxes to the disabled veterans in hospitals in Iowa, Nebraska, Kansas and Missouri, and at Denver, Colo., and Fort Bayard, N. M.

Gave Funds for Playgrounds.

After spending two years in acquiring funds for a clubhouse, the American Legion post at Mangum, Okla., decided the children of the town needed a playground worse than the former service men did a clubhouse. Accordingly, the Legionnaires obtained an eight-year lease on a plot of ground and used the fund they had been so long in collecting to purchase playground equipment.

BEST INFORMED LEGION MAN

Columbia (S. C.) Committeeman Up on All Hospitalization and Rehabilitation Questions.

"The best informed American Legion member in this country on all questions dealing with hospitalization and rehabilitation," is the way Alvin Owsley, Legion commander, describes Joe Sparks of Columbia, S. C., newly-appointed chairman of the Legion's national rehabilitation committee.

Joe Sparks.

The ability of Mr. Sparks to co-operate with the United States Veterans' bureau was also named by Mr. Owsley as one of his strongest recommendations. Mr. Sparks' work as Legion liaison representative at the headquarters of the Fifth United States Veterans' bureau district has drawn national attention to such an extent that Legion headquarters has received a flood of telegrams from the North and West urging his appointment since the Legion convention.

During Mr. Sparks' term the Fifth district was rated more than 92 per cent efficient, the highest of all 14 districts. Out of a total of 2,600 patients in ex-service hospitals, 2,100 veterans have been rated total temporary disability and 499 claims are being adjudicated.

Although Mr. Sparks was well over the draft age, he served as a "buck private" in the Fifty-seventh and Third Pioneers during the World war. Mr. Sparks was born in Laurence county, S. C., thirty-seven years ago. Later he went to Columbia, where he got a job as a newspaper reporter. He was city editor of the Columbia State, one of the most influential newspapers in the South, when he enlisted.

Returning from the army, Mr. Sparks became connected with a large New York life insurance company. His work with the Legion has been in Atlanta and in New York.

THAT WELCOME COOKIE JAR

Recent Addition to Hospitals, Provided by the American Legion Auxiliary, Is Welcomed by Veterans.

If you imagine for a minute that the veterans in the military hospitals throughout the country don't appreciate the cookie jars which the American Legion Auxiliary established re-

The Hospital Cookie Jar.

cently, just note the expressions on the faces of these three ex-soldiers.

These veterans are from the Government hospital at Kansas City and the National Military home at Leavenworth. At the present rate of consumption, patients from these two hospitals will have eaten in the course of a year cookies which if placed side by side would extend 12 miles. Some cookies!

NEED OF PHYSICAL EXERCISE

Director of Legion's Americanization Commission Cites Reasons Why Many Were Disqualified.

Most of the physical defects which disqualified almost a quarter of the men examined in the army draft could have been prevented by adequate physical education programs, according to Garland W. Powell, director of the American Legion's Americanism commission.

A prominent medical authority makes the following statements on the subject of draft disqualification, according to Mr. Powell:

"1. Heart disease could be prevented by proper strengthening of the heart through physical activities, removal of physical defects such as bad tonsils and infected teeth. 2. Malformation of the limbs may be prevented to some extent by proper physical activities. 3. Defective vision oftentimes could be prevented by exercise. 4. Undersize would not exist in many cases if there were physical activity and proper instruction in regard to nutrition, preparation of food and the like. 5. Hernia undoubtedly in the majority of cases would be prevented by the development of abdominal muscles. 6. Instruction in care of the feet and selection of shoes will prevent a large proportion of flat feet."

A Little Hint.

Actor—What are the rates at this hotel?

Clerk—Three dollars up. In your case three dollars down.—American Legion Weekly.

TREASURY PAYS BILLION DOLLARS

Huge Amount Is Passed Out During a Single Business Day.

GREAT FINANCIAL OPERATION

Day's Transaction Also Included the Flotation of $300,000,000 and $400,000,000 Treasury Notes and Certificates.

Washington, Dec. 16.—The treasury completed Friday night one of its great post-war financial operations, which included a payment in one day of $1,000,000,000 to holders of Victory notes called for redemption and maturing certificates of indebtedness and in interest on the public debt.

The day's transaction also included the flotation of $300,000,000 in two and one-half year treasury notes and $400,000,000 in certificates of indebtedness, part of which mature in three months and the remainder in one year, and the collection of $275,000,000 in income and profit taxes.

Preliminary figures received by the treasury indicate that subscriptions to the offering of notes and certificates would reach about $800,000,000. This was the basis for statements by officials that the two and one-half year notes had proved attractive as investments. It was said also that the oversubscription indicated a healthy condition in business and finance.

The tax payment proved about equal to expectations, it was said. If that amount were added to the receipts for two issues of government securities, the treasury's ledger theoretically would carry a larger balance.

The outgo for the day, which included $700,000,000 to the holders of Victory notes called for redemption, $200,000,000 to pay off maturing certificates of indebtedness, and $100,000,000 in interest on the public debt is set against receipts of approximately $1,075,000,000.

HERRIN TRIAL IS UNDER WAY

State Scores Heavily in Testimony Produced Against Bert Grace and Otis Clark.

Marion, Ill., Dec. 16.—The state scored heavily in testimony produced at the Herrin murder trial against Bert Grace and Otis Clark, defendants in this case.

Grace, who has been grinning a good deal in court, was positively identified as the man who stood in the road near the Herrin cemetery on the morning of June 22, guarding with a gun six wounded prisoners who lay in the dust with a rope around their necks, the mock of the crowd.

3 SENATORS FACE CONTESTS

Lodge of Massachusetts, King of Utah and Mayfield of Texas Are Targets.

Washington, Dec. 16.—Contests in the next senate for the seats of Senators Lodge of Massachusetts and King of Utah probably will be started by the foes of each, it was learned here, with some chance that the contest against Senator King will be successful. Also the senate leaders are sure that there is little chance for the seating of Senator-elect Mayfield of Texas, who has acknowledged a violation of the state law of Texas in his primary campaign.

FROWNS ON NAVAL PARLEY

Harding Administration Sympathizes With Proposal, but Doubts Feasibility of Conference.

Washington, Dec. 16. — President Harding and Secretary of State Hughes are in full sympathy with the proposal made in the house naval appropriation bill that the naval powers takes steps to limit auxiliary tonnage in precisely the same way as capital ships were limited under the Five-Power Naval treaty, but they do not believe that the time has yet come for another conference.

LAW BACKS BALFOUR NOTE

British Premier Admits in Commons Tories Switch on the War Debt Plan.

London, Dec. 15.—Premier Bonar Law in the house of commons declared frankly for the policy of the Balfour note, which advocated an adjustment of the inter-allied debts by an all-around cancellation, with England surrendering her share of reparations to be paid by Germany.

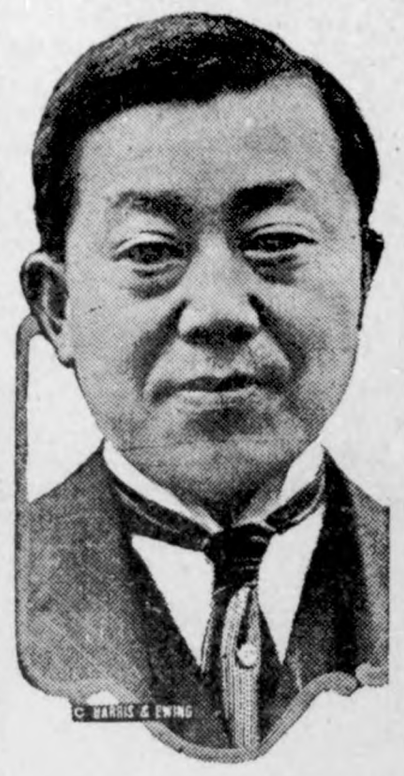
Anti-Tax-Exemption Measure Gains.

Washington, Dec. 16. — Privileged status was granted by the house rules committee to the Green resolution proposing a constitutional amendment to prohibit issuance of tax-exempt securities.

Calls Cuba Big Alcohol Source.

Havana, Dec. 16.—Louis Maspons, chief internal tax collector, declares Cuba could annually produce 200,000,000 liters of industrial alcohol, drawn from the sugar crop, to competa against gasoline.

MASANAO HANIHARA



Masanao Hanihara, now vice foreign minister, has been selected as Japanese ambassador to the United States to succeed Mr. Shidehara. He was a member of the Japanese delegation to the Washington conference on armament.

ASKS NEW PROGRAM

House Committee Fears Old Naval Competition.

President Harding Is Urged to Call Another Disarm Parley—Would Limit Small Craft.

Washington, Dec. 14.—Blunt notice that the United States cannot avoid a new naval program in swift cruisers and fleet submarines unless treaty limitations are extended to such craft was served by the house appropriations committee in reporting the $293,806,538 naval appropriation bill. A six-line provision placed in the bill by the committee requested President Harding to negotiate with Great Britain, France, Japan and Italy for such an extension of the treaty, limitation of aircraft to be included. The bill provides for an enlisted personnel of 86,000.

The committee report said large cruisers and submarine programs were planned abroad, saying:

"In other words, competition is on again in the single direction to which the unratified Washington naval treaty does not extend, and if it be allowed to go on unchecked, the purse strings again must be relaxed and this government, like all others, will be constrained to launch a new program to keep us at least abreast of any of the other powers."

TAKE ARMY MAN FROM BRIDE

U. S. Officer Shackled by Three Indiana Officials—Seized on Bigamy Charge.

Chicago, Dec. 15.—Three armed men overpowered Capt. Charles Pike, U. S. army, attached to the U. S. Marine hospital, and, while his bride of six weeks stood helpless and dazed from a blow by one of the three, shackled him and drove him away in a taxi "bound for Indiana."

It was several hours after the kidnaping before it was definitely learned that the kidnapers were Indiana officials serving a warrant for bigamy issued by Justice of the Peace Howard Kemp of Crown Point, Ind.

AMERICA TO AID EUROPE

President Is Said to Have Told Clemenceau America Is in Helpful Mood.

Paris, Dec. 16.—Promise of American arbitration on the reparations problem, involving a complete reversal of the administration's foreign policy, including the practical promise that America will annul the allied war debts if the arbitration is accepted, is the personal message from President Harding that Clemenceau is bringing to France, it is said here.

KLAN THREATENS GOVERNOR

Indiana Executive Receives Menacing Letter Purporting to Come From Gary Ku Klux.

Laporte, Ind., Dec. 16.—A letter, purporting to come from the secretary of the Ku Klux Klan at Gary, threatening the life of Governor McCary, was turned over to federal and state authorities for investigation.

Cosgrave Spurns Peace Offer.

Dublin, Dec. 16. — President Cosgrave of the Irish Free State informed the Cork harbor commissioners he would not aid them in their effort to have the dail appoint a peace committee to deal with republicans.

Tsingtao Almost Ruleriess.

Tokyo, Dec. 16.—The Japanese consul at Tsingtao, Shantung, which Japan has just returned to China, reports the city is practically without government, but the bandits have removed from near the city.

BANKERS PLAN GERMAN RELIEF

Teuton Nation Is Near Complete Collapse, Says Bonar Law.

FINANCIERS TO FLOAT LOAN

International Banks Propose to Raise Billion and Half Dollars With American Aid—J. P. Morgan Sees Secretary Hughes.

Washington, Dec. 15.—The floating of an outside loan of approximately a billion and a half dollars, through the agency of the international bankers, is under consideration as the only visible way of saving Germany from going over the precipice, and of staving off the acute reparations crisis which is hanging over the chancellories of Europe.

American bankers and the United States government are taking a direct interest in the loan project, and it was learned that J. P. Morgan's visit to Washington and his conference with Secretary of State Hughes was connected with the reparations situation, the acute crisis in Germany and the plan for a mammoth loan.

Mr. Hughes refused to state what question he had discussed with Mr. Morgan, but the evidence was overwhelming that the loan question has again come into the foreground of the situation, that the international bankers are considering ways and means of raising it and are seeking the active co-operation of their respective governments.

London, Dec. 15.—Germany is very near complete collapse, Premier Bonar Law declared in the house of commons. The premier made this statement in the course of an outline of the British reparations policy. He said that French finance was based on the expectation of receiving the large sums of money promised by Germany, but at the end of the moratorium they found they were more unlikely to get anything than they were at the beginning.

The French view was that Germany, by currency inflation, had deliberately avoided payment.

STEAL FORTUNE IN JEWELS

Two Bandits Raid a Downtown Chicago Office and Escape With $102,000.

Chicago, Dec. 14.—While the corridors were thronged with people two men entered the offices of James E. Harrison, diamond broker, room 707, Chicago Savings Bank building, State and Madison streets, shortly after five o'clock Wednesday evening, bound and gagged Harrison, cut the telephone wires, and escaped with $100,000 worth of unset diamonds, gold and platinum mountings, and $2,000 in cash.

RETAINS OLD CONSTITUTION

Proposed New Instrument Is Rejected by Illinois Voters by Staggering Majority.

Chicago, Dec. 13.—Illinois voters rejected the proposed new constitution by a staggering majority. Throughout the state it was snowed under in a blizzard of ballots. Nearly complete figures indicate that it was turned down by a majority of 700,000. Indications are that it was nearly a 5 to 1 defeat in the entire state. Chicago rejected the proposed constitution more than 17 to 1.

FOR CONSTITUTION CHANGES

Senate Subcommittee, Presided Over by Senator Cummins, Indorses Three Amendments.

Washington, Dec. 15.—Proposed constitutional amendments to permit federal child labor legislation, control expenditures of candidates for office and provide a presidential preference primary were indorsed by a subcommittee of the senate judiciary committee, presided over by Senator Cummins. Efforts will be made to have all three amendments adopted at this session.

EIGHT PERSONS DIE IN WRECK

Passenger Train Sideswipes a Switch Engine at Humble, Tex.—Twenty Were Injured.

Houston, Tex., Dec. 14.—Eight persons were killed and twenty others were injured when passenger train No. 28 of the Houston East and West Texas railway sideswiped a switch engine in front of the depot at Humble, Tex., Wednesday night.

U. S. Has Half World's Gold.

Washington, Dec. 15.—The new year will find the United States possessor of about 50 per cent of the world's entire gold, treasury officials said. Uncle Sam has cached in his vaults nearly $4,000,000,000.

Ten Held Under Bond.

Freeport, Ill., Dec. 15.—Ten men arrested in connection with the alleged looting of soldiers' barracks at Camp Grant were held under bond before United States Commissioner Stanley M. Vance.

AFRAID OF SANTA

Black Tots at African Mission Make for Place of Safety.

Presents of Apparel and Sweets Bring Confidence to the Men, Women and Kiddies.

AN AMUSING story of how Santa Claus frightened the black children at a mission station when he first appeared to them a few years ago, is told by the wife of a missionary stationed at Bailunda, Africa. They had celebrated Christmas at Bailunda before, but they never had had Santa Claus; so Mr. Stover, the missionary, dressed up as good Saint Nick.

"He had been padded and powdered and packed until his own mother would not have known him," Mrs. Stover afterward related. "Presently we gave the signal, the door flew open and in walked Santa Claus. But, dear me! What consternation! He was greeted with shrieks and groans and cries of 'Let me out! It is the evil one. It is the day of judgment!'

"The urchins, catching the infection of terror from the older black people, fled to their bedrooms, fell down upon their faces, crept under chairs and tables—anywhere to hide themselves. Poor old Santa Claus never had such a greeting before. As soon as he realized the panic he had caused, he tore off his tall hat and white cotton beard. Then from the bags on his back he began to throw gifts right and left and to tell who he was.

"Reassured once more, everyone as soon laughing and chatting, munching the great 'red breads' (doughnuts), tasting their fruits or nibbling at the sweets from the familiar little bags. One man wondered which end up he was to hold the fork Santa Claus had given him. Another immediately tried on his new shirt. The girls arranged their bright-hued handkerchiefs into turbans, while others sought to find some place about their scanty clothing where they could stow away their bunch of bread, as well as the paper of needles and cake of soap given to each.

"It seemed as though everyone tried to talk louder than his neighbor as they examined the costume of Santa Claus, whom they now no longer feared. One man said that he thought it was John the Baptist; another that it was Elijah returned. Yet another thought it was Satan himself.

Hanging Pictures.

In hanging pictures don't "sky them." A picture should be hung so that its center comes just on a level with a person of average height.

OLD YULETIDE CAROLS

"Holy Night" Regarded as One of Most Beautiful Songs.

"Draw Nigh, Immanuel," One of Oldest Pieces and Far Antedates Any Others.

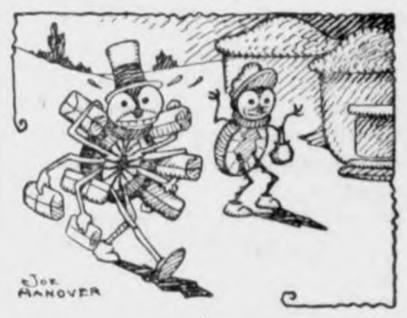
THE ancient Christmas carol, "Holy Night" is German in its origin and is considered by many persons to be the most beautiful of all Christmas carols. It has sometimes been ascribed to Martin Luther, but the consensus of expert opinion is that it is much older than his time and is one of the oldest of German folk songs.

The carol "God Rest Ye Merry, Gentlemen," is English in its origin and dates back to about the beginning of the Seventeenth century, although the author of the words and the composer of the music are unknown. The fine old melody sung to this poem possesses all the best qualifications of a sterling hymn tune and will probably last as long as the verses with which it is always associated.

The carol "Draw Nigh, Immanuel," is one of the oldest pieces of coherent music in existence, and both the words and music far antedate any of the others. The music is an old French melody, dated from the Thirteenth century, although, of course, it has been harmonized to conform with more modern standards.

There is a most curious but beautiful musical effect at the close of this carol. The words of "Draw Nigh, Immanuel," are about 100 years older than the music, being taken from the Mozarabic breviary of the Twelfth century, and it is generally believed that they were taken from the liturgy of the early Christians at Toledo, Spain, where the Mozarabic breviary was formulated.

Another carol, "The First Noel," has a traditional French melody and probably originated in Breton, although the exact origin of this fine old song is somewhat in doubt.



VERY USEFUL

Mrs. Bug—My I am glad I married Mr. Spider. He can carry so many bundles, when I do my Christmas shopping early.

THE HOLY MANGER

"Presipio," Instead of Christmas Tree, in Italy and Spain.

It Is Representation of the Place Where Baby Christ Lay in Bethlehem.

GIRLS and boys of Italy and Spain, which are called the Latin countries, never hang up their stockings at Christmas time, nor do they have Christmas trees. Kris Kringle and Santa Claus are German saints and the Christmas tree came out of the German forests long, long ago, when the nations of northern Europe were forest tribes. It is the northern peoples—the Germans, Scandinavians and English, all of whom are descended from old Teutonic tribes—who keep Christmas as Americans do.

Instead of the Christmas tree, Italian and Spanish boys and girls have the presipio. "Presipio" means manger, and it is a representation of the manger where the baby Christ lay in Bethlehem. It is presented in different ways. Sometimes it shows only the inside of the barn where the Baby and His mother lay, with Joseph, the Three Wise Men and the animals about. Sometimes it shows a hillside, with the Wise Men coming on foot or horseback, or on donkeys, bringing their gifts to the stable. Sometimes the manger is small—not more than a foot square. Sometimes it is large enough to occupy the whole end of a room. It is built on a board foundation and is made of wood, with earth, pebbles, dried grass and leaves for the outdoor scenes. The figures are carved of wood, or perhaps little dolls are used, all very carefully and elaborately dressed by the girls. Sometimes brooks and lakes are ingeniously represented with paper, glass or isinglass. Sometimes the whole is rough and rude, but again it is very neatly and beautifully done, and is quaint and interesting when all complete.

The French, who are half Latin and half Teutonic in their makeup, mix the customs of both races in their Christmas keeping. They build the manger and they also give the children presents; only, instead of hanging her stocking, little French Babette puts out her shoes. The French call the manger "creche," and in country villages in France companies of children still go from house to house on Christmas eve, carrying the creche and singing Christmas carols. Sometimes they help to build a beautiful large creche in the village church, over which they are very proud and delighted.

First National Bank

"The Bank for Everybody'."

SHERIFF'S SALE

FIRST NATIONAL BANK, KANAWHA, IOWA.

vs.

HENRY KAMP & KATIE KAMP.

NOTICE IS HEREBY GIVEN, That by virtue of a Special Execution issued out of the office of the Clerk of the District Court, in Hancock Count, on a judgement rendered December 6th. 1922 Term of said Court A. D., for the sum of Eight Thousand Nine Hundred seventy six & 85-100 Dollars debt, and Two Hundred Fifteen & 25-100 Dollars costs, in favor of The First National Bank, Kanawha, Iowa, and against Henry Kamp & Katie Kamp, and to the Sheriff of Hancock County directed, I have levied upon the following described property, to wit:

One Promissory note for $7,500.00 dated March 1st, 1920, and due March 1st 1925, with five coupons thereto attached, And one note for $2,000.00 dated Feby. 14th, 1920, and ue March 1st, 1922 with two coupons attached, Said notes being signed by C. H. Paekard & Nellie E. Packard, and secured by mortgage on the following described real estate, situated in Wright County, Iowa, The South Half of the Northwest quarter, and the Northeast quarter of the Southwest quarter of Section Two. Also the South Half of the Northeast quarter o Section Three, All in Township Ninety Three, North Range Twenty Six, West of the 5th P. M. In Wright County, Iowa.

NOW, THEREFORE, Public Notice is hereby given that I shall, on the 30th day of December 1922, at 10:30 o'clock A. M., at the front door of the Court House, in Garner, in Hancock County, offer and sell at public outcry, to the highest bidder for cash, all the right, title and interest that the above named Henry Kamp & Katie Kamp had on the 6th day of December A. D. 1922, or now have in and to the above described property, or so much thereof as is necessary to satisfy said execution, together with costs and all accruing costs, unless the same shall be sooner satisfied.

Dated at the Sheriff's office in Garner, this 7th day of December, A. D. 1922.

E. P. HANSON,
Sheriff of Hancock County, Iowa.

(D21-28)

Mrs. Ludwig, who had been visiting for a few days at the home of her daughter, Mrs. E. S. D. Kahrs, returned to her home at Nevada, Ia., last week Thursday.

Sheriff E. P. Hanson, of Garner, was a business caller in Klemme and vicinity Tuesday.

WANTED—200 men, who are in arrears on their subscription to pay the Klemme Times. Thank you.

Mr. and Mrs. Elmer Fuller drove over from Clear Lake last Thursday for a visit with Klemme friends.

Mrs. Herman Barz's sister, who had been visiting her, left for Minneapolis to spend the holidays.

There will be a basket social on Jan. 5th at Liberty Center school. Good program. Ladies bring baskets. Ruth E. Lenz, teacher.

A fine baby boy was born to Mr. and Mrs. Paul Grange this morning. Paul and wife are delighted with the nice present Santa Claus brought them.

What's the use to pay 45c to 50c per pound for package Coffee when Wellemeyer's "Bonnie Brew" has them all beat at 2 lbs. for 75c. adv

The Des Moines Daily Capital at $3.50 per year, old or new subscribers. Order at the Times Office now as this offer will not last long.

Mr. G. Gobelei came last week from Butler County for a visit with his children who live between this city and Meservey.

Mrs. George Hake went to Belmond last Friday, the occassion being her father's birthday. She returned in the evening.

Elwyn Stabbler, of Charles City, came Saturday for an over Sunday visit at the Joe Starnes home near Klemme.

Fannie and Carl Heginger went to Shell Rock, Iowa, last week Wednesday, where they will visit with relatives and friends.

Mr. and Mrs. C. J. Papousek, of Belmond, were Sunday visitors at the home of Mr. and Mrs. Ed. Jacobs

Ben Halford's sale was held last week Thursday as advertised and as we gather it, the sale was well attended and stuff brought fair prices.

Mr. and Mrs. Curtis Luick came over from Goodell last Thursday to do some shopping and also found a little time to visit their friends in this city.

The Times Office installed a power saw this week. We use it in a great many ways and it is convenient for cutting linotype slugs, wood and metal bases, leads, rules, etc.

Mr. and Mrs. Charles Papousek of Belmond were in Klemme Saturday. "Pap' was doing some electrical work and Mrs. Papousek visited at the home of her brother, Ed. Jacobs.

The Ladies Aid Society of the M. E. Church met at the home of Mrs. R. A. Jorgenson last Thursday. Refreshments were served by Mrs. M. O. Barr and Mrs. Jorgenson.

The evangelists who had services here the past month will conduct a campaign at Alexander beginning on January 1st.

Mike Haskins was here yesterday from Garner to make his monthly round of meter readings. Mike usually finds time to spend a few minutes kidding the Editor of this outfit.

R. A. Jorgenson and family were Sunday visitors at the Jorgenson home at Garner. Mrs. J. Jorgenson leaves Friday for South Dakota to spend Christmas on her son John's ranch.

John Peterson, the evangelist singer, up to this time, is still in Klemme. John must like the climate here—or more possibly pretty Klemme girls are more to his liking.

Rev. M. L. Metcalf, the evangelist who has been conducting services in Klemme for the past four weeks, left Sunday night from Belmond for his home at Sioux City where he will spend the holidays with his family. Herb Bailey took him to Belmond after the services Sunday night.

Wellemeyer sells a remedy for Chilblains and Inflamed and Tender Feet, due to frost bite and extreme cold exposure. Spend 40c with Wellemeyer's for a bottle of this Chilblain Lotion and you will thank us for calling your attention to this wonder remedy. adv

Chris Gram has also been bitten by the radio bug and has a radio receiving set installed at his house. There are a number of other Klemme people who are catching the disease and no doubt they will soon be grabbing concerts out of the air on their own outfits.

Read the following unsolicited testimonial, "I have used Dr. Scholls Chilblain Lotion for several years. If the Public only knew the relief to be found in each bottle of this wonderful remedy they would break down the door of the Wellemeyer Store in their eagerness to enter and buy." (Signed) C. L. Blumer. adv

Christmas tree programs have all been planned for the churches of Klemme. The Liberty Church west of town will have their program on Saturday evening. The Refomed Church of Klemme will have their program Sunday evening. The First Methodist and the M. E. Church will have their programs on Mondap evening. All are invited to attend the programs.

The Christmas rush is certainly on in Klemme and the merchants are busy every day. All the stores have a fine showing of holiday goods and are as good as can be found any where and we note that the prices this year are very easonable and a dolla spend with a Klemme merchant goes a long ways this year. People are beginning to buy more useful and practical gifts we have noticed, which is a most excellent idea. Only a few more days to shop—buy your goods in Klemme and we will guarantee that you will save dollars.

ATTENDING AUCTION SCHOOL

Otto C. Schroer has bee nin Chicago for several weeks where he is attending the Jones National School of Auctioneering. He is studying farm personal property valuations, live stock judging and reading of pedigrees and taking a complete course in Auction salesmanship in all its many branches, including the farm and stock sales, horse and mule selling, and Real Estate and Merchandise selling.

Mr. Schroer's many friends and acquaintences predict that he will make a good success as an auctioneer. He will soon finish School and return and activily enter the field of auctioneering here. adv

The Klemme schools will enjoy a two weeks vacation over the holidays. Go to it kids and have a lot of sport. This is the best time of the whole year to have outdoor sport of all kinds. "The days of real sport."

DEPARTMENT STORE

The Season's Greetings

During the Festive Season of mistletoe and holly and all its glad and joyful associations, it is truly befitting that we should acknowledge with sincere gratitude our heartfelt thanks for the loyal support of our many friends and customers.

It has always been our desire to be worthy of this support. We have earnestly endeavored to abide with truth, justice, and square dealing in all our transactions, and whatever mistakes we have made have been of the head and not of the heart.

To be engaged in a business that is of real service to mankind is truly a worthy calling. It is our aim to be of service to you; to provide you with efficient labor saving farm machines, so that you in turn may provide the prime necessities of life for the world. Yours is indeed a noble calling.

Our Yuletide wish is that all may have a Merry Christmas, and prosperity even to a greater measure than ever before.

NEARBY NEWS FROM AROUND THE STATE

CLARION TO PAVE

The city council of Clarion has taken active steps towards arranging to pave the main part of the town. In all about 50 blocks are scheduled to be paved. An engineer has been employed and is now on the job laying out plans. It is understood that the present session of the court will chop off a mile on the east and one on the west of the city limits, turning it back to the county, and the county will then proceed to gravel the extra two miles of road. This will make a vast improvement to the county seat, as the roads over there have been a nightmare for years, and the standing joke of every motorist in the county.—Belmond Independent.

The busines men of Britt have formed an athletic association. The object of the new stunt is to have the men meet two or three times a week to enjoy indoor sports such as indoor baseball, volley ball, etc.

Printer Freezes Ears

Louis Africa, who is employed as linotypist on the Clarion Monitor, is spending the week at the home of his parents, Mr. and Mrs. Howard Africa. Louis froze both of his ears last Thursday night and it is necessary to have them dressed by a physician every day, besides other care, he is not working at present. He expects to return to Clarion Monday evening.—Kanawha Reporter.

WHIPS CHILD. MOTHER TO JAIL

Court Fines Her $5 Per Lash She Gave Her Kid

Quincy, Ill., Dec. 28.—Five dollars a lash for twenty lashes inflicted on her five year old son, whose back and arms bore evidence of a beating, and three months in jail was the penalty prescribed by the County Judge Charles Nauret on Mrs. Jane Hunsaker, mother of the lad. So severely was the boy punished he was taken to a hospital for treatment. His offense, his mother admitted, was the loss of a shoe button.

"I only wish," said the court. "that the law permitted tying you to a post and treating you the same as you did your little son."

DAD PAYS FOR THE TICKETS

Pays Children's Movie Tickets But He Don't Know It

Huron, S. D., Dec. 28.— The Huron mother or the children of the family, never bother to ask father for a dime to go to the movies with when they think there is a chance of their being refused. Instead, they ask father to bring home one, two or three quarts of milk for the lunch. Then after lunch, they take the empty bottles back to the dairy depots and collect ten cents for each —perfectly legitimate grafting on dad, who never suspects why there is such a demand for milk at his house.

"Isn't it great," said little Mary tko her oldest sister, Sue, "that the dairies are conducting this campaign to use more milk in the home? I'll bet the movies are behind that campaign and run those slides for nothing." Then she grabbed an empty milk bottle and started up town.

There are millions of good people in this country, but the bad ones make most of the noise.

CHICKEN THIEVES USE GAS

The slick way that chicken thieves have of picking the choicest and the fattest hens from the roost has been more or less debated, and was recently solved at Sleepy Eye, Minnesota, in a way that had been expected. The crooks use gas. At Sleepy Eye eight hogs were stolen and it was found they had been stupified by gas. Even the dog had been rendered harmless by this method. By injecting the gas into the hen house the chickens are rendered partially unconscious, and it is an easy task to pick the best ones without a squawk to give the alarm.

MORE MEN AT WORK IN IOWA THAN FOR MANY MONTHS

Employment conditions in Iowa now stand at normal for the first time in several months, the increased building activities and the demand for cornhuskers having absorbed virtually all of the surplus labor, according to the federal Department of Labor.

Numerous industries throughout the state which curtailed employment in late October and November because of inadequate transportation are slowly returning to normal, and a brisk demand for labor exists in other quarters, the eport indicates. Normal employment obtains in the packing plants, while increased employment is noted in the railroad shops.

The popular indoor sport at the Frank Shearer home last Saturday was that of their daughter Doris stuffing her ears with bits of the Livermore Gazette paper. In this case the Gazette failed to circulate, however, and stuck right there. She was rushed to Dr. Bowe's office, who reports that he had a difficult job removing them. Without doubt it was the advertising portion of the Gazette, which always sticks when it is properly placed.— Livermore Gazette.

It is reported that Humboldt College, standing just north of the town of Humboldt, is about to be sold to the Lutherans who will use it for an old folks home. For the last few years the college has not been running and the buildings will need some overhauling. An orphange may be built and maintained there too, in conection with the old folks home.

WILSON—BUSS

Last Thursday a quiet wedding occurred when Miss Lurley Wilson was united in marriage to Mr. Hary E. Buss, both of this city. Rev. A. B. Gedye performed the wedding ceremony.

Immediately after the wedding the couple left on a honeymoon trip for Wisconsin and othr points for a weeks visit with relatives.

Both of the contracting parties are well known here. The Bride is a teacher of one of Klemme's rural schools and is a fine young lady. She is a sister of Mrs. Ben Coobs and a daughter of Mr. and Mrs. Wilson, former Klemme people, but who now reside in Indiana.

The Groom is one of Klemme's young business men and is a partner in the Coobs & Buss Garage of this place.

The Times joins with their many friends in wishing them much joy and happiness.

NEW SLED LAW BECOMES EFFECTIVE JANUARY 1st.

Sleigh Runners Must Be Of Standard Width After Jan. 1st, 1923

While the sled law that goes into effect January 1s' may work a slight hardship on some it will surely benefit the many as sleds will be the same width as the standard wagons and cars. Below we give the law so that our subscribers may familiarize themselves with it.

"Sleighs—standard width, unlawful use. On and after the 1st day of Jan, 1923, is shall be unlawful for any person, firm or corporation in the state to sell any new or irst hand draft sleigh, sled or bobsled, to any person or persons residing in this state for use herein, unless the runners of such sleigh shall measure from center to center, four feet and eight inches, and after such date it shall be unlawful for any person or persons to use upon any of the public highways of the state any such sled, sleigh or bobsled purchased at first hand after said day of January, 1923 unless runners shall measure from center to center four feet and eight inches."

However, this does not mean that farmers who still own narow runner sleds must have them altered to correspond to the new law, as we understand it. It will perhaps be many years before all the sleds will be the standard width. Also, the law will not prohibit a farmer from selling a used sled to another farmer at a public auction.

We have read many comments on the law in the papers, but the law is quite clear as to the use of new bobsleds.

THEY SHOULD BE EASILY FOUND

Thieves Steal Skunk Skins Valued At Over Two Hundred

The meanest man, or men, has been heard from but not apprehended. During the night of Wed., skunk skins, mink and other furs that Sam Noodle had bought in the ordinary lines of his business, as a dealer in furs, junk and the like, were stolen from the barn on his premises at Ackley, Iowa, in which the skins and furs were kept.

The theft was reported to the myaor and marshall. Close investigation of the premises was made, but there is nothing to indicate who might be the thief.. The thief or thieves were traced a short distance, but lost, as they left in a vehicle.

The value of the skins and furs is placed by Mr. Noodle as in excess of $200.00.

LEE COUNTY MAN CLAIMS HUSKING HONORS

Louis Curly of Lee county claims the corn husking championship of Iowa, as the result of his winning in competition with the winners of three district contests at the Ankeny fair recently. His average was 15 bushels an hour under conditions said to have been unfavorable, the corn running 170 ears to the bushel. Curley won a $50 prize offered by a farm magazine and $10 offered by the fair association. In addition he took the $50 prize for the best husking average for nine and one--half hours, making 21½ bushels an hour in a certified contest in Lee county. He may or may no be the champion corn husker but if he picks that much no one will gainsay the fact that he is some husker.

ACTIVITIES OF THE HANCOCK COUNTY FARM BUREAU

FARM BUREAU WILL HOLD ANNUAL MEET JAN. 5

The annual meeting of the Hancock County Farm Bureau will be held at the Coliseum at Britt, January 5th, beginning at ten o'clock A. M. Dr. J. E. Brindley, of the Iowa State College, has been secured as the principle speaker and there will also be a lady speaker. Dr. Brindley is recognized as one of the leading tax experts of the country and will go into a detailel explanation of how the taxes are levied, the diferent kinds of taxes and a description of what the money tax is spent for. His lecture will be of a constructive educational nature, and something that vry prson in Hancock County should hear.

W do not know dfinitly at this time who the lady speaker will be. but it will b someone who is interested in the Farm Bureau work. The women have never taken part in the annual meeting before, but it is hoped that w have a good attendance this year. Arrangements are being made whereby dinner will be available at 50c a plate.

Following is the program as has been arranged:

10:00 A. M. Call to ordr and short talk by Pres. A. O. Christensen.
Reading of minutes of last year's meeting.
Report of Secretary Anthony Baker.
Report of Treasurer Ren Smith.
Repot of Auditing Committee.
eport of County Agent.
Short talk by Mrs. E. J. Schnieder. of Goodell, County Chairman of Women's Work.
Address by lady, name to be given later.
12:00—Dinner.
1:00 P. M. Address on taxes by Dr. J. E. Brindley, of Iowa State College, Ames.
Report of Amendment Committee.
Report of Resolution Committee.
Election of Officers.
Adjournment, after which there will be a meeting of the newly elected Board of irectors and Officers.

DRESS FORM DEMONSTRATORS

Miss Avis Talcott of Ames was in the county December 21st and 22nd, conducting dress form demonstrational training schools. One meeting was held at Britt and one at Garner. This work is being put on by the Hancock County Farm Bureau, and the aim of the two meetings was to take care of the entire county.

Two representatives were selected from each township to take the training. Six of the eight townships attended the Britt meeting and seven attended the Garner meeting. The women were so trained that they were capable of demonstrating the making of dress forms to the other women of their townships. Representatives who took the work will train a class of women from different districts in their townships, and these women in turn will demonstrate to the other women of the communities. This method makes it posible to cover the entire county and give the information to all who want it.

There were only three townships not represented at the meetings and the work can be demonstrated in these townships by a team from some other township. The folowing representatives attended the Britt meeting, and with their helpers, will demonstrate the work in their townships Mrs. O. E. McCall, Bingham; Mrs. M. C. Gahan, Orthel; Mrs. Wm. Nall, Boone; Mrs. Fred Oxley, Magor; Miss Alberta Matson, Crystal; Mrs. A. R. Lewiston, Erin. The following attended the Garner meeting and wil cary on the work in their respective townships: Mrs. Chas. Grau, Garfield; Mrs. John Goll, Jr., Liberty; Mrs. Fred Knoll, Concord; Mrs. Chas. E. Smith, Ell; Mrs. F. R. Chase Avery; Mrs. L. G. Hallett, Madison; and Mrs. E. J. Schneider, Twin Lake

These forms can be made at an approximate cost of $1.00, and they will prove very valuable in dress making.

—By County Agent, L. T. Nutty.

METHODIST EPISCOPAL CHURCH
Arthur B. Gedye, Pastor

M. E. CHURCH. x

Morning worship at 10:00 o'clock.
Sunday school at 11:00 A. M.
Evening worship a 7:30 o'clock.
Cottage prayer meetings Tuesdays and Fridays at 7:30 P. M.
Christmas Sunday services were well attended.
The W. F. M. S. Society met at the home of the president, Mrs. A. Gimer on Thursday afternoon.
Friday evening the First Quarterly Conference will be held in the church at 7:30 P. M. Every member of this church business meeting is urgently requested to be present.
Sunday morning the Sacrament of the Lord's wil be administered.

—Arthur B. Gedye.

FIRST M. E. CHURCH
W. C. H. Bergmann, Pastor

We have heard it said, "All is well that ends well." Let us make the last Sunday and the last day in the Old Year a great day. Great, because of lasting benefits it will bring to us. Great, because throughout the years of life we shall rejoice over memories that have their beginning in Sunday, Dec. 31st, 1922. Every member and friends of Christ's Church should be in his or her respective place of divine worship on that day.

Morning sermon at 10:00 o'clock.
Sunday school at 11:00 o'clock.
Epworth League at 7:30 P. M.
Watchnight service beginning at 8:30 P. M.

We invite you all to the Watchnight service. Several persons will speak on very vital subjects. Come and get "new points" for your best New Year's resolutions.

They are free to all.

—W. C. Bergmann.

IOWA HAS BIG CORN CROP

Second Largest in the History of the State of Iowa.

Iowa's record corn crop, estimated at 473,800,000 bushels, was cribbed in 1920. Last year's yield was placed at 444,190,000 bushels, and now we have the November estimate.

This year's crop it is estimated wil amount to 455,535,000, and at the price of 52 cents a bushel represents $225,095,000.00. It is just one crop in Iowa, and gives a fair indication of the way in which money 'is made' in this great agricultural state.

The AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

URGES BUDDIES TO PAY DUES

Major General Tyndall, National Treasurer, Advocates Financial Independence.

Credit of the American Legion's sound financial standing is given by Legionnaires to Maj. Gen. Robert Tyndall of Indianapolis, recently reappointed national treasurer of the ex-service men's organization.

Robert H. Tyndall

At all national conventions and Legion gatherings of various kinds, General Tyndall has insisted upon the adoption of a financial policy whereby national headquarters shall be able to stand upon its own feet without incurring any outside obligation forcing the Legion to lose a bit of its independence and freedom of action.

General Tyndall's message to Legionnaires this year is a reiteration of his advocacy of financial independence with a request that Legion members pay their dues early in order that the posts may find themselves free to carry out the program of relief for disabled, Americanism and other important measures. General Tyndall believes that too much energy is expended in the collection of dues which should be paid to the post finance officer upon notification of the member.

The military career of General Tyndall dates back to 1897, when he enlisted as a private. He served in Porto Rico during the Spanish-American war, on the Mexican border as commanding officer of the One Hundred and Fiftieth artillery of the Forty-second (Rainbow) division in the World war, participating in all major offensives. He now commands the Thirty-eighth National Guard division.

HELPED WIN THE WORLD WAR

National Vice Commander, of Wyoming, Typifies Spirit of the West in Great Conflict.

Chiles P. Plummer of Casper, Wyo., national vice commander of the American Legion, typifies the spirit of the West in the World war. Although he was thirty-eight years old at its outbreak, he couldn't stay out of the scrap. So he threw away his four-gallon chapeau and donned a campaign hat, spending twenty-two months in the service.

Chiles Plummer

Mr. Plummer served as captain of artillery in the One Hundred Sixteenth ammunition train, composed of two battalions of the old Third Wyoming infantry, remaining fifteen months in France, where his organization was a part of the Forty-first division.

An organizer of the George Vroman post of the Legion at Casper, Mr. Plummer served as its first commander. He was active in outfitting clubrooms for that post and in its general development. A fighter for the rights of disabled ex-service men, Mr. Plummer's activity in their behalf obtained national recognition, resulting in his election as national executive committeeman, and later as national vice commander. He is a lawyer, was educated at the University of Illinois and is proud of the fact that he is a fraternity brother of Alvin M. Owsley, Legion national commander.

NOT TO ASK RED CROSS AID

American Legion Posts Will Not Request Funds in the Hands of the Local Chapters.

Funds in the hands of local chapters of the American Red Cross will not be asked for by American Legion posts, according to Lemuel Bolles, Legion national adjutant.

"The American Red Cross is co-operating with the American Legion in every way in the furnishing of funds for service to the sick and disabled, and in many localities is furnishing direct relief to service men and their families," Mr. Bolles said. "Funds in the hands of local chapters of the American Red Cross should not be confused with the residue funds of the war chest, or other emergency war organizations which, during the war raised money for work among soldiers and sailors, but which ceased to function at the conclusion of hostilities."

Based on court decisions at Athens, O., and Vevay, Ind., the Legion has directed its posts to obtain all funds in the treasuries of emergency organizations which are no longer concerned with relief of World war fighters.

ACTIVE IN LEGION AFFAIRS

National Vice Commander Cocke of Georgia Gets Results With His Financial Policies.

Rehabilitation of disabled ex-service men, and the establishment of sound financial policies have been the hobbies of E. Earle Cocke of Dawson, Ga., national vice commander of the American Legion.

E. Erle Cocke.

Mr. Cocke was one of the founders of the Georgia department of the Legion and has been active in Legion affairs ever since. Serving as a member of the state executive committee, he advocated a financial policy which was largely responsible for Georgia's obtaining the largest membership increase of any department during 1922. Mr. Cocke is alternate national executive committeeman from Georgia and represented his state on the committee at the Legion convention in New Orleans.

Mr. Cocke was graduated from the University of Georgia, where he was manager of the football team and was prominent in college activities. He was professor of mathematics and athletic director at the Eleventh District Agricultural college and later at Gordon Military college.

During the war, the Legion officer served as a second lieutenant with the Sixteenth Machine Gun battalion in the Gerardmer sector of the Vosges mountains, a defensive sector and in the Meuse-Argonne offensive. Since discharge he has been state editor of the Macon (Ga.) News and managing editor of the Athens Banner. He is now a farmer and real estate man.

HONORS FOR TWO AMERICANS

Louisiana Men Are Named as Honorary Members of the Belgian Veterans' Legion.

The signal honor of being made honorary member of the Belgian Veterans' Legion came to Clarence J. Bourg, Louisiana American Legion national executive committeeman, and Mayor Robert Mouton of Lafayette, La., during the Interallied Veterans' association convention in New Orleans. There are only five honorary

Clarence J. Bourg and Mayor Robert Mouton.

members of the Belgian ex-service men's organization.

The Louisiana men acted as hosts to the Belgian delegation at the New Orleans gathering. Presentation was formally made by M. Joseph Janne, assistant minister of labor for Belgium, a vice president of the association and commander of the Belgian Legion. The diploma and badge will be presented to the Americans by King Albert at the next association gathering at Brussels in 1923.

WELL RECEIVED IN HAVANA

American Legion Men Report Marked Hospitality While on Recent Visit to Cuba.

Tales of excellent hospitality from American Legion members in Havana have been brought to this country by Legionnaires who journeyed to Cuba following the recent national convention in New Orleans.

The program held by the Havana buddies included a visit to Legion headquarters, a trip to the jai alai game at the Havana-Madrid Fronton, which provided front boxes for the visitors and visits to Morro castle, Cabanas fortress and other interesting points. Hotels and restaurants welcomed the Legionnaires with elaborate decorations and special rates in addition to providing information booths and other conveniences.

Havana has one of the largest foreign posts of the Legion. It is composed of veterans from nearly every branch of the service. The reception arrangements were conducted by Capt. George T. Street, post commander, and John Blavka.

Hear Radio Address.

When a representative of the United States Veterans' bureau broadcast a radio talk on the "Possibilities of a Rehabilitated Ex-Service Man" at Atlanta, under the direction of Joe Sparks, the new chairman of the American Legion's national rehabilitation committee, his remarks were listened to with interest by 200 veterans in a training school at Cookville, Tenn., 800 miles away.

TAKES LID OFF P. O. RECORDS

Charles G. Dawes Reveals a Huge Deficit in the Department.

BALANCE SHEET PREPARED

Report of the Former Director of the Budget Shows a Shortage of $16,198,000 for First Quarter of 1922.

Chicago, Dec. 22.—Gen. Charles G. Dawes made public here the suppressed balance sheet of the postoffice department of the United States government.

"For the first time in the history of this country," the former director of the budget asserted, "there was prepared not only a balance sheet of the post office departments in terms understandable by the average man, but a report in the accepted business form of the current operations of the department for the first quarter of this year."

This report shows a deficit of $16,198,000 for the first quarter of 1922. This is at the rate of $64,000,000 for the year.

For years the public has been given the impression that the post office department was self-sustaining or nearly so. Government ownership advocates continually use the federal postal system as an efficient revenue producing institution as an example which it would be well for the city of Chicago to follow.

The postal system has been repeatedly urged, locally and nationally, as a model of government operation on a profit-making basis.

The report made public by General Dawes indicates that emphasis should be placed on "other causes" when the department as on Dec. 3—ascribes the deficit for this year to "fire, burglary, and other causes."

CHICAGO HAS BIG BLAZE

Flames Raze the Polk Street Passenger Station—Loss Estimated at $1,500,000.

Chicago, Dec. 22.—The Dearborn Street passenger station, in service since May 1, 1885, was almost completely destroyed by fire. As a consequence Chicago's passenger terminal facilities for the Santa Fe, Grand Trunk, Monon, Chicago & Western Indiana, Erie, Wabash and Chicago & Eastern Illinois railroads were temporarily disorganized. The loss is estimated at $1,500,000.

GERMANY APPEALS TO U. S.

Berlin Asks That Expert Financiers Be Named to Fix Reparations Sum.

Washington, Dec. 21.—In order that a "just" reparations sum may be arrived at, Germany has communicated to the State department a proposal that a commission of experts be appointed to study and determine a figure within her capacity to pay. The plan also was communicated to the capitals of other allied nations.

BODIES OF AIRMEN FOUND

Charred Remains of Two Missing Aviators Discovered in the Pablo Canyon Reservation.

San Francisco, Cal., Dec. 22.—The charred bodies of the missing aviators, Col. Francis C. Marshall and Lieut. Charles Webber, have been found in the Pablo canyon reservation, about seventy-five miles west of Tucson, Ariz., the Southern Pacific railroad offices here were advised in dispatches from Tucson.

ARREST CHICAGO BANK CLERK

"Model Employee" of First National Charged With Taking $70,000 From That Institution.

Chicago, Dec. 21.—Seth Anderson, who worked his way from office boy to department manager during twenty years of service with the First National bank, was arrested on charges of embezzling $70,000 from the institution. It is said the stealings have been taking place over the last ten years.

Eight Trainmen Convicted.

Los Angeles, Cal., Dec. 21.—Eight railroad men, convicted by a jury of conspiracy to interfere with interstate commerce, will be arraigned for sentence in the United States District court here. The maximum penalty which may be imposed is two years' imprisonment and $10,000 fine.

Historic Church Burns.

Quebec, Dec. 22.—Notre Dame church, known as the Quebec Basilica and originally established in 1647, was destroyed by fire. It is impossible to estimate the damage, but the loss is covered fully by insurance.

Pierce Butler Confirmed.

Washington, Dec. 22.—The nomination of Pierce Butler, St. Paul attorney, to be an associate justice of the United States Supreme court, finally was confirmed by the senate. The vote was said to be 61 to 8.

LIEUT. E A. POE, JR.

Lieut. Edgar Allen Poe, Jr., who has the distinction of being the first Marine corps officer to serve aboard the U. S. S. Mayflower, the presidential yacht. He has charge of the detachment of 20 marines which acts as a guard of honor to the President when he is aboard. Lieutenant Poe is a native of Baltimore, and enlisted at the outbreak of the war while a student at Princeton. He was severely wounded during service at the front in 1918.

EXTENDS FARM CREDIT

Federal Reserve Board Increases Sums Available.

Body Amends Its Regulations—Rediscount of Maturities Up to Six Months Provided.

Washington, Dec. 20.—Announcement was made by the Federal Reserve board of amendment to its regulations which will materially increase the amount of farm credit which the Federal Reserve system is extending.

This move by the board comes at a time when administration and insurgent leaders in the house are struggling for leadership in the passage of a new law for the extension of further credit facilities to the farmer.

The reserve board changed its regulations to provide that bankers' acceptances with maturities up to six months, which are drawn by growers or co-operative marketing associations to finance the orderly marketing of nonperishable staple agricultural products, are eligible for rediscount at reserve banks.

ARREST 22 IN NAVY THEFTS

Stocks Stolen From Brooklyn Base by Truck Loads, Department of Justice Claims.

New York, Dec. 21.—On indictments returned several months ago by a federal grand jury, which charged that government property worth more than $1,000,000 had been stolen since the war, 22 civilian employees of the Brooklyn navy base were arrested by Department of Justice agents. It is charged that stocks were taken in truck loads.

INDIANA BANK IS ROBBED

Bandits Grab $5,000 at Dyer's First National—One, Masquerading as Woman, Shot.

Dyer, Ind., Dec. 21.—Three armed men, one of them masquerading as a woman, held up the First National bank here and escaped with $5,000 after a battle with citizens in which the bandit dressed as a woman was shot and had to be carried to a waiting automobile by his companions.

BRITISH EMPIRE NO MORE

Commonwealth of Nations to Be New Name of King George's Domain.

Washington, Dec. 22.—The final curtain will be rung down on the British empire within the next ten days, it was learned here. Within that time announcement will be made from London of the new British commonwealth of nations.

U. S. ARMY MAY QUIT RHINE

Will Be Withdrawn If France Occupies the Ruhr, Washington Report Says.

Washington, Dec. 21.—American troops will be withdrawn promptly from the Rhine if France occupies the Ruhr, it was learned from a high official of the administration here.

Won't Act in Europe.

Washington, Dec. 22.—The State department issued a formal denial of foreign dispatches saying this government plans to send a commission to Europe, headed by Secretary Hoover, to consider the reparations situation.

Lake Naval Radio Stations Close.

Washington, Dec. 22.—The United States naval radio traffic stations at Duluth, Whitefish point, Eagle Harbor, Milwaukee, Manistique, Detroit, Alpena, Mackinac island and Buffalo closed for the winter.

HUNT HOODED SLAYERS OF 2

Explosion Raises Two Bodies From Bottom of Louisiana Lake.

ARRESTS ARE BELIEVED NEAR

More Troops Are Sent to Morehouse Parish, Virtually Placing It Under Martial Law—Governor Takes Charge.

Mer Rouge, La., Dec. 23.—The search for two Mer Rouge men who were seized four months ago by a band of white-robed, hooded men, reputed members of the Ku Klux, ended Friday midnight when a mysterious blast of 1,000 pounds of dynamite brought their decapitated bodies to the surface of a lake twenty miles from the spot where state and federal agents had been decoyed to search.

The discovery of the bodies, the ruse worked to throw the investigators off the trail, and what looked like an attempt to destroy trace of the murders prompted Gov. John M. Parker at Baton Rouge to assume personal charge of what probably will be a sensational aftermath of the night's crime revealing explosion.

Attorney General Coco and an assistant, under orders from the governor, have arrived here. A machine gun company of the Louisiana National Guard is also on the ground, and with its arrival a force of close to 300 armed men virtually imposed martial law on Morehouse parish.

Operatives from the Department of Justice, who have been here for weeks, are reporting to Director William J. Burns, and, it was reported here, have turned in evidence that will result in wholesale arrests.

The discovery that Filmore Watts Daniels, a World war veteran, and Thomas F. Richards, automobile mechanic, two of five men kidnaped last August by the masked men, had been done away with has brought to white heat local feeling about the Ku Klux Klan.

BABY THROWN IN MAIL SACK

Cleveland Mother Loses Her Infant in Rush of Mailing Christmas Packages.

Cleveland, Dec. 23.—From a crowd of Christmas shoppers in the main post office came the cries of a mother for her lost infant. While the mother was addressing packages she placed the child in a market basket. Her packages ready to be mailed, she looked for the baby. It had disappeared.

The basket, with its contents, had been picked up by a post office employee and thrown into a mail sack. Cries from the child as the sack was about to be placed on a mail truck led to its discovery.

RAIL PRESIDENTS' BIG PAY

Salaries of Eight Railroad Executives $75,000 or Over—One Receives $100,000.

Washington, Dec. 23.—Eight railroad executives in the United States were being paid at the rate of $75,000 a year or more as of June 30, 1921, according to reports filed by the railroads with the senate interstate commerce committee in compliance with an order of the committee in the Cummins investigation into the revenues and expenses of the carriers.

Julius Kruttschnitt, chairman of the board of the Southern Pacific, heads the list with a salary of $100,000.

CHRISTMAS MAIL IS HEAVY

Reports to Department at Washington Show All Records Have Been Broken.

Washington, Dec. 23.—Telegraphic reports to the Post Office department from 50 of the largest post offices in the country indicate that Christmas mail was the heaviest in history, increase in volume being estimated at 10 to 50 per cent. Congestion has been avoided, the department was told, at nearly all points.

REDS WANT U. S. DOLLARS

$1 Buys 57,000,000 Russian Rubles in Moscow in Scramble for Foreign Currency.

Moscow, Dec. 23.—The demand for foreign currency has been so great during the last few days that for a time the dollar on the Black bourse brought 57,000,000 rubles. The market closed at 45,000,000.

U. S. Line Fights Dry Law.

Washington, Dec. 23.—The International Mercantile Marine filed a brief in the Supreme court to enjoin inforcement of the Volstead act. The brief declares American ships can legally serve liquor on the high seas.

Big Ocean Liners Collide.

Southampton, Dec. 23.—The White Star liner Majestic, docking in a gale, was blown out of her course and collided with the Berengaria. Two plates on the Berengaria's starboard quarter were crushed.

BOON TO MANKIND

Science of Canning Food of Immense Practical Value.

Few Discoveries or Inventions, It Is Pointed Out, Have Been of Greater Benefit to Humanity.

Though less spectacular, the science of canning was a discovery only equaled in importance by such inventions as the telephone, the wireless and the airplane. When we stop to realize that food, shelter and clothing are man's most vital needs, and what a large proportion of our food is preserved for us today in canned form, we better understand the full significance of this important discovery.

Pickling or drying were the only methods of preserving foods that were known up until about a century ago. In 1795 the necessities of war prompted the French government to offer a reward of 12,000 francs for a better method of food preservation. The prize was awarded to Nicholas Appert, and his method stands today as the real basis of our present process of canning—namely, hermetic sealing and sterilization by heat.

This discovery has added immeasurably to the wealth of the world, because it has meant that at times of harvest the surplus crops, which it is impossible to get to market before they spoil, have not had to go to waste, but have been preserved for use at other periods of the year when Nature is producing less and when, but for the science of canning, we would have to subsist on much less attractive fare. This is conservation in the broadest and most economic sense of the word.

But the process of canning not only benefits the world at large; it has very definite advantages for each of us as individuals. For that much-talked-of Mr. Average-Man-in-the-Street and his Housewife-in-the-Kitchen, "canning" eliminates the seasons. In effect, it "makes summer last all the year 'round," and in midwinter brings us the crops of midsummer.

And canning also eliminates space or sectionalism, for those of us who live in the interior may still enjoy oysters, crabs, lobsters and other sea foods whenever we wish; and those of us who live in the eastern states may nevertheless have access to the delicious fruit crops of California and Hawaii. And so on the world over. The pioneer in Alaska, and miner in the mountains of South America, the explorer in the Antarctic, men and women everywhere on the fringes of civilization, all have at hand—thanks to the can—the same wholesome appetizing foods that are served to the most exacting guest in an exclusive New York hotel.

Because the science of canning has so done away with time and space—with respect to food—the can has come to be known as a modern genie of the home. The housewife whose pantry shelves are well stocked with canned foods is able to choose her meal from whatever corner of the world her whim suggests.

Sacrifice Worthy of the Name.

The word "sacrifice" gains new meaning when we think of the story that is told about the three hundred children of an Armenian orphanage.

So small amount of food had reached the American relief workers in charge of the orphanage that they could give almost nothing even to the three hundred. Each child got only a small piece of bread and a few walnuts twice a day. Of course the food did not nearly satisfy their hunger, but it was enough to keep them alive.

When the children learned that there were hundreds more in the nearby villages who could receive nothing at all they voluntarily gave up the walnuts. Before each meal they dropped their nuts into a sack in one corner of the room, and when it was full some one of them would carry it to the frantic crowd in the street. Could there be a more generous sacrifice than that?—Youth's Companion.

Airplanes' Good Record.

Probably the most remarkable thing about civil aviation in the past year has been that not one passenger has been killed, or even seriously injured in a British airplane throughout 1921. And this, although during the summer between 400 and 500 people a week were crossing the channel by air, and although well over 1,000 a week were being taken up for joy rides in this country. For this we have to thank not only the skill of the pilots and airplane mechanics, but the aeronautical inspection department and the controller of aerodromes and licenses, who have made sure that only first-class men and machines have been allowed to carry passengers.—London Opinion.

Easter Egg of Death.

The city of Paris, a few years before the war, presented the late czar of Russia with an Easter egg containing jewels to the value of $10,000. The same year one of his revolutionary subjects sent him an egg stuffed with dynamite, timed to explode at a certain hour. The weight of the egg aroused suspicion, and a tragedy was averted by the secret police opening the egg and discovering its contents.

MADE FOR EMPEROR'S TABLE

Massive Silver Set Ordered by Napoleon I Put on Exhibition at New York.

The massive silver set of 919 pieces ordered by Napoleon I, during the hundred days, delivered after his abdication to Louis XVIII, and used by the French royal family at Tuileries palace from 1815 to 1830, has been placed on exhibition in New York. Two bullet holes in the soup tureen bear evidence of the revolutions it has passed through. Each article bears the Bourbon coat of arms, the fleur de lis surmounted with the crown and is stamped with the official government mark, the mark of the chief craftsman and of the guild. Napoleon I ordered this set of silver from Biennais on his return to France from his first exile on the island of Elba. It was made during the hundred days of Napoleon's second reign, but before it could be delivered Napoleon was forced to abdicate and was again exiled this time to end his days on St. Helena. Louis XVIII, his successor, paid Biennais for the silver and had the Bourbon coat of arms placed on it. The set of silver passed finally to the heirs of the duc de Chambord and through them has come to North America.

TOOK THREE ENEMY SCALPS

Exploit of Indian Girl Made Her Famous Among the Tribes of the Northwest.

One of the most warlike of Indian maidens was Hanging Cloud, a Chippewa girl, the daughter of Na-nonga-bee, chief of a branch of that tribe which occupied the territory around Rice lake in northern Wisconsin, some 75 years ago. In her hair Hanging Cloud wore three eagle plumes, signifying that she had slain that many braves in battle.

This exploit she performed when a party, including herself and her father, were ambushed by a force of Sioux, the Chippewas' traditional enemies. Her father was slain, and Hanging Cloud, feigning death, waited until the Sioux came to secure the scalps of the slain Chippewas, and then, seizing her father's rifle, killed one and, in the pursuit which followed, succeeded in killing two more. She scorned to marry one of her own tribe, for she could not espouse herself to a lesser warrior than she, and so she finally married a white man, with whom she lived for many years near Rice lake.

Planet Without Oxygen.

According to the spectroscopic studies made at the Mount Wilson observatory of the light received from Venus, no oxygen-absorption lines are found. This indicates that there is no oxygen or water vapor in the outer atmosphere of Venus, and furthermore that the reflected light of the sun must have penetrated to a considerable depth.

It therefore appears necessary to attribute the great brightness of Venus to some other cause than that of high reflective power of water-vapor clouds, and this apparent absence of oxygen must be considered in connection with speculations as to the conditions of the planet.—Popular Mechanics Magazine.

Envelope Valued at $12,500.

August Lutteken of Denver, one of the largest stamp collectors in the world, has an envelope mailed in 1859 which is valued at $12,500.

There are no postage stamps on the envelope. It bears only what were known as postmasters' stamps, requiring payments of 5 cents overseas postage and the collection of another 5 cents postage from the addressee on delivery. No street address appears because such letters could be received only by calling in person at the postoffice. The practice was discontinued about the time of the Civil war and specimens have become so rare that Lutteken asserts the one he holds is, in his belief, the only one extant.

Lizard Skin Leather.

The island of Ceylon, which sent peacocks, monkeys and baby elephants to King Solomon, for that monarch's zoo, is remarkable for a varied and interesting fauna. One of the oddest of its animals is a huge lizard, called the cabrogoya, which attains a length of four and one-half feet.

The cabrogoya is a very handsome reptile, beautifully marked, and its skin when tanned affords a tough leather of excellent wearing quality and waterproof. It is used for making women's shoes and, with the idea of introducing it in this country for that purpose, specimen hides have recently been sent to our Department of Commerce by the American consul at Colombo.—Philadelphia Ledger.

Remarkable Indeed.

"You see that stout old chap in the corner?" asked Jones.

"Yes. What about him?" replied Smith.

"He's a wonderful acrobat."

"Go on! He looks like a stock broker."

"So he is."

"But I thought you said he was an acrobat."

"He's both. I asked him yesterday whether he was busy, and he said: 'My boy, I just hang on from day to day, keeping my nose above water by the skin of my teeth.'"

Definitions.

Merit—The thing that gets you everything desirable you have.

Pull—That which obtains for your neighbor everything worth while that comes his way.

SYNOPSIS

CHAPTER I—The time is the late '60s or early '70s and the scene a steamboat on the Mississippi river. All the types of the period are present and the floating palace is distinguished by merriment, dancing and gallantry. There are the customary drinking and gambling also. Virgil Drace, a young northern man, is on his way south on a mission of revenge. He meets an eccentric character in the person of one Liberty Shottle, who is constantly tempting the goddess of chance. They form a singular compact.

CHAPTER II.—Drace gets his mind off his mission by entering into deck sports in which he exhibits an unusual athletic prowess. Liberty Shottle is again unlucky at cards and attempts a financial negotiation with Drace. The latter, seeing an opportunity to use Shottle, confides to him that his mission is to find a certain ex-guerrilla, Stepho la Vitte, who had murdered Drace's father. It is his determination announced to his new chum, to hang La Vitte as high as Haman. Drace has become enamored of a mysterious beauty aboard the boat.

CHAPTER III.—The steamer reaches New Orleans, at that time in the somewhat turbulent throes of carpetbag government. Shottle becomes possessed of two tickets for the French ball, a great society event, and proposes that Drace accompany him to the affair. The young men attend and Drace unexpectedly meets the girl who had fired his heart aboard the steamer. She is accompanied by one Boyce, whose proprietary interest indicates that he is her fiance. Through stratagem Shottle learns that the name of the girl is Nadine la Vitte and that her companion of the evening is the man who is seeking to marry her.

CHAPTER IV.—Drace passes an uneasy night torn by the suspicion that Nadine is the daughter of old Stepho la Vitte, now an admitted outlaw. Now, more than ever, is he resolved to find where the girl lives and to find Stepho. Drace and Shottle begin a search of the city. In one of their nocturnal pilgrimages they come upon a mob intent upon hanging a poor wretch from the limb of a tree. It is a typical carpetbag execution and aroused the resentment of an opposing mob of citizens. Drace takes a hand in the fight which starts and is instrumental in preventing the execution. From a window opposite the scene, he catches a glimpse of one he is sure is Nadine.

CHAPTER V.—The escapade, the fight, the interference with the execution get Drace and Shottle into bad standing with the authorities, but instead of punishment are given until the next day to board a steamer bound north. Returning to the house where he thought he had glimpsed the girl, Drace finds the place abandoned. Through Colonel Josh, an emissary employed at the suggestion of Shottle, he gets a faint clue in the discovery that a certain Frenchman, a wine dealer, is reported to be an intimate of Stepho la Vitte. There is only a short time before the departure of the steamer when Drace and Shottle go to call on the Frenchman. The latter is too keen to be inveigled into giving up any information, but Shottle, spying around among the casks and bottles, especially the articles made up for shipment, makes an important discovery. So as not to arouse the suspicions of the Frenchman, he casually draws Drace away from the place and onto the steamer. On board he informs Drace that one of the cases was addressed to Stepho la Vitte at Farnum's Landing, Mississippi. It is the next stop below Bethpage's Landing and Colonel Bethpage is Liberty Shottle's uncle.

CHAPTER VI.—Drace and Shottle are received with genuine hospitality by Colonel Bethpage and find the plantation and its environs delightful. After a brief stay and a characteristic financial transaction with the colonel, Shottle goes away ostensibly on a business trip to Vicksburg, but in reality to seek his favorite form of amusement. Drace makes the plantation his headquarters and from pieces of information gathered from various sources, becomes convinced that La Vitte has a haunt in a great wood of cypress and a tangle of salt cedar, a sort of everglades, a marsh with hundreds of knoll islands rising here and there among the bayous. A shrewd old negro had told him that the outlaw lived in a house built of periwinkle shells. Day after day Drace takes a canoe and goes farther and farther into the moss-hanging wilds. At his feet lies a rope, one end of it a hangman's noose.

CHAPTER VII.—Drace penetrates into the wilderness, discovers Periwinkle House and finds Nadine alone. She is much alarmed and warns him her father will shoot him. He makes love to her and to get him to go she agrees to meet him again the following Thursday. On his way home Drace is accosted by three men who ask to be set across the river. They overpower him and bind him with ropes. Led by Tony they throw Drace into an old cabin. Tony taunts Drace and avows his love for Nadine, while the others collect fuel. Tony sets fire to the cabin and the three go off laughing. And then his bonds are cut and with Nadine's help he gets safely out. She tells him how she was led to come to his rescue.

CHAPTER VIII.—Drace gets safely back to the Bethpage place. The general writes him to accompany him to Natchez, where he is to address a teachers' meeting. At Natchez they go to old Tobe Mason's tavern, under the hill, a famous place. There they drink summergrape wine, listen to "The Arkansaw Traveler," see the buck-and-wing dancers and have a dinner of doves and fixin's. Stepho la Vitte appears, insults the General by calling him a "Carpetbagger." The General tells him he lies. Stepho draws a dirk. Drace disarms Stepho, who leaves, vowing vengeance.

"Well, provide yourself with another. In saving me from a deadly assault you have mortally offended old La Vitte. He is in no wise afraid; but neither is he gallant, and would shoot you without warning. You told me, you remember, of your appointment to meet old Spence tomorrow. I haven't any too much confidence in him; he might play you into the hands of Stepho, and I advise you not to go fishing with him."

"Spence. No that's not the name of the old fellow I'm h. His name is—Spillers, I t

"I don't know a ma[n] ime in the neighborhood. B[e] , arm yourself and keep a s[harp] out."

And then they sat and smoked in silence, inhaling the dewy breath of the night.

CHAPTER IX

With the first gleam of Thursday's light Nadine arose and stood looking out from the window. Her father had come in late and was to depart again early for the hills, but she was afraid lest he might have changed his mind. She heard him moving about, but she waited a long time before she went to meet him, so sweet it was to stand there at the window to catch the first ray of the sun.

The old man hummed a jagged tune; in a garden of melody it would have

The Old Man Hummed a Jagged Tune.

been a briar. Nadine came out, and gallantly he kissed her hand, laughing softly; and then as was his wont, he kissed her hair.

Her duties about the house were light, but he helped her, and when their queer assortment of plates and dishes, gold-rimmed china, crockery, stoneware and tin plate had been washed and put away, they sat in the shade of the house, the girl anxious and wondering.

"I have sent Tony back to the ceety, as I tell you I will," he said to her. "He does the good work to burn the spy, the carpetbaggair. Now he have spree, with the red wine an' the white. When the time come, he be back. I have need of heem with the cattle that I buy. He drive them . . . Up to the town Natchez I have trouble. The ol' scoun'rel Bethpage! I go in the tav', an' he is there, sing, laugh, eat an' look at the darky dance. I wait. Then I go up. We have words. He jump up. Then the young man, big, he grab my wrist like this. He squeeze. I say: 'Monsieur you was ver' strong. I see you again.' An' when I do, I keel heem. I hear old Bethpage call him Vergeel. The old man I keel too, eh?"

"Oh, no—no!" she cried . . . "Let us go away somewhere. They will never let you alone. It will be better to be in the city than here."

"Just a little while longer we stay in this place, eh? Then we meet Monsieur Boyce in Memphis, an' you marry him, an' he take you away for the honeymoon, per'aps to France. An' he buy you the silk dresses, an' many beautiful things. An' then I come and join you, an' we all live happy—eh?"

"But—but I do not like Monsieur Boyce!"

"Ha! You learn soon. He is a fine man. Wait till we see him in Memphis an' you know him better. You will love him then, an' be happy. . . . I go now. Au revoir, ma p'tite."

Stepho went down to his boat, feeling that he had outwitted her impatience of the swamp, and she ran back to her room to gaze through the window. But soon she came out with a big leatherbound book of plays and put it on the ground beneath the oaks. Then with a broom made of stiff twigs she swept the ground, unstrung a caterpillar swinging down and carried it away out of the range of her stage. From the house she brought a narrow strip of rush matting, spread it beneath a tree, raising one edge as if to form of it a sort of back, a sofa. From the house she brought a box, to serve for a table, and from out beyond the palisade of cane she gathered lilies, plucking from the bank a great bloom that looked like a trumpet. These she hung on the low-swaying branches of her playhouse trees, or with sharp thorns pinned them to the rugged back, a curtain to drape the wall above her "pretend-like" di-

(Continued on next page.)

With Heartiest Best Wishes---

The old year is about to close. Saturday of this week, the last entry will be made; the final record closed; and bound in the Book of Remembrance will be its joys and sorrows, its success, its failures—the curtain will fall on the last scene in the year 1922. A glad, new, unspoiled season is about to dawn, and to us it looks beautiful and fair. This Bank wants you to know that during each day of the new year it will be your friend and confident, ever ready to co-operate with you.

May the unfilled hopes of the old year find realization in the New, and all the good things of the new season be yours.

State Savings Bank

Make Prosperity come your way—be the Master of your own self.

George Zinn M. D.

OUR BEST WISHES
TO ALL, OF
A EMRRY CHRISTMAS
—And—
A HAPPY NEW YEAR
And Our Thanks for your Patronage during the year now ending.
Respectfully,

Iowa Falls Electric Co.
Mr. H. F. Kellogg, Mgr.

Appreciating your patronage and hoping that the pleasant relations now existing between us will continue, I wish you much happiness and prosperity for the New Year.

Dr. J. L. Hesselhuss
Dentist.

You have had a part in making 1922 both pleasant and profitable to me. Will you accept my heartiest best wishes for a Happy and Plentiful 1923.

Dr. R. M. Thomas
Veterinarian.

We want to grasp your hand this morning and wish you the best New Year you ever had. After the trying times of the past few years there is now a spirit of Peace and Good Will being proclaimed thruout the world. This can't help but lead to Prosperity. Conditions are much better and rapidly improving. This should be the Happiest New Year.

We have appreciated your friendship more than we can express and we want to join with you this coming year in a cordial spirit as friends and partners.

We sincerely wish you a Happy and a Prosperous New Year.

Cordially,

John N. Day

When in need of my services, I shall be glad to be of service to you. Sincerest good wishes for the year 1923.

"We repair everything but broken hearts."

W. F. Pavey
The Practical Blacksmith.

Glad Yuletide Greetings

At this glad New Year Season we think of our customers as our friends. We like to feel that in a broad sense our customers are our partners in this business concerning farm implements, machinery and repairs—that our success is but the reflection of theirs.—And so on the eve of a New Year, we extend to you our hearty good wishes.

Stille Implement Co.

Happy New Year

We shall think of you and wish you a Happy New Year clear through the year. We may not be able to tell you about it every day through the year but we are taking the pleasure of saying so on the first day of the New Year.

We may be far away at times or both of us may be busy, but it makes no difference —the thought and wish will be there just the same, what ever joy and success comes to you will make us glad. Without pretense and in plain words we wish you a Happy New Year.

First National Bank

We desire to extend to you the compliments of the season and express our sincere wishes for your prosperity the coming year, with a continuance of the cordial relations existing between us.

Men's Fashion Shop

Garner, Iowa.

The Standard Oil Company greets you with glad Yuletide wishes. Your past business has been appreciated and by careful, conscientious service, we will endeavor to merit future favors.

Henry Lemke, Jr.

Local Manager.

"HELLO! 1923"

The KOERNER TELEPHONE COMPANY, the Management and the Operators greet you with best wishes for the New Year 1923. We thank you for the consideration shown us at busy times and the many little courtesies extended to us or to our operators. We hope that the coming year will bring you prosperity and happiness.

Koerner Telephone Company

Our 1923 Wishes

The Season prompts us to express to you our appreciation of that intangible and invaluable asset—Goodwill—that you have so kindly bestowed on us during the past year and which we fully reciprocate. We extend to you all the compliments of the season, wishing you and yours a Happy, Prosperous New Year.

The Klemme Times

Season's Greetings

We are about to close another very successful year of business in Klemme, and we thank each one of you for the part you have had in it. May the year to come be one of unbounded happiness and prosperity to you. Call upon us when in need of anything in the building material line, fencing, etc., and we will do our utmost to give you the best of service. Let us help you plan your new buildings for 1923.

van. She sat down and waited a long time. The cane stirred, and she seized her book, opened where a lily-stem marked her favorite play, and made herself believe that she was reading.

It was only a breeze that rustled in the cane. She could hear it now, lisping amid the glossy leaves above her. Why should she be impatient? She could wait. Had she not waited night after night for her father's footstep? Had she not sat in the house, alone and not afraid, when the storm tangled the tops of the cypress trees and lashed the bayou mad? . . . She had not heard a sound, but looking by chance, she saw Drace coming through the cane, and she sprang up to meet him, the play-book pressed against her bosom.

"Nadine."

"Monsieur!"

"Don't call me 'Monsieur.' Call me Virgil."

She dropped her book. He bent to pick it up, but she snatched it from beneath his reaching hand and stood back from him.

"Oh, it was you, then! It was you the so strong man that would break my father's wrist. It was you!"

"Nadine, it was not to hurt him. With a knife he would have killed an old man; and then they would have hanged him. Nadine, my other hand held yours, to protect you."

"It must be true. I will believe you —Virgil. I know you brave and not wish to hurt an old man. No, you could not do that. You will forgive me, yes?"

She held forth her hand and taking it tenderly, he touched it with his lips; and like a princess she accepted the homage due her rank and her beauty.

"Come, now, we play," she said, sweetly laughing. "And it must be free, like the boy and the girl. But first you sit down here and tell me."

She led him to her "sofa" and they sat down, leaning back against the tree.

"Tell you what, Nadine?"

"About the great big world you know so well."

"I don't know the big world, as you think it. But I know the universe as I feel it. It is here."

About her finger she sat wrapping the lily-stem that had marked her favorite play. Was it that she did not understand his reference to his universe? No, for she shook her head, and with a sigh that did not mean weariness.

"The universe could not be on this little island."

"It could be held in your dimpled hand."

"Oh, my hand dimpled!" She held it in front of him, touched his brow with the palm.

"It is not soft enough to be dimpled, Virgil."

"I would kiss it soft."

He caught her wrist, touched the tip of each finger with his lips and then kissed the palm. She laughed, drawing back her hand.

"You must not do that. We must talk of other things."

"Yes, but first let me tell you of my dream."

"I do not like to hear dreams. We always forget them and make up something we did not dream. . . . But did you not tell me once?"

"No, I don't think so. In my dream you touched my heart with a torch and set it afire."

"But I would not do that. I would save you from the fire. Ah, and Tony he has gone to the city, but when he comes back, we must watch close. . . . One time he tried to take my hand, and he said he would kiss me. And I say: 'That may be, Tony. You can kiss me because you stronger. But when you have, then you be dead.' And he knew that I speak what was to come."

"We care nothing for him. Let him keep out of my way. . . . And when I saw you at the ball, I knew that you were the girl with the torch. And do you know what I said to myself? Let me whisper it to you."

"There is no one to hear."

"I said: 'You are to be my wife.' And just then you turned about and looked at me."

"But I did not see you."

"Come, now, you must have seen me."

"Well, perhaps. But I did not say: 'I am to be his wife.' No, I did not say that. And it cannot be, Virgil."

"But it is going to be, all the same, and you know it. Why, what is all this universe for if that is not to be? Why was this little island cast up here? Why did the word ring forth: 'Let there be light'? It is part of the plan of creation, and nothing can prevent it. . . . I shall have to wait, but I—"

"Will wait a long time, Virgil. But we must not talk like that. Come—let us forget such things."

She put her spell on him, and he was a boy again. Hand in hand they walked about, pretending that the acre island was miles and miles in extent. Time was a day-star shooting unseen across the sky, and then a heavy sentence fell upon him. It was time for him to go. In the cane she stood with him where his canoe was moored. He held her hand, drawing her toward him, but she took it away.

"No—no, you must not . . . Quit, Virgil, you must go now. The sun is low."

CHAPTER X

In the night, in that hour of self-reproach which comes to us all, Virgil awoke in a rage with himself. He had been dreaming, had seen himself infirm of purpose, without character. Back to Highland Bruce he traced his ancestry, and was he to be the first of his race to prove degenerate, to trample upon the memory of his father, to loll in stupid love, to give his soul to a creature far beneath him in birth and schooling, a girl whose father had murdered! Out of bed he got, and bowed with the weight of shame, walked the uneven floor, for his slow steps were doddering.

"Caught in an instant, a fly in a speck of jelly, and have never been able to get free," he reproached himself. "Even Liberty Shottle, the slave of cards and dice, can see my weakness and must laugh at me. But by the God in Heaven it shall not be. In this land there is no law. I bring my own law with me, my oath, and a smile and a word of flattering love bade me put it aside, and I let it slip from me. Now I must redeem myself."

He stood at the window. Gamecocks were crowing the dawn, a courageous challenge to all the world. No, there would be no weakening now. The sweetish comedy had been played.

Swiftly he dressed himself, stole downstairs, out of the house, down to the river. There was no boat, but no matter, he would walk to Willow Head. Realizing that it was yet too early for the execution of his grim purpose, he halted at a wayside place, ate breakfast and waited for the sun. Then not in flurried haste, but deliberate in strength, he walked on to Willow Head, crossed over, found his neglected rope where, in a hollow stump in backsliding weakness he had hidden it, buttoned it beneath his coat and strode down into the swamp.

It was a long way to his canoe near the Muscadine isle, and then a long pull to Periwinkle house, but there was time enough. Stepho would not go away till Thursday. Ah, he would go away no more, for now on Tuesday he must settle with the spirit of Alfred Drace.

Mists hovered about, but the island was in a blaze of light. Silently the canoe slit the satin water. Silently he landed. Determined vengeance may pick its way as softly as eager love; and in the cane, sharper of whisper now that the weather was cool, he made not a sound. Out into the open he peered. No one within sight. On the bark of the live oak were the dead flowers of yesterday. There in the shade was the box that had served as table, once so prettily strewn with violets.

In spite of his vow of vengeance and his hatred of Stepho, these things caught at Drace's heart, shook his fixed purpose of action. For many minutes he waited—no sign of Stepho, of anyone. And then his blood leaped; for soft hands suddenly blinded him from behind, soft laughter bubbled over at his astonishment. And dark thoughts and dark purposes fled on the wind as he caught Nadine and hugged her close.

"Now for your punishment!" And he kissed her.

"Oh, you must not again . . . Virgil, I cannot like you when you are rude. . . . You must not!"

"I don't want you just to like me."

"You do not? Then I will try not to. . . . Come and sit down, Virgil. You worked so hard for your kisses you must be tired. . . . How did you guess?"

"Guess what?" he asked as she led him to the sofa and he sat gazing entranced as she captured and imprisoned her guerrilla bands of hair.

"That Father and Tony had gone hunting today. But they may be back at any time, Virgil. You must not stay."

"But I must stay; you hold me prisoner. I must stay until you love me as madly as I do you."

"As madly as you do me? That might not be so much mad, Virgil. But why should I love you?"

"Because you are to be my wife. We are engaged."

"Are we? I did not know that. Why you not tell me sooner?"

"I did, and now you must know it."

"But I did not. Then I must be stupid, yes?"

"The whole universe is stupid if it denies it. The angels are stupid if they fail to see it."

'Oh, you must not talk like that. It is worse than swearing the big oath.
. I am to be your wife, Mrs.
V, en what do we do? Go

WORK-HARD AND PLAY HARD

Characteristic of the American Is His Capacity to Do Both to Best Advantage.

We in America love fun only because we know how to do real work. It's the contrast that gives us pleasure. If one has nothing to do but play, it begins to rub him. He soon tires of it. If he has nothing to do but work, the harness will, by and by, gall his back and he is likely to be only half a man.

Learning how to work and how to play are really the big things which we should get in school. After these a correct notion of respectability is most important. In this matter should we not take careful thought of the mental and moral exposure of our boys and girls? It is to be hoped that we shall learn that a strictly American education is good enough for them. We used to think it a fine thing for young men to get a degree in philosophy at a German university. It will be strange if, since the war, we do not decide that we have had quite enough of the philosophy of Germany. It lacks courage. In four years not a voice was raised in its universities against the degenerate and infamous men who were wrecking the ship of state and seeking to destroy the best possessions of humanity!—Irving Bacheller in the Delinator.

"DIVORCE RING" THE LATEST

Fad Recently Adopted by Those Freed From the Marital Tie by Court Proceedings.

From time immemorial woman has worn on the third finger of her left hand a plain band of gold as a symbol of her honored position of wifehood. And when death takes from her the partner of her life she signifies her loss and grief by wearing appropriate garb.

But in what a different manner today the widow of the present, that is, the one who by the sanction of the courts, has resigned her job as wife, makes known to all the world her renewed state of single blessedness. For the grass widow of today has just adopted the latest of fads, the "divorce ring." This jeweled symbol of the severance of the marital tie takes the place of the former gold band. It is made of gold or platinum on which is mounted a broken Cupid's bow at the end of which is set a jewel to represent a divorce. Should the wearer once more embark on the matrimonial seas and again come to wreck then another jewel is added to indicate the second divorce, and so on.

Down Went the Mercury.

Sitting alone at one of the big concerts last winter, I chanced some casual remarks to a man on my left.

After some pleasant conversation I noticed a celebrity in the front row, and pointing him out to my companion remarked: "That old fellow used to have a wonderful tenor voice; it's all cracked to pieces now, though, and rather painful to listen to. The old man doesn't seem to realize it, though. Don't know him, do you?"

"Yes," replied my companion. "He is my father."

At the first interval I found myself another seat.—Exchange.

No Chance.

Mayor Lew Shank visited school No. 3, and warned the boys and girls of the many traffic dangers, and explained to them their part in keeping the streets "safe for boys and girls." He asked the boys how many wished to be police officers.

One tow-headed little chap held up his hand.

"I want-a be a cop," he piped.

"Are you Irish?" the mayor asked.

"Nope," came the reply.

"Well, there isn't any chance for you, son. You'd better take up something else," was the mayor's disappointing advice.—Indianapolis News.

Fish Stories.

Representative Merrick was talking in Oklahoma City about a fish speculator who had made millions during the war.

"It's a good fish story," he said, "and fish stories are popular. In fact, they've been popular ever since the days of Jonah.

"In the days of Jonah the fish swallowed the prophet and the people swallowed the story, but nowadays the people swallow the fish and somebody also swallows the profit."

The Greatest Dam.

The world's greatest dam, the Senar, is being rushed to completion on the Blue Nile river, 2,000 miles south of Khartum, Africa, where Lord Kitchener became famous.

This dam will bring under irrigated cultivation 3,000,000 acres of farming land now idle. It will run a swarm of factories, mightier than the pyramids.

Ancient way of conquering a territory was to enslave the inhabitants. Modern man's great conquests harness nature's forces and free human labor.

Couldn't Be Done.

"In Italy the law requires a theatrical performance to live up to all claimed for it in the advertisements."

"Well, they'll never try that in this country."

"Why are you so sure."

"Why, we have more sense than to ask anyone to accomplish the impossible."

No Labor Saved.

"Why did you quit going around with that labor-saving device?"

"Had to work too hard trying to sell it."

BULL POUT QUITE AT HOME

Heroes of This Remarkable Fish Yarn Furnish Something New in Piscatorial Stories.

One feels almost like apologizing for telling a fish story that isn't a bit like any other fish story ever told since the days of Jonah, but there is one good excuse for the uniqueness of this fish story. It is gospel truth, says George L. Brown, according to the New York Sun. The scene of it is Elizabethtown, a village completely surrounded by Adirondacks.

The streams and ponds around Elizabethtown have been famous in their day for speckled trout and more recently for pickerel, perch, black bass and bull pout.

Let the humble bull pout be the hero of this yarn, the "Sacramento cat," as he has been named in California, the sluggish browser of weedy ponds, that will live wherever a frog can and bite anything from an angleworm to a piece of a tin dinner pail. And the bull pout's tenacity of life may be credited with a good share of the uniqueness of this unprecedented fish story.

In the days when the thing happened the young fellows of Elizabethtown used to go fishing for bull pout Saturday nights in Lincoln pond or in the "marsh" not far away. And on Saturday night Carl E. Daniel and his cousin, the late Arthur H. Norton, went out and brought home a fine mess after midnight.

Carl was tired and he just dumped his bull pouts with the grass in which he had carried them home, into a dishpan. Then it occurred to him to put the dishpan in the kitchen sink and turn on the faucet a little, and he did so before going to bed.

That's where the story begins. The rest of it happened while Carl was asleep. You see, the grass overflowed with the water from the dishpan and clogged the drain of the sink. And then the sink filled up and overflowed. And then the whole of the ground floor of Carl's home, "Colonial Cottage," became a pond. And when Carl got up on Sunday morning and went into the kitchen he found all his mess of bull pouts swimming around over the floor as happy as if they were back in Lincoln pond.

That's the story, and if you doubt that it happened in just that way you can ask Carl, who is now head of the Elizabethtown Hardware company, Inc.

A Secret Society.

"It would shock, or bore, or disgust the world in general, I suppose, if all the school teachers and office workers who want to marry should suddenly tell the truth. The public prefers to believe that women cherish their economic independence more tenderly than they ever could cherish husbands and babies. And our pride helps to keep up the great delusion.

"Many of us, especially the older ones, would never admit our loneliness and disappointment, perhaps, even to ourselves; but the majority, I believe, have 'had to tell' someone—some equally lonely woman friend—whether or not we told it in words, the story of frustrated hopes, of baffled instincts, of imprisoned powers.

"We form a kind of great secret society. The initiation is, mercifully, gradual; the dues are endless; the badge may be anything from a commutation ticket to a Phi Beta Kappa key; the password, seldom uttered, is always the same—loneliness."—From "No Courtship at All," by Another Spinster, in the Atlantic Monthly.

Clever Smuggler Caught.

What is said to be one of the cleverest devices ever developed for smuggling was uncovered on Puget sound recently by federal officers, when a speedy power boat, believed for several months to be a successful smuggler of illicit goods from Canada into the United States, was captured at Seattle. It had been known for some time, federal officers state, that a dumping device was in use on some of the smuggling boats, says Popular Mechanics Magazine, but a complete outfit of this type had never before been captured. Along with the seizure, more than $2,000 worth of contraband was taken, which made it possible for the government to confiscate the boat.

Climbs Fujiyama Top.

Maj. Orde Lees, British balloonist and Arctic explorer, has just completed a trip to the summit of Fujiyama, the celebrated mountain in southeastern Japan. It is said he is the first European to have reached the top of the mountain in winter, which is 12,365 feet above sea level.

Major Lees was accompanied by H. C. Irish of London, and accomplished his feat in 48 hours. The last 4,000 feet of the climb were made over slippery ice. Major Lees was a member of the Shackleton Antarctic expedition in 1914, and he and Mr. Irish are members of the British air mission to Japan.

Electric Sealing Machine.

A sealing machine, in which the wax is electrically melted and which is intended to meet the requirements of bankers, brokers, jewelers and large commercial institutions in the sealing of valuables, has made its appearance. The machine can be attached by a cord to any light socket and operated at a cost of one-half cent an hour.—Popular Mechanics Magazine.

Spanish Shawl Is Theater Curtain.

A new drop curtain in one of the New York theaters is really a gigantic Spanish shawl of silk and lace, 35 by 40 feet in dimensions. To embroider the huge fabric took 75 of the most skilful Spanish needlewomen 34 days.

We Greet You

In casting about for suitable words with which to convey our deep appreciation of your past favors, we are at a loss, but you will please accept from us most cordial greetings. May the year 1923 prove to be your best, biggest and happiest. We have endeavored to merit your confiuence and favors, and will devote ourselves industriously to serving you in the year to come. Consider yourself especially invited to command us.

Wellemeyer Dept. Stor

We extend to you the Season's greetings and the wish that you may enjoy in full measure, health, happiness and prosperity in the days to come.

Jacobs & Son

A Happy and Prosperous 1923 is our wish to our many friends. We have been glad to serve you in the past, and ask a contiuance of your patronage.

The Irving Cafe

Not because it is an honored custom, but because of our sincere friendship, we wish you a happy and prosperous New Year.

Henry Lewis

We value your friendship highly and realize that the only way to acquire that good will is by giving perfect service. Fully appreciative of past favors we greet each of you with best wishes for a Happy, Prosperous 1923.

Greimann Motor Co.

Among our assets we like to count the only thing money cannot buy—your good will. And so, at this Holiday Season we extend to you the best wishes for the coming year of 1923. Lloyd Lau,

The Klemme Dray Line

May the year about to be ushered in be full of the good things which we wish you. Your patronage in the past we appreciated, and will try and merit your good will in the year to come.

Coobs & Buss Garage

It is our pleasure to greet our friends with best wishes for a prosperous year to come and invite you to call upon us when in need of the best of barber work.

McCullough Barber Shop

When in need of best barber work, I shall be of service to you. Sincere good wishes for 1923 and thanking you for favors of the past.

C. A. Bachman, Barber

Season's Greetings

We wish all friends and patrons of this farmers' organization to accept our heartiest thanks for favors of the past year. Our business the past year has been very good and we feel that we owe much of our success to the farmers and friends who have worked for this organization; your co-operation is sincerely appreciated. May the coming year mean greater happiness and prosperity for you and yours.

Klemme Co-Op Grain Co.

Wire Cage for $5,000 Tree

Jersey Farmer Sold Freak Branch Which Bore New Variety of Fruit.

GHT BY NURSERY FIRM

Was Paid $1,000 and Will Get Cents for Each Bud That Developed—Will Be Subjected to Exhaustive Tests.

rell, N. J.—A wire cage has been ructed around the "$5,000 apple in the orchard of Lewis Mood, a living at Ferrell, in South Har- township, Gloucester county. recently sold a branch from this ular tree, producing an entirely ariety of apple, to one of the big ry firms of the country for what to be a record-breaking price for fruit.

public will have to wait two or more before it can learn very about the Mood apple, as it is guarded with the greatest y, indicated by the erection of out wire cage entirely around ee. All that is known so far is it is a red apple of exceptional d sweetness. There is no other just like it in this country, so horticultural experts have been o determine.

To Be Tested.

new variety will be subjected to ost exhaustive tests under vari climatic and soil conditions ghout the United States, before ursery firm which has bought it ling to place it upon the market. d science as applied through top g wil make it possible to pro- the new fruit in quantities large h for experimental purposes with ear or two.

new apple is purely an accident ture, being a freak from one of rdinary orchard varieteis. Mood d several years ago that one o anches of a particular tree in chard was bearing an apple that ifferent, both in color and flavor the fruit from other limbs on the ree. He watched this apple care for season after season. He took me buds and started other trees. g red Mood apples were in such d among his customers that last he sold $75 worth of apples the original tree alone.

Nursery Men Interested.

epresentative of a nursery com learned that the Jersey farmer apple that was attracting atten- nd he called to see Mood. "I had t of trying to put out this new myself," said Mood in talking of ad." "I put a price on the apple I thought would keep those fel from pestering me about selling. got the head of the company here to look over the apple and to see the tree and we came to terms."

Just what these terms are are set forth in a bill of sale and a surveyor's record of the exact location of the tree, which have been filed in the Gloucester county clerk's office at Woodbury. Even the particular branch of the tree is designated in this unusual record.

According to the agreement on file which is corroborated by Mood in personal conversation, he has received $1,000 in cash and is to get $4,000 in "royalties" at the rate of two cents for each bud that is taken from the original branch or any trees developed from it. These buds will be grafted upon stock to produce trees of the new variety.

"Five thousand dollars seems like a big price for an apple," remarked one well informed nurseryman regarding Mood's sale, "but in these days a new apple of exceptional quality, color and size is worth a small fortune to any one who has the courage and organization to introduce it to the nation."

Wire Fence Kills Two Half a Mile Apart

Lufkin, Tex.—A boy and a man, although half a mile apart, were killed at almost the same moment by contact with a wire fence, charged by a high tension wire, which had fallen across it during a storm. J. D. Adams was killed in front of his home and Carman Brid, in a field out of sight of Adams' home, starting to go through the fence, touched it also with fatal results. A neighbor of Adams was shocked in trying to effect a rescue.

THOUSANDS OF BIRDS SAVED

Blown Out to Sea From United States, They Land on Liner for England.

Liverpool.—Thousands of American land birds, blown out to sea by unfavorable winds, sought safety on the decks of the Cunard liner Scythia on a recent trip from New York and stayed on board until it docked at Liverpool. When misfortune overtook the feathered travelers they were migrating, probably from the North Atlantic states to the warm lands bordering on the Caribbean. Now many of them again are free, but in England, thousands of miles from their destination.

The great flock settled on the Scythia's decks when the steamer was about 400 miles from the American shore, and transformed it into a floating aviary. Wild canaries, robins, linnets, thrushes, sandpipers and juncos fluttered around the decks, perched on the rigging, and even penetrated the lounges and engine room. The passengers and crew cared for them, giving them warmth, food and shelter, but, even so, many of the smaller birds died from exhaustion. Three owls and a score of pigeons were easily captured.

Old sea travelers say they never have known birds to alight before in such large numbers on a single ship.

Star RZ Cephei Fastest of All

Harvard Observatory Declares That 2,500,000 Miles Per Hour Is Its Pace.

LONG KNOWN TO ASTRONOMERS

Speed of the Star Was Measured at Harvard Observatory by Complicated Process of Observations and Computations.

Cambridge, Mass.—Nearly 2,500,000 miles per hour, or 1,100 kilometers per second, is the speed record set by the star RZ Cephei, which, according to a bulletin issued by the Harvard college observatory, has been found by Harvard astronomers to be moving through space with a greater velocity than that of any other star whose speed has yet been determined.

This star, a variable star of the so-called cluster type, has long been known to astronomers, but its velocity was never measured until recently. It is far too faint to be seen with the naked eye, is being of the tenth magnitude. It is in the constellation Cepheus, and is 3,800 light years distant from the earth, which means that the light from it which astronomers now see through their telescopes started on its journey to the earth in the time of the shepherd kings of Egypt, nearly 1,900 years before Christ.

Velocity Is Greatest.

That distance is only a small fraction of the distance from the earth to some of the more distant star clusters, but the outstanding fact about RZ Cephei is that its velocity as it flies through space is the greatest yet known for a star.

The speed of the star was measured at the Harvard observatory by a complicated process of observations and computations, including among other things the comparison of photographs recently taken at Harvard with others taken 31 years ago, when the observatory was just beginning its task of preserving a photographic history of the entire sky. Since that time a "sky patrol" has been kept without interruption at Cambridge, supplemented by photographs taken at the station at Arequipa, Peru, and the history of the stars down to the eleventh magnitude has been written by the stars themselves on over 250,000 photographic plates weighing 140 tons.

Study Sky Photographs.

Most of the discoveries made by Harvard astronomers, it is said at Cambridge, are not made by looking through a telescope at night, as is popularly supposed, but by doing what was done in the case of this discovery of the speed of RZ Cephei, by studying and measuring by day, in the laboratory, photographs taken at night, and by computing the significance of the changes in the brilliance or position or spectra of the stars as recorded on these plates.

The discovery of the immense speed of RZ Cephei is said to be important to astronomers as suggesting that this type of variable star escapes from the globular clusters, a hypothesis suggested also by other recent observations.

ooks Like Women's Ku Klux Klan

ve hundred women, garbed as those in robes and masks like those worn Ku Klux Klan, paraded the streets of Atlanta a few night ago, refusing their names, but stating that they were members of a secret Protestant zation for women which is to become nation-wide in its extent. They ey were initiating their members on top of Stone mountain, the spot the Ku Klux Klan was organized and where the Klan still holds its nles. Every indication is that a woman's branch of the Ku Klux Klan g organized, although the Klan denies any affiliation with it.

NSION LINE IS GROWING THINNER

issioner's Report Shows il War Men Are Fading.

00 Less Paid to Veterans in —73 Soldiers Drawing Pensions for Service in Mexican War.

ington.—The American pension cost the public $255,201,662 the fiscal year ended last June rding to the annual report of missioner of pensions. Of this $253,807,583 was paid out for s, the cost of maintenance of em being $1,394,079.

the number of pensioners is diminishing is shown in the t that $4,908,259 less was paid ons during the last fiscal year ring the previous year; that Civil war veterans died, as 24,775 for the previous year, 21,250 widows died, as com- 19,451 the year previous.

The number of pensioners on the rolls June 30, 1922, was 547,016, compared with 566,053 on June 30 the previous year. Of these 193,881 were Civil war veterans; 271,194 Civil war widows; 45,955 veterans of the Spanish-American war, and 9,198 widows of Spanish-American war veterans. There were 73 soldiers drawing pensions for service in the war with Mexico and 49 widows of soldiers of the war of 1812.

Several important modifications of the practice of the pension bureau were brought about during the year by departmental decisions. One decision held that a person who enlisted in the regular army subsequent to April 22, 1898, and was discharged on or before April 11, 1899, or who enlisted in the navy or marine corps after May 4, 1898, and was discharged prior to April 11, 1899, could be considered "a volunteer." This holding favorably affected hundreds of claims filed by widows and minors of soldiers of the Spanish-American war.

In the last fiscal year, 130,736 pension claims were disposed of and 2,269,767 checks prepared and sent out. At the close of the year 82,615 claims under various pension laws were pending.

ONE-TON CANDLE FOR CARUSO

Sixteen-Foot Memorial Taper Made In New York Designed to Last Eighteen Centuries.

New York.—A candle of chemically treated beeswax, five feet in circumference at the base, 16 feet high and weighing one ton, known as the Enrico Caruso memorial candle, has just been completed in the studios of Antonio Ajello & Bro., and will be shipped to Pompeii, Italy, within a few days. It cost $3,700 and was made on the order of an orphan asylum in New York of which Caruso was a generous benefactor.

The candle will be placed in the Church of Our Lady of Pompeii, where Caruso last worshiped. It is intended to last 18 centuries, burning, at the suggestion of Cardinal Vanutelli, 24 hours on each All Souls' day.

New Year's Dream

By Evelyn Heath

(NOTE.—This article, printed in the Boston Globe in 1893, predicted many things which have become a reality in much less time than anticipated.)

THIS New Year's eve while I lounged with nothing else to do, I scanned each column of the Globe and almost ere I knew a growing dimness stole across the printed page; I drew it nearer, and behold! 'twas yellowed o'er with age. My hands, I found, had wrinkled grown, my locks were changed to gray; my form was bent, my vision dim, my teeth had passed away. And as I gazed I heard a voice, "Good morning, grandma, dear! I wish you many, many times a Happy, Glad New Year." Then tall men said they were my sons, and daughters fair to see told me this wasn't ninety-three, but nineteen forty-three.

Said I: "My memory has failed; how goes the world today?"

"You shall go out this afternoon and see the town," cried they.

At that the tears flowed down my cheeks. Quoth I, "The days are ended when these poor eyes could see the sights."

"Oh, no! we'll have them mended."

A grown-up son then seized a knob and gave three pulls upon it: "The car will be here at once, mother; put on your bonnet." And while he spoke the coupe came; 'twas wonderful to me, how faster than e'en fabled horse was electricity. My son just turned and touched a screw; you'd think I'd lost my mind if I should tell how fast we flew, for we left the wind behind.

We went to see the surgeon first. "The lenses crystalline have grown too flat with age," he said. "We must put new ones in."

With that he hypnotized my mind in some peculiar way, such rare sweet visions floated by, then quickly passed away.

I woke, my eyes were strong and well, and hastening to depart we paid the fee and entered next a gallery of art. But as to pictures, when I turned, so very strange they seemed, I thought the artist must have sketched the stories he had dreamed.

"We never think of painting now," my guide said, with a laugh. "These are but landscapes in the moon, taken by photograph."

"What! are there people in the moon?"

"Oh, yes, indeed!" said he. "Here is a lunar telescope; look through and you will see."

I gazed, and to my great surprise distinctly saw them walking. I listened at another tube and there I heard them talking.

"You see," said he, "we've learned to catch such swift, intense vibrations in the thin ether that we hear their slightest intonations. You look surprised," my son went on. "I'll show those eyes of yours a sight worth while, our famous scheme that beats the Paris sewers. These little gutters ramify through all the streets and streets and catch the rain and hail and melting snow. These tiny gratings match, conducting down to pipes beneath, which take it miles below straight towards the center of the earth, where the great heat, you know, will turn it into steam of course, and up it comes again, by other pipes, to spin and weave and cook and print for men. It feeds the factories through the land with no expense for fuel; it polishes for artisans full many a precious jewel. We've laid large pipes through all the streets to warm the winter weather, so rheumatism's out of date and done with altogether.

"Now, mother, we will go and lunch in Afric's sunny clime," and drawing out his watch he said, "I see there's ample time. The sub-Atlantic tunnel's done; we'll take it over there. The cars are sent through every hour by the force of compressed air." He placed me on a cushioned seat within an egg-shaped car, suspended in an iron tube. I felt a sudden jar, and then, to my astonishment, conscious of nothing more, I found that we were standing upon the farther shore.

And soon we reached a city near the Mountains of the Moon. (They told me Ethiopia would be admitted soon as one of the United States, for China late had been.) We found a place to order lunch, by three tall men brought in. They served us well, but spoke no word, while gravely bowing low.

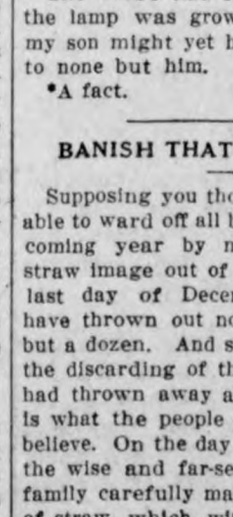
Quoth me: "I thought that slavery was done with long ago."

"So 'tis," said he. "Then who," I asked, "are these three stalwart fellows?"

"They are not human, mother, dear: they're only tame gorillas."

Much as I feared the tunnel then, I feared gorillas more, and glad was I to come again back to our beloved shore.

"When home once more my son remarked: "You'll want to see the play at the Olympian theater; it is their matinee."



"I think I'd like to stay indoors," I said, "and rest awhile."

"Oh, well, you need not leave the house," he answered with a smile. "We do not go to theaters like the canaille, I hope. Just darken, close the drawing-room, open the dioscope and you will see the actresses, the cornices and frieze. Beside it stands the telephone and you can hear with ease."

"What is a dioscope?" I cried.

"A small, objective lens, so placed as to command the stage (as all the world now kens), connected by electric wire with yon white plate of glass that's framed in panel on our wall, and over this will pass the scenery and actors both until the play is through. By electricians it was tried in 1882.* But that is quite old-fashioned, so I'll show you something new. You'll want to ride in my balloon directly after tea; I'll take you, if you're not too tired, up to the Polar sea."

His kindness overpowered me, and I began to weep, when someone shouted in my ear, "You are crying in your sleep."

The Globe had fallen on the floor, the lamp was growing dim, so what my son might yet have said is known to none but him.

*A fact.

BANISH THAT STRAW MAN

Supposing you thought you had been able to ward off all bad luck during the coming year by merely throwing a straw image out of your house on the last day of December. You would have thrown out not only one image, but a dozen. And supposing that with the discarding of the straw effigy you had thrown away all your sins. This is what the people of far-away Korea believe. On the day before New Year's the wise and far-seeing head of each family carefully makes a rough image of straw, which, with great ceremony, is taken to the door and thrown away with all the vigor a man would exert when he threw away ill fortune.

NEW YEAR OF ANCIENTS

The ancient Egyptians, Phoenicians and Persians began their new year at the autumnal solstice (September 21) and the Greeks, until the Fifth century, B. C., began the year at the winter solstice (December 21). In 432, B. C., the Greeks changed the festival to June 21, the beginning of summer.

THE JULIAN CALENDAR

In the Julian calendar New Year day occurs 12 days later than in the Gregorian and the countries in which the Greek church predominates observe the holiday on January 13.

Our Long Suit

AMID the vicissitudes of this changing time and with the consciousness of temporariness that comes with the flight of a year, it is pleasant to think of the enduring character of the best thing in life, unfailing love, as does the writer of the following verses:

CARDS and the game are ours as time flits by
And deals us chances on the uncertain stage,
But, while our wisdom may increase with age,
We seldom win, however hard we try.

Clubs promise most to our insistent youth,
And diamonds glitter to our later gaze,
But melancholy spades our hopes amaze
And leave them buried after all, forsooth.

We count the riches of the passing days,
Our gains, our losses, and our gain withal,
Our greatest gain, the one that once so small,
Ever increasing, stays with us always:

Joy after joy approaches and departs,
But we have kept the fellowship of hearts!

—Timothy Barry

The Idyll of a Tug Boat

By Christopher G. Hazard

(©, 1922, Western Newspaper Union.)

THE matter with Andrews is that he cannot keep upon any one course. He tacks all over the bay but does not make any port. Shifting as a weather vane, he is as contradictory. He started upon the road to a profession, but landed in a brick-making concern. Then he concluded that he was meant for big business, but he tried to start too high up. A chicken farm was his next employment and it netted him a large amount of costly experience. He now thinks of trying mining, but will undoubtedly dig up disaster. If he ends as a good shoeblack it will be at the bottom, where he ought to have begun, and he will be nearer to true progress.

The tug boat that was proceeding up the river was named "Patience." It was tugging a long following of canal boats at a slow pace. It was making its way towards a definite point and over a prescribed and limited course. And it was going to get there. All its energy was pledged to perseverance in the practice of the proverb, "It's doggedness as does it." The eagle over the pilot house had its wings spread, although it could not fly yet. The boy who stood at the bow said, "I'm only a ship's boy now, but I'll be a man tomorrow."

Can success find such a leap year as will enable it to land at the end of a twelvemonth without plodding towards it from its beginning? Is there any recipe that will enable a young fellow like Andrews to obtain his father's position and wealth without pursuing his father's path of long and patient toil? Must not the well of a bucket shop run dry? Can a gambler finally break the bank?

And can a Jack-at-all-trades be a master of any? No! The times call for specialists, rather than general practitioners. It will be a New Year indeed for everything in general when it becomes something in particular. Better the patient, persistent tug boat than the more exciting but less profitable airplane. The ship's boy of today must precede the captain of tomorrow.

NEW YEAR'S CALLS

From old Dutch times to the middle of the Nineteenth century New Year's day in many American cities was devoted to the universal interchange of visits. Every door was thrown open and it was a breach of etiquette to omit any acquaintance in the annual calls, when old friendships were renewed and family differences amicably settled.

NEW YEAR GIFTS

The custom of giving and receiving gifts on New Year day, which originated in Rome, still survives in France and Scotland, although in most countries the exchange of gifts at Christmas has taken its place.

WHAT SHALL WE WRITE?

What shall we write on the fair new page called 1923? Can we not make it a record of golden deeds?—Youth's Companion.

News of Klemme and Vicinity

Mr. and Mrs. G. P. McCullough spent Christmas day at Garner.

New Years Dance at Idle Hour, Monday nite. Hunts orchestra. adv

Don't forget Lau's sale January 10th. Watch for big ad next week.

Rod Rhodes of Garner was a business visitor here Saturday.

Mrs. Edwin Schmalle was up from Goodell las Wednesday shopping.

Mrs. Julius Cook from Goodell. was shopping in Klemme Friday.

New Year's Dance at thme Idle Hour Monday nite. Hunts Orchestra. adv

Mr. and Mrs. C. A. Bachman were visitors at the Irv Henry home at Ventura Christmas day.

Rev. A. B. Gedye went to Algona Friday on business. returning the next evening.

We are a little late with the paper this week, as we lost one day—Monday, that being Christmas.

John and Chester Hake from Belmond were visiting their brother, George Hake, Thursday.

Mrs. R. M. Thomas is enjoying a visit from her mother, who came Friday for a visit.

Danny Johnson came home Saturday from Iowa Falls, where he is attending college.

Mr. Ortmeyer and family of Garner were dinner guests at the Albert Yahnke home Christmas day.

Mr. and Mrs. Elmer Fuller and daughter, Mavis, spent Christmas at the home of Mrs. Phil Behringer.

Mr. and Mrs. T. F. Mitchell, of Swea City, spent Christmas at the C. F. Keraus home.

Mr. J. Jorgenson, of Garner, was a visitor at the R. A. Jorgenson home Monday.

Miss Glenna Gruetzmacher is here for the holidays. She attends the Britt school this year.

Mr. and Mrs. Henry Lewis drove over to Sheffield Sunday.

Mr. and Mrs. Henry Lewis spent Christmas at Clear Lake.

Mr. and Mrs. Clarence Waterman entertained a number of relatives on Christmas day.

Rev. Gedye and family were entertained at the Clarence Larsen home on Christmas day.

Miss Evelyn Greenwood of Belmond is visiting at the Joe Stearnes home.

Mr. and Mrs. Glen Cannon from Maynard, Iowa, came Wednesday for a visit at the Hake home.

Mr. and Mrs. Earl Ruke, and children of Goodell, were Klemme visitors Wednesday.

C. M. Bredbenner has completed his annual job of filling his ice house. This year he secured especially fine ice and put up about 200 tons.

Olaf Erickson left Saturday for Odebolt, Iowa, to spend a few days with home folks. Ole manages to get home at least once a year.

Mr. and Mrs. F. J. Wenck were Sunday visitors at Renwick, and on Christmas Day were entertained at the Joe Wenck home at Garner.

Have you seen the Radio Outfit which Wellemeyer sells for $65.00? adv.

Donald Nissen came from Sioux City Saturday for a short visitt at the J. N. Day home.

Mrs. Ben Katter and children of north of town were visiting with Mrs. R. W. Elder Friday.

Mr. and Mrs. Fred Chase from Goodell were doing their Christmas shopping in Klemme last week..

Miss Mary Rieken from Belmond was visiting with Miss Lena Swalve last week Wednesday.

Bert Mathews was on the sick list since last week Wednesday. He is suffering an attack of appendicitis.

A gold ring was found at the M. E. Church Xmas night. Call for it at the parsonage.

Just one dry battery is all the juice required to operate the Radio receiving outfit which Wellemeyer sells for $65.00. adv

Floyd and Cyril Fraser, of Garner, were Klemme callers lats Thursday. They are sons of Dr. Fraser, and are in lyceum work this year.

Mis Lena Bergmann came home Friday morning to enjoy her Xmas vacation. She attends Morningside College at Sioux City.

Earl Josten, a student at Morningside College, at Sioux City, came Friday morning to spend his holiday vacation with his parents here.

Mr. and Mrs. C. A. Bachman are now settled down in their home. They rented the Mrs. Gilbert Schaper property.

Mr. Hake came home from Tripoli, Iowa, to spend Christmas with his family here. He returns again Tuesday.

Mrs. Henry Yahnke, Jr., and her children. from Minnesota, are visiting Klemme relatives during the holidays.

Miss Hartzell from Ruthven, Iowa, is spending her vacation visiting at the home of her sister, Mrs. Lester Stille.

Mr. and Mrs. Hocum and children and Mrs. Wiley, of Iowa Falls, were Christmas Day visitors at the R. A. Jorgenson home.

Mr. and Mrs. M. Croner and Mrs. Schroeder entertained for a Christmas dinner. Mrs. Lena Schroeder and daughter, Adella, and Mr. Aug. Barz.

Ed. Jacobs and wife spent Sunday with her folks at Clear Lake and on Christmas day took in another feed at the Chris Jacobs home at Garner.

Mr. and Mrs. Louis Luick, of Belmond spent Christmas at the home of their daughter, Mr. and Mrs. LuVerne Smith.

Mr. and Mrs. Herb Stille and their daughter, Mildred, came last Wednesday from Colorado to spend the holidays with Klemme relatives.

Bert Trumbell came Saturday for a visit with Klemme relatives. He has not been home since the 4th of July.

Well Paul Grange and wife have finally located a suitable name for that young man who came to board with them last week. Dorance Samuel is his name.

Verner Nelson left on the Rock Island south Friday nighth. We did not learn whether he was bound for Indiana to spend the holidays, or not. Maybe Verner will enlighten us he next time we see him.

Miss Anabell Carlson left Friday evening for Crown Point. Indiana, where she wil visit with her sister, Mrs. Weaver, formerly Manilla Carlson, of this city.

Mr. and Mrs. Gordon Sherman, of Torington, Wyo., came last Wednesday for a visit at the Al White home. Mrs. Sherman is a sister of Mr. White.

Jay T. Griggs has also caught the Radio Bug, and last week installed a radio receiving outfit at his home. Jay bought an outfit from Wellemeyer and he is having a lot of fun.

Farmers and Stockmen should attend the A. G. Lau sale, Jan. 10. Some o those roan shorthorns will look good in your herd; and the cows are T. B. tested too. adv

The Wellemeyer Dept. Store sold six Player Pianos during this fall rush, which took every piano off their floor. However, they have three more on the way which should arrive within the next two weeks. adv.

W. F. Pavey has installed a radio outfit. It will be a real treat to old Dobbin when he goes to the Pavey shop for new slippers to be entertained by a radio concert while the shoe-fitter works on him.

Guess we'll have to quit talking about the farm being a lonesome place.

It is said that it is impossible, in Iowa, to get more than twelve miles away from a railroad. With the auto and any sort of going that is only a few minutes from company. Add the daily delivery of mail, the radio and other modern conveniences—well, we're pretty close together.

Mr. and Mrs. W. C. Keraus entertained the following or Sunday dinner: Mr. and Mrs. C. F Keraus and Mr and Mrs. C. G. Waterman of this city, and Mr. and Mrs T F Mitchell f Swea City

John Peterson, the evangelistic singer, returned from a visit with his parents at Royal, Iowa, to spend Christmas at the Joe Johnson home. He also sang at the Christmas Tree exercises at the church.

Mrs. J. W. Brooks and Miss Laura Brooks entertained the following on Christmas Day: Harry Brooks and family, Charlie Luick and family, Joe Stearns and family, and Ollie Brooks and family. There were 20 in all.

Still have some pure bred R. C. R. I. Red Cockerels for sale. Fine dark red, big boned, healthy birds. Early hatched, $1.75 each, late $1.50 each. A bargain at this price. Mrs. Dick Swalve. 1w

LOCALS— H hw ilS

Hog cholera is sure death to hogs. Many hog raisers in this locality have had this sad experience. The hogs offered at the A. G. Lau sale are cholera immune. Sale Jan. 10. adv.

Mrs. Will Hampel's mother, who has been here since October, left today for Watkins. Iowa, for a visit.

Mr. and Mrs. R. W. Elder and daughter, Reva, were Clear Lake visitors yesterday. Reva stayed for a ew days visit at the Elmer Fuller home.

A baby girl was born to Dr. and Mrs. J. L. Hesselhuus Sunday morning but passed out of this world on Christmas morning. The body was taken to Marshalltown for burial. Funeral services were held there on the following day. Dr. and Mrs. Hesselhuus have the sympathy of the entire comunity in their sorrow.

Mr. and Mrs. G. W Kluckhohn had their annual Christmas dinner for their children and grandchildren Sunday evening. After dinner the big Xmas tree was lit up and the presents distributed. This is quite an event for the Kluckhohn family and one looked forward to the entire year. 21 one plates and 21 presents is the way grandpa puts it, hard on the pocket book but well worth it, George says.

It is impossible to do good farming with poor machinery, whether old or new. The macinery at the A. G. Lau sale is in first class condition and will do good work. And just think, you can use it to put in your crop, market the crop and have the money in the bank, before the note is due, and still have the machinery. adv.

Mr. and Mrs. U. G. Smid celebrated their thirtieth wedding anniversary last Friday. A number of old friends and neighbors came in to help them with the big event. Reshments were served and all had a fine time talking over old times and visiting. Mr. and Mrs. Smid were also remembered with some beautiful gifts.

Fred Haupt is a regular Santa Claus; being at and jolly, he looks it, but thats not all. he acts like a Santa Claus too. During the last several years he has purchased three different pianos which he has given as presents to his dear ones. This year at Christmas time he remembered his grand daughter, Miss Mable Schuldt, with a nice new Bush& Gerts piano, from the Wellemeper Store.

The people have been finding us out; they have been telling one another that Wellemeyer's Tinker Shop is a good place to have shoes repaired, and for these two reasons: The good quality of our sole leather makes your shoes last twice as long. Our up-to-date equipment enables us to repair your shoes while you wait. With quality and quick service as our watchword, is it any wonder that Wellemeyer's Tinker Shop is a Busy Place? adv

Now we learn that Al Koerner is having an awful attack of radio-bugitis and is orced to remain at home most of the time. Yep. Al got bit just in time to have to stay in the house Christmas Day tuning in on the ether waves. Al has the biggest radio outfit in this neck of the woods and we would not be surprised to learn if he "listens in" on a concert from China.

GOODELL NEWS

The dance here Saturday night was well attended. The Junior College Orchestra of Mason City furnished the music.

Louisae Mason, Louisa Ahrenkeil, Dorothy Orkueg, Eddie Bollar and John Miller, who attended Coe College at Cedar Rapids are home to spend their Christmas vacation.

Mr. and Mrs. F. R. Chase were Mason City Xmas shoppers one day last week.

The Cantata which was put on by the ladies of the U. B. Church Sunday evening was very well attended. Candy, nuts and apples served as treats for the children, while coffee and buns were served to the grownups, in the basement.

Francis Cashman, who attends college at Ann Arbor. Michigan, is here spending the holidays with his parents.

Mr. and Mrs. Wm. Allaben are enjoying a visit from their sons, Vincent and Hammey, this week.

Jay Griggs, Dr. Snearly and Geo. Grosz all had radios installed in their homes last week.

Francis McNulty, Arthur Lowenberg and Mark and Marie Smith are spending the holidays at home.

Tom Cashman returned from Polo, Ill., last week.

Clifford Chase is the proud owner of a Ford coupe.

Mr. and Mrs. Hartley Blewett and little son Warner, were Sunday visitors at the Jay Griggs home.

The program put on by the Grade Pupils in the U. B. Church Thursday evening was well attended.

Mr. and Mrs. Jay Griggs were Belmond shoppers Saturday.

Mr. and Mrs. Joe Houghton, of Kanawha, were Sunday visitors in Goodell.

Charles Halfpop and family were Belmond callers Saturday.

Mr. and Mrs. E. A. Strasburg of Meservey at Christmas dinner at the Jay Griggs home.

Clement Houghton, of Garner, spent Christmas at Goodell.

Raymond Finn, who teaches at Avoca, spent Christmas with his parents.

Goodell High School News

Carrol Cashman was absent from school Tuesday morning.

The High School had a party after basket ball practice in th ehall Tuesday night. All present enjoyed themselves.

Eddie Bollar and John Miller visited school Thursday.

The Am. History class have nearly finished studying about the Civil war. They find it very interesting.

Louisa Ahrenkeil and Louisa Mason were welcome visitors Friday.

Thomas Quigley was absent Tuesday.

The Physics Class performed a very interesting experiment in determing the number of vibrations of a tuning fork Thursday.

Our next game of basket ball will be played at Crystal Lake January 5th.

The pupils are all enjoying a vacation this week.

HOLDS RECORD FOR LONG TIME KLEMME BUSINESS

Frank Gruetzmacher Has Been In Business Here Thirty Years

When December 12th rolled around it marked a thirty years continuous business career in Klemme for Frank Gruetzmacher.

Although not an old man Frank is certainly an old timer in Klemme. During those thirty years he has been in the same line of business and he says that he still has some of the old customers who traded with him first thirty years ago.

CHRISTMAS WAS WARMEST DAY HERE IN YEARS

Monday was perhaps the warmest Christmas Day here for a good many years. Along in the afternoon the thermometer climbed up close to 60 degrees.

Weather reports showed that it was the warmest Christmas we have had in Iowa since 1881, when the temperature was about the same.

It was so warm that overcoats were cast aside that day and those who went joy riding found the roads had thawed out and were real muddy. Several were seen washing up muddy flivers later in the day—including Ye Editor and John Day.

This locality has been enjoying a lot of mild winter weather and it is now many a day ago since the mercury has descended below the zero line.

Our California readers should have come to Iowa to spend the winter.

Clothing Project Meeting

The second meeting of the five months clothing project of Ell township was held at the nome of Mrs. C. Wille, Dec. 5th, and was well attended.

The next meeting will be held with Mrs. Will Hampel, Jan. 10th.

The project leader, and local leaders will take up the work learned at the last two meetings.

Anyone interested come.

Why smile at the five cent apple and frown at the five cent egg? Consider the constituents of eggs—vitamines and proteins, iron and other minerals, fat and water. Few other foods give us so much nourishment for a nickel; and besides, when the pullets begin to lay eggs will be cheaper.

TOO LAZY TO WRITE?

After a long wait you write a letter to some absent friend and make the excuse that you do not have time or was just "too lazy to write" as an excuse for not answering your friend letter. Why not send the Times to them or a year so they can have a weekly reminder that you have not entirely forgotten them. Less than 4 cents a week is a small sum to spend on a friend and no doubt nothing you could give would be more appreciated. Start the new year right by sending this paper to a friend.

People who are wondering why gasoline is more expensive than it used to be should remember that the users of gasoline are paying for thousands of fancy filling stations with good service, while formerly they drove up to a garage and had it pumped out of a buried tank.

Concrete floors can be made almost noiseless by covering them with heavy tar paper, attached by cement.

A leather covered metal tube to be slipped over an umbrella to roll it tight has been patented in England.

NOTICE TO AUTOMOBILE OWNERS.

After December 1st, 1922, this office will begin issuing 1923 licenses. Please bear in mind that unless your last registration number is given in applying for 1923 licence it will be necessary for us to return your application for that information.

SHERIFF'S SALE

FIRST NATIONAL BANK, KANAWHA, IOWA,
vs.
HENRY KAMP & KATIE KAMP
NOTICE IS HEREBY GIVEN: That by virtue of a Special Execution issued out of the office of the Clerk of the District Court, in Hancock County, on a judgement rendered December 6th, 1922 Term of said Court, A. D., for the sum of Eight Thousand Nine Hundred seventy and 85-100 Dollars debt, and Two Hundred Fifteen & 25-100 Dollars costs in favor of The First National Bank of Kanawha, Iowa, and against Henry Kamp & Katie Kamp, and to me as Sheriff of Hancock County directed I have levied upon the following described property, to wit:

One Promissory note for $7,5[illegible] dated March 1st, 1920, and due March 1st 1925, with five coupons thereto attached. And one note for $2,000.00 dated Feby. 14th, 1922 and due March 1st, 1922 with coupons attached; Said notes signed by C. H. Packard & Nellie Packard, and secured by mortgage on the following described real estate, situated in Wright County, Iowa, The South Half of the Northwest quarter, and the North half of the Southwest quarter of Section Two. Also the South Half of the Northeast quarter of Section Three, All in Township Ninety Three, North Range Twenty Four West of the 5th P. M. In Wright County, Iowa.

NOW, THEREFORE, Public notice is hereby given that I shall on the 30th day of December 1922 at 10:30 o'clock A. M., at the front door of the Court House, in Garner in Hancock County, offer and expose at public outcry, to the highest bidder for cash, all the right, title and interest that the above named Henry Kamp & Katie Kamp had on the 6th day of December A. D. 1922, or have in and to the above described property, or so much thereof as may be necessary to satisfy said execution together with costs and all accruing costs, unless the same shall be sooner satisfied.

Dated at the Sheriff's office in Garner, this 7th day of December A. D. 1922.

E. P. HANSON,
Sheriff of Hancock County, Iowa.
(D21-28)
